

AMERICA MOVIL SA DE CV/

Form 6-K

April 24, 2003

America Movil's subscriber base reached 33.2 million subscribers at the end of the first quarter, having increased by 1.6 million clients in the period. This increase reflects the organic growth of America Movil's subsidiaries as well as the incorporation of 237 thousand subscribers of Celcaribe, the Colombian company whose acquisition was completed in February and which has been consolidated in America Movil since then.

Revenues rose by 40.2% year-on-year, to 17.2 billion pesos, driven by service revenues. These exhibited a strong performance in the quarter, as they went up by 8.5%. Practically all of America Movil's subsidiaries registered good service revenue growth in the first quarter.

EBITDA reached 6.5 billion pesos in the period, 59% more than in the first quarter of 2002, on strong service revenues and cost containment. EBITDA represented 37.6% of total revenues.

The company's operating profits stood at 3.7 billion pesos in the period, or 21.6% of revenues, and were up 48.6% from the previous year. America Movil generated a net profit of 3.0 billion pesos, nearly doubling that of a year before. The net profit is equivalent to 0.23 pesos per share or 0.42 dollars per ADR.

In addition to completing the acquisition of Colombian wireless operator Celcaribe in the first quarter, America Movil entered into an agreement to purchase a 95% equity interest in Brazilian wireless company BSE, S.A. which provides services in the Northeastern region of Brazil.

America Movil's debt came down by 2.6 billion pesos in the first quarter. By the end of March, the ratio of net debt to EBITDA (last twelve months) had already been reduced to 1.44 times.

Edgar Filing: AMERICA MOVIL SA DE CV/ - Form 6-K

On February 12th, America Movil closed the acquisition of a 95% interest in Colombian wireless operator Celcaribe. With Celcaribe's operations, which cover the Caribbean region of the country, America Movil has attained nationwide coverage in Colombia. The company's results are being consolidated in America Movil's since the beginning of that month.

On March 5th, America Movil, through its subsidiary Telecom Americas, entered into an agreement with Bell South Corporation and Verbier pursuant to which it will acquire an interest of approximately 95% in Brazilian wireless company BSE, S.A. The transaction, which is subject to various conditions, is expected to close in the second quarter of 2003. BSE operates in the Northeastern region of Brazil, with a population of 29.5 million people. Upon closing of this transaction America Movil's Brazilian footprint will cover an area with a population of 139.5 million inhabitants, approximately 82% of the country's population.

On April 7th, in a meeting of America Movil's shareholders, it was agreed that the company's dividend will be increased from 0.044 pesos per share in 2002 to 0.060 pesos per share this year. In the same meeting a new five billion pesos share-repurchase program was approved; it will begin to be executed once the existing program has been exhausted.

America Movil continued to improve the maturity profile of its debt with the completion of a new five-year syndicated loan in the Mexican bank market and a seven-year bond issue in the Colombian market. The Mexican transaction amounted to 1.75 billion pesos (approximately 165 million dollars) whereas the Colombian bond issue has a face value of 200 billion Colombian pesos (approximately 60 million dollars). By the end of April short term debt will represent 12.4% of the company's total debt, down from 22.1% in December.

Subscribers

America Movil's subscriber base reached 33.2 million by the end of March as the number of subscribers increased by 1.6 million in the first quarter, helped in part by the incorporation of Celcaribe's subscribers (nearly 240 thousand). Proportionate subscribers reached 32.3 million, almost one-third more than a year before.

Edgar Filing: AMERICA MOVIL SA DE CV/ - Form 6-K

Telcel's subscriber base grew by 686 thousand clients in the quarter, to 20.8 million. Telcel contributed over half of America Movil's net subscriber additions in the quarter (not counting the incorporation of Celcaribe's).

Tracfone was the second largest contributor of subscribers in the first quarter, with 244 thousand net additions. Its subscriber base surpassed the 2 million-subscriber mark to reach 2.2 million clients.

Comcel in Colombia, gained 215 thousand subscribers in the period, in addition of those obtained with the purchase of Celcaribe, to finish the quarter with 3.3 million subscribers. In Ecuador 88 thousand subscribers were added in the period leading its subscriber base to exceed one million while in Guatemala 47 thousand subscribers came on board.

In Brazil Telecom Americas' subscriber base reached 5.3 million, with Telet, Americel and Tess contributing 125 thousand new subscribers.

In addition to its wireless clients America Movil had 823 thousand wireline subscribers at the end of March.

America Movil Consolidated Results

Strong service revenues, seasonally weaker equipment sales and good containment of costs led to a strong rise in America Movil's EBITDA in the first quarter of the year and helped bring about a solid increase in net income even after allowing for greater depreciation and amortization charges and a reserve for new taxes on service revenues in Mexico.

Service revenues soared by 8.5% sequentially and 40.6% annually, to 15.3 billion pesos, driving a 4.3% increase in total revenues quarter-on-quarter and 40.2% year-on-year. With total costs and expenses mostly flat even after the incorporation of a new reserve for taxes on a portion of Telcel's service revenues, EBITDA was up 9.7% in the quarter (59.0% annually), to 6.5 billion pesos. The EBITDA margin reached 37.6%, an improvement of 1.8 percentage points on the previous quarter's and of 4.4 points relative to a year before.

Depreciation and amortization charges were up 23.4% in the quarter, as a consequence of the revaluation of the assets of the Colombian and Brazilian operations that took place last December. The accounting figures in those countries had not corrected for years of inflation and devaluation, which had resulted in misleadingly low values for the assets.

The operating profit came in at 3.7 billion pesos, or 21.6% of revenues, having increased by 48.6% relative to the same period of 2002. Without the new provision for taxes at Telcel the operating profit would have increased by 7.4% in the first quarter in relation to the previous one.

A net comprehensive financing income of 306 million pesos was registered in the quarter, down from the 1.3 billion pesos of the preceding quarter. The difference is mostly attributable to foreign exchange movements, as the foreign exchange gains of the fourth quarter were canceled in the first quarter.

Income and deferred taxes amounted to 913 million pesos in the period, up from 400 million pesos in the fourth quarter and 742 million a year earlier. The increase reflects seasonal factors but also the greater income generated by the company.

Edgar Filing: AMERICA MOVIL SA DE CV/ - Form 6-K

America Movil's net income came in at 3.0 billion pesos in the quarter and was nearly twice as high than the one registered in the first quarter of 2002. It represented 0.23 pesos per share, or 0.42 dollars per ADR.

The company's debt ended the quarter at 45.1 billion pesos, down from 47.7 billion pesos at the end of 2002. This reduction in America Movil's gross debt came about even after the incorporation of Celcaribe's debt (87 million dollars), and resulted among other things from the payment of the amount outstanding (170 million dollars) in connection with the purchase last year of Bell Canada International's interest in Telecom Americas. It is of interest to note that the principal amount of America Movil's debt has come down from 4,847 million dollars-equivalent in August 2002 (after the consolidation of Telecom Americas) to 4,140 million dollars-equivalent at the end of March.

The cash and securities position of America Movil stood at 8.8 billion pesos at the end of March, which implied a level of net debt of 36.3 billion pesos, down 0.7 billion pesos from December (again, after the purchase price including debt of Celcaribe has been taken into account). At the close of the first quarter the cash and securities position of America Movil continued to exceed the level of short term debt, and the ratio of net debt to EBITDA (last twelve months) had again been reduced, to 1.44 times.

Telcel

Telcel managed to post a 5.6% sequential and 37.1% annual increase in EBITDA in the first quarter of 2003 on the back of strong service-revenue growth and in spite of the establishment of a reserve associated with the payment of new taxes on service revenues. The quarter's EBITDA came in at 4.6 billion pesos and represented 40.4% of total revenues, up nearly five percentage points relative to the EBITDA margin observed the year before. In the absence of the reserve for taxes mentioned above, Telcel's EBITDA margin would have reached 42.3% in the first quarter.

Service revenues totaled 10.1 billion pesos in the quarter, up 5.7% sequentially and 21.2% annually; while total revenues were up 20.8% year-on-year, to 11.4 billion pesos. The increase in revenues took place in spite of the reduction by Telcel of the price per minute of airtime in its 100 peso prepaid cards. This measure, effective January 1st, brought about a 20% reduction in the price per minute charged on those cards, which represent the majority of the

prepaid cards it sells in the Mexican market.

Partly as a result of this measure the usage of wireless services continued to increase: prepaid MOU was up 6.3% in the quarter, and helped bring about a 7.1% rise in prepaid ARPU. The latter has trended up for four consecutive quarters.

Operating profits totaled 3.4 billion pesos in the quarter, exceeding by 38.1% those registered a year before. EBITDA and operating profits benefited from the reduction in the churn rate observed in the quarter, to 3.0%. The churn rate was lower than the one seen in the first quarter of 2002 (3.2%).

Telecom Americas

America Movil's Brazilian unit reached a total of 5.3 million clients at the end of the quarter, an increase of 89 thousand subscribers sequentially and 779 thousand annually. During the period, Americel contributed with two thirds of the companies' net additions.

Telecom Americas experienced strong service revenue growth in the quarter which, coupled with seasonally weak equipment sales, brought about a sharp increase in EBITDA. Service revenues totaled 488 million reais in the quarter (140 million dollars), up 6.7% sequentially and 16.0% annually, while total revenues were up 14.5% year-on-year, to 549 million reais (158 million dollars).

Comcel

Comcel's subscriber base reached 3.3 million at the end of March, 16% more than at the end of 2002 and 56.7% higher than in the same month of 2002. The increase in the subscriber base during the quarter, 452 thousand, includes the incorporation of those subscribers obtained with the acquisition of Celcaribe (237 thousand).

Celcaribe's results have been consolidated in Comcel's since the beginning of February. Including them, total revenues of Comcel rose to 318 billion Colombian pesos (108 million dollars) and were up by 12.1% sequentially and nearly 45% annually. Service revenues were up over 50% year-on-year.

EBITDA remained at 104 billion Colombian pesos (35 million dollars), practically unchanged relative to the previous quarter but up 63.7% year on year. Relative to revenues, EBITDA stood at 32.8% in the first quarter, nearly four percentage points more than a year earlier. At 29 billion Colombian pesos (10 million dollars) Comcel's operating profits trebled relative to those registered in the same period of 2002.

Conecel, in Ecuador, registered a 9.5% increase in its subscriber base relative to the prior quarter and 85.1% on an annual basis, surpassing the one million-subscriber mark by the end of the first quarter.

Service revenues rose by 10% sequentially and 52.2% annually, to 35 million dollars. The strong performance of service revenues and the seasonally weak equipment sales resulted in a major jump in EBITDA, to 17 million dollars, up 33.1% on the quarter and almost double the one observed a year before. The EBITDA margin hit 46.2%.

An operating profit of 10 million dollars in the quarter, or 27.7% of revenues, was approximately four times larger than the one corresponding to the first quarter of 2002.

Tracfone

Tracfone displayed the best rate of subscriber growth amongst America Movil's subsidiaries during the first quarter of 2003 (not including the incorporation of Celcaribe's subscribers), to reach 2.2 million clients after net additions of 244 thousand.

Accumulated revenues through March amounted to 125 million dollars and were 39.6% higher than those obtained in the last quarter of 2002. Year-on-year, revenues rose by 14.5%.

The strong subscriber growth brought about an increase in subscriber acquisition costs, which in turn was reflected in an EBITDA loss of 6 million dollars in the quarter and an operating loss of 10 million dollars. Relative to revenues, the EBITDA loss is somewhat less than half the one observed in the first quarter of 2002.
