UNITED STATES
SECURITIES AND EXCHANGE COMMISSION
WASHINGTON, D.C. 20549

FORM 10-Q

(Mark One)

**QUARTERLY REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE
ACT OF 1934**

For the Quarterly Period Ended June 30, 2009

or

**TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(D) OF THE SECURITIES EXCHANGE
ACT OF 1934**

For the transition period from _____ to _____.

Commission File Number 001-31657

ARENA RESOURCES, INC.

(Exact name of registrant as specified in its charter)

Nevada

(State or other jurisdiction of
incorporation or organization)

73-1596109

(I.R.S. Employer
Identification No.)

6555 S. Lewis Ave.

Tulsa, Oklahoma 74136

(Address of principal executive offices)

(918) 747-6060

(Registrant's telephone number)

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the past 12 months, and (2) has been subject to such filing requirements for the past 90 days. Yes No

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files).

Yes No Not Applicable

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer or a smaller reporting company. See definitions of "large accelerated filer," "accelerated filer" and "smaller reporting company" in Rule 12b-2 of the Exchange Act:

Large accelerated filer

Accelerated filer

Non-accelerated filer

Smaller reporting company

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act):

Yes No

Indicate the number of shares outstanding of each of the issuer's classes of common stock, as of the latest practical date:

As of August 5, 2009, the Company had outstanding 38,352,551 shares of common stock (\$0.001 par value).

Forward-Looking Information

Certain statements in this Section and elsewhere in this report are forward-looking in nature and relate to trends and events that may affect the Company's future financial position and operating results. Such statements are made pursuant to the safe harbor provision of the *Private Securities Litigation Reform Act of 1995*. The terms expect, anticipate, intend, and project and similar words or expressions are intended to identify forward-looking statements. These statements speak only as of the date of this report. The statements are based on current expectations, are inherently uncertain, are subject to risks, and should be viewed with caution. Actual results and experience may differ materially from the forward-looking statements as a result of many factors, including changes in economic conditions in the markets served by the company, increasing competition, fluctuations in raw materials and energy prices, and other unanticipated events and conditions. It is not possible to foresee or identify all such factors. The company makes no commitment to update any forward-looking statement or to disclose any facts, events, or circumstances after the date hereof that may affect the accuracy of any forward-looking statement.

Part I Financial Information

Item 1. Financial Statements:

The condensed consolidated financial statements included herein have been prepared pursuant to the rules and regulations of the Securities and Exchange Commission. Certain information and footnote disclosures normally included in financial statements prepared in accordance with accounting principles generally accepted in the United States of America have been condensed or omitted pursuant to such rules and regulations, although the Company believes that the disclosures are adequate to make the information presented not misleading.

In the opinion of the Company, all adjustments, consisting of only normal recurring adjustments, necessary to present fairly the consolidated financial position of the Company and the consolidated results of its operations and its cash flows have been made. The results of its operations and its cash flows for the six months ended June 30, 2009 are not necessarily indicative of the results to be expected for the year ending December 31, 2009.

See the accompanying notes to unaudited condensed consolidated financial statements.

ARENA RESOURCES, INC.
NOTES TO UNAUDITED CONDENSED CONSOLIDATED FINANCIAL STATEMENTS
JUNE 30, 2009

NOTE 1 BASIS OF PRESENTATION AND SIGNIFICANT ACCOUNTING POLICIES

Condensed Consolidated Financial Statements The accompanying condensed consolidated financial statements have been prepared by the Company and are unaudited. In the opinion of management, the accompanying unaudited financial statements contain all adjustments necessary for fair presentation, consisting of normal recurring adjustments, except as disclosed herein.

The accompanying unaudited interim financial statements have been condensed pursuant to the rules and regulations of the Securities and Exchange Commission; therefore, certain information and disclosures generally included in financial statements have been condensed or omitted. The condensed financial statements should be read in conjunction with the Company's annual financial statements included in its annual report on Form 10-K as of December 31, 2008. The financial position and results of operations for the three and six months ended June 30, 2009 are not necessarily indicative of the results to be expected for the full year ending December 31, 2009.

Nature of Operations Arena Resources, Inc. (the Company) owns interests in oil and gas properties located in Oklahoma, Texas, Kansas and New Mexico. The Company is engaged primarily in the acquisition, exploration and development of oil and gas properties and the production and sale of oil and gas. The accompanying statements of operations and cash flows include the operations of their wholly owned subsidiaries from the date of acquisition/formation.

Use of Estimates The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities, disclosure of contingent assets and liabilities and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates.

Fair Values of Financial Instruments The carrying amounts reported in the balance sheets for joint interest billings receivable and accrued liabilities approximate fair value because of the immediate or short-term maturity of these financial instruments. The carrying amounts reported for notes payable and long-term debt approximate fair value because the underlying instruments are at interest rates which approximate current market rates. The fair value estimates for oil derivatives are derived from published market prices for the underlying commodities to determine discounted expected future cash flows as of the date of the estimate. See Note 8 Derivative Instruments.

Consolidation The accompanying consolidated financial statements include the accounts of the Company and its wholly owned subsidiaries. All significant intercompany balances and transactions have been eliminated in consolidation.

Concentration of Credit Risk and Major Customer The Company has cash in excess of federally insured limits at June 30, 2009. During the six months ended June 30, 2009, sales to two customers represented 76% and 12%, respectively, of oil and gas revenues. At June 30, 2009, these customers made up 74% and 16%, respectively, of accounts receivable.

Oil and Gas Properties The Company uses the full cost method of accounting for oil and gas properties. Under this method, all costs associated with acquisition, exploration, and development of oil and gas reserves are capitalized. Costs capitalized include acquisition costs, geological and geophysical expenditures, lease rentals on undeveloped properties and costs of drilling and equipping productive and non-productive wells. Drilling costs include directly related overhead costs. Capitalized costs are categorized either as being subject to amortization or not subject to amortization.

ARENA RESOURCES, INC.
NOTES TO UNAUDITED CONDENSED CONSOLIDATED FINANCIAL STATEMENTS
JUNE 30, 2009

All capitalized costs of oil and gas properties, including the estimated future costs to develop proved reserves and estimated future costs of abandonment and site restoration, are amortized on the unit-of-production method using estimates of proved reserves as determined by independent engineers. Investments in unproved properties and major development projects are not amortized until proved reserves associated with the projects can be determined. The Company evaluates oil and gas properties for impairment at least annually. Amortization expense for the three and six months ended June 30, 2009 was \$7,409,024 and \$14,640,505, respectively, based on depletion at the rate of \$12.99 per barrel of oil equivalent compared to \$7,574,790 and \$13,714,723, respectively, for the three and six months ended June 30, 2008, based on depletion at the rate of \$12.65 per barrel of oil equivalent. These amounts include \$74,250 and \$147,524 of depreciation for the three and six months ended June 30, 2009, respectively, compared to \$60,013 and \$109,704 of depreciation for the three and six months ended June 30, 2008, respectively.

In addition, capitalized costs are subject to a ceiling test which limits such costs to the estimated present value of future net revenues from proved reserves, discounted at a 10-percent interest rate, based on current economic and operating conditions, plus the lower of cost or fair market value of unproved properties. Consideration received from sales or transfers of oil and gas property is accounted for as a reduction of capitalized costs. Revenue is not recognized in connection with contractual services performed on properties in which the Company holds an ownership interest.

Drilling Rigs Drilling rigs are valued at historical cost adjusted for impairment loss less accumulated depreciation. Historical costs include all direct costs associated with the acquisition of drilling rigs and placing them in service. Drilling rigs are depreciated over 10 years and the depreciation is capitalized as part of oil and gas properties subject to amortization. For the three and six months ended June 30, 2009 the Company had depreciation of \$121,854 and \$232,529, respectively, on the Company owned drilling rigs, compared to \$160,597 and \$319,784 for the three and six months ended June 30, 2008. At the first of 2009, the Company discontinued use of one of the two Company owned rigs and prepared it for storage. This Company owned drilling rig was put back into operations in late June 2009. Because the rig was not in use during the three or six months ended June 30, 2009, no depreciation was calculated on that rig. Because it has been placed back into service, depreciation will begin in July 2009.

Land, Buildings, Equipment and Leasehold Improvements Land, buildings, equipment and leasehold improvements are valued at historical cost adjusted for impairment loss less accumulated depreciation. Historical costs include all direct costs associated with the acquisition of land, buildings, equipment and leasehold improvements and placing them in service.

Depreciation of buildings and equipment is calculated using the straight-line method based upon the following estimated useful lives:

Buildings and improvements	30 years
Office equipment and software	5-7 years
Machinery and equipment	5-7 years

Inventory for Property Development Inventories consist primarily of tubular goods used in development and are stated at the lower of specific cost of each inventory item or market value.

ARENA RESOURCES, INC.
NOTES TO UNAUDITED CONDENSED CONSOLIDATED FINANCIAL STATEMENTS
JUNE 30, 2009

Basic and Diluted Income Per Common Share Basic income per common share is computed by dividing net income by the weighted-average number of common shares outstanding during the period. Diluted income per share reflects the potential dilution that could occur if all contracts to issue common stock were converted into common stock, except for those that are anti-dilutive. The dilutive effect of stock options and other share based compensation is calculated using the treasury method with an offset from expected proceeds upon exercise of the stock options and unrecognized compensation expense.

Recent Accounting Pronouncements In December 2008, the SEC announced that it had approved revisions to its oil and gas reporting disclosures. The new disclosure requirements include provisions that:

Introduce a new definition of oil and gas producing activities. This new definition allows companies to include in their reserve base volumes from unconventional resources. Such unconventional resources include bitumen extracted from oil sands and oil and gas extracted from coal beds and shale formations.

Report oil and gas reserves using an unweighted average price using the prior 12-month period, based on the closing prices on the first day of each month, rather than year-end prices. The SEC indicated that they will continue to communicate with the FASB staff to align their accounting standards with these rules. The FASB currently requires a single-day, year-end price for accounting purposes.

Permit companies to disclose their probable and possible reserves on a voluntary basis. In the past, proved reserves were the only reserves allowed in the disclosures.

Requires companies to provide additional disclosure regarding the aging of proved undeveloped reserves.

Permit the use of reliable technologies to determine proved reserves if those technologies have been demonstrated empirically to lead to reliable conclusions about reserves volumes.

Replace the existing certainty test for areas beyond one offsetting drilling unit from a productive well with a reasonable certainty test.

Require additional disclosures regarding the qualifications of the chief technical person who oversees the company's overall reserve estimation process. Additionally, disclosures regarding internal controls over reserve estimation, as well as a report addressing the independence and qualifications of its reserves preparer or auditor will be mandatory.

The Company will begin complying with the disclosure requirements in our annual report on Form 10-K for the year ending December 31, 2009. The new rules may not be applied to disclosures in quarterly reports prior to the first annual report in which the revised disclosures are required. We are currently in the process of evaluating the new requirements.

In June 2009, the FASB issued SFAS No. 168, *The FASB Accounting Standards Codification TM and the Hierarchy of Generally Accepted Accounting Principles a replacement of FASB Statement No. 162* (SFAS 168) which establishes the *FASB Accounting Standards Codification TM* (Codification) as the source of authoritative accounting principles recognized by the FASB to be applied by nongovernmental entities in the preparation of financial statements in conformity with GAAP. Rules and interpretive releases of the Securities and Exchange Commission (SEC) under authority of federal securities laws are also sources of authoritative GAAP for SEC registrants. This Statement shall be effective for financial statements issued for interim and annual periods ending after September 15, 2009. On the effective date of this Statement, all then-existing non-SEC accounting and reporting standards are superseded, except as noted within the SFAS 168. Concurrently, all nongrandfathered, non-SEC accounting literature not included in the Codification is deemed non-authoritative with some exceptions as noted within the literature. We do not anticipate that this pronouncement will have a material impact on our results of operations or financial position.

ARENA RESOURCES, INC.
NOTES TO UNAUDITED CONDENSED CONSOLIDATED FINANCIAL STATEMENTS
JUNE 30, 2009

New Accounting Pronouncements In April 2009, the FASB issued FSP FAS 107-1 and Accounting Principles Board (APB) Opinion No. 28-1 (collectively, FSP FAS 107-1), *Interim Disclosures about Fair Value of Financial Instruments*. FSP FAS 107-1 amends SFAS No. 107, *Disclosures about Fair Value of Financial Instruments*, to require an entity to provide disclosures about fair value of financial instruments in interim financial information. The FSP FAS 107-1 also amends APB Opinion No. 28, *Interim Financial Reporting*, to require those disclosures about the fair value of financial instruments in summarized financial information at interim reporting periods. Under FSP FAS 107-1, the Company will be required to include disclosures about the fair value of its financial instruments whenever it issues financial information for interim reporting periods. In addition, the Company will be required to disclose in the body or in the accompanying notes of its summarized financial information for interim reporting periods and in its financial statements for annual reporting periods, the fair value of all financial instruments for which it is practicable to estimate that value, whether recognized or not recognized in the statement of financial position. FSP FAS 107-1 is effective for periods ending after June 15, 2009 and the adoption did not have a material impact on our financial position or results of operations.

In May 2009, the FASB issued SFAS No. 165, *Subsequent Events* (SFAS 165), which establishes general standards of accounting for and disclosure of events that occur after the balance sheet date but before financial statements are issued or are available to be issued. In particular, this Statement sets forth (1) the period after the balance sheet date during which management of a reporting entity should evaluate events or transactions that may occur for potential recognition or disclosure in the financial statements; (2) the circumstances under which an entity should recognize events or transactions occurring after the balance sheet date in its financial statements and (3) the disclosures that an entity should make about events or transactions that occurred after the balance sheet date. This Statement is effective for interim or annual financial periods ending after June 15, 2009, and shall be applied prospectively. We adopted SFAS 165 beginning June 30, 2009 and the adoption did not have a material impact on our financial position or results of operations. The date through which subsequent events have been evaluated is August 6, 2009, the date on which we filed our Form 10-Q with the Securities and Exchange Commission.

NOTE 2 EARNINGS PER SHARE INFORMATION

	For the Three Months Ended		For the Six Months Ended	
	June 30,		June 30,

Net Income	0.37	0.67	0.54	1.18

For the three and six months ended June 30, 2009, 700,000 stock options were not included in the computation of diluted income per share as their effects are anti-dilutive.

ARENA RESOURCES, INC.
NOTES TO UNAUDITED CONDENSED CONSOLIDATED FINANCIAL STATEMENTS
JUNE 30, 2009

NOTE 3 NOTES PAYABLE

Credit facility Effective as of June 30, 2009, the Company entered into a new agreement that provides for a credit facility of \$150 million with a borrowing base of \$75 million with the structure in place to increase that borrowing base an additional \$75 million. The new facility has an interest rate grid with a range of LIBOR plus 2.25% to 3.25%, depending upon our level of utilization of the credit facility with the total interest rate to be charged being no less than 4.00%. As of June 30, 2009, we were in compliance with all covenants and did not have any amount outstanding under this credit facility.

NOTE 4 ASSET RETIREMENT OBLIGATION

The Company provides for the obligation to plug and abandon oil and gas wells at the dates properties are either acquired or the wells are drilled. The asset retirement obligation is adjusted each quarter for any liabilities incurred or settled during the period, accretion expense and any revisions made to the estimated cash flows. The reconciliation of the asset retirement obligation for the three months ended June 30, 2009 is as follows:

Balance, January 1, 2009	\$ 5,066,348
Liabilities incurred	343,874
Accretion expense	191,690
Balance, June 30, 2009	\$ 5,601,912

NOTE 5 STOCKHOLDERS EQUITY

Warrants exercised During the six months ended June 30, 2009, the Company issued 95,364 shares of common stock from the exercise of warrants. Of these warrants, 30,114 had an exercise price of \$3.74 per share and 65,250 had an exercise price of \$4.50 per share, for total proceeds of \$406,327.

Options exercised During the six months ended June 30, 2009, the Company issued 47,000 shares of common stock from the exercise of options for proceeds of \$715,340. Of these options, 20,000 had an exercise price of \$4.15 per share and 27,000 had an exercise price of \$23.42 per share.

NOTE 6 EMPLOYEE STOCK OPTIONS

Compensation expense charged against income for stock based awards during the three and six months ended June 30, 2009 was \$1,220,622 and \$2,549,939, respectively, as compared to \$1,488,905 and \$3,249,717 for the three and six months ended June 30, 2008, respectively, and is included in general and administrative expense in the accompanying financial statements.

The Company did not grant any nonqualified stock options to directors and employees during the three or six months ended June 30, 2009. Additionally, there were no forfeitures during the three or six months ended June 30, 2009. However, a total of 47,000 options were exercised to purchase shares. Of the 47,000 shares, 20,000 had an exercise price of \$4.15 per share and 27,000 had an exercise price of \$23.42 per share. A summary of the status of the stock options as of June 30, 2009 is as follows:

ARENA RESOURCES, INC.
NOTES TO UNAUDITED CONDENSED CONSOLIDATED FINANCIAL STATEMENTS
JUNE 30, 2009

	Options	Weighted-Average Exercise Price	
Outstanding at December 31, 2008	2,252,000	\$	22.12
Exercised	(47,000)	\$	15.22
Outstanding at June 30, 2009	2,205,000		22.26
Exercisable at June 30, 2009	795,000	\$	13.51

As of June 30, 2009, there was approximately \$6,911,433 of unrecognized compensation cost related to stock options that will be recognized over a weighted average period of 2.31 years. The aggregate intrinsic value of options expected to vest at June 30, 2009 was \$22,382,406. The aggregate intrinsic value of options exercisable at June 30, 2009 was \$15,383,800. The intrinsic value is based on a June 30, 2009 closing price of the Company's common stock of \$31.85. The 47,000 options exercised during the six months ended June 30, 2009 had an intrinsic value of \$903,420 on the dates of exercise.

NOTE 7 CONTINGENCIES AND COMMITMENTS

Standby Letters of Credit A commercial bank has issued standby letters of credit on behalf of the Company to the states of Texas, Oklahoma, New Mexico and Kansas totaling \$686,969 to allow the Company to do business in those states. The standby letters of credit are valid until cancelled or matured and are collateralized by the revolving credit facility with the bank. Letter of credit terms range from one to five years. The Company intends to renew the standby letters of credit for as long as the Company does business in those states. No amounts have been drawn under the standby letters of credit.

NOTE 8 DERIVATIVE INSTRUMENTS

The Company uses commodity based derivative contracts to manage exposures to commodity price fluctuations. The Company does not enter into these arrangements for speculative or trading purposes. These contracts consist of costless collars. The Company does not utilize complex derivatives such as swaptions, knockouts or extendable swaps. During the three months ended June 30, 2009, the Company monetized a costless collar for 1,000 barrels of oil per day for the period June 2009 through December 2009 with a floor of \$100 and a ceiling of \$197, thereby eliminating that hedge. At June 30, 2009, the Company had one costless collar contract covering 552,000 barrels of oil at floor and cap prices of \$50.00 to \$72.60 per barrel, respectively. The fair value, represented by the estimated amount that would be realized upon termination, based on a comparison of the contract prices and the reference price, on June 30, 2009, was an unrealized loss, net of tax, of \$14,760. The contract expires monthly through December 2009.

The following table sets forth our derivative volumes as of June 30, 2009:

Commodity	Remaining Period	Volume	Floor	Ceiling
WTI Crude Oil	July 2009 - December 2009	552,000	\$ 50.00	\$ 72.60

Under SFAS No. 133, every derivative instrument is required to be recorded on the balance sheet as either an asset or a liability measured at its fair value. Fair value is generally determined based on the difference between the fixed contract price and the underlying estimated market price at the determination date. Changes in the fair value of effective cash flow hedges are recorded as a component of Accumulated other comprehensive income (loss), (AOCI) which is later transferred to earnings when the underlying physical transaction occurs. As of June 30, 2009, an unrealized loss on derivative, net of tax, of \$14,760 was recorded in AOCI. This loss is expected to be reclassified into earnings during 2009. The actual reclassification to earnings will be based on market prices at the contract settlement date.

ARENA RESOURCES, INC.
NOTES TO UNAUDITED CONDENSED CONSOLIDATED FINANCIAL STATEMENTS
JUNE 30, 2009

For those derivative instruments that qualify for hedge accounting, settled transaction gains and losses are determined monthly, and are included in the operating section of our income statement as Realized loss (gain) on oil derivatives in the period the hedged production is sold. During the three months ended June 30, 2009, the Company monetized an existing costless collar, resulting in our realizing a gain during the period of \$7,992,900, part of which would not have been realized until later in 2009. As a result of this monetization, our realized gain on oil derivatives includes \$10.8 million and \$15.9 million of gains in the three and six months ended June 30, 2009, respectively, compared to losses of \$4.0 million and \$5.5 million in the three and six months ended June 30, 2008. Any ineffectiveness associated with these hedges would be reflected in the income statement caption called Derivative fair value income (loss). Our hedging contracts are all fully effective.

To designate a derivative as a cash flow hedge, the Company documents at the hedge's inception our assessment that the derivative will be highly effective in offsetting expected changes in cash flows from the item hedged. This assessment, which is updated at least quarterly, is generally based on the most recent relevant historical correlation between the derivative and the item hedged. The ineffective portion of the hedge is calculated as the difference between the change in fair value of the derivative and the estimated change in cash flows from the item hedged. If, during the derivative's term, the Company determines the hedge is no longer highly effective, hedge accounting is prospectively discontinued and any remaining unrealized gains or losses, based on the effective portion of the derivative at that date, are reclassified to earnings as realized gain or loss on oil derivatives when the underlying transaction occurs. If it is determined that the designated hedge transaction is not probable to occur, any unrealized gains or losses are recognized immediately in the statement of operations as a Derivative fair value income or loss. Our hedges are considered to be effective and therefore no amounts have been recorded for ineffectiveness.

Derivative Fair Value Income (Loss)

The following table presents information about the components of derivative fair value income (loss) in the three months ended June 30, 2009 and 2008:

	For the Three Months Ended		For the Six Months Ended	
	2009	June 30, 2008	2009	June 30, 2008
Realized loss (gain) on oil derivatives	(10,758,797)	3,958,099	(15,870,007)	5,546,539

The combined fair value of derivatives included in our consolidated balance sheets as of June 30, 2009 and December 31, 2008 is summarized below. The Company conducts derivative activities with one corporation. The Company believes this corporation is an acceptable credit risk. The credit worthiness of our counterparty is subject to periodic review.

	June 30, 2009	December 31, 2008
Derivative assets, crude oil collars	\$ -	\$ 16,210,478
Derivative liabilities, crude oil collars	\$ 70,287	\$ -

ARENA RESOURCES, INC.
NOTES TO UNAUDITED CONDENSED CONSOLIDATED FINANCIAL STATEMENTS
JUNE 30, 2009

The Company adopted SFAS No. 161 at the beginning of the first quarter of 2009 and the expanded disclosures required by SFAS No. 161. The Company does not have any derivatives that do not qualify for hedge accounting. The table below provides data about the carrying values of derivatives that qualify for hedge accounting:

	June 30, 2009			December 31, 2008		
	Asset Carrying value	(Liabilities) Carrying value	Net Carrying value	Asset Carrying value	(Liabilities) Carrying value	Net Carrying value
Derivative that qualify as cash flow hedge accounting						
Collars	-	70,287	-	16,210,478	-	16,210,478

The tables below provides data about the amount of gains and losses related to cash flow derivatives that qualify for hedge accounting included in the balance sheet caption Accumulated other comprehensive income (AOCI) and in our statement of operations:

	Amount of Gain/(Loss) recognized in AOCI		Amount of Gain/(Loss) reclassified from AOCI to Operations	
	As of June 30,		Six Months ended June 30,	
	2009	2008	2009	2008
Collar	\$ (70,287)	\$ 8,944,805	\$ 16,226,263	\$ (3,189,905)
Income taxes	26,006	(3,309,578)	(6,003,717)	1,180,265
Total	\$ (44,281)	\$ 5,635,227	\$ 10,222,546	\$ (2,009,640)

NOTE 9 FAIR VALUE MEASUREMENTS

SFAS No. 157, *Fair Value Measurements* (SFAS 157), establishes a framework for fair value measurements in the financial statements by providing a definition of fair value, provides guidance on the methods used to estimate fair value and expands disclosures about fair value measurements. On January 1, 2008, the Company applied SFAS 157 for its assets and liabilities that are measured at fair value on a recurring basis, primarily our costless collars. The initial adoption of SFAS 157 had no material impact on the Company's Consolidated Financial Statements. In February 2008, the FASB issued FASB Staff Position (FSP) FAS 157-2, permitting entities to delay application of SFAS 157 to fiscal years beginning after November 15, 2008, for non-financial assets and non-financial liabilities, except for items that are recognized or disclosed at fair value in the financial statements on a recurring basis (at least annually). Beginning January 1, 2009, the Company applied SFAS 157 fair value requirements to non-financial assets and non-financial liabilities that are not recognized or disclosed on a recurring basis. SFAS 157 requires two distinct transition approaches: (1) cumulative-effect adjustment to beginning retained earnings for certain financial instrument transactions and (2) prospectively as of the date of adoption through earnings or other comprehensive income, as applicable for all other instruments. Upon adopting SFAS 157, the Company applied a prospective transition as it did not have financial instrument transactions that required a cumulative-effect adjustment to beginning retained earnings.

ARENA RESOURCES, INC.
NOTES TO UNAUDITED CONDENSED CONSOLIDATED FINANCIAL STATEMENTS
JUNE 30, 2009

Fair value is the price that would be received to sell an asset or the amount paid to transfer a liability in an orderly transaction between market participants (an exit price) at the measurement date. Fair value is a market based measurement considered from the perspective of a market participant. The Company uses market data or assumptions that market participants would use in pricing the asset or liability, including assumptions about risk and the risks inherent in the inputs to the valuation. These inputs can be readily observable, market corroborated, or unobservable. The Company primarily applies a market approach for recurring fair value measurements using the best available information while utilizing valuation techniques that maximize the use of observable inputs and minimize the use of unobservable inputs.

SFAS 157 establishes a fair value hierarchy that prioritizes the inputs used to measure fair value. The hierarchy gives the highest priority to quoted prices in active markets for identical assets or liabilities (Level 1 measurement) and the lowest priority to unobservable inputs (Level 3 measurement). The Company's fair value balances are based on the observability of those inputs. The three levels of the fair value hierarchy are as follows:

Level 1 Quoted prices in active markets for identical assets or liabilities that the Company has the ability to access. Active markets are those in which transactions for the asset or liability occur in sufficient frequency and volume to provide pricing information on an ongoing basis. The Company does not have any fair value balances classified as Level 1.

Level 2 Inputs are other than quoted prices in active markets included in Level 1, that are either directly or indirectly observable. These inputs are either directly observable in the marketplace or indirectly observable through corroboration with market data for substantially the full contractual term of the asset or liability being measured. The Company's Level 2 items consist of a costless collar.

Level 3 Includes inputs that are not observable for which there is little, if any, market activity for the asset or liability being measured. These inputs reflect management's best estimate of the assumptions market participants would use in determining fair value. Level 3 would include instruments valued using industry standard pricing models and other valuation methods that utilize unobservable pricing inputs that are significant to the overall fair value. The Company does not have any fair value balances classified as Level 3.

In valuing certain contracts, the inputs used to measure fair value may fall into different levels of the fair value hierarchy. For disclosure purposes, assets and liabilities are classified in their entirety in the fair value hierarchy level based on the lowest level of input that is significant to the overall fair value measurement. Our assessment of the significance of a particular input to the fair value measurement requires judgment and may affect the placement within the fair value hierarchy levels.

The following table sets forth by level within the fair value hierarchy the Company's liability that is measured at fair value on a recurring basis:

Fair Value Measurements at June 30, 2009 Using:

Assets/(Liabilities):	Quoted Prices in Active Markets for Identical Liabilities: (Level 1)	Significant Other Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)	Total
\$50 - \$72.60 Costless collar	\$ -	\$ 70,287	\$ -	\$ 70,287

ARENA RESOURCES, INC.
NOTES TO UNAUDITED CONDENSED CONSOLIDATED FINANCIAL STATEMENTS
JUNE 30, 2009

NOTE 10 SUBSEQUENT EVENTS

Subsequent to June 30, 2009, the Company entered into an agreement for zero-cost collars on a portion of gas production, equal to 5,000 net MMBTU of gas per day, beginning in January 2010 and continuing through December 2010. Under the collar agreements, the floor price is \$4.00 and the ceiling price is \$7.87 based on the El Paso Permian index price.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

Results of Operations For the Three Months Ended June 30, 2009

Oil and natural gas sales. For the three months ended June 30, 2009, oil and natural gas sales revenue decreased \$34,552,586 to \$27,636,695, compared to \$62,159,281 for the same period during 2008. Oil sales decreased \$31,435,315 and natural gas sales decreased \$3,087,271. The decreases were the result of significantly lower oil and gas prices between periods and lower oil production. For the three months ended June 30, 2009, oil sales volume decreased 15,939 barrels to 461,491 barrels, compared to 477,430 barrels for the same period in 2008. The average realized per barrel oil price decreased 54% from \$119.23 for the three months ended June 30, 2008 to \$55.23 for the three months ended June 30, 2009. For the three months ended June 30, 2009, gas sales volume increased 30,962 thousand cubic feet (MCF) to 517,289 MCF, compared to 486,327 MCF for the same period in 2008. The average realized natural gas price per MCF decreased 61% from \$10.77 for the three months ended June 30, 2008 to \$4.16 for the three months ended June 30, 2009.

Oil and gas production costs. Our lease operating expenses (LOE) decreased from \$4,277,676 or \$7.66 per barrel of oil equivalent (BOE) for the three months ended June 30, 2008 to \$3,271,063 or \$5.97 per BOE for the three months ended June 30, 2009. The decreases in total LOE and the per BOE amounts were the result of lower costs for services and equipment.

Production taxes. Production taxes as a percentage of oil and natural gas sales were 5% during the three months ended June 30, 2008 and remained steady at 5% for the three months ended June 30, 2009. Production taxes vary from state to state. Therefore, these taxes may vary in the future depending on the mix of production we generate from various states, as well as the possibility that any state may raise its production tax rate.

Depreciation, depletion and amortization. Our depreciation, depletion and amortization expense decreased by \$165,766 to \$7,409,024 for the three months ended June 30, 2009, compared to the same period in 2008. The decrease was primarily a result of slightly lower production volume partially offset by an increase in the average depletion rate from \$12.65 per BOE during the three months ended June 30, 2008 to \$12.99 per BOE during the three months ended June 30, 2009. The increased depletion rate was the result of increased capitalized costs and development costs.

General and administrative expenses. General and administrative expenses decreased by \$188,795 to \$3,464,110 for the three months ended June 30, 2009, compared to the same period in 2008. The decrease was primarily the result of a decrease in stock-based compensation expense from \$1,488,905 for the three months ended June 30, 2008 to \$1,220,622 for the three months ended June 30, 2009.

Interest income. Interest income was \$209,994 for the three months ended June 30, 2009, compared to \$248,705 for the three months ended June 30, 2008. The decrease was due to lower interest rates in 2009.

Interest expense. Interest expense was zero for the three months ended June 30, 2009, compared to \$530,376 for the three months ended June 30, 2008. The decrease was due to no amounts being outstanding on our credit facility during the three months ended June 30, 2009 while there were amounts outstanding on our credit facility during the three months ended June 30, 2008.

Income tax expense. Our effective tax rate was 37% during the three months ended June 30, 2008 and remained steady at 37% for the three months ended June 30, 2009.

Edgar Filing: ARENA RESOURCES INC - Form 10-Q

Net income. Net income decreased from \$24,794,349 for the three months ended June 30, 2008 to \$14,436,066 for the same period in 2009. The primary reason for this decrease is the lower commodity prices between periods.

Results of Operations For the Six Months Ended June 30, 2009

Oil and natural gas sales. For the six months ended June 30, 2009, oil and natural gas sales revenue decreased \$59,641,818 to \$47,829,855, compared to \$107,471,673 for the same period during 2008. Oil sales decreased \$55,112,995 and natural gas sales decreased \$4,528,823. The decreases were the result of significantly lower oil and gas prices between periods partially offset by higher production. For the six months ended June 30, 2009, oil sales volume increased 20,254 barrels to 950,740 barrels, compared to 930,486 barrels for the same period in 2008. The average realized per barrel oil price decreased 57% from \$106.02 for the six months ended June 30, 2008 to \$45.79 for the six months ended June 30, 2009. For the six months ended June 30, 2009, gas sales volume increased 119,871 thousand cubic feet (MCF) to 990,112 MCF, compared to 870,241 MCF for the same period in 2008. The average realized natural gas price per MCF decreased 57% from \$10.14 for the six months ended June 30, 2008 to \$4.34 for the six months ended June 30, 2009.

Oil and gas production costs. Our lease operating expenses (LOE) increased from \$7,189,601 or \$6.68 per barrel of oil equivalent (BOE) for the six months ended June 30, 2008 to \$7,477,847 or \$6.70 per BOE for the three months ended June 30, 2009. The increases in total LOE was the result of variations in costs for services and equipment between periods.

Production taxes. Production taxes as a percentage of oil and natural gas sales were 5% during the six months ended June 30, 2008 and remained steady at 5% for the six months ended June 30, 2009. Production taxes vary from state to state. Therefore, these taxes may vary in the future depending on the mix of production we generate from various states, as well as the possibility that any state may raise its production tax rate.

Depreciation, depletion and amortization. Our depreciation, depletion and amortization expense increased by \$925,782 to \$14,640,505 for the six months ended June 30, 2009, compared to the same period in 2008. The increase was primarily a result of higher production volume and an increase in the average depletion rate from \$12.65 per BOE during the six months ended June 30, 2008 to \$12.99 per BOE during the six months ended June 30, 2009. The increased depletion rate was the result of increased capitalized costs and development costs.

General and administrative expenses. General and administrative expenses decreased by \$137,009 to \$6,138,879 for the six months ended June 30, 2009, compared to the same period in 2008. The decrease was primarily the result of a decrease in stock-based compensation expense from \$3,249,717 for the six months ended June 30, 2008 to \$2,549,939 for the six months ended June 30, 2009 partially offset by higher overall compensation expense between periods.

Interest income. Interest income was \$476,306 for the six months ended June 30, 2009, compared to \$289,666 for the six months ended June 30, 2008. The increase was due to higher cash balances between periods partially offset by lower interest rates in 2009.

Interest expense. Interest expense was zero for the six months ended June 30, 2009, compared to \$1,145,456 for the six months ended June 30, 2008. The decrease was due to no amounts being outstanding on our credit facility during the six months ended June 30, 2009 while there were amounts outstanding on our credit facility during the six months ended June 30, 2008.

Edgar Filing: ARENA RESOURCES INC - Form 10-Q

Income tax expense. Our effective tax rate was 37% during the six months ended June 30, 2008 and remained steady at 37% for the six months ended June 30, 2009.

Net income. Net income decreased from \$43,112,744 for the six months ended June 30, 2008 to \$20,901,514 for the same period in 2009. The primary reason for this decrease is the lower commodity prices between periods.

Revenues Year to Date by Geographic section

Arena reports its net oil and gas revenues for the year to date as applicable to the following geographic sectors:

OIL

	Net Production Volume	Net Revenue
Texas Leases	825,317 BBLS	\$ 37,783,095
Oklahoma Leases	16,000 BBLS	\$ 774,635
New Mexico Leases	109,423 BBLS	\$ 4,976,755

GAS

	Net Production Volume	Net Revenue
Texas Leases	745,165 MCF	\$ 3,319,624
Oklahoma Leases	7,975 MCF	\$ 23,624
New Mexico Leases	164,829 MCF	\$ 756,934
Kansas Leases	72,143 MCF	\$ 195,188

Significant Subsequent Events occurring after June 30, 2009:

Subsequent to June 30, 2009, the Company entered into an agreement for zero-cost collars on a portion of gas production, equal to 5,000 net MMBTU of gas per day, beginning in January 2010 and continuing through December 2010. Under the collar agreements, the floor price is \$4.00 and the ceiling price is \$7.87 based on the El Paso Permian index price.

Capital Resources and Liquidity

As shown in the financial statements for the six months ended June 30, 2009, the Company had cash on hand of \$68,055,740, compared to \$58,489,574 as of December 31, 2008. The Company had net cash provided by operating activities for the six months ended June 30, 2009 of \$49,984,741, compared to \$87,338,395 for the same period 2008. Other significant sources of cash inflow include proceeds from option and warrant exercises of \$1,121,667 and \$2,515,417 for 2009 and 2008, respectively, and proceeds from issuance of common stock of \$116,149,336 and \$11,000,000 drawn down on the Company's credit facility in 2008. The most significant cash outflows during the six months ended June 30, 2009 and 2008 were capital expenditures of \$41,540,242 and \$90,154,512, respectively, and \$46,000,000 payment on notes payable in 2008.

Effective as of June 30, 2009, we entered into a new agreement that provides for a credit facility of \$150 million with a borrowing base of \$75 million with the structure in place to increase that borrowing base an additional \$75 million. The new facility has an interest rate grid with a range of LIBOR plus 2.25% to 3.25%, depending upon our level of utilization of the credit facility with the total interest rate to be charged being no less than 4.00%. As of June 30, 2009, we were in compliance with all covenants and did not have any amount outstanding under this credit facility.

Disclosures About Market Risks

Like other natural resource producers, Arena faces certain unique market risks. The two most salient risk factors are the volatile prices of oil and gas and certain environmental concerns and obligations.

Oil and Gas Prices

Current competitive factors in the domestic oil and gas industry are unique. The actual price range of crude oil is largely established by major international producers. Pricing for natural gas is more regional. Because domestic demand for oil and gas exceeds supply, there is little risk that all current production will not be sold at relatively fixed prices. To this extent Arena does not see itself as directly competitive with other producers, nor is there any significant risk that the Company could not sell all production at current prices with a reasonable profit margin. The risk of domestic overproduction at current prices is not deemed significant. The primary competitive risks would come from falling international prices which could render current production uneconomical.

Secondarily, Arena is presently committed to use the services of the existing gatherers in its present areas of production. This gives to such gatherers certain short term relative monopolistic powers to set gathering and transportation costs, because obtaining the services of an alternative gathering company would require substantial additional costs since an alternative gatherer would be required to lay new pipeline and/or obtain new rights-of-way in the lease.

It is also significant that more favorable prices can usually be negotiated for larger quantities of oil and/or gas product, such that Arena views itself as having a price disadvantage to larger producers. Large producers also have a competitive advantage to the extent they can devote substantially more resources to acquiring prime leases and resources to better find and develop prospects.

Environmental

Oil and gas production is a highly regulated activity which is subject to significant environmental and conservation regulations both on a federal and state level. Historically, most of the environmental regulation of oil and gas production has been left to state regulatory boards or agencies in those jurisdictions where there is significant gas and oil production, with limited direct regulation by such federal agencies as the Environmental Protection Agency. However, while the Company believes this generally to be the case for its production activities in Texas, Oklahoma, Kansas and New Mexico, it should be noticed that there are various Environmental Protection Agency regulations which would govern significant spills, blow-outs, or uncontrolled emissions.

In Oklahoma, Texas, Kansas and New Mexico specific oil and gas regulations exist related to the drilling, completion and operations of wells, as well as disposal of waste oil. There are also procedures incident to the plugging and abandonment of dry holes or other non-operational wells, all as governed by the Oklahoma Corporation Commission, Oil and Gas Division, the Texas Railroad Commission, Oil and Gas Division, the Kansas Corporation Commission, Oil and Gas Division or the New Mexico Oil Conservation Division.

Compliance with these regulations may constitute a significant cost and effort for Arena. No specific accounting for environmental compliance has been maintained or projected by Arena to date. Arena does not presently know of any environmental demands, claims, or adverse actions, litigation or administrative proceedings in which it or the acquired properties are involved or subject to or arising out of its predecessor operations.

Edgar Filing: ARENA RESOURCES INC - Form 10-Q

In the event of a breach of environmental regulations, these environmental regulatory agencies have a broad range of alternative or cumulative remedies to include: ordering a cleanup of any spills or waste material and restoration of the soil or water to conditions existing prior to the environmental violation; fines; or enjoining further drilling, completion or production activities. In certain egregious situations the agencies may also pursue criminal remedies against the Company or its principals.

Item 3. Quantitative and Qualitative Disclosures About Market Risk

Interest Rate Risk

The Company is subject to interest rate risk on its revolving credit facility, which bears variable interest based upon a LIBOR rate. Changes in interest rates affect the interest earned on the Company's cash and cash equivalents and the interest rate paid on borrowings under its bank credit facility. Currently, the Company does not use interest rate derivative instruments to manage exposure to interest rate changes.

Commodity Price Risk

The Company's revenues, profitability and future growth depend substantially on prevailing prices for oil and natural gas. Prices also affect the amount of cash flow available for capital expenditures and Arena's ability to borrow and raise additional capital. The amount the Company can borrow under its bank credit facility is subject to periodic redetermination based in part on changing expectations of future prices. Lower prices may also reduce the amount of oil and natural gas that the Company can economically produce. Arena currently sells all of its oil and natural gas production under price sensitive or market price contracts.

In 2008 and 2009 the Company entered into a derivative contract in order to manage the commodity price risk for a portion of production through 2009. The Company's current derivative contract is a costless collar. A collar is a contract which combines both a put option or floor and a call option or ceiling. The Company receives the excess, if any, of the floor price over the reference price, based on NYMEX quoted prices, and pays the excess, if any, of the reference price over the ceiling price. The following is information relating to the Company's collar position as of June 30, 2009.

Commodity	Remaining Period	Volume	Floor	Ceiling
WTI Crude Oil	July 2009 - December 2009	552,000	\$ 50.00	\$ 72.60

The change in fair value of the oil hedging contract in place at June 30, 2009, resulted in a decrease in the asset of \$16,210,478, to zero and an increase in the liability from zero to \$70,287. The after tax impact of the change in the fair value of the hedge of \$44,281 is reflected in other comprehensive loss. During the three months ended June 30, 2009, the Company monetized an existing costless collar, resulting in a larger decrease in the asset as the gain on that hedge was realized during the three months ended, rather than over the remaining life of the hedge, running through December 2009. Changes in the fair value of derivative instruments designated as cash flow hedges, to the extent they are effective in offsetting cash flows attributable to the hedged risk, are recorded in other comprehensive income until the hedged item is recognized in earnings. Any change in fair value from ineffectiveness is recognized currently in unrealized derivative gain or loss in the consolidated statements of operations.

Cash settlements of cash flow hedges are recorded as a gain on derivatives in the operating section of the Company's statement of operations. During the three months ended June 30, 2009, the Company monetized an existing costless collar, resulting in our realizing a gain during the period of \$7,992,900, part of which would not have been realized until later in 2009. As a result of this monetization, our statement of operations for the three and six months ended June 31, 2009 include gain on derivative instrument of \$10,758,797 and \$15,870,007, respectively, as compared to a loss of \$3,958,099 and \$5,546,539 for the three and six months ended June 30, 2008, respectively.

Additionally, to the extent we hedge our commodity price exposure, we will forego the benefits we would have otherwise experienced if commodity prices were to change in our favor.

Currency Exchange Rate Risk

Foreign sales accounted for none of the Company's sales; further, the Company accepts payment for its commodity sales only in U.S. dollars; hence, Arena is not exposed to foreign currency exchange rate risk on these sales.

Item 4. Controls and Procedures

Evaluation of Disclosure Controls and Procedures

The Company maintains controls and procedures designed to ensure that information required to be disclosed by the Company in the reports it files or submits under the Securities Exchange Act of 1934 is recorded, processed, summarized and reported within the time periods specified in the rules and forms of the Securities and Exchange Commission. At the end of the period covered by this Quarterly Report on Form 10-Q, the Company's management, under the supervision and with the participation of the Company's Chief Executive Officer and Chief Financial Officer, evaluated the effectiveness of the design and operation of the Company's disclosure controls and procedures. Based on that evaluation, the Company's Chief Executive Officer and Chief Financial Officer concluded that as of the end of such period the Company's disclosure control and procedures are effective in alerting them to material information that is required to be included in the reports the Company files or submits under the Securities Exchange Act of 1934.

Changes in Internal Controls Over Financial Reporting

There have been no changes in the Company's internal control over financial reporting during the most recent fiscal quarter that have materially affected, or are reasonably likely to materially affect, the Company's internal control over financial reporting.

Part II Other Information

Item 1. Legal Proceedings

None.

Item 1A. Risk Factors

There have been no material changes from risk factors as previously disclosed in our Form 10-K in response to Item 1A to Part I of Form 10-K.

Item 2. Unregistered Sales of Equity Securities and Use of Proceeds

None.

Item 3. Defaults Upon Senior Securities

None.

Item 4. Submission of Matters to a Vote of Security Holders

None.

Item 5. Other Information

None.

Item 6. Exhibits
