FARMERS & MERCHANTS BANCORP

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS (Unaudited)

1. SIGNIFICANT ACCOUNTING POLICIES

Farmers & Merchants Bancorp (the Company) was organized March 10, 1999. Primary operations are related to traditional banking activities through its subsidiary Farmers & Merchants Bank of Central California (the Bank) which was established in 1916. The Bank's wholly owned subsidiaries include Farmers & Merchants Investment Corporation and Farmers/Merchants Corp. Farmers & Merchants Investment Corporation has been dormant since 1991. Farmers/Merchants Corp. acts as trustee on deeds of trust originated by the Bank.

The Company's other subsidiaries include F & M Bancorp, Inc. and FMCB Statutory Trust I. F & M Bancorp, Inc. was created in March 2002 to protect the name F & M Bank. During 2002, the Company completed a fictitious name filing in California to begin using the streamlined name, "F & M Bank" as part of a larger effort to enhance the Company's image and build brand name recognition. In December 2003, the Company formed a wholly owned subsidiary, FMCB Statutory Trust I. FMCB Statutory Trust I is a non-consolidated subsidiary per generally accepted accounting principles (GAAP), and was formed for the sole purpose of issuing Trust Preferred Securities. The accounting and reporting policies of the Company conform with accounting principles generally accepted in the United States of America and prevailing practice within the banking industry. The following is a summary of the significant accounting and reporting policies used in preparing the consolidated financial statements.

BASIS OF PRESENTATION

The accompanying consolidated financial statements of the Company have been prepared in accordance with accounting principles generally accepted in the United States of America for financial information and with the instructions to Form 10-Q and Article 10 of Regulation S-X. In the opinion of management, all adjustments (which consist solely of normal recurring accruals) considered necessary for a fair presentation of the results for the interim periods presented have been included. These interim consolidated financial statements should be read in conjunction with the financial statements and related notes contained in the Company's 2005 Annual Report to Shareholders on Form 10-K.

The accompanying consolidated financial statements include the accounts of the Company and the Company's wholly owned subsidiaries, F & M Bancorp, Inc. and the Bank, along with the Bank's wholly owned subsidiaries, Farmers & Merchants Investment Corporation and Farmers/Merchants Corp. Significant inter-company transactions have been eliminated in consolidation. The results of operations for the nine-month period ended September 30, 2006 may not necessarily be indicative of the operating results for the full year 2006.

The preparation of consolidated financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions. These estimates and assumptions affect the reported amounts of assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from these estimates.

Certain amounts in the prior years' financial statements and related footnote disclosures have been reclassified to conform to the current-year presentation. These reclassifications have no effect on previously reported income.

8

CASH AND CASH EQUIVALENTS

For purposes of the Consolidated Statements of Cash Flows, the Company has defined cash and cash equivalents as those amounts included in the balance sheet captions Cash and Due from Banks, Federal Funds Sold and Securities Purchased Under Agreements to Resell. Generally, these transactions are for one-day periods. For these instruments, the carrying amount is a reasonable estimate of fair value.

INVESTMENT SECURITIES

Investment securities are classified at the time of purchase as held-to-maturity if it is management's intent and the Company has the ability to hold the securities until maturity. These securities are carried at cost, adjusted for amortization of premium and accretion of discount using a level yield of interest over the estimated remaining period until maturity. Losses, reflecting a decline in value judged by the Company to be other than temporary, are recognized in the period in which they occur.

Securities are classified as available-for-sale if it is management's intent, at the time of purchase, to hold the securities for an indefinite period of time and/or to use the securities as part of the Company's asset/liability management strategy. These securities are reported at fair value with aggregate unrealized gains or losses excluded from income and included as a separate component of shareholders' equity, net of related income taxes. Fair values are based on quoted market prices or broker/dealer price quotations on a specific identification basis. Gains or losses on the sale of these securities are computed using the specific identification method.

Trading securities, if any, are acquired for short-term appreciation and are recorded in a trading portfolio and are carried at fair value, with unrealized gains and losses recorded in non-interest income.

LOANS

Loans are reported at the principal amount outstanding net of unearned discounts and deferred loan fees. Interest income on loans is accrued daily on the outstanding balances using the simple interest method. Loan origination fees are deferred and recognized over the contractual life of the loan as an adjustment to the yield. Loans are placed on non-accrual status when the collection of principal or interest is in doubt or when they become past due for 90 days or more unless they are both well-secured and in the process of collection. For this purpose a loan is considered well-secured if it is collateralized by property having a net realizable value in excess of the amount of the loan or is guaranteed by a financially capable party. When a loan is placed on non-accrual status, the accrued and unpaid interest receivable is reversed and charged against current income; thereafter, interest income is recognized only as it is collected in cash. Loans placed on a non-accrual status are returned to accrual status when the loans are paid current as to principal and interest and future payments are expected to be made in accordance with the contractual terms of the loan.

A loan is impaired when, based on current information and events, it is probable that the Company will be unable to collect all amounts due according to the contractual terms of the loan agreement. When a loan is impaired, the recorded amount of the loan in the Consolidated Balance Sheets is based on the present value of expected future cash flows discounted at the loan's effective interest rate, or the observable or estimated market price of the loan or on the fair value of the collateral if the loan is collateral dependent. Impaired loans are placed on non-accrual status with income reported accordingly. Cash payments are first applied as a reduction of the principal balance until collection of the remaining principal and interest can be reasonably assured. Thereafter, interest income is recognized as it is collected in cash.

9

ALLOWANCE FOR LOAN LOSSES

As a financial institution which assumes lending and credit risks as a principal element in its business, the Company anticipates that credit losses will be experienced in the normal course of business. Accordingly, the allowance for loan losses is maintained at a level considered adequate by management to provide for losses that are inherent in the portfolio. The allowance is reduced by charge-offs and increased by provisions charged to operating expense and by recoveries on loans previously charged-off. Management employs a systematic methodology for determining the allowance for loan losses. On a quarterly basis, management reviews the credit quality of the loan portfolio and considers many factors in determining the adequacy of the allowance at the balance sheet date.

The factors evaluated in connection with the allowance may include existing general economic and business conditions affecting the key lending areas of the Company, current levels of problem loans and delinquencies, credit quality trends, collateral values, loan volumes and concentrations, seasoning of the loan portfolio, specific industry conditions, recent loss experience, duration of the current business cycle, bank regulatory examination results and findings of the Company's internal credit examiners.

The allowance also incorporates the results of measuring impaired loans as provided in Statement of Financial Accounting Standards (SFAS) No. 114, "Accounting by Creditors for Impairment of a Loan" and SFAS No. 118, "Accounting by Creditors for Impairment of a Loan-Income Recognition and Disclosures." These accounting standards prescribe the measurement methods, income recognition and disclosures related to impaired loans, which are discussed more fully in Note 4 to the Consolidated Financial Statements in the Company's 2005 Annual Report to Shareholders.

While the Company utilizes a systematic methodology in determining its allowance, the allowance is based on estimates, and ultimate losses may vary from current estimates. The estimates are reviewed periodically and, as adjustments become necessary, are reported in earnings in the periods in which they become probable.

PREMISES AND EQUIPMENT

Premises, equipment and leasehold improvements are stated at cost, less accumulated depreciation and amortization. Depreciation is computed principally by the straight line method over the estimated useful lives of the assets. Estimated useful lives of buildings range from 30 to 40 years, and for furniture and equipment from 3 to 8 years. Leasehold improvements are amortized over the lesser of the terms of the respective leases, or their useful lives, which are generally 5 to 10 years. Remodeling and capital improvements are capitalized while maintenance and repairs are charged directly to occupancy expense.

OTHER REAL ESTATE

Other real estate, which is included in other assets, is comprised of properties no longer utilized for business operations and property acquired through foreclosure in satisfaction of indebtedness. These properties are recorded at fair value less estimated selling costs upon acquisition. Revised estimates to the fair value less cost to sell are reported as adjustments to the carrying amount of the asset, provided that such adjusted value is not in excess of the carrying amount at acquisition. Initial losses on properties acquired through full or partial satisfaction of debt are treated as credit losses and charged to the Allowance for Loan Losses at the time of acquisition. Subsequent declines in value from the recorded amounts, routine holding costs, and gains or losses upon disposition, if any, are included in non-interest income or expense as incurred.

INCOME TAXES

The Company uses the liability method of accounting for income taxes. This method results in the recognition of deferred tax assets and liabilities that are reflected at currently enacted income tax rates applicable to the period in which the deferred tax assets or liabilities are expected to be realized or

10

settled. As changes in tax laws or rates are enacted, deferred tax assets and liabilities are adjusted through the provision for income taxes. The deferred provision for income taxes is the result of the net change in the deferred tax asset and deferred tax liability balances during the year. This amount combined with the current taxes payable or refundable results in the income tax expense for the current year.

DIVIDENDS AND EARNINGS PER SHARE

Farmers & Merchants Bancorp common stock is not traded on any exchange. The shares are primarily held by local residents and are not actively traded. No cash dividends were declared during the third quarter of 2006.

Earnings per share amounts are computed by dividing net income by the weighted average number of common shares outstanding for the period. The weighted average number of shares outstanding for the three and nine month periods ended September 30, 2006 were 814,887 and 818,719. The weighted average number of shares outstanding for the three and nine month periods ended September 30, 2005 were 827,012 and 829,976. Prior periods have been restated for stock dividends paid in 2005. No stock dividends have been paid in 2006.

SEGMENT REPORTING

Statement of Financial Accounting Standards No. 131, "Disclosures about Segments of an Enterprise and Related Information" requires that public companies report certain information about operating segments. It also requires that public companies report certain information about their products and services, the geographic areas in which they operate, and their major customers. The Company is a holding company for a community bank which offers a wide array of products and services to its customers. Pursuant to its banking strategy, emphasis is placed on building relationships with its customers, as opposed to building specific lines of business. As a result, the Company is not organized around discernable lines of business and prefers to work as an integrated unit to customize solutions for its customers, with business line emphasis and product offerings changing over time as needs and demands change. Therefore, only one segment is reported.

DERIVATIVE INSTRUMENTS AND HEDGING ACTIVITIES

Statement of Financial Accounting Standards, No. 133, "Accounting for Derivative Instruments and Certain Hedging Activities" as amended by the Statement of Financial Accounting Standards, No. 138, establishes accounting and reporting standards for derivative instruments, including certain derivative instruments embedded in other contracts, and for hedging activities. All derivatives, whether designated in hedging relationships or not, are required to be recorded on the balance sheet at fair value. Changes in the fair value of those derivatives are accounted for depending on the intended use of the derivative and the resulting designation under specified criteria. If the derivative is designated as a fair value hedge, the changes in the fair value of the derivative and of the hedged item attributable to the hedged risk are recognized in earnings. If the derivative is designated as a cash flow hedge, designed to minimize interest rate risk, the effective portions of the change in the fair value of the derivative are recorded in other comprehensive income (loss), net of related income taxes. Ineffective portions of changes in the fair value of cash flow hedges are recognized in earnings.

From time to time the Company utilizes derivative financial instruments such as interest rate caps, floors, swaps and collars. These instruments are purchased and/or sold to reduce the Company's exposure to changing interest rates. The Company marks to market the value of its derivative financial instruments and reflects gain or loss in earnings in the period of change or in other comprehensive income (loss). The Company was not utilizing any derivative instruments during the nine month period ended September 30, 2006.

COMPREHENSIVE INCOME

Statement of Financial Accounting Standards No. 130, "Reporting Comprehensive Income" establishes standards for the reporting and display of comprehensive income and its components in the financial statements. Other comprehensive income refers to revenues, expenses, gains and losses that generally accepted accounting principles recognize as changes in value to an enterprise but are excluded from net income. For the Company, comprehensive income (loss) includes net income and changes in fair value of its available-for-sale investment securities, minimum pension liability adjustments and cash flow hedges.

2. RECENT ACCOUNTING DEVELOPMENTS

In June 2006, the FASB issued Financial Accounting Standards Interpretation No. 48 (FIN 48), "Accounting for Uncertainty in Income Taxes." FIN 48 clarifies the accounting for uncertainty in income taxes recognized in an enterprise's financial statements in accordance with FASB Statement No. 109, "Accounting for Income Taxes." FIN 48 prescribes a recognition threshold and measurement attributable for the financial statement recognition and measurement of a tax position taken or expected to be taken in a tax return. FIN 48 also provides guidance on derecognition, classification, interest and penalties, accounting in interim periods, disclosures and transitions. FIN 48 is effective for fiscal years beginning after December 15, 2006. Management is in the process of evaluating the impact the adoption of FIN 48 will have on the results of operations.

In September 2006, the FASB issued Statement No. 157 (SFAS 157), "Fair Value Measurements." SFAS 157 defines fair value, establishes a framework for measuring fair value and expands disclosures about fair value measurements. SFAS 157 applies whenever other standards require (or permit) assets or liabilities to be measured at fair value but does not expand the use of fair value in any new circumstances. In this standard, the FASB clarifies the principle that fair value should be based on the assumptions market participants would use when pricing the asset or liability. In support of this principle, SFAS 157 establishes a fair value hierarchy that prioritizes the information used to develop those assumptions. The provisions of SFAS 157 are effective for financial statements issued for fiscal years beginning after November 15, 2007 and interim periods within those fiscal years. Management is in the process of evaluating the impact the adoption of SFAS 157 will have on the results of operations.

In September 2006, the FASB ratified the consensuses reached by the Emerging Issues Task Force (the Task Force) on Issue No. 06-5 (EITF 06-5) "Accounting for the Purchases of Life Insurance - Determining the Amount that Could be Realized in Accordance with FASB Technical Bulletin No.85-4" (FTB 85-4). FTB 85-4 indicates that the amount of the asset included in the balance sheet for life insurance contracts within its scope should be "the amount that could be realized under the insurance contract as of the date of the statement of financial position." Questions arose in applying the guidance in FTB 85-4 to whether "the amount that could be realized" should consider 1) any additional amounts included in the contractual terms of the insurance policy other than the cash surrender value and 2) the contractual ability to surrender all of the individual-life policies (or certificates in a group policy) at the same time. EITF 06-5 determined that "the amount that could be realized" should 1) consider any additional amounts included in the contractual terms of the policy and 2) assume the surrender of an individual-life by individual-life policy (or certificate by certificate in a group policy. Any amount that is ultimately realized by the policy holder upon the assumed surrender of the final policy (or final certificate in a group policy) shall be included in the "amount that could be realized." An entity should apply the provisions of EITF 06-5 through either a change in accounting principle through a cumulative-effect adjustment to retained earnings as of the beginning of the year of adoption or a change in accounting principle through retrospective application to all prior periods. The provisions of EITF 06-5 are effective for fiscal years beginning after December 15, 2006. Management is in the process of evaluating the impact the adoption of EITF 06-5 will have on the results of operations.

In September 2006, the FASB ratified the consensuses reached by the Task Force on Issue No. 06-4 (EITF 06-4) "Accounting for Deferred Compensation and Postretirement Benefit Aspects of Endorsement Split-Dollar Life Insurance Arrangements." A question arose when an employer enters into an endorsement split-dollar life insurance arrangement related to whether the employer should recognize a liability for the future benefits or premiums to be provided to the employee. EITF 06-4 indicates that an employer should recognize a liability for future benefits and that a liability for the benefit obligation has not been settled through the purchase of an endorsement type policy. An entity should apply the provisions of EITF 06-4 either through a change in accounting principle through a cumulative-effect adjustment to retained earnings as of the beginning of the year of adoption or a change in accounting principle through retrospective application to all prior periods. The provisions of EITF 06-4 are effective for fiscal years beginning after December 15, 2007. Management is in the process of evaluating the impact the adoption of EITF 06-4 will have on the results of operations.

In September 2006, the SEC issued Staff Accounting Bulletin No. 108 ("SAB 108"), "Considering the Effects of Prior Year Misstatements When Quantifying Misstatements in Current Year Financial Statements", providing guidance on quantifying financial statement misstatement and implementation (e.g., restatement or cumulative effect to assets, liabilities and retained earnings) when first applying this guidance. SAB 108 is effective for fiscal years ending after November 15, 2006. The Company does not believe the guidance provided by SAB 108 will have a material effect on the Company's financial condition or results of operations.

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

The following is management's discussion and analysis of the major factors that influenced our financial performance for the three and nine months ended September 30, 2006. This analysis should be read in conjunction with our 2005 Annual Report, filed as exhibit 13 on Form 10-K, and with the unaudited financial statements and notes as set forth in this report.

FORWARD-LOOKING STATEMENTS

This quarterly report contains various forward-looking statements, usually containing the words "estimate," "project," "expect," "objective," "goal," or similar expressions and includes assumptions concerning the Company's operations, future results, and prospects. These forward-looking statements are based upon current expectations and are subject to risk and uncertainties. In connection with the "safe-harbor" provisions of the private Securities Litigation Reform Act, the Company provides the following cautionary statement identifying important factors which could cause the actual results of events to differ materially from those set forth in or implied by the forward-looking statements and related assumptions.

Such factors include the following: (i) the effect of changing regional and national economic conditions; (ii) significant changes in interest rates and prepayment speeds; (iii) credit risks of commercial, agricultural, real estate, consumer, and other lending activities; (iv) changes in federal and state banking laws or regulations; (v) competitive pressure in the banking industry; (vi) changes in governmental fiscal or monetary policies; (vii) uncertainty regarding the economic outlook resulting from the continuing war on terrorism, as well as actions taken or to be taken by the U.S. or other governments as a result of further acts or threats of terrorism; and (viii) other factors discussed in the Company's Form 10-K filing for the year-ended December 31, 2005 with the Securities and Exchange Commission.

Readers are cautioned not to place undue reliance on these forward-looking statements which speak only as of the date hereof. The Company undertakes no obligation to update any forward-looking statements to reflect events or circumstances arising after the date on which they are made.

INTRODUCTION

Farmers & Merchants Bancorp, or the Company, is a bank holding company formed March 10, 1999. Its subsidiary, Farmers & Merchants Bank of Central California, or the Bank, is a California, state-chartered bank formed in 1916. The Bank serves the northern Central Valley of California with 20 banking offices. The service area includes Sacramento, San Joaquin, Stanislaus and Merced Counties with branches in Sacramento, Elk Grove, Galt, Lodi, Stockton, Linden, Modesto, Turlock and Hilmar.

Substantially all of the Company's business activities are conducted within its market area.

As a bank holding company, the Company is subject to regulation and examination by the Board of Governors of the Federal Reserve System ("FRB"). Since the Bank is a California, state-chartered, non-FED member bank, it is subject to the regulation and examination of the California Department of Financial Institutions and the Federal Deposit Insurance Corporation.

OVERVIEW

The Company's primary service area encompasses the northern Central Valley of California, a region that is impacted by the seasonal needs of the agricultural industry. Accordingly, discussion of the Company's Financial Condition and Results of Operations is influenced by the seasonal banking needs of its agricultural customers (e.g., during the spring and summer customers draw down their deposit balances and increase loan borrowing to fund the purchase of equipment and planting of crops. Correspondingly, deposit balances are replenished and loans repaid in fall and winter as crops are harvested and sold).

For the three and nine months ended September 30, 2006, Farmers & Merchants Bancorp reported net income of $5,333,000 and $15,364,000, earnings per share of $6.54 and $18.77 and return on average assets of 1.54% and 1.51%, respectively. Return on average shareholders' equity was 16.81% and 16.23% for the three and nine months ended September 30, 2006.

For the three and nine months ended September 30, 2005, Farmers & Merchants Bancorp reported net income of $4,747,000 and $13,767,000, earnings per share of $5.74 and $16.59 and return on average assets of 1.50% and 1.47%, respectively. Return on average shareholders' equity was 15.73% and 15.31% for the three and nine months ended September 30, 2005.

The Company's improved earnings performance in the first nine months of 2006 when compared to the same period last year was due to a combination of (1) growth in earning assets; and (2) improvement in the net interest margin due to rising interest rates.

The following is a summary of the financial results for the nine-month period ended September 30, 2006 compared to September 30, 2005.

- Net income increased 11.6% to $15.4 million from $13.8 million.

- Earnings per share increased 13.1% to $18.77 from $16.59.

- Net interest income increased 12.2% to $47.9 million from $42.7 million.

- Net interest margin on a tax-equivalent basis increased 16 basis points from 5.07% to 5.23%.

- Total assets increased 9.5% to $1.4 billion.

- Gross loans increased 9.6% to $1.0 billion.

- Total deposits increased 6.5% to $1.1 billion.

RESULTS OF OPERATIONS

NET INTEREST INCOME / NET INTEREST MARGIN

The tables on the following pages reflect the Company's average balance sheets and volume and rate analysis for the three and nine month periods ending September 30, 2006 and 2005.

The average yields on earning assets and average rates paid on interest-bearing liabilities have been computed on an annualized basis for purposes of comparability with full year data. Average balance amounts for assets and liabilities are the computed average of daily balances.

Net interest income is the amount by which the interest and fees on loans and other interest earning assets exceed the interest paid on interest bearing sources of funds. For the purpose of analysis, the interest earned on tax-exempt investments and municipal loans is adjusted to an amount comparable to interest subject to normal income taxes. This adjustment is referred to as "taxable equivalent" and is noted wherever applicable.

The Volume and Rate Analysis of Net Interest Income summarizes the changes in interest income and interest expense based on changes in average asset and liability balances (volume) and changes in average rates (rate). For each category of interest-earning assets and interest-bearing liabilities, information is provided with respect to changes attributable to: (1) changes in volume (change in volume multiplied by initial rate); (2) changes in rate (change in rate multiplied by initial volume); and (3) changes in rate/volume (allocated in proportion to the respective volume and rate components).

The Company's earning assets and rate sensitive liabilities are subject to repricing at different times, which exposes the Company to income fluctuations when interest rates change. In order to minimize income fluctuations, the Company attempts to match asset and liability maturities. However, some maturity mismatch is inherent in the asset and liability mix. (See Item 3. "Quantitative and Qualitative Disclosures about Market Risk: Market Risk - Interest Rate Risk").
