During the first six months of 2009, the Company entered into lease transactions that were classified as sales-type leases in accordance with Financial Accounting Standards Board (FASB) Statement No. 13, *Accounting for Leases*.

5. Accounting for Stock-Based Compensation:

FASB Statement No. 123, *Share-Based Payment* (revised 2004) requires the cost of all share-based payments to employees, including grants of employee stock options, to be recognized in the consolidated financial statements based on the grant date fair value of those awards. In accordance with Statement No. 123R, this cost is recognized over the period for which an employee is required to provide service in exchange for the award. Statement No. 123R requires that the benefits associated with tax deductions in excess of recognized compensation expense be reported as a financing cash flow rather than as an operating cash flow. Compensation expense of \$371,500 and \$415,200 relating to the vested portion of the fair value of stock options granted was expensed to Selling, General and Administrative Expenses in the first six months of 2009 and 2008, respectively.

The Company estimates the fair value of options granted using the Black-Scholes option valuation model. The Company estimates the volatility of its common stock at the date of grant based on its historical volatility rate, consistent with Statement No. 123R and Securities and Exchange Commission Staff Accounting Bulletin No. 107 (SAB 107). The Company's decision to historical volatility was based upon the lack of actively traded options on its common stock. The Company estimates the expected term based upon historical option exercises. The risk-free interest rate assumption is based on observed interest rates for the volatility period. The Company uses historical data to estimate pre-vesting option forfeitures and record share-based compensation expense only for those awards that are expected to vest. For options granted, the Company amortizes the fair value on a straight-line basis. All options are amortized over the vesting periods.

Table of Contents

In accordance with Statement No. 123R, the fair value of each option granted in 2009 and 2008 was estimated on the date of the grant using the Black-Scholes option pricing model with the following assumptions:

Year Granted	Option Fair Value	Risk Free Interest Rate	Expected Life (Years)	Expected Volatility	Dividend Yield
2009	\$4.25	2.92%	6	27.1%	none
2008	\$5.20 / \$5.69 / \$3.71	3.36% / 3.04% / 1.77%	6 / 6 / 6	24.4% / 24.7% / 26.0%	none

6. New Accounting Pronouncements:

Effective December 30, 2007, the Company adopted FASB Statement No. 157, *Fair Value Measurements*. Statement No. 157 defines fair value, establishes a framework for measuring fair value in accordance with generally accepted accounting principles and expands disclosures about fair value measurements. The adoption of Statement No. 157 did not have a material impact on the Company's financial condition or results of operations.

Statement No. 157 defines fair value as the price that would be received for an asset or paid to transfer a liability (an exit price) in the principal or most advantageous market for the asset or liability in an orderly transaction between market participants on the measurement date. Statement No. 157 also describes three levels of inputs that may be used to measure fair value:

- Level 1 quoted prices in active markets for identical assets and liabilities.
- Level 2 observable inputs other than quoted prices in active markets for identical assets and liabilities.
- Level 3 unobservable inputs in which there is little or no market data available, which require the reporting entity to develop its own assumptions.

The Company's cash and cash equivalents and marketable securities are valued using quoted prices. The fair values of the Company's investments (described in Note 3) were determined based on Level 3 inputs using a discounted cash flow model.

In February 2008, the FASB issued FSP FAS 157-2, *Effective Date of FASB Statement No. 157* (FSP FAS 157-2). FSP FAS 157-2 delayed the effective date of SFAS 157 for non-financial assets and non-financial liabilities, except those that are recognized or disclosed at fair value in the financial statements on a recurring basis (at least annually). The Company adopted FAS 157 for non-financial assets and non-financial liabilities on December 28, 2008, and such adoption did not have a material impact on the Company's financial condition or results of operations.

In February 2007, FASB issued Statement No. 159, *The Fair Value Option for Financial Assets and Financial Liabilities Including an Amendment of FASB Statement No. 115*. Statement No. 159 permits entities to choose to measure many financial instruments and certain other items at fair value. The Company adopted Statement No. 159 on December 30, 2007. The Company did not elect the fair value of accounting

Edgar Filing: WINMARK CORP - Form 10-Q

option for any of its eligible assets; therefore, the adoption of Statement No. 159 had no impact on the financial statements.

In April 2009, the FASB issued FSP FAS 107-1 and APB 28-1, Interim Disclosures about Fair Value of Financial Instruments (FSP FAS 107-1). FSP FAS 107-1 requires interim reporting period disclosure about the fair value of financial instruments, effective for interim reporting periods ending after June 15, 2009. The Company has adopted the disclosure requirements of FSP 107-1. See Note 3 for disclosures associated with adoption of this standard. Due to their nature, the carrying value of cash, receivables, payables and debt obligations approximates fair value.

Table of Contents

In May 2009, the FASB issued Statement No. 165, *Subsequent Events*. Statement No. 165 incorporates guidance into accounting literature that was previously addressed only in auditing standards. The statement refers to subsequent events that provide additional evidence about conditions that existed at the balance-sheet date as "recognized subsequent events". Subsequent events which provide evidence about conditions that arose after the balance-sheet date but prior to the issuance of the financial statements are referred to as "non-recognized subsequent events". It also requires companies to disclose the date through which subsequent events have been evaluated and whether this date is the date the financial statements were issued or the date the financial statements were available to be issued. Statement No. 165 is effective for interim and annual periods ending after June 15, 2009. The Company has adopted this new standard.

In June 2009, the FASB issued Statement No. 168, *The FASB Accounting Standards Codification and the Hierarchy of Generally Accepted Accounting Principles*. Statement No. 168 replaces FASB Statement No. 162, *The Hierarchy of Generally Accepted Accounting Principles*, and establishes the FASB Accounting Standards Codification TM (the Codification) as the source of authoritative accounting principles recognized by the FASB to be applied by nongovernmental entities in the preparation of financial statements in conformity with generally accepted accounting principles (GAAP). Statement No. 168 is effective for interim and annual periods ending after September 15, 2009. The Company will begin to use the new Codification when referring to GAAP in its quarterly report on Form 10-Q for the fiscal period ending September 26, 2009. This will not have an impact on the consolidated results of the Company.

7. Earnings Per Share:

The Company calculates earnings per share in accordance with FASB Statement No. 128, *Earnings per Share*, by dividing net income by the weighted average number of shares of common stock outstanding to arrive at the Earnings Per Share - Basic. The Company calculates Earnings Per Share - Diluted by dividing net income by the weighted average number of shares of common stock and dilutive stock equivalents from the exercise of stock options using the treasury stock method. The weighted average diluted outstanding shares is computed by adding the weighted average basic shares outstanding with the dilutive effect of stock options equivalent to 14,701 shares and 27,538 shares for the three months and 8,411 shares and 30,675 shares for the six months ended June 27, 2009 and June 28, 2008, respectively.

Options totaling 311,354 and 167,335 shares for the three months and 424,191 and 143,886 shares for the six months ended June 27, 2009 and June 28, 2008, respectively, were outstanding but were not included in the calculation of Earnings Per Share - Diluted because their exercise prices were greater than the average market price of the common shares and, therefore, including the options in the denominator would be anti-dilutive.

The Company currently has two reportable business segments, franchising and leasing. The franchising segment franchises value-oriented retail store concepts that buy, sell, trade and consign merchandise and Wirth Business Credit, Inc., a small ticket leasing franchise. The leasing segment includes (i) Winmark Capital Corporation, a middle-market equipment leasing business and (ii) Wirth Business Credit, Inc., a small ticket financing business. Segment reporting is intended to give financial statement users a better view of how the Company manages and evaluates its businesses. The Company's internal management reporting is the basis for the information disclosed for its business segments and includes allocation of shared-service costs. Segment assets are those that are directly used in or identified with segment operations, including cash, accounts receivable, prepaids, inventory, property and equipment and investment in leasing operations. Unallocated assets include corporate cash and cash equivalents, marketable securities, current and long-term investments, deferred tax amounts and other corporate assets. Inter-segment balances and transactions have been eliminated. The following tables summarize financial information by segment and provide a reconciliation of segment contribution to operating income:

ITEM 2: Management's Discussion and Analysis of Financial Condition and Results of Operations.

Overview

As of June 27, 2009, we had 910 franchises operating under the Play it Again Sports®, Once Upon A Child®, Plato's Closet®, Music Go Round® and Wirth Business Credit® brands and had a leasing portfolio of \$42.1 million. Management closely tracks the following criteria to evaluate current business operations and future prospects: franchising revenue, leasing activity, and selling, general and administrative expenses.

Our most profitable sources of franchising revenue are royalties earned from our franchise partners and franchise fees for new store openings and transfers. During the first six months of 2009, our royalties increased \$606,000 or 5.7% compared to the first six months of 2008. Franchise fees decreased \$528,600 or 57.9% compared to the same period last year.

During the first six months of 2009, we purchased \$8.7 million in equipment for lease contracts compared to \$12.3 million in the first six months of 2008. The level of equipment purchases for lease contracts continues to be impacted by the unfavorable general economic environment as well as our decision during 2008 to tighten credit standards in our small-ticket financing business in response to these conditions. Overall, our leasing portfolio (net investment in leases - current and long-term) decreased to \$42.1 million at June 27, 2009 from \$45.4 million at December 27, 2008. Revenue generated from our leasing activities was \$4,844,800 compared to \$3,859,600 in the same period last year, an increase of 25.5%. (See Note 11 - Segment Reporting). Our earnings are also impacted by credit losses. During the first six months of 2009, our provision for credit losses increased to \$1,023,900 from \$654,300 in the first six months of 2008, as we continued to experience a higher level of net write-offs and delinquencies in the small-ticket financing business portion of our leasing segment.

Table of Contents

Management continually monitors the level and timing of selling, general and administrative expenses. The major components of selling, general and administrative expenses include salaries, wages and benefits, advertising, travel, occupancy, legal and professional fees. During the first six months of 2009, selling, general and administrative expense decreased \$611,200 or 5.9%, compared to the first six months of 2008.

Management also monitors several nonfinancial factors in evaluating the current business operations and future prospects including franchise openings and closings and franchise renewals. The following is a summary of our franchising activity for the first six months ended June 27, 2009:

	TOTAL 12/27/08	OPENED	CLOSED	TOTAL 6/27/09	SIX MONTHS ENDING 6/27/09 AVAILABLE FOR RENEWAL	COMPLETED RENEWALS
<u>Play It Again Sports®</u>						
Franchises - US and Canada	364	2	(15)	351	6	6
<u>Once Upon A Child®</u>						
Franchises - US and Canada	229	7	(2)	234	13	11
<u>Plato's Closet®</u>						
Franchises - US and Canada	241	9	(3)	247	4	4
<u>Music Go Round®</u>						
Franchises - US	36	0	(1)	35	3	3
Total Franchised Stores	870	18	(21)	867	26	24
<u>Wirth Business Credit®</u>						
Territories - US	54	0	(11)	43	0	0
Total Franchises/Territories	924	18	(32)	910	26	24

Renewal activity is a key focus area for management. Our franchisees sign 10-year agreements with us. The renewal of existing franchise agreements as they approach their expiration is an indicator that management monitors to determine the health of our business and the preservation of future royalties. During the first six months of 2009, we renewed 24 franchise agreements of the 26 franchise agreements up for renewal.

Our ability to grow our profits is dependent on our ability to: (i) effectively support our franchise partners so that they produce higher revenues, (ii) open new franchises, (iii) increase lease originations and minimize write-offs in our leasing portfolios, and (iv) control our selling, general and administrative expenses.

Comparison of Three Months Ended June 27, 2009 to Three Months Ended June 28, 2008**Revenue**

Revenues for the quarter ended June 27, 2009 totaled \$8.8 million compared to \$8.7 million for the comparable period in 2008.

Royalties and Franchise Fees

Royalties increased to \$5.6 million for the second quarter of 2009 from \$5.3 million for the same period of 2008, a 5.7% increase. The increase was due to higher Plato's Closet® and Once Upon A Child® royalties of \$394,100 and \$144,600, respectively, partially offset by lower Play It Again Sports® royalties of \$217,900. The increase in Plato's Closet® and Once Upon A Child® royalties is primarily due to having 23 additional Plato's Closet® franchise stores in the second quarter of 2009 compared to the same period last year and higher franchisee retail sales in both brands.

Franchise fees decreased to \$235,000 for the second quarter of 2009 compared to \$386,100 for the same period of 2008, primarily as a result of opening five fewer franchise territories in the second quarter of 2009 period compared to the same period in 2008.

Table of Contents

Leasing Income

Leasing income increased to \$2,143,100 for the second quarter of 2009 compared to \$1,907,000 for the same period in 2008, a 12.4% increase. The increase is due to a larger lease portfolio in 2009 compared to 2008. Cost of Merchandise Sold

Cost of merchandise sold includes in-bound freight and the cost of merchandise associated with Direct Franchisee Sales. The decrease was primarily due to a decrease in Direct Franchisee Sales discussed above. Cost of merchandise sold as a percentage of Direct Franchisee Sales for the second quarter of 2009 and 2008 was 95.8% and 96.5%, respectively.

Leasing Expense

Leasing expense increased to \$512,800 for the second quarter of 2009 compared to \$463,100 for the second quarter of 2008. The increase is primarily due to higher borrowing costs in connection with the lease portfolio.

Provision for credit losses increased to \$604,200 for the second quarter of 2009 compared to \$269,200 for the second quarter of 2008. The increase is primarily due to a higher level of net write-offs and delinquencies in the small-ticket financing business portion of our leasing segment.

Selling, General and Administrative

The \$307,900, or 6.0%, decrease in selling, general and administrative expenses in the second quarter of 2009 compared to the same period in 2008 is primarily due to a decrease in advertising expenses.

Liquidity and Capital Resources

Our primary sources of liquidity have historically been cash flow from operations and borrowings. The components of the income statement that affect our liquidity include non-cash items for depreciation, compensation expense related to stock options and loss from and impairment of equity investments. The most significant component of the balance sheet that affects liquidity is investments. Investments include \$4.3 million of investments in two private companies: Tomsten, Inc. and BridgeFunds, LLC.

We ended the second quarter of 2009 with \$8.7 million in cash and cash equivalents and a current ratio (current assets divided by current liabilities) of 1.6 to 1.0 compared to \$2.6 million in cash and cash equivalents and a current ratio of 1.6 to 1.0 at the end of the second quarter of 2008.

Operating activities provided \$7.3 million of cash during the first six months of 2009 compared to \$3.4 million during the same period last year. Cash provided by operating assets and liabilities include an increase in deferred and current income taxes of \$1,712,000, primarily due to tax depreciation on lease equipment purchases. Receivables provided cash of \$361,900, primarily due to an improvement in royalty collections and a reduction in Direct Franchisee Sales.

Investing activities provided \$0.1 million of cash during the first six months of 2009 compared to \$4.7 million used during the same period of 2008. The 2009 activities consisted primarily of the purchase of equipment for lease contracts of \$8.7 million and collections on lease receivables of \$10.0 million.

Financing activities used \$0.8 million of cash during the first six months of 2009 compared to \$2.6 million provided during the same period of 2008. The 2009 activities consisted primarily of net proceeds from subordinated notes and discounted lease rentals of \$3.0 million, net payments of \$2.4 million on the line of credit and \$1.5 million used to purchase 131,021 shares of our common stock.

As of June 27, 2009, we had no off balance sheet arrangements.

As of June 27, 2009, our borrowing availability under our Amended and Restated Revolving Credit Agreement (the Credit Facility), which provides for an aggregate commitment of \$55.0 million subject to certain borrowing base limitations, was \$55.0 million (the lesser of the borrowing base or the aggregate line of credit). There were \$11.2 million in borrowings outstanding under the Credit Facility bearing interest ranging from 4.58% to 5.76% and having initial terms ranging from three years to five years, leaving \$43.8 million available for additional borrowings.

The Credit Facility has been and will continue to be used for growing our leasing business, stock repurchases and general corporate purposes. The Credit Facility is secured by a lien against substantially all of our assets, contains customary financial conditions and covenants, and requires maintenance of minimum levels of debt service coverage and tangible net worth and maximum levels of leverage (all as defined within the Credit Facility). As of June 27, 2009, we were in compliance with all of our financial covenants.

Table of Contents

On April 19, 2006, we announced the filing of a shelf registration on Form S-1 registration statement with the Securities and Exchange Commission for the sale of up to \$50 million of renewable subordinated unsecured notes with maturities from three months to ten years. In June 2006, the Form S-1 registration became effective. In March 2007, we filed Post-Effective Amendment No. 2 to the public offering that was declared effective March 30, 2007. In November 2007, we filed Post-Effective Amendment No. 3 to the public offering that was declared effective November 29, 2007. In March 2008, we filed Post-Effective Amendment No. 4 to the public offering that was declared effective March 27, 2008. In March 2009, we filed Post-Effective Amendment No. 5 to the public offering that was declared effective March 27, 2009. We have in the past and continue to intend to use the net proceeds from the offering to pay down our credit facility, expand our leasing portfolio, to make acquisitions, to repurchase common stock and for other general corporate purposes. As of June 27, 2009, \$30.7 million of the renewable subordinated notes have been sold.

We utilize discounted lease financing to provide funds for a portion of our leasing activities. Rates for discounted lease financing reflect prevailing market interest rates and the credit standing of the lessees for which the payment stream of the leases are discounted. We believe that discounted lease financing will continue to be available to us at competitive rates of interest through the relationships we have established with financial institutions.

We believe that the combination of our cash on hand, the cash generated from our franchising business, cash generated from discounting sources, our bank line of credit as well as our renewable subordinated unsecured notes, will be adequate to fund our planned operations, including leasing activity, for 2009.

Critical Accounting Policies

The Company prepares the consolidated financial statements of Winmark Corporation and Subsidiaries in conformity with accounting principles generally accepted in the United States of America. As such, the Company is required to make certain estimates, judgments and assumptions that it believes are reasonable based on information available. These estimates and assumptions affect the reported amounts of assets and liabilities at the date of the financial statements and the reported amounts of revenue and expenses during the periods presented. There can be no assurance that actual results will not differ from these estimates. The critical accounting policies that the Company believes are most important to aid in fully understanding and evaluating the reported financial results include the following:

Revenue Recognition Royalty Revenue and Franchise Fees

The Company collects royalties from each retail franchise based on a percentage of retail store gross sales. The Company recognizes royalties as revenue when earned. At the end of each accounting period, estimates of royalty amounts due are made based on applying historical weekly sales information to the number of weeks of unreported franchisee sales. If there are significant changes in the actual performances of franchisees versus the Company's estimates, its royalty revenue would be impacted. During the first six months of 2009, the Company collected \$47,700 more than it estimated at December 27, 2008. As of June 27, 2009, the Company's royalty receivable was \$1,031,900.

The Company collects initial franchise fees when franchise agreements are signed and recognizes the initial franchise fees as revenue when the franchise is opened, which is when the Company has performed substantially all initial services required by the franchise agreement. Franchise fees collected from franchisees but not yet recognized as income are recorded as deferred revenue in the liability section of the consolidated

balance sheet. As of June 27, 2009, deferred franchise fees were \$990,400.

Stock-Based Compensation

The Company currently uses the Black-Scholes option-pricing model to determine the fair value of stock options. The determination of the fair value of the awards on the date of grant using an option-pricing model is affected by stock price as well as assumptions regarding a number of complex and subjective variables. These variables include implied volatility over the term of the awards, actual and projected employee stock option exercise behaviors, risk-free interest rate and expected dividends.

The Company evaluates the assumptions used to value awards on an annual basis. If factors change and the Company employs different assumptions for estimating stock-based compensation expense in future periods or if the Company decides to use a different valuation model, the future periods may differ significantly from what it has recorded in the current period and could materially affect operating income, net income and earnings per share.

Impairment of Long-term Investments

The Company evaluates its long-term investments for impairment on an annual basis or whenever events or changes in circumstances indicate the carrying amount may not be recoverable. The impairment, if any, is measured by the difference between the assets' carrying amount and their fair value, based on the best information available, including market prices, discounted cash flow analysis or other financial metrics that management utilizes to help determine fair value. Judgments made by management related to the fair value of its long-term investments are affected by factors such as the ongoing financial performance of the investees, additional capital raised by the investees as well as general changes in the economy.

Leasing Income Recognition

Leasing income is recognized under the effective interest method. The effective interest method of income recognition applies a constant rate of interest equal to the internal rate of return on the lease. Generally, when a lease is 90 days or more delinquent, the lease is classified as being on non-accrual and the Company stops recognizing leasing income on that date.

Allowances for Credit Losses

The Company maintains an allowance for credit losses at an amount that it believes to be sufficient to absorb losses inherent in its existing lease portfolio as of the reporting dates. A provision is charged against earnings to maintain the allowance for credit losses at the appropriate level. If the actual results are different from the Company's estimates, results could be different. The Company's policy is to charge-off against the allowance the estimated unrecoverable portion of accounts once they reach 121 days delinquent.

Forward Looking Statements

The statements contained in this Item 2 Management's Discussion and Analysis of Financial Condition and Results of Operations that are not strictly historical fact, including without limitation, the Company's belief that it will have adequate capital and reserves to meet its current and contingent obligations and operating needs, as well as its disclosures regarding market rate risk are forward looking statements made under the safe harbor provision of the Private Securities Litigation Reform Act. Such statements are based on management's current expectations as of the date of this Report, but involve risks, uncertainties and other factors that may cause actual results to differ materially from those contemplated by such forward looking statements. Investors are cautioned to consider these forward looking statements in light of important factors which may result in material variations between results contemplated by such forward looking statements and actual results and conditions. See the section appearing in our annual report on Form 10-K for the fiscal year ended December 27, 2008 entitled Risk Factors and Part II, Item 1A in this Report for a more complete discussion of certain factors that may cause the Company's actual results to differ from those in its forward looking statements. You should not place undue reliance on these forward-looking statements, which speak only as of the date they were made. The Company undertakes no obligation to revise or update publicly any forward-looking statements for any reason.

ITEM 3: Quantitative and Qualitative Disclosures About Market Risk

The Company incurs financial markets risk in the form of interest rate risk. Risk can be quantified by measuring the financial impact of a near-term adverse increase in short-term interest rates. The Company currently has available a \$55.0 million line of credit with Bank of America, N.A. and The PrivateBank and Trust Company. The interest rates applicable to this agreement are based on either the bank's base rate or LIBOR for short-term borrowings (less than six months) or the bank's index rate for borrowings one year or greater. The Company had \$11.2 million of debt outstanding at June 27, 2009 under this line of credit, all of which was in the form of fixed rate borrowings in excess of one year and therefore were not subject to daily changes in the bank's base rate or LIBOR. The Company's earnings would be affected by changes in these short-term interest rates only in the event that it were to borrow additional amounts under this facility with interest rates based on the bank's base rate or LIBOR. With the Company's current borrowings, a one percent increase in short-term rates would have no impact on annual pretax earnings. The Company had no interest rate derivatives in place at June 27, 2009.

Approximately \$29,500 of the Company's cash and cash equivalents at June 27, 2009 was invested in money market mutual funds, which are subject to the effects of market fluctuations in interest rates.

Although the Company conducts business in foreign countries, international operations are not material to its consolidated financial position, results of operations or cash flows. Additionally, foreign currency transaction gains and losses were not material to the Company's results of operations for the six months ended June 27, 2009. Accordingly, the Company is not currently subject to material foreign currency exchange rate risks from the effects that exchange rate movements of foreign currencies would have on its future costs or on future cash flows it would receive from its foreign activity. To date, the Company has not entered into any foreign currency forward exchange contracts or other derivative financial instruments to hedge the effects of adverse fluctuations in foreign currency exchange rates.

ITEM 4T: Controls and Procedures

As of the end of the period covered by this report, the Company conducted an evaluation, under the supervision and with the participation of the principal executive officer and principal financial officer, of its disclosure controls and procedures as defined in Rules 13a-15(e) and 15d-15(e) under the Securities Exchange Act of 1934 (the Exchange Act). Based upon, and as of the date of that evaluation, the principal executive officer and principal financial officer concluded that the Company's disclosure controls and procedures are effective to ensure that information required to be disclosed by the Company in reports that it files or submits under the Exchange Act is recorded, processed, summarized and reported within the time periods specified in Securities and Exchange Commission rules and forms, and that such information is accumulated and communicated to the Company's management, including its principal executive officer and principal financial officer, as appropriate to allow timely decisions regarding required disclosure. There was no change in the Company's internal control over financial reporting during its most recently completed fiscal quarter that has materially affected, or is reasonably likely to materially affect, its internal control over financial reporting.

PART II. OTHER INFORMATION

ITEM 1: Legal Proceedings

We are not a party to any material litigation and are not aware of any threatened litigation that would have a material adverse effect on our business.

ITEM 1A: Risk Factors

In addition to the other information set forth in this report, including the important information in Forward-Looking Statements, you should carefully consider the Risk Factors discussed in the Company's Annual Report on Form 10-K for the year ended December 27, 2008. If any of those factors were to occur, they could materially adversely affect the Company's financial condition or future results, and could cause its actual results to differ materially from those expressed in its forward-looking statements in this report. The Company is aware of no material changes to the Risk Factors discussed in the Company's Annual Report on Form 10-K for the year ended December 27, 2008.
