

CHINA FIRE & SECURITY GROUP, INC.
Form 10-K/A
November 02, 2009

UNITED STATES
SECURITIES AND EXCHANGE COMMISSION
WASHINGTON, D.C. 20549

AMENDMENT NO. 2 TO
FORM 10-K

(Mark One)

ANNUAL REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES
EXCHANGE ACT OF 1934

For the fiscal year ended December 31, 2008

OR

TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE
SECURITIES EXCHANGE ACT OF 1934

For the transition period _____ to _____

Commission file number: 001-33588

CHINA FIRE & SECURITY GROUP, INC.
(Exact name of registrant as specified in its charter)

Florida
(State of incorporation)

65-1193022
(I.R.S. Employer Identification No.)

B-2508 TYG Center, C2 Dongsanhuanbeilu,
Chaoyang District, Beijing 100027,
People's Republic of China
(Address of principal executive offices)

(86-10) 8441 7400
(Issuer's telephone number, including area code)

Securities registered pursuant to Section 12(b) of the Exchange Act:

Common Stock, \$.001 Par Value
(Title of Class)

The Nasdaq Capital Market, LLC
(Name of each exchange on which registered)

Securities registered pursuant to Section 12(g) of the Exchange Act: None.

Indicate by check mark if the registrant is a well-known seasoned issuer, as defined in Rule 405 of the Securities Act.
Yes No

Edgar Filing: CHINA FIRE & SECURITY GROUP, INC. - Form 10-K/A

Indicate by check mark if the registrant is not required to file reports pursuant to Section 13 or Section 15(d) of the Act. Yes No

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Sections 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes No

Indicate by check mark if disclosure of delinquent filers pursuant to Item 405 of Regulation S-K is not contained herein, and will not be contained, to the best of registrant's knowledge, in definitive proxy or information statements incorporated by reference in Part III of this Form 10-K or any amendment to this Form 10-K.

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, or a smaller reporting company. See the definitions of "large accelerated filer," "accelerated filer" and "smaller reporting company" in Rule 12b-2 of the Exchange Act.

Large accelerated filer Accelerated filer Non-accelerated filer Smaller reporting
(Do not check if a smaller company
reporting company)

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Act):
Yes No

The aggregate market value of the 12,170,527 shares of voting and non-voting common equity stock held by non-affiliates of the registrant was \$ 97,607,627 as of June 30, 2008, the last business day of the registrant's most recently completed second fiscal quarter, based on the last sale price of the registrant's common stock on such date of \$8.02 per share, as reported by The NASDAQ Stock Market, Inc.

As of March 13, 2009, there were 27,586,593 shares of common stock of China Fire & Security Group, Inc. outstanding.

EXPLANATORY NOTE

This Amendment No. 2 to our Annual Report on Form 10-K initially filed with the Securities and Exchange Commission (the "Commission") on March 16, 2009 is being filed to correct a typographical error on the date of the Report of Independent Registered Public Accounting Firm.

PART I

Item 1. Business

Overview

We are engaged primarily in the design, development, manufacture and sale of a variety of fire safety products for the industrial fire safety market and the design and installation of industrial fire safety systems in which we primarily use our own fire safety products. To a minor extent, we provide maintenance services for customers of our industrial fire safety systems. Our business is primarily in China, where we operate sales and liaison offices in more than 20 cities, but we are expanding our business overseas by providing integrated fire safety systems.

We market our industrial fire safety products and systems primarily to major companies in the iron and steel, power and petrochemical industries in China. In 2008, we also secured significant contracts with nuclear power plants. We are further developing our business in the transportation sector, including subways and highway tunnels. We plan to expand our marketing efforts to secure business in these industries.

We have internal research and development facilities engaged primarily in furthering fire safety technologies. We believe that our technologies allow us to offer cost-effective and high-quality fire safety products and systems. We have developed products for industrial fire detecting and extinguishing. We believe that we are the leading manufacturer in China which has successfully developed a comprehensive line of linear heat detectors.

We are the result of a share exchange completed on October 27, 2006 between Unipro Financial Services, Inc., a Florida corporation (“Unipro”) and the shareholders of China Fire Protection Group, Inc., a limited liability company organized under the laws of the British Virgin Islands (“CFPG”). The share exchange resulted in the change of control of Unipro, with the former shareholders of CFPG owning approximately 80.5% of the company on a fully diluted basis after the share exchange. The directors and officers of CFPG became our directors and officers in conjunction with the share exchange. Effective as of January 31, 2007 we changed our name to China Fire & Security Group, Inc.

We have twice been ranked as the leading Chinese industrial fire safety company by the China Association for Fire Prevention based on six major factors including total revenue, growth rate, net profit, return on assets, investment in research and development and intellectual property. In 2008, we were also ranked as the leading fire protection brand in China in a survey conducted by www.HC360.com. HC360 is a leading B2B electronic commerce services provider in China and runs the largest commercial website in China's fire protection industry (www.fire.HC360.com). Our key products include linear heat detectors and water mist extinguishers. Our products have been used by our customers in more than 20 provinces throughout China.

Our Strategy:

We plan to implement the following specific strategies to achieve our growth goals:

1) Strengthen and further develop our total solution business. We plan to continue to serve our current customers and gain additional market share, and capture business in new industries and international markets

As the leading brand in China's industrial fire protection industry, China Fire has a long list of mid-to-high end customers in various industrial verticals and specialty constructions. By fully utilizing the Company's brand name and influence in the marketplace, China Fire will adhere to and further develop its business model in providing total fire protection systems to our customers. As a result of the global financial downturn, China Fire's primary target industries, including iron and steel, power generation and, petrochemicals industries, have become the recipient of favorable recovery policies from the Chinese government. China Fire will continue to gain growth opportunities provided by the government's support for consolidation and technical upgrades in these industries.

China will issue a major amendment to the national fire law on May 1, 2009. The new fire law will stipulate higher requirements for fire safety technologies and products. China Fire will focus on serving the new industrial build-outs, rebuild and upgrades, and maintenance projects to solidify its existing customer base and to further enhance its competitive position in the market. The Company will expand into other sectors by promoting its new technologies and products and strengthening synergistic cooperation in the marketplace. The Company will also pursue business opportunities in select international markets.

2) Strengthen technological innovation and intellectual property protection and influence the enhancement of new product standards and fire codes

China Fire continues to invest in technological innovation and will deliver new products with leading technologies and strong potential market demand. The Company will increase its focus the registration of intellectual property rights and increase its efforts crackdown on infringing products. China Fire will also continue to proactively participate in the development of various industry standards and code enhancements in light of its leading fire safety technologies. The Company plans to continue to gain additional market share as a result of its superior product offering and competitive pricing.

3) Continue to selectively explore strategic M&A targets to enhance our competitive advantages and financial results

To supplement its organic growth and strengthen its leadership position in the industry, China Fire expects to grow through mergers and acquisitions. We will be very selective and value business synergies by acquiring fire protection companies with strong market presence in certain industrial verticals, companies with strong marketing channels and companies that possess recurring maintenance services business. All acquisitions will be accretive to earnings.

Our Industry

The Industrial Fire Safety Industry

The fire safety industry can be generally divided into three major segments: residential, commercial and industrial. The industrial fire safety business requires greater technical expertise than the residential or commercial fire safety businesses due to the hazardous conditions of the industrial environment. Designers must consider a myriad of complex technologies, safety factors, as well as, unique fire hazard risks associated with various areas of production. Designers must also contend with adverse environmental problems such as humidity, dust and electro-magnetic interference to develop solutions to analyze and mitigate the spread of fire and chain reactions that are more likely to occur in the automated industrial production environment.

Along with China's modernization drive, its economy has witnessed significant growth in the past three decades, which brought about a rapid growth in its manufacturing capacity. Moreover, due to its investment environment and cheap labor, China has attracted many manufacturers from developed countries. The increasing industrial capacity of China has caused, and is anticipated to continue to cause, a high level of demand for industrial fire safety products and services. According to a study published by China's Building Mechanical & Electrical Engineering Magazine, China's total revenues from industrial fire safety products and services in 2006 was approximately \$1 billion and the annual growth rate for the following five years was expected to be more than 11%.

Due to the increased loss of lives and properties as a result of fires, the Chinese government began to attach increasing importance to industrial fire safety in the 1990's. The government enacted various laws and issued regulations on fire safety of which the most important included the Fire Safety Law of 1998 and the Safe Production Law of 2002. These laws, while expressing the government's increased emphasis on fire safety, can be vague and are not themselves responsible for the increase in demand. More important to the demand for products and services are fire codes for various industrial sectors. In April 2007, China's Ministry of Construction published a fire code entitled "Code of Design on Fire Protection and Prevention for Iron and Steel Metallurgy Enterprises", which became effective on January 1st, 2008. This fire code is applicable to all new build-out of plants, expansion and renovation of existing facilities in any iron and steel company.

The products used by the fire safety industry have historically been foreign products, which have been superior in technology and quality. In recent years, Chinese products have improved in terms of technology and quality and are being increasingly accepted. The competitive price of Chinese products has also become a competitive advantage.

The industry for the design, manufacture and installation of fire safety systems is fragmented with no dominant players. As a result, we believe that there is an opportunity for consolidation and expansion so that major players can emerge.

Our Leadership Position in the Industry

We began in 1995 as the first Chinese company specializing in industrial fire safety. We believe that we have established ourselves as the recognized leader in the industrial fire safety business in China based on the following competitive advantages:

- 1 A long list of mid-to-high end loyal customers in various industries

China Fire has been issued the top level certificates for both System Contracting and Engineering from the Ministry of Construction of China. China Fire was ranked No. 1 in the survey of System Contracting Enterprises undertaken by China Fire Association in 2001. Leveraging on its own products with proprietary technologies and comprehensive design experience, China Fire has superior capabilities and expertise in providing total fire protection systems to industrial customers. China Fire has been serving a long list of mid-to-high end loyal customers in various industries including iron and steel, petrochemical, power, nuclear power, and transportation. We have been receiving repeat business from these customers when they build new projects or rebuild their existing plants.

- 1 Technology leadership with several high valued proprietary intellectual properties.

China Fire has developed a series of proprietary technologies for industrial fire safety products including Linear Heat Detectors (LHD) which have been awarded dozens of patents worldwide. These technologies have enabled the Company to become one of the chief editors for relevant national fire product standards. Leading technologies, proprietary patent protection and our influence over fire safety standard have contributed to China Fire's unique market leading position with sustainable advantages.

- 1 Lead and influence the enhancement of various national fire codes and product standards.

China Fire is an editorial member for the national Codes of Fire Protection Standards for Metallurgy, Iron & Steel Enterprises, and for the "Linear Heat Detector" and participated in various other fire codes at the national and provincial level. These enhancements have improved fire safety standard in China and created larger market demand for many products including our proprietary products which have better price with better reliability.

- 1 Specialized research and development centers and manufacturing bases for fire detection products and fire suppression products

China Fire has a specialized research and development center and manufacturing base for fire detection products in Beijing and another research and development center and manufacturing base for fire suppression products in Tianjin. Recognized by the government as high-tech enterprise, China Fire has ample manufacturing capacity to support its future business growth in specialized fire detection and suppression products.

- 1 Experienced management team with established track record for sustained growth

China Fire has a strong management team which consists of experts in technology, sales and marketing as well as general management. The core team has both domestic experience and international vision with strong track record for achieving sustained business and financial growth over the last 5 years.

Our Products and Services

Our major customers are in the iron and steel (contributing approximately 81% of revenues), traditional power generation (contributing approximately 9% of revenues) and petrochemical (contributing approximately 4% of revenues) industries. Our revenues are mainly from three sources: Total Solutions, Product Sales, and Maintenance Services. In 2008, revenues from total solutions accounted for approximately 83% of total revenues and the sale of products integrated by us accounted for approximately 14% of total revenues, while maintenance services accounted for approximately 3% of total revenues.

Total Solutions

We design and install total fire protection systems for our clients. A fire protection system consists of three major components: fire detectors, fire alarm control and network supervisory systems, and fire extinguishing systems. In most cases, we design and install all three components. The price of systems varies with the size and complexity of the installation, ranging from \$10,000 to \$32 million. In 2008, we designed and installed more than 177 systems. The design and installation of a system can take one month to three years, depending on the complexity of the system. Approximately 11% of the systems take less than one year to complete, while approximately 89% of the systems require more than one year. Revenues from total solutions typically can be broken down as follows: 50-65% of revenues from products manufactured by us; 25-40% of revenues from products manufactured by third parties; and 10% of revenues from services (the design and installation). The price of our own products incorporated into the total solution systems we design and install is similar to that sold directly to our customers. The markup for third party products is approximately 20-30%.

We maintain long-term relationships with the majority of our customers. In 2008, the top-five projects for total solution systems that we implemented for our customers (based on its revenue recognized and the percentage contribution) were as follows:

Top-Five Customers of Our Total Solutions in 2008

| Name | Industry | Amount of Revenues (\$1,000) | Percentage of Total Solution Revenues |
|---|----------------|------------------------------------|---|
| Capital Iron & Steel (Caofeidian Project) | Iron and Steel | 17,570 | 30.8% |
| Anshan Iron & Steel (Bayuquan Project) | Iron and Steel | 2,965 | 5.2% |
| Datang Power (Tashan Project) | Power | 2,629 | 4.6% |
| Wuhan Iron & Steel (CSP Project) | Iron and Steel | 2,468 | 4.3% |
| Xinyu Iron & Steel | Iron and Steel | 2,102 | 3.7% |
| Total | | | 48.6% |

Products

Depending on the requirements of our clients, we provide integrated fire protection products. By selling products we manufacture and incorporating products outsourced from third parties we provide a complete system for our clients. Such revenues do not include the sale of our products in connection with our total solution business, the design and installation of fire protection systems. We manufacture the following products, which can be divided into three categories according their functions:

- Fire Detectors. The products include:
 - Linear Heat Fire Detectors
 - Multi-Frequency Infrared Flame Detectors
 - Long Range Infrared Combustible Gas Detectors
 - Fixed Point Combustible Gas Detectors
 - Point Fire Detectors

· Fire Alarm Control and Network Supervisory Systems. The products include:

· Fire Alarm Control Unit

7

- Fire Control Room Display System
- Fire Safety Monitoring Center System
- Remote Customer Service System
- Fire Extinguishing Systems. The products include:
 - Water Mist Fire-Extinguishing System
 - Anti-False-Spray Water Spray Fire-Extinguishing System
 - Gas-Based Fire-Extinguishing System
 - Foam-Based Fire-Extinguishing System
 - Portable and Transportable Fire Extinguishers
 - High-Pressure Cylinders

We focus on the production and sales of our proprietary products, which are associated with our technologies and intellectual properties. The sales of our proprietary products, which include our liner heat detectors and water mist fire-extinguishing systems, contribute a higher gross margin than the products outsourced from the third parties.

Recently we have developed new products, including fixed point combustible gas detectors and foam-based fire extinguishing systems. The development of these new products will enhance our product offerings and strengthen our competitive position.

We have established quality assurance systems throughout the company and achieved ISO9001:2000 certification since 2001. ISO9001:2000 refers to a quality management system which demonstrates the company's ability to consistently provide products that meet applicable regulatory requirements and aim to enhance customer satisfaction. We believe these certifications are recognition of our commitment to and efforts in implementing and maintaining a quality management system in the design, manufacturing and sales of our fire safety products.

The tables below list our top-five Products Sales customers as of December 31, 2008. The amounts and percentages do not include the sales of our products as part of total solutions:

Top-Five Customers of Our Product Sales in 2008

| Name | Industry | Sales in USD (\$1,000) | Percentage of Total Product Sales |
|--------------------------------|----------------|---------------------------|---|
| Xian System Sensor Electronics | OEM | 2,169 | 22.43% |
| Petrochina | Petrochemical | 1,631 | 16.86% |
| Tianjin Tiantie Company | Iron and Steel | 1,062 | 10.97% |
| Datang Chongqing Power Company | Power | 522 | 5.40% |
| Anshan Iron & Steel | Iron and Steel | 323 | 3.35% |
| Total | | | 59.01% |

Our Intellectual Property

We have developed our own technologies for our products and services. We own 76 patents and have 37 pending applications in China and internationally. These patents are related to fire detecting, system control, and fire extinguishing technologies as listed in the table below.

Our Intellectual Properties

| Product | Patents Issued | Patents Pending |
|--|----------------|-----------------|
| Linear Heat Fire Detectors | 50 | 30 |
| Infrared Flame Detectors | 1 | |
| Water Mist Nozzles | 15 | 3 |
| Remote System Control Device | 0 | 1 |
| Fire Alarm Control Device | | 2 |
| Foamed-Based Fire Extinguishing Device | 4 | |
| Others | 6 | 1 |
| Total | 76 | 37 |

We own six copyrights for software used for detecting assembly and control modules. We have developed proprietary software to provide localized and network-based fire detection and monitoring solutions. We believe that we are the first company in China to provide customers with remote system monitoring services based on our network-based solutions. From our centralized monitoring center, we can detect any status change (major alarm, critical alarm, fire alarm, etc.) of the major components of each system, upload information, and take appropriate actions if needed. We have been granted copyrights for such software by China's State Bureau of Copyrights.

We have thirteen registered trademarks for our products and services approved by the State Administration for Industry and Commerce of China,. In addition, we currently own three internet domain names "www.sureland.com.cn", "www.sureland.com." and www.chinafiresecurity.com.

Our Research and Development Efforts

We currently have approximately 34 members on our research and development team. Most of our R&D staff have been working in the field of fire safety products for over five years. Research and development costs were \$2,102,976 and \$672,379 during the year ended December 31, 2008 and 2007, respectively.

Our research and development activities involve improving upon existing products, developing new products, designing better and more efficient fire safety systems, and developing new applications for such products and systems. We are currently developing new technologies for anti-explosive gas bottles, alternate foam storage and mix device and high-pressure water mist systems. We plan to conduct R&D to develop infrared flame detectors and industrial fire protection monitoring and control systems in the future. Our R&D activities also involve further developing and improving our core manufacturing technologies so that we can expand our product lines and reduce overall costs. We have entered into joint research and development agreements with some universities whereby we have exclusive ownership to any technology developed. These efforts have led to the successful development of numerous peripheral products for our fire safety systems. For example, we have enhanced our network based fire protection system monitoring software through a joint development program between the Company and Wuhan Iron and Steel University. In 2008, we established a Fire Safety Research Center with Wuhan Technology University.

To enhance our R&D capabilities, we completed the construction of a new R&D center in 2006, consisting of a 1,800 square meter building with new R&D equipment. The total spending for the construction and equipment was

approximately \$1 million. The center is devoted to our research and development efforts and for the development of integrated manufacturing practice and processes. The center is a base for training research and technical personnel and for developing additional proprietary technologies.

Our Marketing Efforts

Currently, we have established our position as the leading Chinese supplier of fire safety products and services in the iron and steel, power, and petrochemical industries. We have installed 70% of the large systems in the steel industry. Our business plan is to maintain our leadership and expand our market share in the iron and steel, power and petrochemical markets, while targeting several new market segments which we believe offer expansion opportunities for us, including transportation (highways, subways and railways) and nuclear power generation. We also have installed fire safety systems for the warehouses of distilleries and cigarette factories.

Our marketing efforts have made us one of the leading suppliers of fire safety products and services in China. All of our products and services are marketed and sold through government agencies which are responsible for certain industries and the research and design institutes under those agencies which design and plan new manufacturing facilities in several industries. Under Chinese laws and regulations, a company which plans to install fire safety systems must apply to the relevant government agency for the approval of the project. Due to our relationship with these agencies, we are able to receive information about projects under consideration in advance and prepare for the bidding accordingly. Our relationship with the research and design institutes under those agencies better position us for receiving subcontract assignments for fire safety systems when they design a new plant or facility. We also market and sell our products and services directly to manufacturers in local markets. Our primary method of promoting our products is direct marketing supplemented with indirect marketing. Almost all of our contracts are procured through an open bidding or invitation only bidding process. Contracts secured without bidding usually provides us with higher margins.

Our linear heat detectors and water/mist extinguishers have received the UL certification. We have entered into an agreement with Xi'an System Sensor Electronics Co., Ltd., a China subsidiary of Honeywell, for OEM manufacturing of linear heat detectors for Honeywell. We have also signed an OEM agreement with a multinational company under confidential terms.

We are actively expanding our marketing network into other parts of China. We have established sales offices and liaison offices in more than 20 locations. Mainly through internal growth, we project an increase in the number of sales and liaison offices.

Our sales team has approximately 101 members. To expand distribution channels and increase our market share, we regularly attend industrial exhibitions organized by local and national industrial associations. We run advertisements in major industry journals, magazines and catalogues. We also run advertisements on industry websites including www.china-fire.com and www.fire.hc360.com.

Material and Parts Supply

We only manufacture products that provide high margins while subcontracting those products with low margins. Given the importance to our business of key materials and parts, the purchasing and management of these important functions are top priorities to us. We carefully manage our purchasing efforts and have established company policies involving materials and parts procurement. The cost of materials for our own products is approximately 80-90% of the total production cost.

Supplier Management System

We have adopted measures to reduce risks in materials and parts supply, including 1) obtaining better services and higher quality, 2) diversifying suppliers and supply sources, and 3) seeking long-term contracts with suppliers.

Purchasing Procedures

Our production department collaborates with our quality and procurement department to produce a list of qualified suppliers that is based on quality, price, technical competency and capacity. Purchasing transactions are sometimes conducted in accordance with a procedure for bidding invitations. Potential suppliers are evaluated on their proposed terms, technical specifications, price, payment terms and timing for delivery. After validation of the various suppliers' service stable supply capabilities, we acquire the needed materials and parts from the supplier offering the best terms. Our procurement department establishes an oversight process by appointing individuals to conduct periodic market research of key price points. There is a standard procedure for conducting said bidding process and accepting the bids to insure that the all purchasing procedures are being strictly adhered to. We enter into long-term contracts with certain suppliers to lock in prices and send purchase orders for each delivery when necessary.

Major Suppliers

The tables below list our top five suppliers as of December 31, 2008

Major Suppliers of Materials and Parts for Our Own Products

| Item | Suppliers | Amount Purchased in 2007 (\$1,000) | Percentage of Total Purchase for Our Own Products |
|---|---|------------------------------------|---|
| Stainless steel pipe and brass bar | Beijing Kehai Wanda Company | 584 | 12.45% |
| Accessories | Sanhe Hangjian Machining Plant | 388 | 8.27% |
| Cabinets | Hebei Qingxian Fangzheng | 369 | 7.87% |
| Sprinkling Valve | Beijing Jinxinglin Metal Material Company | 298 | 6.35% |
| Circuit board and electronic components | Beijing Tianlike Commercial Ltd. | 292 | 6.22% |
| Total | | | 41.16% |

Major Suppliers for Third Party Products of Our Fire Safety Systems

| Item | Suppliers | Amount Purchased in 2007 (\$1,000) | Percentage of Total Purchase for Third Party Products |
|------------------------|---|------------------------------------|---|
| Stainless steel pipes | Beijing guangyuan longfa Company | 1,068 | 10.55% |
| Fire safety pump | Shanghai Pudong Tezhong Fire Safety Company | 801 | 7.92% |
| Electronic components | Honeywell Shanghai Company | 686 | 6.78% |
| Fire detecting devices | Xian System Sensor Electronics | 468 | 4.63% |
| Fire detecting devices | Haiwan Safety Company | 438 | 4.32% |
| Total | | | 34.2% |

Our Competition

The fire safety market in China is intensively competitive and includes thousands of companies in China. We compete primarily in providing total fire safety solutions including engineering and installations to end customers. We also compete in the market for providing fire safety products.

The market for the design and installation of fire safety systems includes numerous small and mostly regional competitors. Consequently, we believe that our leading position in the industry has enabled us to win a high percentage of our bids (e.g., around 60-70% of bids in the iron and steel industry). We compete on design, technology, track record, price, quality of products, expertise and capability to complete the job in time. We believe that the fact that we use our own products also adds to our competitive positioning. While these factors play a less significant role in bidding for smaller jobs, we have twice been recognized as the industry leader by the China Association of Fire Prevention based on numerous significant factors including total revenue and profit. As an aside, due to their disadvantage in labor costs and the requirement of Chinese certificates, foreign competitors normally do not engage in system integration.

We compete with both foreign competitors and local manufacturers for our products. Foreign-made products have historically had an advantage over Chinese-made products because of superior technology and quality. We believe that the demand for foreign products has begun to decline because of improvements in Chinese technology and as the technology and quality gaps narrow, the price advantage that Chinese-made products typically have has increased demand for Chinese-made products. We have developed numerous patented products with technological lead over our competitors. Our China-based competitors tend to focus on low-end and technologically less sophisticated products that have lower quality and are not suitable for large projects. Most of the China-based companies have lower operating expenses and often compete with lower pricing.

Although currently successfully in providing total fire safety solutions to our customers, there is no assurance that we will continue to be able to do so in the future. We have been successful in the iron and steel, power and petrochemical industries. But as we move into new industrial sectors, our lack of proprietary products that may be required by those industries may limit our market acceptance.

Our Employees

As of December 31, 2008, we employed 625 full-time employees. Approximately 14% of our employees are management personnel, 5% are R&D staff members and 16% are sales staff members. Approximately 54% of our employees have college degrees or higher.

Under Chinese law, our employees have formed labor unions that protect employees' rights, aim to assist in the fulfillment of our economic objectives, encourage employee participation in management decisions and assist in mediating disputes. We believe that we maintain a satisfactory working relationship with our employees and have not experienced any significant labor disputes or any difficulty in recruiting staff for our operations.

As required by applicable Chinese law, we have entered into employment contracts with all of our employees. We have also entered into confidentiality agreements with all of our employees under which our employees are prohibited from disclosing confidential information of the Company or using it for purposes other than the benefit of the Company. Directors, officers, mid-level managers and certain key employees in sales and R&D are required to sign a non-compete agreement that prohibits them from competing with the Company while they are employees of the Company and within two years after their employment with the Company is terminated.

Our employees in China participate in a state pension arrangement organized by Chinese municipal and provincial governments. We are required to contribute to this arrangement at the rate of 20% of the average monthly salary. In addition, we are required by Chinese law to cover employees in China with other types of social insurances. Our total contribution may amount to 30% of the average monthly salary. We have purchased social insurances for all of our employees. In the event that any current employee, or former employee, files a complaint with the Chinese government, we may be required to purchase insurance for said employee, and we may be subject to administrative fines. We believe that such fines, if imposed, are immaterial.

Item 1A. Risk Factors

Cautionary Statement Regarding Future Results, Forward-Looking Information And Certain Important Factors

In this report we make, and from time to time we will otherwise make, written and oral statements regarding our business and its prospects, such as projections of future performance, statements of management's plans and objectives, forecasts of market trends, and other matters that are forward-looking statements within the meaning of Section 27A of the Securities Act of 1933 and Section 21E of the Securities Exchange Act of 1934. Statements containing the words or phrases "will likely result," "are expected to," "will continue," "is anticipated," "estimates," "projects," "believes," "expects," "anticipates," "intends," "target," "goal," "plans," "objective," "should" or similar expressions identify forward-looking statements, which may appear in documents, reports, filings with the Securities and Exchange Commission, news releases, written or oral presentations made by officers or other representatives made by us to analysts, stockholders, investors, news organizations and others, and discussions with management and other of our representatives. For such statements, we claim the protection of the safe harbor for forward-looking statements contained in the Private Securities Litigation Reform Act of 1995.

Our future results, including results related to forward-looking statements, involve a number of risks and uncertainties. No assurance can be given that the results reflected in any forward-looking statements will be achieved. Any forward-looking statement speaks only as of the date on which such statement is made. Our forward-looking statements are based upon assumptions that are sometimes based upon estimates, data, communications and other information from suppliers, government agencies and other sources that may be subject to revision. Except as required by law, we do not undertake any obligation to update or keep current either (i) any forward-looking statement to reflect events or circumstances arising after the date of such statement, or (ii) the important factors that could cause our future results to differ materially from historical results or trends, results anticipated or planned by us, or which are reflected from time to time in any forward-looking statement.

In addition to other matters identified or described by us from time to time in filings with the SEC, there are several important factors that could cause our future results to differ materially from historical results or trends, results anticipated or planned by us, or results that are reflected from time to time in any forward-looking statement. Some of these important factors include the risk factors below.

An investment in our common stock is speculative and involves a high degree of risk. You should carefully consider the risks described below and the other information in this Form 10-K before purchasing any of our common stock. If any of the events described in the risk factors below actually occur, our business, financial condition or results of operations could suffer significantly. In such case, the value of your investment could decline and you may lose all or part of the money you paid to buy our common stock.

Risks Related To Our Business

Disruptions in the capital and credit markets related to the current national and worldwide financial crisis, which may continue indefinitely or intensify, could adversely affect our results of operations, cash flows and financial condition, or those of our customers and suppliers.

The current disruptions in the capital and credit markets may continue indefinitely or intensify, and adversely impact our results of operations, cash flows and financial condition, or those of our customers and suppliers. These disruptions could adversely affect our ability to draw on our bank revolving credit facility, which is dependent on the ability of the banks that are parties to the facility to meet their funding commitments. Those banks may not be able to meet their funding commitments to us if they experience shortages of capital and liquidity. Disruptions in the capital and credit markets as a result of uncertainty, changing or increased regulation, reduced alternatives or failures of

significant financial institutions could adversely affect our access to liquidity needed to conduct or expand our businesses or conduct acquisitions or make other discretionary investments, as well as our ability to effectively hedge our currency or interest rate. Such disruptions may also adversely impact the capital needs of our customers and suppliers, which, in turn, could adversely affect our results of operations, cash flows and financial condition.

Our products and services have relied on a few industries. We may not be able to increase the market for our products and services in other industries. Presently, our products and services are mainly sold to the iron and steel, power and petrochemical industries. Our products and services, therefore, depend heavily on a limited number of industries. Our growth potential may be limited if we cannot expand the market for our products and services. Although we have increased our research and development to expand the range of application of our products and services, there is no assurance that we will succeed in our effort.

Price increases of raw materials such as copper and steel could increase the cost of our products and reduce our profit margin. Copper is the major material for our linear heat detectors and stainless steel is the major material for our fire extinguishing nozzles. In the last two years, the prices of copper and steel have fluctuated substantially as have other raw materials. Although we have managed to minimize the impact of such fluctuation in the past by passing the cost increase on to our customers, there is no assurance that we will be able to do so in the future. If the price for copper and steel increases more significantly and we cannot increase our selling price, our profit margin could decrease significantly.

We may not be able to secure financing needed for future operating needs on acceptable terms, or on any terms at all. From time to time, we may seek additional financing to provide the capital required to maintain or expand our design and production facilities, research and development initiatives and equipment and/or working capital, as well as repay outstanding loans if cash flow from operations is insufficient to do so. We cannot predict with certainty the timing or amount of any such capital requirements. If such financing is not available on satisfactory terms, we may be unable to expand our business or to develop new business as the rate desired, and our operating results may suffer. If we are able to incur debt, we may be subject to certain restrictions imposed by the terms of the debt and the repayment of such debt may limit our cash flow and our ability to grow. If we are unable to incur debt, we may be forced to issue additional equity, which could have a dilutive effect of the then current holders of equity.

Our strategic alliances may not achieve their objectives. Currently, we have agreements with two multinational companies to supply our linear heat detectors. We are negotiating with another company to enter into a similar agreement. The strategic alliances are intended to enhance or complement our technology or work in conjunction with our technology, increase our manufacturing capacity, provide additional components or materials, and develop, introduce and distribute products using our technology and know-how. If these alliances do not achieve their objectives or parties to our strategic alliances do not perform as contemplated, our growth may be adversely affected.

Expansion of our business may put added pressure on our management and operational infrastructure impeding our ability to meet any increased demand for our products and services and possibly hurting our operating results. Our business plan is to significantly grow our operations to meet anticipated growth in demand for our products and services products. Our planned growth includes the increase of our line of products and expansion of sales in our exiting markets as well as entry into new markets over the next few years. Growth in our business may place a significant strain on our personnel, management, financial systems and other resources. The evolution of our business also presents numerous risks and challenges, including:

- the continued acceptance of our products and services by the iron and steel, power and petrochemical industries;
- our ability to successfully and rapidly expand sales to potential customers in response to potentially increasing demand;
 - the costs associated with such growth, which are difficult to quantify, but could be significant;
 - rapid technological change; and

- the highly competitive nature of the industrial fire safety industry.

If we are successful in obtaining rapid market growth of our products and service, we will be required to deliver large volumes of quality products and services to customers on a timely basis at a reasonable cost. Meeting any such increased demands will require us to expand our manufacturing facilities, to increase our ability to purchase raw materials, to increase the size of our work force, to expand our quality control capabilities and to increase the scale upon which we provide our products and services. Such demands would require more capital and working capital than we currently have available and we may be unable to meet the needs of our customers.

Our business depends on our ability to protect our intellectual property effectively. If any of our patents are not protected, or any of our trade secrets are divulged, we may lose our competitive edge. The success of our business depends in substantial measure on the legal protection of the patents and other proprietary rights in the technology we hold. We hold issued patents and pending patent applications in China related to technologies important to our business. Monitoring infringement of intellectual property rights is difficult, and we cannot be certain that the steps we have taken will prevent unauthorized use of our intellectual property and know-how in China where, in comparison to the United States, the laws may be difficult to enforce to fully protect our proprietary rights. The validity and breadth of claims in patents and trade secrets involve complex legal and factual questions and, therefore, the extent of their enforceability and protection is highly uncertain. Issued patents or patents based on pending patent applications or any future patent applications or trade secrets may not exclude competitors or may not provide a competitive advantage to us. In addition, patents issued or licensed to us may not be held valid if subsequently challenged and others may claim rights in or ownership of such patents. Furthermore, we cannot assure you that our competitors have not developed or will not develop similar products, will not duplicate our products, or will not design around any patents issued to or licensed by us.

We claim proprietary rights in various unpatented technologies, know-how, trade secrets and trademarks relating to products and manufacturing processes. We protect our proprietary rights in our products and operations through contractual obligations, including nondisclosure agreements. If these contractual measures fail to protect our proprietary rights, any advantage those proprietary rights provided to us would be negated. Some of our products are based on formulas. The formulas are maintained as trade secrets and are revealed only to a small number of technical and management personnel. The trade secrets provide us a competitive edge in the linear heat technology and to the best of our knowledge, no other manufacturers have successfully developed such technology. If any of the trade secrets are divulged, we could lose our competitive edge in the linear heat technology and others.

We receive a significant portion of our revenues from a small number of customers. Our business will be harmed if our customers reduce their orders from us. A significant amount of our revenues are derived from only a small number of customers mainly in the iron and steel, power and petrochemical industries. One customer individually accounted for more than 20% of our revenues for the fiscal year ended December 31, 2008 in the aggregate, our five largest customers of our total solutions and products businesses accounted for approximately 49% and 59% of our revenues from these segments in fiscal 2008. Dependence on a few customers could make it difficult to negotiate attractive prices for our products and could expose us to the risk of substantial losses if a single dominant customer stops purchasing our products. If we lose any customers and are unable to replace them with other customers that purchase a similar amount of our products and services, our revenues and net income would decline considerably.

We extend relatively long payment terms for accounts receivable. If any of our customers fails to pay us, our revenues may be affected as a result. Our standard practice is to charge our customers 10%-30% of the contract amount up front and collect the balance according to a schedule based on the progress of a project. However, many of our customers are state-owned enterprises and may be slow in their payment process. As a result of the size of many of our contracts, their delayed payments adversely affect our cash flow and our ability to fund our operations out of our operating cash flow. In addition, although we attempt to establish appropriate reserves for our receivables, those reserves may not prove to be adequate in view of actual levels of bad debts. The failure of our customers to pay us in a timely manner could negatively affect our working capital, which could, in turn, adversely affect our cash flow. Although, on occasion payments have been delayed, no customer has failed to pay us however, there is no assurance that they will be able to pay in the future.

Our business may be severely disrupted if we lose the services of our key executives and employees or fail to add new senior and middle managers to our management. Our future success is heavily dependent upon the continued service of our key executives, particularly Mr. Brian Lin, our Chief Executive Officer, Mr. Weishe Zhang, our Chief Technology Officer, Mr. Robert Yuan, our Principal Accounting Officer, Mr. Weigang Li, our Vice President of Sales and Mr. Haijun Yang, our Vice President of Operations. Our future success is also dependent upon our ability to attract and retain qualified senior and middle managers to our management team. If one or more of our current or future key executives and employees are unable or unwilling to continue in their present positions, we may not be able to easily replace them, and our business may be severely disrupted. In addition, if any of these key executives or employees joins a competitor or forms a competing company, we could lose customers and suppliers and incur additional expenses to recruit and train personnel. Each of our executive officers has entered into an employment agreement with us. We also rely on a number of key technology staff for the operation of our Company. Given the competitive nature of our industry, the risk of key technology staff leaving our Company is high and could disrupt our operations.

Risks Related To Our Industry

Our market will open to foreign companies. China's commitments under the WTO (World Trade Organization) may intensify competition. In connection with its accession to the WTO, China made many commitments including opening its markets to foreign products and services, allowing foreign companies to conduct distribution businesses and reducing customs duties. As a result, foreign manufacturers may ship more industrial fire safety products into China or they may establish manufacturing facilities and service centers in China. Competition from foreign companies may squeeze our profit margins and our business results will suffer as a result.

The fire protection total solution market is fragmented and susceptible to consolidation, which could adversely affect us. We engage in providing fire protection total solutions that consist of the design and installation of fire safety systems. The market is fragmented in the sense that there are many, typically small, suppliers. The market may be subject to consolidation and, if so, we may not be a major player. If so, our fire protection total solution business could suffer and this business is a major source of sales of our own products and profitability.

Our customers will decrease their capital expenditure if China's economy slows down. Such a slowdown may affect our growth. Our industry is cyclical in nature and highly dependent on economic conditions. Over the last three decades, China's economy has been growing at an average annual rate of 9-10%. There can be no assurance that China's economy will continue to grow at such pace in the future. If the economy slows down, our customers will cut their capital expenditure and, hence, order less of our products and services. Our growth may suffer as a result.

High margins for the industrial fire safety business will attract more businesses to enter this field. Our business could suffer as a result of more competition. So far, our business has enjoyed relatively high profit margins due to the fact that we have concentrated in industrial fire safety. Such high margins will attract more businesses to enter into this field. As a result, competition may intensify and our profits may drop significantly.

If we cannot compete successfully for market share against other industrial fire safety products companies, we may not achieve sufficient product revenues, and our business will suffer. The market for our products and services is characterized by intense competition and rapid technological advances. Our products and services compete with a multitude of products and services developed, manufactured and marketed by others and we expect competition from new market entrants in the future, including as a result of the WTO. Existing or future competing products may provide better quality and technology, greater utility or lower cost or other benefits from their intended uses than our products, or may offer comparable performance at a lower cost. If our products fail to capture and maintain market share, we may not achieve sufficient product revenues, and our business could suffer.

Gross margins could be lower in new industrial sectors. We enjoy relatively high margins in our main markets including iron and steel, power generation and petrochemical. As we start bidding for projects in new industrial sectors including subways, highway tunnels, and nuclear plants, we might not be able to sell our products at the gross margins that we enjoy in our main markets. Our overall gross margin could be adversely affected.

Risks Related To Doing Business in China

Changes in China's political or economic situation could harm us and our operational results. Economic reforms adopted by the Chinese government have had a positive effect on the economic development of the country, but the government could change these economic reforms or any of the legal systems at any time. This could either benefit or damage our operations and profitability. Some of the things that could have this effect are:

- level of government involvement in the economy;
 - control of foreign exchange;
 - methods of allocating resources;
 - balance of payments position;
 - international trade restrictions;
 - international conflict; and
- Tax policy.

The Chinese economy differs from the economies of most countries belonging to the Organization for Economic Cooperation and Development, or OECD, in many ways. The economic reforms in China have been conducted under a tight grip of the Chinese government. As a result of these differences, we may not develop in the same way or at the same rate as might be expected if the Chinese economy were similar to those of the OECD member countries.

Our business is largely subject to the uncertain legal environment in China and your legal protection could be limited. The Chinese legal system is a civil law system based on written statutes. Unlike common law systems, it is a system in which precedents set in earlier legal cases are not generally used. The overall effect of legislation enacted over the past 20 years has been to enhance the protections afforded to foreign invested enterprises in China. However, these laws, regulations and legal requirements are relatively recent and are evolving rapidly, and their interpretation and enforcement involve uncertainties. These uncertainties could limit the legal protections available to foreign shareholders, such as the right of foreign invested enterprises to hold licenses and permits such as requisite business licenses. In addition, all of our executive officers and our directors are residents of China and not of the U.S., and substantially all the assets of these persons are located outside the U.S. As a result, it could be difficult for shareholders to effect service of process in the U.S., or to enforce a judgment obtained in the U.S. against us or any of these persons.

The Chinese government exerts substantial influence over the manner in which we must conduct our business activities. China has only recently permitted provincial and local economic autonomy and private economic activities. The Chinese government has exercised and continues to exercise substantial control over virtually every sector of the Chinese economy through regulation and state ownership. Our ability to operate in China may be harmed by changes in its laws and regulations, including those relating to taxation, import and export tariffs, environmental regulations, land use rights, property and other matters. We believe that our operations in China are in material compliance with all

applicable legal and regulatory requirements. However, the central or local governments of these jurisdictions may impose new, stricter regulations or interpretations of existing regulations that would require additional expenditures and efforts on our part to ensure our compliance with such regulations or interpretations. Accordingly, government actions in the future, including any decision not to continue to support recent economic reforms and to return to a more centrally planned economy or regional or local variations in the implementation of economic policies, could have a significant effect on economic conditions in China or particular regions thereof, and could require us to divest ourselves of any interest we then hold in Chinese properties.

Future inflation in China may inhibit our activity to conduct business in China. In recent years, the Chinese economy has experienced periods of rapid expansion and high rates of inflation. During the past ten years, the rate of inflation in China has been as high as 20.7% and as low as -2.2%. These factors have led to the adoption by the Chinese government, from time to time, of various corrective measures designed to restrict the availability of credit or regulate growth and contain inflation. While inflation has been more moderate since 1995, high inflation may in the future cause the Chinese government to impose controls on credit and/or prices, or to take other action, which could inhibit economic activity in China, and thereby harm the market for our products.

Restrictions on currency exchange may limit our ability to receive and use our revenues effectively. The majority of our revenues will be settled in Renminbi and, any future restrictions on currency exchanges may limit our ability to use revenue generated in Renminbi to fund any future business activities outside China or to make dividend or other payments in U.S. dollars. Although the Chinese government introduced regulations in 1996 to allow greater convertibility of the Renminbi for current account transactions, significant restrictions still remain, including primarily the restriction that foreign-invested enterprises may only buy, sell or remit foreign currencies after providing valid commercial documents, at those banks in China authorized to conduct foreign exchange business. In addition, conversion of Renminbi for capital account items, including direct investment and loans, is subject to governmental approval in China, and companies are required to open and maintain separate foreign exchange accounts for capital account items. We cannot be certain that the Chinese regulatory authorities will not impose more stringent restrictions on the convertibility of the Renminbi.

Cessation of the income tax reduction and exemption for our subsidiaries may have an adverse impact on our net profits. From January 1, 2008, under Chinese new income tax law, a company would ordinarily be subject to the PRC income tax rates of 25%. However, the law also provides tax exemption or reduction for high-tech businesses and foreign invested enterprises (“FIE”). As a result, some of our subsidiaries are currently enjoying a tax reduction of and/or exemption from state and local income tax. For details, please see the income taxes section of “Management Discussion and Analysis.” If the Chinese government decides to change the tax law, our revenues and profit could suffer.

A new Chinese law may impact our ability to make acquisitions of Chinese businesses. On August 8, 2006, six PRC regulatory agencies namely, the PRC Ministry of Commerce, the State Assets Supervision and Administration Commission (“SASAC”), the State Administration for Taxation, the State Administration for Industry and Commerce, the China Securities Regulatory Commission (“CSRC”), and the State Administration of Foreign Exchange (“SAFE”), jointly adopted the Regulations on Mergers and Acquisitions of Domestic Enterprises by Foreign Investors (the “New M&A Rule”), which became effective on September 8, 2006. The New M&A Rule purports, among other things, to require offshore Special Purpose Ventures, or SPVs, formed after the effective date, for overseas listing purposes, through acquisitions of PRC domestic companies and controlled by PRC companies or individuals, to obtain the approval of the CSRC prior to publicly listing their securities on an overseas stock exchange.

The Company intends to make acquisitions of Chinese businesses in the future. There are uncertainties regarding the interpretation and application of the current or future PRC laws and regulations, including the New M&A Rule and these uncertainties could make it difficult or impossible to make acquisitions of Chinese businesses in the future.

Foreign Investment Policy Change. On March 16, 2007, China's parliament, the National People's Congress, adopted the Enterprise Income Tax Law, which took effect on January 1, 2008. The new income tax law sets unified income tax rates for domestic and foreign companies at 25 percent and abolishes the favorable policy for foreign invested enterprises. After January 1, 2008, newly established foreign invested enterprises will not enjoy favorable tax treatment permitted under prior tax laws. Some of our subsidiaries are benefiting from the preferred tax rates for foreign companies and will follow the new tax rate when their respective term of preferred tax rates expires. Our net income margin will be affected at that time.

If the government changes its policies on the value added tax rebate, our revenues and profit could be adversely affected. Under Chinese tax law, businesses should pay a value added tax at a 17% rate. To support the development of the software industry, the Chinese government has instituted policies to rebate value added tax charged for software certified by the government up to 14%. As a result, our subsidiary Hua An Limited, is paying its value added tax at an effective rate of 3% for the software they sell. However, the Chinese government changes its policies from time to time. If the Chinese government changes the policies currently in place for the value added tax rebate, our revenues and our profit could suffer.

The value of our securities will be affected by the foreign exchange rate between U.S. dollars and Renminbi. The value of our Common Stock will be affected by the foreign exchange rate between U.S. dollars and Renminbi, and between those currencies and other currencies in which our sales may be denominated. For example, to the extent that we need to convert U.S. dollars into Renminbi for our operational needs and should the Renminbi appreciate against the U.S. dollar at that time, our financial position, the business of the company, and the price of our Common Stock may be harmed. Conversely, if we decide to convert our Renminbi into U.S. dollars for the purpose of declaring dividends on our Common Stock or for other business purposes and the U.S. dollar appreciates against the Renminbi, the U.S. dollar equivalent of our earnings from our subsidiaries in China would be reduced.

Risks Related to the Market for Our Stock

You may face difficulties in protecting your interests, and your ability to protect your rights through the U.S. federal courts may be limited, our operating subsidiaries are incorporated in non-U.S. jurisdictions, we conduct substantially all of our operations in China, and all of our officers reside outside the United States. We conduct substantially all of our operations in China through our wholly owned subsidiaries in China. All of our officers reside outside the United States and some or all of the assets of those persons are located outside of the United States. As a result, it may be difficult or impossible for you to bring an action against us or against these individuals in China in the event that you believe that your rights have been infringed upon under the securities laws or otherwise. Even if you are successful in bringing an action of this kind, the laws of the PRC may render you unable to enforce a judgment against our assets or the assets of our directors and officers. As a result of all of the above, our public stockholders may have more difficulty in protecting their interests through actions against our management, directors or major stockholders than would stockholders of a corporation doing business entirely within the United States.

The trading prices of many companies that have business operations only in China have been volatile which may result in large fluctuations in the price of our Common Stock and losses for shareholders. The stock market has experienced significant price and volume fluctuations that have particularly affected the trading prices of equity securities of many companies that have business operations only in China. These fluctuations have often been unrelated or disproportionate to the operating performance of many of these companies. Any negative change in the public's perception of these companies could depress our stock price regardless of our operating results. The market price of our Common Stock has been and may continue to be volatile. We expect our stock price to be subject to fluctuations as a result of a variety of factors, including factors beyond our control. These factors include:

- actual or anticipated variations in our quarterly operating results;
- announcements of technological innovations or new products or services by us or our competitors;
- announcements relating to strategic relationships or acquisitions;
- additions or terminations of coverage of our Common Stock by securities analysts;

- statements by securities analysts regarding us or our industry;
- conditions or trends in the our industry; and,
- changes in the economic performance and/or market valuations of other industrial fire safety companies.

The prices at which our Common Stock trades will affect our ability to raise capital, which may have an adverse affect on our ability to fund our operations.

Our Common Stock may be considered to be a “penny stock” and, as such, the market for our Common Stock may be further limited by certain SEC rules applicable to penny stocks. To the extent the price of our common stock remains below \$5.00 per share, we have net tangible assets of \$2,000,000 or less, or if we fall below certain other thresholds, our common shares will be subject to certain “penny stock” rules promulgated by the SEC. Those rules impose certain sales practice requirements on brokers who sell penny stocks to persons other than established customers and accredited investors (generally institutions with assets in excess of \$5,000,000 or individuals with net worth in excess of \$1,000,000). For transactions covered by the penny stock rules, the broker must make a special suitability determination for the purchaser and receive the purchaser’s written consent to the transaction prior to the sale. Furthermore, the penny stock rules generally require, among other things, that brokers engaged in secondary trading of penny stocks provide customers with written disclosure documents, monthly statements of the market value of penny stocks, disclosure of the bid and asked prices and disclosure of the compensation to the brokerage firm and disclosure of the sales person working for the brokerage firm. These rules and regulations adversely affect the ability of brokers to sell our common shares and limit the liquidity of our securities.

We may seek to make acquisitions that prove unsuccessful or strains or diverts our resources. We may seek to expand our business through the acquisition of related businesses and assets. We may not be able to complete any acquisitions on favorable terms or at all. Acquisitions present risks that could materially and adversely affect our business and financial performance, including:

- the diversion of our management’s attention from our everyday business activities;
- the contingent and latent risks associated with the past operations of, and other unanticipated problems arising in, the acquired business; and
- the need to expand management, administration, and operational systems.

If we make such acquisitions we cannot predict whether:

- we will be able to successfully integrate the operations and personnel of any new businesses into our business;
- we will realize any anticipated benefits of completed acquisitions; or
- there will be substantial unanticipated costs associated with acquisitions, including potential costs associated with environmental liabilities undiscovered at the time of acquisition.

In addition, future acquisitions by us may result in:

- Potentially dilutive issuances of our equity securities;
- the incurrence of additional debt;

- restructuring charges; and
- the recognition of significant charges for depreciation and amortization related to intangible assets.

We do not intend to pay any dividends on our Common Stock in the foreseeable future. We currently intend to retain all future earnings, if any, to finance our current and proposed business activities and do not anticipate paying any cash dividends on our Common Stock in the foreseeable future. We may also incur indebtedness in the future that may prohibit or effectively restrict the payment of cash dividends on our Common Stock.

We will incur increased costs as a result of changes in laws and regulations relating to corporate governance matters. As a public reporting company, we will need to comply with the Sarbanes-Oxley Act of 2002 and the related rules and regulations adopted by the SEC and by The NASDAQ Capital Market, including expanded disclosures, accelerated reporting requirements and more complex accounting rules. Compliance with Section 404 of the Sarbanes-Oxley Act of 2002 and other requirements will increase our costs and require additional management resources. Additionally, these laws and regulations could make it more difficult or more costly for us to obtain certain types of insurance, including director and officer liability insurance, and we may be forced to accept reduced policy limits and coverage or incur substantially higher costs to obtain the same or similar coverage. The impact of these events could also make it more difficult for us to attract and retain qualified persons to serve on our board of directors, our board committees or as executive officers. We are presently evaluating and monitoring developments with respect to these laws and regulations and cannot predict or estimate the amount or timing of additional costs we may incur to respond to their requirements.

We do not have an effective system of internal control over financial reporting, a failure which might prevent us from accurately reporting our financial results or detecting and preventing fraud. We were subject to reporting obligations under the U.S. securities law. In this annual report for the fiscal year ending December 31, 2008, we are required to prepare a management report on our internal control over financial reporting containing our management's assessment of the effectiveness of our internal control over financial reporting.

Our management and our independent registered public accounting firms concluded that there was material weakness in our internal control over financial reporting as of December 31, 2008. The identified material weakness relate to the lack of internal controls over project budgeting process, specifically relating to the lack of project budgeting personnel and ineffective design of project budgeting processes, and the lack of internal accounting staff with adequate US GAAP knowledge. Management believes that until the remaining material weakness are corrected, a potential misapplication of generally accepted accounting principles or potential misstatements in our financial statements could occur. Enhancing our internal controls to correct these deficiencies has and will result in increased costs to us.

For the fiscal year ending December 31, 2009, our management may continue to conclude that our internal control over our financial reporting is not effective. Moreover, even if our management concludes that our internal control over financial reporting is effective, our independent registered public accounting firm may still decline to attest to the effectiveness or may issue a report that is adverse if it is not satisfied with our controls or the level at which our controls are documented, designed, operated or reviewed, or if it interprets the relevant requirements differently from us. Our reporting obligations as a public company will place a significant strain on our management, operational and financial resources and systems for the foreseeable future.

Certain stockholders can exert control over the Company and may not make decisions that further the best interests of all stockholders. Our officers, directors and principal stockholders (greater than 5% stockholders) together will own an aggregate of approximately 65% of our outstanding Common Stock on a fully diluted basis. Consequently, these stockholders, if they act individually or together, may exert a significant degree of influence over our management and affairs and over matters requiring stockholder approval, including the election of directors and approval of significant corporate transactions. In addition, this concentration of ownership may delay or prevent a change of control of us and might affect the market price of our Common Stock, even when a change of control may be in the best interest of all stockholders. Furthermore, the interests of this concentration of ownership may not always coincide with our interests

or the interests of other stockholders, and accordingly, they could cause us to enter into transactions or agreements which we would not otherwise consider.

Item 1B. Unresolved Staff Comments

There are no unresolved comments from the SEC.

Item 2. Properties

All land in China is owned by the State. Individuals and companies are permitted to acquire rights to use land or land use rights for specific purposes. In the case of land used for industrial purposes, the land use rights are granted for a period of 50 years. This period may be renewed at the expiration of the initial and any subsequent terms. Granted land use rights are transferable and may be used as security for borrowings and other obligations.

We currently own approximately 23,573 square meters of land in Beijing, consisting of manufacturing facilities, employee quarters, warehouses, and office buildings. We also own approximately 945 square meters office space in the downtown of Beijing as our headquarters office. We currently lease from Tianjin Fire Protection Equipment Company Ltd., which has land use rights of approximately 112,432 square meters land in Tianjin, consisting of manufacturing facilities, warehouses and office buildings. These constitute the basis of our operations as a total fire protection solution provider.

Item 3. Legal Proceedings

In 2008, we filed five lawsuits against four different companies for the infringement of our intellectual properties. These five cases are still pending. We expect these five cases will be settled in our favor.

In 2008, we were sued by three different companies for the invalidation of our intellectual properties. Two of these three cases were eventually settled in our favor. The other case is still pending and we expect this case will be settled in our favor as well.

Although we cannot predict with certainty the result of the litigation matters, we believe that the final outcome will not have a material adverse effect on our business or results of operations.

Item 4. Submission Of Matters To A Vote Of Shareholders

On October 20, 2008, China Fire's 2008 Annual Meeting of Stockholders was held at B-2508 TYG Center, C2 Dongsanhuanbeilu, Chaoyang District, Beijing 100027, People's Republic of China. The following seven directors were elected to serve on the Board of Directors until the next annual meeting of stockholders of the Company or until such person shall resign, be removed or otherwise leave office:

Mr. Gangjin Li, Mr. Brian Lin, Ms. Tieying Guo (resigned February 25, 2009), Mr. Guoyou Zhang, Mr. Xuewen Xiao, Mr. Xianghua Li and Mr. Albert McLelland.

The following table is the tally of votes:

| | |
|--------------------------|------------|
| Total Outstanding Shares | 27,586,593 |
| Total Shares Voted | 27,586,593 |

Director Information

| Director Name | For | Against | Abstain |
|---------------|------------|---------|-----------|
| Gangjin Li | 18,680,000 | 0 | 8,906,593 |
| Brian Lin | 18,680,000 | 0 | 8,906,593 |

Edgar Filing: CHINA FIRE & SECURITY GROUP, INC. - Form 10-K/A

PART II

Item 5. Market For Registrant's Common Equity, Related Shareholder Matters, And Issuer Purchases Of Equity Securities

Market Price Information

Our common stock has been quoted on The NASDAQ Capital Market under the symbol "CFSG" since July 16, 2007. The following table provides the high and low sales prices for our common stock as reported for the periods indicated.

| Year ending December 31, 2009 | High | Low |
|-----------------------------------|---------|---------|
| First Quarter (ended on March 13) | \$ 8.73 | \$ 6.11 |

| Year ending December 31, 2008 | High | Low |
|----------------------------------|----------|---------|
| First Quarter | \$ 13.00 | \$ 3.55 |
| Second Quarter | \$ 13.00 | \$ 6.85 |
| Third Quarter | \$ 12.75 | \$ 7.28 |
| Fourth Quarter | \$ 10.63 | \$ 5.70 |

| Year ending December 31, 2007 | High | Low |
|----------------------------------|----------|----------|
| First Quarter | \$ 5.50 | \$ 3.10 |
| Second Quarter | \$ 7.05 | \$ 4.25 |
| Third Quarter | \$ 12.43 | \$ 6.02 |
| Fourth Quarter | \$ 18.10 | \$ 10.56 |

On March 13, 2009, the last reported sale price of our common stock on The NASDAQ Capital Market was \$7.98 per share.

Shareholders

As of March 13, 2009, we had outstanding 27,586,593 shares of common stock, held by approximately 1,500 stockholders of record and beneficially.

Dividend Policy

To date, we have neither declared nor paid any cash dividends on shares of our common stock. We presently intend to retain earnings to finance the operation and expansion of our business and do not anticipate declaring cash dividends in the foreseeable future.

Repurchases of Equity Securities

No repurchases of our common stock were made in any month within the fourth quarter of the fiscal year covered by this report.

Item 6. Selected Financial Data

You should read the following selected consolidated financial data in conjunction with “Management's Discussion and Analysis of Financial Condition and Results of Operations,” the financial statements and related notes, and the other financial information included in this report.

CONSOLIDATED STATEMENTS OF

Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations

General

The following discussion and analysis provides information which the management of China Fire & Security Group, Inc., (the "Company" or "CFSG") believes to be relevant to an assessment and understanding of the Company's results of operations and financial condition. This discussion should be read together with the Company's financial statements and the notes to financial statements, which are included in this report.

Overview

We are engaged in the design, development, manufacturing and sale of fire protection products and services for large industrial consumers in China. We have developed a proprietary product line that addresses all aspects of industrial fire safety from fire detection to fire system control and extinguishing. The Company is the first company in China to utilize high technology for fire protection and safety of its clients in the iron and steel companies, power plants, petrochemical plants, as well as, special purpose construction in China.

Reorganization

We were organized as a Florida corporation on June 17, 2003.

On September 1, 2006, we entered into a share exchange agreement, pursuant to which we acquired all of the outstanding capital shares of China Fire Protection Group Inc. in exchange for a controlling interest in our common shares. The transaction was completed on Oct 27, 2006.

China Fire Protection Group was organized on June 2, 2006 for the purpose of acquiring all of the capital shares of Sureland Industrial Fire Safety Limited (Sureland Industrial), a Chinese corporation, and, Sureland Industrial Fire Equipment Co., Ltd. (Sureland Equipment), a Chinese corporation, which collectively engage in the design, development, manufacturing and sale of fire protection products and services for large industrial consumers in China. As a result of the transactions described above, both Sureland Industrial Fire Safety Limited and Sureland Industrial Fire Equipment Co., Ltd became wholly-owned subsidiaries of China Fire Protection Group Limited, and China Fire Protection Group Limited is a wholly-owned subsidiary of Unipro.

On February 9, 2007, Unipro changed its name to China Fire & Security Group, Inc. (CFSG) and started trading on OTC Bulletin Board under its new ticker symbol CFSG. On July 16, 2007, China Fire & Security Group, Inc. began trading on Nasdaq Capital Market and retained the ticker symbol CFSG.

CFSG owns, through its wholly owned subsidiary China Fire Protection Group, Inc., Sureland Industrial and Sureland Equipment (jointly "Sureland"). Sureland is engaged primarily in the design, development, manufacture and sale in China of a variety of fire safety products for the industrial fire safety market and of design and installation of industrial fire safety systems that utilizes its own fire safety products. To a minor extent, it also provides maintenance services for customers that use its industrial fire safety systems. Its business is primarily in China, but it has recently begun contract manufacturing products for the export market and it has begun to provide a fire safety system for a Chinese company operating abroad.

Sureland markets its industrial fire safety products and systems primarily to major companies in the iron and steel, power and petrochemical industries in China. It has also completed projects for highway and railway tunnels, wine distilleries, tobacco warehouses and a nuclear reactor. It is developing its business in the transportation, wine and tobacco, vessels, nuclear energy, and public space markets. Its products can be readily adapted for use on vessels and in exhibition halls and theatres. It plans to expand its marketing efforts to secure business in these industries.

Sureland has internal research and development facilities engaged primarily in furthering fire safety technologies. It believes that its technologies allow it to offer cost-effective and high-quality fire safety products and systems. It has developed products for industrial fire detecting and extinguishing. It believes that it is the only manufacturer in China which has successfully developed a comprehensive line of linear heat detectors.

By December 31, 2008, Sureland operated more than 20 sales and liaison offices in China.

Sureland has twice been ranked as the leading Chinese industrial fire safety company by the China Association for Fire Prevention based on six major factors including total revenue, growth rate, net profit, return on assets, investment in research and development and intellectual property. Its key products include linear heat detectors and water mist extinguishers, whose sales volumes are the largest in China. Customers in over 20 provinces have utilized its products.

Critical Accounting Policies and Estimates

While our significant accounting policies are more fully described in Note 2 to our consolidated financial statements appearing at the end of this report, we believe that the following accounting policies are the most critical to aid you in fully understanding and evaluating our reported financial results.

Revenue recognition

Revenue is recognized when it is probable that the economic benefits will flow to the Company as follows:

1. Revenue from system contracting projects are recognized using the percentage-of-completion method of accounting and, therefore, take into account the costs, estimated earnings and revenue to date on contracts not yet completed. Revenue recognized is that percentage of the total contract price that cost expended to date bears to anticipated final total cost, based on current estimates of costs to complete. Contract costs include all direct material and labor costs and those indirect costs related to contract performance, such as indirect labor, supplies, tools, repairs, and depreciation costs. Selling, general, and administrative costs are charged to expense as incurred. At the time a loss on a contract becomes known, the entire amount of the estimated ultimate loss is recognized in the consolidated financial statements. Claims for additional contract costs are recognized upon a signed change order from the customer or in accordance with paragraphs 62 and 65 of AICPA Statement of Position 81-1, "Accounting for Performance of Construction - Type and Certain Production - Type Contracts" ("SOP 81-1")
2. Revenue from product sales is recognized when the goods are delivered and title has passed. Product sales revenue represents the invoiced value of goods, net of the value-added tax (VAT). All of the Company's products that are sold in the PRC are subject to a Chinese value-added tax at a rate of 17 percent of the gross sales price. This VAT may be offset by VAT paid by the Company on raw materials and other materials included in the cost of producing their finished product.
3. Revenue from the rendering of Maintenance Services is recognized when such services are provided.
4. Provision is made for foreseeable losses as soon as they are anticipated by management.

5. Where contract costs incurred to date plus recognized profits less recognized losses exceed progress billings, the surplus is treated as an amount due from contract consumers. Where progress billings exceed contract costs incurred to date plus recognized profits less recognized losses, the surplus is treated as an amount due to contract customers.

Foreign currency translation

The reporting currency of the Company is the US dollar. The Company uses their local currency, Renminbi (RMB), as their functional currency. Results of operations and cash flow are translated at average exchange rates during the period, and assets and liabilities are translated at the unified exchange rate as quoted by the People's Bank of China at the end of the period. Translation adjustments resulting from this process are included in accumulated other comprehensive income in the statement of shareholders' equity. Transaction gains and losses that arise from exchange rate fluctuations on transactions denominated in a currency other than the functional currency are included in the results of operations as incurred. Historically, the Company has not engaged in any currency trading or hedging, although there is no assurance that the Company will not enter into such activities in the future.

Plant and equipment

Plant and equipment are stated at cost less accumulated depreciation. Depreciation is computed using the straight-line method over the estimated useful lives of the assets with a 5 percent residual value.

Use of estimates

The preparation of financial statements in conformity with generally accepted accounting principles of the United States of America requires management to make estimates and assumptions that affect the amounts reported in the combined financial statements and accompanying notes. Management believes that the estimates utilized in preparing its financial statements are reasonable and prudent. Actual results could differ from these estimates.

Certain of the Company's accounting policies require higher degrees of judgment than others in their application. These include the recognition of revenue and earnings from system contracting projects under the percentage of completion method and the allowance of doubtful accounts. Management evaluates all of its estimates and judgments on an on-going basis.

Inventories

Inventories are stated at the lower of cost or market, using the weighted average method. Inventories consist of raw materials, work in progress, finished goods and consumables. Raw materials consist primarily of materials used in production. Finished goods consist primarily of equipment used in project contracts. The cost of finished goods included direct costs of raw materials as well as direct labor used in production. Indirect production costs such as utilities and indirect labor related to production such as assembling, shipping and handling costs are also included in the cost of inventory. The Company reviews its inventory annually for possible obsolete goods or to determine if any reserves are necessary for potential obsolescence.

Accounts receivable

Accounts receivable represents the products sales, maintenance services and system contracting projects with its customers that were on credit. The credit term is generally for a period of three months for major customers. Each customer has a maximum credit limit. The Company seeks to maintain strict control over its outstanding receivables. Overdue balances are reviewed regularly by senior management.

Results of Operations

Comparison of the Year Ended on December 31, 2008 and 2007:

| | For the Year Ended December 31, | | | | | |
|-----------------------------|---------------------------------|--------------------|-------------------|--------------------|-------------------|--------------|
| | 2008 | | 2007 | | Y/Y Change | |
| | Amount (\$) | % of Total Revenue | Amount (\$) | % of Total Revenue | Amount (\$) | % |
| Revenue | | | | | | |
| System contracting projects | 57,101,984 | 82.7% | 34,581,376 | 74.0% | 22,520,608 | 65.1% |
| Products | 9,673,922 | 14.0% | 10,592,683 | 22.7% | -918,761 | -8.7% |
| Maintenance Services | 2,303,213 | 3.3% | 1,579,778 | 3.4% | 723,435 | 45.8% |
| Total Revenue | 69,079,119 | 100.0% | 46,753,837 | 100.0% | 22,325,282 | 47.8% |

Total revenues were approximately \$69.1 million for the year ended December 31, 2008 as compared to approximately \$46.8 million for the year ended December 31, 2007, an increase of approximately \$22.3 million or 47.8 percent. This increase was primarily due to the increase in our revenues from our total solution system contracting projects and maintenance services, offset by the decrease in revenues from product sales during the period. The Company recognized revenues from 333 total solution, product sales and maintenance contracts for the year ended December 31, 2008 as compared to 274 contracts for the year ended December 31, 2007.

Revenues from our total solution system contracting projects increased by 65.1 percent to \$57.1 million derived from 177 contracts for the year ended December 31, 2008, compared to \$34.6 million derived from 130 contracts for the year ended December 31, 2007. This increase in the revenues from system contracting projects was mainly attributable to the increase in the number of system contracting projects we executed and the successful execution of large-size projects like the Canfeidian Project of Capital Iron and Steel Group during the period. Revenues from our product sales were \$9.7 million with 115 contracts executed for the year ended December 31, 2008, compared to \$10.6 million with 111 contracts executed for the year ended December 31, 2007. The decrease in the revenues from product sales was mainly due to the decrease in the average contract value of product sales contracts. The revenues from maintenance service increased by 45.8 percent to \$2.3 million derived from 43 contracts for the year ended December 31, 2008, compared to \$1.6 million derived from 39 contracts for the year ended December 31, 2007. The increase in revenues from maintenance service was mainly attributable to the increase in the number of maintenance service contracts that we executed as the result of the expansion of our customer base during the period.

In particular, the three largest customers were Capital Iron and Steel Group, Anshan Iron and Steel Group and Datang Tashan Power Plant, which collectively contributed approximately \$23.2 million of revenues, representing 40.6 percent of total revenues for the year ended December 31, 2008.

| | For the Year Ended December 31, | | | | | |
|-------------------------------|---------------------------------|--------------------|-------------------|--------------------|------------------|--------------|
| | 2008 | | 2007 | | Y/Y Change | |
| | Amount (\$) | % of Total Revenue | Amount (\$) | % of Total Revenue | Amount (\$) | % |
| Cost of Revenues | | | | | | |
| System contracting projects | 25,805,086 | 45.2% | 16,158,844 | 46.7% | 9,646,242 | 59.7% |
| Products | 2,558,844 | 26.5% | 4,329,067 | 40.9% | -1,770,223 | -40.9% |
| Maintenance Services | 1,217,316 | 52.9% | 602,943 | 38.2% | 614,373 | 101.9% |
| Total Cost of Revenues | 29,581,246 | 42.8% | 21,090,854 | 45.1% | 8,490,392 | 40.3% |

| Gross Profit | | | | | | |
|-----------------------------|------------|-------|------------|-------|------------|-------|
| System contracting projects | 31,296,898 | 54.8% | 18,422,532 | 53.3% | 12,874,366 | 69.9% |
| Products | 7,115,078 | 73.5% | 6,263,616 | 59.1% | 851,462 | 13.6% |
| Maintenance Services | 1,085,897 | 47.1% | 976,835 | 61.8% | 109,062 | 11.2% |
| Total Gross Profit | 39,497,873 | 57.2% | 25,662,983 | 54.9% | 13,834,890 | 53.9% |

Cost of Revenues for the year ended December 31, 2008 was approximately \$29.6 million, as compared to \$21.1 million for the year ended December 31, 2007, representing an increase of approximately \$8.5 million or 40.3%. Gross profit for the year ended December 31, 2008 was approximately \$39.5 million, as compared to \$25.7 million for the year ended December 31, 2007, an increase of approximately \$13.8 million or 53.9 percent. Gross margin for the year ended December 31, 2008 was 57.2 percent, which is higher than the gross margin of 54.9 percent for the year ended December 31, 2007. The increase in our gross margin was mainly due to the increase in the gross margin of our system contracting projects and product sales during the period.

Gross margin of our total solution system contracting projects was 54.8 percent for the year ended December 31, 2008, compared to 53.3 percent for the year ended December 31, 2007. This slight increase in the gross margin of system contracting projects was due to the execution of total solution contracts that contributed higher gross margins, offset by the increase in the cost of raw materials during the period. The gross margin of product sales was 73.5 percent for the year ended December 31, 2008, compared to 59.1 percent for the year ended December 31, 2007. The increase in the gross margin of product sales was mainly attributable to a higher percentage of our in-house manufactured proprietary products sold in product sales contracts, which contributed higher gross margins than our outsourced products manufactured by third parties.

| | For the Year Ended December 31, | | | | | |
|-------------------------------|---------------------------------|--------------------|-------------|--------------------|-------------|--------|
| | 2008 | | 2007 | | Y/Y Change | |
| | Amount (\$) | % of Total Revenue | Amount (\$) | % of Total Revenue | Amount (\$) | % |
| Operating Expenses | | | | | | |
| Selling Expense | 6,434,887 | 9.3% | 3,907,067 | 8.4% | 2,527,820 | 64.7% |
| General Administrative | 6,680,992 | 9.7% | 5,661,356 | 12.1% | 1,019,636 | 18.0% |
| Depreciation and Amortization | 712,269 | 1.0% | 535,751 | 1.1% | 176,518 | 32.9% |
| R&D | 2,102,976 | 3.0% | 672,379 | 1.4% | 1,430,597 | 212.8% |
| Total Operating Expenses | 15,931,124 | 23.1% | 10,776,553 | 23.0% | 5,154,571 | 47.8% |

Operating expenses were approximately \$15.9 million for the year ended December 31, 2008 as compared to approximately \$10.8 million for the year ended December 31, 2007, an increase of approximately \$5.2 million or 47.8 percent. The increase in operating expenses was mainly due to the increase in our selling expense and R&D expenditure during the period.

Selling expenses were approximately \$6.4 million for the year ended December 31, 2008 as compared to approximately \$3.9 million for the year ended December 31, 2007, an increase of approximately \$2.5 million or 64.7 percent. The significant increase in our selling expenses was mainly attributable to the increase in our sales-related activities and our efforts to expand our business into new industries including nuclear power and transportations. General administrative expenses were approximately \$6.7 million for the year ended December 31, 2008, as compared to approximately \$5.7 million for the year ended December 31, 2007, an increase of approximately \$1.0 million or 18.0 percent. The increase in general administrative expenses were mainly attributable to the increase in staff and greater bad debt allowance. Depreciation and amortization expenses were approximately \$0.7 million for the year ended December 31, 2008 as compared to approximately \$0.5 million for the year ended December 31, 2007, an increase of approximately \$176,518 or 32.9 percent. The increase in depreciation and amortization expenses was mainly due to the increase in our plant and equipment related to business operations. R&D expenses were approximately \$2.1 million for the year ended December 31, 2008 as compared to approximately \$0.7 million for the year ended December 31, 2007, an increase of approximately \$1.4 million or 212.8 percent. The significant percentage increase in our R&D expenses was mainly attributable to our efforts in new product development including an anti-explosive gas bottles and alternant foam storage and mix devices and the improvement of our

existing product offerings including linear heat detectors and water mist systems.

Operating income was approximately \$23.6 million for the year ended December 31, 2008 as compared to approximately \$14.9 million for the year ended December 31, 2007, an increase of \$8.7 million or 58.3 percent. The increase in our operating income was mainly attributable to the increase in our revenues and higher gross margins during this period.

Total other income was approximately \$1.2 million for the year ended December 31, 2008 as compared to approximately \$1.9 million for the year ended December 31, 2007, a decrease of \$0.7 million or 38.3 percent. If excluding the one-time gain of \$1.2 million for the change in fair value of derivatives in the year 2007, our total other income actually increased by \$0.5 million. This increase was mainly attributable to the increase in the VAT tax return to Beijing Hua An and the increase in our interest income, offset by our one-time donation of 500,000 RMB (\$72,150) in charitable aid for Wenchuan's "5.19" earthquake.

Our net income was approximately \$24.7 million for the year ended December 31, 2008 as compared to approximately \$16.8 million net income for the year ended December 31, 2007, an increase of \$7.9 million or 47.0 percent. Excluding the one-time gain of \$1.2 million for the change in fair value of derivatives in the year 2007, our non-GAAP net income increased by \$9.1 million or 58.4 percent for the year ended December 31, 2008. The reason for this increase in the net income was mainly due to the increase in our revenues and improvement in our gross margins during the period.

Currency translation adjustments resulting from RMB appreciation process amounted to \$3,737,027 and \$2,502,595 as of the year ended December 31, 2008 and 2007, respectively.

The comprehensive income, which adds the currency adjustment to the net income, were approximately \$28.4 million for the year ended December 31, 2008 as compared to approximately \$19.3 million comprehensive income for the year ended December 31, 2007, an increase of \$9.1 million or 47.3 percent.

Liquidity and Capital Resources

As of December 31, 2008, we had working capital of \$64.7 million including cash and cash equivalents of \$26.7 million. The following table sets forth a summary of our cash flows for the periods indicated:

Statement of Cash Flow

| | Year Ended December 31 | | |
|---|------------------------|--------------|--------------|
| | 2008 | 2007 | 2006 |
| Net cash provided by operating activities | \$ 13,361,704 | \$ 9,773,114 | 8,935,061 |
| Net cash (used in) investing activities | (1,945,199) | (3,929,978) | (10,949,752) |
| Net cash (used in) provided by financing activities | (3,097,855) | 1,051,952 | 8,935,521 |
| Effect of foreign currency translation on cash and cash equivalents | 1,226,234 | 789,270 | 147,862 |
| Net cash flow | \$ 9,544,884 | \$ 7,684,358 | 7,068,692 |

Operating Activities

Net cash provided by operating activities was approximately \$13.4 million for the year ended December 31, 2008 as compared to approximately \$9.8 million net cash provided by operating activities for the same period in 2007. Net cash provided by operating activities in the year ended December 31, 2008 was mainly due to net income of \$24.7 million and \$1.7 million increase in accrued liabilities, offset by \$10.6 million increase in accounts receivable, \$2.2 million increase in inventories, \$3.8 million increase in costs and estimated earnings in excess of billing. The increase

in accrued liabilities, accounts receivable, inventories and cost and estimated earnings in excess of billing was mainly attributable to the growth of our business during the period.

The increase of \$3.8 million in costs and estimated earnings in excess of billings was mainly due to the increase in aggregate value of projects where we have recognized revenues more than we have billed the customers for these projects, while the decrease in billings in excess of costs and estimated earnings was mainly due to the decrease in aggregate value of projects where we have billed our customers less than we have recognized revenues for these projects.

Net cash provided by operating activities was approximately \$9.8 million for the year ended December 31, 2007 as compared to approximately \$8.9 million net cash provided by operating activities for the same period in 2006. Net cash provided by operating activities in the year ended December 31, 2007 was mainly due to net income of \$16.8 million, \$1.8 million increase in customer deposits, \$2.2 million increase in accrued liabilities offset by \$3.2 million increase in account receivable, \$2.3 million increase in notes receivable, \$3.3 million increase in costs and estimated earnings in excess of billings, \$4.4 million decrease in billings in excess of costs and estimated earnings. The increase of \$3.3 million in costs and estimated earnings in excess of billings is mainly due to the increased number of projects where we have billed the customers more than we have recognized revenues for these projects, while the decrease of \$4.4 million in billings in excess of costs and estimated earnings is mainly due to the decreased number of projects where we have billed the customers less than we have recognized revenues for these projects.

Investing Activities

Net cash used in investing activities in the year ended December 31, 2008 was \$1.9 million as compared to net cash used in investing activities of \$3.9 million in the same period of 2007. The cash used in investing activities in the year ended December 31, 2008 was mainly attributable to capital expenditure in the purchase of new equipments and the improvement of office and manufacturing facilities.

Net cash used in investing activities in the year ended December 31, 2007 was \$3.9 million, which is a decrease of \$7.0 million from net cash used in investing activities of \$10.9 million in the same period of 2006. Net cash used in investing activities was mainly attributable to \$3.8 million used to purchase building and equipment, \$0.6 million used to purchase intangible asset, and \$1.0 million used to invest in King Galaxy Investment Limited offset by \$0.5 million proceeds from the sale of investment in Tianjin Fire Safety Equipment Co. Ltd. and \$1.1 million proceeds from the restructure in Beijing Zhong Xiao.

Financing Activities

Net cash used in financing activities in the year ended December 31, 2008 totaled \$3.1 million as compared to \$1.1 million provided by financing activities in the same period of 2007. The cash used in financing activities in the year ended December 31, 2008 was mainly attributable to the increase in restricted cash during the period.

As a result of the total cash activities, net cash increased \$9.5 million from December 31, 2007 to December 31, 2008. We believe that our currently available working capital of \$64.7 million including cash and cash equivalents of \$26.7 million should be adequate to sustain our current operations and our anticipated expansion.

Net cash provided by financing activities in the year ended December 31, 2007 totaled \$1.1 million as compared to \$8.9 million used in financing activities in the same period of 2006. Net cash provided by financing activities in the year ended December 31, 2007 was attributable to the proceeds of \$4.2 million from issuance of common stock and the proceeds of \$1.4 million from the sale of Beijing Zhong Xiao, offset by \$2.0 million increase in restricted cash, which represents the cash required to be deposited in the bank to guarantee the execution of signed contracts, and the payment of \$2.5 million to Beijing Zhong Xiao to clear the balance between our Company and Beijing Zhong Xiao.

As a result of the total cash activities, net cash increased \$7.7 million from December 31, 2006 to December 31, 2007.

Off-Balance Sheet Arrangements

We do not have any off-balance sheet arrangements that have or are reasonably likely to have a current or future effect on our financial condition, changes in financial condition, revenues or expenses, results of operations, liquidity, capital expenditures or capital resources that are material to our investors.

Contractual Obligations

The following table summarizes our contractual obligations as of December 31, 2008:

| | Payments Due by Period | | | | |
|---------------------------------------|------------------------|------------------|-------------|-------------|-------------|
| | Total | Less than 1 year | 1-3 Years | 3-5 Years | 5 Years + |
| Contractual Obligations : | | | | | |
| Bank Indebtedness | \$ — | \$ — | \$ — | \$ — | \$ — |
| Other Indebtedness | \$ — | \$ — | \$ — | \$ — | \$ — |
| Capital Lease Obligations | \$ — | \$ — | \$ — | \$ — | \$ — |
| Operating Leases (1) | \$ 48,385 | \$ 48,385 | \$ — | \$ — | \$ — |
| Purchase Obligations | \$ — | \$ — | \$ — | \$ — | \$ — |
| Total Contractual Obligations: | \$ 48,385 | \$ 48,385 | \$ — | \$ — | \$ — |

(1) Currently we are engaged in an operating lease with Tianjin Fire Protection Equipment Company Ltd for the use of approximately 112,432 square meters land in Tianjin, consisting of manufacturing facilities, warehouses and office buildings. The term of the operating lease is two years, beginning from May 2007. The monthly payment for the lease is 66,000RMB or \$9,677.

Comparison of the Year Ended on December 31, 2007 and 2006:

| | For the Year Ended December 31, | | | | | |
|-----------------------------|---------------------------------|--------------------|-------------------|--------------------|-------------------|--------------|
| | 2007 | | 2006 | | Y/Y Change | |
| | Amount (\$) | % of Total Revenue | Amount (\$) | % of Total Revenue | Amount (\$) | % |
| Revenue | | | | | | |
| System contracting projects | 34,581,376 | 74.0% | 24,008,170 | 74.0% | 10,573,206 | 44.0% |
| Products | 10,592,683 | 22.7% | 7,701,986 | 23.7% | 2,890,697 | 37.5% |
| Maintenance Services | 1,579,778 | 3.4% | 744,880 | 2.3% | 834,898 | 112.1% |
| Total Revenue | 46,753,837 | 100.0% | 32,455,036 | 100.0% | 14,298,801 | 44.1% |

Total revenues were approximately \$46.8 million for the year ended December 31, 2007 as compared to approximately \$32.5 million for the year ended December 31, 2006, an increase of approximately \$14.3 million or 44.1 percent. This increase was mainly attributable to the further penetration of the Company's customer base in the iron and steel, power generation, petrochemical and other industries and the execution of more contracts in the period. The Company recognized revenues from 274 total solution, product sales and maintenance contracts for the year ended December 31, 2007 as compared to 221 contracts for the year ended December 31, 2006.

Revenues from system contracting projects increased by 44.0 percent to \$34.6 million derived from 130 contracts for the year ended December 31, 2007, compared to \$24.0 million derived from 103 contracts for the year ended December 31, 2006. This increase in the revenues from system contracting projects was mainly attributable to the increase in the number of system contracting projects we executed during the period. Revenues from our product sales were \$10.6 million with 111 contracts executed for the year ended December 31, 2007, compared to \$7.7 million with 98 contracts executed for the year ended December 31, 2006. The increase in the revenues from product sales was mainly due to the increase in the number of product sales contracts executed during the period. The revenues from maintenance service increased by 112.1 percent to \$1.6 million derived from 39 contracts for the year ended December 31, 2007, compared to \$0.7 million derived from 20 contracts for the year ended December 31, 2006. The increase in revenues from maintenance service was mainly due to the increase in the number of maintenance service contracts that we executed as the result of the expansion in our customer basis during the period.

In particular, the three largest customers were Maanshan Iron and Steel, Sichuan Dongfang Electronic Equipment, and Ningbo Jianlong Iron and Steel who collectively contributed approximately \$15.1 million of revenue, representing 32.2 percent of our total revenue for the year ended December 31, 2007.

| | For the Year Ended December 31, | | | | | |
|-------------------------------|---------------------------------|--------------------|-------------------|--------------------|------------------|--------------|
| | 2007 | | 2006 | | Y/Y Change | |
| | Amount (\$) | % of Total Revenue | Amount (\$) | % of Total Revenue | Amount (\$) | % |
| Cost of Revenues | | | | | | |
| System contracting projects | 16,158,844 | 46.7% | 12,893,082 | 53.7% | 3,265,762 | 25.3% |
| Products | 4,329,067 | 40.9% | 3,272,438 | 42.5% | 1,056,629 | 32.3% |
| Maintenance Services | 602,943 | 38.2% | 60,787 | 8.2% | 542,156 | 891.9% |
| Total Cost of Revenues | 21,090,854 | 45.1% | 16,226,307 | 100.0% | 4,864,547 | 30.0% |
| Gross Profit | | | | | | |
| System contracting projects | 18,422,532 | 53.3% | 11,115,088 | 46.3% | 7,307,444 | 65.7% |
| Products | 6,263,616 | 59.1% | 4,429,548 | 57.5% | 1,834,068 | 41.4% |

Edgar Filing: CHINA FIRE & SECURITY GROUP, INC. - Form 10-K/A

| | | | | | | |
|----------------------|------------|-------|------------|-------|-----------|-------|
| Maintenance Services | 976,835 | 61.8% | 684,093 | 91.8% | 292,742 | 42.8% |
| Total Gross Profit | 25,662,983 | 54.9% | 16,228,729 | 50.0% | 9,434,254 | 58.1% |

32

Cost of Revenues for the year ended December 31, 2007 was approximately \$21.1 million, as compared to \$16.2 million for the year ended December 31, 2006, an increase of approximately \$4.9 million or 30.0%. Gross profit for the year ended December 31, 2007 was approximately \$25.7 million, as compared to \$16.2 million for the year ended December 31, 2006, an increase of approximately \$9.4 million or 58.1 percent. Gross margin for the year ended December 31, 2007 was 54.9 percent, which is higher than the gross margin of 50.0 percent for the year ended December 31, 2006. The increase in our gross margin was mainly attributable to the increase in the gross margin of our system contracting projects and product sales, offset by the decrease in gross margin of our maintenance services during the period.

Gross margin of system contracting projects was 53.3 percent for the year ended December 31, 2007, compared to 46.3 percent for the year ended December 31, 2006. This increase in the gross margin of system contracting projects was due to the use of a higher percentage of our self-manufactured proprietary products that contribute higher margins and the higher selling price of some of our proprietary products during the period. The gross margin of product sales was 59.1 percent for the year ended December 31, 2007, compared to 57.5 percent for the year ended December 31, 2006. This increase in the gross margin of product sales was mainly attributable to the higher selling price of some of our proprietary products during the period.

| | For the Year Ended December 31, | | | | | |
|-------------------------------|---------------------------------|--------------------|-------------|--------------------|-------------|--------|
| | 2007 | | 2006 | | Y/Y Change | |
| | Amount (\$) | % of Total Revenue | Amount (\$) | % of Total Revenue | Amount (\$) | % |
| Operating Expenses | | | | | | |
| Selling Expense | 3,907,067 | 8.4% | 2,827,838 | 8.7% | 1,079,229 | 38.2% |
| General Administrative | 5,661,356 | 12.1% | 3,665,776 | 11.3% | 1,995,580 | 54.4% |
| Depreciation and Amortization | 535,751 | 1.1% | 498,499 | 1.5% | 37,252 | 7.5% |
| R&D | 672,379 | 1.4% | 1,258,172 | 3.9% | -585,793 | -46.6% |
| Total Operating Expenses | 10,776,553 | 23.0% | 8,250,285 | 25.4% | 2,526,268 | 30.6% |

Operating expenses were approximately \$10.8 million for the year ended December 31, 2007 as compared to approximately \$8.3 million for the year ended December 31, 2006, an increase of approximately \$2.5 million or 30.6 percent. The increase in operating expenses was mainly due to the increase in our selling expenses and general administrative expenses, offset by the decrease in our R&D expenses during the period.

Selling expenses were approximately \$3.9 million for the year ended December 31, 2007 as compared to approximately \$2.8 million for the year ended December 31, 2006, an increase of approximately \$1.1 million or 38.2 percent. The increase in selling expenses was mainly attributable to the increase in our sales-related activities to expand our customer basis. General administrative expenses were approximately \$5.7 million for the year ended December 31, 2007, as compared to approximately \$3.7 million for the year ended December 31, 2006, an increase of approximately \$2.0 million or 54.4 percent. The increase in general administrative expenses were mainly attributable to the increase in the number of our employees and the higher compensation for our officers and directors. Depreciation and amortization expenses were approximately \$0.5 million for the year ended December 31, 2007 as compared to approximately \$0.5 million for the year ended December 31, 2006, an increase of \$37,252 or 7.5 percent. R&D expenses were approximately \$0.7 million for the year ended December 31, 2007 as compared to approximately \$1.3 million for the year ended December 31, 2006, a decrease of approximately \$0.6 or 46.6 percent. The decrease in our R&D expenses was mainly attributable to the lower expenditure requirement in the early stage of our new product development cycle.

Operating income was approximately \$14.9 million for the year ended December 31, 2007 as compared to approximately \$8.0 million for the year ended December 31, 2006, an increase of \$6.9 million or 86.6 percent. The increase in our operating income was mainly due to the increase in our revenues and higher gross margin during this period. If excluding the one-time charge of \$0.4 million for reverse merger and the one-time non-cash charge of \$0.5 million for the management option expenses in 2006, the increase in operating income would be \$6.0 million or 67.7 percent for the year ended December 31, 2007 as compared to the year ended December 31, 2006. The increase was mainly due to the increase in our revenues and higher gross margin in this period.

Total other income was approximately \$1.9 million for the year ended December 31, 2007 as compared to a loss of approximately \$0.9 million for the year ended December 31, 2006. In 2006, the Company issued warrants that permitted the holder under certain circumstances to redeem the warrants for cash. Therefore, the Company had to record the fair value of the warrants as a derivative liability on the date of grant and then record a gain or loss each subsequent reporting period for the change in fair value of the warrants. In 2006, the change in fair value of the warrants from the date of issue through year end resulted in a loss of \$1.5 million. On May 3, 2007, the Company restructured the warrants so that they were no longer redeemable for cash. Therefore, the warrants were no longer subject to derivative accounting, and the Company reclassified the warrants to equity at the fair value on the date of the restructuring. The change in fair value between December 31, 2006 and the date of restructuring resulted in a gain of \$1.2 million. Excluding this factor, our total other income stayed almost the same.

Our net income was approximately \$16.8 million for the year ended December 31, 2007 as compared to approximately \$7.0 million net income for the year ended December 31, 2006, an increase of \$9.8 million or 141.1 percent. Excluding the one-time charge of \$0.4 million for reverse merger, the one-time non-cash charge of \$0.5 million for the management option expenses and the \$1.6 million charge for the change in fair value of derivative in the year 2006, and the \$1.2 million gain for the change in fair value of derivative in the year 2007, our non-GAAP net income was \$15.6 million for the year ended December 31, 2007 as compared to approximately \$9.4 million for the same period in 2006, an increase of \$6.2 million or 65.2 percent. The reason for the increase in the net income was mainly due to the increase in revenues and gross margin.

Currency translation adjustments resulting from RMB appreciation process amounted to \$2,502,595 and \$581,932 as of the year ended December 31, 2007 and 2006, respectively.

The comprehensive income, which adds the currency adjustment to the net income, were approximately \$19.3 million for the year ended December 31, 2007 as compared to approximately \$7.6 million comprehensive income for the year ended December 31, 2006, an increase of \$11.8 million or 155.9 percent.

Item 7A. Quantitative And Qualitative Disclosures About Market Risk

Market risk is the risk of loss to future earnings, to fair values or to future cash flows that may result from changes in the price of a financial instrument. The value of a financial instrument may change as a result of changes in interest rates, exchange rates, commodity prices, equity prices and other market changes. Our cash and cash equivalents are held for working capital purposes and consist primarily of bank deposits. We do not enter into investments for trading or speculative purposes.

Interest Rate Risk

We currently do not have any long-term debt. Our exposure to interest rate risk primarily relates to the interest income generated by excess cash invested in demand deposits. We have not used derivative financial instruments in our investment portfolio in order to reduce interest rate risk. Interest earning instruments carry a degree of interest rate risk and our future interest income may change, depending on market interest rate movement.

Foreign Currency Risk

Our business is operated in the PRC, and its value is effectively denominated in Renminbi. The fluctuation of foreign exchange rate between U.S. dollars and Renminbi could affect the value of our common stock. Our revenues and expenses are primarily denominated in Renminbi, and so our exposure to foreign exchange risks should generally be limited. We do not have material monetary assets and liabilities denominated in U.S. dollars, although to the extent that we do in the future, the fluctuation of foreign exchange rate would affect the value of these monetary assets and liabilities denominated in U.S. dollars. Generally, appreciation of Renminbi against U.S. dollars will devalue the assets and liabilities denominated in U.S. dollar, while devaluation of Renminbi against U.S. dollars will appreciate the assets and liabilities denominated in U.S. dollar. In China, very limited hedging transactions are available to reduce our exposure to exchange rate fluctuations. To date, we have not entered into any hedging transactions in an effort to reduce our exposure to foreign currency exchange risk. While we may decide to enter into hedging transactions in the future, the availability and effectiveness of these hedges may be limited and we may not be able to successfully hedge our exposure at all.

Item 8. Financial Statements And Supplementary Data

- (a) Financial statements required by Item 8 are set forth at the pages indicated in item 15(a) below.
 (b) Supplementary Data:

Item 9. Changes In and Disagreements With Accountants On Accounting and Financial Disclosure

Not applicable.

Item 9A. Controls And Procedures

(a) Management's annual report on disclosure control and procedures.

As required by Exchange Act Rule 13a-15(b), our management has carried out an evaluation, under the supervision of our Chief Executive Officer and Principal Accounting Officer, of the effectiveness of the design and operation of our disclosure controls and procedures as of December 31, 2008.

Disclosure controls and procedures refer to controls and other procedures designed to ensure that information required to be disclosed in the reports we file or submit under the Securities Exchange Act is recorded, processed, summarized and reported within the time periods specified in the rules and forms of the SEC and that such information is accumulated and communicated to our management, including our Chief Executive Officer and Principal Accounting Officer, as appropriate, to allow timely decisions regarding required disclosure.

Based on that evaluation, the Chief Executive Officer and Principal Accounting Officer have concluded that our disclosure controls and procedures were not effective as of December 31, 2008 because of the material weaknesses described in Management's Report on Internal Control over Financial Reporting below.

(b) Management's annual report on internal control over financial reporting.

As required by Exchange Act Rule 13a-15(c), our management has carried out an evaluation, under the supervision of our Chief Executive Officer and Principal Accounting Officer, of the effectiveness of the design and operation of our internal control over financial reporting as of December 31, 2008.

Management is responsible for establishing and maintaining adequate internal control over financial reporting. The Company's internal control over financial reporting is a process that is designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles, and includes those policies and procedures that:

- Pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of assets of the Company,
- Provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures are being made only in accordance with authorizations of management and the board of directors of the Company, and
- Provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the Company's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies and procedures may deteriorate.

Management performed an assessment of the effectiveness of the Company's internal control over financial reporting as of December 31, 2008. In making this assessment, we used the criteria set forth by the Committee of Sponsoring Organizations of the Treadway Commission (COSO) in Internal Control - Integrated Framework. Based on our assessment, we determined that, as of December 31, 2008, our internal control over financial reporting was not effective as a result of the following material weaknesses:

1Lack of internal controls over the project budgeting process – Due to lack of project budgeting personnel and an ineffective design of project budgeting process, we do not maintain sufficient control over project budgeting process. Although this material weakness did not result in significant adjustments to our consolidated financial statements (less than 1% adjustment on our revenue) this material weakness resulted in the possibility that a material misstatement of our consolidated financial statements might not be prevented or detected in a timely basis.

1Lack of internal accounting staff with adequate US GAAP knowledge and inadequate supervisory review of the construction accounting process - We did not maintain effective controls over the financial reporting process due to an insufficient complement of internal personnel with a sufficient level of accounting knowledge, experience and training in the application of U.S. GAAP. We did not implement adequate supervisory review of the construction accounting process to ensure the financial statements were prepared in accordance with U.S. GAAP.

The material weakness in our project budgeting process was mainly due to the lack of project budgeting personnel and the ineffective design of our project budgeting process. The growth of our project budgeting team, which is in charge of the estimation of the project budget costs, could not meet the expansion of our business. By the end of 2008, we were in need of project budget personnel, who are responsible for both the project cost estimations for new projects and the update of cost budgets for on-going projects. The currently ineffective design of our project budgeting process was mainly due to the lack of monitoring procedures in our project budget process to prevent any untimely updates of on-going projects' budgets. Consequently, due to these two shortages in our project budget process, there were five project budgets (out of 221 projects) that were not updated in a timely manner. These errors were identified by our independent auditors during their annual audit work and the adjustments to our consolidated financial statements were less than 1% of our revenue. Although the adjustment was immaterial, we understand that as the project budget process is a key process in our control systems for a construction company, the lack of monitoring procedures in this process can result in the possibility that a material misstatement of our consolidated financial statement might not be prevented or detected in a timely basis.

The material weakness in our financial reporting process due to the lack of internal accounting staff with adequate U.S. GAAP knowledge and inadequate supervisory review of the construction accounting process resulted from the

fact that the Company's operations are in China and our accounting staff that service our supervisory review of the construction accounting process possess adequate knowledge of PRC GAAP, but only possess limited knowledge in U.S. GAAP. Although the conformity of PRC GAAP to U.S. GAAP was observed, there still exist meaningful differences between the two accounting principles, which cause the material weakness in our internal control over financial reporting. In China's market, it is difficult to recruit qualified accounting staff with adequate U.S. GAAP knowledge at competitive cost. The growth of our accounting department did not keep up with the expansion of our business and the lack of accounting personnel resulted into the inadequate supervisory review of the construction accounting process.

Due to this material weakness, one material adjustment of \$6.3 million was made due to a missing close-out entry between Cost & Estimated Earnings and Progress Billings for disclosure purpose. This error was mainly due to the difference between PRC GAAP and US GAAP for project construction accounting.

Moore Stephens Wurth Frazer and Torbet, LLP, an independent registered public accounting firm, has audited the financial statements included in this annual report and, as part of the audit, has issued a report, included herein, on the effectiveness of our internal control over financial reporting as of December 31, 2008.

(c) Changes in Internal Controls over Financial Reporting

During the year ended December 31, 2008, there was no change in our internal controls over financial reporting that has materially affected, or that is reasonably likely to materially affect, our internal control over financial reporting.

Regarding the material weakness described above, we have identified the following changes necessary to improve our internal control over financial reporting:

- We will hire more skilled project budgeting personnel to enhance our project budgeting team to meet the increased needs of our expanding number of projects. We will redesign our project budgeting process and augment monitoring procedures to ensure timely updates of project budgets that will reflect the best estimate of project costs under construction. We will also increase the effectiveness and frequency of communication between our accounting, project budgeting and project implementation departments through regularly scheduled inter-department meetings.
- We will hire more skilled accounting personnel with an appropriate level of technical accounting knowledge and experience in the application of U.S. GAAP. We also plan to hire an external U.S. GAAP accounting consultant with relevant accounting experience, skills and knowledge in the financial reporting processes to provide U.S. GAAP knowledge training to our existing accounting staff. We will enforce senior management's checks and approvals process to ensure the accuracy of our daily book keeping.

We anticipate the remedial actions described above will strengthen the Company's internal control over financial reporting, and will address the related material weakness that management identified at December 31, 2008.

(d) Independent Registered Public Accounting Firm's Attestation Report

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

To the Board of Directors and Stockholders of

China Fire & Security Group, Inc.

We have audited China Fire & Security Group, Inc. and subsidiaries' (the "Company") internal control over financial reporting as of December 31, 2008, based on criteria established in Internal Control—Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO). The Company's management is responsible for maintaining effective internal control over financial reporting and for its assessment of the effectiveness of internal control over financial reporting, included in the accompanying "Management's Report on Internal Control Over Financial Reporting." Our responsibility is to express an opinion on the company's internal control over financial reporting based on our audit.

We conducted our audit in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether effective internal control over financial reporting was maintained in all material respects. Our audit of internal control over financial reporting included obtaining an understanding of internal control over financial reporting, assessing the

risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. Our audit also included performing such other procedures as we considered necessary in the circumstances. We believe that our audit provides a reasonable basis for our opinion.

A company's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Because of the inherent limitations of internal control over financial reporting, including the possibility of collusion or improper management override of controls, material misstatements due to error or fraud may not be prevented or detected on a timely basis. Also, projections of any evaluation of effectiveness of the internal control over financial reporting to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

A material weakness is a control deficiency, or combination of deficiencies, in internal control over financial reporting, such that there is a reasonable possibility that a material misstatement of the Company's annual or interim financial statements will not be prevented or detected on a timely basis. The following material weaknesses have been identified and included in management's assessment:

The Company did not maintain a sufficient complement of personnel with the appropriate level of accounting knowledge, experience and training in the application of generally accepted accounting principles commensurate with the Company's financial reporting requirements and did not implement adequate supervisory review of the construction accounting process to ensure the financial statements were prepared in accordance with generally accepted accounting principles of the United States of America. These resulted in material adjustments to the Company's preliminary consolidated financial statements. The Company also did not design and maintain effective controls over the budgeting process. This material weakness did not result in material adjustments to the Company's consolidated financial statements; however, there is a reasonable possibility that due to this control deficiency, a material misstatement of the Company's consolidated financial statements related to the revenues and costs and estimated earnings accounts will not be prevented or detected on a timely basis. These material weaknesses were considered in determining the nature, timing, and extent of audit tests applied in our audit of the 2008 financial statements, and this report does not affect our report dated March 16, 2009 on those financial statements.

In our opinion, because of the effect of the material weaknesses described above on the achievement of the objectives of the control criteria, the Company has not maintained effective internal control over financial reporting as of December 31, 2008, based on criteria established in Internal Control—Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO).

We have also audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), the consolidated balance sheets and the related statements of income and comprehensive income, shareholders' equity, and cash flows of the Company, and our report dated March 16, 2009 expressed an unqualified opinion.

None.

PART III

Item 10. Directors, Executive Officers and Corporate Governance

Executive Officers and Directors

We have provided below certain information about our executive officers and directors. Our directors serve for a term of one year or until their successors are duly elected. Our executive officers serve at the pleasure of our board of directors and have no fixed term of office.

| Name | Age | Position |
|------------------------|-----|---------------------------------------|
| Brian Lin | 44 | Director and Chief Executive Officer |
| Weishe Zhang | 44 | Director and Chief Technology Officer |
| Xiaoyuan (Robert) Yuan | 34 | Principal Accounting Officer |
| Weigang Li | 51 | Vice President of Sales |
| Haijun Yang | 36 | Vice President of Operations |
| Gangjin Li | 47 | Chairman of the Board |

| | | |
|------------------|----|----------------------|
| Albert McLelland | 50 | Independent Director |
| Xianghua Li | 64 | Independent Director |
| Xuewen Xiao | 40 | Independent Director |
| Guoyou Zhang | 57 | Independent Director |

Mr. Brian Lin, CEO, Director, 44. Mr. Lin serves as Director and Chief Executive Officer of China Fire & Security Group, Inc. Mr. Lin has served as a Director since October 2006. Mr. Lin has over 17 years of management and technical experience both in the US and China. Mr. Lin is an early stage investor and co-founder of the Company and has been providing strategic guidance since its inception. Prior to joining the Company full time in January 2006, Mr. Lin served as CEO of Beijing Linkhead Technologies, and held various management and technical positions with UTStarcom in China and Nortel Networks and Motorola in the US from 2001 to 2005. Mr. Lin received his Master's Degree in Electrical Engineering from University of Toronto, Canada in 1989.

Mr. Weishe Zhang, Chief Technology Officer, Director, 44. Mr. Zhang has served as a director and our Chief Technology Officer since February 2009. From 2002 to February 2009, Mr. Zhang held various positions in the field of product research and development, including Director of System Integration, Director of Product Research and Development Center and Chief Engineer in Sureland Industrial (a wholly owned subsidiary of China Fire). With over 15 years of experience in the China fire protection industry, Mr. Zhang is the inventor of dozens of international and domestic product and technology patents. Mr. Zhang received a Master's Degree in Engineering from Beijing University of Aeronautics & Astronautics in 1989.

Mr. Weigang Li, Vice President of Sales of China Fire, General Manager of Sureland Industrial, 41. Mr. Li has served as our VP of Sales since February 2009. Mr. Li co-founded Sureland Industrial in 1995 and held various positions, including deputy director, director and deputy General Manager of Sales. Mr. Li has been influential in winning a number of large, notable contracts since the Company's inception. Mr. Li has over 15 years of hands on experience in project sales and sales force management in the China fire protection industry. He is currently completing a business diploma in an advanced program for young Chinese entrepreneurs at Tsinghua University. Mr. Li is the brother of Mr. Gangjin Li, the Chairman of the Board.

Mr. Haijun Yang, Vice President of Operations, the Company's Secretary, Deputy General Manager of Sureland Industrial, 36. Mr. Yang has served as our Vice President of Operations and the Company's Secretary since February 2009. From 2000 to February 2009, Mr. Yang held various positions including Executive Assistant to the General Manager, Secretary of the Board of Sureland and Deputy General Manager in charge of preparation for going public, merger and acquisition and operation management in Sureland Industrial. With 9 years of working experience in the China fire protection industry, Mr. Yang is responsible for internal operation management, including human resource, legal affairs, mergers and acquisitions, to support the Company's continued growth. Mr. Yang received his MBA from Renmin University of China in 2000 and is currently pursuing his Ph.D. in business management since 2004.

Mr. Xiaoyuan (Robert) Yuan, Principal Accounting Officer, 34, Mr. Xiaoyuan (Robert) Yuan joined the Company as the Company's Secretary in July 2007 and has served as the Principal Accounting Officer since August 2008. From October 2006 to July 2007, Mr. Yuan worked for CCG Elite Investor Relations, a global investor relations company, as an account executive representing a number of public companies listed in the U. S. From 2003 to 2005, Mr. Yuan held various positions in the fields of industry research, strategic planning and M&A for Lenovo Group Co. Ltd. (HKSE: 0992.HK), the largest PC manufacturer in China. Mr. Yuan graduated from Texas Christian University with his Ph.D. degree in Physics and MBA with concentration in finance in 2003.

Mr. Gangjin Li, Chairman of the Board, 47. Mr. Li has served as our Chairman of the Board since October 2006. Mr. Li is the founder of Sureland, and served as Chairman of the Board and the General Manager of Sureland Industrial from 1995 until January 2009. Mr. Li is an executive director of China Fire Protection Association (CFPA), and vice-chairman of "Electrical Fire Prevention Committee of CFPA". Mr. Li holds a bachelor's degree from Wuhan University of Science and Technology and a Master degree in management science from Beijing University.

Mr. Albert McLelland, Director, 50, Albert McLelland has served as an independent Director since September 2008. Since 2003, Mr. McLelland has been the Senior Managing Director of AmPac Strategic Capital LLC (AmPac) Prior to founding AmPac, Mr. McLelland was responsible for the day-to-day operations of the cross-border transactions Initiative of PricewaterhouseCoopers' (PwC) Financial Advisory Services. Albert possesses extensive investment and merchant banking experience. He has built two Asian based financial service firms and also ran corporate finance at CEF Taiwan Limited. Mr. McLelland began his investment banking career at Shearson Lehman. Mr. McLelland is also teaching "Venturing in China" at the Caruth Institute for Entrepreneurship at the Cox School of Business at Southern Methodist University. Mr. McLelland holds an MBA degree from the University of Chicago and a Master of International Affairs from Columbia. He did his undergraduate studies at the University of South Florida and also studied Mandarin at the National Normal University in Taiwan.

Mr. Xianghua Li, Director, 64, Mr. Xianghua Li has served as an independent Director since September 2008. Mr. Li was the vice chairman of China Fire Protection Association since October 2003. Mr. Li had his diploma from Military School of Mechanical Technology.

Mr. Xuewen Xiao, Director, 40, Mr. Xuewen Xiao has served as an independent Director since September 2008. Mr. Xiao has been the president of Chongqing Iron & Steel Design & Research Institute and the chairman of CISDI Engineering Co, Ltd, a state-owned company since March 2003. Mr. Xiao graduated from Tsinghua University with Master of Science degree in Mechanical Engineering in 1994.

Mr. Guoyou Zhang, Director, 57, Mr. Zhang has served as an independent Director since April 2007. Mr. Zhang is currently the Vice President of Beijing University and the director of the Institute of International Business Management, Beijing University. Professor Zhang has extensive experience in teaching economics and business management and has written and/or edited many published articles and books over the past 20 years. Mr. Zhang has been teaching in Beijing University since 1976. He received his Ph.D. degree in Economics from Beijing University in 1991.

Family Relationships

Mr. Weigang Li is the brother of Mr. Gangjin Li, Chairman of the Board.

Board Composition and Committees

Our Board has seven (7) members, of which four (4) are independent directors. We have an Audit Committee, a Compensation Committee and a Nominating and Corporate Governance Committee. The Audit Committee has been established as a separately designated standing committee in accordance with section 3(a)(58)(A) of the Exchange Act. The Audit Committee has at least one member, Mr. Albert McLelland, who meets the definition of a "financial expert" under SEC rules and whom the Board has determined to be "independent".

Audit Committee. The Audit Committee is currently comprised of Mr. Albert McLelland, Mr. Xianghua Li and Mr. Guoyou Zhang with Mr. Albert McLelland as the chairman, each of whom are "independent" as that term is defined by SEC rules and under the NASDAQ listing standards. The Audit Committee is directly responsible for the appointment, retention, compensation and oversight of the work of any registered public accounting firm employed by the Company (including resolution of disagreements between management and the accounting firm regarding financial reporting) for the purpose of preparing or issuing an audit report or related work or performing other audit, review or other services. The Audit Committee has the ultimate authority and responsibility to evaluate and, where appropriate, replace the registered public accounting firm. The Audit Committee has the authority to review and approve transactions between the Company and its directors, officers and affiliates.

Compensation Committee. The Compensation Committee is responsible for the administration of all salary, bonus and incentive compensation plans for our officers and key employees. The members of the Compensation Committee are Mr. Guoyou Zhang, Mr. Xianghua Li and Mr. Xuewen Xiao, with Mr. Guoyou Zhang as the chairman. All of the members of the Compensation Committee are “independent” directors.

Nominating and Corporate Governance Committee. The Nominating and Corporate Governance Committee is responsible for preparing the list of candidates to fill the expiring terms of directors on our Board of Directors. The committee submits the list of candidates to the Board of Directors who determines which candidates will be nominated to serve on the Board of Directors. The nominees are then submitted for election at the annual meeting of stockholders. The committee also submits to the entire Board of Directors, a list of candidates to fill any interim vacancies on the Board of Directors resulting from the departure of a member of the Board of Directors for any reason prior to the expiration of his term. In recommending candidates for the Board of Directors, the committee keeps in mind the functions of this body.

The committee considers various criteria, including the ability of the individual to meet SEC and NASDAQ “independence” requirements, general business experience, general financial experience, knowledge of the company’s industry (including past industry experience), education, and demonstrated character and judgment. The committee will consider director candidates recommended by a stockholder if the stockholder mails timely notice to the secretary of the Company at its principal offices, which notice includes (i) the name, age and business address of such nominee, (ii) the principal occupation of such nominee, (iii) a brief statement as to such nominee’s qualifications, (iv) a statement that such nominee consents to his or her nomination and will serve as a director if elected, (v) whether such nominee meets the definition of an “independent” director under the SEC rules and under NASDAQ listing standards and (vi) the name, address, class and number of shares of company stock held by the nominating stockholder.

Any person nominated by a stockholder for election to the Board of Directors will be evaluated based on the same criteria as all other nominees. The committee also oversees our adherence to our corporate governance standards. The members of the committee are Mr. Xuewen Xiao, Mr. Guoyou Zhang, and Mr. Xianghua Li, with Xuewen Xiao as the chairman.

The Board had 11 meetings during last fiscal year. All members attended at least 75% of the meetings.

Section 16(a) Beneficial Ownership Reporting Compliance

Section 16(a) of the Exchange Act requires our executive officers, directors and beneficial owners of more than ten percent (10%) to report their beneficial ownership of equity interests in the company to the SEC. Their initial reports are required to be filed using the SEC's Form 3, and they are required to report subsequent purchases, sales, and other changes using the SEC's Form 4, which must be filed within two business days of most transactions. Officers, directors, and persons owning more than 10% of our capital shares are required by SEC regulations to furnish us with copies of all of reports they file pursuant to Section 16(a).

Mr. Xiaoyuan Yuan, Principal Financial Officer of the Company, did not file the required Form 3 in a timely manner. Directors, Mr. Albert McLelland, Xuewen Xiao and Mr. Xianghua Li, did not file the required Form 3 in a timely manner. Worldtime Investment Advisors, Ltd. did not file the required Form 5 in a timely manner.

Code of Ethics

We have adopted a Code of Ethics (as defined in Item 406 of Regulation S-K) that applies to our principal executive, financial and accounting officers. China Fire & Security Group, Inc. will provide a copy of its code of ethics, without charge, to any person that requests it. Requests should be addressed in writing to Mr. Brian Lin, Chief Executive Officer, B-2508 TYG Center, C2 Dongsanhuanbeilu, Chaoyang District, Beijing 100027, People's Republic of China.

Item 11. Executive Compensation

Compensation Discussion and Analysis

The Company's executive compensation program is designed to pay key management personnel competitive remuneration based on the authority, responsibility and accountability of the position held by the individual. In addition, the Company considers the competitive environment relative to compensation paid to senior management with comparable job scopes in companies in related industries and of the same approximate size.

Our senior officers receive compensation in the form of salaries, annual bonuses and stock options. We have entered into service agreements with each of our senior officers. None of these service agreements provide benefits to our senior officers upon termination.

An understanding of our executive compensation program begins with an understanding of the objectives the program is intended to serve. These include:

- Offering competitive compensation. We seek to offer a compensation package that is attractive and competitive with the compensation practices of the peer companies with which we compete for talent.
- Rewarding performance. Our compensation program is intended to closely align executive compensation with performance by tying a significant portion of compensation to the achievement of financial and other Company goals and the executive's contributions to the accomplishment of those goals.
- Aligning the interests of our executives with those of our shareholders. Over 90% of the total compensation paid to our Named Executive Officers is in the form of equity-based compensation. This serves to further align the interests of our executives with those of our shareholders.

Elements of Our Executive Compensation Programs

Our Compensation mainly consists of two parts, Cash Compensation and Equity Incentive Compensation. The Cash Compensation consists of Base Salary and Bonus. The Equity Incentive Compensation aligns executives' and shareholders' interests by providing executives an ownership stake in the Company.

Base Salary. Base salaries for our named executives are set based on their professional qualifications and experiences, education background, scope of their responsibilities, taking into account competitive market compensation levels paid by other similar-sized companies for similar positions and reasonableness and fairness when compared to other similar positions of responsibility within the Company. Base salaries are reviewed annually by the Compensation Committee and may be adjusted annually as needed.

Bonus. To achieve our goal of pay-for-performance, bonuses will be paid to our named executives when company financial goals are achieved. The bonus is typically a percentage of the Base Salary and is part of the cash compensation of our named executives. The Compensation Committee has determined that when the Company actual financial results are better than the guidance provided by the Company, the bonuses will be paid in full. Otherwise, no bonuses will be paid to our named executives. The financial guidance was determined based on the condition of the

industry and industry trends in the fire protection market and the historical financial performance of the Company. The financial guidance approved by the board of directors in fiscal year 2008 was \$60.7 million in revenue and \$21.8 million in net income, representing 30% growth compared to the results in fiscal year 2007. The actual financial results in 2008 were \$69.1 million in revenue and \$24.7 million in net income, which surpassed the financial guidance. Consequently, the bonuses to Mr. Brian Lin and Mr. Xiaoyuan Yuan were fully paid in fiscal year 2008.

Equity Incentive Compensation. A key element of our pay-for-performance philosophy is our reliance on performance-based equity awards through the Company's stock option plan. This program aligns executives' and shareholders' interests by providing executives an ownership stake in the Company. Our Compensation Committee has the authority to award equity incentive compensation, i.e. stock options, to our executive officers in such amounts and on such terms as the Compensation Committee determines in its sole discretion. The Compensation Committee reviews each executive's individual performance and his or her contribution to our strategic goals and determines the amount of stock options to be awarded towards the end of the fiscal year. The exercise price is the closing market price on the date of the grant.

The following is a discussion of our executive compensation program and the compensation decisions made for fiscal year 2008 with respect to the executive officers named in the Compensation Table on page 44.

In 2008, the Compensation Committee, which is responsible for approving and overseeing executive compensation, accepted recommendations from senior management and reviewed such recommendations with market data to determine the compensation to be paid to the Company's executive officers. Important determining factors included the Company's financial performance, the level of compensation paid to similarly situated executives in comparably-sized public companies and the contributions made by each of the executive officers to the success of the Company.

How Executive Compensation is Determined

The Compensation Committee of the company seeks to offer our executives compensation packages that are attractive and competitive with compensation practices of the peer companies with which we might compete for talent. The Compensation Committee has determined that a peer company would have the following characteristics:

- majority of the business is providing solutions and systems to industrial customers in China
- listed on a major exchange in the United States with market capitalization between US\$200 million to US\$800 million

The Compensation Committee collected the executive compensation information of the following companies ("Comparison Group") during the course of discussing and finalizing the compensation for our executives.

| | Salary | Fiscal Year 2007 Option | Total |
|---|---------|----------------------------|---------|
| 1 China Security & Surveillance (CSR) | | | |
| CEO | 40,840 | 206,304 | 247,144 |
| CFO | 153,594 | 206,304 | 359,898 |
| China Information Security Technology, Inc. | | | |
| 2 (CPBY) | | | |
| CEO | 45,949 | 369,000 | 414,949 |
| CFO | 60,360 | - | 60,360 |
| 3 COGO Group, Inc. (COGO) | | | |
| CEO | 30,776 | 271,339 | 302,115 |
| CFO | 125,000 | 752,994 | 877,994 |
| 4 Harbin Electric, Inc. (HRBN) | | | |

Edgar Filing: CHINA FIRE & SECURITY GROUP, INC. - Form 10-K/A

| | | | |
|-----|--------|--------|--------|
| CEO | 23,715 | 47,784 | 71,499 |
| CFO | 14,229 | 31,856 | 46,085 |

| | | | |
|----------------------------|---------|---|---------|
| 5 Shengdatech, Inc. (SDTH) | | | |
| CEO | 300,000 | - | 300,000 |
| CFO | 100,000 | - | 100,000 |

| | | | |
|---------------------------------------|--------|---|--------|
| 6 Wonder Auto Technology, Inc. (WATG) | | | |
| CEO | 90,000 | - | 90,000 |
| CFO | 60,000 | - | 60,000 |

| | | | |
|-----|---------|--------|--|
| | Highest | Lowest | |
| CEO | 414,949 | 71,499 | |
| CFO | 877,994 | 46,085 | |

The Compensation Committee conducted a comparison of the proposed executive compensation structure and practices to those of the Comparison Group, including base salary, target bonus and equity grants. The market analysis developed was used to determine pay targets for 2008.

In 2008, the proposed compensation for Mr. Brian Lin is as follows:

Cash Compensation: \$120,000 where the Base Salary is \$84,000 (70%) and the Bonus is \$36,000 (30%). The Bonus will be paid in full if the company's actually financial results meet or beat the financial guidance approved by the board of directors and released to the public. Otherwise, no Bonus will be paid to Brian Lin.

Equity Compensation: Per stock option agreement dated July 1, 2006, 18,750 options shares will be vested during the year of 2008. There is no additional equity based compensation for Brian Lin in 2008.

In 2008, the proposed compensation for Mr. Xiaoyuan Yuan is as follows:

Cash Compensation: \$36,800 where the Base Salary is \$29,440 (80%) and the Bonus is \$7,360 (20%). The Bonus will be paid in full if the company's actually financial results meet or beat the financial guidance approved by the board of directors and released to the public. Otherwise, no Bonus will be paid to Xiaoyuan Yuan.

Equity Compensation: Per stock option agreement dated July 1, 2007, 5,000 options shares will be vested during the year of 2008. There is no additional equity based compensation for Xiaoyuan Yuan in 2008.

Based on its review in 2008, the Compensation Committee concluded that the structure of CFSG's proposed compensation program is reasonably consistent with industry practices. The target parameters for the compensation of Mr. Brian Lin, our CEO and Mr. Xiaoyuan Yuan, our Principal Accounting Officer, in fiscal year 2008 were determined based on the range of compensation for the above Comparison Group. The actual compensation for Mr. Brian Lin in fiscal year 2008 was \$124,000, which fell within the targeted parameters of \$71,499 and \$414,949 for CEOs. The actual compensation for Mr. Xiaoyuan Yuan in fiscal year 2008 was \$49,900, which also fell within the targeted parameters of \$46,085 to \$877,944 for CFOs.

The Compensation Committee reviewed and approved the compensation paid to the named executives of the company as listed in the Compensation Table. Recommendations for annual increases in compensation to named executives other than our CEO are recommended by our CEO. These recommendations are presented to the Compensation Committee and are subject to their approval. The annual increase in compensation of the CEO was both recommended and approved by our Compensation Committee. Pay increases for non-named employee will be at the discretion of the employee's supervisor and subject to senior management approval.

Stock-Based Compensation Plans

In 2008, our board of directors and shareholders adopted our 2008 stock option plan. The Plan is intended to enhance the Company's and its Affiliates' (as defined herein) ability to attract and retain highly qualified officers, directors, key employees and other persons, and to motivate such officers, directors, key employees and other persons to serve the Company and its Affiliates and to expend maximum effort to improve the business results and earnings of the Company, by providing to such persons an opportunity to acquire or increase a direct proprietary interest in the operations and future success of the Company. To this end, the Plan provides for the grant of stock options, stock appreciation rights, restricted stock, restricted stock units, unrestricted stock and cash awards. At the time of adoption, 2,000,000 common shares were reserved for issuance under the plan. The plan has a term of ten years but may be terminated earlier by our board of directors.

We have not issued stock based compensations to any of our executives nor directors in 2008. On January 2, 2009, pursuant to the Company's 2008 Omnibus Long-term Incentive Plan, the Company's Board of Directors authorized the issuance of 1,000,000 shares of options for its employees with a total of 800,000 shares options issued to executive officers. The options will vest evenly each quarter over the following four years, starting from the first quarter of 2009.

Compensation Table

| Name & Principal Position | Year | Salary | Bonus | Option* Awards | All other Compensation | Total |
|---|------|------------|-------|----------------|------------------------|------------|
| Gangjin Li, Chairman** | 2008 | \$ 65,800 | — | \$ 8,400 | — | \$ 74,200 |
| | 2007 | 65,800 | — | 62,550 | — | 128,350 |
| | 2006 | 12,000 | — | 257,600 | — | 269,600 |
| Brian Lin, CEO and PAO prior to August 2008 | 2008 | \$ 120,000 | — | \$ 4,200 | — | \$ 124,200 |
| | 2007 | 120,000 | — | 31,275 | — | 151,275 |
| | 2006 | 12,000 | — | 128,800 | — | 140,800 |
| Xiaoyuan Yuan, Principal Accounting Officer (since August 2008) | 2008 | \$ 36,800 | — | \$ 14,300 | — | \$ 49,900 |

*The assumptions made in valuing the option were disclosed in the financial statements Note 14.

**Mr. Li has not been involved in the day-to-day operation of the Company since January 2008.

Grants of Plan-Based Awards

The Company currently does not have any award plans. No options were granted to any officer in 2008.

Outstanding Equity Awards at Fiscal Year-End Table

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

To the Board of Directors and Stockholders of
China Fire & Security Group, Inc.

We have audited the accompanying consolidated balance sheets of China Fire & Security Group, Inc. and subsidiaries as of December 31, 2008 and 2007, and the related consolidated statements of income and other comprehensive income, shareholders' equity, and cash flows for each of the years in the three-year period ended December 31, 2008. China Fire & Security Group, Inc.'s management is responsible for these consolidated financial statements. Our responsibility is to express an opinion on these consolidated financial statements based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the consolidated financial statements referred to above present fairly, in all material respects, the financial position of China Fire & Security Group, Inc. and subsidiaries as of December 31, 2008 and 2007, and the results of its operations and its cash flows for each of the years in the three-year period ended December 31, 2008, in conformity with accounting principles generally accepted in the United States of America.

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), China Fire & Security Group, Inc.'s internal control over financial reporting as of December 31, 2008, based on criteria established in Internal Control—Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO), and our report dated March 16, 2009 expressed an adverse opinion.

/s/ Moore Stephens Wurth Frazer and Torbet, LLP

CHINA FIRE & SECURITY GROUP, INC. AND SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

December 31, 2008

Note 1 - Background

China Fire & Security Group Inc. (the “Company”), is a Florida corporation. The Company, through its subsidiaries, is engaged in the design, development, manufacture and sale of fire protection products and services for industrial customers in China.

Note 2 - Summary of significant accounting policies

The reporting entity

The consolidated financial statements of China Fire & Security Group Inc. and subsidiaries reflect the activities of the parent and the following subsidiaries:

| Subsidiaries | Incorporated in | Ownership Percentage |
|--|----------------------------|----------------------|
| China Fire Protection Group Inc (“CFPG”) | British Virgin Islands | 100% |
| Sureland Industrial Fire Safety Limited (“Sureland Industrial”) | People’s Republic of China | 100% |
| Sureland Industrial Fire Equipment Co. Ltd (“Sureland Equipment”) | People’s Republic of China | 100% |
| Tianxiao Fire Safety Equipment Co., Ltd. (“Tianxiao Equipment”) | People’s Republic of China | 100% |
| Beijing Hua An Times Fire Safety Technology Co., Ltd. (“Beijing Hua An”) | People’s Republic of China | 100% |

Basis of presentation

The accompanying consolidated financial statements have been prepared in accordance with accounting principles generally accepted in the United States of America. All material intercompany transactions and balances have been eliminated in consolidation.

Use of estimates

The preparation of financial statements in conformity with generally accepted accounting principles of the United States of America requires management to make estimates and assumptions that affect the amounts reported in the combined financial statements and accompanying notes. Management believes that the estimates utilized in preparing its financial statements are reasonable and prudent. Actual results could differ from these estimates.

See report of independent registered public accounting firm.

CHINA FIRE & SECURITY GROUP, INC. AND SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

December 31, 2008

Certain of the Company's accounting policies require higher degrees of judgment than others in their application. These include the recognition of revenue and earnings from system contracting projects under the percentage of completion method, determining the fair value of stock based compensation and the allowance of doubtful accounts. Management evaluates all of its estimates and judgments on an on-going basis.

Revenue recognition

Revenue is recognized when it is probable that the economic benefits will flow to the Company as follows:

1. Revenue from system contracting projects are recognized using the percentage-of-completion method of accounting and, therefore, take into account the costs, estimated earnings and revenue to date on contracts not yet completed. Revenue recognized is that percentage of the total contract price that cost expended to date bears to anticipated final total cost, based on current estimates of costs to complete. Contract costs include all direct material and labor costs and those indirect costs related to contract performance, such as indirect labor, supplies, tools, repairs, and depreciation costs. Selling, general, and administrative costs are charged to expense as incurred. At the time a loss on a contract becomes known, the entire amount of the estimated ultimate loss is recognized in the consolidated financial statements. Claims for additional contract costs are recognized upon a signed change order from the customer or in accordance with paragraphs 62 and 65 of the AICPA'S Statement of Position ("SOP") 81-1, "Accounting for Performance of Construction - Type and Certain Production - Type Contracts" ("SOP 81-1").
2. Revenue from product sales is recognized when the goods are delivered and title has passed. Product sales revenue is presented net of a value-added tax (VAT). All of the Company's products that are sold in the People's Republic of China ("PRC") are subject to a Chinese value-added tax at a rate of 17% of the gross sales price. This VAT may be offset by VAT paid by the Company on raw materials and other materials included in the cost of producing their finished product.
3. Revenue from the rendering of Maintenance Services is recognized over the service period on a straight line basis.

See report of independent registered public accounting firm.

CHINA FIRE & SECURITY GROUP, INC. AND SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

December 31, 2008

In accordance with SFAS 48, "Revenue Recognition when Right of Return Exists," revenue is recorded net of an estimate of markdowns, price concessions and warranty costs. Such reserve is based on management's evaluation of historical experience, current industry trends and estimated costs.

Enterprise Wide Disclosure

Almost all the Company's products (fire detecting products, fire alarm control device, and water mist/sprinkler systems) are sold via system contracting projects or as part of the integrated products sales. The composition of these three types of products varies significantly from project to project, both in quantity and in dollar amounts. Although the Company could provide a breakdown of sales contribution for our own products for each project, it is almost impossible to provide revenues for each of our products when the revenue from each project is recognized based on percentage of completion. More importantly, the revenues from the Company's own products do not accurately reflect our overall financial performance. The Company is a system contracting projects provider rather than product vendors who sell their own products directly or through channels. Therefore, it is not practical to separately disclose the revenues from external customers for each of our products.

The Company's chief operating decision-makers (i.e. chief executive officer and his direct reports) review financial information presented on a consolidated basis, accompanied by disaggregated information about revenues by business lines for purposes of allocating resources and evaluating financial performance. There are no segment managers who are held accountable for operations, operating results and plans for levels or components below the consolidated unit level. Based on qualitative and quantitative criteria established by SFAS 131, "Disclosures about Segments of an Enterprise and Related Information", the Company considers itself to be operating within one reportable segment.

Shipping and handling

Costs related to shipping and handlings are included in cost of revenue pursuant to EITF 00-10 "Accounting for Shipping and Handling Fees and Costs."

Foreign currency translation

The reporting currency of the Company is the US dollar. The Company uses their local currency, Renminbi (RMB), as their functional currency. Results of operations and cash flow are translated at average exchange rates during the period, and assets and liabilities are translated at the unified exchange rate as quoted by the People's Bank of China at the end of the period. Translation adjustments resulting from this process are included in accumulated other comprehensive income in the statement of shareholders' equity.

Translation adjustments amounted to \$7,305,144 and \$3,568,117 as of December 31, 2008 and 2007, respectively. Asset and liability accounts at December 31, 2008 were translated at 6.82 RMB to \$1.00 as compared to 7.29 RMB at December 31, 2007. Equity accounts were stated at their historical rate. The average translation rates applied to income statements accounts for the years ended December 31, 2008, 2007 and 2006 were 6.94 RMB, 7.59 RMB and 7.96 RMB, respectively. Cash flows are also translated at average translation rates for the period, therefore, amounts reported on the statement of cash flows will not necessarily agree with changes in the corresponding balances on the balance sheet.

See report of independent registered public accounting firm.

F-8

CHINA FIRE & SECURITY GROUP, INC. AND SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

December 31, 2008

Transaction gains and losses that arise from exchange rate fluctuations on transactions denominated in a currency other than the functional currency are included in the results of operations as incurred. Historically, the Company has not entered any currency trading or hedging transactions, although there is no assurance that the Company will not enter into such transactions in the future.

Plant and equipment

Plant and equipment are stated at cost less accumulated depreciation. Depreciation is computed using the straight-line method over the estimated useful lives of the assets with 5% residual value. For the years ended December 31, 2008, 2007 and 2006, depreciation expense amounted to \$728,080, \$555,604, and \$526,240 respectively.

Estimated useful lives of the assets are as follows:

| | Useful Life |
|----------------------------|----------------|
| Buildings and improvements | 40 years |
| Transportation equipment | 5 years |
| Machinery | 10 years |
| Office equipment | 5 years |
| Furniture | 5 years |

Construction in progress represents the costs incurred in connection with the construction of buildings or additions to the Company's plant facilities. No depreciation is provided for construction in progress until such time as the assets are completed and placed into service.

The cost and related accumulated depreciation of assets sold or otherwise retired are eliminated from the accounts and any gain or loss is included in the statements of income. Maintenance, repairs and minor renewals are charged directly to expense as incurred. Major additions and betterment to buildings and equipment are capitalized.

Long-term assets of the Company are reviewed periodically or more often if circumstances dictate, to determine whether their carrying value has become impaired. The Company considers assets to be impaired if the carrying value exceeds the future projected cash flows from related operations. The Company evaluates the periods of depreciation and amortization to determine whether subsequent events and circumstances warrant revised estimates of useful lives. As of December 31, 2008, the Company expects these assets to be fully recoverable.

See report of independent registered public accounting firm.

CHINA FIRE & SECURITY GROUP, INC. AND SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

December 31, 2008

Plant and equipment consist of the following:

| | December 31, 2008 | December 31, 2007 |
|-------------------------------|----------------------|----------------------|
| Buildings and improvements | \$ 6,417,304 | \$ 5,077,373 |
| Transportation equipment | 2,747,038 | 1,985,701 |
| Machinery | 1,249,470 | 970,500 |
| Office equipment | 1,262,426 | 1,047,350 |
| Furniture | 90,882 | 35,972 |
| Total | 11,767,120 | 9,116,896 |
| Less accumulated depreciation | (3,321,866) | (2,548,646) |
| Plant and equipment, net | \$ 8,445,254 | \$ 6,568,250 |

Concentration of risk

Cash includes cash on hand and demand deposits in accounts maintained with state owned banks within the People's Republic of China and Hong Kong. The Company maintains balances at financial institutions which, from time to time, may exceed Hong Kong Deposit Protection Board insured limits for the banks located in Hong Kong. Balances at financial institutions or state owned banks within the PRC are not covered by insurance. As of December 31, 2008 and 2007, the Company had deposits (including restricted cash balances) totaling to \$30,765,488 and \$20,940,016, that are not covered by insurance, respectively. The Company has not experienced any losses in such accounts and believes it is not exposed to any risks on its cash in bank accounts.

The Company's operations are carried out in the PRC. Accordingly, the Company's business, financial condition and results of operations may be influenced by the political, economic and legal environments in the PRC, and by the general state of the PRC's economy. The Company's operations in the PRC are subject to specific considerations and significant risks not typically associated with companies in the North America and Western Europe. These include risks associated with, among others, the political, economic and legal environments and foreign currency exchange. The Company's results may be adversely affected by changes in governmental policies with respect to laws and regulations, anti-inflationary measures, currency conversion and remittance abroad, and rates and methods of taxation, among other things.

See report of independent registered public accounting firm.

CHINA FIRE & SECURITY GROUP, INC. AND SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

December 31, 2008

The Company has one major customer who represents approximately 25% of the Company's sales for the year ended December 31, 2008. Accounts receivable from this customer was \$0 as of December 31, 2008. The Company had one major customer who represents approximately 20% of the Company's sales for the year ended December 31, 2007. Accounts receivable from this customer was \$266,660 as of December 31, 2007.

Cash and cash equivalents

The Company considers all highly liquid investments with original maturities of three months or less to be cash equivalents. Cash equivalents are carried at cost, which approximates at its market value. Cash and cash equivalents also include unrestricted time deposits.

Restricted cash

Restricted cash represents cash required to be deposited in a separate bank account subject to withdrawal restrictions by its system contracting projects and product sales customers to guarantee its contracts will be performed. The deposit cannot be drawn or transferred by the Company until the restriction period has expired.

| | December 31, 2008 | December 31, 2007 |
|-------------------------------|----------------------|----------------------|
| Restricted cash | | |
| Products sales | \$ 1,608,056 | \$ 102,355 |
| System contracting projects | 5,642,705 | 3,727,572 |
| Total restricted cash | 7,250,761 | 3,829,927 |
| Restricted cash - non current | (1,872,828) | - |
| Restricted cash - current | \$ 5,377, 933 | \$ 3,829,927 |

Inventories

Inventories are stated at the lower of cost or market, using weighted average method. Inventories consisted of the following as of December 31,

| | 2008 | 2007 |
|------------------|--------------|--------------|
| Raw materials | \$ 896,797 | \$ 310,255 |
| Finished goods | 4,597,407 | 2,617,638 |
| Work in progress | 1,044,734 | 1,120,390 |
| Total | \$ 6,538,938 | \$ 4,048,283 |

See report of independent registered public accounting firm.

CHINA FIRE & SECURITY GROUP, INC. AND SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

December 31, 2008

Raw materials consist primarily of materials used in production. Finished goods consist primarily of equipment used in product sales and system contracting projects. The costs of finished goods include direct costs of raw materials as well as direct labor used in production. Indirect production costs such as utilities and indirect labor related to production such as assembling, shipping and handling costs are also included in the cost of inventory. The Company reviews its inventories periodically to determine if any reserves are necessary for potential obsolescence. As of December 31, 2008 and 2007, the Company determined no reserves are necessary.

Accounts receivable

Accounts receivable represents amounts due from customers for products sales, maintenance services and system contracting projects. Overdue balances are reviewed regularly by senior management. Reserves are recorded when collection of amounts due are in doubt. Delinquent account balances are written-off after management has determined that the likelihood of collection is not probable, known bad debts are written off against allowance for doubtful accounts when identified.

Accounts receivable consists of the following:

| | December 31, 2008 | December 31, 2007 |
|--|----------------------|----------------------|
| Accounts receivable: | | |
| System contracting projects | \$ 19,167,096 | \$ 10,296,762 |
| Maintenance services | 3,193,166 | 670,357 |
| Products sales | 8,943,893 | 8,234,430 |
| Total accounts receivable | 31,304,155 | 19,201,549 |
| Allowance for bad debts | (4,370,362) | (2,483,359) |
| Accounts receivable, net | 26,933,793 | 16,718,190 |
| Accounts receivable - non-current retentions | (1,107,450) | (193,029) |
| Accounts receivable - current | \$ 25,826,343 | \$ 16,525,161 |

The activity in the allowance for doubtful accounts for trade accounts receivable for the years ended December 31, 2008 and 2007 is as follows:

| | 2008 | 2007 |
|---|--------------|--------------|
| Beginning allowance for doubtful accounts | \$ 2,483,359 | \$ 1,252,947 |
| Additional charged to bad debt expense | 1,683,336 | 1,111,051 |
| Write-off charged against the allowance | - | (12,700) |
| Foreign currency translation adjustment | 203,667 | 132,061 |
| Ending allowance for doubtful accounts | \$ 4,370,362 | \$ 2,483,359 |

See report of independent registered public accounting firm.

CHINA FIRE & SECURITY GROUP, INC. AND SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

December 31, 2008

Retentions held by customers of system contracting projects included in the Company's accounts receivable as following:

| | December 31, 2008 | December 31, 2007 |
|-------------------|----------------------|----------------------|
| Retentions | | |
| Current | \$ 3,685,136 | \$ 2,829,250 |
| Non-current | 1,107,450 | 193,029 |
| Total retentions | \$ 4,792,586 | \$ 3,022,279 |

These balances represent portions of billings made by the Company but held for payment by the customer pending satisfactory completion of the project. Retention payments are generally collected within one year of the completion of the project.

Costs and estimated earnings in excess of billings

The current asset, "Costs and estimated earnings in excess of billings" on contracts, represents revenues recognized in excess of amounts billed.

| | December 31, 2008 | December 31, 2007 |
|---|----------------------|----------------------|
| Contract costs incurred plus recognized profits less recognized losses to date | \$ 68,149,817 | \$ 50,877,880 |
| Less: progress billings | 50,328,109 | 37,809,844 |
| Costs and estimated earnings in excess of billings | \$ 17,821,708 | \$ 13,068,036 |

Billings in excess of costs and estimated earnings

The current liability, "Billings in excess of costs and estimated earnings" on contracts, represents billings in excess of revenues recognized.

| | December 31, 2008 | December 31, 2007 |
|---|----------------------|----------------------|
| Progress billings | \$ 31,456,807 | \$ 15,713,786 |
| Less: contracts costs incurred plus recognized profits less recognized losses to date | 27,219,279 | 10,831,569 |
| Billings in excess of costs and estimated earnings | \$ 4,237,528 | \$ 4,882,217 |

See report of independent registered public accounting firm.

CHINA FIRE & SECURITY GROUP, INC. AND SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

December 31, 2008

Research and development

Research and development expenses include salaries, consultant fees, supplies and materials, as well as costs related to other overhead such as depreciation, facilities, utilities and other departmental expenses. The costs we incur with respect to internally developed technology and engineering services are included in research and development expenses as incurred as they do not directly relate to any particular licensee, license agreement or licenses fee.

Warranty

Generally, the Company's products are not covered by specific warranty terms. However, it is the Company's policy to replace parts if they become defective within one year after deployment at no additional charge. The Company maintains a provision for potential warranty costs on these products for one year. This provision represents management's assessment of our history of warranty costs while incorporating estimates by our quality review staff of our potential product failure rates. The Company records a warranty obligation in selling expense at the time of revenue are recognized. For the years ended December 31, 2008, 2007 and 2006, the Company made \$518,940, \$0 and \$0, respectively, provision for estimated warranty claims for our products.

Fair value of financial instruments

On January 1, 2008, the Company adopted SFAS 157, Fair Value Measurements, which defines fair value, establishes a three-level valuation hierarchy for disclosures of fair value measurement and enhances disclosures requirements for fair value measures. The carrying amounts reported in the balance sheets for current assets and current liabilities qualify as financial instruments and are a reasonable estimate of fair value because of the short period of time between the origination of such instruments and their expected realization and their current market rate of interest. The three levels are defined as follow:

- Level 1 inputs to the valuation methodology are quoted prices (unadjusted) for identical assets or liabilities in active markets.
- Level 2 inputs to the valuation methodology include quoted prices for similar assets and liabilities in active markets, and inputs that are observable for the assets or liability, either directly or indirectly, for substantially the full term of the financial instruments.
 - Level 3 inputs to the valuation methodology are unobservable and significant to the fair value.

See report of independent registered public accounting firm.

CHINA FIRE & SECURITY GROUP, INC. AND SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

December 31, 2008

The Company invested \$167,238 (RMB 1,140,000) to Hubei Shou An Changjiang Fire Protection Co., Ltd for 19% ownership and invested \$1,000,000 to King Galaxy Investments Limited for 5% ownership. Total investment as of December 31, 2008 amounted to \$1,167,238. Since there is no quoted or observable market price for the fair value of similar long term in joint venture, the Company then used the level 3 inputs for its valuation methodology. The determination of the fair value was based on the cost of the capital contribution to the joint ventures.

The Company did not identify any other assets and liabilities that are required to be presented on the balance sheet at fair value in accordance with SFAS 157.

Intangible assets

Land use rights - All land in the People's Republic of China is owned by the government. However, the government grants the user "land use rights". The Company acquired land use rights in 2001 and the land use rights expire in 2051. The costs of these rights are being amortized over fifty years using the straight-line method.

Technology rights - In May 2007, the Company acquired two technology rights to manufacture fire protection products for and the costs of these rights are being amortized over ten years using the straight-line method

| | December 31, 2008 | December 31, 2007 |
|--------------------------|----------------------|----------------------|
| Land use rights | \$ 770,789 | \$ 720,445 |
| Technology rights | 608,745 | 608,745 |
| Accumulated amortization | (263,085) | (178,255) |
| Balance | \$ 1,116,449 | \$ 1,150,935 |

Amortization expense amounted to \$75,041, \$54,257, and \$13,041 for the years ended December 31, 2008, 2007 and 2006, respectively.

Intangible assets of the Company are reviewed annually, more often when circumstances require, to determine whether their carrying value has become impaired. The Company considers assets to be impaired if the carrying value exceeds the future projected cash flows from related operations. The Company also evaluates the periods of amortization to determine whether subsequent events and circumstances warrant revised estimates of useful lives. As of December 31, 2008, the Company expects these assets to be fully recoverable.

See report of independent registered public accounting firm.

CHINA FIRE & SECURITY GROUP, INC. AND SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

December 31, 2008

Income taxes

The Company reports income taxes pursuant to SFAS 109, "Accounting for Income Taxes". SFAS 109 requires the recognition of deferred income tax liabilities and assets for the expected future tax consequences of temporary differences between income tax basis and financial reporting basis of assets and liabilities. Provision for income taxes consist of taxes currently due plus deferred taxes. There are no deferred tax amounts at December 31, 2008 and December 31, 2007.

The Company adopted FASB Interpretation 48, "Accounting for Uncertainty in Income Taxes" ("FIN 48"), as of January 1, 2007. A tax position is recognized as a benefit only if it is "more likely than not" that the tax position would be sustained in a tax examination, with a tax examination being presumed to occur. The amount recognized is the largest amount of tax benefit that is greater than 50% likely of being realized on examination. For tax positions not meeting the "more likely than not" test, no tax benefit is recorded. FIN 48 also provides guidance on derecognition, classification, interest and penalties, accounting in interim periods, disclosures, and transition. The adoption had no affect on the Company's financial statements.

The Company's operations are subject to income and transaction taxes in the United States and in the PRC jurisdictions. Significant estimates and judgments are required in determining the Company's worldwide provision for income taxes. Some of these estimates are based on interpretations of existing tax laws or regulations. The ultimate amount of tax liability may be uncertain as a result.

The Company does not anticipate any events which could cause change to these uncertainties.

The charge for taxation is based on the results for the year as adjusted for items, which are non-assessable or disallowed. It is calculated using tax rates that have been enacted or substantively enacted by the balance sheet date.

Deferred tax is accounted for using the balance sheet liability method in respect of temporary differences arising from differences between the carrying amount of assets and liabilities in the financial statements and the corresponding tax basis used in the computation of assessable tax profit.

In principal, deferred tax liabilities are recognized for all taxable temporary differences, and deferred tax assets are recognized to the extent that it is probably that taxable profit will be available against which deductible temporary differences can be utilized. Deferred tax is calculated using tax rates that are expected to apply to the period when the asset is realized or the liability is settled. Deferred tax is charged or credited in the income statement, except when it is related to items credited or charged directly to equity, in which case the deferred tax is also dealt with in equity. Deferred tax assets and liabilities are offset when they relate to income taxes levied by the same taxation authority and the Company intends to settle its current tax assets and liabilities on a net basis.

See report of independent registered public accounting firm.

CHINA FIRE & SECURITY GROUP, INC. AND SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

December 31, 2008

Value Added Tax

Enterprises or individuals who sell products, engage in repair and maintenance or import and export goods in the PRC are subject to a value added tax in accordance with Chinese laws. The value added tax standard rate is 17% of the gross sales price. A credit is available whereby VAT paid on the purchases of semi-finished products or raw materials used in the contract and production of the Company's finished products can be used to offset the VAT due on sales of the finished product.

VAT on sales and VAT on purchases amounted to \$6,941,766 and \$5,183,036 for the year ended December 31, 2008, \$6,279,253 and \$4,485,292 for the year ended December 31, 2007, and \$2,501,949 and \$3,258,567 for the year ended December 31, 2006, respectively. Sales and purchases are recorded net of VAT collected and paid as the Company acts as an agent for the government. VAT taxes are not impacted by the income tax holiday.

Stock based compensation

The Company adopted SFAS 123R "Accounting for Stock-Based Compensation" at the beginning of 2006, which defines a fair-value-based method of accounting for stock based employee compensation and transactions in which an entity issues its equity instruments to acquire goods and services from non-employees. Stock compensation for stock granted to non-employees has been determined in accordance with SFAS 123R and the EITF. 96-18, "Accounting for Equity Instruments that are issued to Other than Employees for Acquiring, or in Conjunction with Selling Goods or Services", as the fair value of the consideration received or the fair value of equity instruments issued, whichever is more reliably measured.

Recently issued accounting pronouncements

In February 2007, the FASB issued SFAS 159, The Fair Value Option for Financial Assets and Financial Liabilities—including an amendment of FASB Statement No. 115. SFAS 159 permits companies to choose to measure many financial instruments and certain other items at fair value that are not currently required to be measured at fair value. The objective of SFAS 159 is to provide opportunities to mitigate volatility in reported earnings caused by measuring related assets and liabilities differently without having to apply hedge accounting provisions. SFAS 159 also establishes presentation and disclosure requirements designed to facilitate comparisons between companies that choose different measurement attributes for similar types of assets and liabilities. SFAS No. 159 is effective as of the beginning of an entity's first fiscal year that begins after November 15, 2007. The Company adopted SFAS 159 on January 1, 2008. The Company chose not to elect the option to measure the fair value of eligible financial assets and liabilities.

See report of independent registered public accounting firm.

CHINA FIRE & SECURITY GROUP, INC. AND SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

December 31, 2008

In June 2007, the FASB issued FASB Staff Position No. EITF 07-3, "Accounting for Nonrefundable Advance Payments for Goods or Services Received for use in Future Research and Development Activities" ("FSP EITF 07-3"), which addresses whether nonrefundable advance payments for goods or services that used or rendered for research and development activities should be expensed when the advance payment is made or when the research and development activity has been performed. FSP EITF 07-3 was effective beginning in 2008. The adoption of FSP EITF 07-3 did not impact our consolidated financial statements.

In December 2007, the FASB issued SFAS 160, "Noncontrolling Interests in Consolidated Financial Statements - an amendment of Accounting Research Bulletin No. 51", which establishes accounting and reporting standards for ownership interests in subsidiaries held by parties other than the parent, the amount of consolidated net income attributable to the parent and to the noncontrolling interest, changes in a parent's ownership interest and the valuation of retained non-controlling equity investments when a subsidiary is deconsolidated. The Statement also establishes reporting requirements that provide sufficient disclosures that clearly identify and distinguish between the interests of the parent and the interests of the non-controlling owners. SFAS 160 is effective for fiscal years beginning after December 15, 2008. The Company has not determined the effect that the application of SFAS 160 will have on its consolidated financial statements.

In December 2007, SFAS 141(R), "Business Combinations", was issued. SFAS 141R replaces SFAS No. 141, Business Combinations. SFAS 141R retains the fundamental requirements in SFAS 141 that the acquisition method of accounting, which SFAS 141 called the purchase method, be used for all business combinations and for an acquirer to be identified for each business combination. SFAS 141R requires an acquirer to recognize the assets acquired, the liabilities assumed, and any noncontrolling interest in the acquiree at the acquisition date, measured at their fair values as of that date, with limited exceptions. This replaces SFAS 141's cost-allocation process, which required the cost of an acquisition to be allocated to the individual assets acquired and liabilities assumed based on their estimated fair values. SFAS 141R also requires the acquirer in a business combination achieved in stages (sometimes referred to as a step acquisition) to recognize the identifiable assets and liabilities, as well as the noncontrolling interest in the acquiree, at the full amounts of their fair values (or other amounts determined in accordance with SFAS 141R). SFAS 141R applies prospectively to business combinations for which the acquisition date is on or after the beginning of the first annual reporting period beginning on or after December 15, 2008. An entity may not apply it before that date. The Company is currently evaluating the impact that adopting SFAS 141R will have on its financial statements.

See report of independent registered public accounting firm.

CHINA FIRE & SECURITY GROUP, INC. AND SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

December 31, 2008

In March 2008, the FASB issued SFAS 161, "Disclosures about Derivative Instruments and Hedging Activities - An Amendment of SFAS No. 133". Effective on January 1, 2009, SFAS 161 seeks to improve financial reporting for derivative instruments and hedging activities by requiring enhanced disclosures regarding the impact on financial position, financial performance, and cash flows. To achieve this increased transparency, SFAS 161 requires (1) the disclosure of the fair value of derivative instruments and gains and losses in a tabular format; (2) the disclosure of derivative features that are credit risk-related; and (3) cross-referencing within the footnotes. The Company is in the process of evaluating the new disclosure requirements under SFAS 161.

In May 2008, the FASB issued SFAS 162, "The Hierarchy of Generally Accepted Accounting Principles". FAS 162 is intended to improve financial reporting by identifying a consistent framework, or hierarchy, for selecting accounting principles to be used in preparing financial statements that are presented in conformity with U.S. GAAP for nongovernmental entities. SFAS 162 is effective 60 days following the SEC's approval of the Public Company Accounting Oversight Board amendments to AU Section 411, "The Meaning of Present Fairly in Conformity with Generally Accepted Accounting Principles." The Company is in the process of evaluating the impact of adoption of this statement on the results of operations, financial position or cash flows.

In June 2008, the FASB issued EITF 07-5 "Determining whether an Instrument (or Embedded Feature) is indexed to an Entity's Own Stock". This Issue is effective for financial statements issued for fiscal years beginning after December 15, 2008, and interim periods within those fiscal years. Early application is not permitted. Paragraph 11(a) of SFAS 133 specifies that a contract that would otherwise meet the definition of a derivative but is both (a) indexed to the Company's own stock and (b) classified in stockholders' equity in the statement of financial position would not be considered a derivative financial instrument. EITF 07-5 provides a new two-step model to be applied in determining whether a financial instrument or an embedded feature is indexed to an issuer's own stock and thus able to qualify for the SFAS 133 paragraph 11(a) scope exception. This standard will triggered liability accounting on all options and warrants exercisable at strike prices denominated in any currency other than the functional currency of the operating entity in China (Renminbi). The Company is currently evaluating the impact of the adoption of EITF 07-5 on the Company's consolidated financial statements.

See report of independent registered public accounting firm.

CHINA FIRE & SECURITY GROUP, INC. AND SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

December 31, 2008

In June 2008, FASB issued EITF 08-4, "Transition Guidance for Conforming Changes to Issue No. 98-5". The objective of EITF 08-4 is to provide transition guidance for conforming changes made to EITF 98-5, "Accounting for Convertible Securities with Beneficial Conversion Features or Contingently Adjustable Conversion Ratios", that result from EITF 00-27 "Application of Issue No. 98-5 to Certain Convertible Instruments", and SFAS 150, "Accounting for Certain Financial Instruments with Characteristics of both Liabilities and Equity". This Issue is effective for financial statements issued for fiscal years ending after December 15, 2008. Early application is not permitted. Management is currently evaluating the impact of adoption of EITF 08-4 on the accounting for the convertible notes and related warrants transactions.

On October 10, 2008, the FASB issued FSP 157-3, "Determining the Fair Value of a Financial Asset When the Market for That Asset Is Not Active," which clarifies the application of SFAS 157 in a market that is not active and provides an example to illustrate key considerations in determining the fair value of a financial asset when the market for that financial asset is not active. FSP 157-3 became effective on October 10, 2008, and its adoption did not have a material impact on our financial position or results.

In January 2009, the FASB issued FSP EITF 99-20-1, "Amendments to the Impairment Guidance of EITF Issue No. 99-20, "Recognition of Interest Income and Impairment on Purchased and Retained Beneficial Interests in Securitized Financial Assets". FSP EITF 99-20-1 changes the impairment model included within EITF 99-20 to be more consistent with the impairment model of SFAS No. 115. FSP EITF 99-20-1 achieves this by amending the impairment model in EITF 99-20 to remove its exclusive reliance on "market participant" estimates of future cash flows used in determining fair value. Changing the cash flows used to analyze other-than-temporary impairment from the "market participant" view to a holder's estimate of whether there has been a "probable" adverse change in estimated cash flows allows companies to apply reasonable judgment in assessing whether an other-than-temporary impairment has occurred. The adoption of FSP EITF 99-20-1 did not have a material impact on our consolidated financial statements because all of our investments in debt securities are classified as trading securities.

Reclassifications

Certain prior period amounts have been reclassified to conform to the current period presentation. These reclassifications have no effect on net income or cash flows.

See report of independent registered public accounting firm.

CHINA FIRE & SECURITY GROUP, INC. AND SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

December 31, 2008

Note 3 - Earnings per share

The Company reports earnings per share in accordance with the provisions of SFAS 128, "Earnings per Share." SFAS 128 requires presentation of basic and diluted earnings per share in conjunction with the disclosure of the methodology used in computing such earnings per share. Basic earnings per share is computed by dividing income available to common stockholders by the weighted average common shares outstanding during the period. Diluted earnings per share takes into account the potential dilution that could occur if securities or other contracts to issue common stock were exercised and converted into common stock.

The following is a reconciliation of the basic and diluted earnings per share computation for the years ended December 31:

| | 2008 | 2007 | 2006 |
|---|---------------|---------------|--------------|
| Net income for earnings per share | \$ 24,703,852 | \$ 16,801,636 | \$ 6,969,641 |
| Weighted average shares used in basic computation | 27,568,214 | 26,873,742 | 24,340,196 |
| Diluted effect of stock options and warrants | 642,406 | 847,429 | 199,218 |
| Weighted average shares used in diluted computation | 28,210,620 | 27,721,171 | 24,539,414 |
| Earnings per share: | | | |
| Basic | \$ 0.90 | \$ 0.63 | \$ 0.29 |
| Diluted | \$ 0.88 | \$ 0.61 | \$ 0.28 |

At December 31, 2008 and 2007, all outstanding stock options and warrants were included in the calculation of diluted earnings per share. At December 31, 2006, 1,169,306 warrants were excluded from the calculation because of their antidilutive nature.

Note 4 – Related party transactions

The Company has accounts receivable from Hubei Shou An Changjiang Fire Protection Co., Ltd. ("Hubei Shou An"), in which the Company has 19% ownership interest. The receivable due from Hubei Shou An was \$114,388 and \$0 as of December 31, 2008 and 2007, respectively. This balance was resulted from product sales totaling \$96,068 plus 17% VAT of \$19,408 and resulted in translation loss of \$1,088. This amount was expected to be repaid by December 31, 2009 in cash.

See report of independent registered public accounting firm.

CHINA FIRE & SECURITY GROUP, INC. AND SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

December 31, 2008

The Company has other receivable from Hubei Shou An, in which the Company has 19% ownership interest. The receivable due from Hubei Shou An was \$351,835 and \$0 as of December 31, 2008 and 2007, respectively. This balance was for the operating capital in Hubei Shou An and expected to be repaid by June 30, 2009 in cash.

Note 5 - Notes receivable

Notes receivable represents trade accounts receivable due from various customers where the customers' bank has guaranteed the payment of the receivable. This amount is non-interest bearing and is normally paid within three to six months. The Company has the ability to submit their request for payment to the customer's bank earlier than the scheduled payment date. However, the Company will incur an interest charge and a processing fee when they submit the payment request early. The Company's notes receivable totaled \$3,670,259 and \$3,315,811 as of December 31, 2008 and 2007, respectively.

Note 6 - Prepayments and deferred expenses

Prepayments and deferred expenses are monies deposited with or advanced to subcontractors to perform services on System Contracting Projects. Some subcontractors require a certain amount of money to be deposited as a guarantee payment in order for them start performing the services. Prepayments and deferred expenses also include monies deposited or advanced to vendors on future inventory purchases to ensure timely delivery. The total outstanding amount was \$2,816,976 and \$2,218,391 as of December 31, 2008 and 2007, respectively.

Note 7 - Investment in joint ventures

During the second quarter of 2007, the Company invested \$167,238 (RMB 1,140,000) for a 19% interest in Hubei Shou An Changjiang Fire Protection Co., Ltd., located in China Hubei, PRC. The investment is recorded under the cost accounting method.

During the third quarter of 2007, the Company invested \$1,000,000 for a 5% interest in King Galaxy Investments Limited. King Galaxy through its wholly owned subsidiary, China Alliance Security Holdings Company Limited owns 100% of Wan Sent (China) Technology Co., Ltd. ("Wan Sent"), an emerging Chinese fire emergency remote-monitoring system provider based in Beijing, PRC. The investment has been recorded under the cost accounting method.

See report of independent registered public accounting firm.

CHINA FIRE & SECURITY GROUP, INC. AND SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

December 31, 2008

Note 8 - Customer deposits

Customer deposits represent amounts advanced by customers on products orders and maintenance services deposits and system contracting projects deposits. The product or service normally is shipped or performed within six months after receipt of the advance payment and the related sale is recognized in accordance with the Company's revenue recognition policy. Customer deposits also represent amounts advanced by customers on system contracting projects deposits. The advance payment will apply to the invoices when the Company billed our customer based on the progression of the projects. As of December 31, 2008 and 2007, customer deposits amounted to \$6,102,026 and \$4,757,179, respectively.

Note 9 - Accrued liabilities

Accrued liabilities represent subcontractors' expenses incurred as of balance sheet date for system contracting projects. Accrued liabilities also represent accrued estimation of warranty expenses. As of December 31, 2008 and 2007, accrued liabilities amounted to \$6,785,409 and \$4,214,530, respectively.

Note 10 - Income taxes

Prior to January 1, 2008, under the Income Tax Laws of PRC, the Company's subsidiaries are generally subject to an income tax at an effective rate of 25% on income reported in the statutory financial statements after appropriate tax adjustments, unless the enterprise is located in a specially designated region where it allows enterprises a three-year income tax exemption and a 50% income tax reduction for the following three years or the enterprise is a manufacturing related joint venture with a foreign enterprise or a wholly owned subsidiary of a foreign enterprise, where it allows enterprises a two-year income tax exemption and a 50% income tax reduction for the following three years.

Under the Income Tax Laws of Beijing State Administration Taxation of PRC, any enterprise with manufacturing operations in the City of Beijing who is a wholly owned subsidiary of a foreign enterprise is subject to income tax rate of 24%.

The Company's subsidiaries were paying the following tax rate for the year ended December 31, 2006.

| Subsidiaries | Income tax exemption | Effective income tax rate |
|---|----------------------|---------------------------|
| Sureland Industrial | 9% | 24% |
| Sureland Equipment | 33% | 0% |
| Beijing Hua An | 33% | 0% |
| Beijing Zhong Xiao Fire Safety Technology Co., Ltd. | 18% | 15% |

See report of independent registered public accounting firm.

CHINA FIRE & SECURITY GROUP, INC. AND SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

December 31, 2008

The Company's subsidiaries were paying the following tax rate for the year ended December 31, 2007.

| Subsidiaries | Income tax exemption | Effective income tax rate |
|---------------------|----------------------|---------------------------|
| Sureland Industrial | 33% | 0% |
| Sureland Equipment | 33% | 0% |
| Beijing Hua An | 33% | 0% |
| Tianxiao Equipment | 0% | 33% |

Beginning from January 1, 2008, the new Enterprise Income Tax ("EIT") law replaced the existing income tax laws for Domestic Enterprises ("DES") and Foreign Invested Enterprises ("FIEs").

The key changes are:

- The new standard EIT rate of 25% will replace the 33% rate currently applicable to both DES and FIEs, except for High Tech companies who pays a reduced rate of 15%;
- Companies established before March 16, 2007 will continue to enjoy tax holiday treatment approved by local government for a grace period of the next 5 years or until the tax holiday term is completed, whichever is sooner.

The Company's subsidiaries are paying the following tax rate for the year ended December 31, 2008.

| Subsidiaries | Income tax exemption | Effective income tax rate |
|---------------------|----------------------|---------------------------|
| Sureland Industrial | 25% | 0% |
| Sureland Equipment | 12.5% | 12.5% |
| Beijing Hua An | 25% | 0% |
| Tianxiao Equipment | 0% | 25% |

The provision for income taxes amounted to \$47,423, \$5,081, and \$82,206 for the years ended December 31, 2008, 2007 and 2006, respectively.

The following table reconciles the U.S. statutory rates to the Company's effective tax rate for the years ended December 31:

See report of independent registered public accounting firm.

CHINA FIRE & SECURITY GROUP, INC. AND SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

December 31, 2008

| | 2008 | 2007 | 2006 |
|--------------------------------------|--------|--------|--------|
| U.S. Statutory rates | 34.0% | 34.0% | 34.0% |
| Foreign income not recognized in USA | (34.0) | (34.0) | (34.0) |
| China income taxes | 25.0 | 33.0 | 33.0 |
| China income tax exemption | (24.8) | (33.0) | (32.0) |
| Total provision for income taxes | 0.2% | 0.0% | 1.0% |

The estimated tax savings for the years ended December 31, 2008, 2007 and 2006 amounted to \$6,382,286, \$5,441,008 and \$3,206,276, respectively. If the income tax had been applied, the net effect on both basic and diluted earnings per share for the years ended December 31, 2008, 2007 and 2006 by \$0.23, \$0.20 and \$0.13, respectively.

China Fire & Security Group, Inc. was incorporated in the United States and has incurred net operating losses of \$0, \$47,946 and \$3,478 for income tax purposes for the years ended December 31, 2008, 2007 and 2006, respectively. The net operating loss carry forwards for United States income taxes amounted to \$1,004,414 which may be available to reduce future years' taxable income. These carry forwards will expire, if not utilize, from 2025 through 2027. Management believes that the realization of the benefits from these losses appears uncertain due to the Company's limited operating history and continuing losses for United States income tax purposes. Accordingly, the Company has provided a 100% valuation allowance on the deferred tax asset benefit to reduce the asset to zero. The net change in the valuation allowance for the year ended December 31, 2008 was \$0 and the accumulated valuation allowance as of December 31, 2008 amounted to \$341,501. Management reviews this valuation allowance periodically and makes adjustments as warranted.

Taxes payable

Taxes payable consisted of the following:

| | December 31, 2008 | December 31, 2007 |
|----------------------|----------------------|----------------------|
| VAT taxes payable | \$ 1,094,089 | \$ 71,367 |
| Income taxes payable | 38,406 | 5,915 |
| Sales taxes | 936,164 | 979,999 |
| Other taxes payable | 24,086 | 31,054 |
| Total | \$ 2,092,745 | \$ 1,088,335 |

See report of independent registered public accounting firm.

CHINA FIRE & SECURITY GROUP, INC. AND SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

December 31, 2008

Note 11 - Retirement plan

The Company and its subsidiaries are required to participate in a central pension scheme operated by the local municipal government. The Company is required to contribute 20% of its payroll costs to the central pension scheme in 2008 and 2007. The contributions are charged to the income statement of the Company as they become payable in accordance with the rules of the scheme. The aggregate contributions of the Company to retirement benefit schemes amounted to \$250,720, \$158,279, and \$37,444 for the years ended December 31, 2008, 2007 and 2006, respectively.

Note 12 - Statutory reserves

The laws and regulations of the People's Republic of China require that before an enterprise distributes profits to its partners, it must first satisfy all tax liabilities, provide for losses in previous years, and make allocations, in proportions determined at the discretion of the board of directors, after the statutory reserve. The statutory reserves include surplus reserve fund and the enterprise fund. These statutory reserves represent restricted retained earnings.

Surplus reserve fund

The Company is required to transfer 10% of its net income, as determined in accordance with the PRC accounting rules and regulations, to a statutory surplus reserve fund until such reserve balance reaches 50% of the Company's registered capital.

The transfer to this reserve must be made before distribution of any dividend to shareholders. For the years ended December 31, 2008, 2007 and 2006, the Company transferred \$2,081,766, \$1,641,434 and \$572,302, respectively. The surplus reserve fund is non-distributable other than during liquidation and can be used to fund previous years' losses, if any, and may be utilized for business expansion or converted into share capital by issuing new shares to existing shareholders in proportion to their shareholding or by increasing the par value of the shares currently held by them, provided that the remaining reserve balance after such issue is not less than 25% of the registered capital.

On May 17, 2007, the Beijing Shunyi District Business Administration approved the Company to increase registered capital from \$6,515,000 (RMB 50,000,000) to \$13,030,000 (RMB 100,000,000). \$605,000 (RMB 5,000,000) was approved by the Beijing Shunyi District Business Administration to be transferred out from this surplus reserve fund as an increase of registered capital. This balance was reflected in the Company's consolidated shareholders' equity for the year ended December 31, 2007.

See report of independent registered public accounting firm.

CHINA FIRE & SECURITY GROUP, INC. AND SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

December 31, 2008

Enterprise fund

The enterprise fund may be used to acquire plant and equipment or to increase the working capital to expend on production and operation of the business. No minimum contribution is required and the Company did not make any contribution to this fund for the years ended December 31, 2008, 2007 and 2006.

Note 13 - Shareholders' equity

On January 30, 2008, the Company's 2008 Omnibus Long-term Incentive Plan was adopted and approved by shareholders. Pursuant to the 2008 Omnibus Long-term Incentive Plan, the Company reserved 2,000,000 shares of our common stock for issuance.

On March 12, 2008, the Company's Board of Directors authorized the repurchase of up to \$10 million of the Company's outstanding common stock.

Warrants

On April 26, 2007, the Company amended its Series A and Series B warrants issued to certain investors on October 27 and December 5, 2006 pursuant to the Securities Purchase Agreement in connection with a private placement (the "Amendment"). The Amendment eliminates the right of the warrant holders to be paid in cash in the event of a merger or other types of reorganization. The warrants no longer need to be accounted for as derivative instrument liabilities. The fair value of the warrants were transferred to equity on the signing date and no further accounting (i.e., no mark-to-market) is required going forward. At April 26, 2007, the Company determined the fair value of the warrants was \$1,475,020 using the Cox-Ross-Rubinstein binomial model with the following assumptions: volatility 25%; risk free interest rate 4.59%; dividend yield of 0% and expected term of 4.5 years. On April 26, 2007, the fair value of the warrants was transferred to additional paid-in capital.

In 2007, 492,340 series A warrants were exercised at \$3.58 and 492,340 series B warrants were exercised at \$4.88 for a total of 984,680 shares of common stock. The Company received a total of \$4,165,197 from various warrant holders.

In 2007, a total of 179,626 warrants were converted into 110,535 shares of common stock by the warrants holders using the cashless exercise options. In 2008, a total of 5,000 warrants were converted into 3,634 shares of common stock by the warrants holders using the cashless exercise options.

See report of independent registered public accounting firm.

CHINA FIRE & SECURITY GROUP, INC. AND SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

December 31, 2008

On February 1, 2007, CFPG issued 50,000 warrants to Hayden Communication, the Company's investor relations consultant, as part of its compensation. These warrants meet the conditions for equity classification pursuant to SFAS 133 and EITF 00-19. Therefore, the warrants were classified as equity and accounted as compensation expenses. The warrants vested on February 1, 2008. The Company used the Black Scholes model to value the options at the time they were issued, based on the exercise price of \$4.25 and expiration dates of the instruments, a risk-free rate of 4.84% and volatility at 50%. These 50,000 warrants had a fair value of \$94,274 on the date of grant and were recognized over the one year service period. In 2008, Hayden Communication converted 40,000 warrants into 26,066 shares of common stock in a cashless exercise.

The Company's warrant activity is as follows:

| | Warrants Outstanding | Warrants Exercisable | Weighted Average Exercise Price | Average Remaining Contractual Life |
|--------------------------------|-------------------------|-------------------------|--|---|
| Outstanding, December 31, 2005 | | | | |
| Granted | 1,169,306 | 1,169,306 | \$ 4.23 | 5.00 |
| Forfeited | | | | |
| Exercised | | | | |
| Outstanding, December 31, 2006 | 1,169,306 | 1,169,306 | \$ 4.23 | 4.58 |
| Granted | 50,000 | | \$ 4.25 | |
| Forfeited | | | | |
| Exercised | (1,164,306) | (1,164,306) | \$ 4.23 | |
| Outstanding, December 31, 2007 | 55,000 | 5,000 | \$ 4.19 | 4.08 |

CHINA FIRE & SECURITY GROUP, INC. AND SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

December 31, 2008

Note 14 - Options issued to employees

On July 1, 2006, CFPG issued 750,000 options to the employees of Sureland Industrial. Fifty percent of the options vest immediately, with the balance vesting evenly each quarter over the following two years. The Company used the Cox-Ross-Rubinstein binomial model to value the options at the time they were issued, based on the stated exercise prices and expiration dates of the instruments and using a risk-free rate of 5.11%. Because the Company does not have a history of employee stock options, the estimated life is based on one half of the sum of the vesting period and the contractual life of the option. This is the same as assuming that the options are exercised at the mid-point between the vesting date and expiration date.

The Company's stock was not traded when the options were granted. Therefore, the Company had to estimate the market value of its shares. There was no significant change in the business between July and October 2006, therefore, the company used the fair value from the October 27 transaction of \$2.26 and took a discount of 30%, to estimate a market price of \$1.58. At that market price, the 750,000 employee options had a fair value of approximately \$834,000. Because 50% of the options vested immediately, the related compensation expense was recognized as the options vest, rather than on a straight-line basis over the total vesting period, as the amount recognized at any point in time must be at least equal to the portion vested.

On April 20, 2007, CFPG issued 9,500 options to the Company's four independent directors as part of their compensation. The options will vest one year from the issuance date. The fair value of these options was determined to be \$19,428 using the Black Sholes model with the following assumptions: volatility 45%; risk free interest rate 4.57%; dividend yield of 0% and expected term of 5 years. Options were vested immediately at exercise price of \$4.51 per share which was the close price of the Company's stock on April 19, 2007. Because the services that the independent directors are to provide started from the second quarter of 2007 and will last for one year, the related compensation expense is recognized on a straight-line basis over the total service period.

On July 1, 2007, CFPG issued 20,000 options to Mr. Yuan, Xiaoyuan, who joined the Company as on the same day. The options will vest over four years. The Company used the Black Sholes model to value the options at the time they were issued, based on the exercise price of \$6.70, which was the close price of the Company's stock on June 30, 2007 and expiration dates of the instruments and using a risk-free rate of 4.84% and the volatility of 40% that was estimated by analyzing the trading history of the Company's stock. The 20,000 employee options had a fair value of \$57,178. The related compensation expense is recognized on a straight-line basis over the four year vesting period.

The total stock option compensation expense recognized for the year ended December 31, 2008, 2007 and 2006 was \$40,152, \$190,719 and \$644,000, respectively.

See report of independent registered public accounting firm.

CHINA FIRE & SECURITY GROUP, INC. AND SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

December 31, 2008

The Company has stock options as follows:

| | Options Outstanding | Weighted Average Exercise Price | Aggregate Intrinsic Value |
|--------------------------------|------------------------|--|---------------------------------|
| Outstanding, December 31, 2005 | | | |
| Granted | 750,000 | \$ 1.25 | \$ 247,500 |
| Forfeited | | | |
| Exercised | | | |
| Outstanding, December 31, 2006 | 750,000 | \$ 1.25 | \$ 2,250,000 |
| Granted | 29,500 | \$ 5.99 | |
| Forfeited | | | |
| Exercised | | | |
| Outstanding, December 31, 2007 | 779,500 | \$ 1.43 | \$ 8,925,615 |
| Granted | | | |
| Forfeited | | | |
| Exercised | | | |
| Outstanding, December 31, 2008 | 779,500 | \$ 1.43 | \$ 4,194,190 |

Following is a summary of the status of options outstanding at December 31, 2008:

| Outstanding Options | | | Exercisable Options | | | |
|----------------------|-------------------|---|----------------------|-------------------|---|--|
| Number of Options | Exercise Price | Average Remaining Contractual Life | Number of Options | Exercise Price | Average Remaining Contractual Life | |
| 750,000 | 1.25 | 7.50 | 750,000 | 1.25 | 7.50 | |
| 9,500 | 4.51 | 3.33 | 9,500 | 4.51 | 3.33 | |
| 20,000 | 6.70 | 3.50 | 7,500 | 6.70 | 3.50 | |

Note 15 - Restructuring of subsidiaries

On April 2, 2007, the Company evaluated the operations of its subsidiary, Beijing Zhong Xiao Fire Safety Technology Co., Ltd. ("Beijing Zhong Xiao") and noted efficiencies could be obtained by consolidating the operations of Beijing Zhong Xiao into Sureland Equipment.

Beijing Zhong Xiao was a subsidiary of Sureland Industrial established in the PRC as a limited liability company on March 18, 2003. On April 3, 2007, Sureland Industrial signed an agreement to transfer 100% ownership in Beijing Zhong Xiao to Gong Gang Qiang, a Chinese individual, for consideration price equal to the net assets of Beijing Zhong Xiao as of March 31, 2007.

No gain or loss was recognized through the restructuring of Beijing Zhong Xiao nor any additional cost incurred to restructure Beijing Zhong Xiao. In addition, we have no outstanding obligations related to the restructuring after the

disposal of Beijing Zhong Xiao on April 3, 2007.

See report of independent registered public accounting firm.

CHINA FIRE & SECURITY GROUP, INC. AND SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

December 31, 2008

After the restructuring of Beijing Zhong Xiao, the Company still has a significant continuing involvement in the historical operations of the manufacturing of fire safety and protection products through Sureland Equipment, which results in the Company failing the test in paragraph 42 of FAS 144 "Accounting for the Impairment or Disposal of Long-Lived Assets". The failure of this test therefore does not require the classification of the disposal of Beijing Zhong Xiao as a discontinued operation.

Note 16 - Commitments and Contingencies

Operating Lease Commitments

Currently the Company are engaged in an operating lease with Tianjin Fire Protection Equipment Company Ltd for the use of approximately 112,432 square meters land in Tianjin, consisting of manufacturing facilities, warehouses and office buildings. The term of the operating lease is two years, starting from May 2007. The monthly payment for the lease is 66,000RMB or \$9,677. At December 31, 2008, total future minimum lease payments under the operating lease were as follows:

| Year Ended December 31 | Amount |
|------------------------|-----------|
| 2009 | \$ 48,385 |
| 2010 | - |
| Thereafter | - |

Contingencies

In 2008, the Company filed five lawsuits against four different companies for the infringement of the Company's intellectual properties. These five cases were still pending. Management expects these five cases will be settled in the Company's favor.

In 2008, the Company was sued by three different companies for the invalidation of our intellectual properties. Two of these three cases were eventually settled in the Company's favor. The other case is still pending and management expects this case will be settled in the Company's favor as well.

Management expects the outcome from the above pending lawsuits will have no material impact of the Company's consolidated financial statements.

See report of independent registered public accounting firm.

December 31, 2008

Note 17 - Subsequent Events

On January 2, 2009, pursuant to the Company's 2008 Omnibus Long-term Incentive Plan, the Company's Board of Directors authorized the issuance of 1,000,000 shares of options for its employee with total 800,000 shares options issued to executive officers. The options will vest evenly each quarter over the following four years, starting from the first quarter of 2009.
