PERFORMANCE TECHNOLOGIES, INCORPORATED AND SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
(unaudited)

Note A Basis of Presentation

The unaudited Consolidated Financial Statements of Performance Technologies, Incorporated and Subsidiaries (the "Company") have been prepared in accordance with generally accepted accounting principles in the United States of America for interim financial information and with the instructions to Form 10-Q and Article 10 of Regulation S-X of the Securities and Exchange Commission. Accordingly, the Consolidated Financial Statements do not include all of the information and footnotes required by generally accepted accounting principles for complete financial statements. In the opinion of management, all adjustments considered necessary for a fair presentation have been included. The results for the interim periods are not necessarily indicative of the results to be expected for the year. The accompanying Consolidated Financial Statements should be read in conjunction with the audited Consolidated Financial Statements of the Company as of December 31, 2007, as reported in its Annual Report on Form 10-K filed with the Securities and Exchange Commission.

Note B Stock-Based Compensation

The Company has stock options outstanding from two stock-based employee compensation plans: the 2001 Incentive Stock Option Plan and the 2003 Omnibus Incentive Plan.

The Company recognizes compensation expense in the financial statements for stock option awards based on the grant-date fair value of those awards, estimated using the Black-Scholes-Merton option pricing model. The table below summarizes the impact of outstanding stock options on the results of operations for the three month periods ended March 31, 2008 and 2007, respectively, under the provisions of Statement of Financial Accounting Standards (SFAS) No. 123R, Share-Based Payment :

	Three Months Ended March 31,	
	2008	2007
Stock-based compensation expense:		
Stock options	\$ 167,000	\$ 159,000
Income tax benefit	(53,000)	(60,000)
Net decrease in net income	\$ 114,000	\$ 99,000
Decrease in earnings per share:		
Basic	\$ 0.01	\$ 0.01
Diluted	\$ 0.01	

The following table summarizes stock option activity for the first quarter 2008:

	Number of shares	Average Exercise Price
Outstanding at January 1, 2008	1,699,723	\$ 7.54
Granted	0	-
Exercised	(70,034)	3.85
Expired	(206,826)	8.49
Outstanding at March 31, 2008	1,422,863	7.58
Exercisable at March 31, 2008	701,630	\$ 10.02

The weighted average fair value of option grants was estimated using the Black-Scholes-Merton option pricing method. At March 31, 2008, the Company had approximately \$1,107,000 of unrecognized stock compensation expense which will be recognized over a weighted average period of approximately 2.2 years.

Note C Earnings Per Share

Basic earnings per share is computed by dividing net income or loss by the weighted average number of common shares outstanding for the period. Diluted earnings per share calculations reflect the assumed exercise and conversion of dilutive stock options, using the treasury stock method. Due to the net loss incurred in the first quarter 2007, there were no dilutive options considered for that quarter. The diluted earnings per share calculation excludes the effect of approximately 1,293,000 options for the three months ended March 31, 2008, since such options had an exercise price in excess of the average market price of the Company's common stock for the period.

Note D Inventories, net

Inventories consisted of the following:

	March 31, 2008	December 31, 2007
Purchased parts and components	\$ 2,323,000	\$ 2,620,000
Work in process	1,355,000	1,674,000
Finished goods	368,000	489,000
Net	\$ 4,046,000	\$ 4,783,000

Note E Software Development Costs

Software development costs consisted of the following:

	March 31, 2008	December 31, 2007
Capitalized software development costs	\$ 13,974,000	\$ 13,463,000
Less: accumulated amortization	(10,491,000)	(10,166,000)
Net	\$ 3,483,000	\$ 3,297,000

Amortization of software development costs included in cost of goods sold was \$325,000 and \$385,000 in the first quarter 2008 and 2007, respectively.

Note F Investments

At March 31, 2008, the Company held one auction rate municipal security with an original cost of \$2,450,000, after having received a partial redemption of \$50,000 at par in the first quarter 2008. This security was involved in a successful auction in January 2008, but the February, March and April auctions have failed. As such, the Company has not been able to sell this security and the Company believes its ability to liquidate this security without loss in the near term is limited. This security, originally acquired in December 2007, has a maturity date of May 2040, carries MBIA bond credit insurance, and is secured by student loans, which are partially guaranteed by the Federal Family Educational Loan Program of the United States Department of Education (FFELP). This security carries a AAA rating from two rating agencies and a AA rating from a third. The Company continues to earn interest on this investment at a rate, which at the time the auction failed, was increased to the contract maximum rate of 14% through May 31, 2008, at which time the contract rate will adjust to the default rate equal to 175% of the J.J. Kenny Intermediate Index.

index

Because of the uncertainty of when the Company will be able to liquidate this investment, the Company believes that the fair value of this investment is likely less than its par value at March 31, 2008 due to its illiquidity. The Company has estimated the fair value of this security to be \$2,251,000 at March 31, 2008. The estimated unrealized loss on this investment amounts to \$199,000 and has been classified as a temporary impairment, as the Company has the ability and intent to hold the security until such time as it can be sold in an orderly manner without loss. As such, the unrealized loss has been recorded as a charge to accumulated other comprehensive loss on the March 31, 2008 balance sheet. The investment has been classified as a non-current asset at both March 31, 2008 and December 31, 2007.

At December 31, 2007, investments generally consisted only of high-grade, AAA-rated auction rate municipal securities which the Company classified as available-for-sale. The Company successfully sold all but one of its auction rate municipal securities at par during the first quarter 2008.

In estimating the fair value of this investment, the Company has adopted the provisions of SFAS No. 157, Fair Value Measurements effective as of January 1, 2008 for its financial assets. This standard defines fair value, establishes a framework for measuring fair value in generally accepted accounting principles, and expands disclosures about fair value measurements.

SFAS No. 157 establishes a fair value hierarchy which prioritizes the inputs to valuation techniques used to measure fair value. Level 1 inputs are quoted prices in active markets for identical assets or liabilities. Level 2 inputs are inputs other than quoted prices included in Level 1 that are directly or indirectly observable for the asset or liability. Such inputs include quoted prices in active markets for similar assets and liabilities, quoted prices for identical or similar assets or liabilities in markets that are not active, inputs other than quoted prices that are observable for the asset or liability, or inputs derived principally from or corroborated by observable market data by correlation or other means. Level 3 inputs are unobservable inputs for the asset or liability. Such inputs are used to measure fair value when observable inputs are not available.

The Company's investment has been valued using Level 3 inputs. In order to estimate the fair value of the investment, the Company has employed a discounted future cash flows model, using the following estimated assumptions: the receipt of interest only over an assumed liquidity horizon of five years, calculated at the default rate (assuming such rate stays constant over the term); a sale of the investment at par after five years; and a discount rate of 11% on a pre-tax basis, which represents approximately a 4% illiquidity premium. The discounted cash flows model results in an estimated fair value impairment of approximately 8% below par.

The following table presents a reconciliation of beginning and ending balances of non-current investments valued using Level 3 inputs:

Beginning, January 1, 2008	\$2,500,000
Partial redemption at par	(50,000)
Unrealized gains or losses - included in other comprehensive income	(199,000)
Transfers in/out of Level 3	-
Balance, March 31, 2008	\$2,251,000

All income generated from the Company's investments is recorded in other income, net.

In February 2008, the Financial Accounting Standards Board (FASB) issued Staff Position 157-2 which delayed the effective date for implementation of SFAS No. 157 for one year for any non-financial assets and liabilities which must be recorded at fair value or for which fair value disclosures apply. The Company will fully adopt SFAS No. 157 effective as of January 1, 2009.

Note G Comprehensive Income

The components of comprehensive income (loss) for the three months ended March 31, 2008 and 2007, respectively, are as follows:

	Three Months Ended March 31,	
	2008	2007
Net income (loss)	\$ 591,000	\$(618,000)
Increase in unrealized loss on investment, net of tax	(127,000)	-
Comprehensive income (loss)	\$ 464,000	\$(618,000)

Note H Warranty Obligations

Warranty obligations are incurred in connection with the sale of certain products. The warranty period for the Company's products is generally one year from date of sale. The costs incurred to provide for these warranty obligations are estimated and recorded as an accrued liability at the time of sale. Future warranty costs are estimated based on product-based historical performance rates and related costs to repair. Changes in accrued warranty obligations for the three months ended March 31, 2008 and 2007 were as follows:

	Three Months Ended March 31,	
	2008	2007
Accrued warranty obligations, January 1	\$ 215,000	\$ 309,000
Actual warranty experience	(23,000)	(21,000)
Warranty provisions	23,000	(76,000)
Accrued warranty obligations, March 31	\$ 215,000	\$ 212,000

Note I Stock Repurchase Program

On July 11, 2005, the Board of Directors authorized the Company to repurchase shares of its Common Stock for an aggregate amount not to exceed \$10,000,000. Under this program, shares of the Company's Common Stock may be repurchased through open market or private transactions, including block purchases. This program has been extended through July 2008. Repurchased shares can be used for the Company's stock option plans, potential acquisition initiatives and general corporate purposes. Under this program, the Company repurchased 7,756 shares during the first quarter 2008 for an aggregate purchase price of \$37,000. For the program-to-date through March 31, 2008, the Company has repurchased 1,640,356 shares for an aggregate purchase price of \$8,053,000.

Note J Income Taxes

The Company's effective income tax rate is a combination of federal, state and foreign tax rates and is generally lower than statutory rates because it includes benefits derived from international operations, and significant permanent tax differences including research activities and tax-exempt interest. The Company's estimated effective annual tax rate was 29% for the three months ended March 31, 2008, and the tax provision for this period does not include any material discrete items. The estimated effective annual tax rate used for the three months ended March 31, 2007 was 18% and did not include any material discrete items. The change in the 2008 rate over 2007 is due to lower tax-exempt interest and the non-inclusion in 2008 of the United States research and development tax credit, for which Congress has not yet enacted legislation to renew.

index

The Company had unrecognized tax benefits of \$803,000 and \$807,000 at March 31, 2008 and December 31, 2007, respectively. Included in the balance of unrecognized tax benefits as of March 31, 2008 and December 31, 2007 are accrued interest and penalties in the amount of \$139,000 and \$146,000, respectively.

The Company files U.S. federal, U.S. state, and foreign tax returns. For federal tax returns, the Company is generally no longer subject to tax examinations for years prior to 2004. For state and foreign tax returns, the Company is no longer subject to tax examinations for years prior to 2003. Based upon the closing of the tax years in these various jurisdictions, the Company may adjust its liability for unrecognized tax benefits.

Note K Recent Accounting Pronouncements

In February 2007, the FASB issued SFAS No. 159, The Fair Value Option for Financial Assets and Financial Liabilities - Including an Amendment of FASB Statement No. 115. This statement permits companies to elect to measure certain financial instruments at fair value on an instrument-by-instrument basis, with changes in fair value recognized in earnings each reporting period. In addition, SFAS No. 159 establishes financial statement presentation and disclosure requirements for assets and liabilities reported at fair value under the election. Although the Company adopted SFAS No. 159 in the first quarter 2008, it has not elected to measure financial instruments at fair value other than as required by other accounting standards.

In December 2007, the FASB issued SFAS No. 141R, Business Combinations, a revision to SFAS No. 141, Business Combinations. SFAS No. 141R provides revised guidance for recognition and measurement of identifiable assets and goodwill acquired, liabilities assumed, and any non-controlling interest in the acquiree at fair value. The Statement also establishes disclosure requirements to enable the evaluation of the nature and financial effects of a business combination. SFAS No. 141R is required to be applied prospectively to business combinations for which the acquisition date is on or after the beginning of the first annual reporting period beginning on or after December 15, 2008 (January 1, 2009 for the Company). The Company is currently evaluating the potential impact, if any, of the adoption of SFAS No. 141R on its consolidated financial statements.

In December 2007, the FASB issued SFAS No. 160, Noncontrolling Interests in Consolidated Financial Statements an amendment of ARB No. 51. This Statement establishes accounting and reporting standards for ownership interests in subsidiaries held by parties other than the parent. Specifically, SFAS No. 160 requires the presentation of noncontrolling interests as equity in the Consolidated Balance Sheets, and separate identification and presentation in the Consolidated Statements of Income of net income attributable to the entity and the noncontrolling interest. It also establishes accounting and reporting standards regarding deconsolidation and changes in a parent's ownership interest. SFAS No. 160 is effective for fiscal years, and interim periods within those fiscal years, beginning on or after December 15, 2008 (January 1, 2009 for the Company). The provisions of SFAS No. 160 are generally required to be applied prospectively, except for the presentation and disclosure requirements, which must be applied retrospectively. The Company does not expect the adoption of SFAS No. 160 to have a material effect on its consolidated financial statements.

In March 2008, the FASB issued SFAS No. 161, Disclosures about Derivative Instruments and Hedging Activities - an amendment of FASB Statement No. 133 (SFAS 161). SFAS 161 amends and expands the disclosure requirements of Statement 133 to provide a better understanding of how and why an entity uses derivative instruments, how derivative instruments and related hedged items are accounted for, and their effect on an entity's financial position, financial performance, and cash flows. SFAS 161 is effective for fiscal years beginning after November 15, 2008. As the Company does not use derivative instruments, it is not expected that this statement will have a material effect on our financial position or results of operations.

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

Matters discussed in Management's Discussion and Analysis of Financial Condition and Results of Operations and elsewhere in this Form 10-Q include forward-looking statements within the meaning of Section 27A of the Securities Act of 1933, as amended, and Section 21E of the Securities Exchange Act of 1934, as amended, and are subject to the safe harbor provisions of the Private Securities Litigation Reform Act of 1995. Actual results could differ materially from those discussed in the forward-looking statements.

Critical Accounting Estimates and Assumptions

In preparing the financial statements in accordance with the accounting principles generally accepted in the United States (GAAP), estimates and assumptions are required to be made that have an impact on the assets, liabilities, revenue and expense amounts reported. These estimates can also affect supplemental information disclosures, including information about contingencies, risk and financial condition. These estimates and assumptions are made during the closing process for the quarter, after the quarter end has past. The Company believes that given the current facts and circumstances, these estimates and assumptions are reasonable, adhere to GAAP, and are consistently applied. Inherent in the nature of an estimate or assumption is the fact that actual results may differ from estimates, and estimates may vary as new facts and circumstances arise. Management's judgments in making these estimates and relying on these assumptions may materially impact amounts reported for any period.

The critical accounting policies, judgments and estimates that we believe have the most significant effect on our financial statements are set forth below:

- Revenue Recognition
- Software Development Costs
- Valuation of Inventories
- Income Taxes
- Product Warranty
- Carrying Value of Goodwill
- Stock-Based Compensation
- Restructuring Costs
- Valuation of Investments

Revenue Recognition: Revenue is recognized from product sales in accordance with SEC Staff Accounting Bulletin No. 104, Revenue Recognition. Product sales represent the majority of our revenue and include both hardware products and hardware products with embedded software. Revenue is recognized from these product sales when persuasive evidence of an arrangement exists, delivery has occurred or services have been provided, the sale price is fixed or determinable, and collectibility is reasonably assured. Additionally, products are sold on terms which transfer title and risk of loss at a specified location, typically the shipping point. Accordingly, revenue recognition from product sales occurs when all factors are met, including transfer of title and risk of loss, which typically occurs upon shipment. If these conditions are not met, revenue recognition is deferred until such time as these conditions have been satisfied.

Revenue earned from arrangements for software is accounted for under the provisions of Statement of Position 97-2, Software Revenue Recognition. For the sale of multiple-element arrangements whereby equipment is combined with other elements, such as software and maintenance, the Company allocates to, and recognizes revenue from, the various elements based on their fair value. Revenue from software requiring significant production, modification, or customization is recognized using the percentage of completion method of accounting. Anticipated losses on contracts, if any, are charged to operations as soon as such losses are determined. If all conditions of revenue recognition are not met, revenue recognition is deferred and revenue will be recognized when all obligations under the arrangement are fulfilled. Revenue from software maintenance contracts is recognized ratably over the contractual period.

index

Revenue from consulting and other services is recognized at the time the services are rendered. Certain products are sold through distributors who are granted limited rights of return. Potential returns are accounted for at the time of sale.

The accounting estimate related to revenue recognition is considered a critical accounting estimate because terms of sale can vary, and judgment is exercised in determining whether to defer revenue recognition. Such judgments may materially affect net sales for any period. Judgment is exercised within the parameters of GAAP in determining when contractual obligations are met, title and risk of loss are transferred, sales price is fixed or determinable and collectibility is reasonably assured.

Software Development Costs: All software development costs incurred in establishing the technological feasibility of computer software products to be sold are charged to expense as research and development costs. Software development costs incurred subsequent to the establishment of technological feasibility of a computer software product to be sold and prior to general release of that product are capitalized. Amounts capitalized are amortized commencing after general release of that product over the estimated remaining economic life of that product, generally three years, or using the ratio of current revenues to current and anticipated revenues from such product, whichever provides greater amortization. If the technological feasibility for a particular project is judged not to have been met or recoverability of amounts capitalized is in doubt, project costs are expensed as research and development or charged to cost of goods sold, as applicable. The accounting estimate related to software development costs is considered a critical accounting estimate because judgment is exercised in determining whether project costs are expensed as research and development or capitalized as an asset. Such judgments may materially affect expense amounts for any period. Judgment is exercised within the parameters of GAAP in determining when technological feasibility has been met and recoverability of software development costs is reasonably assured.

Valuation of Inventories: Inventories are stated at the lower of cost or market, using the first-in, first-out method. Inventory includes purchased parts and components, work in process and finished goods. Provisions for excess, obsolete or slow moving inventory are recorded after periodic evaluation of historical sales, current economic trends, forecasted sales, estimated product lifecycles and estimated inventory levels. Purchasing practices, electronic component obsolescence, accuracy of sales and production forecasts, introduction of new products, product lifecycles, product support and foreign regulations governing hazardous materials are the factors that contribute to inventory valuation risks. Exposure to inventory valuation risks is managed by maintaining safety stocks, minimum purchase lots, managing product end-of-life issues brought on by aging components or new product introductions, and by utilizing certain inventory minimization strategies such as vendor-managed inventories. The accounting estimate related to valuation of inventories is considered a critical accounting estimate because it is susceptible to changes from period-to-period due to the requirement for management to make estimates relative to each of the underlying factors, ranging from purchasing, to sales, to production, to after-sale support. If actual demand, market conditions or product lifecycles differ from estimates, inventory adjustments to lower market values would result in a reduction to the carrying value of inventory, an increase in inventory write-offs and a decrease to gross margins.

Income Taxes: The Company accounts for income taxes in accordance with SFAS No. 109. Accordingly, the Company provides deferred income tax assets and liabilities based on the estimated future tax effects of differences between the financial and tax bases of assets and liabilities based on currently enacted tax laws. A valuation allowance is established for deferred tax assets in amounts for which realization is not considered more likely than not to occur. The accounting estimate related to income taxes is considered a critical accounting estimate because judgment is exercised in estimating future taxable income, including prudent and feasible tax planning strategies, and in assessing the need for any valuation allowance. If it should be determined that all or part of a net deferred tax asset is not able to be realized in the future, an adjustment to the valuation allowance would be charged to income in the period such determination was made. Likewise, in the event that it should be determined that all or part of a deferred tax asset in the future is in excess of the net recorded amount, an adjustment to the valuation allowance would increase income to be recognized in the period such determination was made.

index

The Company operates within multiple taxing jurisdictions worldwide and is subject to audit in these jurisdictions. These audits can involve complex issues, which may require an extended period of time for resolution. Although management believes that adequate provision has been made for such issues, there is the possibility that the ultimate resolution of such issues could have an adverse effect on the earnings of the Company. Conversely, if these issues are resolved favorably in the future, the related provisions would be reduced, thus having a positive impact on earnings.

In addition, the calculation of the Company's tax liabilities involves dealing with uncertainties in the application of complex tax regulations. As a result of the implementation of FASB Interpretation No. 48, Accounting for Uncertainty in Income Taxes (FIN 48), the Company recognizes liabilities for uncertain tax positions based on the two-step process prescribed within the interpretation. The first step is to evaluate the tax position for recognition by determining if the weight of available evidence indicates that it is more likely than not that the position will be sustained on audit, including resolution of related appeals or litigation processes, if any. The second step requires the Company to estimate and measure the tax benefit as the largest amount that is more than 50% likely of being realized upon ultimate settlement. It is inherently difficult and subjective to estimate such amounts, as this requires the Company to determine the probability of various possible outcomes. The Company re-evaluates these uncertain tax positions on a quarterly basis. This evaluation is based on factors including, but not limited to, changes in facts or circumstances, changes in tax law, effectively settled issues under audit, and new audit activity. Such a change in recognition or measurement would result in the recognition of a tax benefit or an additional charge to the tax provision in the period.

Product Warranty: Warranty obligations are generally incurred in connection with the sale of the Company's products. The warranty period for these products is generally one year from date of sale. The costs incurred to provide for these warranty obligations are estimated and recorded as an accrued liability at the time of sale. Future warranty costs are estimated based on historical performance rates and related costs to repair given products. The accounting estimate related to product warranty is considered a "critical accounting estimate" because judgment is exercised in determining future estimated warranty costs. Should actual performance rates or repair costs differ from estimates, revisions to the estimated warranty liability would be required.

Carrying Value of Goodwill: Tests for impairments of goodwill are conducted annually, at year end, or more frequently if circumstances indicate that the asset might be impaired. The accounting estimate related to impairment of goodwill is considered a "critical accounting estimate" because these impairment tests include estimates of future cash flows that are dependent upon subjective assumptions regarding future operating results including growth rates, discount rates, capital requirements and other factors that impact the estimated fair value. An impairment loss is recognized to the extent that the goodwill's carrying amount exceeds its fair value.

Stock-Based Compensation: The Company's Board of Directors approves grants of stock options to employees to purchase our common stock. Under the provisions of SFAS No. 123R Share-Based Payment, stock compensation expense is recorded based upon the estimated fair value of the stock option at the date of grant. The accounting estimate related to stock-based compensation is considered a "critical accounting estimate" because estimates are made in calculating compensation expense including expected option lives, forfeiture rates and expected volatility. Expected option lives are estimated using vesting terms and contractual lives. Expected forfeiture rates and volatility are calculated using historical information. Actual option lives and forfeiture rates may be different from estimates and may result in potential future adjustments which would impact the amount of stock-based compensation expense recorded in a particular period.

index

Restructuring Costs: Restructuring costs consist of employee-related severance costs, lease termination costs and other facility-related closing expenses. Employee-related severance benefits are recorded either at the time an employee is notified or, if there are extended service periods, is estimated and recorded pro-rata over the period of each planned restructuring activity. Lease termination costs are calculated based upon fair value considering the remaining lease obligation amounts and estimates for sublease receipts. The accounting estimate related to restructuring costs is considered a "critical accounting estimate" because estimates are made in calculating the amount of employee-related severance benefits that will ultimately be paid and the amount of sublease receipts that will ultimately be received in future periods. Actual amounts paid for employee-related severance benefits can vary from these estimates depending upon the number of employees actually receiving severance payments. Actual sublease receipts received may also vary from estimates.

Valuation of Investments: As of March 31, 2008, we held an auction rate municipal debt security investment with a cost basis equal to its par value of \$2.45 million and an estimated fair value of \$2.25 million. The Company has previously valued such investments at par value; however, the periodic auctions for this investment failed in February, March and April 2008 and there is no active market for this or similar securities at the current time. In determining the fair value for this investment, the Company has adopted the provisions of SFAS 157, which establishes a comprehensive framework for measuring fair value in GAAP and expands disclosures about fair value measurements. Specifically, this statement sets forth a definition of fair value and establishes a hierarchy prioritizing the inputs to valuation techniques, giving the highest priority to quoted prices in active markets for identical assets and liabilities and the lowest prices to unobservable inputs.

In estimating fair value, the Company considers various factors, including the security's investment rating, the financial condition and near-term prospects of the investee and the underlying collateral, the financial condition of the guarantor, the length of time and the extent to which the fair value has been less than cost basis, the estimated length of time for which the investment is expected to be illiquid, the estimated future cash flows expected to be received, the estimated investment premium required by a hypothetical purchaser of the investment to compensate for future illiquidity, and our ability and intent to hold the investment until maturity or for a sufficient period of time to allow for any anticipated recovery in market value. The accounting estimate related to valuation of investments is considered a "critical accounting estimate" because estimates are made in valuing this investment, as well as, a determination of whether the decline in fair value of the investment is temporary or other-than-temporary. If it were judged that a decline in fair value is other-than-temporary, a realized loss equal to the decline in value would be reflected as an adjustment to net income. In determining when a decline in fair value is other-than-temporary, we consider these same factors listed above. Estimates for fair value and judgments of impairments as temporary versus other-than-temporary could materially adversely affect our operating results.

Executive Overview

The following discussion contains forward-looking statements within the meaning of the Securities Act of 1933 and Securities Exchange Act of 1934 and these forward-looking statements are subject to the safe harbor provisions of the Private Securities Litigation Reform Act of 1995.

The Company is a global supplier of integrated IP-based platforms and solutions for advanced communications networks and innovative computer system architectures. The Company's products are primarily marketed through a direct worldwide sales force under a variety of brand names including Advanced Managed Platforms, NexusWare® and SEGway. These products are based on open standards and are sold as end solutions, application ready platforms, or as individual blade components for the communications marketplace. A key differentiation of the Company's products from competing products is the high level of internally developed software available with each product. When purchasing our Advanced Managed Platforms, customers can quickly incorporate their value-add technologies into the platform while realizing distinct cost advantages, increased overall system reliability and performance, and improved time-to-market. Our SEGway product family provides our customers with unique, flexible and highly scalable signaling solutions for establishing or expanding cost-effective telecommunication network architectures.

index

The Company's business addresses one industry segment - Communications - and it targets three vertical markets for its products: telecommunications, aerospace and defense, and commercial. Of the three vertical markets served, telecommunications is the largest and represents approximately 75% of the Company's business. The OEM telecommunications equipment market served by the Company depends upon carrier spending to upgrade network infrastructure to next-generation equipment. This market continues to be very challenging with limited broad-based infrastructure investments being made by carriers and service providers.

Management is focused on three key initiatives for 2008 which we believe are important for the Company to pursue to further strengthen its foundation for longer-term growth. These initiatives are: market diversification for our embedded systems products, revenue growth for our signaling products and emphasis on gross margin. In the aerospace and defense market, there are numerous opportunities for our embedded systems products to be deployed in new communications networks being built for various U.S. government agencies. The Company is working with several prime contractors including Raytheon, Lockheed Martin, and General Dynamics to incorporate the Company's Advanced Managed Platforms and NexusWare Linux-based software into these new network architectures.

Our SEGway product suite includes STPs, IP-STPs, IP-Edge, SS7 over IP transport solutions, and signaling gateways. These products enable traditional and Tier 2 and Tier 3 telecommunications carriers to lower operating costs through the utilization of IP networks and more flexible signaling network architectures, thereby creating competitive advantages in existing and emerging markets. Demand for our signaling systems products continues to rise as carriers and service providers respond to the worldwide increase in text messaging and the cost saving benefits of migrating to IP-based networks. Our SEGway signaling products generally realize gross margins in the 65% to 70% range and typically have a sales cycle of three to six months. Throughout the remainder of 2008, the Company expects to make significant additional investments in its signaling sales, marketing and engineering organization. Management believes these investments, which may impact near-term profitability, are strategic from a long-term business perspective and are necessary in order to potentially achieve greater market penetration for our signaling products.

Currently, gross margins are higher and the sales cycles are shorter for both aerospace and defense and signaling product areas, compared to the traditional OEM telecommunications market we serve. Management continues to expect 2008 shipments to its aerospace and defense customers and signaling deployments to grow more rapidly than expected revenue declines of OEM telecommunications products.

Strategy

The Company's product strategy is to deliver robust, IP-based platforms and solutions to the communications marketplace. Today, the Company's line of Advanced Managed Platforms specifically addresses equipment manufacturers' requirements for an increased level of system integration and services from suppliers, thus allowing them to focus on their value-added stages of product development, which in most cases is application software. This strategy provides a viable alternative to proprietary or legacy platforms and offers a contemporary platform replacement product of equal or greater capacity. In addition, our SEGway Signaling products, which are built on our Advanced Managed Platforms, enable carriers and service providers to lower operating costs through the utilization of IP networks, thereby creating competitive advantages in existing and emerging markets.

Management is proceeding with multi-faceted initiatives to construct a solid foundation for long-term growth. These efforts are directed at end market segments within the communications market which are experiencing growth and include aerospace and defense and signaling. These initiatives include the ongoing enhancement of our embedded systems products through tightly integrated hardware and software, and continued investment in the Company's signaling systems products to further maximize the return on the Company's considerable IP packet and carrier-grade Linux core technologies.

index

There are identifiable risks associated with the Company's strategy in the current economic climate. While aerospace and defense and signaling are growing markets, the OEM telecommunications market is not experiencing growth. In order to improve profitability in this environment, the Company's sales and product development efforts will have to be more innovative and aggressive than those of our competitors. Management believes that based on its analysis of the marketplace and the strength of the Company's product and technology portfolio, the identified risks are manageable. If successful, management believes its initiatives can yield improved profitability, particularly if the business cycle starts to show improvement.

Financial OverviewRevenue:

The lack of customer visibility often results in a substantial portion of the Company's revenue being derived from orders placed within a quarter and shipped in the final month of the same quarter.

Revenue in the first quarter 2008 was \$11.0 million, compared to \$9.4 million in the first quarter 2007. This increase in revenue was primarily the result of an increase in shipments to the Company's largest customer in 2007, Data Connection Ltd., as well as increased shipments to aerospace and defense and signaling customers. Shipments to customers outside of the United States represented 47% and 43% of sales in the first quarter 2008 and 2007, respectively.

Earnings:

Net income for the first quarter 2008 amounted to \$.6 million, or \$.05 per diluted share, based on 11.7 million shares outstanding, and included stock-based compensation expense of \$.2 million, or \$.01 per share. Net loss for the first quarter 2007 totaled \$.6 million, or \$.05 per basic share, based on 13.2 million shares outstanding and included stock-based compensation expense of \$.2 million, or \$.01 per share.

Liquidity:

Cash, cash equivalents and long-term investments amounted to \$35.7 million and \$32.2 million at March 31, 2008 and December 31, 2007, respectively. The Company had no long-term debt at either date.

Cash generated from operating activities amounted to \$4.0 million and \$3.9 million in the three months ended March 31, 2008 and 2007, respectively. The period-over-period increase in cash generated from operating activities amounted to \$.1 million and is primarily attributable to higher net income in the first quarter 2008, offset by larger declines in accounts receivable and inventory in the first quarter 2007, compared to the first quarter 2008.

Key Performance Indicator:

The Company believes that a key indicator for its business is the trend for the volume of orders received from customers. During weak economic periods, customers' ability to forecast their requirements deteriorates causing delays in the placement of orders. Most of our embedded systems customers are placing orders for product only when they have orders in hand from their customers. Forward-looking visibility on customer orders continues to be very limited. Shipments to customers amounted to \$11.0 million in the first quarter 2008, compared to \$9.4 million in the first quarter 2007. Shipments during 2008 have been positively impacted by increased demand from the Company's largest customer, Data Connection Ltd., and increased shipments to aerospace and defense and signaling customers.

More in-depth discussions of the Company's strategy can be found in the Company's Annual Report on Form 10-K and other filings with the Securities and Exchange Commission.

Results of Operations**Three Months Ended March 31, 2008, Compared with the Three Months Ended March 31, 2007**

The following table presents the percentage of sales represented by each item in the Company's consolidated statements of income for the periods indicated:

	Three Months Ended March 31,	
	2008	2007
Sales	100.0%	100.0%
Cost of goods sold	44.1%	50.2%
Gross profit	55.9%	49.8%
Operating expenses:		
Selling and marketing	19.2%	17.2%
Research and development	22.0%	31.1%
General and administrative	10.8%	14.1%
Total operating expenses	52.0%	62.4%
Income (loss) from operations	3.9%	(12.6)%
Other income, net	3.6%	4.6%
Income (loss) before income taxes	7.5%	(8.0)%
Income tax provision (benefit)	2.1%	(1.4)%
Net income (loss)	5.4%	(6.6)%

Sales. Total revenue for the first quarter 2008 amounted to \$11.0 million, compared to \$9.4 million for the corresponding quarter in 2007. During the first quarter 2008, two customers, Data Connection LTD and Alltel Communications, accounted for 21% and 17% of sales, respectively. Based on their business prospects, Data Connection LTD required more product from the Company and Alltel Communications continued their deployment of our SEGway signaling products into their network which began in the third quarter 2007. In the first quarter 2007, two customers, Data Connection Ltd. and Alcatel-Lucent, represented 11% and 10% of sales, respectively. In the first quarter 2008, the Company's four largest customers represented 50% of sales, compared to 37% of sales in the first quarter 2007.

Shipments to customers outside of the United States represented 47% and 43% of the Company's sales during the first quarter 2008 and 2007, respectively. Total shipments to customers in the United Kingdom represented 22% of sales in the first quarter 2008 and 14% of sales in the first quarter 2007. (One UK customer, Data Connection Ltd., represented 21% and 11% of sales in the first quarter 2008 and 2007, respectively).

The Company's products are grouped into three distinct categories in one market segment. Revenue from each product category is expressed as a percentage of sales for the periods indicated:

	Three Months Ended March 31,	
	2008	2007
Communications	59%	56%
Computing	28%	28%
Switching	13%	16%
	100%	100%

indexCommunications products:

Communications products are comprised of network access, SEGway signaling and voice products. Network access products provide a connection between a variety of voice, data and signaling networks and embedded systems platforms that are used to control the network and/or process information being transported over networks. This product family has significant synergies with our NexusWare software and our complete line of communications protocols. Many of the Company's SEGway signaling products, which are built on our Advanced Managed Platforms, provide a full suite of signaling solutions that seamlessly bridge between circuit switched networks and the growing IP-based networks. Voice products enable voice, data and fax processing for communications applications.

Revenue from Communications products amounted to \$6.4 million and \$5.3 million in the first quarter 2008 and 2007, respectively. This increase of \$1.1 million, or 22%, was largely due to shipments of \$1.9 million to one customer, Alltel Communications (a new customer in the third quarter 2007), partially offset by lower shipments to a variety of other customers.

Computing products:

Computing products include Advanced Managed Platforms, a range of single board compute elements and associated chassis management products.

Computing products revenue amounted to \$3.1 million and \$2.6 million in the first quarter 2008 and 2007, respectively. This increase of \$.5 million, or 21%, was primarily due to increased shipments to Data Connection Ltd. and a variety of aerospace and defense customers, partially offset by lower shipments to a variety of other customers.

Switching products:

The Company's Ethernet switch elements operate as the nexus of the IP packet switching functionality for Advanced Managed Platforms and competing platforms.

Switch revenue totaled \$1.4 million and \$1.5 million in the first quarter 2008 and 2007, respectively. This decrease of \$.1 million, or 5%, reflects a decrease of shipments to a variety of customers.

Gross profit. Gross profit consists of sales, less cost of goods sold including material costs, manufacturing expenses, depreciation, amortization of software development costs, and expenses associated with engineering contracts and the technical support function. Gross profit and gross margin amounted to \$6.1 million and 55.9% of sales in the first quarter 2008, compared to \$4.7 million and 49.8% of sales for the first quarter 2007. The improvement in gross profit and gross margins were primarily attributable to improved sales mix toward higher-margin Communications products and better manufacturing capacity utilization.

Total Operating Expenses. Total operating expenses amounted to \$5.7 million and \$5.8 million in the first quarter 2008 and 2007, respectively.

Selling and marketing expenses were \$2.1 million and \$1.6 million for the first quarter 2008 and 2007, respectively. The increase of \$.5 million, or 31%, primarily relates to the hiring of additional sales and marketing personnel for its Signaling organization and an increase in trade show expenditures in the first quarter 2008, over the comparable prior year quarter.

index

Research and development expenses were \$2.4 million and \$2.9 million in the first quarter 2008 and 2007, respectively. The Company capitalizes certain software development costs, which reduces the amount of software development charged to operating expenses. Amounts capitalized were \$.5 million during the first quarter of both 2008 and 2007. The year-over-year decrease in gross expenditures is primarily attributable to a decrease in hardware design materials expended and a decrease in the number of engineers in research and development due to attrition and lower revenues.

General and administrative expenses were \$1.2 million and \$1.3 million in the first quarter 2008 and 2007, respectively. This decrease of \$.1 million, or 10%, primarily relates to a decrease in corporate costs.

Other Income, net. Other income consists primarily of interest income. During the first quarter 2007, the Company was primarily investing in auction rate municipal securities. During the first quarter 2008, the Company sold almost all of its auction rate municipal securities and invested in lower yielding, money market funds due to liquidity concerns in the market. Other income declined by \$.04 million in the first quarter 2008 from the first quarter 2007 primarily due to this shift in investment strategy.

Income taxes. The effective income tax rate is a combination of federal, state and foreign tax rates and is generally lower than statutory rates because it includes benefits derived from the Company's international operations, research activities, tax exempt interest and foreign sales.

The Company's income tax provision for the first quarter 2008 amounted to a provision of \$.2 million, as compared to a benefit of \$.1 million for the first quarter 2007. For the first quarter 2008, the Company's annual estimated effective income tax rate is 29%. For the first quarter 2007, the estimated effective income tax rate was 18%. The expected annual effective tax rate in the first quarter 2008 is greater than in the corresponding quarter in 2007 primarily due to lower tax-exempt interest and the non-renewal of the United States research and development tax credit for 2008.

Liquidity and Capital Resources

The Company's primary sources of liquidity are cash, cash equivalents and long-term investments, which totaled \$35.7 million at March 31, 2008, plus a line of credit totaling \$5.0 million available under a bank credit facility. The Company had working capital of \$41.4 million and \$40.3 million at March 31, 2008 and December 31, 2007, respectively.

For the three months ended March 31, 2008, cash provided by operating activities amounted to \$4.0 million. This amount included net income of \$.6 million, depreciation and amortization charges of \$.5 million and stock-based compensation expense of \$.2 million. Cash provided by operations due to changes in operating assets and liabilities included an increase in cash associated with decreases of accounts receivable and inventory of \$.5 million and \$.7 million, respectively. The decrease in inventory was a result of reduced purchases due to implementation of a vendor consigned inventory program and improved management of inventory levels. The decrease in accounts receivable was primarily due to increased customer payments during the first quarter 2008, compared to the first quarter 2007. Cash provided by operations due to changes in operating assets and liabilities also included an increase of cash relating to an increase in accounts payable and accrued expenses of \$.5 million, principally due to higher deferred support and maintenance revenue, and payroll accruals, offset partially by a decline of \$.5 million in accrued restructuring.

Cash provided by investing activities during the first quarter 2008 totaled \$13.6 million, resulting from net sales of investments of \$14.2 million, offset by capitalized software development costs amounting to \$.5 million and capital expenditures of \$.1 million.

index

Cash provided by financing activities for the first quarter 2008 amounted to \$.2 million, resulting from proceeds from the exercise of stock options amounting to \$.3 million. The Board of Directors authorized the Company to repurchase shares of the Company's Common Stock for an aggregate amount not to exceed \$10.0 million in July 2005. This program was extended to July 2008. Under this program, shares of Common Stock may be repurchased through open market or private transactions, including block purchases. Repurchased shares can be used for stock option plans, potential acquisition initiatives and general corporate purposes. Under this program, the Company repurchased 7,756 common shares for a total cost of \$37,000 in the first quarter 2008. Since March 2007, the Company has repurchased 1.64 million shares for a total cost of \$8.1 million.

At March 31, 2008, the Company held an auction rate municipal security with a par value and cost basis of \$2.45 million. This investment is collateralized by student loans, is partially guaranteed by the U.S. Department of Education, carries an insurance company guaranty, and is AAA-rated by two rating agencies (AA-rated by a third). The auctions for this investment failed in February, March and April 2008, and the Company believes it is unlikely that auctions for this security will be successful in the near-term. As a result, the Company's ability to liquidate this security without loss is limited in the near term and the Company believes that the fair value of this investment is likely less than its par value at March 31, 2008 due to its illiquidity. The Company has estimated the fair value of this security to be \$2.25 million at March 31, 2008. The unrealized loss on this investment has been classified as a temporary impairment, as the Company has the ability and intent to hold the security until such time as it can be sold in an orderly manner without loss. The unrealized loss has been recorded as a charge to accumulated other comprehensive loss on the March 31, 2008 balance sheet.

Off-Balance Sheet Arrangements:

The Company did not enter into any off-balance sheet arrangements during the first quarter 2008.

Contractual Obligations:

During the first quarter 2008, the Company renewed its San Luis Obispo office space lease for a two-year term, but the lease extension provides the Company with the right to cancel the lease with ninety days notice. The annual payment obligation under this lease is approximately \$126,000.

The Company has approximately \$.8 million associated with unrecognized tax benefits and estimated related interest and penalties at March 31, 2008. These liabilities are included as a component of long-term liabilities in the Company's condensed consolidated balance sheet as the Company does not anticipate that settlement of the liabilities will require a significant payment of cash within the next twelve months. The Company does not believe that the ultimate settlement of these obligations will materially affect the Company's liquidity.

Current Position:

Assuming there is no significant change in the business, management believes that the Company's current cash, cash equivalents and investments, together with cash generated from operations should be sufficient to meet our anticipated cash requirements, including working capital and capital expenditure requirements, for at least the next twelve months. However, management is continuing to evaluate opportunities for strategic acquisitions to accelerate the Company's growth and market penetration efforts. If any of these opportunities come to fruition, they could have an impact on working capital, liquidity or capital resources.

Recent Accounting Pronouncements

In February 2007, FASB issued SFAS No. 159, The Fair Value Option for Financial Assets and Financial Liabilities - Including an Amendment of FASB Statement No. 115. This statement permits companies to elect to measure certain financial instruments at fair value on an instrument-by-instrument basis, with changes in fair value recognized in earnings each reporting period. In addition, SFAS No. 159 establishes financial statement presentation and disclosure requirements for assets and liabilities reported at fair value under the election. Although the Company adopted SFAS No. 159 in the first quarter 2008, it has not elected to measure financial instruments at fair value other than as required by other accounting standards.

In December 2007, the FASB issued SFAS No. 141R, Business Combinations, a revision to SFAS No. 141, Business Combinations. SFAS No. 141R provides revised guidance for recognition and measurement of identifiable assets and goodwill acquired, liabilities assumed, and any non-controlling interest in the acquiree at fair value. The Statement also establishes disclosure requirements to enable the evaluation of the nature and financial effects of a business combination. SFAS No. 141R is required to be applied prospectively to business combinations for which the acquisition date is on or after the beginning of the first annual reporting period beginning on or after December 15, 2008 (January 1, 2009 for the Company). The Company is currently evaluating the potential impact, if any, of the adoption of SFAS No. 141R on its consolidated financial statements.

In December 2007, the FASB issued SFAS No. 160, Noncontrolling Interests in Consolidated Financial Statements an amendment of ARB No. 51. This Statement establishes accounting and reporting standards for ownership interests in subsidiaries held by parties other than the parent. Specifically, SFAS No. 160 requires the presentation of noncontrolling interests as equity in the Consolidated Balance Sheets, and separate identification and presentation in the Consolidated Statements of Income of net income attributable to the entity and the noncontrolling interest. It also establishes accounting and reporting standards regarding deconsolidation and changes in a parent's ownership interest. SFAS No. 160 is effective for fiscal years, and interim periods within those fiscal years, beginning on or after December 15, 2008 (January 1, 2009 for the Company). The provisions of SFAS No. 160 are generally required to be applied prospectively, except for the presentation and disclosure requirements, which must be applied retrospectively. The Company does not expect the adoption of SFAS No. 160 to have a material effect on its consolidated financial statements.

In March 2008, the FASB issued SFAS No. 161, Disclosures about Derivative Instruments and Hedging Activities - an amendment of FASB Statement No. 133 (SFAS 161). SFAS 161 amends and expands the disclosure requirements of Statement 133 to provide a better understanding of how and why an entity uses derivative instruments, how derivative instruments and related hedged items are accounted for, and their effect on an entity's financial position, financial performance, and cash flows. SFAS 161 is effective for fiscal years beginning after November 15, 2008. As the Company does not use derivative instruments, it is not expected that this statement will have a material effect on our financial position or results of operations.

Forward-Looking Statements and Risk Factors

This Quarterly Report on Form 10-Q contains forward-looking statements, which reflect management's current views with respect to future events and financial performance, within the meaning of Section 27A of the Securities Act of 1933 and Section 21E of the Securities Exchange Act of 1934 and is subject to the safe harbor provisions of the Private Securities Litigation Reform Act of 1995. These forward-looking statements are subject to certain risks and uncertainties, including those identified below, which could cause actual results to differ materially from historical results or those anticipated. The words believes, anticipates, plans, may, intends, estimate, will, should, could, feels, is optimistic, expects, and other expressions which indicate future events and trends identify forward-looking statements. However, the absence of such words does not mean that a statement is not forward-looking.

index

The Company's future operating results are subject to various risks and uncertainties and could differ materially from those discussed in the forward-looking statements and may be affected by various trends and factors which are beyond the Company's control. These risks and uncertainties include, among other factors, general business and economic conditions, rapid technological changes accompanied by frequent new product introductions, competitive pressures, dependence on key customers, fluctuations in quarterly and annual results, the reliance on a limited number of third party suppliers, limitations of the Company's manufacturing capacity and arrangements, the protection of the Company's proprietary technology, the dependence on key personnel, changes in critical accounting estimates, potential impairments related to goodwill and investments, foreign regulations and potential material weaknesses. Forward-looking statements should be read in conjunction with the audited Consolidated Financial Statements, the Notes thereto, and Management's Discussion and Analysis of Financial Condition and Results of Operations of the Company as of December 31, 2007, as contained in the Company's Annual Report on Form 10-K, and other documents filed with the Securities and Exchange Commission.

Stockholders are cautioned not to place undue reliance on the forward-looking statements which speak as of the date of this Quarterly Report or the date of the documents incorporated by reference in this Quarterly Report.

ITEM 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

The Company is exposed to various market risks in the normal course of business, primarily interest rate risk and changes in the market value of investments and management believes the Company's exposure to such risk is minimal. The Company's investments are made in accordance with the Company's investment policy and primarily consist of money market funds and one auction rate municipal security at March 31, 2008. The Company is also subject to foreign currency exchange rate risk related to its operations in Kanata, Ontario, Canada, and in the United Kingdom. The Company believes that its balance sheet exposure to foreign currency exchange rate risk is minimal, and all of the Company's sales are denominated in US dollars. However, due to weakness of the US dollar as compared to the Canadian dollar and the British pound, the costs of our operations in Canada and the United Kingdom, as measured in US dollars, were approximately 17% and 2% higher in the first quarter 2008, respectively, as compared to the first quarter 2007. The costs of our Canadian and United Kingdom operations are approximately \$4.7 million and \$1.2 million, respectively, on an annual basis. The Company does not participate in the investment of derivative financial instruments.

ITEM 4. CONTROLS AND PROCEDURES**A. Evaluation of Disclosure Controls and Procedures**

The Company's Chief Executive Officer and its Chief Financial Officer have evaluated the Company's disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)) as of the end of the period covered by this Quarterly Report. Based on this evaluation, the Chief Executive Officer and Chief Financial Officer concluded that the Company's disclosure controls and procedures were effective as of such date.

B. Changes in Internal Control Over Financial Reporting

There has been no change in the Company's internal control over financial reporting that occurred during the fiscal quarter covered by this report that has materially affected, or is reasonably likely to materially affect, the Company's internal controls over financial reporting.

[index](#)**PART II. OTHER INFORMATION****ITEM 2. UNREGISTERED SALES OF EQUITY SECURITIES AND USE OF PROCEEDS****2(c) Purchases of Equity Securities by the Issuer and Affiliated Purchasers**

The following table sets forth information regarding first quarter 2008 purchases of common stock under the Company's stock repurchase program, which was authorized by the Board of Directors on July 11, 2005 and which has been extended through July 13, 2008. Under the repurchase program, the Board of Directors authorized the repurchase of up to \$10 million of the Company's Common Stock. During the year ended December 31, 2007, the Company repurchased 1.6 million common shares for an aggregate dollar amount of \$8.0 million.

Period	Total number of shares purchased	Average price paid per share	Total number of shares purchased as part of publicly announced plan	Approximate dollar value of shares that may yet be purchased under the plan
January 1 31	7,756	\$ 4.78	1,640,356	\$ 1,947,000
February 1 29	-	-	1,640,356	1,947,000
March 1 31	-	-	1,640,356	1,947,000

Exhibit 31.1

Certification of Chief Executive Officer

I, John M. Slusser, certify that:

1. I have reviewed this quarterly report on Form 10-Q of Performance Technologies, Incorporated;
2. Based on my knowledge, this report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this report;
3. Based on my knowledge, the financial statements, and other financial information included in this report, fairly present in all material respects the financial condition, results of operations and cash flows of the registrant as of, and for, the periods presented in this report;
4. The registrant's other certifying officer and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)) and internal control over financial reporting (as defined in Exchange Act Rules 13a-15(f) and 15d-15(f)) for the registrant and have:
 - a. Designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under our supervision, to ensure that material information relating to the registrant, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period in which this report is being prepared;
 - b. Designed such internal control over financial reporting, or caused such internal control over financial reporting to be designed under our supervision, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles;
 - c. Evaluated the effectiveness of the registrant's disclosure controls and procedures and presented in this report our conclusions about the effectiveness of the disclosure controls and procedures, as of the end of the period covered by this report based on such evaluation; and
 - d. Disclosed in this report any change in the registrant's internal control over financial reporting that occurred during the registrant's most recent fiscal quarter (the registrant's fourth fiscal quarter in the case of an annual report) that has materially affected, or is reasonably likely to materially affect, the registrant's internal control over financial reporting; and
5. The registrant's other certifying officer and I have disclosed, based on our most recent evaluation of internal control over financial reporting, to the registrant's auditors and the audit committee of the registrant's board of directors (or persons performing the equivalent functions):
 - a. All significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect the registrant's ability to record, process, summarize and report financial information; and

index

- b. Any fraud, whether or not material, that involves management or other employees who have a significant role in the registrant's internal control over financial reporting.
