QUEBEC CITY, CANADA, NOVEMBER 14, 2005 - AETerna Zentaris Inc. (TSX: AEZ; NASDAQ: AEZS) today reported financial and operating results for the third quarter ended September 30, 2005. Consolidated revenues for the third quarter 2005 were \$63.4 million compared to \$55.4 million for the same period in 2004, an increase of 14.4%. Consolidated R&D expenses net of tax credits amounted to \$7.4 million in the third quarter of 2005 compared to \$6.6 million in the third quarter of 2004. Consolidated earnings from operations for the third quarter 2005 were \$1.1 million, compared to \$5.5 million for the third quarter 2004. The Company's consolidated net loss was \$4.8 million, or \$0.10 per basic and diluted share for the third quarter of 2005 compared to a consolidated net loss of \$2 million, or \$0.04 per basic and diluted share for the comparable period in 2004.

The \$8 million increase in consolidated revenues during the third quarter 2005

Edgar Filing: Aeterna Zentaris Inc. - Form 6-K

as compared to the same period in 2004 is attributable to additional revenues from the acquisitions, in January 2005, of Echelon Biosciences in our biopharmaceutical segment and of MultiChem by the Company's subsidiary, Atrium Biotechnologies Inc. This increase is partly offset by the adverse effect of the strengthening Canadian dollar on the Company's sales denominated in foreign currencies and by \$9.4 million non-periodic payments received in 2004 in the biopharmaceutical segment.

As of September 30, 2005, the Company had consolidated cash and short-term investments of \$55.7 million, including \$40.9 million dedicated to the biopharmaceutical segment. The Company generated consolidated positive cash flow from operating activities of \$0.7 million in the third quarter 2005. The burn rate for the biopharmaceutical segment in the third quarter 2005 was \$4.8 million as expected.

NINE-MONTH CONSOLIDATED FINANCIAL RESULTS

Consolidated revenues for the first nine months of 2005 increased 19.1% to \$214.1 million, compared to \$179.7 million for the same period in 2004. The Company reported year-to-date 2005 consolidated earnings from operations of \$13.4 million, compared to \$16.3 million for the same period a year earlier. Consolidated net earnings for the first nine months of 2005 were \$11.8 million, or \$0.26 per basic share and \$0.25 per diluted share compared to a consolidated net loss of \$3.2 million, or \$0.07 per basic and diluted share for the first nine months of 2004.

Dennis Turpin, Vice President and Chief Financial Officer of Aeterna Zentaris, said, "With our strong cash and short-term position in the biopharmaceutical segment of nearly \$41 million, as well as our controlled burn rate of nearly \$1.5 million per month, we believe we are well-positioned to continue to aggressively advance the development of our core innovative and high potential pharmaceutical products."

During the third quarter 2005, Aeterna Zentaris continued to advance its product pipeline. The Company initiated its own European multi-center Phase II trial of perifosine, a novel, first-in-class, oral signal transduction inhibitor, in combination with radiotherapy, in non-small cell lung cancer (NSCLC). This randomized, double-blind, placebo-controlled trial will assess the efficacy and safety of a 150 mg daily dose of perifosine when combined with radiotherapy in 160 patients with inoperable Stage III NSCLC. The trial is being conducted in collaboration with the Netherlands Cancer Institute. The primary endpoint will be the extent and duration of local control, i.e., the absence of tumor recurrence or progression in the area that has been irradiated during a 12-month follow-up period.

The Company also announced that it had completed enrollment for a Phase II trial with ozarelix (D-63153) in hormone-dependent prostate cancer, ahead of the projected schedule. This multi-center trial is designed to evaluate the effects of ozarelix on hormonal levels, in particular testosterone, as well as objective anti-tumor effects. This open-label trial involving 48 patients is being conducted in Europe in collaboration with its partner Spectrum Pharmaceuticals Inc. (NASDAQ: SPPI).

"During the last quarter, we made significant progress in advancing our exciting products through our pipeline," said Gilles Gagnon, Aeterna Zentaris President and Chief Executive Officer. "The recent initiation of our Phase II trial in non-small cell lung cancer with our lead oncology compound, perifosine, was our seventh clinical development project initiated so far this year. Additionally, we were very pleased with having completed patient enrollment for our

Phase II trial in prostate cancer with ozarelix, ahead of schedule. These significant achievements mark critical steps as we continue to execute our strategy aimed at establishing perifosine as a potential breakthrough cancer drug and reflects our strong commitment in building a world-class oncology franchise. We believe we will continue to deliver results and look forward to reporting on our progress next year," concluded Mr. Gagnon.
