

Edgar Filing: PUBLIC SERVICE CO OF NEW MEXICO - Form 8-K

ALBUQUERQUE, N.M., January 15, 2004 -PNM Resources (NYSE: PNM) today issued earnings guidance for 2004. The company estimates that ongoing earnings, without any one-time gains or charges, will range between \$1.90 and \$2.15 per share in 2004. This compares to a 2003 earnings range of \$1.80 to \$2.05. PNM plans to announce 2003 fourth quarter and full year earnings on February 10, 2004.

Key Factors for 2004 Results

Key drivers expected to generate earnings growth in 2004 include: improving long-term wholesale electric sales, the implementation of the new gas rates, lower fuel costs, reduced interest costs, growth in gas and electric load and continued efficiencies in managing operating costs. These potential improvements will be partially offset by the impact of the electric rate reduction implemented in September 2003, lower wholesale electric market prices and higher benefits costs in 2004.

"The completion of our gas rate case, strong growth in our long-term contract business and continued progress on cost control in a fixed rate environment are expected to provide a strong base for growth in 2004", said PNM Resources' CEO Jeff Sterba.

Volatility Factors Affecting 2004 Earnings Performance

Earnings variability within the expected range of \$1.90 to \$2.15 for 2004 will be affected by a number of factors, including:

- o Prices and liquidity in the wholesale power market and the company's ability to expand its portfolio of long-term sales contracts in that market.
- o Weather in New Mexico over the course of the year and growth in PNM's retail electric and gas utility in New Mexico.
- o The performance of PNM generating plants and fuel costs for those plants.
- o Management's continued ability to efficiently manage operating costs throughout the company.

These and other significant variables underlying the company's current 2004 earnings forecast are discussed in more detail in the investor section of the PNM website at pnm.com.

PNM Resources is an energy holding company based in Albuquerque, New Mexico. PNM, the principal subsidiary of PNM Resources, serves about 450,000 natural gas customers and 390,000 electric customers in New Mexico. The company also sells power on the wholesale market in the Western U.S. PNM Resources stock is traded primarily on the NYSE under the symbol PNM.
