Explanation of Responses:

- * If the form is filed by more than one reporting person, *see* Instruction 4(b)(v).
 - ** Intentional misstatements or omissions of facts constitute Federal Criminal Violations. *See* 18 U.S.C. 1001 and 15 U.S.C. 78ff(a).
- Mr. Lauritzen was granted 3,000 restricted shares of common stock by Mercer International Inc. ("Mercer") in connection with his role as an independent director of Mercer. These shares vest and become non-forfeitable on July 3, 2008, unless a change in control of Mercer occurs prior to such date, in which case such shares vest immediately upon the occurrence of such change in control.

Note: File three copies of this Form, one of which must be manually signed. If space is insufficient, *see* Instruction 6 for procedure. Potential persons who are to respond to the collection of information contained in this form are not required to respond unless the form displays a currently valid OMB number.

Investment Allocation

(as a % of total investments before call options written)

(1) **Past performance is no guarantee of future results.** Total return is calculated by determining the percentage change in NAV or market price (as applicable) in the specified period. The calculation assumes that all dividends and distributions, if any, have been reinvested. Total return does not reflect broker commissions or sales charges in connection with the purchase or sale of Fund shares. Total return for a period of more than one year represents the average annual total return. Total return for a period of less than one year is not annualized.

Performance at market price will differ from results at NAV. Although market price returns typically reflect investment results over time, during shorter periods returns at market price can also be influenced by factors such as changing views about the Fund, market conditions, supply and demand for the Fund's shares, or changes in the Fund's dividends.

An investment in the Fund involves risk, including the loss of principal. Total return, market price, market price yield and NAV will fluctuate with changes in market conditions. This data is provided for information purposes only and is not intended for trading purposes. Closed-end

Explanation of Responses:

Edgar Filing: MERCER INTERNATIONAL INC. - Form 4

funds, unlike open-end funds, are not continuously offered. There is a onetime public offering and once issued, shares of closed-end funds are traded in the open market through a stock exchange. NAV is equal to total assets less total liabilities divided by the number of shares outstanding. Holdings are subject to change daily.

(2) Market Price Yield is determined by dividing the annualized current quarterly per share dividend (comprised of net investment income and net short-term capital gains, if any) payable to shareholders by the market price per share at July 31, 2013.

Notes to Financial Statements

AllianzGI NFJ Dividend, Interest & Premium Strategy Fund/
AllianzGI Equity & Convertible Income Fund

July 31, 2013 (unaudited)

1. Organization and Significant Accounting Policies

AllianzGI NFJ Dividend, Interest & Premium Strategy Fund and AllianzGI Equity & Convertible Income Fund each a Fund and (collectively referred to as the Funds) were organized as Massachusetts business trusts on August 20, 2003 and December 12, 2006, respectively. Prior to commencing operations on February 28, 2005 and February 27, 2007, respectively, the Funds had no operations other than matters relating to their organization and registration as diversified, closed-end management investment companies registered under the Investment Company Act of 1940 and the rules and regulations thereunder, as amended. Allianz Global Investors Fund Management LLC (the Investment Manager) serves as the Funds' investment manager and is an indirect wholly-owned subsidiary of Allianz Asset Management of America L.P., (AAM). AAM is an indirect, wholly-owned subsidiary of Allianz SE, a publicly traded European insurance and financial services company. Each Fund has authorized an unlimited amount of common shares with \$0.00001 par value.

Dividend, Interest & Premium Strategy's primary investment objective is to seek current income and gains, with a secondary objective of long-term capital appreciation. Under normal market conditions the Fund pursues its investment objectives by investing in a diversified portfolio of dividend-paying common stocks and income-producing convertible securities. The Fund will also employ a strategy of writing (selling) call options on equity indexes in an attempt to generate gains from option premiums.

Equity & Convertible Income's investment objective is to seek total return comprised of capital appreciation, current income and gains. Under normal market conditions the Fund pursues its objective by investing in a diversified portfolio of equity securities and income-producing convertible securities. The Fund will also employ a strategy of writing (selling) call options on the equity securities held by the Fund.

There can be no assurance that the Funds will meet their stated objectives.

The preparation of the Funds' financial statements in accordance with accounting principles generally accepted in the United States of America requires the Funds' management to make estimates and assumptions that affect the reported amounts and disclosures in each Fund's financial statements. Actual results could differ from those estimates.

In the normal course of business, the Funds enter into contracts that contain a variety of representations that provide general indemnifications. The Funds' maximum exposure under these arrangements is unknown as this would involve future claims that may be made against the Funds that have not yet occurred.

In June 2013, the Financial Accounting Standards Board issued guidance that creates a two tiered approach to assess whether an entity is an investment company. The guidance will also require an investment company to measure noncontrolling ownership interests in other investment

Edgar Filing: MERCER INTERNATIONAL INC. - Form 4

companies at fair value and will require additional disclosures relating to investment company status, any changes

1. Organization and Significant Accounting Policies (continued)

thereto and information about financial support provided or contractually required to be provided to any of the investment company's investees. The guidance is effective for financial statements with fiscal years beginning on or after December 15, 2013 and the Funds' interim periods within those fiscal years. The Funds' management is evaluating the impact of this guidance on the Funds' financial statement disclosures.

The following is a summary of significant accounting policies consistently followed by the Funds:

(a) Valuation of Investments

Portfolio securities and other financial instruments for which market quotations are readily available are stated at market value. Market value is generally determined on the basis of last reported sales prices, or if no sales are reported, on the basis of quotes obtained from a quotation reporting system, established market makers, or independent pricing services. The Funds' investments are valued daily using prices supplied by an independent pricing service or dealer quotations, or by using the last sale price on the exchange that is the primary market for such securities, or the mean between the last quoted bid and ask price. Independent pricing services use information provided by market makers or estimates of market values obtained from yield data relating to investments of securities with similar characteristics.

The Board of Trustees (the Board) has adopted procedures for valuing portfolio securities and other financial derivative instruments in circumstances where market quotes are not readily available, and has delegated the responsibility for applying the valuation methods to the Investment Manager, NFJ Investment Group LLC (NFJ) and Allianz Global Investors U.S. LLC (Allianz Global Investors) (collectively, the Sub-Advisers), affiliates of the Investment Manager. The Funds' Valuation Committee was established by the Board to oversee the implementation of the Funds' valuation methods and to make fair value determinations on behalf of the Board, as instructed. The Sub-Advisers monitor the continued appropriateness of methods applied and determines if adjustments should be made in light of market changes, events affecting the issuer, or other factors. If the Sub-Advisers determine that a valuation method may no longer be appropriate, another valuation method may be selected, or the Valuation Committee will be convened to consider the matter and take any appropriate action in accordance with procedures set forth by the Board. The Board shall review the appropriateness of the valuation methods and these methods may be amended or supplemented from time to time by the Valuation Committee.

Synthetic convertible securities are valued based on quotations obtained from unaffiliated brokers who are the principal market-makers in such securities. Such valuations are derived by the brokers from proprietary models which are generally based on readily available market information including valuations of the common stock underlying the synthetic security.

Short-term securities maturing in 60 days or less are valued at amortized cost, if their original term to maturity was 60 days or less,

Notes to Financial Statements

AllianzGI NFJ Dividend, Interest & Premium Strategy Fund/
AllianzGI Equity & Convertible Income Fund

July 31, 2013 (unaudited)

1. Organization and Significant Accounting Policies (continued)

or by amortizing their value on the 61st day prior to maturity, if the original term to maturity exceeded 60 days.

The prices used by the Funds to value investments may differ from the value that would be realized if the securities were sold, and these differences could be material to the Funds' financial statements. Each Fund's net asset value (NAV) is normally determined as of the close of regular trading (normally, 4:00 p.m. Eastern time) on the New York Stock Exchange (NYSE) on each day the NYSE is open for business.

(b) Fair Value Measurements

Fair value is defined as the price that would be received to sell an asset or paid to transfer a liability (*i.e.* the exit price) in an orderly transaction between market participants. The three levels of the fair value hierarchy are described below:

n Level 1 quoted prices in active markets for identical investments that the Funds have the ability to access

n Level 2 valuations based on other significant observable inputs, which may include, but are not limited to, quoted prices for similar assets or liabilities, interest rates, yield curves, volatilities, prepayment speeds, loss severities, credit risks and default rates or other market corroborated inputs

n Level 3 valuations based on significant unobservable inputs (including the Sub-Advisers' or Valuation Committee's own assumptions and securities whose price was determined by using a single broker's quote)

The inputs or methodology used for valuing securities are not necessarily an indication of the risk associated with investing in those securities. The following are certain inputs and techniques that the Funds generally use to evaluate how to classify each major category of assets and liabilities for Level 2 and Level 3, in accordance with Generally Accepted Accounting Principles (GAAP).

Equity Securities (Common and Preferred Stock) Equity securities traded in inactive markets are valued using inputs which include broker-dealer quotes, recently executed transactions adjusted for changes in the benchmark index, or evaluated price quotes received from independent pricing services that take into account the integrity of the market sector and issuer, the individual characteristics of the security, and information received from broker-dealers and other market sources pertaining to the issuer or security. To the extent that these inputs are observable, the values of equity securities are categorized as Level 2. To the extent that these inputs are unobservable the values are categorized as Level 3.

Convertible Bonds & Notes Convertible bonds & notes are valued by independent pricing services using various inputs and techniques, which include broker-dealer quotations from relevant market makers and recently executed transactions in securities of the issuer or comparable issuers. The broker-dealer quotations received are supported by credit analysis of the issuer that takes into consideration credit quality assessments, daily trading activity, and the activity of the underlying equities, listed bonds and sector-specific trends. To the extent that these inputs

Notes to Financial Statements

AllianzGI NFJ Dividend, Interest & Premium Strategy Fund/
AllianzGI Equity & Convertible Income Fund

July 31, 2013 (unaudited)

1. Organization and Significant Accounting Policies (continued)

are observable, the values of convertible bonds & notes are categorized as Level 2. To the extent that these inputs are unobservable the values are categorized as Level 3.

Corporate Bonds & Notes Corporate bonds & notes are generally comprised of two main categories: investment grade bonds and high yield bonds. Investment grade bonds are valued by independent pricing services using various inputs and techniques, which include broker-dealer quotations, live trading levels, recently executed transactions in securities of the issuer or comparable issuers, and option adjusted spread models that include base curve and spread curve inputs. Adjustments to individual bonds can be applied to recognize trading differences compared to other bonds issued by the same issuer. High yield bonds are valued by independent pricing services based primarily on broker-dealer quotations from relevant market makers and recently executed transactions in securities of the issuer or comparable issuers. The broker-dealer quotations received are supported by credit analysis of the issuer that takes into consideration credit quality assessments, daily trading activity, and the activity of the underlying equities, listed bonds and sector-specific trends. To the extent that these inputs are observable, the values of corporate bonds & notes are categorized as Level 2. To the extent that these inputs are unobservable the values are categorized as Level 3.

Option Contracts Option contracts traded over the counter (OTC) are valued by independent pricing services based on pricing models that incorporate various inputs such as interest rates, credit spreads, currency exchange rates and volatility measurements for in-the-money, at-the-money, and out-of-the-money contracts based on a given strike price. To the extent that these inputs are observable, the values of OTC option contracts are categorized as Level 2. To the extent that these inputs are unobservable the values are categorized as Level 3.

The valuation techniques used by the Funds to measure fair value during the six months ended July 31, 2013 were intended to maximize the use of observable inputs and minimize the use of unobservable inputs.

The Funds' policy is to recognize transfers between levels at the end of the reporting period. An investment asset's or liability's levels within the fair value hierarchy is based on the lowest level input, individually or in aggregate, that is significant to the fair value measurement. The objective of fair value measurement remains the same even when there is a significant decrease in the volume and level of activity for an asset or liability and regardless of the valuation techniques used. Investments categorized as Level 1 and 2 as of period end may have been transferred between Levels 1 and 2 since the prior period due to changes in the valuation method utilized in valuing the investments.

(c) Investment Transactions and Investment Income

Investment transactions are accounted for on the trade date. Realized gains and losses on investments are determined on an identified cost basis. Interest income adjusted for the accretion of discount and amortization of premium is recorded on an accrual basis.

Notes to Financial Statements

AllianzGI NFJ Dividend, Interest & Premium Strategy Fund/
AllianzGI Equity & Convertible Income Fund

July 31, 2013 (unaudited)

1. Organization and Significant Accounting Policies (continued)

Discounts or premiums on debt securities purchased are accreted or amortized, respectively, to interest income. Conversion premium is not amortized. Dividend income is recorded on the ex-dividend date. Payments received from certain investments may be comprised of dividends, realized gains and return of capital. These payments may initially be recorded as dividend income and may subsequently be reclassified as realized gains and/or return of capital upon receipt of information from the issuer. Payments received on synthetic convertible securities are generally included in dividends.

(d) Federal Income Taxes

The Funds intend to distribute all of their taxable income and to comply with the other requirements of Subchapter M of the U.S. Internal Revenue Code of 1986, as amended, applicable to regulated investment companies. Accordingly, no provision for U.S. federal income taxes is required.

Accounting for uncertainty in income taxes establishes for all entities, including pass-through entities such as the Funds, a minimum threshold for financial statement recognition of the benefit of positions taken in filing tax returns (including whether an entity is taxable in a particular jurisdiction), and requires certain expanded tax disclosures. Funds' management has determined that its evaluation or the position taken in the tax returns has resulted in no material impact to the Funds' financial statements at July 31, 2013. The federal income tax returns for the prior three years remain subject to examination by the Internal Revenue Service.

(e) Dividends and Distributions

The Funds declare quarterly dividends and distributions from net investment income and gains from option premiums and the sale of portfolio securities. The Funds record dividends and distributions on the ex-dividend date. The amount of dividends and distributions from net investment income and net realized capital gains is determined in accordance with federal income tax regulations, which may differ from GAAP. These book-tax differences are considered either temporary or permanent in nature. To the extent these differences are permanent in nature, such amounts are reclassified within the capital accounts based on their federal income tax treatment. Temporary differences do not require reclassification. To the extent dividends and/or distributions exceed current and accumulated earnings and profits for federal income tax purposes, they are reported as dividends and/or distributions to shareholders from return of capital. At July 31, 2013, it is anticipated that Dividend, Interest & Premium Strategy will have a return of capital at fiscal year-end.

(f) Convertible Securities

It is the Funds' policy to invest a portion of their assets in convertible securities. Although convertible securities do derive part of their value from the securities into which they are convertible, they are not considered derivative financial instruments. However, certain of the Funds' investments in convertible securities include features which render them more sensitive to price changes in their underlying securities. The value

of structured/synthetic convertible securities can be affected by interest rate changes and credit risks of the issuer. Such securities may be structured in

1. Organization and Significant Accounting Policies (continued)

ways that limit their potential for capital appreciation and the entire value of the security may be at risk of loss depending on the performance of the underlying equity security. Consequently, the Funds are exposed to greater downside risk than traditional convertible securities, but still less than that of the underlying stock.

2. Principal Risks

In the normal course of business, the Funds trade financial instruments and enter into financial transactions where risk of potential loss exists due to, among other things, changes in the market (market risk) or failure of the other party to a transaction to perform (counterparty risk). The Funds are also exposed to other risks such as, but not limited to, interest rate, credit and leverage risks.

Interest rate risk is the risk that fixed income securities will decline in value because of changes in interest rates. As nominal interest rates rise, the values of certain fixed income securities held by the Funds are likely to decrease. A nominal interest rate can be described as the sum of a real interest rate and an expected inflation rate.

Fixed income securities with longer durations tend to be more sensitive to changes in interest rates, usually making them more volatile than securities with shorter durations. Duration is used primarily as a measure of the sensitivity of a fixed income security's market price to interest rate (*i.e.* yield) movements.

The Funds are exposed to credit risk, which is the risk of losing money if the issuer or guarantor of a fixed income security is unable or unwilling, or is perceived (whether by market participants, rating agencies, pricing services or otherwise) as unable or unwilling, to make timely principal and/or interest payments, or to otherwise honor its obligations. Securities are subject to varying degrees of credit risk, which are often reflected in credit ratings.

The market values of securities may decline due to general market conditions (market risk) which are not specifically related to a particular company, such as real or perceived adverse economic conditions, changes in the general outlook for corporate earnings, changes in interest or currency rates or adverse investor sentiment. They may also decline due to factors that affect a particular industry or industries, such as labor shortages or increased production costs and competitive conditions within an industry. Equity securities and equity-related investments generally have greater market price volatility than fixed income securities.

Edgar Filing: MERCER INTERNATIONAL INC. - Form 4

The Funds are exposed to counterparty risk, or the risk that an institution or other entity with which the Funds have unsettled or open transactions will default. The potential loss to the Funds could exceed the value of the financial assets recorded in the Funds' financial statements. Financial assets, which potentially expose the Funds to counterparty risk, consist principally of cash due from counterparties and investments. The Sub-Advisers seek to minimize the Funds' counterparty risk by performing reviews of each counterparty and by minimizing concentration of counterparty risk by undertaking transactions with multiple customers and counterparties on recognized and reputable exchanges. Delivery of securities sold is only made once the Funds have

Notes to Financial Statements

AllianzGI NFJ Dividend, Interest & Premium Strategy Fund/
AllianzGI Equity & Convertible Income Fund

July 31, 2013 (unaudited)

2. Principal Risks *(continued)*

received payment. Payment is made on a purchase once the securities have been delivered by the counterparty. The trade will fail if either party fails to meet its obligation.

The Funds are exposed to risks associated with leverage. Leverage may cause the value of the Funds' shares to be more volatile than if the Funds did not use leverage. This is because leverage tends to exaggerate the effect of any increase or decrease in the value of the Funds' portfolio securities. The Funds may engage in transactions or purchase instruments that give rise to forms of leverage. In addition, to the extent the Funds employ leverage, dividend and interest costs may not be recovered by any appreciation of the securities purchased with the leverage proceeds and could exceed the Funds' investment returns, resulting in greater losses.

Equity & Convertible Income holds a convertible security with a Lehman Brothers entity as counterparty at the time the relevant Lehman Brothers entity filed for protection or convertible security was placed in administration. This security is valued using a discounted amount on a previous sale price.

3. Financial Derivative Instruments

Disclosure about derivatives and hedging activities requires qualitative disclosure regarding objectives and strategies for using derivatives, quantitative disclosure about fair value amounts of gains and losses on derivatives, and disclosure about credit-risk related contingent features in derivative agreements. The disclosure requirements distinguish between derivatives which are accounted for as hedges, and those that do not qualify for such accounting. Although the Funds at times use derivatives for hedging purposes, the Funds reflect derivatives at fair value and recognize changes in fair value through the Funds' Statements of Operations, and such derivatives do not qualify for hedge accounting treatment.

Option Transactions

The Funds write (sell) call options on securities and indices to earn premiums, for hedging purposes, risk management purposes or otherwise as part of their investment strategies. When an option is written, the premium received is recorded as an asset with an equal liability that is subsequently marked to market to reflect the market value of the option written. These liabilities are reflected as options written in the Funds' Statements of Assets and Liabilities.

Premiums received from writing options which expire unexercised are recorded on the expiration date as a realized gain. The difference between the premium received and the amount paid on effecting a closing purchase transaction, including brokerage commissions, is also treated as a realized gain, or if the premium is less than the amount paid for the closing purchase transactions as a realized loss.

Edgar Filing: MERCER INTERNATIONAL INC. - Form 4

If a call option written is exercised, the premium is added to the proceeds from the sale of the underlying security in determining whether there has been a realized gain or loss. In writing an option, the Funds bear the market risk of an unfavorable change in the price of the security underlying the written option. Exercise of a written option could result in the Funds purchasing a security at a price different from its current market value.

Notes to Financial Statements

AllianzGI NFJ Dividend, Interest & Premium Strategy Fund/
AllianzGI Equity & Convertible Income Fund

July 31, 2013 (unaudited)

4. Investment Manager/Sub-Advisers

Each Fund has an Investment Management Agreement (each an Agreement) with the Investment Manager. Subject to the supervision of the Funds Board, the Investment Manager is responsible for managing, either directly or through others selected by it, the Funds investment activities, business affairs and administrative matters. Pursuant to its Agreement, Dividend, Interest & Premium Strategy pays the Investment Manager an annual fee, payable monthly, at an annual rate of 0.90% of its average daily total managed assets. Pursuant to its Agreement, Equity & Convertible Income pays the Investment Manager an annual fee, payable monthly, at the annual rate of 1.00% of its average daily total managed assets. Total managed assets refer to the total assets of each Fund (including forms of leverage that may be outstanding) minus accrued liabilities (other than liabilities representing leverage).

The Investment Manager has retained the Sub-Advisers to manage Dividend, Interest & Premium Strategy. NFJ manages the equity component and Allianz Global Investors manages the convertible and index option strategy components of the Fund. Allianz Global Investors serves as the sole sub-adviser to Equity & Convertible Income. Pursuant to Sub-Advisory Agreements, the Investment Manager and not the Funds, pays a portion of the fees it receives as Investment Manager to the Sub-Advisers in return for their services.

Effective July 1, 2013, the Adviser entered into an Amended and Restated Portfolio Management Agreement with the Sub-Adviser with respect to the Fund (the Amended Agreement). The Amended Agreement reflects the recent changes in the names of the Fund and the Sub-Adviser, which are discussed above. The Amended Agreement is otherwise substantially identical to the previous Portfolio Management Agreement.

5. Investments in Securities

For the six months ended July 31, 2013, purchases and sales of investments, other than short-term securities were:

	Dividend, Interest & Premium Strategy	Equity & Convertible Income
Purchases	\$547,401,128	\$406,047,666
Sales	699,345,144	421,619,921

6. Income Tax Information

Under the Regulated Investment Company Modernization Act of 2010, the Funds will be permitted to carryforward capital losses incurred in taxable years beginning after December 22, 2010, for an unlimited period. However, any losses incurred during those future taxable years will be required to be utilized prior to the losses incurred in pre-enactment taxable years. As a result of this, pre-enactment capital loss carryforwards may be more likely to expire unused. Additionally, post-enactment capital

Notes to Financial Statements

AllianzGI NFJ Dividend, Interest & Premium Strategy Fund/
AllianzGI Equity & Convertible Income Fund

July 31, 2013 (unaudited)

6. Income Tax Information *(continued)*

losses that are carried forward will retain their character as either short-term or long-term capital losses rather than being considered all short-term capital losses.

At July 31, 2013, the aggregate cost basis and the net unrealized appreciation/depreciation of investments (before call options written) for federal income tax purposes were as follows:

	Federal Tax Cost Basis (1)	Unrealized Appreciation	Unrealized Depreciation	Net Unrealized Depreciation
Dividend, Interest & Premium Strategy Equity & Convertible Income	\$1,752,014,454 541,420,197	\$185,376,251 12,182,975	\$(206,869,120) (81,198,274)	\$(21,492,869) (69,015,249)

(1) Differences, if any, between book and tax cost basis are primarily attributable to wash sale loss deferrals.

7. Subsequent Events

In preparing these financial statements, the Funds' management has evaluated events and transactions for potential recognition or disclosure through the date the financial statements were issued.

On September 6, 2013 quarterly dividends were declared to shareholders, payable September 26, 2013 to shareholders of record on September 16, 2013:

Dividend, Interest & Premium Strategy	\$0.45 per share
Equity & Convertible Income	\$0.28 per share

On September 24, 2013, the Boards of Trustees of Equity & Convertible Income and AllianzGI Global Equity & Convertible Income Fund (Global Equity & Convertible Income) approved the reorganization of Global Equity & Convertible Income into Equity & Convertible Income, pursuant to which Equity & Convertible Income would continue as the surviving fund (the Reorganization). It is currently expected that the Reorganization will be completed in the first quarter of 2014, subject to the required approval of shareholders of both Funds and satisfaction of applicable regulatory requirements and other customary closing conditions. A Registration Statement, which will include a Joint Proxy/Statement Prospectus relating to the Reorganization, will be filed with the SEC and, upon its effectiveness, distributed to shareholders of Equity & Convertible Income and Global Equity & Convertible Income.

There were no other subsequent events identified that require recognition or disclosure.

Proxy Voting Policies & Procedures:

A description of the policies and procedures that the Funds have adopted to determine how to vote proxies relating to portfolio securities and information about how the Funds voted proxies relating to portfolio securities held during the most recent twelve month period ended June 30 is available (i) without charge, upon request, by calling the Funds' shareholder servicing agent at (800) 254-5197; (ii) on the Funds' website at us.allianzgi.com/closedendfunds; and (iii) on the Securities and Exchange Commission's website at www.sec.gov.

Semiannual Report | July 31, 2013 41

Matters Relating to the Trustees Consideration of the Investment Management & Portfolio Management Agreements

AllianzGI NFJ Dividend, Interest & Premium Strategy Fund/AllianzGI Equity & Convertible Income Fund (unaudited)

The Investment Company Act of 1940, as amended, requires that both the full Board of Trustees (the Trustees) and a majority of the non-interested Trustees (the Independent Trustees), voting separately, approve each Fund's Management Agreement with the Investment Manager (the Advisory Agreements) and Portfolio Management Agreements between the Investment Manager and the applicable Sub-Advisers (the Sub-Advisory Agreements , and together with the Advisory Agreements, the Agreements). The Trustees met telephonically on June 10, 2013 and in person on June 25, 2013 (the contract review meetings) for the specific purpose of considering whether to approve the continuation of the Advisory Agreements and the Sub-Advisory Agreements. The Independent Trustees were assisted in their evaluation of the Agreements by independent legal counsel, from whom they received separate legal advice and with whom they met separately from Fund management during the contract review meeting.

In connection with their deliberations regarding the continuation of the Agreements, the Trustees, including the Independent Trustees, considered such information and factors as they believed, in light of the legal advice furnished to them and their own business judgment, to be relevant. As described below, the Trustees considered the nature, quality, and extent of the various investment management, administrative and other services performed by the Investment Manager or the Sub-Advisers under the applicable Agreement.

In connection with their contract review meetings, the Trustees received and relied upon materials provided by the Investment Manager which included, among other items: (i) information provided by Lipper Inc. (Lipper), an independent third party, on the total return investment performance (based on net assets) of the Funds for various time periods, the investment performance of a group of funds with investment classifications/objectives comparable to those of the Funds identified by Lipper (the Lipper performance universe) and with respect to NFJ only, the performance of an applicable benchmark index, (ii) information provided by Lipper on the Funds' management fees and other expenses and the management fees and other expenses of comparable funds identified by Lipper, (iii) information regarding the investment performance and management fees for other funds and accounts managed by the Investment Manager and/or the Sub-Advisers with strategies that have similarities (but are not substantially similar) to those of the Funds, (iv) the estimated profitability to the Investment Manager from its relationship with the Fund for the one year period ended December 31, 2012, (v) descriptions of various functions performed by the Investment Manager and the Sub-Advisers for the Funds, such as portfolio management, compliance monitoring and portfolio trading practices, and (vi) information regarding the overall organization of the Investment Manager and the Sub-Advisers, including information regarding senior management, portfolio managers and other personnel providing investment management, administrative and other services to the Funds.

Matters Relating to the Trustees Consideration of the Investment Management & Portfolio Management Agreements

AllianzGI NFJ Dividend, Interest & Premium Strategy Fund/AllianzGI Equity & Convertible Income Fund (unaudited) (continued)

The Trustees' conclusions as to the continuation of the Agreements were based on a comprehensive consideration of all information provided to the Trustees and were not the result of any single factor. Some of the factors that figured particularly in the Trustees' deliberations are described below, although individual Trustees may have evaluated the information presented differently from one another, attributing different weights to various factors. The Trustees recognized that the fee arrangements for the Funds are in many cases the result of review and discussion in prior years between the Independent Trustees and the Investment Manager, that certain aspects of such arrangements may receive greater scrutiny in some years than in others, and that the Trustees' conclusions may be based, in part, on their consideration of these same arrangements during the course of the year and in prior years.

Fund-specific performance results for the Funds reviewed by the Trustees are discussed below. The comparative performance information was prepared and provided by Lipper and was not independently verified by the Trustees. The Trustees reviewed, among other information, comparative information showing performance of each Fund against its respective Lipper performance universe for the one-year, three-year and five-year periods ended March 31, 2013.

In addition, it was noted that the Trustees considered matters bearing on the Funds and their advisory arrangements at their meetings throughout the year, including a review of performance data at each regular meeting.

As part of their review, the Trustees examined the Investment Manager's and the Sub-Advisers' abilities to provide high quality investment management and other services to the Funds. Among other information, the Trustees considered the investment philosophy and research and decision-making processes of the Sub-Advisers; the experience of key advisory personnel of the Sub-Advisers responsible for portfolio management of the Funds; the ability of the Investment Manager and the Sub-Advisers to attract and retain capable personnel; and the capability of the senior management and staff of the Investment Manager and the Sub-Advisers. In addition, the Trustees reviewed the quality of the Investment Manager's and the Sub-Advisers' services with respect to regulatory compliance and compliance with the investment policies of the Funds; the nature and quality of certain administrative services the Investment Manager is responsible for providing to the Funds; and conditions that might affect the Investment Manager's or the Sub-Advisers' ability to provide high quality services to the Funds in the future under the Agreements, including each organization's respective financial condition and operational stability. Based on the foregoing, the Trustees concluded that the Sub-Advisers' investment process, research capabilities and philosophy were well suited to each of the Funds given their respective investment objective and policies, and that the Investment Manager and the Sub-Advisers would be able to continue to meet any reasonably foreseeable obligations under the Agreements.

Matters Relating to the Trustees Consideration of the Investment Management & Portfolio Management Agreements

AllianzGI NFJ Dividend, Interest & Premium Strategy Fund/AllianzGI Equity & Convertible Income Fund (unaudited) (continued)

In assessing the reasonableness of each Fund's fees under the Agreements, the Trustees considered, among other information, each Fund's management fee and its total expense ratio as a percentage of average net assets attributable to common shares and the management fee and total expense ratios of peer expense groups of funds based on information provided by Lipper. The Fund-specific fee and expense results discussed below were prepared and provided by Lipper and were not independently verified by the Trustees.

The Trustees specifically took note of how each Fund compared to its Lipper peers as to performance and management fee and total net expenses. The Trustees noted that while the Funds are not charged a separate administration fee (recognizing that their management fee includes a component for administrative services), it was not clear in all cases whether the peer funds in the Lipper categories were separately charged such a fee by their investment managers, so that the total expense ratio (rather than any individual expense component) represented the most relevant comparison. It was noted that the total expense ratio comparisons reflect the effect of expense waivers/reimbursements (although none exist for the Funds).

Dividend, Interest & Premium Strategy

The Trustees noted that the expense group for the Fund provided by Lipper consisted of a total of seven closed-end funds, including the Fund. The Trustees noted that only non-leveraged closed-end funds were considered for inclusion in the group. The Trustees also noted that average net assets of the common shares of the seven funds in the expense group ranged from \$253.9 million to \$1.67 billion, and that no other fund is larger in asset size than the Fund. The Trustees also noted that the Fund was ranked second out of seven funds in the expense group for total expense ratio based on common share assets and third out of seven funds in the expense group for actual management fees based on common share assets (with funds ranked first having the lowest fees/expenses and ranked seventh having the highest fees/expenses in the expense group).

With respect to Fund total return performance relative to its Lipper performance universe (based on net asset value), the Trustees noted that the Fund had third quintile performance for the one-year and three-year periods and fourth quintile performance for the five-year period ended March 31, 2013.

Equity & Convertible Income

The Trustees noted that the expense group for the Fund provided by Lipper consisted of a total of eight closed-end funds, including the Fund. The Trustees noted that only non-leveraged closed-end funds were considered for inclusion in the group. The Trustees also noted that average net assets of the common shares of the eight funds in the expense group ranged from \$229.4 million to \$624.3 million, and that three of the funds were larger in asset size than the Fund. The Trustees also noted that the Fund was ranked fourth out of eight funds in the expense group both for total expense ratio based on common share assets and for actual management fees based on common share assets (with funds ranked first having the lowest fees/expenses and ranked

Matters Relating to the Trustees Consideration of the Investment Management & Portfolio Management Agreements

AllianzGI NFJ Dividend, Interest & Premium Strategy Fund/AllianzGI Equity & Convertible Income Fund (unaudited) (continued)

eighth having the highest fees/expenses in the expense group).

With respect to Fund total return performance relative to its Lipper performance universe (based on net asset value), the Trustees noted that the Fund had fourth quintile performance for the one-year period, and second quintile performance for the three-year and five-year periods ended March 31, 2013.

In addition to their review of Fund performance based on net asset value, the Trustees also considered the market value performance of each Fund's common shares and related share price premium and/or discount information based on the materials provided by Lipper and management.

The Trustees were advised that the Investment Manager and the Sub-Advisers do not manage any funds or accounts, including institutional or separate accounts, with investment strategies and return profiles similar to those of the Funds. However, the Trustees considered the management fees charged by the Investment Manager and/or Sub-Advisers to other funds and accounts with strategies that have similarities (but are not substantially similar) to those of the Funds, including open-end funds and, in some cases, separate accounts advised by the Investment Manager and/or Sub-Advisers. The Trustees noted that the management fees paid by the Funds are generally higher than the fees paid by such separate account clients. However, the Trustees were advised by the Sub-Advisers that they generally provide broader and more extensive services to the Funds in comparison to separate accounts, and incur additional expenses in connection with the more extensive regulatory regime to which the Funds are subject in comparison to separate accounts generally. The Trustees noted that the management fees paid by the Funds are generally higher than the fees paid by the open-end funds offered for comparison but were advised by the Sub-Advisers that there are additional portfolio management challenges in managing the Funds, such as attempting to meet a regular dividend.

Based on a profitability analysis provided by the Investment Manager, the Trustees also considered the estimated profitability to the Investment Manager its relationship with each Fund and determined that such profitability did not appear to be excessive.

The Trustees also took into account that, as closed-end investment companies, the Funds do not currently intend to raise additional assets, so the assets of the Funds will grow (if at all) only through the investment performance of each Fund. Therefore, the Trustees did not consider potential economies of scale as a principal factor in assessing the fee rates payable under the Agreements.

Additionally, the Trustees considered so-called fall-out benefits to the Investment Manager and the Sub-Advisers, such as reputational value derived from serving as Investment Manager and Sub-Advisers to the Funds.

After reviewing these and other factors described herein, the Trustees concluded with respect to each Fund, within the context of their overall conclusions regarding the Agreements and based on the information provided and related representations made by management, that they were satisfied with the

AllianzGI NFJ Dividend, Interest & Premium Strategy Fund/AllianzGI Equity & Convertible Income Fund (unaudited) (continued)

Investment Manager's and the Sub-Adviser's responses and efforts relating to the investment performance of the Funds. The Trustees also concluded that the fees payable under each Agreement represent reasonable compensation in light of the nature, extent and quality of services provided by the Investment Manager or Sub-Adviser, as the case may be. Based on their evaluation of factors that they deemed to be material, including those factors described above, the Trustees, including the Independent Trustees, unanimously concluded that the continuation of the Agreements with respect to each Fund was in the interests of the Fund and its shareholders, and should be approved.
