## NOTES TO CONSOLIDATED CONDENSED FINANCIAL STATEMENTS (UNAUDITED)

### Note A Summary of Significant Accounting Policies

---

*Presentation of Condensed Consolidated Financial Statements* - The significant accounting policies followed by the Company and its wholly owned subsidiaries for interim financial reporting are consistent with the accounting policies followed for annual financial reporting. All adjustments that are of a normal recurring nature and are in the opinion of management necessary for a fair statement of the results for the periods reported have been included in the accompanying consolidated condensed financial statements. The condensed consolidated balance sheet of the Company as of December 30, 2006 has been derived from the audited consolidated balance sheet of the Company as of that date. Certain information and note disclosures normally included in the Company's annual financial statements prepared in accordance with accounting principles generally accepted in the United States of America have been condensed or omitted. These condensed consolidated financial statements should be read in conjunction with the consolidated financial statements and notes thereto included in the Company's Form 10-K annual report for 2006 filed with the Securities and Exchange Commission.

*Accounting Standards Implemented in 2007* Effective December 30, 2006, Escalade adopted FIN 48 which clarifies the accounting for uncertainty in income taxes recognized in accordance with FASB Statement No. 109, Accounting for Income Taxes (SFAS 109). See Note E for information relating to the implementation of this interpretation and other required disclosures pertaining to uncertain tax positions.

*Accounting Standards to Be Implemented* In February 2007, the FASB issued Statement of Financial Accounting Standard No. 159, The Fair Value Option for Financial Assets and Financial Liabilities Including an amendment of FASB Statement No. 115 (SFAS 159). This statement permits companies to choose to measure many financial instruments and certain other items at fair value. SFAS 159 requires additional disclosures related to the fair value measurements included in the financial statements. This statement is effective on January 1, 2008 for Escalade and the company is currently in the process of evaluating the impact of this statement on the consolidated financial statements.

### Note B - Seasonal Aspects

---

The results of operations for the six-month periods ended July 14, 2007 and July 15, 2006 are not necessarily indicative of the results to be expected for the full year.

### Note C - Inventories

	<u>\$ 40,823</u>	<u>\$ 44,630</u>	<u>\$ 32,232</u>

### Note D Notes Payable

---

On May 18, 2007, the Company executed an amendment to the revolving term agreement extending the maturity date of the credit facility to May 31, 2012 and revising the current available borrowing limit to \$30 million with annual reductions of \$5 million beginning May 31, 2008. The Euro 3.0 million (\$4.1 million) revolving term loan limit was unchanged. All other terms and conditions of the agreement were unchanged. As of July 14, 2007 the outstanding balance on these revolving term loans was \$26.7 million and Euro 2.1 million (\$2.9 million).

### Note E - Income Taxes

---

The provision for income taxes was computed based on financial statement income.

In July 2006, the Financial Accounting Standards Board ( FASB ) issued FASB Interpretation No. 48, Accounting for Uncertainty in Income Taxes an interpretation of FASB Statement No. 109 ( FIN 48 ), which became effective for the Company on December 31, 2006. The Interpretation prescribes a recognition threshold and a measurement attribute for the financial statement recognition and measurement of tax positions taken or expected to be taken in a tax return. For those benefits to be recognized, a tax position must be more-likely-than-not to be sustained upon examination by taxing authorities. The amount recognized is measured as the largest amount of benefit that is greater than 50 percent likely of being realized upon ultimate settlement. The adoption of FIN 48 during the first quarter of 2007 has resulted in a transition adjustment reducing beginning retained earnings by \$264 thousand; \$164 thousand in taxes and \$100 thousand in interest. If recognized, the tax portion of the adjustment would affect the effective tax rate. Interest costs and penalties related to income taxes are classified as interest expense and selling, general and administrative costs, respectively in the Company s financial statements. Tax returns for all years after 2002 are subject to future examination by tax authorities.

### Note F Employee Stock Compensation

---

The fair value of stock-based compensation is recognized in accordance with the provisions of SFAS No. 123R *Share-Based Payments* ( SFAS 123R ).

At the Annual Shareholder meeting in April 2007, the Escalade, Incorporated 2007 Incentive Plan ( 2007 Incentive Plan ) was approved as a replacement for the 1997 Incentive Stock Option Plan and the 1997 Director Stock Compensation and Option Plan which expired at the end of April 2007. All options issued and outstanding under the expired plans will remain in effect until exercised, expired or forfeited.

During the three months ended July 14, 2007 and pursuant to the 2007 Incentive Plan, the Company awarded 6,524 stock options and 7,500 restricted stock units to directors and 105,250 restricted stock units to employees. The stock options awarded to directors vest at the end of one year and have an exercise price equal to the market price on the date of grant. The restricted stock units awarded to the directors vest after one year following the grant date. The restricted stock units awarded to employees vest at the end of three years conditioned on the achievement of specified market conditions. The number of shares issued to employees can range between 75% and 150% of the award amount depending on the outcome of specified performance criteria. Restricted stock awards are subject to forfeiture if on the vesting date the employee is not employed or the director no longer holds a position with the Company.

The Company utilizes the Black-Scholes option pricing model to determine the fair value of stock options granted and Monte Carlo techniques to determine the fair value of restricted stock units granted with market conditions attached to vesting.

For the three months and six months ended July 14, 2007 the company recognized stock based compensation expense of \$295 thousand and \$391 thousand, respectively. Stock based compensation expense for the three months and six months ended July 15, 2006 was \$297 thousand and \$428 thousand, respectively. During the three months ended July 14, 2007 the Company recognized \$122 thousand in compensation costs associated with the accelerated vesting of stock options held by Mr. Messmer, former President and CEO of the Company who passed away unexpectedly in April 2007.

At July 14, 2007, there was \$1.3 million in unrecognized stock-based compensation expense related to non-vested stock awards.

### Note I Dividend Payment

---

On March 16, 2007, the Company paid a dividend of \$0.22 per common share to all shareholders of record on March 9, 2007. The total amount of the dividend was approximately \$2.9 million and was charged against retained earnings.

### Note J - Acquisitions

---

In February 2007, the Company purchased substantially all of the assets of Trophy Ridge, LLC, which manufactures and sells premium archery accessories under the Trophy Ridge brand name. The Trophy Ridge brand name has significant appeal in the sports enthusiast market place and will be used to further expand distribution of the Company's archery accessory products. The Trophy Ridge operation has been relocated and consolidated into the Company's existing archery operations in the Gainesville, Florida plant. The operating results of Trophy Ridge will be included in the Sporting Goods segment results from the date of acquisition. The purchase price of \$3.8 million was paid in Cash. Contingent on the achievement of certain performance criteria, the Company may be obligated to pay an additional \$1.0 million over a two year period from the date of acquisition. The estimated fair market value of the assets acquired as of the date of acquisition is as follows:

<b>(Amounts in thousands)</b>	<b>Amount</b>

## ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

### Forward-Looking Statements

This report contains forward-looking statements relating to present or future trends or factors that are subject to risks and uncertainties. These risks include, but are not limited to, the impact of competitive products and pricing, product demand and market acceptance, new product development, the continuation and development of key customer and supplier relationships, Escalade's ability to control costs, general economic conditions, fluctuation in operating results, changes in the securities market and other risks detailed from time to time in Escalade's filings with the Securities and Exchange Commission. Escalade's future financial performance could differ materially from the expectations of management contained herein. Escalade undertakes no obligation to release revisions to these forward-looking statements after the date of this report.

### Overview

Escalade, Incorporated (Escalade or Company) manufactures and distributes products for two industries: Sporting Goods and Office Products. Within these industries the Company has successfully built a market presence in niche markets. This strategy is heavily dependent on expanding the customer base, barriers to entry, brand recognition and excellent customer service. A key strategic advantage is the Company's established relationships with major customers that allow the Company to bring new products to the market in a cost effective manner while maintaining a diversified product line and wide customer base. In addition to strategic customer relations, the Company has over 75 years of manufacturing and import experience that enable it to be a low cost supplier.

**Results of Operations**

Net revenues for the second quarter and first half of fiscal 2007 increased 3.2% and 2.7%, respectively, over the same periods last year. Revenues grew in both the Sporting Goods and Office Products business segments. Operating profits were up 77.5% and 42.3% in the second quarter and first half of fiscal 2007, respectively, compared to the same periods last year primarily due to improved operating performance in the Sporting Goods business segment.

The following schedule sets forth certain consolidated statement of income data as a percentage of net revenue for the periods indicated:

	<b>Three Months ended</b>		<b>Six Months ended</b>	
	<b>July 14, 2007</b>	<b>July 15, 2006</b>	<b>July 14, 2007</b>	<b>July 15, 2006</b>
<b>Net revenue</b>	100.0%	100.0%	100.0%	100.0%
Cost of products sold	66.2%	68.7%	66.6%	68.1%
<b>Gross margin</b>	33.8%	31.3%	33.4%	31.9%
Selling, administrative and general expenses	23.4%	25.3%	24.4%	25.4%
<b>Operating income</b>	10.4%	6.0%	9.0%	6.5%

**Consolidated Revenue and Gross Margin**

Sales in the Sporting Goods business increased 2.8% in the second quarter and first half of fiscal 2007 compared to the same periods last year primarily due to increased sales to the specialty market, which includes dealers and specialty sports retailers. Increasing sales to the specialty market is fundamental to the Company's strategic plans to broaden the customer base and lessen the impact of large mass market retailers. For the three months and six months ended July 14, 2007, sales to the specialty market increased 7.7% and 26.9%, respectively, compared to the same periods last year. Roughly half of the growth in the specialty market came from products acquired by the Company in the second half of last year and during the first quarter of the current year. Nearly all of the growth is associated with archery products where the Company now has significant intellectual property rights. Sales to mass market retailers declined 1.6% and 12.1% for the three months and six months ended July 14, 2007, respectively, compared to last year. The Company continues to enjoy strong relationships with its mass market retail customers, but expects continued sales declines to these customers as a result of a general decline in demand for game tables. Management anticipates that growth in the specialty market will continue to compensate for declines in the mass market resulting in Sporting Goods sales for 2007 that are relatively unchanged from 2006.

Office Products sales, compared to the prior year, were up 4.1% and 2.6% for the second quarter and first half of fiscal 2007, respectively, due primarily to foreign exchange rate gains. Excluding the effects of changes in foreign exchange rates Office Products sales grew 0.4% in the second quarter and declined 1.4% for the first half of 2007 compared to 2006. Increased sales in Europe have been offset by declining sales in North America where the Company's office product wholesale customers are reporting a general decline in consumer demand. Management believes that total Office Product sales, excluding the effects of changing foreign exchange rates, will remain flat compared to last year through the remainder of fiscal 2007.

The overall gross margin ratio for the second quarter and first half of fiscal 2007 were higher than the same periods last year primary due to the increased sales of Sporting Goods to the specialty market which has higher gross margin ratios than sales to the mass market. The gross margin ratio in the Office Product business was relatively unchanged from the same periods last year. Management anticipates gross margin ratios for the remainder of the year to be roughly equal to the ratios achieved last year with some slight improvement in the gross margin ratio for the Sporting Goods business.

**Consolidated Selling, General and Administrative Expenses**

Consolidated selling, general and administrative expenses for the second quarter of fiscal 2007 were down slightly for the second quarter and first half of fiscal 2007 compared to the same periods in fiscal 2006. Management anticipates the ratio of expenses to net sales achieved during the first half of fiscal 2007 to remain relatively unchanged through the remainder of the year.

**Interest Expense and Other Expense**

Interest costs in the second quarter and first half of fiscal 2007 were higher than the same periods last year due to higher effective interest rates. Management expects this condition to continue through the remainder of fiscal 2007.

Other expenses for the second quarter and first half of fiscal 2007 are significantly higher than the same periods last year due to higher amortization costs associated with intangible property rights acquired in conjunction with the acquisitions completed in the second quarter of fiscal 2006 and the Company's share of net losses reported by one of the Company's 50% equity ownership investments. Amortization costs for the remainder of fiscal 2007 will continue to be higher than last year.

**Provision for Income Taxes**

The effective tax rate for the second quarter (33.2%) is significantly lower than the rate achieved in the same quarter last year (39.3%) due to higher foreign earnings where the Company enjoys significant tax loss carry forwards. Management believes that the tax rate achieved for the first six months of 2007 (29.5%) is indicative of the overall rate that will be achieved in fiscal 2007.

**Financial Condition and Liquidity**

The following schedule summarizes the Company's total debt:

<b>In thousands</b>	<b>July 14, 2007</b>	<b>July 15, 2006</b>	<b>December 30, 2006</b>
Notes payable short-term	\$ 12,129	\$ 19,033	\$ 10,336
Current portion long-term debt			
Long term debt	32,271	32,530	22,609
<b>Total debt</b>	<b>\$ 44,400</b>	<b>\$ 51,563</b>	<b>\$ 32,945</b>

Total debt at July 14, 2007 increased \$11.5 million from the balance at December 30, 2006 due to increased inventory levels, funding the Trophy Ridge acquisition completed during the first quarter of fiscal 2007, and the payment of \$2.9 million in dividends. As a percentage of stockholder's equity, total bank debt was 51% at July 14, 2007 compared to 38% at December 30, 2006 and 66% at July 15, 2006.

Accounts receivable balances at July 14, 2007 are up slightly over the same period last year due to increased archery sales where extended terms are an industry norm. Inventory balances are slightly lower than last year reflecting continued efforts to keep inventory levels in line with sales volume.

Significant acquisitions completed during the first half of 2006 account for the significant drop in net cash used by investing activities. Spending for property plant and equipment for the first half of 2007 is relatively unchanged from the level experienced in the first half of 2006 and is indicative of what the company expects to spend in the second half of fiscal 2007.

The Company's working capital requirements are primarily funded from operating cash flows and revolving credit agreements with its banks. The Company's relationship with its primary lending bank remains strong and the Company expects to have access to the same level of revolving credit that was available in 2006. In addition, the Company believes it can quickly reach agreement to increase available credit should the need arise.

**ITEM 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK**

The Company is exposed to financial market risks, including changes in currency exchange rates, interest rates and marketable equity security prices. To mitigate these risks, the Company utilizes derivative financial instruments, among other strategies. At the present time, the only derivative financial instrument used by the company is an interest rate swap. The Company does not use derivative financial instruments for speculative purposes.

A substantial majority of revenue, expense and capital purchasing activities are transacted in U.S. dollars. However, the Company's foreign subsidiaries enter into transactions in other currencies, primarily the Euro. To protect against reductions in value and the volatility of future cash flows caused by changes in currency exchange rates, the Company carefully considers the use of transaction and balance sheet hedging programs. Such programs reduce, but do not entirely eliminate, the impact of currency exchange rate changes. Presently the Company does not employ currency exchange hedging financial instruments, but has adjusted transaction and cash flows to mitigate adverse currency fluctuations. Historical trends in currency exchanges indicate that it is reasonably possible that adverse changes in exchange rates of 20% for the Euro could be experienced in the near term. Such adverse changes could have resulted in a material impact on income before taxes for the three months and six months ended July 14, 2007.

A substantial portion of the Company's debt is based on U.S. prime and LIBOR interest rates. In an effort to lock-in current low rates and mitigate the risk of unfavorable interest rate fluctuations the Company has entered into an interest rate swap agreement. This agreement effectively converted a portion of its variable rate debt into fixed rate debt.

An adverse movement of equity market prices would have an impact on the Company's long-term marketable equity securities that are included in other assets on the consolidated balance sheet. At July 14, 2007 the aggregate carrying value of long-term marketable equity securities was \$4.6 million. Currently, the Company does not employ any hedge programs relative to these investments.

**ITEM 4. CONTROLS AND PROCEDURES**

**Evaluation of Disclosure Controls and Procedures**

Escalade maintains disclosure controls and procedures that are designed to ensure that information required to be disclosed in the Company's Exchange Act reports is recorded, processed, summarized and reported within the time periods specified in the SEC's rules and forms, and that such information is accumulated and communicated to the Company's management, including its Chief Executive Officer and Chief Financial Officer, as appropriate, to allow timely decisions regarding required disclosure based closely on the definition of disclosure controls and procedures in Rule 13a-14(c). In designing and evaluating the disclosure controls and procedures, management recognized that any controls and procedures, no matter how well designed and operated, can provide only reasonable assurance of achieving the desired control objectives, and management necessarily was required to apply its judgment in evaluating the cost-benefit relationship of possible controls and procedures. Also, the Company has investments in certain unconsolidated entities. As the Company does not control or manage these entities, its disclosure controls and procedures with respect to such entities are necessarily substantially more limited than those it maintains with respect to its consolidated subsidiaries.

The Company carried out an evaluation, under the supervision and with the participation of the Company's management, including the Company's Chief Executive Officer and the Company's Chief Financial Officer, of the effectiveness of the design and operation of the Company's disclosure controls and procedures as of the end of the period covered by this report. Based on the foregoing, the Company's Chief Executive Officer and Chief Financial Officer concluded that the Company's disclosure controls and procedures were effective.

**Changes in Internal Control over Financial Reporting**

Management of the Company has evaluated, with the participation of the Company's Chief Executive Officer and Chief Financial Officer, changes in the Company's internal controls over financial reporting (as defined in Rule 13a-15(f) and 15d-15(f) of the Exchange Act) during the second quarter of 2007.

There have been no changes to the Company's internal control over financial reporting that occurred since the beginning of the Company's second quarter of 2007 that have materially affected, or are reasonably likely to materially affect, the Company's internal control over financial reporting.

The Company has one stock repurchase program which was established in February 2003 by the Board of Directors and which authorized management to expend up to \$3,000,000 to repurchase shares on the open market as well as in private negotiated transactions. The repurchase plan has no termination date. There have been no share repurchases that were not part of a publicly announced program. In February 2006, the Board of Directors increased the remaining amount on this plan to its original level of \$3,000,000.
