UNITED STATES SECURITIES AND EXCHANGE COMMISSION

Washington, D.C. 20549

FORM 10-Q

**QUARTERLY REPORT PURSUANT TO SECTION 13 OR 15(d) OF
THE SECURITIES EXCHANGE ACT OF 1934**

For the quarterly period ended March 31, 2014

or

**TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d) OF
THE SECURITIES EXCHANGE ACT OF 1934**

For the transition period from to

Commission File Number: 1-16129

FLUOR CORPORATION

(Exact name of registrant as specified in its charter)

Delaware

(State or other jurisdiction of
incorporation or organization)

**6700 Las Colinas Boulevard
Irving, Texas**

(Address of principal executive offices)

33-0927079

(I.R.S. Employer
Identification No.)

75039

(Zip Code)

Edgar Filing: FLUOR CORP - Form 10-Q

469-398-7000

(Registrant's telephone number, including area code)

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes No

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files). Yes No

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, or a smaller reporting company. See definitions of large accelerated filer, accelerated filer, and smaller reporting company in Rule 12b-2 of the Exchange Act. (Check one):

Large accelerated filer

Accelerated filer

Non-accelerated filer

Smaller reporting company

(Do not check if a smaller reporting company)

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act). Yes No

As of April 25, 2014, 159,141,916 shares of the registrant's common stock, \$0.01 par value, were outstanding.

FLUOR CORPORATION

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

UNAUDITED

(1) The Condensed Consolidated Financial Statements do not include footnotes and certain financial information normally presented annually under accounting principles generally accepted in the United States and, therefore, should be read in conjunction with the company's December 31, 2013 Annual Report on Form 10-K. Accounting measurements at interim dates inherently involve greater reliance on estimates than at year-end. The results of operations for the three months ended March 31, 2014 may not necessarily be indicative of results that can be expected for the full year.

The Condensed Consolidated Financial Statements included herein are unaudited; however, they contain all adjustments of a normal recurring nature which, in the opinion of management, are necessary to present fairly its consolidated financial position as of March 31, 2014 and its consolidated results of operations and cash flows for the interim periods presented. All significant intercompany transactions of consolidated subsidiaries are eliminated. Certain amounts in 2013 have been reclassified to conform to the 2014 presentation. Management has evaluated all material events occurring subsequent to the date of the financial statements up to the date this quarterly report is filed on Form 10-Q.

(2) New accounting pronouncements implemented by the company in the first quarter of 2014 or requiring implementation in future periods are discussed below or elsewhere in the notes, where appropriate.

In the first quarter of 2014, the company adopted Accounting Standards Update (ASU) 2014-06, Technical Corrections and Improvements Related to Glossary Terms. This ASU is limited to amendments to the Master Glossary of the Accounting Standards Codification (ASC), including technical corrections related to glossary links, glossary term deletions, glossary term name changes and limited-scope improvements to reduce duplicate Master Glossary terms. The adoption of ASU 2014-06 did not have any impact on the company's financial position, results of operations or cash flows.

In January 2014, the Financial Accounting Standards Board issued ASU 2014-05, Service Concession Arrangements. This ASU clarifies that, unless certain circumstances are met, operating entities should not account for certain concession arrangements with public-sector entities as leases and should not recognize the related infrastructure as property, plant and equipment. This ASU is effective for interim and annual reporting periods beginning after December 15, 2014. Management does not expect the adoption of ASU 2014-05 to have a material impact on the company's financial position, results of operations or cash flows.

In the first quarter of 2014, the company adopted ASU 2013-11, Presentation of an Unrecognized Tax Benefit When a Net Operating Loss Carryforward, a Similar Tax Loss, or a Tax Credit Carryforward Exists. This ASU clarifies the financial statement presentation of unrecognized tax benefits in certain circumstances. The adoption of ASU 2013-11 did not have a material impact on the company's financial position, results of operations or cash flows.

In the first quarter of 2014, the company adopted ASU 2013-07, *Liquidation Basis of Accounting*, which clarifies when an entity should apply the liquidation basis of accounting. In addition, ASU 2013-07 provides principles for the recognition and measurement of assets and liabilities and requirements for financial statements prepared using the liquidation basis of accounting. The adoption of ASU 2013-07 did not have a material impact on the company's financial position, results of operations or cash flows.

In the first quarter of 2014, the company adopted ASU 2013-05, *Parent's Accounting for the Cumulative Translation Adjustment upon Derecognition of Certain Subsidiaries or Groups of Assets within a Foreign Entity or of an Investment in a Foreign Entity*. The objective of ASU 2013-05 is to resolve a practice diversity in circumstances where reporting entities release cumulative translation adjustments into net income when a parent either sells a part or all of its investment in a foreign entity, or no longer holds a controlling financial interest in a subsidiary or group of assets that is a nonprofit activity or a business (other than a sale of in substance real estate or conveyance of oil and gas mineral rights) within a foreign entity. The adoption of ASU 2013-05 did not have a material impact on the company's financial position, results of operations or cash flows.

In the first quarter of 2014, the company adopted ASU 2013-04, *Obligations Resulting from Joint and Several Liability Arrangements for Which the Total Amount of the Obligation Is Fixed at the Reporting Date*, which addresses the recognition, measurement and disclosure of certain obligations including debt arrangements, other contractual obligations and settled

Table of Contents**FLUOR CORPORATION****NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (CONTINUED)**

UNAUDITED

litigation and judicial rulings. The adoption of ASU 2013-04 did not have a material impact on the company's financial position, results of operations or cash flows.

Net of tax		\$	(8)	\$	24

(1) Defined benefit pension plan adjustments were reclassified primarily to total cost of revenue and corporate general and administrative expense.

Table of Contents**FLUOR CORPORATION****NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (CONTINUED)**

UNAUDITED

(4) The effective tax rate for the three months ended March 31, 2014 and 2013, was 28.8 percent and 30.4 percent, respectively. The lower effective tax rate for the three months ended March 31, 2014 compared to the first quarter of 2013 was primarily due to the recognition of a deferred tax benefit for foreign taxes previously paid on certain unremitted foreign earnings. The first quarter of 2013 benefited from federal research tax credits that are no longer available. Both periods benefited from earnings attributable to noncontrolling interests for which income taxes are not typically the responsibility of the company.

The company conducts business globally and, as a result, the company or one or more of its subsidiaries files income tax returns in the U.S. federal jurisdiction and various state and foreign jurisdictions. In the normal course of business, the company is subject to examination by taxing authorities throughout the world, including such major jurisdictions as Australia, Canada, the Netherlands, South Africa, the United Kingdom and the United States. Although the company believes its reserves for its tax positions are reasonable, the final outcome of tax audits could be materially different, both favorably and unfavorably. With few exceptions, the company is no longer subject to U.S. federal, state and local, or non-U.S. income tax examinations for years before 2003.

(5) Cash paid for interest was \$9.9 million and \$10.1 million for the three months ended March 31, 2014 and 2013, respectively. Income tax payments, net of refunds, were \$37.2 million and \$56.0 million during the three-month periods ended March 31, 2014 and 2013, respectively.

(6) Diluted earnings per share (EPS) reflects the assumed exercise or conversion of all dilutive securities using the treasury stock method.

The calculations of the basic and diluted EPS for the three months ended March 31, 2014 and 2013 are presented below:

(in thousands, except per share amounts)	Three Months Ended March 31,	
	2014	2013
Net earnings attributable to Fluor Corporation	\$ 149,074	\$ 166,458
Basic EPS:		
Weighted average common shares outstanding	160,213	162,408
Basic earnings per share	\$ 0.93	\$ 1.02

(7) The fair value hierarchy established by ASC 820, Fair Value Measurement, prioritizes the use of inputs used in valuation techniques into the following three levels:

- Level 1 quoted prices in active markets for identical assets and liabilities
- Level 2 inputs other than quoted prices in active markets for identical assets and liabilities that are observable, either directly or indirectly
- Level 3 unobservable inputs

The company measures and reports assets and liabilities at fair value utilizing pricing information received from third parties. The company performs procedures to verify the reasonableness of pricing information received for significant assets and liabilities classified as Level 2.

The following table presents, for each of the fair value hierarchy levels required under ASC 820-10, the company's assets and liabilities that are measured at fair value on a recurring basis as of March 31, 2014 and December 31, 2013:

(in thousands)	Total	March 31, 2014 Fair Value Hierarchy			Total	December 31, 2013 Fair Value Hierarchy		
		Level 1	Level 2	Level 3		Level 1	Level 2	Level 3
Assets:								
Cash and cash equivalents(1)	\$ 13,270	\$ 13,270	\$	\$	\$ 50,081	\$ 50,081	\$	\$
Marketable securities, current(2)	101,189		101,189		111,333		111,333	
Deferred compensation trusts(3)	87,528	87,528			87,507	87,507		
Marketable securities, noncurrent(4)	322,922		322,922		275,402		275,402	
Derivative assets(5)								
Commodity contracts	108		108		438		438	
Foreign currency contracts	1,587		1,587		855		855	
Liabilities:								
Derivative liabilities(5)								
Commodity contracts	\$ 97	\$	\$ 97	\$	\$ 3	\$	\$ 3	\$
Foreign currency contracts	557		557		967		967	

(1) Consists primarily of registered money market funds valued at fair value. These investments represent the net asset value of the shares of such funds as of the close of business at the end of the period.

(2) Consists of investments in U.S. agency securities, U.S. Treasury securities, corporate debt securities, commercial paper and other debt securities with maturities of less than one year that are valued based on pricing models, which are determined from a compilation of primarily observable market information, broker quotes in non-active markets or similar assets.

(3) Consists primarily of registered money market funds and an equity index fund valued at fair value. These investments, which are trading securities, represent the net asset value of the shares of such funds as of the close of business at the end of the period based on the last trade or official close of an active market or exchange.

(4) Consists of investments in U.S. agency securities, U.S. Treasury securities, corporate debt securities and other debt securities with maturities ranging from one year to three years that are valued based on pricing models, which are determined from a compilation of primarily observable market information, broker quotes in non-active markets or similar assets.

(5) See Note 8 for the classification of commodity contracts and foreign currency contracts on the Condensed Consolidated Balance Sheet. Commodity contracts and foreign currency contracts are estimated using standard pricing models with market-based inputs, which take into account the present value of estimated future cash flows.

Table of Contents**FLUOR CORPORATION****NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (CONTINUED)**

UNAUDITED

All of the company's financial instruments carried at fair value are included in the table above. All of the above financial instruments are available-for-sale securities except for those held in the deferred compensation trusts (which are trading securities) and derivative assets and liabilities. The company has determined that there was no other-than-temporary impairment of available-for-sale securities with unrealized losses, and the company expects to recover the entire cost basis of the securities. The available-for-sale securities are made up of the following security types as of March 31, 2014: money market funds of \$13 million, U.S. agency securities of \$103 million, U.S. Treasury securities of \$75 million, corporate debt securities of \$234 million, commercial paper of \$9 million and other debt securities of \$3 million. As of December 31, 2013, available-for-sale securities consisted of money market funds of \$50 million, U.S. agency securities of \$119 million, U.S. Treasury securities of \$26 million, corporate debt securities of \$228 million, commercial paper of \$7 million and other debt securities of \$7 million. The amortized cost of these available-for-sale securities is not materially different from the fair value. During the three months ended March 31, 2014 and 2013, proceeds from the sales and maturities of available-for-sale securities were \$64 million and \$75 million, respectively.

The carrying values and estimated fair values of the company's financial instruments that are not required to be measured at fair value in the Condensed Consolidated Balance Sheet are as follows:

(in thousands)	Fair Value Hierarchy	March 31, 2014		December 31, 2013	
		Carrying Value	Fair Value	Carrying Value	Fair Value
Assets:					
Cash(1)	Level 1	\$ 1,344,868	\$ 1,344,868	\$ 1,444,656	\$ 1,444,656
Cash equivalents(2)	Level 2	783,920	783,920	788,845	788,845
Marketable securities, current(3)	Level 2	82,320	82,320	74,690	74,690
Notes receivable, including noncurrent portion(4)	Level 3	16,874	16,874	27,602	27,602
Liabilities:					
3.375% Senior Notes(5)	Level 2	\$ 496,715	\$ 502,705	\$ 496,604	\$ 484,204
1.5% Convertible Senior Notes(5)	Level 2	18,398	53,930	18,398	54,027
Other borrowings(6)	Level 2	10,995	10,995	11,441	11,441

(1) Cash consists of bank deposits. Carrying amounts approximate fair value.

(2) Cash equivalents consist of held-to-maturity time deposits with maturities of three months or less at the date of purchase. The carrying amounts of these time deposits approximate fair value because of the short-term maturity of these instruments.

(3) Marketable securities, current consist of held-to-maturity time deposits with original maturities greater than three months that will mature within one year. The carrying amounts of these time deposits approximate fair value because of the short-term maturity of these instruments.

Amortized cost is not materially different from the fair value.

(4) Notes receivable are carried at net realizable value which approximates fair value. Factors considered by the company in determining the fair value include the credit worthiness of the borrower, current interest rates, the term of the note and any collateral pledged as security. Notes receivable are periodically assessed for impairment.

(5) The fair value of the 3.375% Senior Notes and 1.5% Convertible Senior Notes are estimated based on quoted market prices for similar issues.

(6) Other borrowings represent amounts outstanding under a short-term credit facility. The carrying amount of borrowings under this credit facility approximates fair value because of the short-term maturity.

(8) The company limits exposure to foreign currency fluctuations in most of its engineering and construction contracts through provisions that require client payments in currencies corresponding to the currencies in which cost is incurred. Certain financial exposure, which includes currency and commodity price risk associated with engineering and construction contracts, currency risk associated with monetary assets and liabilities denominated in nonfunctional currencies and risk associated with interest

Table of Contents**FLUOR CORPORATION****NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (CONTINUED)**

UNAUDITED

rate volatility, may subject the company to earnings volatility. In cases where financial exposure is identified, the company generally implements a hedging strategy utilizing derivative instruments as hedging instruments to mitigate the risk. These hedging instruments are designated as either fair value or cash flow hedges in accordance with ASC 815, Derivatives and Hedging. The company formally documents its hedge relationships at inception, including identification of the hedging instruments and the hedged items, as well as its risk management objectives and strategies for undertaking the hedge transaction. The company also formally assesses, both at inception and at least quarterly thereafter, whether the hedging instruments are highly effective in offsetting changes in the fair value of the hedged items. The fair values of all hedging instruments are recognized as assets or liabilities at the balance sheet date. For fair value hedges, the effective portion of the change in the fair value of the hedging instrument is offset against the change in the fair value of the underlying asset or liability through earnings. For cash flow hedges, the effective portion of the hedging instruments' gains or losses due to changes in fair value are recorded as a component of AOCI and are reclassified into earnings when the hedged items settle. Any ineffective portion of a hedging instrument's change in fair value is immediately recognized in earnings. The company does not enter into derivative instruments for speculative purposes. The company maintains master netting arrangements with certain counterparties to facilitate the settlement of derivative instruments; however, the company reports the fair value of derivative instruments on a gross basis.

As of March 31, 2014, the company had total gross notional amounts of \$147 million of foreign currency contracts and \$8 million of commodity contracts outstanding relating to engineering and construction contract obligations and monetary assets and liabilities denominated in nonfunctional currencies. The foreign currency contracts are of varying duration, none of which extend beyond December 2014. The commodity contracts are of varying duration, none of which extend beyond May 2017. The impact to earnings due to hedge ineffectiveness was immaterial for the three months ended March 31, 2014 and 2013.

The fair values of derivatives designated as hedging instruments under ASC 815 as of March 31, 2014 and December 31, 2013 were as follows:

(in thousands)	Balance Sheet Location	Asset Derivatives		Balance Sheet Location	Liability Derivatives	
		March 31, 2014	December 31, 2013		March 31, 2014	December 31, 2013
Commodity contracts	Other current assets	\$ 3	\$ 296	Other accrued liabilities	\$ 89	\$ 3
Foreign currency contracts	Other current assets	1,587	855	Other accrued liabilities	557	967
Commodity contracts	Other assets	105	142	Noncurrent liabilities	8	
Total		\$ 1,695	\$ 1,293		\$ 654	\$ 970

The pre-tax net gains recognized in earnings associated with the hedging instruments designated as fair value hedges for the three months ended March 31, 2014 and 2013 were as follows:

Edgar Filing: FLUOR CORP - Form 10-Q

Fair Value Hedges (in thousands)	Location of Gain	Three Months Ended	
		2014	March 31, 2013
Foreign currency contracts	Corporate general and administrative expense	\$ 1,259	\$ 3,819

The net gains recognized in earnings on hedging instruments for the fair value hedges noted in the table above offset the net losses recognized in earnings on the hedged items in the same locations on the Condensed Consolidated Statement of Earnings.

Table of Contents

FLUOR CORPORATION

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (CONTINUED)

The after-tax amount of gain (loss) recognized in OCI and reclassified from AOCI into earnings associated with the derivative instruments designated as cash flow hedges for the three months ended March 31, 2014 and 2013 was as follows:

Cash Flow Hedges (in thousands)	After-Tax Amount of Gain (Loss) Recognized in OCI Three Months Ended March 31,		Location of Gain (Loss)	After-Tax Amount of Gain (Loss) Reclassified from AOCI into Earnings Three Months Ended March 31,	
	2014	2013		2014	2013
Commodity contracts	\$ (143)	\$ 31	Total cost of revenue	\$ 78	\$ 47
Foreign currency contracts	(401)	54	Total cost of revenue	8	147
Interest rate contracts			Interest expense	(262)	(262)
Total	\$ (544)	\$ 85		\$ (176)	\$ (68)

(9) Net periodic pension expense for the U.S. and non-U.S. defined benefit pension plans includes the following components:

(in thousands)	U.S. Pension Plan Three Months Ended March 31,		Non-U.S. Pension Plans Three Months Ended March 31,	
	2014	2013	2014	2013
Service cost	\$ 950	\$ 1,613	\$ 4,153	\$ 3,882
Interest cost	7,919	7,275	8,804	8,017
Expected return on assets	(7,526)	(7,744)	(12,248)	(11,559)
Amortization of prior service cost	187	26		
Recognized net actuarial loss	1,109	1,510	1,984	1,700
Net periodic pension expense	\$ 2,639	\$ 2,680	\$ 2,693	\$ 2,040

The company currently expects to fund approximately \$30 million to \$60 million into its defined benefit pension plans during 2014, which is expected to be in excess of the minimum funding required. During the three months ended March 31, 2014, contributions of approximately \$10 million were made by the company.

(10) In September 2011, the company issued \$500 million of 3.375% Senior Notes (the 2011 Notes) due September 15, 2021 and received proceeds of \$492 million, net of underwriting discounts and debt issuance costs. Interest on the 2011 Notes is payable semi-annually on March 15 and September 15 of each year, and began on March 15, 2012. The company may, at any time, redeem the 2011 Notes at a redemption price equal to 100 percent of the principal amount, plus a make whole premium described in the indenture. Additionally, if a change of control

Edgar Filing: FLUOR CORP - Form 10-Q

triggering event occurs, as defined by the terms of the indenture, the company will be required to offer to purchase the 2011 Notes at a purchase price equal to 101 percent of their principal amount, plus accrued and unpaid interest, if any, to the date of purchase. The company is generally not limited under the indenture governing the 2011 Notes in its ability to incur additional indebtedness provided the company is in compliance with certain restrictive covenants, including restrictions on liens and restrictions on sale and leaseback transactions.

In February 2004, the company issued \$330 million of 1.5% Convertible Senior Notes (the 2004 Notes) due February 15, 2024 and received proceeds of \$323 million, net of underwriting discounts. In December 2004, the company irrevocably elected to pay the principal amount of the 2004 Notes in cash. The 2004 Notes are convertible if a specified trading price of the company's common stock (the trigger price) is achieved and maintained for a specified period. The trigger price condition was satisfied during the fourth quarter of 2013 and first quarter of 2014 and the 2004 Notes were therefore classified as short-term debt as of December 31, 2013 and March 31, 2014, respectively.

Table of Contents**FLUOR CORPORATION****NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (CONTINUED)**

UNAUDITED

The following table presents information related to the liability and equity components of the 2004 Notes:

(in thousands)	March 31, 2014	December 31, 2013
Carrying value of the equity component	\$ 19,519	\$ 19,519
Principal amount and carrying value of the liability component	18,398	18,398

The 2004 Notes are convertible into shares of the company's common stock (par value \$0.01 per share) at a conversion rate of 36.6729 shares per each \$1,000 principal amount of the 2004 Notes. Interest expense for the first quarter of both 2014 and 2013 included original coupon interest of \$0.1 million. The if-converted value of \$52 million was in excess of the principal value as of March 31, 2014.

In July 2013, the company established a short-term credit facility to purchase land and construction equipment associated with the equipment operations in the Global Services segment. Outstanding borrowings under the facility were \$11 million as of both March 31, 2014 and December 31, 2013.

As of March 31, 2014, the company was in compliance with all of the financial covenants related to its debt agreements.

(11) The company's executive and director stock-based compensation plans are described, and informational disclosures provided, in the Notes to Consolidated Financial Statements included in the Form 10-K for the year ended December 31, 2013. Restricted stock units of 357,138 and 453,185 were granted to executives in the first quarter of 2014 and 2013, respectively, at weighted-average per share prices of \$79.19 and \$61.43, respectively. For the company's executives, the restricted units and shares granted in 2014 and 2013 generally vest ratably over three years. During the first quarter of 2014 and 2013, options for the purchase of 684,486 shares at a weighted-average exercise price of \$79.19 per share and 884,574 shares at a weighted-average exercise price of \$61.45 per share, respectively, were awarded to executives. The options granted in 2014 and 2013 vest ratably over three years. The options expire ten years after the grant date. In the first quarter of 2014 and 2013, performance-based Value Driver Incentive (VDI) units totaling 315,551 and 385,742, respectively, were granted to executives at weighted-average per share prices of \$79.19 and \$61.45, respectively. The number of units is adjusted at the end of each performance period based on the achievement of performance criteria. The VDI awards granted in 2014 and 2013 vest after a period of approximately three years.

(12) The company applies the provisions of ASC 810-10-45, which establishes accounting and reporting standards for ownership interests in subsidiaries held by parties other than the parent, the amount of consolidated net earnings attributable to the parent and to the noncontrolling interests, changes in a parent's ownership interest and the valuation of retained noncontrolling equity investments when a subsidiary is

deconsolidated.

As required by ASC 810-10-45, the company has separately disclosed on the face of the Condensed Consolidated Statement of Earnings for all periods presented the amount of net earnings attributable to the company and the amount of net earnings attributable to noncontrolling interests. For the three months ended March 31, 2014 and 2013, net earnings attributable to noncontrolling interests were \$44 million and \$47 million, respectively. Income taxes associated with earnings attributable to noncontrolling interests were immaterial in both periods presented. Distributions paid to noncontrolling interests were \$16 million and \$18 million for the three months ended March 31, 2014 and 2013, respectively. Capital contributions by noncontrolling interests were less than \$0.1 million and \$0.2 million for the three months ended March 31, 2014 and 2013, respectively.

(13) The company and certain of its subsidiaries are subject to litigation, claims and other commitments and contingencies arising in the ordinary course of business. The company currently does not expect that the ultimate resolution of these matters will have a material adverse effect on its consolidated financial position or results of operations.

As of March 31, 2014, several matters were in the litigation and dispute resolution process. The following discussion provides a background and current status of these matters:

Table of Contents

FLUOR CORPORATION

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (CONTINUED)

UNAUDITED

St. Joe Minerals Matters

Since 1995, the company has been named as a defendant in a number of lawsuits alleging injuries resulting from the lead business of St. Joe Minerals Corporation (St. Joe) and The Doe Run Company (Doe Run) in Herculaneum, Missouri, which are discontinued operations. The company was named as a defendant in these lawsuits as a result of its ownership or other interests in St. Joe and Doe Run in the period between 1981 and 1994. In 1994, the company sold its interests in St. Joe and Doe Run, along with all liabilities associated with the lead business, pursuant to a sale agreement in which the buyer agreed to indemnify the company for those liabilities. Until December 2010, substantially all the lawsuits were settled and paid by the buyer; and in all cases the company was fully released.

In December 2010, the buyer settled with certain plaintiffs without obtaining a release for the benefit of the company, leaving the company to defend its case with these plaintiffs in the City of St. Louis Circuit Court. In late July 2011, the jury reached an unexpected verdict in this case, ruling in favor of 16 of the plaintiffs and against the company and certain former subsidiaries for \$38.5 million in compensatory and economic damages and \$320 million in punitive damages. In August 2011, the court entered judgments based on the verdict.

In December 2011, the company appealed the judgments of the court. Briefings and oral arguments before the Missouri Court of Appeals (Eastern District) have been completed, and the company is awaiting a decision. The company strongly believes that the judgments are not supported by the facts or the law and that it is probable that such judgments will be overturned. Therefore, based upon the present status of this matter, the company does not believe it is probable that a loss will be incurred. Accordingly, the company has not recorded a charge as a result of the judgments. The company has also taken steps to enforce its rights to the indemnification described above.

The company, the buyer and other entities are defendants in 19 additional lawsuits (including consolidated lawsuits) relating to the lead business of St. Joe and Doe Run. The company believes it has strong defenses to these lawsuits and is vigorously defending its position. The company is unable to estimate a range of possible losses in these lawsuits. In addition, the company has filed claims for indemnification under the sale agreement and for other matters raised in these lawsuits. While management believes the company will be ultimately successful in these various matters, if the company was unsuccessful in its appeal of the ruling referenced above or in any of the other lawsuits, or in the prosecution of and collection on our indemnity claims, the company could recognize a material charge to its earnings.

Conex International v. Fluor Enterprises, Inc.

In November 2006, a Jefferson County, Texas, jury reached an unexpected verdict in the case of Conex International (Conex) v. Fluor Enterprises Inc. (FEI), ruling in favor of Conex and awarding \$99 million in damages related to a 2001 construction project.

In 2001, Atofina (now part of Total Petrochemicals Inc.) hired Conex International to be the mechanical contractor on a project at Atofina's refinery in Port Arthur, Texas. FEI was also hired to provide certain engineering advice to Atofina on the project. There was no contract between Conex and FEI. Later in 2001 after the project was complete, Conex and Atofina negotiated a final settlement for extra work on the project. Conex sued FEI in September 2003, alleging damages for interference and misrepresentation and demanding that FEI should pay Conex the balance of the extra work charges that Atofina did not pay in the settlement. Conex also asserted that FEI interfered with Conex's contract and business relationship with Atofina. The jury verdict awarded damages for the extra work and the alleged interference.

The company appealed the decision and the judgment against the company was reversed in its entirety in December 2008. Both parties appealed the decision to the Texas Supreme Court, and the court denied both petitions. The company requested rehearing on two issues to the Texas Supreme Court, and that request was denied. The Texas Supreme Court remanded the matter back to the trial court for a new trial. The matter was stayed, pending resolution of certain technical issues associated with the 2011 bankruptcy filing by the plaintiff's parent. These issues have been resolved. The matter has been remanded to the court in Jefferson County, Texas. Based upon the present status of this matter, the company does not believe that there is a reasonable possibility that a loss will be incurred.

FLUOR CORPORATION

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (CONTINUED)

UNAUDITED

Other Matters

The company and certain of its clients have made claims arising from the performance under its contracts. The company recognizes revenue, but not profit, for certain claims (including change orders in dispute and unapproved change orders in regard to both scope and price) when it is determined that recovery of incurred costs is probable and the amounts can be reliably estimated. Under ASC 605-35-25, these requirements are satisfied when (a) the contract or other evidence provides a legal basis for the claim, (b) additional costs were caused by circumstances that were unforeseen at the contract date and not the result of deficiencies in the company's performance, (c) claim-related costs are identifiable and considered reasonable in view of the work performed, and (d) evidence supporting the claim is objective and verifiable. The company periodically evaluates its position and the amounts recognized in revenue with respect to all its claims. Recognized claims against clients amounted to \$23 million as of March 31, 2014, and are included in contract work in progress in the accompanying Condensed Consolidated Balance Sheet. There were no recognized claims against clients as of December 31, 2013.

From time to time, the company enters into significant contracts with the U.S. government and its agencies. Government contracts are subject to audits and investigations by government representatives with respect to the company's compliance with various restrictions and regulations applicable to government contractors, including but not limited to the allowability of costs incurred under reimbursable contracts. In connection with performing government contracts, the company maintains reserves for estimated exposures associated with these matters.

(14) In the ordinary course of business, the company enters into various agreements providing performance assurances and guarantees to clients on behalf of certain unconsolidated and consolidated partnerships, joint ventures and other jointly executed contracts. These agreements are entered into primarily to support the project execution commitments of these entities. The performance guarantees have various expiration dates ranging from mechanical completion of the facilities being constructed to a period extending beyond contract completion in certain circumstances. The maximum potential amount of future payments that the company could be required to make under outstanding performance guarantees, which represents the remaining cost of work to be performed by or on behalf of third parties under engineering and construction contracts, was estimated to be \$13.6 billion as of March 31, 2014. Amounts that may be required to be paid in excess of estimated cost to complete contracts in progress are not estimable. For cost reimbursable contracts, amounts that may become payable pursuant to guarantee provisions are normally recoverable from the client for work performed under the contract. For lump-sum or fixed-price contracts, the performance guarantee amount is the cost to complete the contracted work, less amounts remaining to be billed to the client under the contract. Remaining billable amounts could be greater or less than the cost to complete. In those cases where costs exceed the remaining amounts payable under the contract, the company may have recourse to third parties, such as owners, co-venturers, subcontractors or vendors for claims. The company assessed its performance guarantee obligation as of March 31, 2014 and December 31, 2013 in accordance with ASC 460, Guarantees and the carrying value of the liability was not material.

Financial guarantees, made in the ordinary course of business in certain limited circumstances, are entered into with financial institutions and other credit grantors and generally obligate the company to make payment in the event of a default by the borrower. These arrangements generally require the borrower to pledge collateral to support the fulfillment of the borrower's obligation.

(15) In the normal course of business, the company forms partnerships or joint ventures primarily for the execution of single contracts or projects. The majority of these partnerships or joint ventures are characterized by a 50 percent or less, noncontrolling ownership or participation interest, with decision making and distribution of expected gains and losses typically being proportionate to the ownership or participation interest. Many of the partnership and joint venture agreements provide for capital calls to fund operations, as necessary. Such funding is infrequent and is not anticipated to be material. The company accounts for its partnerships and joint ventures in accordance with ASC 810.

In accordance with ASC 810, the company assesses its partnerships and joint ventures at inception to determine if any meet the qualifications of a VIE. The company considers a partnership or joint venture a VIE if either (a) the total equity investment is not sufficient to permit the entity to finance its activities without additional subordinated financial support, (b) characteristics of a controlling financial interest are missing (either the ability to make decisions through voting or other rights, the obligation to

Table of Contents

FLUOR CORPORATION

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (CONTINUED)

UNAUDITED

absorb the expected losses of the entity or the right to receive the expected residual returns of the entity), or (c) the voting rights of the equity holders are not proportional to their obligations to absorb the expected losses of the entity and/or their rights to receive the expected residual returns of the entity, and substantially all of the entity's activities either involve or are conducted on behalf of an investor that has disproportionately few voting rights. Upon the occurrence of certain events outlined in ASC 810, the company reassesses its initial determination of whether the partnership or joint venture is a VIE. The majority of the company's partnerships and joint ventures qualify as VIEs because the total equity investment is typically nominal and not sufficient to permit the entity to finance its activities without additional subordinated financial support.

The company also performs a qualitative assessment of each VIE to determine if the company is its primary beneficiary, as required by ASC 810. The company concludes that it is the primary beneficiary and consolidates the VIE if the company has both (a) the power to direct the economically significant activities of the entity and (b) the obligation to absorb losses of, or the right to receive benefits from, the entity that could potentially be significant to the VIE. The company considers the contractual agreements that define the ownership structure, distribution of profits and losses, risks, responsibilities, indebtedness, voting rights and board representation of the respective parties in determining if the company is the primary beneficiary. The company also considers all parties that have direct or implicit variable interests when determining whether it is the primary beneficiary. As required by ASC 810, management's assessment of whether the company is the primary beneficiary of a VIE is continuously performed.

In most cases, when the company is not the primary beneficiary and not required to consolidate the VIE, the proportionate consolidation method of accounting is used for joint ventures and partnerships in the construction industry, whereby the company recognizes its proportionate share of revenue, cost and profit in its Condensed Consolidated Statement of Earnings and uses the one-line equity method of accounting in the Condensed Consolidated Balance Sheet, which is a common application of ASC 810-10-45-14 in the construction industry. The equity and cost methods of accounting for the investments are also used, depending on the company's respective ownership interest, amount of influence over the VIE and the nature of services provided by the VIE. The net carrying value of the unconsolidated VIEs classified under Investments and goodwill and Other accrued liabilities in the Condensed Consolidated Balance Sheet was a net asset of \$117 million and \$122 million as of March 31, 2014 and December 31, 2013, respectively. Some of the company's VIEs have debt; however, such debt is typically non-recourse in nature. The company's maximum exposure to loss as a result of its investments in unconsolidated VIEs is typically limited to the aggregate of the carrying value of the investment and future funding commitments. Future funding commitments as of March 31, 2014 for the unconsolidated VIEs were \$33 million.

In some cases, the company is required to consolidate certain VIEs. As of March 31, 2014, the carrying values of the assets and liabilities associated with the operations of the consolidated VIEs were \$1.1 billion and \$620 million, respectively. As of December 31, 2013, the carrying values of the assets and liabilities associated with the operations of the consolidated VIEs were \$1.2 billion and \$731 million, respectively. The assets of a VIE are restricted for use only for the particular VIE and are not available for general operations of the company.

Edgar Filing: FLUOR CORP - Form 10-Q

None of the VIEs are individually material to the company's results of operations, financial position or cash flows except for the Fluor SKM joint venture, a consolidated joint venture formed for the execution of an iron ore project in Australia, which was material to the company's revenue for the 2013 period. The company's results of operations included revenue related to the Fluor SKM joint venture of \$165 million and \$753 million for the three months ended March 31, 2014 and 2013, respectively.

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (CONTINUED)

UNAUDITED

(16) Operating information by reportable segment is as follows:

External Revenue (in millions)	Three Months Ended March 31,	
	2014	2013
Oil & Gas	\$ 2,729.7	\$ 2,769.3
Industrial & Infrastructure	1,668.1	3,132.2
Government	593.2	751.2
Global Services	142.7	149.9
Power	250.9	383.0
Total external revenue	\$ 5,384.6	\$ 7,185.6

The Global Services segment represents a combination of other operating segments that do not meet the ASC 280 requirements for separate disclosure or aggregation. Intercompany revenue for the Global Services segment, excluded from the amounts shown above, was \$136 million and \$117 million for the three months ended March 31, 2014 and 2013, respectively.

Segment Profit (Loss) (in millions)	Three Months Ended March 31,	
	2014	2013
Oil & Gas	\$ 137.9	\$ 104.5
Industrial & Infrastructure	100.3	126.9
Government	12.5	41.3
Global Services	18.8	27.7
Power	(1.4)	(6.8)
Total segment profit	\$ 268.1	\$ 293.6

Power segment profit for the three months ended March 31, 2014 and 2013 included research and development expenses of \$13 million and \$15 million, respectively, associated with the operations of NuScale.

A reconciliation of total segment profit to earnings before taxes is as follows:

Reconciliation of Total Segment Profit to Earnings Before Taxes (in millions)	Three Months Ended March 31,	
	2014	2013

Edgar Filing: FLUOR CORP - Form 10-Q

Total segment profit	\$	268.1	\$	293.6
Corporate general and administrative expense		(37.8)		(32.6)
Interest income (expense), net		(3.0)		(2.9)
Earnings attributable to noncontrolling interests		44.2		48.2
Earnings before taxes	\$	271.5	\$	306.3

Total assets by segment are as follows:

Total Assets by Segment (in millions)		March 31, 2014		December 31, 2013
Oil & Gas	\$	1,546.4	\$	1,643.8
Industrial & Infrastructure		842.4		909.7
Government		521.7		580.6
Global Services		781.0		758.9
Power		141.8		154.9

FLUOR CORPORATION

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

The following discussion and analysis should be read in conjunction with the Condensed Consolidated Financial Statements and notes and the company's December 31, 2013 Annual Report on Form 10-K. For purposes of reviewing this document, segment profit is calculated as revenue less cost of revenue and earnings attributable to noncontrolling interests excluding: corporate general and administrative expense; interest expense; interest income; domestic and foreign income taxes; and other non-operating income and expense items.

CAUTIONARY STATEMENT REGARDING FORWARD-LOOKING STATEMENTS

Certain statements made herein, including statements regarding the company's projected revenue and earnings levels, cash flow and liquidity, new awards and backlog levels and the implementation of strategic initiatives and organizational changes are forward-looking in nature. We wish to caution readers that forward-looking statements, including disclosures which use words such as the company believes, anticipates, expects, estimates and similar statements are subject to various risks and uncertainties which could cause actual results of operations to differ materially from expectations. Factors potentially contributing to such differences include, among others:

- Difficulties or delays incurred in the execution of contracts, or failure to accurately estimate the resources and time necessary for our contracts, resulting in cost overruns or liabilities, including those caused by the performance of our clients, subcontractors, suppliers and joint venture or teaming partners;
- Intense competition in the global engineering, procurement and construction industry, which can place downward pressure on our contract prices and profit margins;
- The company's failure to receive anticipated new contract awards and the related impact on revenue, earnings, staffing levels and cost;
- The cyclical nature of many of the markets the company serves, including our commodity-based business lines, and our vulnerability to downturns;
- A failure to obtain favorable results in existing or future litigation or dispute resolution proceedings or claims against project owners, subcontractors or suppliers;
- Current economic conditions affecting our clients, partners, subcontractors and suppliers, which may result in decreased capital investment or expenditures, or a failure to make anticipated increased capital investment or expenditures, by the company's clients or other financial difficulties by our partners, subcontractors or suppliers;
- Client cancellations of, or scope adjustments to, existing contracts and the related impacts on staffing levels and cost;
- Client delays or defaults in making payments;

Edgar Filing: FLUOR CORP - Form 10-Q

- Failure to meet timely completion or performance standards that could result in higher cost and reduced profits or, in some cases, losses on projects;
- Changes in global business, economic (including currency risk), political and social conditions;
- Civil unrest, security issues, labor conditions and other unforeseeable events in the countries in which we do business, resulting in unanticipated losses;
- Liabilities arising from faulty services that could result in significant professional or product liability, warranty or other claims;
- Failure of our suppliers, subcontractors or joint venture partners to provide supplies or services at the agreed-upon levels or times;
- Repercussions of events beyond our control, such as severe weather conditions, that may significantly affect operations, result in higher cost or subject the company to liability claims by our clients;
- The potential impact of certain tax matters including, but not limited to, those from foreign operations and the ongoing audits by tax authorities;
- The impact of anti-bribery and international trade laws and regulations;
- Possible systems and information technology interruptions or the failure to adequately protect intellectual property rights;
- Foreign exchange risks;
- Failure to maintain safe work sites;
- The impact of past and future environmental, health and safety regulations including climate change regulations;
- Possible limitations of bonding or letter of credit capacity;
- The company's ability to secure appropriate insurance;
- The availability of credit and restrictions imposed by credit facilities, both for the company and our clients, suppliers,

Table of Contents

subcontractors or other partners;

- The risks associated with acquisitions, dispositions or other investments;
- Limitations on cash transfers from subsidiaries that may restrict the company's ability to satisfy financial obligations or to pay interest or principal when due on outstanding debt; and
- Restrictions on possible transactions imposed by our charter documents and Delaware law.

Any forward-looking statements that we may make are based on our current expectations and beliefs concerning future developments and their potential effects on us. There can be no assurance that future developments affecting us will be those anticipated by us. Any forward-looking statements are subject to the risks, uncertainties and other factors that could cause actual results of operations, financial condition, cost reductions, acquisitions, dispositions, financing transactions, operations, expansion, consolidation and other events to differ materially from those expressed or implied in such forward-looking statements.

Due to known and unknown risks, the company's actual results may differ materially from its expectations or projections. While most risks affect only future cost or revenue anticipated by the company, some risks may relate to accruals that have already been reflected in earnings. The company's failure to receive payments of accrued amounts or incurrence of liabilities in excess of amounts previously recognized could result in a charge against future earnings. As a result, the reader is cautioned to recognize and consider the inherently uncertain nature of forward-looking statements and not to place undue reliance on them.

Additional information concerning these and other factors can be found in the company's press releases and periodic filings with the Securities and Exchange Commission, including the discussion under the heading "Item 1A. Risk Factors" in the company's Form 10-K filed February 18, 2014. These filings are available publicly on the SEC's website at <http://www.sec.gov>, on the company's website at <http://investor.fluor.com> or upon request from the company's Investor Relations Department at (469) 398-7220. The company cannot control such risk factors and other uncertainties, and in many cases, cannot predict the risks and uncertainties that could cause actual results to differ materially from those indicated by the forward-looking statements. These risks and uncertainties should be considered when evaluating the company and deciding whether to invest in its securities. Except as otherwise required by law, the company undertakes no obligation to publicly update or revise its forward-looking statements, whether as a result of new information, future events or otherwise.

RESULTS OF OPERATIONS

Summary

Consolidated revenue for the three months ended March 31, 2014 decreased 25 percent to \$5.4 billion from \$7.2 billion for the three months ended March 31, 2013, principally due to a significant decline in project execution activities in the mining and metals business line of the Industrial & Infrastructure segment. Reduced project execution activities in the Government and Power segments also contributed to the overall revenue decline.

Edgar Filing: FLUOR CORP - Form 10-Q

Net earnings attributable to Fluor Corporation were \$149 million or \$0.92 per diluted share for the three months ended March 31, 2014, compared to net earnings attributable to Fluor Corporation of \$166 million or \$1.02 per diluted share for the corresponding period of 2013. This decrease in net earnings was primarily due to lower contributions from the Industrial & Infrastructure and Government segments, which offset a significant increase in contributions from the Oil & Gas segment.

The company is still experiencing a highly competitive business environment, with pressure on margins. However, the Oil & Gas segment has continued to show signs of improvement, particularly for the upstream and petrochemicals markets. In some cases, margins may be impacted by a change in the mix of work performed. For example, in the current period results, the Oil & Gas segment experienced a higher segment profit margin due to a shift in the mix of work to higher margin engineering activities from lower margin construction activities. This shift corresponds to an increase in contributions during the first quarter of 2014 from projects that are in the early stages of the project life cycle compared to a year ago.

In addition to the strengthening of the upstream and petrochemicals markets of the Oil & Gas segment, there are certain other market trends. First, the mining and metals business line of the Industrial & Infrastructure segment has continued to slow as major capital investment decisions by some mining customers have been deferred. Second, the federal government has continued to close bases in the execution of the Logistics Civil Augmentation Program (LOGCAP IV) in Afghanistan, which has reduced the volume of work for the Government segment.

The effective tax rate for the three months ended March 31, 2014 and 2013, was 28.8 percent and 30.4 percent, respectively. The lower effective tax rate for the three months ended March 31, 2014 compared to the first quarter of 2013 was primarily due

Table of Contents

to the recognition of a deferred tax benefit for foreign taxes previously paid on certain unremitted foreign earnings. The first quarter of 2013 benefited from federal research tax credits that are no longer available. Both periods benefited from earnings attributable to noncontrolling interests for which income taxes are not typically the responsibility of the company.

Consolidated new awards were \$10.7 billion for the three months ended March 31, 2014 compared to new awards of \$6.5 billion for the three months ended March 31, 2013. The Oil & Gas segment was the major contributor to the new award activity in the first quarter of 2014 with new awards totaling \$8.8 billion. Approximately 85 percent of consolidated new awards for the three months ended March 31, 2014 were for projects located outside of the United States.

Consolidated backlog as of March 31, 2014 was \$40.2 billion compared to \$37.5 billion as of March 31, 2013. The increase in backlog was primarily due to significant new awards in the Oil & Gas segment, partially offset by a decline in backlog in the mining and metals business line of the Industrial & Infrastructure segment. As of March 31, 2014, approximately 68 percent of consolidated backlog related to projects outside of the United States. Although backlog reflects business which is considered to be firm, cancellations or scope adjustments may occur. Backlog is adjusted to reflect any known project cancellations, revisions to project scope and cost, and deferrals, as appropriate.

Oil & Gas

Revenue and segment profit for the Oil & Gas segment are summarized as follows:

(in millions)	Three Months Ended March 31,	
	2014	2013
Revenue	\$ 2,729.7	\$ 2,769.3
Segment profit	137.9	104.5

Revenue for the three months ended March 31, 2014 was level with the revenue for the three months ended March 31, 2013. The segment experienced significant increased project execution activities for several projects, including petrochemical projects on the Gulf Coast of the United States and an upstream production facility in Russia. These increases were offset by revenue declines for certain large projects progressing toward completion, including a coal bed methane gas project in Australia and a refinery expansion project in the United States.

Segment profit for the first three months of 2014 increased 32 percent compared to the corresponding period in 2013. Also, segment profit margin increased to 5.1 percent for the three months ended March 31, 2014 compared to 3.8 percent for the three months ended March 31, 2013. The segment profit and segment profit margin improvement in the current year quarter was primarily due to a shift in the mix of work to higher margin engineering activities from lower margin construction activities. This shift corresponds to an increase in contributions during the first quarter of 2014 from projects that are in the early stages of the project life cycle compared to a year ago, including certain of the Gulf Coast petrochemicals project execution activities and work on the upstream facility in Russia noted above.

Edgar Filing: FLUOR CORP - Form 10-Q

New awards for the first three months of 2014 were \$8.8 billion, compared to \$3.1 billion for the first quarter of 2013. Current quarter awards included a significant amount of the engineering, procurement and construction value of a liquefied natural gas facility in Canada, a refinery project in Kuwait, a refinery expansion in Canada, a pipeline project in Mexico and a chemicals project in Malaysia. Backlog as of March 31, 2014 increased 38 percent to \$25.7 billion, compared to \$18.6 billion as of March 31, 2013. The growth in backlog resulted from the significant new award activity for the current quarter, reflecting continued demand for new capacity in oil and gas production and gas liquefaction. The segment remains well positioned for new project activity in these markets. Market conditions remain competitive and, in certain cases, may result in more lump-sum contracts.

The total assets in the segment were \$1.5 billion as of March 31, 2014, compared to \$1.6 billion as of December 31, 2013.

Table of Contents**Industrial & Infrastructure**

Revenue and segment profit for the Industrial & Infrastructure segment are summarized as follows:

(in millions)	Three Months Ended	
	2014	March 31, 2013
Revenue	\$ 1,668.1	\$ 3,132.2
Segment profit	100.3	126.9

Revenue for the three months ended March 31, 2014 decreased 47 percent compared to the first quarter of 2013, primarily due to a significant decline in project execution activities for the mining and metals business line. This decline was somewhat offset by growth in the infrastructure and industrial services business lines.

Segment profit for the first three months of 2014 decreased 21 percent compared to the corresponding period in the prior year mostly due to the decline in volume in the mining and metals business line noted above. Segment profit margin increased to 6.0 percent for the three months ended March 31, 2014 compared to 4.1 percent for the three months ended March 31, 2013, principally driven by improved margin performance in the current year first quarter by the mining and metals business line as the result of a number of favorable project closeouts, as well as the progress toward completion of a domestic infrastructure road project. The prior year period included the benefit of the successful completion of a toll road project in Texas and the achievement of certain milestones for a domestic bridge project. None of the previously mentioned factors driving the segment profit margin improvement were individually significant.

New awards in the Industrial & Infrastructure segment for the three months ended March 31, 2014 were \$924 million compared to \$2.2 billion for the first quarter of 2013. New awards for the current quarter were primarily in the mining and metals and industrial services business lines. New awards in the first quarter of 2013 were driven by the infrastructure business line and included the Tappan Zee Bridge project in New York and a road project in Texas.

Backlog decreased to \$9.9 billion as of March 31, 2014 compared to \$16.0 billion as of March 31, 2013. This decline was due to the work off of backlog outpacing the reduced new award activity in the mining and metals business line and the cancellation of a mining project during the fourth quarter of 2013 which removed \$1.8 billion from backlog. The mining and metals business line has experienced the deferral of major capital investment decisions by some mining customers due to softening commodity demand, project cost escalation and project-specific circumstances. The timing of when capital investment by these mining customers could resume is uncertain.

Total assets in the Industrial & Infrastructure segment were \$842 million as of March 31, 2014 compared to \$910 million as of December 31, 2013.

Government

Revenue and segment profit for the Government segment are summarized as follows:

(in millions)	Three Months Ended	
	2014	March 31, 2013
Revenue	\$ 593.2	\$ 751.2
Segment profit	12.5	41.3

Revenue for the three months ended March 31, 2014 decreased 21 percent compared to the three months ended March 31, 2013. The decrease was due to a reduction in project execution activities for LOGCAP IV for the United States Army in Afghanistan.

Segment profit decreased 70 percent for the three months ended March 31, 2014 compared to the same period in the prior year. The majority of the decline was due to the lower volume of work on LOGCAP IV and the positive impact in the first quarter of 2013 resulting from successful negotiations for the close-out of certain prior year indirect rates. Segment profit margin for the first quarter of 2014 and 2013 was 2.1 percent and 5.5 percent, respectively. This decline was due to the factors noted above impacting revenue and segment profit.

Table of Contents

New awards were \$748 million during the three months ended March 31, 2014 compared to \$756 million for the same period in the prior year. Current quarter activity included a five year contract to maintain the United States Strategic Petroleum Reserve. The first quarter of 2013 included incremental funding for LOGCAP IV which did not occur in the current year period due to the timing of task order releases.

Backlog as of March 31, 2014 increased to \$2.6 billion compared to \$964 million as of March 31, 2013. This increase was due to the new award for the Strategic Petroleum Reserve and the inclusion in backlog of the unfunded portion of multi-year government contract awards which the company began reporting in its backlog as of December 31, 2013 to be more comparable to industry practice. Total backlog included \$1.6 billion of unfunded government contracts as of March 31, 2014.

Total assets in the Government segment were \$522 million as of March 31, 2014 compared to \$581 million as of December 31, 2013.

Global Services

Revenue and segment profit for the Global Services segment are summarized as follows:

(in millions)	2014	Three Months Ended March 31,	2013
Revenue	\$	142.7	\$ 149.9
Segment profit		18.8	27.7

Revenue decreased five percent for the three months ended March 31, 2014 compared to the same period in 2013, primarily due to the equipment business line's reduced volume of activities in Africa.

Segment profit and segment profit margin declined significantly for the first three months of 2014 compared to the first three months of 2013, principally as the result of reduced contributions from the equipment business line in Africa and Latin America.

The equipment, temporary staffing and supply chain solutions business lines do not report backlog or new awards.

Total assets in the Global Services segment were \$781 million as of March 31, 2014 compared to \$759 million as of December 31, 2013.

Power

Revenue and segment profit (loss) for the Power segment are summarized as follows:

(in millions)	Three Months Ended	
	2014	March 31, 2013
Revenue	\$ 250.9	\$ 383.0
Segment profit (loss)	(1.4)	(6.8)

Revenue for the three months ended March 31, 2014 decreased 34 percent compared to the three months ended March 31, 2013 principally due to a decline in project execution activities on two solar power projects in the western United States and a gas-fired power plant in Texas that are all progressing towards completion.

Segment profit and segment profit margin for the first quarter of 2014 improved compared to the first three months of 2013 primarily due to the net overall improved performance of the segment's projects, none of which was individually significant. Both the 2014 and 2013 periods were impacted by expenses associated with the company's continued investment in NuScale, a small modular nuclear reactor technology company, in which the company acquired a majority interest in late 2011. The NuScale expenses for the first quarter of 2014 and 2013 were \$13 million and \$15 million, respectively. The operations of NuScale are primarily for research and development activities. Although part of the Power segment, these activities could provide future benefits to both commercial and government clients.

Table of Contents

Although there has been a recent increase in bidding and proposal activity, the Power segment continues to be impacted by relatively weak demand for new power generation. Market segments with the most likely near term opportunities include gas-fired combined cycle generation, renewable energy and air emissions compliance projects for existing coal-fired power plants. New awards in the first quarter of 2014 were \$166 million compared to \$448 million in the first quarter of 2013. Backlog was \$1.9 billion as of both March 31, 2014 and 2013.

Total assets in the Power segment were \$142 million as of March 31, 2014 and \$155 million as of December 31, 2013.

Other

Corporate general and administrative expense for the three months ended March 31, 2014 was \$38 million compared to \$33 million for the three months ended March 31, 2013. The increase for the current quarter was primarily attributable to higher compensation costs. Net interest expense was \$3 million for both the three months ended March 31, 2014 and 2013. Income tax expense for the three months ended March 31, 2014 and 2013 is discussed above under Results of Operations.

RECENT ACCOUNTING PRONOUNCEMENTS

See Note 2 of the Notes to Condensed Consolidated Financial Statements.

LITIGATION AND MATTERS IN DISPUTE RESOLUTION

See Note 13 of the Notes to Condensed Consolidated Financial Statements.

LIQUIDITY AND FINANCIAL CONDITION

Liquidity is provided by available cash and cash equivalents and marketable securities, cash generated from operations, credit facilities and access to capital markets. The company has committed and uncommitted lines of credit totaling \$4.7 billion, which may be used for revolving loans, letters of credit and/or general purposes. The company believes that for at least the next 12 months, cash generated from operations, along with its unused credit capacity of \$3.6 billion and substantial cash position, is sufficient to support operating requirements. However, the company regularly reviews its sources and uses of liquidity and may pursue opportunities to increase its liquidity position. The company's conservative financial strategy and consistent performance have earned it strong credit ratings, resulting in continued access to the capital markets. As of March 31, 2014, the company was in compliance with all its covenants related to its debt agreements. The company's total debt to total capitalization (debt-to-capital) ratio as of March 31, 2014 was 12.5 percent compared to 12.3 percent as of December 31, 2013.

Cash Flows

Cash and cash equivalents were \$2.1 billion as of March 31, 2014 compared to \$2.3 billion as of December 31, 2013. Cash and cash equivalents combined with current and noncurrent marketable securities were \$2.6 billion as of March 31, 2014 and \$2.7 billion as of December 31, 2013. Cash and cash equivalents are held in numerous accounts throughout the world to fund the company's global project execution activities. As of both March 31, 2014 and December 31, 2013, non-U.S. cash and cash equivalents amounted to \$1.1 billion. Non-U.S. cash and cash equivalents exclude deposits of U.S. legal entities that are either swept into overnight, offshore accounts or invested in short-term, offshore time deposits, for which there is unrestricted access. The company did not consider any cash to be permanently reinvested overseas as of March 31, 2014 and December 31, 2013 and, as a result, has accrued the U.S. deferred tax liability on foreign earnings, as appropriate.

Operating Activities

Cash flows from operating activities result primarily from earnings sources and are affected by changes in operating assets and liabilities which consist primarily of working capital balances. Working capital levels vary from period to period and are primarily affected by the company's volume of work. These levels are also impacted by the mix, stage of completion and commercial terms of engineering and construction projects, as well as the company's execution of its projects within budget. Working capital requirements also vary by project and relate to clients in various industries and locations throughout the world. Most contracts require payments as the projects progress. The company evaluates the counterparty credit risk of third parties as part of its project risk review process and in determining the appropriate level of reserves. The company maintains adequate reserves for potential credit losses and generally such losses have been minimal and within management's estimates. Additionally, certain projects receive advance payments from clients. A normal trend for these projects is to have higher cash balances during the initial phases of execution which then level out toward the end of the construction phase. As a result, the company's cash position is reduced as customer advances are worked off, unless they are replaced by advances on other

Table of Contents

projects. The company maintains cash reserves and borrowing facilities to provide additional working capital in the event that a project's net operating cash outflows exceed its available cash balances.

During the three months ended March 31, 2014, working capital increased primarily due to a decrease in accounts payable and accrued salaries, wages and benefits partially offset by a decrease in accounts receivable. Significant drivers of these fluctuations were:

- A decrease in accounts payable in the Industrial & Infrastructure segment. The lower accounts payable balance as of the end of the first quarter of 2014 resulted primarily from normal invoicing and payment activities associated with numerous projects.
- A decrease in accrued salaries, wages and benefits resulting primarily from the first quarter payment of incentive compensation from the prior year.
- Decreases in accounts receivable in the Oil & Gas and Industrial & Infrastructure segments. The lower accounts receivable balance in 2014 resulted primarily from normal billing and collection activities. A significant contributor to the decrease in accounts receivable in the Oil & Gas segment was the coal bed methane gas project in Australia. The decrease in accounts receivable in the Industrial & Infrastructure segment primarily resulted from numerous projects in the mining and metals business line.

During the three months ended March 31, 2013, working capital increased primarily due to an increase in accounts receivable in the Government segment partially offset by an increase in accounts payable in the Oil & Gas segment. The higher accounts receivable balance resulted primarily from normal billing activities associated with the LOGCAP IV project for the United States Army and was not indicative of any significant collection or liquidity issue. The higher accounts payable balance resulted primarily from normal invoicing and payment activities associated with the coal bed methane gas project in Australia. The contract work in progress balance as of March 31, 2013 remained consistent with the balance as of December 31, 2012. However, a decrease in contract work in progress in the Government segment, which resulted primarily from a combination of billing activities and a reduction in project execution activities associated with the LOGCAP IV project, was substantially offset by an increase in contract work in progress in the Oil & Gas segment, which resulted from increased project execution activities for the coal bed methane gas project in Australia.

Cash provided by operating activities was \$187 million for the three months ended March 31, 2014 compared to cash utilized by operating activities of \$22 million for the corresponding period of the prior year. The period-over-period improvement in cash flows from operating activities was primarily attributable to a significantly smaller net increase in working capital when comparing the two periods, with the largest contributor being a decrease in accounts receivable for the LOGCAP IV project in the Government segment.

The company contributed approximately \$10 million into its defined benefit pension plans during the three months ended March 31, 2014 compared to \$7 million during the corresponding period of the prior year. The company expects to fund approximately \$30 million to \$60 million during 2014, which is expected to be in excess of the minimum funding required.

During 2013, NuScale received notification from the U.S. Department of Energy (DOE) that it is one of two companies that have qualified to receive matching funding under the DOE s Small Modular Reactor Licensing Technical Support program. NuScale has been working with the DOE to negotiate the terms of the multi-year funding agreement.

Investing Activities

Cash utilized by investing activities amounted to \$94 million and \$52 million for the three months ended March 31, 2014 and 2013, respectively. The primary investing activities included purchases, sales and maturities of marketable securities, capital expenditures, disposals of property, plant and equipment, business acquisitions and investments in partnerships and joint ventures. Investing activities during the first quarter of 2013 also included the consolidation of a VIE that had previously been accounted for using the proportionate consolidation method in which cash for this VIE was not required to be consolidated.

The company holds cash in bank deposits and marketable securities which are governed by the company s investment policy. This policy focuses on, in order of priority, the preservation of capital, maintenance of liquidity and maximization of yield. These investments include money market funds which invest in U.S. Government-related securities, bank deposits placed with highly-rated financial institutions, repurchase agreements that are fully collateralized by U.S. Government-related securities,

Table of Contents

high-grade commercial paper and high quality short-term and medium-term fixed income securities. During the three months ended March 31, 2014 and 2013, purchases of marketable securities exceeded proceeds from sales and maturities of such securities by \$46 million and \$25 million, respectively. The company held combined current and noncurrent marketable securities of \$506 million and \$461 million as of March 31, 2014 and December 31, 2013, respectively.

Capital expenditures of \$67 million and \$57 million for the three months ended March 31, 2014 and 2013, respectively, primarily related to construction equipment associated with equipment operations in the Global Services segment, as well as investments in information technology and refurbishment of facilities. Proceeds from the disposal of property, plant and equipment of \$25 million and \$16 million during the first quarter of 2014 and 2013, respectively, primarily related to the disposal of construction equipment associated with the equipment operations in the Global Services segment.

During the first quarter of 2013, the company paid \$8 million to acquire an Australian-based company that specializes in fabrication and pressure welding. The company continues to make investments in partnerships or joint ventures primarily for the execution of single contracts or projects. Investments in unconsolidated partnerships and joint ventures were \$5 million and \$7 million during the three months ended March 31, 2014 and 2013, respectively.

Financing Activities

Cash utilized by financing activities during the three months ended March 31, 2014 and 2013 of \$225 million and \$43 million, respectively, included company stock repurchases, company dividend payments to stockholders, repayments of debt and distributions paid to holders of noncontrolling interests.

Cash flows from financing activities included the repurchase and cancellation of 2,461,800 shares of company's common stock for \$192 million in the first quarter of 2014 under its stock repurchase program.

Quarterly cash dividends are typically paid during the month following the quarter in which they are declared. Therefore, dividends declared in the fourth quarter of 2013 were paid in the first quarter of 2014. However, dividends declared in the fourth quarter of 2012 were paid in December 2012. Quarterly cash dividends of \$0.21 per share and \$0.16 per share were declared in the first quarter of 2014 and 2013, respectively. The payment and level of future cash dividends is subject to the discretion of the company's Board of Directors.

In September 2011, the company issued \$500 million of 3.375% Senior Notes (the 2011 Notes) due September 15, 2021 and received proceeds of \$492 million, net of underwriting discounts and debt issuance costs. Interest on the 2011 Notes is payable semi-annually on March 15 and September 15 of each year, and began on March 15, 2012. The company may, at any time, redeem the 2011 Notes at a redemption price equal to 100 percent of the principal amount, plus a make whole premium described in the indenture. Additionally, if a change of control triggering event occurs, as defined by the terms of the indenture, the company will be required to offer to purchase the 2011 Notes at a purchase price equal to 101 percent of their principal amount, plus accrued and unpaid interest, if any, to the date of purchase. The company is generally not limited under the indenture governing the 2011 Notes in its ability to incur additional indebtedness provided the company is in compliance with certain restrictive covenants, including restrictions on liens and restrictions on sale and leaseback transactions. These covenants are not expected to impact the company's liquidity or capital resources.

In February 2004, the company issued \$330 million of 1.5% Convertible Senior Notes (the 2004 Notes) due February 15, 2024 and received proceeds of \$323 million, net of underwriting discounts. Proceeds from the 2004 Notes were used to pay off the then-outstanding commercial paper and \$100 million was used to obtain ownership of engineering and corporate office facilities in California through payoff of the lease financing. In December 2004, the company irrevocably elected to pay the principal amount of the 2004 Notes in cash. The 2004 Notes are convertible if a specified trading price of the company s common stock (the trigger price) is achieved and maintained for a specified period. The trigger price condition was satisfied during the fourth quarter of 2013 and first quarter of 2014 and the 2004 Notes were therefore classified as short-term debt as of December 31, 2013 and March 31, 2014, respectively. The company does not know the timing or principal amount of the remaining 2004 Notes that may be presented for conversion by the holders in the future. Additionally, the 2004 Notes are currently redeemable at the option of the company, in whole or in part, at 100 percent of the principal amount plus accrued and unpaid interest. Available cash balances will be used to satisfy any principal and interest payments. Shares of the company stock will be issued to satisfy any appreciation between the conversion price and the market price on the date of conversion.

In the first quarter of 2013, the company redeemed its 5.625% Municipal Bonds for \$18 million, or 100% of their principal amount, and also paid \$9 million on the remaining balances of various notes payable that were assumed in connection with the 2012 acquisition of an equipment company.

Table of Contents

Distributions paid to holders of noncontrolling interests represent cash outflows to partners of consolidated partnerships or joint ventures created primarily for the execution of single contracts or projects. Distributions paid were \$16 million and \$18 million during the three months ended March 31, 2014 and 2013, respectively. Distributions in 2014 and 2013 primarily related to mining joint venture projects in Argentina and Australia, respectively.

Effect of Exchange Rate Changes on Cash

Unrealized translation gains and losses resulting from changes in functional currency exchange rates are reflected in the cumulative translation component of accumulated other comprehensive loss. During the three months ended March 31, 2014 and March 31, 2013, most major foreign currencies weakened against the U.S. dollar. As a result, the company had unrealized translation losses related to cash held by foreign subsidiaries of \$9 million and \$23 million in 2014 and 2013, respectively. The cash held in foreign currencies will primarily be used for project-related expenditures in those currencies, and therefore the company's exposure to exchange gains and losses is generally mitigated.

Off-Balance Sheet Arrangements

Guarantees and Commitments

As of March 31, 2014, the company had a combination of committed and uncommitted lines of credit that totaled \$4.7 billion. These lines may be used for revolving loans, letters of credit and/or general purposes. The committed lines of credit consist of a \$1.8 billion Revolving Loan and Letter of Credit Facility ("Credit Facility") that matures in 2017 and a \$1.2 billion Revolving Performance Letter of Credit Facility that matures in 2015. Each of these facilities may be increased up to an additional \$500 million subject to certain conditions, and contain customary financial and restrictive covenants, including a maximum ratio of consolidated debt to tangible net worth of one-to-one and a cap on the aggregate amount of debt of \$600 million for the company's subsidiaries. Borrowings on the Credit Facility bear interest at rates based on the London Interbank Offered Rate ("LIBOR") or an alternative base rate, plus an applicable borrowing margin.

Letters of credit are provided in the ordinary course of business primarily to indemnify the company's clients if the company fails to perform its obligations under its contracts. As of March 31, 2014, letters of credit and borrowings under credit facilities totaling \$1.1 billion were outstanding under these committed and uncommitted lines of credit. As an alternative to letters of credit, surety bonds are used as a form of credit enhancement.

In the ordinary course of business, the company enters into various agreements providing performance assurances and guarantees to clients on behalf of certain consolidated and unconsolidated partnerships, joint ventures and other jointly executed contracts. These agreements are entered into primarily to support the project execution commitments of these entities. The performance guarantees have various expiration dates ranging from mechanical completion of the facilities being constructed to a period extending beyond contract completion in certain circumstances. The maximum potential amount of future payments that the company could be required to make under outstanding performance guarantees, which represents the remaining cost of work to be performed by or on behalf of third parties under engineering and construction contracts, was estimated to be \$13.6 billion as of March 31, 2014. Amounts that may be required to be paid in excess of estimated cost to complete contracts in progress are not estimable. For cost reimbursable contracts, amounts that may become payable pursuant to guarantee provisions are normally recoverable from the client for work performed under the contract. For lump-sum or fixed-price contracts, the performance guarantee amount is

the cost to complete the contracted work less amounts remaining to be billed to the client under the contract. Remaining billable amounts could be greater or less than the cost to complete. In those cases where costs exceed the remaining amounts payable under the contract, the company may have recourse to third parties, such as owners, co-venturers, subcontractors or vendors for claims. The company assessed its performance guarantee obligation as of March 31, 2014 and December 31, 2013 in accordance with ASC 460, Guarantees and the carrying value of the liability was not material.

Financial guarantees, made in the ordinary course of business in certain limited circumstances, are entered into with financial institutions and other credit grantors and generally obligate the company to make payment in the event of a default by the borrower. These arrangements may require the borrower to pledge collateral to support the fulfillment of the borrower's obligation.

Table of Contents

Variable Interest Entities

In the normal course of business, the company forms partnerships or joint ventures primarily for the execution of single contracts or projects. The company evaluates each partnership and joint venture to determine whether the entity is a VIE. If the entity is determined to be a VIE, the company assesses whether it is the primary beneficiary and needs to consolidate the entity.

For further discussion of the company's VIEs, see Note 15 to the Condensed Consolidated Financial Statements.

Item 3. Quantitative and Qualitative Disclosures about Market Risk

There have been no material changes to market risk in the first quarter of 2014. Accordingly, the disclosures provided in the Annual Report on Form 10-K for the year ended December 31, 2013 remain current.

Item 4. Controls and Procedures

Evaluation of Disclosure Controls and Procedures

Based on their evaluation as of the end of the period covered by this report, our principal executive officer and principal financial officer have concluded that our disclosure controls and procedures (as defined in Rules 13a-15(e) or 15d-15(e) of the Exchange Act) are effective, based upon an evaluation of those controls and procedures required by paragraph (b) of Rule 13a-15 or Rule 15d-15 of the Exchange Act.

Changes in Internal Control over Financial Reporting

There were no changes to our internal control over financial reporting that occurred during the period covered by this report that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

Table of Contents**PART II: OTHER INFORMATION****Item 1. Legal Proceedings**

Fluor and its subsidiaries, as part of their normal business activities, are parties to a number of legal proceedings and other matters in various stages of development. Management periodically assesses our liabilities and contingencies in connection with these matters based upon the latest information available. We disclose material pending legal proceedings pursuant to Securities and Exchange Commission rules and other pending matters as we may determine to be appropriate.

For information on matters in dispute, see Note 13 to the Consolidated Financial Statements included in the company's Annual Report on Form 10-K for the year ended December 31, 2013 as filed with the Securities and Exchange Commission on February 18, 2014, and Note 13 to the Condensed Consolidated Financial Statements under Part I, Item 1 of this Quarterly Report on Form 10-Q.

Item 1A. Risk Factors

There have been no material changes from our risk factors as disclosed in our Annual Report on Form 10-K for the year ended December 31, 2013.

Item 2. Unregistered Sales of Equity Securities and Use of Proceeds

(c) The following table provides information about purchases by the company during the quarter ended March 31, 2014 of equity securities that are registered by the company pursuant to Section 12 of the Exchange Act.

Issuer Purchases of Equity Securities

Period	Total Number of Shares Purchased(1)	Average Price Paid per Share	Total Number of Shares Purchased as Part of Publicly Announced Plans or Programs	Maximum Number of Shares that May Yet Be Purchased under the Plans or Program (2)
January 1, 2014 - January 31, 2014	762,700	\$ 79.60	762,700	8,486,559
February 1, 2014 - February 28, 2014	838,686	77.65	822,100	13,664,459

Edgar Filing: FLUOR CORP - Form 10-Q

March 1, 2014	March 31, 2014	877,103	77.16	877,000	12,787,459
Total		2,478,489	\$ 78.07	2,461,800	

(1) Consists of 2,461,800 shares of company stock repurchased and canceled by the company under its stock repurchase program for total consideration of \$192,251,733 and 16,689 shares cancelled as payment for statutory withholding taxes upon the vesting of restricted stock issued pursuant to equity based employee benefit plans.

(2) On February 6, 2013, the Board of Directors approved an increase of 8,000,000 shares to the share repurchase program announced on November 3, 2011, bringing the total number of shares available for repurchase to 11,840,816 shares. As of December 31, 2013, the company had 9,249,259 shares remaining available for repurchase. On February 6, 2014, the Board of Directors approved an increase of 6,000,000 shares to the program. The company continues to repurchase shares from time to time in open market transactions or privately negotiated transactions, including through pre-arranged trading programs, at its discretion, subject to market conditions and other factors and at such time and in amounts that the company deems appropriate.

Item 5. Other Information

In connection with the retirement of Mr. Stephen B. Dobbs, the company's former Group President, Industrial & Infrastructure, on June 6, 2014, the company entered into a retirement and release agreement with Mr. Dobbs on April 28, 2014. Pursuant to the agreement, Mr. Dobbs will be paid \$1,246,000 over a period of one year from his retirement date, and his stock awards will continue to vest in accordance with the terms of the applicable grant agreements. In addition, Mr. Dobbs will be paid for any future assistance to the company, as requested, at an agreed upon rate.
