**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS**

(in thousands, except per share data)

(unaudited)

### **Basis of Presentation**

The unaudited interim consolidated financial information of USANA Health Sciences, Inc. and its subsidiaries (collectively, the Company or USANA) has been prepared in accordance with Article 10 of Regulation S-X promulgated by the Securities and Exchange Commission. Certain information and footnote disclosures that are normally included in financial statements that have been prepared in accordance with accounting principles generally accepted in the United States of America have been condensed or omitted pursuant to such rules and regulations. In the opinion of management, the accompanying interim consolidated financial information contains all adjustments, consisting of normal recurring adjustments that are necessary to present fairly the Company's financial position as of June 28, 2008, and results of operations for the quarters and six months ended June 30, 2007 and June 28, 2008. These financial statements should be read in conjunction with the audited consolidated financial statements and notes thereto that are included in the Company's Annual Report on Form 10-K for the year ended December 29, 2007. The results of operations for the quarter and six months ended June 28, 2008 may not be indicative of the results that may be expected for the fiscal year ending January 3, 2009.

### **NOTE A ORGANIZATION**

USANA develops and manufactures high-quality nutritional and personal care products that are sold internationally through a network marketing system, which is a form of direct selling. The Company's products are sold throughout the United States, Canada, Mexico, Australia, New Zealand, Singapore, Malaysia, Hong Kong, Taiwan, Japan, South Korea, the United Kingdom, and the Netherlands.

### **NOTE B DISCONTINUED OPERATIONS**

Consistent with the Company's long-term objectives of focusing on its direct selling business, on August 10, 2007, the Company sold certain assets of its third-party contract manufacturing business. The Company retained assets that are associated with manufacturing and packaging its Sensé skin and beauty care products and continues to manufacture these products at the Draper, Utah facility. Results of the third-party contract manufacturing operations have been classified as discontinued operations for all periods.

The Company's sales that are reported in discontinued operations for the quarter and six months ended June 30, 2007 were \$1,865 and \$3,754 respectively. For the quarter ended June 30, 2007, the loss from discontinued operations was \$150 and the related income tax benefit was \$57. For the six months ended June 30, 2007, the loss from discontinued operations was \$330 and the related income tax benefit was \$123.

	\$ 32,074	\$ 33,326

**NOTE G LONG TERM DEBT AND LINE OF CREDIT**

The Company has a \$40,000 line of credit, which had a balance of \$9,835 at June 28, 2008. The Company will be required to pay the balance on this line of credit in full at the time of maturity in May 2011.

The weighted-average interest rate on this line of credit at June 28, 2008, was 4.16%. The interest rate is computed at the bank's Prime Rate or LIBOR and is adjusted according to the related Credit Agreement. The collateral for this line of credit is the pledge of the capital stock of certain subsidiaries of the Company, as set forth in a separate pledge agreement with the bank. The Credit Agreement contains restrictive covenants that are based on the Company's EBITDA and on the Company's debt coverage ratio.

**NOTE H COMMITMENTS AND CONTINGENCIES**

**Contingencies**

**As of June 28, 2008, the Company was named as a defendant in two class action lawsuits, which were filed in 2007 and were later consolidated. The Company is also involved in other various disputes arising in the normal course of business. In the opinion of management, based upon advice of counsel, the ultimate outcome of these lawsuits will not have a material impact on the Company's financial position or results of operations.**

**NOTE I EQUITY-BASED COMPENSATION**

Equity-based compensation expense relating to equity awards under the current and previous plans of the Company, together with the related tax benefit recognized in earnings for the periods ended as of the dates indicated is as follows:

	Quarter Ended		Six Months Ended	
	June 30, 2007	June 28, 2008	June 30, 2007	June 28, 2008
Cost of sales	\$ 172	\$ 150	\$ 315	\$ 331

Related tax benefit	529	479	1,105	1,048
Net equity-based compensation expense	\$ 1,100	\$ 891	\$ 2,115	\$ 1,810

The following table shows the remaining unrecognized compensation expense on a pre-tax basis for all types of equity awards that were outstanding as of June 28, 2008. This table does not include an estimate for future grants that may be issued.

Remainder of 2008	\$ 2,945
2009	3,773
2010	3,316
2011 +	2,307
	\$ 12,341

The cost above is expected to be recognized over a weighted-average period of 1.9 years.

The Company uses the Black-Scholes option pricing model to estimate the fair value of its equity awards, which requires the input of highly subjective assumptions, including expected stock price volatility. The only awards granted by the Company during the six months ended June 28, 2008, were deferred stock units, which are full-value shares at the date of grant. For awards granted by the Company during 2007, expected volatility was calculated by averaging the historical volatility of the Company and a peer group index, and the risk-free interest rate was based on the U.S. Treasury yield curve on the date of grant with respect to the expected life of the award. Due to the plain vanilla characteristics of the Company's equity awards, the simplified method, as permitted by the guidance in Staff Accounting Bulletin No. 107, was used to determine the expected life of these awards.

## Edgar Filing: USANA HEALTH SCIENCES INC - Form 10-Q

Weighted-average assumptions that were used to calculate the fair value of awards that were granted during the quarter and six months ended June 30, 2007, are included in the table below. Because deferred stock units are full-value shares at the date of grant they have been excluded.

	Quarter	Six Months
Expected volatility	41.9%	41.9%
Risk-free interest rate	4.6%	4.6%
Expected life	4.2 yrs.	4.2 yrs.
Expected dividend yield		
Grant price	\$ 40.51	\$ 42.10

**NOTE I EQUITY-BASED COMPENSATION CONTINUED**

A summary of the Company's stock option and stock-settled stock appreciation right activity for the six months ended June 28, 2008, is as follows:

	Shares	Weighted-average exercise price	Weighted-average remaining contractual term	Aggregate intrinsic value*
Outstanding at December 29, 2007	1,864	\$ 32.18	4.9	\$ 12,606
Granted		\$		
Exercised	(215)	\$ 1.62

Exercisable at June 28, 2008	844	\$ 33.85	5.2	\$ 1,778

\* Aggregate intrinsic value is defined as the difference between the current market value at the reporting date and the exercise price of awards that were in-the-money. It is estimated using the closing price of the Company's common stock on the last trading day of the period reported.

The weighted-average fair value of stock options and stock-settled stock appreciation rights that were granted during the six months ended June 30, 2007, was \$16.79. The total intrinsic value of awards that were exercised during the six month periods ended June 30, 2007, and June 28, 2008, was \$4,745 and \$7,096, respectively.

The total fair value of awards that vested during the six month periods ended June 30, 2007, and June 28, 2008, was \$4,397 and \$5,381, respectively. This total fair value includes equity awards that were issued in the form of stock options, stock-settled stock appreciation rights, and deferred stock units.

**NOTE J COMMON STOCK AND EARNINGS PER SHARE**

Basic earnings per share are based on the weighted-average number of shares outstanding for each period. Shares that have been repurchased and retired during the periods specified below have been included in the calculation of the number of weighted-average shares that are outstanding for the calculation of basic earnings per share. Diluted earnings per common share are based on shares that are outstanding (computed under basic EPS) and on potentially dilutive shares. Shares that are included in the diluted earnings per share calculations include equity awards that are in-the-money but have not yet been exercised.

**NOTE K SEGMENT INFORMATION**

USANA operates as a direct selling company that develops, manufactures, and distributes high-quality nutritional and personal care products that are sold through a global network marketing system of independent distributors ( Associates ). During the six months ended June 30, 2007, and June 28, 2008, the Company s nutritional products represented 86% and 88% of product sales, respectively. The Company s personal care products represented 10% of product sales during both of the six month periods ended June 30, 2007, and June 28, 2008.

The Company s primary business is to manage its worldwide Associate base. As such, management has determined that the Company operates in one reportable business segment as defined in SFAS No. 131, Disclosures about Segments of an Enterprise and Related Information. Resources are allocated to markets for the purpose of developing an infrastructure that supports the Associates and sales in that market. The Company does not use profitability reports on a regional or market basis for making business decisions. Performance for a region or market is primarily evaluated based on sales. No single customer accounted for 10% or more of net sales for the periods presented.

Australia-New Zealand	14,630	14,068	27,656	27,446

Due to the centralized structure of the Company's manufacturing operations and its corporate headquarters in the United States, a significant concentration of assets exists in this market. As of June 30, 2007, and June 28, 2008, long-lived assets in the United States totaled \$39,023 and \$49,633, respectively. Additionally, due to the purchase, remodel, and fit-out of a new facility in Sydney, Australia during 2007, long-lived assets in the Australia-New Zealand market as of June 30, 2007 and June 28, 2008 totaled \$7,009 and \$13,626, respectively. There is no significant concentration of long-lived assets in any other market.

## Edgar Filing: USANA HEALTH SCIENCES INC - Form 10-Q

On July 21, 2008, the Company's Compensation Committee of the Board of Directors issued approximately 2,500 SSARs to certain members of senior management that vest over five years. These grants will have a significant impact on the Company's future equity-based compensation expense and, consequently, results of operations.

As of June 28, 2008, a consolidated shareholder class action lawsuit was pending in the United States District Court, District of Utah, Central Division, against the Company and certain of its officers. On July 23, 2008, the district court granted the Company's motion to dismiss this litigation with prejudice. The plaintiff has the right to appeal the court's order within 30 days of the date of the order.

**Item 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS**

The following discussion and analysis of USANA's financial condition and results of operations should be read in conjunction with the Unaudited Consolidated Financial Statements and Notes thereto that are contained in this quarterly report, as well as Management's Discussion and Analysis of Financial Condition and Results of Operations that are included in our Annual Report on Form 10-K for the year ended December 29, 2007, and our other filings, including Current Reports on Form 8-K, that have been filed with the Securities and Exchange Commission (SEC) through the date of this report.

Our fiscal year end is the Saturday closest to December 31<sup>st</sup> of each year. Fiscal year 2008 will end on January 3, 2009, and is a 53-week year. Fiscal year 2007 ended on December 29, 2007, and was a 52-week year.

**Presentation**

Due to the sale of certain assets related to the third-party contract manufacturing business on August 10, 2007, we now operate as one reportable business segment, Direct Selling. Our financial results reflect the reclassification of sales and related expenses in the former Contract Manufacturing segment to discontinued operations.

**General**

USANA develops and manufactures high-quality nutritional and personal care products. We market our products on the basis of high levels of bioavailability, safety, and quality. We distribute our products through a network marketing system, which is a form of direct selling. Our customer base comprises two types of customers: Associates and Preferred Customers. Associates are independent distributors of our products who also purchase our products for their personal use. Preferred Customers purchase our products strictly for their personal use and are not permitted to resell or to distribute the products. As of June 28, 2008, we had approximately 169,000 active Associates and approximately 77,000 active Preferred Customers worldwide. During the six months ended June 28, 2008, sales to Associates accounted for approximately 87% of product sales. For purposes of this report, we only count as active customers those Associates and Preferred Customers who have purchased product from USANA at any time during the most recent three-month period, either for personal use or for resale.

We have ongoing operations in the following markets, which are grouped and presented in four geographic regions:

- North America – United States, Canada, Mexico, and direct sales from the United States to the United Kingdom and the Netherlands;
- Southeast Asia/Pacific – Australia-New Zealand, Singapore, and Malaysia;

- East Asia Hong Kong and Taiwan; and
- North Asia Japan and South Korea.

Our primary product lines consist of USANA® Nutritionals and Sensé beautiful science® (Sensé). The USANA Nutritionals product line is further categorized into three separate classifications:

- Essentials core vitamin and mineral supplements that provide a foundation of advanced nutrition for every age group;
- Optimizers targeted supplements that are designed to meet individual health and nutritional needs; and
- Macro Optimizers healthy, low-glycemic functional foods and other related products.

As both a manufacturer and direct seller of nutritional and personal care products, we compete within two industries: nutrition and direct selling. We believe that the most significant industry-wide factors affecting us are the aging of the worldwide population and the general public's heightened awareness and understanding of the connection between diet and health, as well as attracting and retaining Associates and Preferred Customers.

Our results of operations and financial condition are directly related to changes in the number of Associates and Preferred Customers purchasing our products. We believe that our high-quality products and our financially rewarding Compensation Plan are the key components to attracting and retaining Associates. Additionally, we sponsor meetings and events throughout the year, which offer information about our products and our network marketing system. These meetings are designed to assist Associates in business development and to provide a forum for interaction with successful Associates and members of the USANA management team. We also provide low cost sales tools, which we believe are an integral part of building and maintaining a successful home-based business for Associates.

In addition to Company-sponsored meetings and sales tools, we maintain a website exclusively for our Associates where they can keep up on the latest USANA news, obtain training materials, manage their business information, enroll new customers, shop, and register for Company-sponsored events. Additionally, through this website, Associates can access other online services to which they may subscribe. For example, we offer an online business management service, which includes a tool that helps Associates track and manage their business activity, a personal webpage to which their prospects or retail customers can be directed, e-cards for advertising, and a tax management tool.

the risks are present in multiple periods. We believe that many of the risks detailed here and in our other SEC filings are part of doing business in the industry in which we operate and will likely be present in all periods reported. The fact that certain risks are common in the industry does not lessen their significance. The forward-looking statements contained in this report, are made as of the date of this report, and we assume no obligation to update them or to update the reasons why our actual results could differ from those that we have projected. Among others, risks and uncertainties that may affect our business, financial condition, performance, development, and results of operations include:

- Our ability to attract and maintain a sufficient number of Associates;

- Our dependence upon a network marketing system to distribute our products;

- Activities of our independent Associates;

Edgar Filing: USANA HEALTH SCIENCES INC - Form 10-Q

- Our planned expansion into international markets, including delays in commencement of sales in any new market, delays in compliance with local marketing or other regulatory requirements, or changes in target markets;

- Rigorous government scrutiny of network marketing practices;

- Potential political events, natural disasters, or other events that may negatively affect economic conditions;
- Potential effects of adverse publicity regarding the Company, nutritional supplements, or the network marketing industry;

- Reliance on key management personnel;

Edgar Filing: USANA HEALTH SCIENCES INC - Form 10-Q

- Extensive government regulation of the Company's products, manufacturing, and network marketing system;

- Potential inability to sustain or manage growth, including the failure to continue to develop new products;

- An increase in the amount of Associate incentives;

- Our reliance on the use of information technology;

Edgar Filing: USANA HEALTH SCIENCES INC - Form 10-Q

- The adverse effect of the loss of a high-level sponsoring Associate, together with a group of leading Associates, in that person's downline;
- The loss of product market share or Associates to competitors;
- Potential adverse effects of customs, duties, taxation, and transfer pricing regulations, including regulations governing distinctions between and Company responsibilities to employees and independent contractors;
- The fluctuation in the value of foreign currencies against the U.S. dollar;

- Our reliance on outside suppliers for raw materials and certain manufactured items;

- Shortages of raw materials that we use in certain of our products;
- Significant price increases of our key raw materials;
- Significant increases in transportation costs;
- Product liability claims and other risks that may arise with our manufacturing activity;
- Intellectual property risks;

**Results of Operations**

**Summary of Financial Results**

Net sales for the second quarter of 2008 were \$109.2 million compared with \$107.5 million in the second quarter of 2007. For the first six months of 2008 net sales were \$210.8 million, compared with \$208.2 million for the same period in 2007. The modest increases in net sales for both the second quarter and first six months of 2008 were primarily the result of benefits from changes in foreign currency, which added \$4.7 million for the quarter and \$10.2 million for the six month period. We also believe that effective incentive programs offered during the second quarter helped support sales. We have been challenged, however, by a year-over-year decrease in the number of customers purchasing our products, mostly in the United States. We believe that this decrease is due to economic uncertainties in the United States and lingering effects of the misinformation about the Company that appeared in the mass media during 2007. We believe, however, that, based on current positive trends in customer activity and the dismissal/settlement of certain lawsuits, the challenges relating to the misinformation about the Company are largely behind us. Additionally, we expect to see a benefit to net sales and a related increase in Associate incentives expense as a result of certain events surrounding and announcements to be made at our Annual International Convention that will be held in Salt Lake City, Utah during the third quarter.

Income from continuing operations decreased 11.0% to \$10.1 million in the second quarter of 2008 from \$11.4 million in the second quarter of 2007. For the first six months of 2008, income from continuing operations decreased 23.8% to \$17.7 million from \$23.2 million in the first six months of 2007. These decreases in both periods were due primarily to a combination of slowing net sales growth and increased operating costs. The increase in operating costs resulted from significant investments that we have made in both infrastructure and human resources in order to keep pace with the growth that we have experienced over the last few years, as well as additional amounts spent on incentives to help motivate our Associates to grow their businesses. Additionally, we experienced some non-recurring charges relating to the recently terminated tender offer discussed below.

#### **Tender Offer and Related Subsequent Events**

On June 2, 2008, Unity Acquisition Corp. ( Unity ), a Utah corporation indirectly owned by Gull Holdings, Ltd., the Company's Chairman and current CEO, and other tender offer participants, initiated a tender offer to acquire the outstanding shares of the Company's common stock for \$26.00 per share. Following the announcement of the offer, the independent members of the Company's Board of Directors formed a Special Committee (the Special Committee ) to evaluate the offer and engaged both an independent legal and financial advisor. On June 20, 2008, the Special Committee unanimously determined that the offer was inadequate and recommended that the Company's stockholders reject the offer. On June 30, 2008, Unity increased the offer price to \$28.00 per share and extended the offer to July 14, 2008. On July 3, 2008, the Special Committee again unanimously determined that the offer was inadequate and recommended that the Company's stockholders reject the offer. On July 15, 2008, Unity announced a third extension of the offer to July 21, 2008. On July 16, 2008, however, Unity terminated the offer.

#### **Other Subsequent Events**

On July 21, 2008, the Board of Directors announced changes in senior management of the Company. David Wentz was named Chief Executive Officer and Fred Cooper, Ph.D. was appointed President and Chief Operating Officer. Dr. Myron W. Wentz, Ph.D. will remain as Chairman of the Board of Directors.

Table of Contents

On July 21, 2008, the Compensation Committee of the Board of Directors increased base salaries and issued significant equity grants to certain members of senior management that vest over five years. We expect that these increases in cash and equity-based compensation will reduce earnings per share for 2008 by approximately \$0.12.

**Quarters Ended June 30, 2007 and June 28, 2008****Net Sales**

The following table summarizes the changes in our net sales by geographic region for the quarters ended as of the dates indicated:

	Net Sales by Region (in thousands)				Change from Prior Year	Percent Change
	June 30, 2007	Quarter Ended	June 28, 2008	Quarter Ended		
North America	\$ 68,156	63.4%	\$ 65,921	60.4%	\$ (2,235)	(3.3)%
Southeast Asia/Pacific	23,570	21.9%	24,170	22.1%	600	2.5%
East Asia	11,631	10.8%	15,057	13.8%	3,426	29.5%
North Asia	4,185	3.9%	4,060	3.7%	(125)	(3.0)%
	\$ 107,542	100.0%	\$ 109,208	100.0%	\$ 1,666	1.5%

The majority of the decrease in North America came from the United States, where net sales decreased 7.6%, or \$3.3 million due to a decrease in the number of active Associates. We believe that the decrease in the number of active Associates in this region was due to economic uncertainties in the U.S. and the lingering effects of negative misinformation about the Company that appeared in the mass media during 2007. This decrease was partially offset by changes in foreign currency, which increased net sales in this region by \$1.8 million.

In Southeast Asia/Pacific, we experienced declines in local currency net sales in all markets except Malaysia. Net sales in Malaysia increased \$1.3 million over the second quarter of 2007. Declining sales in the other markets within this region were offset in part by an overall benefit from changes in foreign currency in this region of \$2.2 million.

The majority of the increase in East Asia came from Hong Kong due to an increase in the number of Active Associates.

**Gross Profit**

Gross profit increased to 80.0% of net sales for the second quarter of 2008, compared with 79.1% for the same quarter in 2007. This increase can be attributed to benefits on our products that are manufactured in the United States and sold in our international markets resulting from a

weak U.S. dollar, as well as leverage gained on fixed costs within cost of sales. These improvements were partially offset by increased transportation costs.

**Associate Incentives**

As a percentage of net sales, Associate incentives increased to 41.8% during the second quarter of 2008, compared with 40.2% for the second quarter of 2007. This increase is due to a higher payout rate of our base Compensation Plan commissions, as well as to an increase in the amount paid for contests and promotions. Both of these items were further increased by the strength in foreign currencies relative to the U.S. dollar.

Table of Contents

**Selling, General, and Administrative Expenses**

Selling, general and administrative expenses increased to 23.0% of net sales for the second quarter of 2008, compared with 21.0% for the comparable quarter in 2007. In absolute terms, our selling, general, and administrative expenses increased by \$2.6 million. This increase, both as a percentage of net sales and in absolute terms, can be attributed to the following:

- An increase of approximately \$900 thousand in wage-related expenses;
- Non-recurring legal and other professional fees of approximately \$800 thousand relating to the tender offer process;
- An increase of approximately \$700 thousand relating to higher depreciation and rent expense;
- Increased spending of approximately \$300 thousand on Associate support activities; and
- Stronger foreign currencies, the effects of which are reflected in the items above.

The items identified above were partially offset by a decrease of approximately \$600 thousand in legal and other professional services related to defending false allegations about the Company that were disseminated in the mass media.

**Income Taxes**

Income taxes totaled 36.2% of earnings from continuing operations before income taxes for the second quarter of 2008, compared with 37.9% for the same quarter in 2007. This decrease can primarily be attributed to an increase in tax benefits from the deduction for qualified production activities and to a decrease of approximately 80% in non-deductible expenses.

**Diluted Earnings Per Share from Continuing Operations**

## Edgar Filing: USANA HEALTH SCIENCES INC - Form 10-Q

Diluted earnings per share from continuing operations decreased \$0.04, or 6.1%, to \$0.62 during the second quarter of 2008, compared with \$0.66 for the second quarter of 2007. This change was the result of a decrease in income from continuing operations. Notably, non-recurring charges relating to the recently terminated tender offer reduced earnings per share by \$0.03. The decrease in diluted earnings per share was partially offset by a lower number of average shares outstanding due to share buybacks during 2007.

#### Net Sales

The following table summarizes the changes in our net sales by geographic region for the six month periods ended as of the dates indicated:

Table of Contents

The majority of the decrease in North America came from the United States, where net sales dropped 8.0%, or \$6.8 million primarily due to a decline in the number of active Associates. The decrease in net sales in North America was partially offset by changes in foreign currency, which increased net sales in this region by \$4.6 million. We believe that the decrease in the number of active Associates in this region was primarily due to economic uncertainty in the United States and the lingering effects of negative misinformation about the Company that appeared in the mass media during 2007.

In Southeast Asia/Pacific, we experienced declines in local currency net sales in all markets except Malaysia. Net sales in Malaysia increased \$2.7 million over the first six months of 2007. Declining sales in the other markets within this region were offset in part by an overall benefit from changes in foreign currency in this region of \$4.5 million.

The increase in East Asia included strong growth in Hong Kong of 46.8%, which was partially offset by a 3.3% decline in Taiwan. These changes in net sales are reflective of an increase in the number of active Associates in Hong Kong and a decrease in the number of active Associates in Taiwan.

**Gross Profit**

Gross profit as a percentage of net sales remained fairly steady from the first six months of 2007 to the first six months of 2008. Although we are experiencing higher transportation costs, these increases have been offset by benefits on our products that are manufactured in the United States and sold in our international markets resulting from a weak U.S. dollar, a decrease in scrap, and leverage gained on fixed costs within cost of sales.

**Associate Incentives**

As a percentage of net sales, Associate incentives increased to 41.3% during the first six months of 2008, compared with 39.8% for the first six months of 2007. This increase is due to a higher payout rate of our base Compensation Plan commissions, as well as to an increase in the amount paid for contests and promotions. Both of these items were further increased by the strength in foreign currencies relative to the U.S. dollar.

**Selling, General, and Administrative Expenses**

Selling, general and administrative expenses increased to 24.2% of net sales for the first six months of 2008, compared with 21.1% for the comparable period in 2007. In absolute terms, our selling, general and administrative expenses increased by \$6.9 million. This increase, both as a percentage of net sales and in absolute terms, can be attributed to the following:

## Edgar Filing: USANA HEALTH SCIENCES INC - Form 10-Q

- An increase of approximately \$1.8 million in wage-related expenses;
- An increase of approximately \$1.5 million relating to higher depreciation and rent expense;
- Increased spending of approximately \$1.4 million on Associate support activities;
- Non-recurring legal and other professional fees of approximately \$800 thousand relating to the tender offer process;
- An increase in advertising and market research of approximately \$600 thousand;
- An increase in accounting and auditing services of approximately \$500 thousand; and
- Stronger foreign currencies, the effects of which are reflected in the items above.

Table of Contents

**Other Income (Expense)**

Other income (expense) changed from net other income of \$458 thousand in the first six months of 2007 to net other expense of \$136 thousand in the first six months of 2008. This change was due to smaller foreign currency gains and a decrease in interest income.

**Income Taxes**

Income taxes totaled 36.3% of earnings from continuing operations before income taxes for the first six months of 2008, compared with 37.2% for the same period in 2007. This decrease can primarily be attributed to an increase in tax benefits from the deduction for qualified production activities, and to a decrease of approximately 80% in non-deductible expenses.

**Diluted Earnings Per Share from Continuing Operations**

Diluted earnings per share from continuing operations decreased \$0.22, or 16.9%, to \$1.08 during the first six months of 2008, compared with \$1.30 for the first six months of 2007. This change was the result of a decrease in income from continuing operations. Notably, non-recurring charges relating to the recently terminated tender offer reduced earnings per share by \$0.03. The decrease in diluted earnings per share was partially offset by a lower number of average shares outstanding due to share buybacks during 2007.

**Liquidity and Capital Resources**

We have historically met our working capital and capital expenditure requirements through net cash flows that have been generated from our operating activities and have also periodically utilized our line of credit. Our principal source of liquidity is our operating cash flows, the availability of which is directly affected by variations in the sales of our products. There are no material restrictions on our ability to transfer and remit funds among our international subsidiaries.

In the first six months of 2008, net cash flows from operating activities totaled \$25.2 million, compared with \$32.6 million for the same period in 2007. This change was primarily the result of a decrease in net earnings and a smaller change in other liabilities for the first six months of 2008, compared to the first six months of 2007. The change in other liabilities during the first six months of 2008, compared to the same period in 2007, was mainly due to higher employee incentives accrued in 2007 and paid in early 2008, coupled with lower incentive accruals during the first six months of 2008.

Cash and cash equivalents decreased to \$10.0 million at June 28, 2008, from \$12.9 million at December 29, 2007. Net working capital decreased to \$2.2 million at June 28, 2008, compared with \$5.8 million at December 29, 2007. This decrease in cash and cash equivalents was primarily the result of paying down our line of credit. This decrease was offset in part by the absence of any share repurchase activity during the

first six months of 2008, as well as by decreased amounts spent on property and equipment.

We currently maintain a \$40.0 million credit facility with a bank. As of June 28, 2008, our outstanding balance on this line of credit was \$9.8 million. This balance includes amounts spent to expand our facilities in Salt Lake City, Utah, and in Sydney, Australia. We will be required to pay the balance on this line of credit in full at the time of maturity in May 2011. This credit agreement contains restrictive covenants that are based on our EBITDA and on a specified debt coverage ratio. As of June 28, 2008, we were in compliance with these covenants.

We are nearing completion on the expansion of our corporate headquarters, which we have anticipated would involve a total investment of approximately \$21 million. As of June 28, 2008, billings on this expansion totaled \$20.9 million. Additionally, we have nearly completed our remodel and fit-out project on the facility that we purchased in Sydney, Australia, and we expect to move our Australian operations to this new facility in the third quarter of 2008. We have anticipated that the purchase, remodel, and fit-out of this facility will require a total investment of approximately \$15 million, which is higher than the \$14 million estimate provided in our 2007 Form 10-K due to changes in foreign currency exchange rates. As of June 28, 2008, billings on this project totaled \$13.4 million.

We believe that current cash balances, cash provided by operations, and amounts available under our line of credit will be sufficient to cover our operating and capital needs in the ordinary course of business for the foreseeable future. If we experience an adverse operating environment or unusual capital expenditure requirements, additional financing may be required. No assurance can be given, however, that additional financing, if required, would be available on favorable terms. We might also require or seek additional financing for the purpose of expanding new markets, growing our existing markets, or for other reasons. Such financing may include the sale of additional equity securities or the use of additional debt. Any financing which involves the sale of equity securities or instruments that are convertible into equity securities could result in immediate and possibly significant dilution to our existing shareholders.

**Item 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK**

We conduct business in several countries and intend to continue to expand our foreign operations. Net sales, earnings from operations, and net earnings are affected by fluctuations in currency exchange rates, interest rates, and other uncertainties that are inherent in doing business and selling product in more than one currency. In addition, our operations are exposed to risks that are associated with changes in social, political, and economic conditions in our foreign operations, including changes in the laws and policies that govern foreign investment in countries where we have operations, as well as, to a lesser extent, to changes in United States laws and regulations relating to foreign trade and investment.

**Foreign Currency Risks.** Net sales outside the United States represented 58.9% and 62.7% of our net sales in the six month periods ended June 30, 2007 and June 28, 2008, respectively. Inventory purchases are transacted primarily in U.S. dollars from vendors located in the United States. The local currency of each international subsidiary is considered the functional currency, with all revenue and expenses being translated at weighted-average currency exchange rates for the applicable periods. In general, our reported sales and related earnings are affected positively by a weakening of the U.S. dollar and negatively by a strengthening of the U.S. dollar. Changes in currency exchange rates affect the relative prices at which we sell our products. Given the uncertainty of exchange rate fluctuations, we cannot estimate the effect that these fluctuations may have on our future business, product pricing, results of operations, or financial condition.

We seek to reduce exposure to fluctuations in foreign exchange rates primarily through the timing of cash transfers from certain of our international markets. Periodically we will seek to further reduce exposure by creating offsetting positions through the use of foreign currency exchange contracts. We do not use derivative financial instruments for trading or speculative purposes. Our use of foreign currency exchange contracts includes the purchase of put options, which give us the right, but not the obligation, to sell foreign currency at a specified exchange rate ( strike price ). These contracts provide protection in the event that the foreign currency weakens beyond the option strike price. The fair value of these contracts is estimated based on period-end quoted market prices, and the resulting asset and expense, which historically has not been material, is recognized in our Consolidated Financial Statements. As of June 28, 2008, we had the following contracts in place to further offset exposure to foreign currency fluctuations:

Foreign Currency	Coverage (in thousands)	Average Strike Price	Fair Value	Maturity Date
Put options (Company may sell Canadian Dollar / buy U.S. Dollar)	\$ 4,784	1.05	\$ 18	July - August, 2008

**Interest Rate Risks.** As of June 28, 2008, we had a balance of \$9.8 million outstanding on our line of credit, with a weighted-average interest rate of 4.16%. This interest rate is computed at the bank's Prime Rate, or LIBOR, and is adjusted by features in the credit agreement for this line of credit, with fixed-rate term options of up to six months. The annual impact on our after-tax expense of a 100-basis-point increase in the interest rate on the above balance would not materially affect our earnings.

**Item 4. CONTROLS AND PROCEDURES**

**Disclosure Controls and Procedures**

We maintain disclosure controls and procedures that are designed to ensure that information that is required to be disclosed in our Exchange Act reports is recorded, processed, summarized, and reported within the time periods that are specified in the SEC's rules and forms and that such information is accumulated and communicated to management, including our Chief Executive Officer and Chief Financial Officer, as appropriate, to allow timely decisions regarding any required disclosure. In designing and evaluating these disclosure controls and procedures, management recognized that any controls and procedures, no matter how well designed and operated, can provide only reasonable assurance of achieving the desired control objectives, and management necessarily was required to apply its judgment in evaluating the cost-benefit relationship of possible disclosure controls and procedures.

As of the end of the period covered by this report, our Chief Executive Officer and Chief Financial Officer evaluated the effectiveness of the design and operation of our disclosure controls and procedures (as defined in Rule 13a-15(e) under the Exchange Act). Based on this evaluation, the Chief Executive Officer and Chief Financial Officer concluded that our disclosure controls and procedures were effective as of June 28, 2008.

**Changes in Internal Control Over Financial Reporting**

There were no changes in our internal control over financial reporting that occurred during the quarter ended June 28, 2008 that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.
