VoIP, Inc.

Notes to Financial Statements

Note A - Organization and Description of Business

The Company was incorporated on August 3, 1998 under its original name of Millennia Tea Masters, Inc. under the laws of the State of Texas. The Company changed its name to VoIP, Inc. on April 13, 2004.

The Company began operations in October 1998 with its initial order of imported teas from Sri Lanka, has elected a year-end of December 31 and uses the accrual method of accounting.

On April 13, 2004 the Company changed its name to VoIP, Inc.

The Company and its subsidiaries develop and manufacture innovative IP telephony customer premise equipment in addition to premium voice over the internet subscriber based telephony services and state of the art long range WiFi technology solutions, for residential and enterprise customers, including multimedia applications.

On February 27, 2004 the Company entered into a stock purchase agreement which provided for the sale of 12,500,000 shares of its common stock in exchange for \$12,500 and a commitment by the purchaser to contribute the assets of two start-up companies, eGloblaphone, Inc. and VOIP Solutions, Inc., which occurred effective April 15, 2004.

On June 25, 2004, the Company closed the acquisition of VCG Technology, Inc. d/b/a DTNet Technologies, Inc. ("DTNet") a Florida corporation. The acquisition took the form of the issuance of 2,500,000 shares of VoIP, Inc. restricted common stock in exchange the all issued and outstanding share of DTNet common stock.

During interim periods, the Company follows the accounting policies set forth in its Annual Report Pursuant to Section 13 or 15(d) of The Securities Exchange Act of 1934 on Form 10-KSB filed with the United States Securities and Exchange Commission. The information presented herein may not include all disclosures required by generally accepted accounting principles and the users of financial information provided for interim periods should refer to the annual financial information and footnotes contained in its Annual Report Pursuant to Section 13 or 15(d) of The Securities Exchange Act of 1934 on Form 10-SB when reviewing the interim financial results presented herein.

In the opinion of management, the accompanying interim financial statements, prepared in accordance with the instructions for Form 10-QSB, are unaudited and contain all material adjustments, consisting only of normal recurring adjustments necessary to present fairly the financial condition, results of operations and cash flows of the Company for the respective interim periods presented. The current period results of operations are not necessarily indicative of results which ultimately will be reported for the full fiscal year ending December 31, 2004.

The preparation of financial statements in conformity with generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates.

Note B - Going Concern Uncertainty

The Company commenced operations during the fourth quarter of 1998 and focused significant resources during prior periods in procuring and importing inventory and developing sales and distribution channels. Accordingly, the Company had generated only minimal revenues through first quarter 2004.

Management has taken actions directly related to the acquisition of new business concept to provide, from their operations, sufficient working capital to preserve the entity. Additional funds will be obtained from private placements of debt and equity securities.

The revenues for second quarter 2004 amounted to \$85,298 primarily from our VoIP hardware solution sales.

Accordingly, with the acquisitions consummated during last quarter and the projected results for the year, management consider the company is no longer under development stage.

Note C - Summary of Significant Accounting Policies

1. Principles of Consolidation

The consolidated financial statements include the accounts of the Company and its wholly owned subsidiaries, eGlobalPhone, Inc., VoIP Solutions, Inc. and DTNet Technologies, Inc. from their respective dates of acquisition. All significant intercompany balances and transactions have been eliminated in consolidation

2. Cash and cash equivalents

For Statement of Cash Flows purposes, the Company considers all cash on hand and in banks, including accounts in book overdraft positions, certificates of deposit and other highly-liquid investments with maturities of three months or less, when purchased, to be cash and cash equivalents.

Cash overdraft positions may occur from time to time due to the timing of making bank deposits and releasing checks, in accordance with the Company's cash management policies.

3. Inventory

Inventory consists of finished goods and is valued at the lower of cost or market using the first-in, first-out method.

4. Organization costs

The Company has adopted the provisions of AICPA Statement of Position 98-5, "Reporting on the Costs of Start-Up Activities" whereby all organization and initial costs incurred with the incorporation and initial capitalization of the Company were charged to operations as incurred.

Edgar Filing: VOIP INC - Form 10QSB

5. Advertising expenses

Advertising and marketing expenses are charged to operations as incurred.

6. Income Taxes

The Company uses the asset and liability method of accounting for income taxes. At June 30, 2004 and December 31, 2003, the deferred tax asset and deferred tax liability accounts, as recorded when material, are entirely the result of temporary differences. Temporary differences represent differences in the recognition of assets and liabilities for tax and financial reporting purposes.

At June 30, 2004 and December 31, 2003 deferred tax assets are related solely to the Company's net operating loss carryforward of approximately \$743,000 and \$303,000, respectively, which is fully reserved. If these carry forwards are not utilized, they will begin to expire in 2018.

7

7. Earnings (loss) per share

Basic earnings (loss) per share is computed by dividing the net income (loss) by the weighted-average number of shares of common stock and common stock equivalents (primarily outstanding options and warrants). Common stock equivalents represent the dilutive effect of the assumed exercise of the outstanding stock options and warrants, using the treasury stock method. The calculation of fully diluted earnings (loss) per share assumes the dilutive effect of the exercise of outstanding options and warrants at either the beginning of the respective period presented or the date of issuance, whichever is later. As of June 30, 2004 and 2003, the Company had no warrants and/or options outstanding.

Note D - Fair Value of Financial Instruments

The carrying amount of cash, accounts receivable, accounts payable and notes payable, as applicable, approximates fair value due to the short term nature of these items and/or the current interest rates payable in relation to current market conditions.

Note E - Related Party Transactions

As of June 30, 2004, the Company has a balance due from related parties of approximately \$462,000, coming with DTNet acquisition, which are due on demand and non interest bearing.

As of December 31, 2003, the Company has amounts payable to affiliated entities and/or officers of approximately \$151,000. These advances are unsecured, due upon demand and are non- interest bearing.

Note F - Acquisition

On May 25, 2004 (but effective for all purposes as of April 15, 2004), the

Edgar Filing: VOIP INC - Form 10QSB

company completed the acquisition of two Florida-based subsidiaries, eGlobalphone, Inc. and VoIP Solutions, Inc. Contribution of these start-up companies was the basis for the original decision to issue a controlling block of shares of common stock to Mr. Ivester. eGlobalphone, Inc. and VoIP Solutions Inc. both Florida corporations.

In June 2004, the company acquired DTNet Technologies, Inc. a Florida Corporation. The acquisition took the form of an exchange of 2,500,000 shares of the company's common stock in exchange for all issued and outstanding shares of DTNet common stock. The Goodwill amounting to \$5,210,563 is the difference between the fair market value of the DTNet assets as of the date of acquisition, and the valuation of 2,500,000 company shares at market value at that date.

Note G - Subsequent Events

On August 11, the Company issue warrants to purchase 2,200,000 shares of common stock, at an exercise price of \$1.00 per share, to two members of Company's senior management.

8

PRO FORMA CONSOLIDATED FINANCIALS STATEMENTS - UNAUDITED

Following the summarized unaudited consolidated balance sheet and pro forma consolidated statement of operations for the six months ended June 30, 2004 assuming the acquisition of DTNet Technologies, Inc., had taken place at the beginning of the year. The unaudited pro forma results are not necessarily indicative of future earnings or earnings that would have been reported had the acquisition been completed when assumed.

- 4) Goodwill is the difference between the fair market value of the DTNet assets and the valuation of 2,500,000 company shares at market value at the acquisition date.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

The financial information set forth in the following discussion should be read in conjunction with, and qualified in its entirety by, the financial statements of the Company included elsewhere herein.

(1) Caution Regarding Forward-Looking Information

This quarterly report contains certain forward-looking statements and information relating to the Company that are based on the beliefs of the Company or management as well as assumptions made by and information currently available to the Company or management. When used in this document, the words "anticipate," "believe," "estimate," "expect" and "intend" and similar expressions, as they relate to the Company or its management, are intended to identify forward-looking statements. Such statements reflect the current view of the Company regarding future events and are subject to certain risks, uncertainties and assumptions, including the risks and uncertainties noted. Should one or more of these risks or uncertainties materialize, or should underlying assumptions prove incorrect, actual results may vary materially from those described herein as anticipated, believed, estimated, expected or

Edgar Filing: VOIP INC - Form 10QSB

intended. In each instance, forward-looking information should be considered in light of the accompanying meaningful cautionary statements herein.

(2) Results of Operations

For the respective quarters ended June 30, 2004 and 2003, the Company had revenues of approximately \$85,298 and \$724.

For the respective six month periods ended June 30, 2004 and 2003, the Company had revenues of approximately \$85,298 and \$784.

Net losses for the respective quarters ended June 30, 2004 and 2003 were \$408,658 and \$19,879. Net loss per share was approximately \$0.02 and \$0.01 for each period. Total net losses for the respective six months ended June 30, 2004 and 2003 were \$430,981 and \$31,626. Net loss per share was approximately (\$0.05) and \$(0.02) for each six month period.

As mentioned in Note A, the company acquired DTNet Technologies, Inc. in June 2004. DTNet provides customer premises equipment to cable and DSL Internet providers through North America. DTNet sales were approximately \$4.7 million in 2003. Management believes that the acquisition of DTNet will provide proven distribution Channels and leadership in sales throughout the Americas. DTNet complements the company's strategy to deliver Voice over Internet Protocol over a wireless local loop and deliver service provider solutions to cable operators.

11

(3) Liquidity and Capital Resources

Liquidity for the period from inception through June 30, 2004 has been mainly provided by sales of common stocks through private placements. Management has taken actions directly related to the generation of product sales during Calendar 2004 and anticipates that these efforts will be sufficient to provide sufficient resources to sustain its operations.

The company has identified that all working capital requirements for the current annual period will be satisfied from the operation of the newly acquired business and the sales of additional common shares through private placements.

The plans of operations are as follows:

The Company will market its Voice over IP broadband telephony service to business and residential consumers through its eGlobalphone, Inc. subsidiary. eGlobalphone service requires that customers have a high-speed Internet connection to their home or business. A growing number of households and business both in the United States and abroad have access to these broadband connections through their local cable or Telephone Company. Broadband penetration in the United States is about 58 percent and is expected to reach 70 percent by 2007.

The company plans to expand its service footprint in about 25 new markets monthly concentrating primary on the major United States metropolitan areas. The company's plans is to launch service in over 200 markets by year's end as part of VoIP, Inc.'s strategic focus on IP-based communications services. International markets will be opened in parallel with domestic US markets, but at a slower pace and only as market demand is evidenced. Due to the nature of IP telephony, these markets are not significantly more complex to weave into the existing back-office design, though often there are regulatory issues in each

Edgar Filing: VOIP INC - Form 10QSB

nation which must be managed appropriately. The company's goal is to sign up 2.3 million business and consumer customers by 2007, including domestic and international subscribers.

eGlobalphone plans to support the marketing of eGlobalphone Service with an extensive communications campaign that will include mass market advertising on television, radio and in print and through direct mail, viral marketing and online advertising in addition to an extensive network of resellers through out the world. We have emphasized on sales in the international marketplace through resellers and wholesalers, believing that the need for a less expensive service is vital in many countries globally. We will seek marketing partners in each country that is identified as a potential market, in order to provide a local presence. Manuals, interfaces, voice prompts, and operators will be tailored for the primary language of the nationality, and the sales force will operate locally to provide "high-touch" comfort to these localized markets. A major opportunity for resale is being developed with a private retail wireless vendor, to allow for a very "high-touch" interaction with customers. This model has proven to be successful in wireless sales, and it is believed that the same marketing strategy and distribution channel will be successful for other telephony services that the company can offer consumers.

Customers can access the eGlobalphone network for long-distance telephony from any high speed Internet connection anywhere in the world. The eGlobalphone service provides a two line patent pending MTA (Multimedia Terminal Adaptor) with built-in router and many enhanced functions such as Quality of Service (QoS) bandwidth management, failure-resistant backup systems, and low-bandwidth codec support. The MTA is manufactured by iCable System Co. Ltd. a Korean company that is contractually tied to VoIP-Solutions, Inc a wholly owned subsidiary of VoIP, Inc. By having our own propriety MTA with custom designed enhanced features we feel that we have a distinct advantage over our competition based on these enhancements and our patent pending 911 emergency access. eGlobalphone is believed to be the only VoIP (voice over internet protocol) company offering 911 emergency access and integration with the existing infrastructure without the use of a third party database. This proprietary system utilizes an automated switching circuit to route the call to the user's local emergency service provider (911 call center) and will also "fail safe" in the event of a power outage or internet service interruption.

eGlobalphone Service is different than traditional phone services because through the use of IP-based networks it will offer customers typical features such as call waiting, three-way calling, and call forwarding, and far more

12

advanced ones as well. Indeed, consumers will get unprecedented convenience and control with advanced (and often free) features including: voicemail, caller ID, , call transfer, caller ID blocking, call forwarding, and voicemail-to-email service. Low-priced directory information (411) services, conference call capabilities, "follow-me" calling, and other features are offered as additional line items or per-call products which contribute to the revenue stream for this product.

There are significant new features that the company will introduce in the next year which are currently under development. These features will further extend the abilities of the platform to function as a flexible telephony tool for end users and not merely be a replacement for traditional telephony. Much in the same way that cell phone features have driven the successful launch of new companies in the mobile market, eGlobalphone believes that a combination of features in the hardware and service will quickly develop the customer base.

Edgar Filing: VOIP INC - Form 10QSB

The Company's VoIP Solutions, Inc. subsidiary is an emerging global service provider of Voice over IP based solutions to Internet Service Providers, Telecommunications Service Providers and Cable Operators in strategic countries around the world. VoIP, Inc, through its subsidiary, provides a comprehensive portfolio of IP multimedia-based solutions ranging from subscriber based voice services, to SIP based infrastructure design and deployment, to broadband customer premise equipment design and implementation services, as well as engineering design, manufacturing and distribution of wireless broadband technology. VoIP, Inc. has applied for a patent for its state of the art VoIP Multimedia Terminal Adaptor which today supports the FCC Commission's desire for VoIP providers to deliver Emergency 911 Calling and Law Enforcement Access capabilities to the marketplace.

VoIP, Inc. plans to support marketing of the VoIP-Solutions subsidiary with an extensive communications campaign that will include mass market advertising directly to industry leaders, and through direct mail, viral marketing and online advertising in addition to an extensive network of value added resellers through out the world. The biggest problem facing small carriers and cable operators, is that they lack the money to build a telephone network. Prior to this year, getting into voice was considered capital-intensive and out of reach for small and medium-level operators, thus one of the primary reasons that VoIP-Solutions has been created. We have entered into the market to offer the 'back office' infrastructure to make voice possible for small and medium-sized cable companies, IPS's and MSO's.

More and more cable companies want to get into phone service as a way to remain competitive, especially as satellite companies and even local telephone carriers are snatching away customers by offering video and high-speed Internet capability. It's a free-for-all land grab in the home telephone market and one of the reasons that we have put so much emphasizes on our VSP (Virtual Service Provider) model. This product is a perfect fit for the small and medium-sized cable companies, IPS's and MSO's allowing them to maintain customer ownership and increase revenues while eliminating the cost of network infrastructure and the learning curve that is sometimes, an expensive lesson.

On July 14, 2004 the company announced its first Virtual Service Provider partner; and continues to establish its products in a niche market with small- and medium-sized cable companies, IPS's and MSO's. The company plans to add over 100 Virtual Service Provider partner's by the December 31, 2004, year end.

We have emphasized on sales in the international marketplace through resellers and wholesalers, believing that the need for a less expensive service is vital in many countries across the globe. We will seek marketing partners in each country that is identified as a potential market, in order to provide a local presence. Manuals, interfaces, voice prompts, and operators will be tailored for the primary language of the nationality, and the sales force will operate locally to provide "high-touch" comfort to these localized markets

Our experience in the IP networking and VoIP technology arenas allow us to offer rapid project assessment and subsequent deployment of a voice services infrastructure to a customer with an existing IP network such as an ISP (Internet Service Provider), CLEC (Competitive Local Exchange Company), PTT (Public Telephone and Telegraph) and PCO, (Private Cable Operator.) Our solutions involve delivery of portions of a SIP-based infrastructure (cost-effective media gateways, transcoding solutions, SIP proxies) or a full turn-key system with components that are custom designed to work with each other

Edgar Filing: VOIP INC - Form 10QSB

(Billing system, invoice system, least-cost-routing, rate import/exports, etc.) Our combined technology, expertise, resources within the telephony community, and ability to provide right-priced solutions comprise a strong value combination for our customers as they bring their existing base of Internet users into a VoIP product line

Our strategy is to be a recognized worldwide leader in providing IP telephony, customer premise equipment in addition to premium voice over the Internet subscriber based telephony services and innovated wireless fidelity ("WiFi") technology solutions for residential and enterprise customers.

With the new benefits of wireless networks, VoIP Solutions can leverage the use of the VoIP-Solutions MTA product and knowledge.

Services provided in a potential VoIP Solutions package to customer could include:

- o Billing systems/Platform
- o Customer Premise Equipment (CPE)
- o Service and application design
- o Network design
- o Switching platforms
- o Back Office/OSS systems
- o Web site design and back office integration
- o Telephone number management applications
- o Auto CPE provisioning systems
- o Wholesale call termination
- o Installation and training
- o Support agreements
- o Consultancy

The company maintains a stock of all VoIP-Solution's products for sale to end-users, carriers and resellers. Included is the Flag Ship product "MTA" (Multimedia Terminal Adaptor) the MTA's are manufactured with varying options to meet the demands of today's network operators for tomorrows future IP networks, products include:

VoIP ADSL Modem (SIP)

- o MTA-A201C - 1 line VoIP, 1 line PSTN
- o MTA-A201W - 2 lines VoIP / LAN (802.11b) or (g)
- o MTA-A201CW - 1 line VoIP, 1 line PSTN / LAN (802.11b) or (g)

VoIP Cable Modem (SIP)

- o MTA-C102 - 2 Line VoIP
- o MTA-C101C - 1 Line VoIP, 1 Line PSTN
- o MTA-C102W - 2 lines VoIP / LAN (802.11b) or (g)
- o MTA-C102CW - 1 line VoIP, 1 line PSTN / LAN (802.11b) or (g)

VoIP MTA (SIP)

- o MTA-102 - 2 lines VoIP
- o MTA-102C - 1 line VoIP, 1 line PSTN
- o MTA-102W - 2 lines VoIP / LAN (802.11b) or (g)
- o MTA-102CW - 1 line VoIP, 1 line PSTN / LAN (802.11b) or (g)

The Company has developed intellectual property and software for the soft switch platform and associated applications developed for the eGlobalphone service. This includes the source code for the switching servers and related application servers. An agreement with Porta One provides access to software source code and database schemas that permit custom application, layer development and integration. Along with the billing and back office application, VoIP Solutions can supply all of the components, services and customization to fully equip a VoIP Telco.

DTNet Technologies Inc. is a primary importer and distributor of cable network components, cable modems, ADSL modems, wireless products and other Customer Premise Equipment for the cable and Telco industries. Established in 1999, their 1000 plus clients include AT&T, Comcast, Cox Cable, Bell South, Time Warner as well as regional and local Multiple Service Operators (MSO's). DTNet has experienced strong growth sales for the past three years have increased from approximately \$2 million in 2001 to \$2.9 million in 2002 and \$4.7 million in 2003. With the addition of the products from VoIP, Inc., specifically the Multi Media Terminal Adaptor and the Virtual Service Provider solution, 2004 sales are projected to reach \$7.5 million. DTNet has established itself as a respected supplier to the cable industry. This includes a strong relationship with the National Cable Television Cooperative (NCTC) representing over 1000 cable operator members.

VoIP Inc. acquired 100% of DTNet on June 25, 2004 through a stock purchase. In addition to the existing business and revenues, the acquisition provided VoIP Inc. with direct access to a valuable market and a nationwide sales force to sell products and services from other VoIP Inc. companies. There is also a demand within the group for the existing products distributed by DTNet. Additionally, the existing customer base of DTNet consists of firms which are the primary target for other VoIP, Inc. products. This customer base and the existing relationships that DTNet has developed is one of the primary benefits of the acquisition strategy.

VoIP, Inc.'s DTNet subsidiary to pursue cable companies for voice deals: The availability of VoIP hardware and services from other VoIP Inc. subsidiaries has positioned DTNet to be a leader in marketing VoIP, Inc. products and services into this channel. The NCTC is in the process of evaluating DTNet as the preferred VoIP vendor and contracts are in progress with over 20 members for the supply of outsourced services, Customer Premise Equipment (CPE), and wholesale long-distance, local, and international call termination/origination. The desire

Edgar Filing: VOIP INC - Form 10QSB

of cable companies to diversify their service offerings to increase their revenue and profitability will be the motivation for interest in the combined offerings of DTNet and VoIP, Inc.'s newly combined abilities and product lines.

The Company previously announced a joint venture arrangement known as iMax Solutions with iCable Co., Ltd. to market iCable products in the Western Hemisphere. Such venture required a \$5 million capital contribution from the Company in exchange for sales contracts and leads from iCable that would be divided 51% to VoIP and 49% to iCable. The Company determined that its resources would be better utilized by terminating the arrangement and develop its own wireless fidelity technology through proprietary research and development and smaller scale acquisitions.

On August 12, 2004 VoIP Inc. renegotiated the relationship with iCable to a distribution agreement for North America and South America. As part of the new Agreement in principle, iCable is no longer obliged to warrant the sales revenue of iMax. This increases VoIP Inc.'s holding to 100% of iMax Solutions Inc. with no further requirement for VoIP Inc. to pay iCable \$5 million for the distribution rights.

The Company has made an agreement in principle with iCable to terminate the Investors Agreement and instead enter into a Distribution Agreement for North and South America. Such arrangement will result in (i) elimination of the VoIP capital contribution, (ii) iMax being owned 100% by VoIP, and (iii) the elimination of the guarantee of sales from iCable. The parties will continue to negotiate the Distributor Agreement.

15

VoIP Inc. is actively selling iCable products to a growing number of OEM customers, resellers, wholesale Virtual Service Providers and uses of the eGlobalphone VoIP service. The new agreement will not materially change the forecasted sales of iMax. The joint development of products and features specifically catering for the U.S. market continues.

Recent Developments

We have recently made a number of announcements regarding key business development milestones that should start to materially contribute to our revenues and profitability improvement during the second half of 2004.

On August 16, 2004, VoIP, Inc. announced the expansion of its residential and business Voice over Internet Protocol (VoIP) phone service, eGlobalphone. The expansion includes Texas, Ohio, Washington, Pennsylvania, North Carolina, Michigan, Minnesota and Missouri. The availability of the eGlobalphone Service to residents and businesses in 8 additional states marks the commitment by VoIP, Inc. the parent company of eGlobalphone to meet the needs of customers globally; offering a high-tech alternative for their communications needs.

On July 14, 2004, VoIP, Inc. announced that it has signed a Virtual Service Provider (VSP) Agreement with VOIP-4U, a United Kingdom-based Telco. Under the Agreement, VoIP Inc. will supply their proprietary media gateways for local Interconnection with British Telecommunications service providers in addition to supplying MTA's (Multimedia Terminal Adaptors) from its wholly owned subsidiary, VoIP-Solutions Inc. Additional equipment supplied will include ADSL Modems with built in Multimedia Terminal Adaptor & router function that combines a DSL

Edgar Filing: VOIP INC - Form 10QSB

modems with Voice

On July 13, 2004, VoIP, Inc. announced the unveiling of their Virtual Service Provider (VSP) resale model for service providers. Using the industry-leading SIP protocol and a flexible back-end billing and call routing service, VoIP Inc. today announced a new service for network service providers. VoIP, Inc. will be offering a complete Voice over Internet Protocol (VoIP) solution that enables Internet service providers to offer low cost VoIP services to their customers quickly and without the normal high cost of a program rollout.

On June 28, 2004, VoIP, Inc. announced that it has finalized the acquisition of DTNet Technologies, Inc., a privately held company based in Tampa, Fla. DTNet will operate as a wholly owned subsidiary of VoIP, Inc. Under the Purchase Agreement, VoIP, Inc. has acquired 100% of the stock of DTNet Technologies, Inc. in exchange for the issuance of 2.5 million common shares of VoIP, Inc. "The acquisition of DTNet will provide proven distribution channels and top leadership in sales throughout the Americas," stated Steven Ivester, CEO and President of VoIP, Inc. "DTNet complements VoIP Inc.'s strategy to deliver Voice Over Internet Protocol over a wireless local loop and deliver service provider solutions to Cable Operators. DTNet is well established and respected in these industries. The Company will provide valuable resources and a strong distribution channel for our products and services

On June 7, 2004, VoIP, Inc. announced that it has executed a Letter of Intent to acquire DTNet Technologies, Inc., a privately held company based in Tampa, Fla. Under the proposed Purchase Agreement, VoIP, Inc. will acquire 100% of the stock of DTNet Technologies, Inc. in exchange for the issuance of 2.5 million common shares of VoIP, Inc.

On May 27, 2004, VoIP, Inc. announced that it has filed a patent application with the U.S. Patent and Trademark Office. The patent application is titled "Method and System for Back-up of Voice Over IP Emergency Calls." The ability to use geographically-based emergency services location ability is a huge step forward in the advancement of VoIP services and their integration into existing telephony infrastructure.

16

On May 26, 2004, VoIP, Inc. announced that its wholly owned subsidiary, VoIP Solutions, Inc. has received a purchase order contract from ANEW Broadband, Inc., located in Miami. Under the contract, ANEW Broadband has committed to purchase a total of 15,000 MTA-V102 units of which a minimum of 5,000 pieces are to be purchased the 1st year, and a minimum of 10,000 pieces the 2nd year. The contract is valued in excess of \$1 million. The items to be purchased include Multimedia Terminal Adaptors (MTA), Proxy Server and Provisioning server.

On April 15, 2004, we announced that as per the terms of the Feb. 27, 2004 change of control of the Company, Steven Ivester, president and CEO and controlling shareholder of the Company, has today contributed the intellectual property rights and related assets of two start-up companies formed to engage in the Voice over Internet business. The following are the descriptions of the two companies, who have become wholly owned subsidiaries of the Company.

Item 3. Controls and Procedures

Edgar Filing: VOIP INC - Form 10QSB

Within the 90 days prior to the filing date of this report, the Company performed an evaluation of the effectiveness of the design and operation of its disclosure controls and procedures pursuant to Exchange Act Rule 13a-14. This evaluation was done under the supervision and with the participation of the Company's President and Chief Financial Officer. Based upon that evaluation, they concluded that the Company's disclosure controls and procedures are effective in gathering, analyzing and disclosing information needed to satisfy the Company's disclosure obligations under the Exchange Act. The two executive officers responsible for the financial reporting and disclosure are also in control of the books and records of the Company and are involved first hand in the decision making process of material transactions.
