The redemption price for notes that are redeemed on or after March 15, 2023 will be equal to the sum of 100% of the principal amount of the notes being redeemed, plus accrued and unpaid interest thereon.
<b>Make-Whole Amount:</b>	<i>Make-Whole Amount</i> means, in connection with any optional redemption of the notes, the excess, if any, as determined by the Issuer, of: (1) the aggregate present value as of the date of such redemption of each dollar of principal being redeemed or paid and the amount of interest (exclusive of interest accrued to the date of redemption) that would have been payable in respect of each such dollar if such redemption or accelerated payment had not been made, determined by discounting, on a semi-annual basis, such principal and interest at the Reinvestment Rate (determined by the Issuer on the third business day preceding the date a notice of redemption is given) from the respective dates on which such principal and interest would have been payable if such redemption or payment had not been made, over (2) the aggregate principal amount of the notes being redeemed or paid. <i>Reinvestment Rate</i> means 0.30% plus the arithmetic mean of the yields under the respective heading "Week Ending" published in the most recent Statistical Release under "Treasury Constant Maturities" for the maturity (rounded to the nearest month) corresponding to the remaining life to maturity, as of the date of the principal being redeemed or paid. If no maturity exactly corresponds to such maturity, yields for the two published maturities most closely corresponding to such maturity shall be calculated pursuant to the immediately preceding sentence and the Reinvestment Rate shall be interpolated or extrapolated from such yields on a straight-line basis.

rounding in each of such relevant periods to the nearest month. For the purpose of calculating the Reinvestment Rate, the most recent Statistical Release published prior to the date of determination of the Make-Whole Amount shall be used.

*Statistical Release* means that statistical release designated H.15(519) or any successor publication that is published weekly by the Federal Reserve System and that establishes annual yields on actively traded U.S. government securities adjusted to constant maturities, or, if such statistical release is not published at the time of any determination under the indenture, then such other reasonably comparable index the Issuer designates. If the format or content of the Statistical Release changes in a manner that precludes determination of the Treasury yield in the above manner, then the Treasury yield shall be determined in the manner that most closely approximates the above manner, as reasonably determined by the Issuer.

Under Rule 15c6-1 of the Exchange Act, trades in the secondary market generally are required to settle in three business days unless the parties to any such trade expressly agree otherwise. Accordingly, purchasers who wish to trade the notes on the date of pricing of the notes or the next two succeeding business days will be required, by virtue of the fact that the notes initially will settle in T+7 to specify an alternative settlement cycle at the time of any such trade to prevent failed settlement and should consult their own advisors.
