TFS FINANCIAL CORPORATION AND SUBSIDIARIES  
NOTES TO UNAUDITED INTERIM CONSOLIDATED FINANCIAL STATEMENTS  
(Dollars in thousands unless otherwise indicated)

1. BASIS OF PRESENTATION

TFS Financial Corporation, a federally chartered stock holding company, conducts its principal activities through its wholly owned subsidiaries. The principal line of business of the Company is retail consumer banking, including mortgage lending, deposit gathering, and, to a much lesser extent other financial services. On March 31, 2014, approximately 74% of the Company's outstanding shares were owned by a federally chartered mutual holding company, Third Federal Savings and Loan Association of Cleveland, MHC. The thrift subsidiary of TFS Financial Corporation is Third Federal Savings and Loan Association of Cleveland.

The accounting and reporting policies followed by the Company conform in all material respects to accounting principles generally accepted in the United States of America and to general practices in the financial services industry. The preparation of financial statements in conformity with U.S. GAAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements. Actual results could differ from those estimates. The allowance for loan losses, the valuation of mortgage loan servicing rights, the valuation of deferred tax assets, and the determination of pension obligations and stock-based compensation are particularly subject to change.

The unaudited interim consolidated financial statements were prepared without an audit and reflect all adjustments of a normal recurring nature which, in the opinion of management, are necessary to present fairly the consolidated financial condition of the Company at March 31, 2014, and its results of operations and cash flows for the periods presented. In accordance with Regulation S-X for interim financial information, these statements do not include certain information and footnote disclosures required for complete audited financial statements. The Company's Annual Report on Form 10-K for the fiscal year ended September 30, 2013 contains consolidated financial statements and related notes, which should be read in conjunction with the accompanying interim consolidated financial statements. The results of operations for the interim periods disclosed herein are not necessarily indicative of the results that may be expected for the fiscal year ending September 30, 2014 or for any other period.

2. EARNINGS PER SHARE

Basic earnings per share is the amount of earnings available to each share of common stock outstanding during the reporting period. Diluted earnings per share is the amount of earnings available to each share of common stock outstanding during the reporting period adjusted to include the effect of potentially dilutive common shares. For purposes of computing earnings per share amounts, outstanding shares include shares held by the public, shares held by the ESOP that have been allocated to participants or committed to be released for allocation to participants, the 227,119,132 shares held by Third Federal Savings, MHC, and, for purposes of computing dilutive earnings per share, stock options and restricted stock units with a dilutive impact. At March 31, 2014 and 2013, respectively, the ESOP held 6,825,100 and 7,258,440 shares that were neither allocated to participants nor committed to be released to participants.

Table of Contents

The following is a summary of the Company's earnings per share calculations.

	For the Three Months Ended March 31,					
	2014			2013		
	Income	Shares	Per share amount	Income	Shares	Per share amount
	(Dollars in thousands, except per share data)					
Net income	\$16,385			\$12,790		
Less: income allocated to restricted stock units	79			68		
Basic earnings per share:						
Income available to common shareholders	\$16,306	300,261,921	\$0.05	\$12,722	301,753,966	\$0.04
Diluted earnings per share:						
Effect of dilutive potential common shares		1,268,059			897,609	
Income available to common shareholders	\$16,306	301,529,980	\$0.05	\$12,722	302,651,575	\$0.04

	For the Six Months Ended March 31,					
	2014			2013		
	Income	Shares	Per share amount	Income	Shares	Per share amount
	(Dollars in thousands, except per share data)					
Net income	\$32,409			\$23,943		
Less: income allocated to restricted stock units	156			126		
Basic earnings per share:						
Income available to common shareholders	\$32,253	300,450,112	\$0.11	\$23,817	301,664,171	\$0.08
Diluted earnings per share:						
Effect of dilutive potential common shares		1,246,979			787,173	
Income available to common shareholders	\$32,253	301,697,091	\$0.11	\$23,817	302,451,344	\$0.08

The following is a summary of outstanding stock options and restricted stock units that are excluded from the computation of diluted earnings per share because their inclusion would be anti-dilutive.

	For the Three Months Ended March 31,		For the Six Months Ended March 31,	
	2014	2013	2014	2013
Options to purchase shares	3,907,600	5,395,509	3,923,600	6,509,209
Restricted stock units	—	30,000	—	30,000

Total	\$242,580	\$5,289	\$45,768	\$826	\$288,348	\$6,115

The unrealized losses on investment securities were attributable to interest rate increases. The contractual terms of U.S. government and agency obligations do not permit the issuer to settle the security at a price less than the par value of the investment. The contractual cash flows of mortgage-backed securities are guaranteed by Fannie Mae, Freddie Mac and Ginnie

Table of Contents

Mae. REMICs are issued by or backed by securities issued by these governmental agencies. It is expected that the securities would not be settled at a price substantially less than the amortized cost of the investment. The U.S. Treasury Department established financing agreements in 2008 to ensure Fannie Mae and Freddie Mac meet their obligations to holders of mortgage-backed securities that they have issued or guaranteed. Since the decline in value is attributable to changes in interest rates and not credit quality and because the Association has neither the intent to sell the securities nor is it more likely than not the Association will be required to sell the securities for the time periods necessary to recover the amortized cost, these investments are not considered other-than-temporarily impaired. At March 31, 2014, the amortized cost and fair value of U.S. government and agency obligations available for sale due in more than one year but less than five years are \$2,000 and \$2,031, respectively as compared to \$2,000 and \$2,037 at September 30, 2013.

## 4. LOANS AND ALLOWANCE FOR LOAN LOSSES

Loans held for investment consist of the following:

	March 31, 2014	September 30, 2013
Real estate loans:		
Residential non-Home Today	\$8,486,701	\$8,118,511
Residential Home Today	165,226	178,353
Home equity loans and lines of credit	1,758,811	1,858,398
Construction	70,236	72,430
Real estate loans	10,480,974	10,227,692
Other consumer loans	4,076	4,100
Less:		
Deferred loan fees—net	(7,913	) (13,171
LIP	(36,928	) (42,018
Allowance for loan losses	(83,391	) (92,537
Loans held for investment, net	\$10,356,818	\$10,084,066

At March 31, 2014 and September 30, 2013, respectively, \$1,509 and \$4,179 of long-term loans were classified as mortgage loans held for sale.

A large concentration of the Company's lending is in Ohio and Florida. As of March 31, 2014 and September 30, 2013, the percentages of residential real estate loans held in Ohio were 72% and 74%, respectively, and the percentages held in Florida were 18% as of both dates. As of both March 31, 2014 and September 30, 2013, home equity loans and lines of credit were concentrated in the states of Ohio (39%), Florida (29%), California (12%) and New Jersey (5%). The economic conditions and market for real estate in those states, including to a greater extent Florida, have impacted the ability of borrowers in those areas to repay their loans.

Home Today is an affordable housing program targeted to benefit low- and moderate-income home buyers. Through this program the Association provided the majority of loans to borrowers who would not otherwise qualify for the Association's loan products, generally because of low credit scores. Although the credit profiles of borrowers in the Home Today program might be described as sub-prime, Home Today loans generally contain the same features as loans offered to our non-Home Today borrowers. Borrowers in the Home Today program must complete financial management education and counseling and must be referred to the Association by a sponsoring organization with which the Association has partnered as part of the program. Borrowers must also meet a minimum credit score threshold. Because the Association applied less stringent underwriting and credit standards to the majority of Home Today loans, loans originated under the program have greater credit risk than its traditional residential real estate mortgage loans. While effective March 27, 2009, the Home Today underwriting guidelines were changed to be substantially the same as the Association's traditional first mortgage product, the majority of loans in this program were originated prior to that date. As of March 31, 2014 and September 30, 2013, the principal balance of Home Today loans originated prior to March 27, 2009 was \$162,074 and \$174,974, respectively. The Association does not

offer, and has not offered, loan products frequently considered to be designed to target sub-prime borrowers containing features such as higher fees or higher rates, negative amortization, a loan-to-value ratio greater than 100%, or pay option adjustable-rate mortgages.

Table of Contents

The recorded investment of loan receivables in non-accrual status is summarized in the following table. Balances are net of deferred fees.

	March 31, 2014	September 30, 2013
Real estate loans:		
Residential non-Home Today	\$80,915	\$91,048
Residential Home Today	31,469	34,813
Home equity loans and lines of credit	30,162	29,943
Construction	151	41
Total real estate loans	142,697	155,845
Other consumer loans	—	—
Total non-accrual loans	\$142,697	\$155,845

Loans are placed in non-accrual status when they are contractually 90 days or more past due. Loans modified in troubled debt restructurings that were in non-accrual status prior to the restructurings remain in non-accrual status for a minimum of six months after restructuring. Additionally, home equity loans and lines of credit where the customer has a severely delinquent first mortgage and loans in Chapter 7 bankruptcy status where all borrowers have been discharged of their obligation are placed in non-accrual status. At March 31, 2014 and September 30, 2013, respectively, the recorded investment in non-accrual loans includes \$54,869 and \$54,311 in troubled debt restructurings which are current according to the terms of their agreement, of which \$33,270 and \$34,001 are performing loans classified as troubled debt restructurings due to Chapter 7 bankruptcy status primarily where all borrowers have been discharged of their obligations. Additionally, at March 31, 2014 and September 30, 2013, the recorded investment in non-accrual status loans includes \$3,490 and \$5,277, respectively, of performing second lien loans subordinate to first mortgages delinquent greater than 90 days.

Interest on loans in accrual status, including certain loans individually reviewed for impairment, is recognized in interest income as it accrues, on a daily basis. Accrued interest on loans in non-accrual status is reversed by a charge to interest income and income is subsequently recognized only to the extent cash payments are received. Cash payments on loans in non-accrual status are applied to the oldest scheduled, unpaid payment first. Cash payments on loans with a partial charge-off are applied fully to principal, then to recovery of the charged off amount prior to interest income being recognized. A non-accrual loan is generally returned to accrual status when contractual payments are less than 90 days past due. However, a loan may remain in non-accrual status when collectability is uncertain, such as a troubled debt restructuring that has not met minimum payment requirements, a loan with a partial charge-off, an equity loan or line of credit with a delinquent first mortgage greater than 90 days, or a loan in Chapter 7 bankruptcy status where all borrowers have been discharged of their obligations. The number of days past due is determined by the number of scheduled payments that remain unpaid, assuming a period of 30 days between each scheduled payment.

An age analysis of the recorded investment in loan receivables that are past due at March 31, 2014 and September 30, 2013 is summarized in the following tables. When a loan is more than one month past due on its scheduled payments, the loan is considered 30 days or more past due. Balances are net of deferred fees and any applicable loans-in-process.

	30-59 Days Past Due	60-89 Days Past Due	90 Days or More Past Due	Total Past Due	Current	Total

During the quarter ended March 31, 2014, \$1,300 in recoveries were recorded representing the cumulative one-time payment received as a result of PMIC increasing the cash percentage of the partial claim payment plan as discussed later in this note. During the quarter ended December 31, 2013, \$5,321 of residential loans were deemed uncollectible and fully charged-off as a result of implementing a new practice of charging off the remaining balance on loans that had remained delinquent and stalled in the foreclosure process for greater than 1,500 days. These loans previously were recorded at estimated net realizable value, with the potential for additional loss recognized within the allowance for loan losses. Any future foreclosure proceeds on these loans would result in recoveries of prior charge-offs.

Activity in the allowance for loan losses is summarized as follows:

	For the Three Months Ended March 31, 2014					Ending Balance
	Beginning Balance	Provisions	Charge-offs	Recoveries		
Real estate loans:

Other consumer loans	—	—	—	—	—	—
Total	\$15,364	\$68,027	\$83,391	\$15,838	\$76,699	\$92,537

At March 31, 2014 and September 30, 2013, individually evaluated loans that required an allowance were comprised only of loans evaluated for impairment based on the present value of cash flows, such as performing troubled debt restructurings, and loans with a further deterioration in the fair value of collateral not yet identified as uncollectible. All other individually evaluated loans received a charge-off, if applicable.

Because many variables are considered in determining the appropriate level of general valuation allowances, directional changes in individual considerations do not always align with the directional change in the balance of a particular component of the general valuation allowance. At March 31, 2014 and September 30, 2013, respectively, allowances on individually reviewed loans evaluated for impairment based on the present value of cash flows, such as performing troubled debt restructurings were \$15,263 and \$15,749, and allowances on loans with further deteriorations in the fair value of collateral not yet identified as uncollectible were \$101 and \$89.

Residential non-Home Today mortgage loans represent the largest portion of the residential real estate portfolio. The Company believes overall credit risk is low based on the nature, composition, collateral, products, lien position and performance of the portfolio. The portfolio does not include loan types or structures that have recently experienced severe performance problems at other financial institutions (sub-prime, no documentation or pay option adjustable rate mortgages).

As described earlier in this footnote, Home Today loans have greater credit risk than traditional residential real estate mortgage loans. At March 31, 2014 and September 30, 2013, respectively, approximately 47% and 50% of Home Today loans include private mortgage insurance coverage. The majority of the coverage on these loans was provided by PMI Mortgage Insurance Co., which the Arizona Department of Insurance seized in 2011 and indicated that all claims payments would be reduced by 50%. In March 2013, PMIC notified the Association that all payments would be paid at 55% of the claim with the remainder deferred. In March 2014, PMIC notified the Association that the cash percentage of the partial claim payment plan would increase further to 67% of the claim. Appropriate adjustments have been made to the Association's affected valuation allowances and charge-offs, and estimated loss severity factors were adjusted accordingly for loans evaluated collectively. The amount of loans in our owned portfolio covered by mortgage insurance provided by PMIC as of March 31, 2014 and September 30, 2013, respectively, was \$214,514 and \$236,713 of which \$197,398 and \$214,920 was current. The amount of loans in our owned portfolio covered by mortgage insurance provided by Mortgage Guaranty Insurance Corporation as of March 31, 2014 and September 30, 2013, respectively, was \$84,117 and \$91,478 of which \$82,731 and \$90,099 was current. As of March 31, 2014, MGIC's long-term debt rating, as published by the major credit rating agencies, did not meet the requirements to qualify as "high credit quality"; however, MGIC continues to make claims payments in accordance with its contractual obligations and the Association has not increased its estimated loss severity factors related to MGIC's claim paying ability. No other loans were covered by mortgage insurers that were deferring claim payments or which were assessed as being non-investment grade.

Home equity lines of credit represent a significant portion of the residential real estate portfolio. The state of the economy and low housing prices continue to have an adverse impact on this portfolio since the home equity lines generally are in a second lien position. When the Association began to offer new home equity lines of credit again, the product was designed with prudent property and credit performance conditions to reduce future risk.

Table of Contents

Construction loans generally have greater credit risk than traditional residential real estate mortgage loans. The repayment of these loans depends upon the availability of permanent financing upon completion of all improvements. In the event the Association makes a loan on property that is not yet approved for the planned development, there is the risk that approvals will not be granted or will be delayed. These events may adversely affect the borrower and the collateral value of the property. Construction loans also expose the Association to the risk that improvements will not be completed on time in accordance with specifications and projected costs.

Other consumer loans are comprised of loans secured by certificate of deposit accounts, which are fully recoverable in the event of non-payment.

The recorded investment and the unpaid principal balance of impaired loans, including those reported as troubled debt restructurings, as of March 31, 2014 and September 30, 2013 are summarized as follows. Balances of recorded investments are net of deferred fees.

	March 31, 2014			September 30, 2013

Other consumer loans	—	—	—	—	—	—
Total	\$244,778	\$314,537	\$15,364	\$263,041	\$358,203	\$15,838

At March 31, 2014 and September 30, 2013, respectively, the recorded investment in impaired loans includes \$189,671 and \$201,692 of loans modified in troubled debt restructurings of which \$26,591 and \$30,550 were 90 days or more past due.

For all classes of loans, a loan is considered impaired when, based on current information and events, it is probable that the Company will be unable to collect the scheduled payments of principal and interest according to the contractual terms of the loan agreement. Factors considered in determining that a loan is impaired may include the deteriorating financial condition of the borrower indicated by missed or delinquent payments, a pending legal action, such as bankruptcy or foreclosure, or the absence of adequate security for the loan.

Charge-offs on residential mortgage loans, home equity loans and lines of credit, and construction loans are recognized when triggering events, such as foreclosure actions, short sales, or deeds accepted in lieu of repayment, result in less than full repayment of the recorded investment in the loans.

Partial or full charge-offs are also recognized for the amount of impairment on loans considered collateral dependent that meet the conditions described below.

17

---

Table of Contents

- For residential mortgage loans, payments are greater than 180 days delinquent;
- For home equity lines of credit, equity loans, and residential loans modified in a troubled debt restructuring, payments are greater than 90 days delinquent;
- For all classes of loans, a sheriff sale is scheduled within 60 days to sell the collateral securing the loan;
- For all classes of loans, all borrowers have been discharged of their obligation through a chapter 7 bankruptcy;
- For all classes of loans, a borrower obligated on a loan has filed bankruptcy and the loan is greater than 30 days delinquent;
- For all classes of loans, it becomes evident that a loss is probable.

Collateral dependent residential mortgage loans and construction loans are charged off to the extent the recorded investment in a loan, net of anticipated mortgage insurance claims, exceeds the fair value less costs to dispose of the underlying property. Management can determine the loan is uncollectible for reasons such as foreclosures exceeding a reasonable time frame and recommend a full charge-off. Home equity loans or lines of credit are charged off to the extent the recorded investment in the loan plus the balance of any senior liens exceeds the fair value less costs to dispose of the underlying property or management determines the collateral is not sufficient to satisfy the loan. A loan in any portfolio that is identified as collateral dependent will continue to be reported as impaired until it is no longer considered collateral dependent, is less than 30 days past due and does not have a prior charge-off. A loan in any portfolio that has a partial charge-off consequent to impairment evaluation will continue to be individually evaluated for impairment until, at a minimum, the impairment has been recovered.

The following summarizes the effective dates of charge-off policies that changed or were first implemented during the current and previous four fiscal years and the portfolios to which those policies apply.

Effective Date	Policy	Residential Non-Home Today	Residential Home Today	Home Equity Lines of Credit	Home Equity Loans	Construction
9/30/2012	Pursuant to an OCC directive, a loan is considered collateral dependent and any collateral shortfall is charged off when all borrowers obligated on a loan are discharged through Chapter 7 bankruptcy	X	X	X	X	X
6/30/2012	Loans in any form of bankruptcy greater than 30 days past due are considered collateral dependent and any collateral shortfall is charged off	X	X	X	X	X
12/31/2011	Pursuant to an OCC directive, impairment on collateral dependent loans previously recognized as SVAs were charged off. Charge-offs are recorded to recognize confirmed collateral shortfalls on impaired loans. (1)	X	X	X	X	X
9/30/2010	Timing of impairment evaluation was accelerated to include equity loans greater than 90 days delinquent (2)				X	

---

(1)

Prior to 12/31/2011, partial charge-offs were not used, but an SVA was established when the recorded investment in the loan exceeded the fair value of the collateral less costs to dispose. Individual loans were only charged off when a triggering event occurred, such as a foreclosure action was culminated, a short sale was approved, or a deed was accepted in lieu of repayment.

(2) Prior to 9/30/2010, impairment evaluations on equity loans were performed when the loan was greater than 180 days delinquent.

Loans modified in troubled debt restructurings that are not evaluated based on collateral are separately evaluated for impairment on a loan by loan basis at the time of restructuring and at each subsequent reporting date for as long as they are reported as troubled debt restructurings. The impairment evaluation is based on the present value of expected future cash flows discounted at the effective interest rate of the original loan. Expected future cash flows include a discount factor representing a potential for default. Valuation allowances are recorded for the excess of the recorded investments over the result of the cash flow analysis. Loans discharged in Chapter 7 bankruptcy are reported as troubled debt restructurings and also evaluated based

Table of Contents

on the present value of expected future cash flows unless evaluated based on collateral. We evaluate these loans using the expected future cash flows because we expect the borrower, not liquidation of the collateral, to be the source of repayment for the loan. Other consumer loans are not considered for restructuring. A loan modified in a troubled debt restructuring is classified as an impaired loan for a minimum of one year. After one year, a loan is no longer included in the balance of impaired loans if the loan was modified to yield a market rate for loans of similar credit risk at the time of restructuring and the loan is not impaired based on the terms of the restructuring agreement. No troubled debt restructurings were reclassified from impaired loans during the quarters ended or six months ended March 31, 2014 and March 31, 2013.

The average recorded investment in impaired loans and the amount of interest income recognized during the period that the loans were impaired are summarized below.

Total	\$1,959	\$ 100	\$ —	\$ 2,801	\$ 10,098	\$8,286	\$23,244

Troubled debt restructured loans may be modified more than once. Among other requirements, a re-modification may be available for a borrower upon the expiration of temporary modification terms if the borrower cannot return to regular loan payments. If the borrower is experiencing an income curtailment that temporarily has reduced his/her capacity to repay, such as loss of employment, reduction of hours, non-paid leave or short term disability, a temporary modification is considered. If the borrower lacks the capacity to repay the loan at the current terms due to a permanent condition, a permanent modification is considered. In evaluating the need for a re-modification, the borrower's ability to repay is generally assessed utilizing a debt to income and cash flow analysis. As the economy slowly improves, the need for re-modifications continues to linger. Loans

Table of Contents

discharged in Chapter 7 bankruptcy are classified as multiple modifications if the loan's original terms had also been modified by the Association.

The following tables provide information on troubled debt restructured loans modified within the previous 12 months for which there was a payment default, at least 30 days past due on one scheduled payment, during the period presented.

	For the Three Months Ended March 31,			
	2014		2013

Construction	29,651	—	422	—	30,073
Total	\$9,996,393	\$9,223	\$166,887	\$—	\$10,172,503

Residential loans are internally assigned a grade that complies with the guidelines outlined in the OCC's Handbook for Rating Credit Risk. Pass loans are assets well protected by the current paying capacity of the borrower. Special Mention loans have a potential weakness that the Association feels deserve management's attention and may result in further deterioration in their repayment prospects and/or the Association's credit position. Substandard loans are inadequately protected by the current

Table of Contents

payment capacity of the borrower or the collateral pledged with a defined weakness that jeopardizes the liquidation of the debt. Also included in Substandard are performing home equity loans and lines of credit where the customer has a severely delinquent first mortgage to which the performing home equity loan or line of credit is subordinate and loans in Chapter 7 bankruptcy status where all borrowers have had their obligations discharged, and have not reaffirmed the debt. Loss loans are considered uncollectible and are charged off when identified.

At March 31, 2014 and September 30, 2013, respectively, the recorded investment of impaired loans includes \$104,100 and \$113,520 of troubled debt restructurings that are individually evaluated for impairment, but have adequately performed under the terms of the restructuring and are classified as Pass loans. At March 31, 2014 and September 30, 2013, respectively, there were \$13,642 and \$17,396 of loans classified substandard and \$7,891 and \$9,193 of loans designated special mention that are not included in the recorded investment of impaired loans; rather, they are included in loans collectively evaluated for impairment.

Other consumer loans are internally assigned a grade of nonperforming when they become 90 days or more past due. At March 31, 2014 and September 30, 2013, no consumer loans were graded as nonperforming.

**5. DEPOSITS**

Deposit account balances are summarized as follows:

	March 31, 2014	September 30, 2013
Negotiable order of withdrawal accounts	\$ 1,051,104	\$ 1,027,316
Savings accounts	1,791,041	1,808,953
Certificates of deposit	5,572,683	5,627,849
	8,414,828	8,464,118
Accrued interest	662	381
Total deposits	\$ 8,415,490	\$ 8,464,499

Brokered certificates of deposit, which are used as a cost effective funding alternative, totaled \$217,000 and \$13,000 at March 31, 2014 and September 30, 2013, respectively. The FDIC places restrictions on banks with regard to issuing brokered deposits based on the bank's capital classification. A well-capitalized institution may accept brokered deposits without FDIC restrictions. An adequately capitalized institution must obtain a waiver from the FDIC in order to accept brokered deposits, while an undercapitalized institution is prohibited by the FDIC from accepting brokered deposits. The Association was well capitalized at March 31, 2014 and September 30, 2013.

The following table presents the reclassification adjustment out of accumulated other comprehensive loss included in net income and the corresponding line item on the consolidated statements of income for the periods indicated:

Details about Accumulated Other Comprehensive Income Components	Amounts Reclassified from Accumulated Other Comprehensive Income				Line Item in the Statement of Income
	For the Three Months Ended March 31,		For the Six Months Ended March 31,		
	2014	2013	2014	2013	
Amortization of pension plan:					
Actuarial loss	\$74	\$139	\$148	\$278	(a)
Income tax benefit	(26 )	(49 )	(52 )	(98 )	Income tax expense
Net of income tax benefit	\$48	\$90	\$96	\$180	

(a) These items are included in the computation of net period pension cost. See Note 8. Defined Benefit Plan for additional disclosure.

Table of Contents**7. INCOME TAXES**

The Company and its subsidiaries file income tax returns in the U.S. federal jurisdiction and various state and city jurisdictions. Federal income tax returns and the Association's Ohio Franchise Tax returns have been audited and settled for tax years through 2010 and 2011, respectively. With few exceptions, the Company is no longer subject to federal or state tax examinations for tax years prior to 2011.

The Company recognizes interest and penalties on income tax assessments or income tax refunds, where applicable, in the financial statements as a component of its provision for income taxes.

**8. DEFINED BENEFIT PLAN**

The Third Federal Savings Retirement Plan (the "Plan") is a defined benefit pension plan. Effective December 31, 2002, the Plan was amended to limit participation to employees who met the Plan's eligibility requirements on that date. Effective December 31, 2011, the Plan was amended to freeze future benefit accruals for participants in the Plan. After December 31, 2002, employees not participating in the Plan, upon meeting the applicable eligibility requirements, and those eligible participants who no longer receive service credits under the Plan, participate in a separate tier of the Company's defined contribution 401(k) Savings Plan. Benefits under the Plan are based on years of service and the employee's average annual compensation (as defined in the Plan) through December 31, 2011. The funding policy of the Plan is consistent with the funding requirements of U.S. federal and other governmental laws and regulations.

The components, including an estimated settlement adjustment due to expected lump sum payments exceeding the sum of interest and service costs for the year, of net periodic income recognized in the statements of income are as follows:

	Three Months Ended March 31,		Six Months Ended March 31,	
	2014	2013	2014	2013
Interest cost	801	735	1,602	1,469
Expected return on plan assets	(1,056 )	(1,029 )	(2,111 )	(2,058 )
Amortization of net loss	74	139	148	278
Estimated net loss due to settlement	181	—	361	—
Net periodic income	\$—	\$(155 )	\$—	\$(311 )

There were no minimum employer contributions paid during the six months ended March 31, 2014. No minimum employer contributions are expected during the remainder of the fiscal year.

**9. EQUITY INCENTIVE PLAN**

In December 2013, 419,300 options to purchase our common stock and 98,900 restricted stock units were granted to certain directors, officers and employees of the Company. The awards were made pursuant to the shareholder-approved 2008 Equity Incentive Plan.

During the six months ended March 31, 2014 and 2013, the Company recorded \$3,591 and \$3,259, respectively, of stock-based compensation expense, comprised of stock option expense of \$1,626 and \$1,632, respectively, and restricted stock units expense of \$1,965 and \$1,627, respectively.

At March 31, 2014, 6,874,825 shares were subject to options, with a weighted average exercise price of \$11.14 per share and a weighted average grant date fair value of \$2.95 per share. Expected future expense related to the 2,966,050 non-vested options outstanding as of March 31, 2014 is \$4,103 over a weighted average of 1.5 years. At March 31, 2014, 1,104,225 restricted stock units, with a weighted average grant date fair value of \$10.61 per unit, are unvested. Expected future compensation expense relating to the 1,440,284 restricted stock units outstanding as of March 31, 2014 is \$4,889 over a weighted average period of 1.7 years. Each unit is equivalent to one share of common stock.

**10. COMMITMENTS AND CONTINGENT LIABILITIES**

In the normal course of business, the Company enters into commitments with off-balance sheet risk to meet the financing needs of its customers. Commitments to extend credit are agreements to lend to a customer as long as there is no violation of any condition established in the contract. Commitments to originate loans generally have fixed

expiration dates of 60 to 360 days or other termination clauses and may require payment of a fee. Unfunded commitments related to home equity lines of credit generally expire 5 to 10 years following the date that the line of credit was established, subject to various conditions,

25

---

Table of Contents

which include compliance with payment obligations, adequacy of collateral securing the line and maintenance of a satisfactory credit profile by the borrower. Since some of the commitments may expire without being drawn upon, the total commitment amounts do not necessarily represent future cash requirements.

Off-balance sheet commitments to extend credit involve elements of credit risk and interest rate risk in excess of the amount recognized in the consolidated statements of condition. The Company's exposure to credit loss in the event of nonperformance by the other party to the commitment is represented by the contractual amount of the commitment.

The Company generally uses the same credit policies in making commitments as it does for on-balance-sheet instruments. Interest rate risk on commitments to extend credit results from the possibility that interest rates may have moved unfavorably from the position of the Company since the time the commitment was made.

At March 31, 2014, the Company had commitments to originate loans as follows:

Fixed-rate mortgage loans	\$295,284
Adjustable-rate mortgage loans	225,430
Home equity loans and lines of credit	19,828
Total	\$540,542

At March 31, 2014, the Company had unfunded commitments outstanding as follows:

Home equity lines of credit (excluding commitments for suspended accounts)	\$1,102,647
Construction loans	36,928
Private equity investments	12,941
Total	\$1,152,516

At March 31, 2014, the unfunded commitment on home equity lines of credit, including commitments for accounts suspended as a result of material default or a decline in equity, is \$1,310,633.

The Company assumes a portion of the mortgage guaranty insurance on an excess of loss basis for the mortgage guaranty risks of certain mortgage loans in its own portfolio, including Home Today loans and loans in its servicing portfolio, through reinsurance contracts with one remaining primary mortgage insurance company. A contract with a second company was terminated effective January 8, 2014 under a Commutation and Release Agreement that reduced the Company's maximum loss remaining under the contracts by \$6,385 in exchange for a \$1,000 payment. Under these contracts, the Company absorbs mortgage insurance losses in a range of 5% to 12% in excess of the initial 5% loss layer of a given pool of loans, in exchange for a portion of the pool's mortgage insurance premiums. The first 5% layer of loss must be exceeded before the Company assumes any liability. At March 31, 2014, the maximum losses remaining under the reinsurance contracts were limited to \$308. The Company has paid \$7,314 of losses under these reinsurance contracts and has provided a liability for the remaining estimated losses totaling \$181 as of March 31, 2014. Management believes it has made adequate provision for estimated losses. No new contracts have been added to the Company's risk exposure since December 31, 2008. The Company's insurance partners have retained all new mortgage insurance premiums and all new risk after that date.

The following table summarizes the activity in the liability for unpaid losses and loss adjustment expenses:

	Three Months Ended		Six Months Ended	
	March 31,		March 31,	
	2014	2013	2014	2013
Balance, beginning of period	\$1,292	\$2,621	\$2,158	\$3,351
Incurred increase (decrease)	(88 )	201	(201 )	(50 )
Paid claims	(1,023 )	(420 )	(1,776 )	(899 )
Balance, end of period	\$181	\$2,402	\$181	\$2,402

At March 31, 2014 and September 30, 2013, the Company had \$1,140 and \$3,295, respectively, in commitments to securitize and sell mortgage loans.

Management expects that the above commitments will be funded through normal operations.

Table of Contents**11. FAIR VALUE**

Under U.S. GAAP, fair value is defined as the price that would be received to sell an asset, or paid to transfer a liability, in an orderly transaction between market participants at the measurement date. A fair value framework is established whereby assets and liabilities measured at fair value are grouped into three levels of a fair value hierarchy, based on the transparency of inputs and the reliability of assumptions used to estimate fair value. The Company's policy is to recognize transfers between levels of the hierarchy as of the end of the reporting period in which the transfer occurs. The three levels of inputs are defined as follows:

Level 1 – quoted prices (unadjusted) for identical assets or liabilities in active markets.

Level 2 – quoted prices for similar assets or liabilities in active markets, quoted prices for identical or similar assets or liabilities in markets with few transactions, or model-based valuation techniques using assumptions that are observable in the market.

Level 3 – a company's own assumptions about how market participants would price an asset or liability.

As permitted under the fair value guidance in U.S. GAAP, the Company elects to measure at fair value mortgage loans classified as held for sale that are subject to pending agency contracts to securitize and sell loans. This election is expected to reduce volatility in earnings related to market fluctuations between the contract trade and settlement dates. At March 31, 2014 and September 30, 2013, respectively, there were \$1,164 and \$3,369 of loans held for sale, with unpaid principal balances of \$1,140 and \$3,295, subject to pending agency contracts for which the fair value option was elected. Included in the net gain on the sale of loans is \$37 and \$0 for the three months ending March 31, 2014 and 2013, respectively, and \$(53) and \$(210) for the six months ending March 31, 2014 and 2013, respectively, related to changes during the period in the fair value of loans held for sale subject to pending agency contracts.

Presented below is a discussion of the methods and significant assumptions used by the Company to estimate fair value.

**Investment Securities Available for Sale**—Investment securities available for sale are recorded at fair value on a recurring basis. At March 31, 2014 and September 30, 2013, respectively, this includes \$486,040 and \$471,901 of investments in U.S. government and agency obligations including U.S. Treasury notes and sequentially structured, highly liquid collateralized mortgage obligations issued by Fannie Mae, Freddie Mac and Ginnie Mae and \$585 and \$5,475 of secured institutional money market deposits insured by the FDIC up to the current coverage limits, with any excess collateralized by the holding institution. Both are measured using the market approach. The fair values of treasury notes and collateralized mortgage obligations represent unadjusted price estimates obtained from third party independent nationally recognized pricing services using pricing models or quoted prices of securities with similar characteristics and are included in Level 2 of the hierarchy. At the time of initial measurement and, subsequently, when changes in methodologies occur, management obtains and reviews documentation of pricing methodologies used by third party pricing services to verify that prices are determined in accordance with fair value guidance in U.S. GAAP and to ensure that assets are properly classified in the fair value hierarchy. Additionally, third party pricing is reviewed on a monthly basis for reasonableness based on the market knowledge and experience of company personnel that interact daily with the markets for these types of securities. The carrying amount of the money market deposit accounts is considered a reasonable estimate of their fair value because they are cash deposits in interest bearing accounts valued at par. These accounts are included in Level 1 of the hierarchy.

**Mortgage Loans Held for Sale** – The fair value of mortgage loans held for sale is estimated using a market approach based on quoted secondary market pricing for loan portfolios with similar characteristics. Loans held for sale are carried at the lower of cost or fair value except, as described above, the Company elects the fair value measurement option for mortgage loans held for sale subject to pending agency contracts to securitize and sell loans. Loans held for sale are included in Level 2 of the hierarchy. At March 31, 2014 and September 30, 2013 there were \$1,164 and \$3,369, respectively, of loans held for sale measured at fair value and \$345 and \$810, respectively, of loans held for sale carried at cost.

**Impaired Loans** – Impaired loans represent certain loans held for investment that are subject to a fair value measurement under U.S. GAAP because they are individually evaluated for impairment and that impairment is measured using a fair value measurement, such as the observable market price of the loan or the fair value of the

collateral less estimated costs to dispose. Impairment is measured using the market approach based on the fair value of the collateral less estimated costs to dispose for loans the Company considers to be collateral-dependent due to a delinquency status or other adverse condition severe enough to indicate that the borrower can no longer be relied upon as the continued source of repayment. These conditions are described more fully in Note 4, Loans and Allowance for Loan Losses. To calculate impairment of collateral-dependent loans, the fair market values of the collateral, estimated using exterior appraisals in the majority of instances, are reduced by calculated costs to dispose derived from historical experience and recent market conditions. Any indicated impairment is recognized by a charge to the allowance for loan losses. Subsequent increases in collateral values or principal pay downs on loans with recognized impairment could result in an impaired loan being carried below its fair value. When no impairment loss is indicated, the

27

---

Table of Contents

carrying amount is considered to approximate the fair value of that loan to the Company because contractually that is the maximum recovery the Company can expect. The recorded investment of loans individually evaluated for impairment based on the fair value of the collateral are included in Level 3 of the hierarchy with assets measured at fair value on a non-recurring basis. The range and weighted average impact of costs to dispose on fair values is determined at the time of impairment or when additional impairment is recognized and is included in quantitative information about significant unobservable inputs later in this note.

Loans held for investment that have been restructured in troubled debt restructurings and are performing according to the modified terms of the loan agreement are individually evaluated for impairment using the present value of future cash flows based on the loan's effective interest rate, which is not a fair value measurement. At March 31, 2014 and September 30, 2013, respectively, this included \$104,916 and \$116,011 in recorded investment of troubled debt restructurings with related allowances for loss of \$15,263 and \$15,749.

Real Estate Owned—Real estate owned includes real estate acquired as a result of foreclosure or by deed in lieu of foreclosure and is carried at the lower of the cost basis or fair value less estimated costs to dispose. Fair value is estimated under the market approach using independent third party appraisals. As these properties are actively marketed, estimated fair values may be adjusted by management to reflect current economic and market conditions. At March 31, 2014 and September 30, 2013, these adjustments were not significant to reported fair values. At March 31, 2014 and September 30, 2013, respectively, \$18,236 and \$19,644 of real estate owned is included in Level 3 of the hierarchy with assets measured at fair value on a non-recurring basis where the cost basis equals or exceeds the estimate of fair values less costs to dispose of these properties. Real estate owned, as reported in the Consolidated Statements of Condition, includes estimated costs to dispose of \$1,737 and \$1,986 related to properties measured at fair value and \$3,413 and \$5,008 of properties carried at their original or adjusted cost basis less than fair value at March 31, 2014 and September 30, 2013, respectively.

Derivatives—Derivative instruments include interest rate locks on commitments to originate loans for the held for sale portfolio and forward commitments on contracts to deliver mortgage loans. Derivatives are reported at fair value in other assets or other liabilities on the Consolidated Statement of Condition with changes in value recorded in current earnings. Fair value is estimated using a market approach based on quoted secondary market pricing for loan portfolios with characteristics similar to loans underlying the derivative contracts. The fair value of interest rate lock commitments is adjusted by a closure rate based on the estimated percentage of commitments that will result in closed loans. The range and weighted average impact of the closure rate is included in quantitative information about significant unobservable inputs later in this note. A significant change in the closure rate may result in a significant change in the ending fair value measurement of these derivatives relative to their total fair value. Because the closure rate is a significantly unobservable assumption, interest rate lock commitments are included in Level 3 of the hierarchy. Forward commitments on contracts to deliver mortgage loans are included in Level 2 of the hierarchy.

Table of Contents

Assets and liabilities carried at fair value on a recurring basis in the Consolidated Statements of Condition at March 31, 2014 and September 30, 2013 are summarized below. There were no liabilities carried at fair value on a recurring basis at March 31, 2014.

Table of Contents

The table below presents a reconciliation of the beginning and ending balances and the location within the Consolidated Statements of Income where gains due to changes in fair value are recognized on interest rate lock commitments which are measured at fair value on a recurring basis using significant unobservable inputs (Level 3).

	Three Months Ended		Six Months Ended March	
	March 31, 2014	2013	2014	2013
Beginning balance	\$52	\$342	\$158	\$404
Gain (loss) during the period due to changes in fair value:				
Included in other non-interest income	16	140	(90	) 78
Ending balance	\$68	\$482	\$68	\$482
Change in unrealized gains for the period included in earnings for assets held at end of the reporting date	\$68	\$482	\$68	\$482

Summarized in the tables below are those assets measured at fair value on a nonrecurring basis. This includes loans held for investment that are individually evaluated for impairment, excluding performing troubled debt restructurings valued using the present value of cash flow method, and properties included in real estate owned that are carried at fair value less estimated costs to dispose at the reporting date.

	March 31, 2014	Nonrecurring Fair Value Measurements at Reporting Date Using Quoted Prices in		
		Active Markets for Identical Assets	Other Observable Inputs	Significant Unobservable Inputs
		(Level 1)	(Level 2)	(Level 3)
Impaired loans, net of allowance	\$139,761	\$ —	\$ —	\$139,761

	Fair Value 9/30/2013	Valuation Technique(s)	Unobservable Input	Range	Weighted Average
Impaired loans, net of allowance	\$146,941	Market comparables of collateral discounted to estimated net proceeds	Discount appraised value to estimated net proceeds based on historical experience: • Residential Properties	0 - 24%	9.3%
Interest rate lock commitments	\$158	Quoted Secondary Market pricing	Closure rate	0 - 100%	53.2%

The following tables present the estimated fair value of the Company's financial instruments. The estimated fair value amounts have been determined by the Company using available market information and appropriate valuation methodologies. However, considerable judgment is required to interpret market data to develop the estimates of fair value. Accordingly, the estimates presented herein are not necessarily indicative of the amounts the Company could realize in a current market exchange. The use of different market assumptions and/or estimation methodologies may have a material effect on the estimated fair value amounts.

Presented below is a discussion of the valuation techniques and inputs used by the Company to estimate fair value.

**Cash and Due from Banks, Interest Earning Cash Equivalents**— The carrying amount is a reasonable estimate of fair value.

**Investment and Mortgage-Backed Securities**— Estimated fair value for investment and mortgage-backed securities is based on quoted market prices, when available. If quoted prices are not available, management will use as part of their estimation process fair values that are obtained from third party independent nationally recognized pricing services using pricing models, quoted prices of securities with similar characteristics or discounted cash flows.

**Mortgage Loans Held for Sale**— Fair value of mortgage loans held for sale is based on quoted secondary market pricing for loan portfolios with similar characteristics.

**Loans**— For mortgage loans held for investment and other loans, fair value is estimated by discounting contractual cash flows adjusted for prepayment estimates using the current rates at which similar loans would be made to borrowers with similar credit ratings and for the same remaining term. The use of current rates to discount cash flows reflects current market expectations with respect to credit exposure. Impaired loans are measured at the lower of cost or fair value as described earlier in this footnote.

**Federal Home Loan Bank Stock**— It is not practical to estimate the fair value of FHLB stock due to restrictions on its transferability. The fair value is estimated at the carrying value, which is par. All transactions in capital stock of the FHLB of Cincinnati are executed at par.

**Private Equity Investments**— Private equity investments are initially valued based upon transaction price. The carrying value is subsequently adjusted when it is considered necessary based on current performance and market conditions. The carrying values are adjusted to reflect expected exit values. These investments are included in Other Assets in the accompanying Consolidated Statements of Condition at fair value.

Table of Contents

Deposits— The fair value of demand deposit accounts is the amount payable on demand at the reporting date. The fair value of fixed-maturity certificates of deposit is estimated using discounted cash flows and rates currently offered for deposits of similar remaining maturities.

Borrowed Funds— Estimated fair value for borrowed funds is estimated using discounted cash flows and rates currently charged for borrowings of similar remaining maturities.

Accrued Interest Receivable, Borrowers' Advances for Insurance and Taxes, and Principal, Interest and Escrow Owed on Loans Serviced— The carrying amount is a reasonable estimate of fair value.

Derivatives— Fair value is estimated based on the valuation techniques and inputs described earlier in this footnote.

**12. DERIVATIVE INSTRUMENTS**

The Company enters into forward commitments for the sale of mortgage loans principally to protect against the risk of adverse interest rate movements on net income. The Company recognizes the fair value of such contracts when the characteristics of those contracts meet the definition of a derivative. These derivatives are not designated in a hedging relationship; therefore, gains and losses are recognized immediately in the statement of income. In addition, the Company enters into commitments to originate a portion of its loans, which when funded, are classified as held for sale. Such commitments meet the definition of a derivative and are not designated in a hedging relationship; therefore, gains and losses are recognized immediately in the statement of income. The Company had no derivatives designated as hedging instruments under FASB ASC 815, "Derivatives and Hedging," at March 31, 2014 or September 30, 2013. The following table provides the locations within the Consolidated Statements of Condition and the fair values for derivatives not designated as hedging instruments.

	Asset Derivatives		September 30, 2013	
	March 31, 2014		Location	Fair Value
Interest rate lock commitments	Other Assets	\$68	Other Assets	\$158
Forward commitments for the sale of mortgage loans	Other Assets	3	Other Assets	—
		\$71		\$158
	Liability Derivatives		September 30, 2013	
	March 31, 2014		Location	Fair Value
Forward commitments for the sale of mortgage loans	Other Liabilities	\$—	Other Liabilities	\$6

The following table summarizes the locations and amounts of gain or (loss) recognized within the Consolidated Statements of Income on derivative instruments not designated as hedging instruments.

	Location of Gain or (Loss) Recognized in Income	Amount of Gain or (Loss) Recognized in Income on Derivatives			
		Three Months Ended		Six Months Ended

Table of Contents

13. RECENT ACCOUNTING PRONOUNCEMENTS

Pending as of March 31, 2014

In January 2014, the FASB issued Accounting Standards Update 2014-04, Receivables - Troubled Debt Restructurings by Creditors (Subtopic 310-40), Reclassification of Residential Real Estate Collateralized Consumer Mortgage Loans upon Foreclosure to reduce diversity by clarifying when an in-substance repossession or foreclosure occurs, that is, when a creditor should be considered to have received physical possession of residential real estate property collateralizing a consumer mortgage loan such that the loan receivable should be derecognized and the real estate property recognized. The amendments require interim and annual disclosure of both (1) the amount of foreclosed residential real estate property held by the creditor and (2) the recorded investment in consumer mortgage loans collateralized by residential real estate property that are in the process of foreclosure according to local requirements of the applicable jurisdiction. The amendments are effective for public business entities for annual periods, and interim periods within those annual periods, beginning after December 15, 2014. The impact of these amendments on the Company's consolidated financial statements is being evaluated.

The Company has determined that all other recently issued accounting pronouncements will not have a material impact on the Company's consolidated financial statements or do not apply to its operations.

Table of Contents

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations  
Forward Looking Statements

This report contains forward-looking statements, which can be identified by the use of such words as estimate, project, believe, intend, anticipate, plan, seek, expect and similar expressions. These forward-looking statements include, among other things:

- statements of our goals, intentions and expectations;
- statements regarding our business plans and prospects and growth and operating strategies;
- statements concerning trends in our provision for loan losses and charge-offs;
- statements regarding the trends in factors affecting our financial condition and results of operations, including asset quality of our loan and investment portfolios; and
- estimates of our risks and future costs and benefits.

These forward-looking statements are subject to significant risks, assumptions and uncertainties, including, among other things, the following important factors that could affect the actual outcome of future events:

- significantly increased competition among depository and other financial institutions;
- inflation and changes in the interest rate environment that reduce our interest margins or reduce the fair value of financial instruments;
- general economic conditions, either nationally or in our market areas, including employment prospects, real estate values and conditions that are worse than expected;
- decreased demand for our products and services and lower revenue and earnings because of a recession or other events;
- adverse changes and volatility in the securities markets;
- adverse changes and volatility in credit markets;
- legislative or regulatory changes that adversely affect our business, including changes in regulatory costs and capital requirements and changes related to our ability to pay dividends and the ability of Third Federal Savings, MHC to waive dividends;
- our ability to enter new markets successfully and take advantage of growth opportunities, and the possible short-term dilutive effect of potential acquisitions or de novo branches, if any;
- changes in consumer spending, borrowing and savings habits;
- changes in accounting policies and practices, as may be adopted by the bank regulatory agencies, the Financial Accounting Standards Board and the Public Company Accounting Oversight Board;
- future adverse developments concerning Fannie Mae or Freddie Mac;
- changes in monetary and fiscal policy of the U.S. Government, including policies of the U.S. Treasury and the FRS and changes in the level of government support of housing finance;
- changes in policy and/or assessment rates of taxing authorities that adversely affect us;
- changes in expense trends (including, but not limited to trends affecting non-performing assets, charge-offs and provisions for loan losses);
  - the impact of the governmental effort to restructure the U.S. financial and regulatory system;
- the inability of third-party providers to perform their obligations to us;
- adverse changes and volatility in real estate markets;
- a slowing or failure of the moderate economic recovery;
- the extensive reforms enacted in the DFA, which will continue to impact us;
- the adoption of implementing regulations by a number of different regulatory bodies under the DFA, and uncertainty in the exact nature, extent and timing of such regulations and the impact they will have on us;
- the continuing impact of our coming under the jurisdiction of new federal regulators;
- changes in our organization, or compensation and benefit plans;
- the strength or weakness of the real estate markets and of the consumer and commercial credit sectors and its impact on the credit quality of our loans and other assets, and

the ability of the U.S. Government to manage federal debt limits.

Because of these and other uncertainties, our actual future results may be materially different from the results indicated by any forward-looking statements. Any forward-looking statement made by us in this report speaks only as of the date on which it is made. We undertake no obligation to publicly update any forward-looking statements, whether as a result of new

## Table of Contents

information, future developments or otherwise, except as may be required by law. Please see Part II, Other Information Item 1A. Risk Factors for a discussion of certain risks related to our business.

### Overview

Our business strategy is to operate as a well-capitalized and profitable financial institution dedicated to providing exceptional personal service to our customers.

Since being organized in 1938, we grew to become, at the time of our initial public offering of stock in April 2007, the nation's largest mutually-owned savings and loan association based on total assets. We credit our success to our continued emphasis on our primary values: "Love, Trust, Respect, and a Commitment to Excellence, along with Having Fun." Our values are reflected in the design and pricing of our loan and deposit products, and historically, in our Home Today program, as described below. Our values are further reflected in the Broadway Redevelopment Initiative (a long-term revitalization program encompassing the three-mile corridor of the Broadway-Slavic Village neighborhood in Cleveland, Ohio where our main office was established and continues to be located) and the educational programs we have established and/or supported. We intend to continue to adhere to our primary values and to support our customers and the communities in which we operate.

During the last several years, regionally high unemployment, weak residential real estate values, less than robust capital and credit markets, and a general lack of confidence in the financial services sector of the economy presented significant challenges for us. More recently, improving regional employment levels, recovering residential real estate values, recovering capital and credit markets and greater confidence in the financial services sector have resulted in better credit metrics and improved operating results for us.

Management believes that the following matters are those most critical to our success: (1) controlling our interest rate risk exposure; (2) monitoring and limiting our credit risk; (3) maintaining access to adequate liquidity and alternative funding sources; and (4) monitoring and controlling operating expenses.

**Controlling Our Interest Rate Risk Exposure.** Although housing and credit quality issues have had and, to a lesser extent, continue to have a negative effect on our operating results and, as described below, are certainly a matter of significant concern for us, historically our greatest risk has been our exposure to interest rate risk. When we hold long-term, fixed-rate assets, funded by liabilities with shorter re-pricing characteristics, we are exposed to potentially adverse impacts from rising interest rates. Generally, and particularly over extended periods of time that encompass full economic cycles, interest rates associated with longer-term assets, like fixed-rate mortgages, have been higher than interest rates associated with shorter-term funding sources, like deposits. This difference has been an important component of our net interest income and is fundamental to our operations. We manage the risk of holding long-term, fixed-rate mortgage assets primarily by maintaining high levels of Tier 1/Core capital and by promoting adjustable-rate loans and shorter-term, fixed-rate loans.

### High Levels of Tier 1/Core Capital

At March 31, 2014 the Company's Tier1/Core capital totaled \$1.88 billion or 16.33% of adjusted tangible assets and 26.65% of risk-weighted assets, while the Association's Tier1/Core capital totaled \$1.54 billion or 13.44% of adjusted tangible assets and 21.95% of risk-weighted assets. Each of these measures were more than twice the minimum requirements currently in effect for the Association and applicable to the Company in the future, for designation as "well capitalized" under regulatory prompt corrective action provisions which set minimum levels of 5.00% of adjusted tangible assets and 6.00% of risk-weighted assets.

### Promotion of Adjustable-Rate Loans and Shorter-Term, Fixed-Rate Loans

In July 2010 we began marketing an adjustable-rate mortgage loan product that provides us with improved interest rate risk characteristics when compared to a long-term, fixed-rate mortgage loan. Since its introduction, the "Smart Rate" adjustable rate mortgage has offered borrowers an interest rate lower than that of a long-term fixed-rate loan. The rate is locked for three or five years then resets annually after that. It contains a feature to re-lock the rate an unlimited number of times at our then, current rate and fee schedule, for another three or five years (dependent on the original reset period) without having to complete a full refinance transaction. Re-lock eligibility is subject to a satisfactory payment performance history by the borrower (never 60 days late, no 30-day delinquencies during the last twelve months, current at the time of re-lock, and no foreclosures or bankruptcies since the Smart Rate application was

taken). In addition to a satisfactory payment history, re-lock eligibility requires that the property continues to be the borrower's primary residence. The loan term cannot be extended in connection with a re-lock nor can new funds be advanced. All interest rate caps and floors remain as originated. Beginning in the latter portion of fiscal 2012, we began to feature our ten-year, fully amortizing fixed-rate first mortgage loan in our product promotions. The ten-year, fixed-rate loan has a less severe interest rate risk profile when compared to loans with fixed-rate

Table of Contents

terms of 15 to 30 years and helps us to more effectively manage our interest rate risk exposure, yet provides our borrowers with the certainty of a fixed interest rate throughout the life of the obligation.

The following tables set forth our first mortgage loan production and balances segregated by loan structure at origination.

	For the Six Months Ended March 31, 2014		For the Six Months Ended March 31, 2013	
	Amount	Percent	Amount	Percent
First Mortgage Loan Originations:				
ARM production	\$ 388,252	37.7 %	\$ 450,999	50.8 %
Fixed-rate production:				
Term less than or equal to 10 years	439,913	42.7	203,026	22.9
Term greater than 10 years	202,688	19.6	233,454	26.3
Total fixed-rate production	642,601	62.3	436,480	49.2
Total First Mortgage Originations:	\$ 1,030,853	100.0 %	\$ 887,479	100.0 %
	March 31, 2014		March 31, 2013	
	Amount	Percent	Amount	Percent
Residential Mortgage Loans Held For Investment:				
ARM Loans	\$ 3,312,833	38.3 %	\$ 2,995,513	37.7 %
Fixed-rate Loans:				
Term less than or equal to 10 years	1,198,864	13.9	525,380	6.6
Term greater than 10 years	4,140,230	47.8	4,415,743	55.7
Total fixed-rate loans	5,339,094	61.7	4,941,123	62.3
Total Residential Mortgage Loans Held For Investment:	\$ 8,651,927	100.0 %	\$ 7,936,636	100.0 %

**Other Interest Rate Risk Management Tools**

In years prior to fiscal 2010, in addition to maintaining high levels of Tier1/Core capital, we also managed interest rate risk by actively selling long-term, fixed-rate mortgage loans in the secondary market, a strategy pursuant to which we were able to modulate the amount of long-term, fixed-rate loans held in our portfolio. Also prior to fiscal 2010, we actively marketed home equity lines of credit which carry an adjustable rate of interest indexed to the prime rate and provide interest rate sensitivity to that portion of our assets. Beginning in March 2012, the Association began offering redesigned home equity lines of credit subject to certain property and credit performance conditions. Through these high credit quality products, we hope to re-establish home equity line of credit lending as a meaningful strategy used to manage our interest rate risk profile.

While the sales of first mortgage loans and originations of new home equity lines of credit remain strategically important for us, since fiscal 2010, they have played only minor roles in our management of interest rate risk. Loan sales are discussed later in this Part 1, Item 2. under the heading Liquidity and Capital Resources, and in Part 1, Item 3. Quantitative and Qualitative Disclosures About Market Risk. Our home equity lending is discussed in the next section of this Overview - Monitoring and Limiting our Credit Risk, and in the Allowance for Loan Losses section of the Critical Accounting Policies that immediately follows this Overview.

Notwithstanding our efforts to the contrary, should a rapid and substantial increase occur in general market interest rates, it is probable that, prospectively and particularly over a multi-year time horizon, the level of our net interest income would be adversely impacted.

**Monitoring and Limiting Our Credit Risk.** While, historically, we had been successful in limiting our credit risk exposure by generally imposing high credit standards with respect to lending, the confluence of unfavorable regional and macro-economic events that culminated in the 2008 housing market collapse and financial crisis, coupled with our pre-2010 expanded participation in the second lien mortgage lending markets, has significantly refocused our attention with respect to credit risk. In response to the evolving economic landscape, we have continuously revised and updated our quarterly analysis and evaluation procedures, as needed, for each category of our lending with the objective of identifying and recognizing all appropriate credit impairments. At March 31, 2014, 90% of our assets consisted of

residential real estate loans (both “held for sale” and “held for investment”) and home equity loans and lines of credit, the overwhelming majority of which were originated to borrowers in the states of Ohio and Florida. Our analytic procedures and evaluations include specific reviews of

37

---

Table of Contents

all home equity loans and lines of credit that become 90 or more days past due, as well as specific reviews of all first mortgage loans that become 180 or more days past due. We also expanded our analysis of current performing home equity lines of credit to better mitigate future risk of loss. In accordance with regulatory guidance issued in January 2012, performing home equity lines of credit subordinate to first mortgages delinquent greater than 90 days are transferred to non-accrual status. At March 31, 2014, the recorded investment of such performing home equity lines of credit, not otherwise classified as non-accrual, was \$3.5 million. Also, the OCC issued guidance in July 2012 that requires loans where at least one borrower has been discharged of their obligation in Chapter 7 bankruptcy, to be classified as troubled debt restructurings. Also required pursuant to this guidance is the charge-off of performing loans to collateral value and non-accrual classification when all borrowers have had their obligations discharged in Chapter 7 bankruptcy, regardless of how long the loans have been performing. At March 31, 2014, \$57.8 million of loans in Chapter 7 bankruptcy status were included in total troubled debt restructurings. At March 31, 2014, the recorded investment in non-accrual status loans included \$33.3 million of performing loans in Chapter 7 bankruptcy status where at least one borrower had been discharged of their obligation.

In response to the unfavorable regional and macro-economic environment that arose beginning in 2008, and in an effort to limit our credit risk exposure and improve the credit performance of new customers, we have tightened our credit eligibility criteria in evaluating a borrower's ability to successfully fulfill his or her repayment obligation and we have revised the design of many of our loan products to require higher borrower down-payments, limited the products available for condominiums, and eliminated certain product features (such as interest-only adjustable-rate loans, loans above certain loan-to-value ratios, and prior to March 2012, home equity lending products with the exception of bridge loans). The delinquency level related to loan originations prior to 2009, compared to originations in 2009 and after, reflect the improved credit standards we implemented on all new originations. As of March 31, 2014, loans originated prior to 2009 had a balance of \$3.39 billion, of which \$100.9 million, or 3.0%, were delinquent, while loans originated in 2009 and after had a balance of \$7.05 billion, of which \$7.3 million, or 0.1%, were delinquent.

One aspect of our credit risk concern relates to the high percentage of our loans that are secured by residential real estate in the states of Ohio and Florida, particularly in light of the difficulties that have arisen with respect to the real estate markets in those states. At March 31, 2014, approximately 71.1% and 17.8% of the combined total of our residential, non-Home Today and construction loans held for investment were secured by properties in Ohio and Florida, respectively. Our 30 or more days delinquency ratios on those loans in Ohio and Florida at March 31, 2014 were 0.6% and 1.4%, respectively. Our 30 or more days delinquency ratio for the non-Home Today portfolio as a whole was 0.7% at March 31, 2014. Also, at March 31, 2014, approximately 39.1% and 28.8% of our home equity loans and lines of credit were secured by properties in Ohio and Florida, respectively. Our 30 days or more delinquency ratios on those loans in Ohio and Florida at March 31, 2014 were 1.3% and 1.6%, respectively. Our 30 or more days delinquency ratio for the home equity loans and lines of credit portfolio as a whole at March 31, 2014 was 1.3%. While we focus our attention on, and are concerned with respect to the resolution of all loan delinquencies, our highest concern relates to loans that are secured by properties in Florida. The "Allowance for Loan Losses" portion of the Critical Accounting Policies section that immediately follows this Overview, provides extensive details regarding our loan portfolio composition, delinquency statistics, our methodology in evaluating our loan loss provisions and the adequacy of our allowance for loan losses. In spite of recent improving credit metrics, as long as unemployment levels remain high, particularly in Ohio and Florida, and Florida housing values remain depressed, due to prior overbuilding and speculation which has resulted in considerable inventory on the market, we expect that we will continue to experience elevated levels of delinquencies and risk of loss.

Our residential Home Today loans are another area of credit risk concern. Although the recorded investment in these loans totaled \$162.7 million at March 31, 2014, and constituted only 1.6% of our total "held for investment" loan portfolio balance, these loans comprised 22.0% and 23.2% of our 90 days or greater delinquencies and our total delinquencies, respectively. At March 31, 2014, approximately 95.3% and 4.5% of our residential, Home Today loans were secured by properties in Ohio and Florida, respectively. At March 31, 2014, the percentages of those loans delinquent 30 days or more in Ohio and Florida were 15.5% and 13.7%, respectively. The disparity between the portfolio composition ratio and delinquency composition ratio reflects the nature of the Home Today loans. We do not

offer, and have not offered, loan products frequently considered to be designed to target sub-prime borrowers containing features such as higher fees or higher rates, negative amortization, or low initial payment features with adjustable interest rates. Our Home Today loans, the majority of which were entered into with borrowers that had credit profiles that would not have otherwise qualified for our loan products due to deficient credit scores, generally contained the same features as loans offered to our non-Home Today borrowers. The overriding objective of our Home Today lending, just as it is with our non-Home Today lending, was to create successful homeowners. We have attempted to manage our Home Today credit risk by requiring that borrowers attend pre- and post-borrowing financial management education and counseling and that the borrowers be referred to us by a sponsoring organization with which we have partnered. Further, to manage the credit aspect of these loans, inasmuch as the majority of these buyers do not have sufficient funds for required down payments, many loans include private mortgage insurance. At March 31, 2014, 47.0% of Home Today loans included private mortgage insurance coverage. From a peak recorded investment

Table of Contents

of \$306.6 million at December 31, 2007, the total recorded investment of the Home Today portfolio has declined to \$162.7 million at March 31, 2014. This trend generally reflects the evolving conditions in the mortgage real estate market and the tightening of standards imposed by issuers of private mortgage insurance. As part of our effort to manage credit risk, effective March 27, 2009, the Home Today underwriting guidelines were revised to be substantially the same as our traditional mortgage product. At March 31, 2014, the recorded investment in Home Today loans originated subsequent to March 27, 2009 was \$2.3 million. Unless and until lending standards and private mortgage insurance requirements loosen, we expect the Home Today portfolio to continue to decline in balance due to contractual amortization.

**Maintaining Access to Adequate Liquidity and Alternative Funding Sources.** For most insured depositories, customer and community confidence are critical to their ability to maintain access to adequate liquidity and to conduct business in an orderly fashion. The Company believes that maintaining high levels of capital is one of the most important factors in nurturing customer and community confidence. Accordingly, we have managed the pace of our growth in a manner that reflects our emphasis on high capital levels. At March 31, 2014, the Association's ratio of core capital to adjusted tangible assets (a basic industry measure that deems 5.00% or above to represent a "well capitalized" status) was 13.44%. The Association's current core capital ratio is lower than its ratio at September 30, 2013 (14.18%), due to an \$85 million cash dividend payment that the Association made to the Company, its sole shareholder, in December 2013. The amount of the dividend was determined using regulatory guidelines that allow dividends in an amount that does not exceed the Association's current calendar year to date net income, plus the preceding two year's retained net income. Because of its intercompany nature, this dividend payment did not impact the Company's consolidated capital ratios. We expect to continue to remain a well capitalized institution.

In managing its level of liquidity, the Company monitors available funding sources, which include attracting new deposits (including brokered CDs), borrowings from others, the conversion of assets to cash and the generation of funds through profitable operations. The Company has traditionally relied on retail deposits as its primary means in meeting its funding needs. At March 31, 2014, deposits totaled \$8.42 billion (including \$217.0 million of brokered CDs), while borrowings totaled \$1.07 billion and borrowers' advances and servicing escrows totaled \$118.6 million, combined. In evaluating funding sources, we consider many factors, including cost, duration, current availability, expected sustainability, impact on operations and capital levels.

To attract retail deposits, we offer our customers attractive rates of return on our deposit products. Our deposit products typically offer rates that are very competitive with the rates on similar products offered by other financial institutions. We intend to continue this practice.

We preserve the availability of alternative funding sources through various mechanisms. First, by maintaining high capital levels, we retain the flexibility to increase our balance sheet size without jeopardizing our capital adequacy. Effectively, this permits us to increase the rates that we offer on our deposit products thereby attracting more potential customers. Second, we pledge available real estate mortgage loans and investment securities with the FHLB of Cincinnati and the FRB-Cleveland. At March 31, 2014, these collateral pledge support arrangements provide the ability to immediately borrow an additional \$100.3 million from the FHLB of Cincinnati and \$161.6 million from the FRB-Cleveland Discount Window. From the perspective of collateral value securing FHLB of Cincinnati advances, our capacity limit for additional borrowings beyond the immediately available limits at March 31, 2014 was \$4.06 billion, subject to satisfaction of the FHLB of Cincinnati common stock ownership requirement. To satisfy the common stock ownership requirement we would need to increase our ownership of FHLB of Cincinnati common stock by an additional \$81.3 million. Third, we invest in high quality marketable securities that exhibit limited market price variability, and to the extent that they are not needed as collateral for borrowings, can be sold in the institutional market and converted to cash. At March 31, 2014, our investment securities portfolio totaled \$486.6 million. Finally, cash flows from operating activities have been a regular source of funds. During the six months ended March 31, 2014 and 2013, cash flows from operations totaled \$61.1 million and \$66.4 million, respectively.

Historically, a portion of the residential first mortgage loans that we originated were considered to be highly liquid as they were eligible for delivery/sale to Fannie Mae. However, due to delivery requirement changes imposed by Fannie Mae during and subsequent to the 2008 financial crisis, effective July 1, 2010, that was no longer an available source

of liquidity. In response to Fannie Mae's delivery requirement changes , during fiscal 2013 we took the following measures: (1) we sought out and completed \$276.9 million of non-agency eligible, whole loan sales, all on a servicing retained basis; and (2) we implemented certain loan origination changes required by Fannie Mae which resulted in our November 15, 2013 reinstatement as an approved seller to Fannie Mae. The non-agency sales which included both fixed-rate and Smart Rate loans, demonstrated that, with adequate lead time, the majority of our residential, first mortgage loan portfolio could be available for liquidity management purposes. Also, implementation of the loan origination changes required by Fannie Mae, to which a portion of our loan production will be subjected, elevates the level of liquidity available for those loans. At March 31, 2014, \$1.5 million of agency eligible, long-term, fixed-rate HARP II first mortgage loans were classified as "held for sale". During the six months ended March 31, 2014, \$17.4 million of agency-compliant HARP II loans and \$24.6 million of long-term, fixed-rate, agency-compliant, non-HARP II first mortgage loans were sold to Fannie Mae. As described earlier, we have implemented the loan

Table of Contents

origination changes which allow a portion of our first mortgage loan originations to be eligible for sale to Fannie Mae in either whole loan or mortgage backed security form.

Overall, while customer and community confidence can never be assured, the Company believes that our liquidity is adequate and that we have adequate access to alternative funding sources.

**Monitoring and Controlling Operating Expenses.** We continue to focus on managing operating expenses. Our ratio of non-interest expense to average assets was 1.55% for the six months ended March 31, 2014 and was also 1.55% for the six months ended March 31, 2013. As of March 31, 2014, our average assets per full-time employee and our average deposits per full-time employee were \$11.6 million and \$8.5 million, respectively. We believe that each of these measures compares favorably with the averages for our peer group. Our average deposits held at our branch offices (\$221.5 million per branch office as of March 31, 2014) contribute to our expense management efforts by limiting the overhead costs of serving our deposit customers. We will continue our efforts to control operating expenses as we grow our business.

**Critical Accounting Policies**

Critical accounting policies are defined as those that involve significant judgments and uncertainties, and could potentially give rise to materially different results under different assumptions and conditions. We believe that the most critical accounting policies upon which our financial condition and results of operations depend, and which involve the most complex subjective decisions or assessments, are our policies with respect to our allowance for loan losses, mortgage servicing rights, income taxes, pension benefits, and stock-based compensation.

**Allowance for Loan Losses.** We provide for loan losses based on the allowance method. Accordingly, all loan losses are charged to the related allowance and all recoveries are credited to it. Additions to the allowance for loan losses are provided by charges to income based on various factors which, in our judgment, deserve current recognition in estimating probable losses. We regularly review the loan portfolio and make provisions for loan losses in order to maintain the allowance for loan losses in accordance with accounting principles generally accepted in the United States of America. Our allowance for loan losses consists of two components:

- individual valuation allowances established for any impaired loans dependent on cash flows, such as performing (1) troubled debt restructurings, and IVAs related to a portion of the allowance on loans individually reviewed that represents further deterioration in the fair value of the collateral not yet identified as uncollectible; and
- general valuation allowances, which are comprised of quantitative GVAs, which are general allowances for loan losses for each loan type based on historical loan loss experience and qualitative GVAs, previously described as (2) MVAs, which are adjustments to the quantitative GVAs, maintained to cover uncertainties that affect our estimate of incurred probable losses for each loan type.

The qualitative GVAs expand our ability to identify and estimate probable losses and are based on our evaluation of the following factors, some of which are consistent with factors that impact the determination of quantitative GVAs. For example, delinquency statistics (both current and historical) are used in developing the quantitative GVAs while the trending of the delinquency statistics is considered and evaluated in the determination of the qualitative GVAs.

Factors impacting the determination of qualitative GVAs include:

- changes in lending policies and procedures including underwriting standards, collection, charge-off or recovery practices;
- changes in national, regional, and local economic and business conditions and trends including national, regional and local housing market factors and trends, such as the status of loans in foreclosure, real estate in judgment and real estate owned, and unemployment statistics and trends;
- changes in the nature and volume of the portfolios including home equity lines of credit nearing the end of the draw period;
- changes in the experience, ability or depth of lending management;
- changes in the volume or severity of past due loans, volume of nonaccrual loans, or the volume and severity of adversely classified loans including the trending of delinquency statistics (both current and historical), historical loan loss experience and trends, the frequency and magnitude of re-modifications of loans previously the subject of troubled debt restructurings, and uncertainty surrounding borrowers' ability to recover from temporary hardships for

which short-term loan modifications are granted;  
•changes in the quality of the loan review system;

40

---

Table of Contents

- changes in the value of the underlying collateral including asset disposition loss statistics (both current and historical) and the trending of those statistics, and additional charge-offs on individually reviewed loans;
- existence of any concentrations of credit;
- effect of other external factors such as competition, or legal and regulatory requirements including market conditions and regulatory directives that impact the entire financial services industry.

When loan modifications qualify as troubled debt restructurings and the loans are performing according to the terms of the restructuring, we record an IVA based on the present value of expected future cash flows, which includes a factor for subsequent potential defaults, discounted at the effective interest rate of the original loan contract. Potential defaults are distinguished from re-modifications as borrowers who default are generally not eligible for re-modification. At March 31, 2014, the balance of such individual valuation allowances was \$15.3 million. In instances when loans require re-modification, additional valuation allowances may be required. The new valuation allowance on a re-modified loan is calculated based on the present value of the expected cash flows, discounted at the effective interest rate of the original loan contract, considering the new terms of the modification agreement. Due to the immaterial amount of this exposure to date, we continue to capture this exposure as a component of our qualitative GVA evaluation. The significance of this exposure will be monitored and if warranted, we will enhance our loan loss methodology to include a new default factor (developed to reflect the estimated impact to the balance of the allowance for loan losses that will occur as a result of future re-modifications) that will be assessed against all loans reviewed collectively. If new default factors are implemented, the qualitative GVA methodology will be adjusted to preclude duplicative loss consideration.

We evaluate the allowance for loan losses based upon the combined total of the quantitative and qualitative GVAs. Generally, when the loan portfolio increases, absent other factors, the allowance for loan loss methodology results in a higher dollar amount of estimated probable losses than would be the case without the increase. Generally, when the loan portfolio decreases, absent other factors, the allowance for loan loss methodology results in a lower dollar amount of estimated probable losses than would be the case without the decrease.

Home equity loans and equity lines of credit generally have higher credit risk than traditional residential mortgage loans. These loans and credit lines are usually in a second lien position and when combined with the first mortgage, result in generally higher overall loan-to-value ratios. In a stressed housing market with high delinquencies and eroded housing prices, as arose beginning in 2008, these higher loan-to-value ratios represent a greater risk of loss to the Company. A borrower with more equity in the property has more of a vested interest in keeping the loan current compared to a borrower with little or no equity in the property. In light of the past weakness in the housing market, the current level of delinquencies and the current uncertainty with respect to future employment levels and economic prospects, we currently conduct an expanded loan level evaluation of our home equity loans and lines of credit, including bridge loans, which are delinquent 90 days or more. This expanded evaluation is in addition to our traditional evaluation procedures. Our home equity loans and lines of credit portfolio continues to comprise a significant portion of our net charge-offs, although the level of home equity loans and lines of credit charge-offs has receded over the last year from levels previously experienced. At March 31, 2014, we had a recorded investment of \$1.77 billion in home equity loans and equity lines of credit outstanding, 0.7% of which were 90 days or more past due.

Construction loans generally have greater credit risk than traditional residential real estate mortgage loans. The repayment of these loans depends upon the availability of permanent financing upon completion of all improvements. In the event we make a loan on property that is not yet approved for the planned development, there is the risk that approvals will not be granted or will be delayed. These events may adversely affect the borrower and the collateral value of the property. Construction loans also expose us to the risk that improvements will not be completed on time in accordance with specifications and projected costs.

We periodically evaluate the carrying value of loans and the allowance is adjusted accordingly. While we use the best information available to make evaluations, future additions to the allowance may be necessary based on unforeseen changes in loan quality and economic conditions.

Table of Contents

The following table sets forth the composition of the portfolio of loans held for investment, by type of loan segregated by geographic location for the periods indicated, excluding loans held for sale. The majority of our construction loan portfolio are secured by properties located in Ohio and the balances of other consumer loans are considered immaterial. Therefore, neither were segregated by geographic location.

Table of Contents

The following table sets forth the allowance for loan losses allocated by loan category, the percent of allowance in each category to the total allowance, and the percent of loans in each category to total loans at the dates indicated. The allowance for loan losses allocated to each category is not necessarily indicative of future losses in any particular category and does not restrict the use of the allowance to absorb losses in other categories.

	March 31, 2014			December 31, 2013

During the three months ended March 31, 2014, the total allowance for loan losses decreased \$1.9 million, to \$83.4 million from \$85.3 million at December 31, 2013, as we recorded a \$5.0 million provision for loan losses, which was less than the actual net charge-offs of \$6.9 million for the quarter. Net charge-offs included \$1.3 million in recoveries that were recorded during the current quarter, representing the cumulative one-time payment received as a result of PMIC increasing the cash percentage of the partial claim payment plan as discussed in Note 4 to the Unaudited Interim Consolidated Financial Statements: LOANS AND ALLOWANCE FOR LOAN LOSSES. The \$1.9 million decrease in the balance of the allowance for loan losses during the quarter ended March 31, 2014 was related to loans evaluated collectively. Refer to the "activity in the allowance for loan losses" and "analysis of the allowance for loan losses" tables in Note 4 of the Notes to the Unaudited Interim Consolidated Financial Statements for more information. Other than the less significant construction and other consumer loans segments, changes during the three months ended March 31, 2014 in the balances of the GVAs for the loans evaluated collectively related to the significant loan segments are described as follows:

**Residential non-Home Today** – The total balance of this segment of the loan portfolio increased 3.1% or \$250.9 million during the quarter, while the total allowance for loan losses for this segment decreased 2.5% or \$0.8 million. The

portion of this loan segment's allowance for loan losses that was determined by evaluating groups of loans collectively (i.e. those loans that were not individually evaluated), decreased \$1.0 million, or 4.0%, from \$25.0 million at December 31, 2013 to \$24.0 million at March 31, 2014. The ratio of this portion of the allowance for loan losses to the total balance of loans in this loan segment that were evaluated collectively, decreased to 0.29% at March 31, 2014 from 0.31% at December 31, 2013. Total delinquencies decreased 9.4% to \$60.6 million at March 31, 2014 from \$66.9 million at December 31, 2013. Loans 90 or more days delinquent decreased 7.8% to \$44.4 million at March 31, 2014 from \$48.2 million at December 31, 2013. Net charge-offs for the quarter ended March 31, 2014 were \$2.3 million less at \$2.7 million as compared to \$5.0 million during the quarter ended March 31, 2013. This is partially due

Table of Contents

to \$0.9 million in recoveries that were recorded during the current quarter as a result of the PMIC partial claim catch-up payment. The credit profile of this portfolio segment improved in total during the quarter due to the addition of high credit quality, residential first mortgage loans. As there continues to be a consistent improving trend in this portfolio, reductions in the allowance are warranted.

**Residential Home Today** – The total balance of this segment of the loan portfolio decreased 3.6% or \$6.1 million as new originations have effectively stopped since the imposition of more restrictive lending requirements in 2009. The total allowance for loan losses for this segment decreased \$3.6 million or 17.4%. The portion of this loan segment's allowance for loan losses that was determined by evaluating groups of loans collectively (i.e. those loans that were not individually evaluated), decreased by 24.4% from \$14.2 million at December 31, 2013 to \$10.7 million at March 31, 2014. Similarly, the ratio of this portion of the allowance to the total balance of loans in this loan segment that were evaluated collectively, decreased 3.3% to 11.8% at March 31, 2014 from 15.2% at December 31, 2013. Total delinquencies decreased from \$32.6 million at December 31, 2013 to \$25.1 million at March 31, 2014. Delinquencies greater than 90 days decreased from \$17.5 million to \$16.2 million during the same period. Net charge-offs were less at \$1.1 million during the quarter ended March 31, 2014, which is net of \$0.4 million of recovery recorded during the current quarter as a result of the PMIC partial claim catch-up payment, as compared to \$3.8 million during the quarter ended March 31, 2013. As there continues to be a consistent improving credit profile trend in this portfolio and the portfolio balance declines, reductions in the allowance are warranted.

**Home Equity Loans and Lines of Credit** - The total balance of this segment of the loan portfolio decreased 2.7% or \$48.4 million from \$1.81 billion at December 31, 2013 to \$1.77 billion at March 31, 2014. The total allowance for loan losses for this segment increased 8.2% to \$33.8 million from \$31.2 million at December 31, 2013. The portion of this loan segment's allowance for loan losses that was determined by evaluating groups of loans collectively (i.e. those loans that were not individually evaluated) increased by \$2.6 million, or 8.5%, from \$30.7 million to \$33.2 million during the quarter ended March 31, 2014. The ratio of this portion of the allowance to the total balance of loans in this loan segment that were evaluated collectively also increased to 1.92% at March 31, 2014 from 1.72% at December 31, 2013. Net charge-offs for this loan segment during the current quarter were less at \$3.1 million as compared to \$5.2 million for the quarter ended March 31, 2013. Total delinquencies for this portfolio segment decreased 2.5% to \$22.4 million at March 31, 2014 as compared to \$22.9 million at December 31, 2013. Delinquencies greater than 90 days increased 4.9% to \$13.1 million at March 31, 2014 from \$12.5 million at December 31, 2013. While continued improvement in early stage delinquencies and charge-offs improved during the quarter, severely delinquent loans saw a slight increase, resulting in the allowance for this loan segment to slightly increase.

Loan losses on home equity loans and lines of credit continue to comprise a significant portion of our losses and are expected to continue to do so for the foreseeable future, until non-performing loan balances begin to decrease by more than the charge-offs.

Table of Contents

The following table sets forth activity in our allowance for loan losses segregated by geographic location for the periods indicated. Construction loans are secured by properties located in Ohio and the balances of consumer and other loans are considered immaterial, therefore neither was segregated by geography.

Table of Contents

The net charge-offs of \$20.1 million during the six months ended March 31, 2014 decreased from \$27.2 million during the six months ended March 31, 2013, as credit quality continued to improve during the recent quarter. During the quarter ended December 31, 2013, a new practice of charging off the remaining balance of loans that remained delinquent for at least 1,500 days as a result of stalled foreclosure processes was implemented. Of the residential charge-offs during the six months ended March 31, 2014, \$5.3 million were attributable to full charge-offs of loans 1,500 days past due. During the quarter ended March 31, 2014, \$1.3 million in recoveries were recorded representing the cumulative one-time payment received as a result of PMIC increasing the cash percentage of the partial claim payment plan as discussed in Note 4 to the Unaudited Interim Consolidated Financial Statements: LOANS AND ALLOWANCE FOR LOAN LOSSES. The remaining net charge-offs for the six months ended March 31, 2014 were \$16.1 million, a decrease of \$11.1 million from the six months ended March 31, 2013.

We continue to evaluate loans becoming delinquent for potential losses and record provisions for our estimate of those losses. We expect a moderate level of charge-offs to continue as the delinquent loans are resolved in the future and uncollected balances are charged against the allowance.

The following tables set forth the number and recorded investment in loan delinquencies by type, segregated by geographic location and severity of delinquency at the dates indicated. The majority of our construction loan portfolio is secured by properties located in Ohio and there were no delinquencies in the consumer loan portfolio; therefore, neither was segregated by geography.

Loans delinquent 90 days or more decreased 0.1% to 0.7% of total net loans at March 31, 2014 from 0.8% at December 31, 2013, and decreased 0.4% from 1.1% at March 31, 2013. Loans delinquent 30 to 89 days decreased 0.1% to 0.3% of total net loans at March 31, 2014 from 0.4% at both December 31, 2013 and March 31, 2013. During the last several years, the inability of borrowers to repay their loans has been primarily a result of high unemployment and uncertain economic prospects in our primary lending markets. Although regional employment levels have improved, the breadth and sustainability of the economic recovery remains tenuous and, accordingly, we expect some borrowers who are current on their loans at March 31, 2014 to experience payment problems in the future. The excess number of housing units available for sale in certain segments of the market today also may limit a borrower's ability to sell a home he or she can no longer afford. In many Florida areas, housing values continue to remain depressed due to prior rapid building and speculation, which has resulted in considerable inventory on the market and may limit a borrower's ability to sell a home at a price that equals or exceeds the balance of the outstanding mortgage indebtedness.

Table of Contents

The following table sets forth the recorded investments and categories of our non-performing assets and troubled debt restructurings at the dates indicated.

The totals at March 31, 2014, December 31, 2013, September 30, 2013 and March 31, 2013 include \$3.5 million, (1) \$3.8 million, \$5.3 million, and \$4.9 million, respectively, of performing home equity lines of credit included in nonaccrual, pursuant to regulatory guidance regarding senior lien delinquency issued in January 2012.

Totals at March 31, 2014, December 31, 2013, September 30, 2013 and March 31, 2013, include \$54.9 million, \$56.0 million, \$54.3 million and \$47.0 million, respectively, in troubled debt restructurings, which are less than 90 (2) days past due but included with nonaccrual loans for a minimum period of six months from the restructuring date due to their non-accrual status prior to restructuring, because they have been partially charged off, or because all borrowers have been discharged of their obligation through a Chapter 7 bankruptcy (see note 4 below).

Includes \$26.6 million, \$27.9 million, \$30.6 million and \$35.7 million in troubled debt restructurings that are 90 (3) days or more past due at March 31, 2014, December 31, 2013, September 30, 2013 and March 31, 2013, respectively.

At March 31, 2014, December 31, 2013, September 30, 2013 and March 31, 2013, the recorded investment of (4) troubled debt restructurings in non-accrual status includes \$33.3 million, \$33.7 million, \$34.0 million and \$30.9 million of performing loans in Chapter 7 bankruptcy status where all borrowers have been discharged of their obligation per the OCC BAAS interpretive guidance issued in July 2012.

(5) At March 31, 2014, December 31, 2013, September 30, 2013 and March 31, 2013, \$14.0 million, \$14.3 million, \$15.7 million and \$15.1 million of accruing, performing loans in Chapter 7 bankruptcy status, where at least one borrower has been discharged of their obligation, are reported as troubled debt restructurings per the OCC BAAS

interpretive guidance issued in July 2012.

The gross interest income that would have been recorded during the six months ended March 31, 2014 and March 31, 2013 on non-accrual loans if they had been accruing during the entire period and troubled debt restructurings if they had been current and performing in accordance with their original terms during the entire period was \$6.7 million and \$8.1 million, respectively. The interest income recognized on those loans included in net income for the six months ended March 31, 2014 and March 31, 2013 was \$3.4 million and \$4.0 million, respectively.

Table of Contents

At March 31, 2014, December 31, 2013, September 30, 2013 and March 31, 2013, the recorded investment of impaired loans includes accruing troubled debt restructurings and loans that are returned to accrual status when contractual payments are less than 90 days past due. These loans continue to be individually evaluated for impairment until contractual payments are less than 30 days past due. Also, the recorded investment of non-accrual loans includes loans that are not included in the recorded investment of impaired loans because they are included in loans collectively evaluated for impairment. The table below sets forth the recorded investments and categories between non-accrual loans and impaired loans at the dates indicated.

	March 31, 2014	December 31, 2013	September 30, 2013	March 31, 2013
	(Dollars in thousands)			
Non-Accrual Loans	\$142,697	\$147,910	\$155,845	\$165,999
Accruing TDRs	108,211	111,132	116,831	124,670
Performing Impaired	7,184	8,665	7,761	6,557
Collectively Evaluated	(13,314 )	(14,648 )	(17,396 )	(20,381 )
Total Impaired loans	\$244,778	\$253,059	\$263,041	\$276,845

In response to the economic challenges facing many borrowers, the Association continues to modify loans, resulting in \$189.7 million of total troubled debt restructurings (accrual and non-accrual) recorded at March 31, 2014. There was a \$12.0 million decrease in the recorded investment of troubled debt restructured loans from September 30, 2013 and a \$17.6 million decrease in the aggregate balance from March 31, 2013.

Troubled debt restructuring is a method increasingly used to help families keep their homes and preserve our neighborhoods. This involves making changes to the borrowers' loan terms through interest rate reductions, either for a specific period or for the remaining term of the loan; term extensions, including beyond that provided in the original agreement; principal forgiveness; capitalization of delinquent payments in special situations; or some combination of the above. Loans discharged through Chapter 7 bankruptcy are also reported as TDRs per OCC interpretive guidance issued in July 2012. For discussion on impairment measurement, see Note 4 to the Unaudited Interim Consolidated Financial Statements: LOANS AND ALLOWANCE FOR LOAN LOSSES.

Table of Contents

The following table sets forth the recorded investment in accrual and non-accrual troubled debt restructured loans, by the types of concessions granted, as of March 31, 2014.

	Reduction in Interest Rate	Payment Extensions	Forbearance or Other Actions	Multiple Concessions	Multiple Modifications	Bankruptcy	Total

Troubled debt restructurings in accrual status are loans accruing interest and performing according to the terms of the restructuring. To be performing, a loan must be less than 90 days past due as of the report date. Non-accrual, performing status indicates that a loan was not accruing interest at the time of modification, continues to not accrue interest and is performing according to the terms of the restructuring, but has not been current for at least six consecutive months since its modification or is being classified as non-accrual per the OCC guidance on loans in Chapter 7 bankruptcy status, where all borrowers have been discharged of their obligation. Non-accrual, non-performing status includes loans that are not accruing interest because they are greater than 90 days past due and therefore not performing according to the terms of the restructuring.

Table of Contents

On March 31, 2014 the unpaid principal balance of our home equity loans and lines of credit portfolio consisted of \$161.2 million in home equity loans (which included \$130.5 million of home equity lines of credit which are in the amortization period and no longer eligible to be drawn upon), \$1.4 million in bridge loans and \$1.60 billion in home equity lines of credit. The following table sets forth credit exposure, principal balance, percent delinquent 90 days or more, the mean CLTV percent at the time of origination and the current mean CLTV percent of our home equity loans, home equity lines of credit and bridge loan portfolio as of March 31, 2014. Home equity lines of credit in the draw period are reported according to geographic distribution.

	Credit Exposure	Principal Balance	Percent Delinquent 90 days or More	Mean CLTV Percent at Origination (2)	Current Mean CLTV Percent (3)
(Dollars in thousands)					
Home equity lines of credit in draw period (by state)					
Ohio	\$1,231,105	\$592,709	0.37	% 60	% 63
Florida	673,955	488,979	0.73	% 62	% 79
California	283,282	206,374	0.37	% 67	% 69
New Jersey	129,584	81,258	0.24	% 59	% 67
Other (1)	380,965	226,924	0.45	% 64	% 68
Total home equity lines of credit in draw period	2,698,891	1,596,244	0.48	% 61	% 67
Home equity lines in repayment, home equity loans and bridge loans	162,567	162,567	3.33	% 67	% 53
Total	\$2,861,458	\$1,758,811	0.75	% 62	% 66

(1) No individual state has a credit exposure or drawn balance greater than 5% of the total.

(2) Mean CLTV percent at origination for all home equity lines of credit is based on the committed amount.

Current Mean CLTV is based on best available first mortgage and property values as of March 31, 2014. Property values are estimated using HPI data published by the FHFA. Current Mean CLTV percent for home equity lines of credit in the draw period is calculated using the committed amount. Current Mean CLTV on home equity lines of credit in the repayment period is calculated using the principal balance.

At March 31, 2014, 42.6% of our home equity lending portfolio was either in first lien position (25.2%) or was in a subordinate (second) lien position behind a first lien that we held (7.5%) or behind a first lien that was held by a loan that we serviced for others (9.9%). In addition, at March 31, 2014, 18.5% of our home equity line of credit portfolio in the draw period was making only the required minimum payment on their outstanding line balance.

Table of Contents

The following table sets forth credit exposure, principal balance, percent delinquent 90 days or more, the mean CLTV percent at the time of origination and the current mean CLTV percent of our home equity loans, home equity lines of credit and bridge loan portfolio as of March 31, 2014. Home equity lines of credit in the draw period are stratified by the calendar year originated:

	Credit Exposure	Principal Balance	Percent Delinquent 90 days or More	Mean CLTV Percent at Origination (1)	Current Mean CLTV Percent (2)	
	(Dollars in thousands)					
Home equity lines of credit in draw period						
2004 and prior	\$660,778	\$348,484	0.72	% 57	% 59	%
2005	102,418	62,042	0.86	% 67	% 72	%
2006	245,800	158,809	0.57	% 65	% 78	%
2007	384,487	270,868	0.56	% 67	% 80	%
2008	804,446	520,805	0.40	% 63	% 69	%
2009	329,703	163,092	0.09	% 55	% 61	%
2010	28,847	12,501	0.20	% 57	% 56	%
2011 (3)	232	149	—	% 39	% 61	%
2012	28,759	13,307	—	% 51	% 50	%
2013	86,283	36,218	—	% 59	% 57	%
2014	27,138	9,969	—	% 61	% 60	%
Total home equity lines of credit in draw period	2,698,891	1,596,244	0.48	% 61	% 67	%
Home equity lines in repayment, home equity loans and bridge loans	162,567	162,567	3.33	% 67	% 53	%
Total	\$2,861,458	\$1,758,811	0.75	% 62	% 66	%

(1) Mean CLTV percent at origination for all home equity lines of credit is based on the committed amount.

Current Mean CLTV is based on best available first mortgage and property values as of March 31, 2014. Property values are estimated using HPI data published by the FHFA. Current Mean CLTV percent for home equity lines of credit in the draw period is calculated using the committed amount. Current Mean CLTV on home equity lines of credit in the repayment period is calculated using the principal balance.

(3) Amounts represent home equity lines of credit that were previously originated, and that were closed and subsequently replaced in 2011.

As described above, in light of the past and continuing weakness in the housing market, the current level of delinquencies and the uncertainty with respect to future employment levels and economic prospects, we currently conduct an expanded loan level evaluation of our equity lines of credit which are delinquent 90 days or more.

Table of Contents

The following table sets forth the breakdown of current mean CLTV percentages for our home equity lines of credit in the draw period as of March 31, 2014.

	Credit Exposure	Principal Balance	Percent of Total	Percent Delinquent 90 days or More	Mean CLTV Current Percent at Origination (2)	Current Mean CLTV Percent (3)
(Dollars in thousands)						
Home equity lines of credit in draw period (by current mean CLTV)						
< 80%	\$1,804,338	\$937,174	58.7 %	0.47 %	54 %	54 %
80 - 89.9%	359,194	235,801	14.8 %	0.69 %	77 %	85 %
90 - 100%	204,828	155,068	9.7 %	0.38 %	80 %	95 %
> 100%	268,216	245,775	15.4 %	0.33 %	80 %	122 %
Unknown	62,315	22,426	1.4 %	1.27 %	32 %	(1) %
	\$2,698,891	\$1,596,244	100.0 %	0.48 %	61 %	67 %

(1) Market data necessary for stratification is not readily available.

(2) Mean CLTV percent at origination for all home equity lines of credit is based on the committed amount.

(3) Current Mean CLTV is based on best available first mortgage and property values as of March 31, 2014. Property values are estimated using HPI data published by the FHFA. Current Mean CLTV percent for home equity lines of credit in the draw period is calculated using the committed amount. Current Mean CLTV on home equity lines of credit in the repayment period is calculated using the principal balance.

**Mortgage Servicing Rights.** Mortgage servicing rights represent the present value of the estimated future net servicing fees expected to be received pursuant to the right to service loans that are in our loan servicing portfolio but are owned by others. Mortgage servicing rights are recognized as assets for both purchased rights and for the allocated value of retained servicing rights on loans sold. The most critical accounting policy associated with mortgage servicing is the methodology used to determine the fair value of capitalized mortgage servicing rights. A number of estimates affect the capitalized value and include: (1) the mortgage loan prepayment speed assumption; (2) the estimated prospective cost expected to be incurred in connection with servicing the mortgage loans; and (3) the discount factor used to compute the present value of the mortgage servicing right. The mortgage loan prepayment speed assumption is significantly affected by interest rates. In general, during periods of falling interest rates, mortgage loans prepay faster and the value of our mortgage servicing assets decreases. Conversely, during periods of rising rates, the value of mortgage servicing rights generally increases due to slower rates of prepayments. The estimated prospective cost expected to be incurred in connection with servicing the mortgage loans is deducted from the retained servicing fee (gross mortgage loan interest rate less amounts remitted to third parties – investor pass-through rate, guarantee fee, mortgage insurance fee, etc.) to determine the net servicing fee for purposes of capitalization computations. To the extent that prospective actual costs incurred to service the mortgage loans differ from the estimate, our future results will be adversely (or favorably) impacted. The discount factor selected to compute the present value of the servicing right reflects expected marketplace yield requirements.

Table of Contents

The amount and timing of mortgage servicing rights amortization is adjusted monthly based on actual results. In addition, on a quarterly basis, we perform a valuation review of mortgage servicing rights for potential decreases in value. This quarterly valuation review entails applying current assumptions to the portfolio classified by interest rates and, secondarily, by prepayment characteristics. At March 31, 2014, the capitalized value of our right to service \$2.74 billion of loans for others was \$12.8 million, or 0.47% of the serviced loan portfolio, and was based on an estimated weighted-average life of 5.2 years. Activity in the balance of mortgage servicing rights is summarized as follows:

	Three Months Ended			March 31, 2013		
	March 31, 2014			March 31, 2013		
	Mortgage Servicing Asset	Valuation Allowance	Net	Mortgage Servicing Asset	Valuation Allowance	Net

Table of Contents

At March 31, 2014, substantially all of the approximately 28,900 loans serviced for Fannie Mae and others were performing in accordance with their contractual terms and management believes that it had no material repurchase obligations associated with these loans at that date. The following tables summarize our repurchases and loss reimbursements to investors, charges related to default servicing non-compliance and compensatory fees incurred during the indicated periods. All transactions were related to loans serviced for Fannie Mae. There were no material repurchase or loss reimbursement requests outstanding at March 31, 2014. An accrual for \$1.1 million has been established for probable losses at March 31, 2014. On November 7, 2013, the Association entered into a resolution agreement with Fannie Mae pursuant to which, on November 14, 2013, the Association remitted \$3.1 million to Fannie Mae. The remittance amount included \$0.4 million related to outstanding mortgage insurance claim payments on 42 loans. Under the terms of the resolution agreement, Fannie Mae withdrew all outstanding repurchase and make-whole demands and generally waived its right to enforce future repurchase obligations with respect to all mortgage loans (approximately 23,400 active loans or loans with a remaining balance) that were originated by the Association between January 1, 2000 and December 31, 2008 and delivered to Fannie Mae prior to January 1, 2009. The Association believes that by entering into this resolution agreement, a potentially large uncertainty with respect to future performance has been substantially reduced. Completion of the resolution agreement had no impact on earnings as the payment was fully funded by previously established accruals.

	Three Months Ended					
	March 31, 2014			March 31, 2013		
	Number of Loans	Balance	Losses or Charges Incurred	Number of Loans	Balance	Losses or Charges Incurred
	(Dollars in thousands)					
Repurchased loans:						
Non-recourse, non-performing loans(1)	—	\$—	\$—	1	\$138	\$7
Non-recourse, performing loans(2)	—	—	—	1	247	—
Post-disposition file reviews(3)	—	—	—	7	—	616
Compensatory fees related to default servicing(4)	—	—	9	—	—	165
	—	\$—	\$9	9	\$385	\$788
	Six Months Ended					
	March 31, 2014			March 31, 2013		
	Number of Loans	Balance	Losses or Charges Incurred	Number of Loans	Balance	Losses or Charges Incurred
	(Dollars in thousands)					
Repurchased loans:						
Non-recourse, non-performing loans(1)	—	\$—	\$—	1	\$138	\$7
Non-recourse, performing loans(2)	—	—	—	5	780	—
Post-disposition file reviews(3)	1	—	51	13	—	967
Compensatory fees related to default servicing(4)	—	—	95	—	—	210
	1	\$—	\$146	19	\$918	\$1,184

(1) Repurchases of non-recourse, non-performing loans were generally attributable to underwriting (primarily debt-to-income ratio) non-compliance.

(2) Repurchases of non-recourse, performing loans were the result of post-sales file reviews that identified underwriting (primarily debt-to-income ratio) non-compliance.

(3) Post-disposition file reviews resulted in losses or charges when loans which had been sold to Fannie Mae failed to perform; the underlying collateral was sold; a loss was incurred; and a post-disposition file review identified underwriting (primarily debt-to-income ratio) non-compliance.

(4) Compensatory fees related to default servicing represented instances in which the Association's default servicing procedures did not comply with Fannie Mae's servicing requirements.

Income Taxes. We consider accounting for income taxes a critical accounting policy due to the subjective nature of certain estimates that are involved in the calculation. We use the asset/liability method of accounting for income taxes in which deferred tax assets and liabilities are established for the temporary differences between the financial reporting basis and the tax basis of our assets and liabilities. We must assess the realization of the deferred tax asset and, to the extent that we believe that

Table of Contents

recovery is not likely, a valuation allowance is established. Adjustments to increase or decrease existing valuation allowances, if any, are charged or credited, respectively, to income tax expense. At March 31, 2014, no valuation allowances were outstanding and even though we have determined a valuation allowance is not required for deferred tax assets at March 31, 2014, there is no guarantee that those assets will be recognizable in the future.

**Pension Benefits.** The determination of our obligations and expense for pension benefits is dependent upon certain assumptions used in calculating such amounts. Key assumptions used in the actuarial valuations include the discount rate and expected long-term rate of return on plan assets. Actual results could differ from the assumptions and market driven rates may fluctuate. Significant differences in actual experience or significant changes in the assumptions could materially affect future pension obligations and expense.

**Stock-based Compensation.** We recognize the cost of associate and director services received in exchange for awards of equity instruments based on the grant date fair value of those awards in accordance with FASB ASC 718, "Compensation—Stock Compensation."

We estimate the per share value of option grants using the Black-Scholes option pricing model using assumptions for expected dividend yield, expected stock price volatility, risk-free interest rate and expected option term. These assumptions are subjective in nature and involve uncertainties, and therefore, cannot be determined with precision. The per share value of options is highly sensitive to changes in assumptions. In general, the per share fair value of options will move in the same direction as changes in the expected stock price volatility, risk-free interest rate and expected option term, and in the opposite direction from changes in expected dividend yield. For example, the per share fair value of options will generally increase as expected stock volatility increases, risk-free interest rate increases, expected option term increases and expected dividend yield decreases. The use of different assumptions or different option pricing models could result in materially different per share fair values of options.

Table of Contents

Comparison of Financial Condition at March 31, 2014 and September 30, 2013

Total assets increased \$265.1 million, or 2%, to \$11.53 billion at March 31, 2014 from \$11.27 billion at September 30, 2013. This increase was mainly the result of increases in the balances of our loans held for investment portfolio and investment securities partially offset by a decrease in the balance of cash and cash equivalents.

Cash and cash equivalents decreased \$18.2 million, or 6%, to \$267.8 million at March 31, 2014 from \$286.0 million at September 30, 2013, as our most liquid assets have been reinvested into investment securities and have been used to fund

reductions in the balances of deposits.

Investment securities increased \$9.2 million, or 2%, to \$486.6 million at March 31, 2014 from \$477.4 million at September 30, 2013. Investment securities increased, as \$71.3 million in purchases exceeded \$59.9 million in principal paydowns and \$1.8 million of net acquisition premium amortization that occurred in the mortgage-backed securities portfolio during the six months ended March 31, 2014. There were no sales of investment securities during the six months ended March 31, 2014.

Mortgage loans held for sale decreased \$2.7 million, or 64%, to \$1.5 million at March 31, 2014 from \$4.2 million at September 30, 2013. During the six months ended March 31, 2014, loan sales of \$42.0 million were completed, consisting of \$24.6 million of conforming fifteen and thirty year, fixed-rate loans delivered to Fannie Mae subsequent to our November 2013 reinstatement as approved seller and \$17.4 million of conforming fifteen and thirty year, fixed-rate loans that qualified under Fannie Mae's Home Affordable Refinance Program.

Loans held for investment, net, increased \$272.8 million, or 3%, to \$10.36 billion at March 31, 2014 from \$10.08 billion at September 30, 2013. Supported by consistent loan growth, residential mortgage loans increased \$355.1 million, or 4%, to \$8.65 billion at March 31, 2014. The increase in residential mortgage loans included the negative impact of \$13.7 million in net charge-offs during the six months ended March 31, 2014. The total allowance for loan losses decreased \$9.1 million, or 10%, to \$83.4 million at
