

## Edgar Filing: PNM RESOURCES - Form 8-K

ALBUQUERQUE, N.M., October 21, 2002 - PNM, a wholly-owned subsidiary of PNM Resources (NYSE:PNM), has entered into an agreement with FPL Energy LLC, a subsidiary of FPL Group, Inc. (NYSE:FPL) to develop a 204-Megawatt wind generation facility in New Mexico.

FPL Energy will build, own and operate the New Mexico Wind Energy Center, consisting of 136 wind-powered turbines on a site in eastern New Mexico. PNM will buy all the power generated under a long-term contract. Construction of the wind energy site is expected to begin later this year. Construction on a facility of this size typically takes six to nine months to complete.

"This project represents a significant step forward in reducing our reliance on fossil fuel generation," said PNM Resources Chairman, President, and Chief Executive Officer Jeff Sterba. "For PNM, the Wind Energy Center will provide a long-term, competitively priced power source both for New Mexicans and for the wholesale power market in the Southwest."

PNM will ask the New Mexico Public Regulation Commission (PRC) to approve a voluntary tariff that will allow PNM retail customers to buy wind-generated electricity for a small monthly premium. Power from the facility not subscribed by PNM jurisdictional customers under the voluntary program will be sold on the wholesale market, either within New Mexico or outside of the state.

Sterba said PNM is buying the clean energy for several reasons: its environmental benefits for New Mexico; interest within the state in renewable energy; prospects for renewable energy on the wholesale energy market; and the strength this particular wind contract will bring to PNM's competitive generation portfolio and its overall fuel mix.

FPL Energy, headquartered in Juno Beach, Fl., is the nation's leader in wind energy, with 26 wind facilities in operation in nine states. The company is also a leading independent producer of clean energy from natural gas, solar energy and hydroelectric power, generating more than 80 percent of its power from clean and renewable sources. It has a total of 91 facilities, with nearly 11,300 megawatts of capacity in operation, under construction or announced development in 22 states. It is a subsidiary of FPL Group, Inc., nationally known as a high quality, efficient and customer-driven organization focused on energy-related products and services, and the parent of Florida Power & Light, Florida's largest electric utility serving four million customer accounts.

PNM is the principal subsidiary of PNM Resources, an energy holding company based in Albuquerque. PNM provides natural gas service to 441,000 gas customers and electric utility service to 378,000 customers in New Mexico. The company also sells power on the wholesale market in the Western U.S. PNM Resources stock is traded primarily on the NYSE under the symbol PNM.
