UNITED COMMUNITY BANCORP AND SUBSIDIARIES

NOTES TO UNAUDITED CONSOLIDATED FINANCIAL STATEMENTS

1. BASIS OF PRESENTATION - United Community Bancorp, a federal corporation (“old United Community Bancorp”) completed its previously announced conversion from the mutual holding company form of organization to the stock holding company form on January 9, 2013. As a result of the conversion, United Community Bancorp, an Indiana corporation (“United Community Bancorp” or “Company”), became the holding company for United Community Bank (“Bank”), and United Community MHC and old United Community Bancorp, ceased to exist. As part of the conversion, all outstanding shares of old United Community Bancorp common stock (other than those owned by United Community MHC) were converted into the right to receive 0.6573 of a share of United Community Bancorp common stock.

The Company, through the Bank, operates in a single business segment providing traditional banking services through its office and branches in southeastern Indiana. UCB Real Estate Management Holding, LLC is a wholly-owned subsidiary of the Bank. The entity was formed for the purpose of holding assets that are acquired by the Bank through, or in lieu of, foreclosure. UCB Financial Services, Inc., a wholly-owned subsidiary of the Bank, was formed for the purpose of collecting commissions on referrals to a third party wealth management company.

The accompanying unaudited consolidated financial statements were prepared in accordance with the rules and regulations of the Securities and Exchange Commission, and therefore do not include all information or footnotes necessary for complete financial statements in conformity with accounting principles generally accepted in the United States of America. However, all normal recurring adjustments that, in the opinion of management, are necessary for a fair presentation of the financial statements have been included. No other adjustments have been included. The results for the three months ended December 31, 2015 are not necessarily indicative of the results that may be expected for the fiscal year ending June 30, 2016. These financial statements should be read in conjunction with the Company’s audited consolidated financial statements and the accompanying notes thereto for the year ended June 30, 2015, which are included in the Company’s Annual Report on Form 10-K as filed with the Securities and Exchange Commission on September 28, 2015.

The Company evaluates events and transactions occurring subsequent to the date of the financial statements for matters requiring recognition or disclosure in the financial statements.

2. EMPLOYEE STOCK OWNERSHIP PLAN (“ESOP”) – As of December 31, 2015 the ESOP owned 173,894 shares of the Company’s common stock. At June 30, 2015, the ESOP owned 205,748 shares of the Company’s common stock. The shares owned by the ESOP are held in a suspense account until released for allocation to participants.

3. EARNINGS PER SHARE (“EPS”) – Non-vested shares with non-forfeitable dividend rights are considered participating securities and, thus, subject to the two-class method pursuant to ASC 260, *Earnings per Share*, when computing basic and diluted earnings per share. The Company’s restricted share awards contain non-forfeitable dividend rights but do not contractually obligate the holders to share in the losses of the Company. Accordingly, during periods of net income, unvested restricted shares are included in the determination of both basic and diluted EPS. During periods of net loss, these shares are excluded from both basic and diluted EPS.

Basic EPS is based on the weighted average number of common shares and unvested restricted shares outstanding, adjusted for ESOP shares not yet committed to be released. Diluted EPS reflects the potential dilution that could occur if securities or other contracts to issue common stock, such as outstanding stock options, were exercised or converted into common stock or resulted in the issuance of common stock. Diluted EPS is calculated by adjusting the weighted average number of shares of common stock outstanding to include the effects of contracts or securities exercisable or which could be converted into common stock, if dilutive, using the treasury stock method.

	Three Months Ended		Six Months Ended	
	December 31,		December 31,	
	2015	2014	2015	2014
Basic weighted average outstanding shares	4,120,938	4,421,455	4,245,039	4,502,524
Effect of dilutive stock options	35,301	—	30,552	—
Diluted weighted average outstanding shares	4,156,239	4,421,455	4,275,591	4,502,524

4. **STOCK-BASED COMPENSATION** – The Company applies the provisions of ASC 718, *Compensation – Stock Compensation*, which requires the Company to measure the cost of employee services received in exchange for awards of equity instruments and to recognize this cost in the financial statements over the period during which the employee is required to provide such services. The Company has elected to recognize compensation cost associated with its outstanding stock-based compensation awards with graded vesting on a straight-line basis pursuant to ASC 718. The expense is calculated for stock options at the date of grant using the Black-Scholes option pricing model. The expense associated with restricted stock awards is calculated based upon the value of the common stock on the date of grant. Stock-based compensation expense was \$98,000 and \$65,000 for the three months ended December 31, 2015 and 2014, respectively. Stock-based compensation was \$141,000 and \$135,000 for the six months ended December 31, 2015 and 2014, respectively. No stock-based compensation awards were granted during the three and six months ended December 31, 2015 and 2014.

5. **DIVIDENDS** – On August 13, 2015 and November 10, 2015 the Board of Directors of the Company declared cash dividends on the Company’s outstanding shares of stock of \$0.06 per share for each period. The dividends, totaling \$482,000, were paid during the six months ended December 31, 2015.

6. **STOCK REPURCHASE PLAN** – On February 3, 2014 the Company’s board of directors approved the repurchase of up to 514,956 shares of the Company’s outstanding common stock, which represented approximately 10% of the Company’s outstanding shares at that date. Purchases were conducted solely through and based upon the parameters of a Rule 10b5-1 repurchase plan. As of December 31, 2014, all 514,956 shares were repurchased at a total cost of \$6.0 million.

Additionally, on May 18, 2015, the Company’s Board of Directors approved the repurchase of up to 231,571 shares of the Company’s outstanding common stock, which was approximately 5% of the Company’s outstanding shares as of May 18, 2015. Purchases were conducted solely through and based upon the parameters of a Rule 10b5-1 repurchase plan. As of December 31, 2015, all of the 231,571 shares were repurchased.

On November 6, 2015, United Community Bancorp entered into a Stock Repurchase Agreement with Stilwell Activist Fund, L.P., Stilwell Activist Investments, L.P. and Stilwell Partners, L.P. (collectively, the “Sellers”). Pursuant to the Stock Repurchase Agreement, the Company purchased 318,756 shares of its common stock, \$0.01 par value, from the

Edgar Filing: United Community Bancorp - Form 10-Q

Sellers for an aggregate purchase price of \$4,781,340, or \$15.00 per share. The repurchase was funded with cash on hand and completed the 5% repurchase program mentioned above. Following the repurchase transaction, the Company had 4,201,326 shares of common stock outstanding. There were no other repurchases after this date and therefore at December 31, 2015, there were 4,201,326 shares of common stock outstanding.

7. SUPPLEMENTAL CASH FLOW INFORMATION

Six Months Ended
December 31,
2015 2014
(Dollars in thousands)

Supplemental disclosure of cash flow information is as follows:

Cash paid during the period for:

Income taxes, net	\$ 225	\$ 32
Interest	\$ 1,130	\$ 1,264

Supplemental disclosure of non-cash investing and financing activities is as follows:

Unrealized gains on securities designated as available for sale, net of tax	\$ 336	\$ 753
Transfers of loans to other real estate owned	\$ 29	\$ 202

8. DISCLOSURES ABOUT FAIR VALUE OF ASSETS AND LIABILITIES - ASC 820, *Fair Value Measurements and Disclosures*, requires disclosure of the fair value of financial instruments, both assets and liabilities, whether or not recognized in the consolidated balance sheet, for which it is practicable to estimate the value. For financial instruments where quoted market prices are not available, fair values are estimated using present value or other valuation methods.

The following methods and assumptions are used in estimating the fair values of financial instruments:

Cash and cash equivalents

The carrying values presented in the consolidated statements of position approximate fair value.

Investments and mortgage-backed securities

For investment securities (debt instruments) and mortgage-backed securities, fair values are based on quoted market prices, where available. If a quoted market price is not available, fair value is estimated using quoted market prices of comparable instruments.

Loans receivable

The fair value of the loan portfolio is estimated by evaluating homogeneous categories of loans with similar financial characteristics. Loans are segregated by types, such as residential mortgage, commercial real estate, and consumer. Each loan category is further segmented into fixed and adjustable rate interest, terms, and by performing and non-performing categories. The fair value of performing loans, except residential mortgage loans, is calculated by discounting contractual cash flows using estimated market discount rates which reflect the credit and interest rate risk inherent in the loan. For performing residential mortgage loans, fair value is estimated by discounting contractual cash flows adjusted for prepayment estimates using discount rates based on secondary market sources. The fair value for significant non-performing loans is based on recent internal or external appraisals. Assumptions regarding credit risk, cash flow, and discount rates are judgmentally determined by using available market information.

Federal Home Loan Bank stock

The Bank is a member of the Federal Home Loan Bank system and is required to maintain an investment based upon a pre-determined formula. The carrying values presented in the consolidated statements of position approximate fair value.

Deposits

The fair values of passbook accounts, NOW accounts, and money market savings and demand deposits approximate their carrying values. The fair values of fixed maturity certificates of deposit are estimated using a discounted cash flow calculation that applies interest rates currently offered for deposits of similar maturities.

Advances from Federal Home Loan Bank

The fair value is calculated using rates available to the Company on advances with similar terms and remaining maturities.

Off-balance sheet items

Carrying value is a reasonable estimate of fair value. These instruments are generally variable rate or short-term in nature, with minimal fees charged.

The estimated fair values of the Company's financial instruments at December 31, 2015 and June 30, 2015 are as follows:

	December 31, 2015		June 30, 2015	
	Carrying Amounts	Fair Value	Carrying Amounts	Fair Value
	(In thousands)			
Financial assets:				
Cash and interest-bearing deposits	\$23,456	\$23,456	\$18,522	\$18,522
Investment securities available for sale	62,249	62,249	60,873	60,873
Investment securities held to maturity	40,903	41,819	40,653	40,045
Mortgage-backed securities	83,511	83,511	109,138	109,138

Accrued interest receivable	1,869	1,869	1,822	1,822
Investment in FHLB stock	3,527	3,527	3,527	3,527

Financial liabilities:

Edgar Filing: United Community Bancorp - Form 10-Q

Deposits	427,086	427,996	432,537	433,479
Accrued interest payable	17	17	20	20
FHLB advances	13,000	13,105	13,000	13,114
Off-balance sheet items	\$—	\$—	\$—	\$—

ASC 820-10-50-2 also establishes a fair value hierarchy which requires an entity to maximize the use of observable inputs and minimize the use of unobservable inputs when measuring fair value. The standard describes three levels of inputs that may be used to measure fair value:

Level 1 Quoted prices in active markets for identical assets or liabilities.

Level 2 Observable inputs other than Level 1 prices, such as quoted prices for similar assets or liabilities; quoted prices in markets that are not active; or other inputs that are observable or can be corroborated by observable market data for substantially the full term of the assets or liabilities.

Level 3 Unobservable inputs that are supported by little or no market activity and that are significant to the fair value of the assets or liabilities.

8

Fair value methods and assumptions are set forth below for each type of financial instrument. Where quoted prices are available in an active market, securities are classified within Level 1 of the valuation hierarchy. Level 2 securities include U.S. Government and agency mortgage-backed securities, U.S. Government agency bonds, municipal securities, and other real estate owned. If quoted market prices are not available, the Bank utilizes a third party vendor to calculate the fair value of its available for sale securities. The third party vendor uses quoted prices of securities with similar characteristics when available. If such quotes are not available, the third party vendor uses pricing models or discounted cash flow models with observable inputs to determine the fair value of these securities.

Fair value measurements for certain assets and liabilities measured at fair value on a recurring basis:

	Total	Quoted prices in active markets for identical assets (Level 1)	Significant other observable inputs (Level 2)	Significant other unobservable inputs (Level 3)
(In thousands)				
December 31, 2015:				
Mortgage-backed securities	\$83,511	\$ —	\$ 83,511	\$ —
Municipal bonds	31,711	—	31,711	—
Small Business Administration	7,914	—	7,914	—
Collateralized Mortgage Obligations	19,467	—	19,467	—
Certificates of Deposit	2,969	—	2,969	—
Other equity securities	188	188	—	—
Mortgage servicing rights	548	—	548	—
June 30, 2015:				
Mortgage-backed securities	\$109,138	\$ —	\$ 109,138	\$ —
Municipal bonds	37,619	—	37,619	—
U.S. Government agency bonds	2,015	—	2,015	—

				<u>(Level 2)</u>		<u>(Level 3)</u>
	(In thousands)					
December 31, 2015:						
Other real estate owned	\$228	\$	—	\$ 228	\$	—
Impaired loans	8,814		—	8,814		—
June 30, 2015:						
Other real estate owned	\$286	\$	—	\$ 286	\$	—
Loans held for sale	160		—	160		—
Impaired loans	11,079		—	11,079		—

The adjustments to other real estate owned and impaired loans are based primarily on appraisals of the real estate, cash flow analysis or other observable market prices. The Bank's policy is that fair values for these assets are based on current appraisals or cash flow analysis.

The following table presents fair value measurements for the Company's financial instruments which are not recognized at fair value in the accompanying statements of financial position on a recurring or nonrecurring basis.

	Total	Quoted prices in active markets for identical assets (Level 1)	Significant other observable inputs (Level 2)	Significant other unobservable inputs (Level 3)

	\$ 170,890	\$ 650	\$ 1,529	\$ 170,011

Investment securities held to maturity at June 30, 2015 consisted of the following:

	Amortized Cost	Gross Unrealized Gains	Gross Unrealized Losses	Estimated Market Value
Municipal Bonds	\$ 40,653	\$ 52	\$ 660	\$ 40,045

The mortgage-backed securities, callable bonds, small business administration, collateralized mortgage obligations, and municipal bonds have the following maturities at December 31, 2015:

	Available for Sale		Held to Maturity	
	Amortized cost	Estimated market value	Amortized cost	Estimated market value
Due or callable in one year or less	\$411	\$412	\$59	\$ 59
Due or callable in 1 - 5 years	106,709	106,081	165	172
Due or callable in 5 - 10 years	32,349	32,532	5,058	5,143
Due or callable in greater than 10 years	6,411	6,547	35,621	36,445
Total debt securities	\$ 145,880	\$ 145,572	\$ 40,903	\$ 41,819

All other securities available for sale at December 31, 2015 are saleable within one year.

Edgar Filing: United Community Bancorp - Form 10-Q

Gross proceeds on the sale of investments and mortgage-backed securities were \$26.4 million and \$4.3 million for the three months ended December 31, 2015 and 2014, respectively. Gross proceeds on the sale of investments and mortgage-backed securities were \$35.0 million and \$31.2 million for the six months ended December 31, 2015 and 2014, respectively. Gross realized gains for the three month periods ended December 31, 2015 and 2014 were \$287,000 and \$11,000, respectively. Gross realized gains for the six-month periods ended December 31, 2015 and 2014 were \$365,000 and \$260,000, respectively. Gross realized losses for the three months periods ended December 31, 2015 and 2014 were \$233,000 and \$43,000, respectively. Gross realized losses for the six-month periods ended December 31, 2015 and 2014 were \$305,000 and \$313,000, respectively.

The table below indicates the length of time individual investment securities and mortgage-backed securities have been in a continuous loss position at December 31, 2015:

	Less than 12 months		12 months or longer		Total	
	Fair Value	Unrealized Losses	Fair Value	Unrealized Losses	Fair Value	Unrealized Losses
	(In thousands)					
Municipal bonds	\$9,654	\$ 65	\$ 2,877	\$ 46	\$12,531	\$ 111
Mortgage-backed securities	43,121	272	27,411	396	70,532	668
Small Business Administration	4,826	34	—	—	4,826	34

Certificates of deposit	1,481	2	—	—	1,481	2
Other equity securities	—	—	188	22	188	22
	\$70,827	\$ 505	\$ 30,476	\$ 464	\$101,303	\$ 969
Number of investments		50		17		67

Securities available for sale are reviewed for possible other-than-temporary impairment on a quarterly basis. During this review, management considers the severity and duration of the unrealized losses as well as its intent and ability to hold the securities until recovery, taking into account balance sheet management strategies and its market view and outlook. Management also assesses the nature of the unrealized losses taking into consideration factors such as changes in risk-free interest rates, general credit spread widening, market supply and demand, creditworthiness of the issuer or any credit enhancement providers, and the quality of the underlying collateral. Management does not intend to sell these securities in the foreseeable future, and does not believe that it is more likely than not that the Bank will be required to sell a security in an unrealized loss position prior to a recovery in its value. The decline in market value is due to changes in market interest rates. The fair values are expected to recover as the securities approach maturity dates.

10. GOODWILL AND INTANGIBLE ASSET

In June 2010, old United Community Bancorp acquired three branches from Integra Bank National Association (“Integra”), which was accounted for under the purchase method of accounting. Under the purchase method, the Company is required to allocate the cost of an acquired company to the assets acquired, including identified intangible assets, and liabilities assumed based on their estimated fair values at the date of acquisition. The excess cost over the value of net assets acquired represents goodwill, which is not subject to amortization.

Goodwill arising from business combinations represents the value attributable to unidentifiable intangible elements in the business acquired. Goodwill recorded by the Company in connection with its acquisition relates to the inherent value in the business acquired and this value is dependent upon the Company’s ability to provide quality, cost-effective

services in a competitive market place. As such, goodwill value is supported ultimately by revenue that is driven by the volume of business transacted. A decline in earnings as a result of a lack of growth or the inability to deliver cost-effective services over sustained periods can lead to impairment of goodwill that could adversely impact earnings in future periods.

As permitted by current accounting rules, the Company completed its qualitative assessment to determine whether current events or changes in circumstances lead to a determination that it is more likely than not, as defined, that the fair value of the reporting unit is less than its carrying amount. Based upon the Company's assessment, there was no such determination that the fair value of the reporting unit is less than its carrying amount. Accordingly, the Company did not apply the traditional two-step goodwill impairment test.

The following table indicates changes to the core deposit intangible asset and goodwill balances for the six months ended December 31, 2015:

	Core Deposit Intangible (In thousands)	Goodwill
Balance at June 30, 2015	\$429	\$ 2,522
Amortization	60	—
Balance at December 31, 2015	\$369	\$ 2,522

The core deposit intangible is being amortized using the double declining balance method over its estimated useful life of 8.75 years. Remaining amortization of the core deposit intangible is as follows (dollars in thousands) as of December 31, 2015:

January 1, 2016 through June 30, 2016	\$ 57
2017	117
2018	117
2019	78
	\$ 369

11. DISCLOSURES ABOUT THE CREDIT QUALITY OF LOANS RECEIVABLE AND THE ALLOWANCE FOR LOAN LOSSES (IN THOUSANDS)

The following tables illustrate certain disclosures required by ASC 310-10-50-11B(c), (g) and (h), the changes to the allowance for loan losses, for the three and six months ended December 31, 2015 (in thousands):

Allowance for Credit Losses and Recorded Investment in Loans Receivable

Federal regulations require us to review and classify our assets on a regular basis. In addition, the OCC has the authority to identify problem assets and, if appropriate, require them to be classified. There are three classifications for problem assets: substandard, doubtful and loss. "Substandard assets" must have one or more defined weaknesses and are characterized by the distinct possibility that we will sustain some loss if the deficiencies are not corrected. "Doubtful assets" have the weaknesses of substandard assets with the additional characteristic that the weaknesses make collection or liquidation in full on the basis of currently existing facts, conditions and values questionable, and there is a high possibility of loss. An asset classified "loss" is considered uncollectible and of such little value that continuance as an asset of the institution is not warranted. The regulations also provide for a "special mention" category, described as assets which do not currently expose us to a sufficient degree of risk to warrant classification but do possess credit deficiencies or potential weaknesses deserving our close attention. If we classify an asset as substandard, doubtful or loss, we analyze that asset and may establish a specific allocation for the asset at that time.

The following tables illustrate certain disclosures required by ASC 310-10-50-29(b).

The Bank did not have any investments in subprime loans at December 31, 2015. Impaired loans at December 31, 2015 included troubled debt restructurings (“TDR”) with an aggregate principal balance of \$5.9 million and a recorded investment of \$5.9 million. See Note 12 for a discussion on TDRs.

12. TROUBLED DEBT RESTRUCTURINGS - From time to time, as part of our loss mitigation process, loans may be renegotiated in a TDR when we determine that greater economic value will ultimately be recovered under the new restructured terms than through foreclosure, liquidation, or bankruptcy. We may consider the borrower's payment status and history, the borrower's ability to pay upon a rate reset on an adjustable rate loan, size of the payment increase upon a rate reset, period of time remaining prior to the rate reset, and other relevant factors in determining whether a borrower is experiencing financial difficulty. TDRs are accounted for as set forth in ASC 310-40 *Troubled Debt Restructurings by Creditors* ("ASC 310-40"). A TDR may be on nonaccrual or it may accrue interest. A TDR is typically on nonaccrual until the borrower successfully performs under the new terms for at least six consecutive months. However, a TDR may be placed on accrual immediately following the restructuring in those instances where a borrower's payments are current prior to the modification, the loan is restructured at a market rate and management determines that principal and interest under the new terms are fully collectible. All TDRs are considered to be impaired loans. A TDR will be removed from TDR classification if it is restructured at a market rate, is not impaired under those restructured terms and has been performing under those terms for at least twelve consecutive months.

Existing performing loan customers who request a loan (non-TDR) modification and who meet the Bank's underwriting standards may, usually for a fee, modify their original loan terms to terms currently offered. The modified terms of these loans are similar to the terms offered to new customers with similar credit risk. The fee assessed for modifying the loan is deferred and amortized over the life of the modified loan using the level-yield method and is reflected as an adjustment to interest income. Each modification is examined on a loan-by-loan basis and if the modification of terms represents more than a minor change to the loan, then the unamortized balance of the pre-modification deferred fees or costs associated with the mortgage loan are recognized in interest income at the time of the modification. If the modification of terms does not represent more than a minor change to the loan, then the unamortized balance of the pre-modification deferred fees or costs continue to be deferred.

The following tables summarize TDRs by loan type and accrual status.

		At December 31, 2015						
		Loan Status		Total Unpaid Principal	Related Allowance	Recorded Investment	Number of Loans	Average Recorded Investment
(In thousands)		Accrual	Nonaccrual	Balance

At December 31, 2015, the Bank had 32 loans totaling \$5.9 million that were reported as TDRs, and had established an allowance for losses on these loans of \$0. With respect to the \$5.9 million in TDRs, the Bank charged-off \$4.1 million at the time the loans were restructured into the Note A/B split note format. At June 30, 2015, the Bank had 32 loans totaling \$8.0 million that were reported as TDRs, and had an allowance for losses on these loans of \$120,000. With respect to the \$8.0 million in TDRs, the Bank charged-off \$4.1 million with respect to those loans at the time the loans were restructured into the Note A/B split note format. At December 31, 2015, the Bank had no other commitments to lend on its TDRs. Management continues to monitor the performance of loans reported as TDRs on a monthly basis.

Loans that were included in TDRs at December 31, 2015 and June 30, 2015 were generally given concessions of interest rate reductions of between 25 and 300 basis points. Fifteen of these loans, having an aggregate carrying value of \$4.2 million at December 31, 2015, also have balloon payments due at the end of their lowered interest rate period. At December 31, 2015, there were 23 loans with an aggregate carrying value of \$5.3 million with required principal and interest payments and two loans with an aggregate carrying value of \$658,000 with required interest only payments. The remaining seven loans that were restructured into the Note A/B split note format, represent the B notes which had zero carrying value at December 31, 2015 and are due at maturity. At June 30, 2015, there were 23 loans with an aggregate carrying value of \$5.8 million with required principal and interest payments and two loans with an aggregate carrying value of \$2.2 million with required interest only payments. The remaining seven loans that were restructured into the Note A/B split note format, represent the B notes which had zero carrying value at June 30, 2015 and are due at maturity.

The following table is a roll forward of activity in our TDRs:

13. EFFECT OF RECENT ACCOUNTING PRONOUNCEMENTS

In January 2016, the Financial Accounting Standards Board (FASB) issued Accounting Standards Update (ASU) No. 2016-01, Financial Instruments-Overall (Subtopic 825-10). The amendments in this update affect all entities that hold financial assets or owe financial liabilities. The update's main provisions applicable to the Company are as follows: 1) Require equity investments with readily available fair values (except those accounted for under the equity method of accounting or those that result in consolidation of the investee) to be measured at fair value with changes in fair value recognized in net income; 2) Simplify the impairment assessment of equity investments without readily determinable fair values by requiring a qualitative assessment to identify impairment; 3) Eliminate the requirement for public business entities to disclose the method(s) and significant assumptions used to estimate the fair value that is required to be disclosed for financial instruments measured at amortized cost on the balance sheet; 4) Require public business entities to use the exit price notion when measuring the fair value of financial instruments for disclosure purposes; 5) Require separate presentation of financial assets and financial liabilities by measurement category and form of

financial asset on the balance sheet or the accompanying notes to the financial statements; and 6) Clarify that an entity should evaluate the need for a valuation allowance on a deferred tax asset related to available-for-sale securities in combination with the entity's other deferred tax assets. Public companies should apply the guidance in Update 2016-01 to annual reporting periods beginning after December 15, 2017, including interim reporting periods within that reporting period. Early adoption is generally not permitted. An entity should apply the amendments by means of a cumulative-effect adjustment to the balance sheet as of the beginning of the annual reporting period of adoption. We do not expect the adoption of these provisions to have a significant impact on the Company's consolidated financial statements.

In August 2015, the Financial Accounting Standards Board (FASB) issued Accounting Standards Update (ASU) No. 2015-14, Revenue from Contracts with Customers (Topic 606): Deferral of the Effective Date. The amendments in this update defer the effective date of Update 2014-09 for all entities by one year. Public companies should apply the guidance in Update 2014-09 to annual reporting periods beginning after December 31, 2017, including interim reporting periods within that reporting period. Early adoption is permitted only as of annual reporting periods beginning after December 15, 2016, including interim reporting periods within that reporting period.

In February 2015, the Financial Accounting Standards Board (FASB) issued Accounting Standards Update (ASU) No. 2015-02, *Consolidation (Topic 810): Amendments to the Consolidation Analysis*. The amendments in this update affect reporting entities that are required to evaluate whether they should consolidate certain legal entities. All legal entities are subject to reevaluation under the revised consolidation model. For public companies, this ASU is effective for fiscal years and interim periods within those fiscal years, beginning after December 15, 2015 with early adoption permitted. We do not expect the adoption of this guidance to have any impact on the Company's consolidated financial statements.

In January 2015, the Financial Accounting Standards Board ("FASB") issued Accounting Standards Update ("ASU") No. 2015-01, *Income Statement – Extraordinary and Unusual Items (Subtopic 225-20): Simplifying Income Statement Presentation by Eliminating the Concept of Extraordinary Items*. This ASU simplifies the income statement presentation requirements by eliminating the concept of extraordinary items. This ASU is effective for fiscal years, and interim periods within those fiscal years, beginning after December 15, 2015 with early adoption permitted. We do not expect the adoption of this guidance to have a material impact on the Company's consolidated financial statements.

In August 2014, the FASB issued ASU No. 2014-14, *Receivables – Troubled Debt Restructurings by Creditors (Subtopic 310-40): Classification of Certain Government-Guaranteed Mortgage Loans Upon Foreclosure – a consensus of the FASB Emerging Issues Task Force*. This ASU reduces diversity in practice with regards to the classification of foreclosed mortgage loans that are fully or partially guaranteed under government programs. For public companies, this ASU is effective for annual periods, and interim periods within those annual periods, beginning after December 15, 2014 with earlier adoption permitted for companies which have already adopted ASU 2014-04. The adoption of this guidance did not have a material impact on the Company's consolidated financial statements.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

Forward-Looking Statements

This report contains forward-looking statements that are based on assumptions and may describe future plans, strategies and expectations of the Company. These forward-looking statements are generally identified by use of the words "believe," "expect," "intend," "anticipate," "estimate," "project" or similar expressions. The Company's ability to predict results or the actual effect of future plans or strategies is inherently uncertain. Factors which could have a material adverse effect on the operations of the Company and its subsidiaries include, but are not limited to, general economic conditions, changes in the interest rate environment, legislative or regulatory changes that may adversely affect our business, changes in accounting policies and practices, changes in competition and demand for financial services, adverse changes in the securities markets, changes in deposit flows, and changes in the quality or composition of the Company's loan or investment portfolios. Additionally, other risks and uncertainties may be described in the Company's Annual Report on Form 10-K as filed with the Securities and Exchange Commission on September 28, 2015, which is available through the SEC's website at www.sec.gov and in other reports filed by the Company. These risks and uncertainties should be considered in evaluating forward-looking statements and undue reliance should not be placed on such statements. Except as required by applicable law or regulation, the Company does not undertake the responsibility, and specifically disclaims any obligation, to release publicly the result of any revisions that may be made to any forward-looking statements to reflect events or circumstances after the date of the statements or to reflect the occurrence of anticipated or unanticipated events.

Critical Accounting Policies

We consider accounting policies involving significant judgments and assumptions by management that have, or could have, a material impact on the carrying value of certain assets or on income to be critical accounting policies. We consider the following to be our critical accounting policies: the allowance for loan losses and the valuation of deferred income taxes.

ALLOWANCE FOR LOAN LOSSES - The allowance for loan losses is the amount estimated by management as necessary to cover probable credit losses in the loan portfolio at the statement of financial condition date. The allowance is established through the provision for loan losses, which is charged to income. Determining the amount of the allowance for loan losses necessarily involves a high degree of judgment. Among the material estimates required to establish the allowance are: loss exposure at default; the amount and timing of future cash flows on affected loans; and the value of collateral. Inherent loss factors based upon environmental and other economic factors are then applied to the remaining loan portfolio. All of these estimates are susceptible to significant change. Management reviews the level of the allowance at least quarterly and establishes the provision for loan losses based upon an evaluation of the portfolio, past loss experience, current economic conditions and other factors related to the collectability of the loan

portfolio. Although we believe that we use the best information available to establish the allowance for loan losses, future adjustments to the allowance may be necessary if economic conditions differ substantially from the assumptions used in making the evaluation. In addition, the OCC, as an integral part of its examination process, periodically reviews our allowance for loan losses. Such agency may require us to recognize adjustments to the allowance based on its judgments about information available to it at the time of its examination. A large loss could deplete the allowance and require increased provisions to replenish the allowance, which would negatively affect earnings. For additional discussion, see Notes 1 and 3 of the Notes to the Consolidated Financial Statements included in Item 8 of the Annual Report on Form 10-K filed with the Securities and Exchange Commission on September 28, 2015.

DEFERRED INCOME TAXES - We use the asset and liability method of accounting for income taxes as prescribed in Accounting Standards Codification (“ASC”) 740-10-50. Under this method, deferred tax assets and liabilities are recognized for the future tax consequences attributable to differences between the financial statement carrying amounts of existing assets and liabilities and their respective tax bases. If current available information raises doubt as to the realization of the deferred tax assets, a valuation allowance is established. Deferred tax assets and liabilities are measured using enacted tax rates expected to apply to taxable income in the years in which those temporary differences are expected to be recovered or settled. We exercise significant judgment in evaluating the amount and timing of recognition of the resulting tax liabilities and assets. These judgments require us to make projections of future taxable income. The judgments and estimates we make in determining our deferred tax assets, which are inherently subjective, are reviewed on a continual basis as regulatory and business factors change. Any reduction in estimated future taxable income may require us to record a valuation allowance against our deferred tax assets. A valuation allowance would result in additional income tax expense in the period, which would negatively affect earnings. United Community Bancorp referred to as the Company, accounts for income taxes under the provisions of ASC 275-10-50-8 to account for uncertainty in income taxes. The Company had no unrecognized tax benefits as of December 31, 2015 and June 30, 2015. The Company recognized no interest and penalties on the underpayment of income taxes during the three month periods ended December 31, 2015 and 2014, and had no accrued interest and penalties on the balance sheet as of December 31, 2015 and June 30, 2015. The Company has no tax positions for which it is reasonably possible that the total amounts of unrecognized tax benefits will significantly increase within the next fiscal year. The Company is no longer subject to U.S. federal, state and local income tax examinations by tax authorities for tax years ended on or before June 30, 2012.

Comparison of Financial Condition at December 31, 2015 and June 30, 2015

Balance Sheet Analysis

Total assets were \$510.2 million at December 31, 2015, compared to \$521.2 million at June 30, 2015. A \$24.0 million decrease in investment securities was partially offset by a \$4.9 million increase in cash and cash equivalents and a \$9.5 million increase in loans. The investment balances decreased partially due to normal amortization and maturities during the period. Proceeds totaling \$35.0 million were generated through investment sales during the period. The proceeds from the sales were used to fund new loans which is expected to enhance the Bank's net interest margin as well as increase interest income in the future.

Total liabilities decreased \$6.8 million from \$449.7 million at June 30, 2015 to \$442.9 million at December 31, 2015 primarily due to a \$5.5 million decrease in deposits during the current year period and a \$1.4 million decrease in other liabilities.

Total stockholders' equity totaled \$67.3 million as of December 31, 2015, which represented a decrease of \$4.1 million when compared to June 30, 2015. Net income of \$1.7 million for the six months ended December 31, 2015, and a decrease in the unrealized loss on available-for-sale securities of \$336,000 were offset by stock repurchases totaling \$6.1 million and dividends paid totaling \$482,000. There were 4,201,326 and 4,634,608 outstanding shares of common stock at December 31, 2015 and 2014, respectively. For all periods presented, the Bank was considered "well-capitalized" under applicable regulatory requirements.

Loans. At December 31, 2015, one- to four- family residential loans totaled \$143.9 million, or 53.1% of total gross loans at December 31, 2015, compared to \$142.7 million, or 55.0% of total gross loans, at June 30, 2015.

Multi-family and nonresidential real estate loans totaled \$78.7 million and represented 29.1% of total loans at December 31, 2015, compared to \$69.7 million, or 26.8% of total loans, at June 30, 2015.

Consumer loans totaled \$34.2 million and represented 12.6% of total loans at December 31, 2015, compared to \$34.9 million or 13.4% of total loans at June 30, 2015.

The following table sets forth the composition of our loan portfolio at the dates indicated.

	At December 31, 2015		At June 30, 2015		
	Amount	Percent	Amount	Percent	
(Dollars in thousands)

Loan Maturity

The following table sets forth certain information at December 31, 2015 regarding the dollar amount of loan principal repayments becoming due during the periods indicated. The table does not include any estimate of prepayments, which can significantly shorten the average life of the loan and may cause our actual repayment experience to differ from the contractual requirements shown below. Demand loans having no stated schedule of repayments and no stated maturity are reported as due in one year or less.

	Less Than One Year	More Than One Year to Five Years	More Than Five Years	Total Loans
(in thousands)

Results of Operations for the Three and Six Months Ended December 31, 2015 and 2014

Overview. Net income increased \$310,000 to \$978,000 for the quarter ended December 31, 2015 from \$668,000 for the quarter ended December 31, 2014.

Net Interest Income. The following table summarizes changes in interest income and interest expense for the three months ended December 31, 2015 and 2014.

	Three Months Ended December 31,			Six Months Ended December 31,				
	2015	2014	% Change	2015	2014	% Change		
(Dollars in thousands)								
Interest income:								
Loans	\$2,890	\$2,857	1.2	% \$ 5,776	\$ 5,706	1.2	%	
Investment and mortgage backed securities	986	943	4.5	2,052	1,838	11.6		
Other interest-earning assets	7	7	0.0	13	24	(45.8)	
Total interest income	3,883	3,807	2.0	7,841	7,568	3.6		
Interest expense:								
NOW and money market deposit accounts	40	50	(20.0)	146	158	(7.6)
Passbook accounts	73	57	28.1		148	112	32.1	
Certificates of deposit	353	413	(14.5)	713	864	(17.5)
Total interest-bearing deposits	466	520	(10.4)	1,007	1,134	(11.2)
FHLB advances	60	63	(4.8)	120	126	(4.8)
Total interest expense	526	583	(9.8)	1,127	1,260	(10.6)
Net interest income	\$3,357	\$3,224	4.1		\$ 6,714	6,308	6.4	

Net interest income totaled \$3.4 million for the quarter ended December 31, 2015, which represented an increase of \$133,000, or 4.1%, when compared to the quarter ended December 31, 2014. The growth in the Company's core business was the result of an increase in interest income as well as a decrease in interest expense. Interest income increased by \$76,000 due to a \$15.1 million increase in the average balance of loans and an increase in the average rate earned on investment securities to 2.15% in the current year quarter from 1.91% in the prior year quarter, partially offset by a decrease in the average rate earned on loans to 4.38% in the current year quarter from 4.60% in the prior year quarter, and a \$13.7 million decrease in the average balance of investments. Interest expense decreased \$57,000 primarily due to a decrease in the average rate paid on deposits from 0.49% in the prior year quarter to 0.43% in the current year quarter, partially offset by a \$4.1 million increase in the average balance of deposits when compared to the prior year quarter. The increase in loan balances was primarily the result of our continued controlled growth strategies in mortgage and commercial lending including the hiring of several commercial lenders in the last year. The

increase in investment yield was primarily the result of divesting lower yielding mortgage-backed securities and increasing the allocation to higher yielding municipal bonds.

Net interest income totaled \$6.7 million for the six months ended December 31, 2015, which represented an increase of \$406,000, or 6.4%, when compared to the six months ended December 31, 2014. The growth in the Company's core business was due to an increase in interest income and a decrease in interest expense. Interest income increased by \$273,000 primarily due to a \$14.0 million increase in the average balance of loans as well as an increase in the average rate earned on investment securities to 2.13% for the six months ended December 31, 2015 compared to 1.82% for the prior year period, partially offset by a decrease in the average rate earned on loans to 4.43% for the six months ended December 31, 2015 from 4.62% for the prior year period and a decrease in the average balance of investments to \$193.0 million for the six months ended December 31, 2015 compared to \$202.2 million for the prior year period. Interest expense decreased by \$133,000, primarily as a result of a decrease in the average interest rate paid on deposits to 0.47% for the six months ended December 31, 2015 from 0.53% for the prior year period. Changes in interest rates are primarily due to higher rate certificates of deposit maturing.

Edgar Filing: United Community Bancorp - Form 10-Q

The following table summarizes average balances and average yields and costs of interest-earning assets and interest-bearing liabilities for the three and six months ended December 31, 2015 and 2014. For the purposes of this table, average balances have been calculated using month-end balances, and nonaccrual loans are included in average balances only. Yields are not presented on a tax equivalent basis.

Provision for (Recovery of) Loan Losses. The provision for loan losses was \$45,000 for the quarter ended December 31, 2015 compared to \$36,000 for the quarter ended December 31, 2014. The provision for loan losses was \$89,000 for the six months ended December 31, 2015, which represented an increase of \$44,000 compared to the six months ended December 31, 2014. Nonperforming assets as a percentage of total assets decreased from 1.30% at June 30, 2015 to 1.08% at December 31, 2015 reflecting the continuing efforts of management to improve asset quality and reduce nonperforming assets. Nonperforming loans as a percentage of total loans decreased from 2.50% at June 30, 2015 to 1.94% at December 31, 2015.

Noninterest Income. The following table summarizes other income for the three and six months ended December 31, 2015 and 2014.

	Three Months Ended			Six Months Ended			
	December 31,		% Change	December 31,		% Change

Noninterest income totaled \$1.4 million for the quarter ended December 31, 2015, which represented an increase of \$380,000, or 39.1% when compared to the quarter ended December 31, 2014. The increase was primarily due to a \$210,000 increase in income from Bank Owned Life Insurance, which was received as a result of the death benefit for a director. The increase was also due to a \$40,000 increase in service charge income on deposit accounts, a \$33,000 increase in profit on the sale of mortgage loans, and a \$36,000 increase in the fair value of mortgage servicing rights, as compared to a \$44,000 decrease in the fair value of mortgage servicing rights in the prior year quarter.

Noninterest income totaled \$2.4 million for the six months ended December 31, 2015, which represented an increase of \$563,000, or 30.3% compared to the prior year period. The increase was primarily due to a \$262,000 increase in income from Bank Owned Life Insurance. The increase was due to the receipt of death benefits from the passing of two directors (one previously retired) during the period. The increase in non-interest income was also due to a \$112,000 increase in service charges on deposit accounts, a \$96,000 increase on gain on sale of mortgage loans, a \$113,000 increase on gain on sale of investments, and a \$3,000 decrease in the fair value of mortgage servicing rights, as compared to a larger \$107,000 decrease in the fair value of mortgage servicing rights in the prior year period.

Noninterest Expense. The following table shows the components of noninterest expense and the percentage changes for the three and six months ended December 31, 2015 and 2014.

	Three Months Ended			Six Months Ended				
	December 31,		% Change	December 31,		% Change		
	2015	2014			2015	2014		
	(Dollars in thousands)							
Compensation and employee benefits	\$2,122	\$1,914	10.9	%	\$4,282	\$3,730	14.8	%

Professional fees	172	159	8.2		459	473	(3.0))
Other operating expenses	423	408	3.7		817	775	5.4	
Total	\$3,528	\$3,412	3.4		\$7,153	\$6,818	4.9	

Noninterest expense totaled \$3.5 million for the quarter ended December 31, 2015, which represented an increase of \$116,000, or 3.4% when compared to the quarter ended December 31, 2014. The increase was primarily due to an increase in compensation expense of \$208,000. This increase was partially offset by a \$20,000 decrease in premises and occupancy expense and an \$81,000 decrease in data processing expense. The increase in compensation expense was primarily due to salary increases provided to employees in the normal course of business, and an increase in the number of commercial lenders in the last year. The commercial lending department has been expanded to enable the Bank to execute its controlled growth strategy to prudently increase commercial and real estate lending.

Noninterest expense totaled \$7.2 million for the six months ended December 31, 2015, which represented an increase of \$335,000, or 4.9%, compared to the six months ended December 31, 2014. The increase in noninterest expense was primarily the result of an increase of \$552,000 in compensation expense, partially offset by a decrease in premises and occupancy expense of \$97,000, a decrease in deposit insurance of \$20,000, a decrease in advertising expense of \$27,000, and a decrease of \$101,000 in data processing expenses. The increase in compensation expense was primarily due to salary increases provided to employees in the normal course of business and an increase in the number of commercial lenders in the last year. The commercial lending department has been expanded to enable the Bank to execute its controlled growth strategy to prudently increase commercial and real estate lending. The decrease in data processing expense was primarily due to nonrecurring items in the prior period with no corresponding expense in the current period.

Income Taxes. Income tax expense for the three months ended December 31, 2015 was \$159,000 compared to \$81,000 for the three months ended December 31, 2014. The effective tax rate increased to 14.0% for the three

months ended December 31, 2015 from 10.8% for the three months ended December 31, 2014. The increase in income tax expense and effective tax rate for the current year quarter was due to a \$388,000 increase in income before income taxes combined with increases of \$166,000 in non-taxable income from municipal bonds and \$210,000 in income from bank owned life insurance in the current year quarter compared to the prior year quarter.

Income tax expense for the six months ended December 31, 2015 was \$215,000 compared to \$155,000 for the six months ended December 31, 2014. The effective tax rate decreased to 11.4% for the six months ended December 31, 2015 from 11.9% for the six months ended December 31, 2014. The increase in income tax expense and decrease in the effective tax rate for the current year quarter was due to a \$530,000 increase in income before income taxes combined with increases of \$465,000 in non-taxable income from municipal bonds and \$262,000 in income from bank owned life insurance in the current year period compared to the prior year period.

Analysis of Nonperforming Assets. We consider foreclosed real estate, repossessed assets and nonaccrual loans, including nonaccrual TDR loans, to be nonperforming assets.

All of the TDRs at December 31, 2015 represented loan relationships with long-time borrowers. In measuring impairment, management considered the results of independent property appraisals, together with estimated selling expenses, and/or detailed cash flow analyses. At December 31, 2015, 32 loans were considered to be TDRs (with a recorded investment of \$5.9 million) of which 14 loans (with a recorded investment of \$2.4 million) were included in nonperforming assets.

The following table provides information with respect to our nonperforming assets at the dates indicated.

	At December 31, 2015	At June 30, 2015		
(Dollars in thousands)				
Nonaccrual loans:				
One- to four-family residential real estate	\$ 1,527	\$ 1,721		
Nonresidential real estate and land	883	926		
Consumer	460	458		
Total nonaccrual loans	2,870	3,105		
One- to four-family residential real estate	337	948		
Multi-family real estate	—	—		
Nonresidential real estate and land	2,050	2,437		
Total nonaccrual restructured loans	2,387	3,385		
Total nonperforming loans	5,257	6,490		
Real estate owned	228	286		
Total nonperforming assets	\$ 5,485	\$ 6,776		
Accruing restructured loans	3,558	4,589		
Accruing restructured loans and nonperforming assets	\$ 9,043	\$ 11,365		
Total nonperforming loans to total loans	1.94	%	2.50	%
Total nonperforming loans to total assets	1.04		1.25	
Total nonperforming assets to total assets	1.08		1.30	

Interest income that would have been recorded for the three months and six months ended December 31, 2015 had nonaccruing loans been current according to their original terms was \$110,000, and \$224,000, respectively. Interest recognized on the cash basis with regard to nonaccrual restructured loans was \$4,000 and \$10,000, respectively, for the three and six months ended December 31, 2015.

At December 31, 2015, the percentage of nonperforming assets to total assets decreased to 1.08% from 1.30% at June 30, 2015, a decrease of 22 basis points, or 16.9%. Beginning with the disclosure in the Company's Form 10-Q for the quarter ended March 31, 2011, the Company included "Loan Relationship" narratives regarding its five largest nonaccrual (nonperforming) loans and loans having the five largest charge-offs, all of which were commercial real estate loans. As of March 31, 2011, the amount of nonaccrual (nonperforming) loans totaled \$19.5 million, and the amount of accruing TDR loans totaled \$7.0 million. As of December 31, 2015, the amount of nonaccrual (nonperforming) loans decreased to \$5.3 million from \$19.5 million at March 31, 2011, and the amount of accruing TDR loans decreased to \$3.6 million from \$7.0 million at March 31, 2011.

Because of the decrease in nonaccrual (nonperforming) loans and accruing TDR loans over the last five years, the Loan Relationship narratives for the period ended December 31, 2015 focuses on commercial Loan Relationships with

the following loans:

- The largest nonaccruing commercial real estate loans (including nonaccrual TDRs) having a carrying value of at least \$250,000;

- The largest commercial real estate loan charge-offs having a charge-off of at least \$250,000 that are related to commercial real estate loans in a Loan Relationship, whether accruing or not; and

- The largest accruing TDR commercial loans having a carrying value of at least \$250,000.

At December 31, 2015:

The largest commercial real estate nonaccrual loans are related to loans in Loan Relationships B, J, M and N. There are a total of six loans in these loan relationships.

The largest charge-offs are related to loans in Loan Relationships B, F, H, K, M and O. There are a total of seven loans in these Loan Relationships.

The largest accruing TDRs are related to loans in Loan Relationships K, O and P. There are a total of three loans in these Loan Relationships.

As discussed below, some of the Loan Relationships include loans that were restructured using the “Note A/B split note” strategy for which the amount of the Note B loan has been charged-off, with the borrower remaining responsible for that charged-off amount unless otherwise agreed to by the Bank. For purposes of the narratives, loans that have a carrying value are identified by a Loan number within each Loan Relationship, such as “Loan A-1” and “Loan A-2”. However, the Note B loans are identified as a “Note B loan” because these loans have no carrying value because they have been charged-off.

Management monitors the performance of all of these loans and reviews all options available to keep the loans current, including further restructuring of the loans. If restructuring efforts ultimately are not successful, management will initiate foreclosure proceedings.

Loan Relationship B. At December 31, 2015 and June 30, 2015, this Loan Relationship consisted of two loans, a Note A loan (Loan B-1) and a Note B loan, having an aggregate carrying value of \$721,000, and \$754,000 respectively. Loan B-1 is secured by a first mortgage on two separate retail strip shopping centers. The borrower is a limited liability company and the two co-borrowers are the principals of the limited liability company. Loan B-1 is included in the table as “Nonaccrual restructured loans, Nonresidential real estate” at December 31, 2015 and June 30, 2015. In the “Credit Risk Profile by Internally Assigned Grade” table, Loan B-1 is classified as “Nonresidential real estate, Substandard” at December 31, 2015 and June 30, 2015. Loan B-1 was performing in accordance with its restructured terms at December 31, 2015. A more detailed history of Loan Relationship B follows.

The loans comprising Loan Relationship B were originally restructured in June 2010, with an aggregate carrying value of \$4.1 million. At the time of the original restructuring, the property value was based primarily on the collateral’s cash flow, including required personal cash infusions from the co-borrowers. Management believed that the lower debt service would improve the borrowers’ cash flow, and in turn, the performance of the loans. The Bank analyzed the personal net worth, liquid net worth, debt to income ratios and credit scores of the co-borrowers. While the co-borrowers were not expected to cover a total loss on the loans, management believed the co-borrowers would mitigate the amount of potential future losses. The restructured loans were considered impaired at June 30, 2010, with an allowance for loan loss of \$600,000 to reflect the reduction in carrying value resulting from the exclusion of the required personal cash infusions from the co-borrowers from the calculation of the carrying value. In March 2011, the

loans were again experiencing cash flow problems due to decreases in rental revenue from the properties. Due to financial difficulties experienced by the co-borrowers, including the cash flow problems of the subject properties and a decrease in other outside sources of income, the co-borrowers were unable to mitigate the losses on the loans. Therefore, in March 2011, the two loans secured by the two separate retail strip shopping centers were combined and refinanced into two loans, using the Note A/B split note strategy. The first loan (Loan B-1, a Note A loan) had a balance of \$2.4 million and was classified as substandard, reported as a TDR, and placed on nonaccrual. The second loan (a Note B loan) had a balance of \$1.3 million and was charged-off (inclusive of the \$600,000 specific allowance recorded for this Loan Relationship in the quarter ended June 30, 2010).

In March 2011, Loan B-2, which was paid in full at September 30, 2014, was refinanced into two loans, using the Note A/B split note strategy. The first loan (Loan B-2, a Note A loan) was for \$238,000 and was classified as substandard, reported as a TDR, and placed on nonaccrual. The second loan (a Note B loan) was for \$169,000 and was charged-off. The restructured loans had interest rates 275 basis points lower than their 2010 restructured rates for a period of two years, and 500 basis points below their original rates.

In May 2012, one of the two retail strip shopping centers that secured Loan B-1 experienced the loss of a major tenant. The resultant decrease in cash flow caused the Bank to have the two retail strip shopping centers securing the loan appraised in June 2012. The appraisal reflected that the value of properties had declined to \$1.45 million from the February 2011 appraised value of \$2.95 million. Management determined that this loan would ultimately be settled through the sale of the property. A charge-off of \$956,000 was established in the quarter ended June 30, 2012 based on the then most recent appraisal which indicated a known loss, together with an additional impairment of \$189,000 based on the Bank's experience in settling foreclosed property. The carrying value of this loan was classified as substandard, and reported as a TDR, and placed on nonaccrual. The Bank also appraised the single purpose commercial use property in June 2012. The value of this property declined to \$225,000 from \$325,000 in February 2011 due to decreased cash flow from the then current tenant. Management determined that this loan would also be settled from the sale of the property. A charge-off in the amount of \$22,000 was established based on the then most recent appraisal indicating a known loss, together with an additional impairment of \$29,000 based on the Bank's experience in settling foreclosed property. The carrying value of this loan was classified as substandard, reported as a TDR, and placed on nonaccrual. During the quarter ended March 31, 2013, the balloon payment for the two loans secured by the two separate retail strip shopping centers became due. An independent appraisal was performed in March 2013 on the properties reflecting that the appraised value of the properties had increased to \$1.8 million. The loan was restructured during the March 2013 quarter using the Note A/B split note strategy. The first loan (Loan B-1, a Note A loan) was refinanced for \$1.3 million, with a market interest rate of 5.50% based on a 30 year loan term, and a three year balloon payment. As stated above, the carrying value of this loan was put on nonaccrual, classified as substandard, and reported as a TDR. The second loan (a Note B loan) was for \$2.3 million and charged-off. This charged-off amount equaled the amount of the Note B loan balance in March 2011 (\$1.3 million) plus that portion Note A loan balance in March 2011 that was charged-off during the period ended June 30, 2012 (\$1.0 million).

The balloon payment for Loan B-2 also came due during the quarter ended March 31, 2013. The Note A loan and the Note B loan secured by the single purpose commercial use property were modified again using the Note A/B split note strategy. The first loan (Loan B-2, a Note A loan) was modified to a balance of \$185,000, with a market interest rate of 5.50%, for a 30-year term, and a three year balloon payment. The carrying value of this loan was put on nonaccrual, classified as substandard, and reported as a TDR. The second loan (a Note B loan) was modified at its then current balance of \$191,000 and charged-off. This charged-off amount equaled the balance of the Note B loan balance in March 2011 (\$169,000) plus the balance of the Note A loan in March 2011 that was charged-off during the period ended June 30, 2012 (\$22,000). As noted above, the balance of Loan B-2 was paid off in the September 2014 quarter, with no additional principal loss to the Bank. In addition, in the December 31, 2014 quarter, the co-borrowers of Loan B-1 paid \$335,000 toward the loan's principal balance.

Loan Relationship F. At December 31, 2015 and June 30, 2015, Loan Relationship F was comprised of two loans, a Note A loan and a Note B loan, having an aggregate carrying value of \$421,000 and \$424,000, respectively. These loans are secured by a multi-family residential real estate property and a single-family real estate property. The borrower is a corporate entity, with three principals, each of whom is a co-borrower of the loan. At December 31, 2015 and June 30, 2015, the Note A loan is included in the table as "Accruing restructured loans." In the "Credit Risk Profile by Internally Assigned Grade" table, the Note A loan is classified as "Multi-family real estate, Watch" at December 31, 2015 and June 30, 2015. As of June 30, 2014, Note A loan was no longer reported as a TDR, or classified as substandard, because the loan was current and there were more than 12 consecutive monthly payments made on time. Additionally, recent appraisals obtained for the properties securing the loan indicated that the loan to

value ratio of the loan complied with the Bank's underwriting standards, and the cash flow analysis performed on the loan from updated financial information indicated that the debt service coverage ratio complied with the Bank's underwriting standards. The Note A loan in Loan Relationship F was performing in accordance with its terms at December 31, 2015. A more detailed history of Loan Relationship F follows.

The original loan was initially restructured using the Note A/B split note strategy in June 2010 based on an 80% loan-to-value ratio derived from an April 2010 independent appraisal. The first loan (Note A loan) had a balance of \$631,000 with a market interest rate of 5.50%, for a 25-year term, based on a 3/1 ARM. This loan was put on nonaccrual and classified as substandard. The second loan (a Note B loan) had a balance of \$216,800 and there was a specific reserve established for the entire amount of the loan. The borrower was a corporate entity, with two principals, each of whom individually was a co-borrower of the loans. At December 31, 2010, the first loan was 160 days delinquent. The delinquency was a result of personal problems between the borrowers affecting their ability to manage the multi-family residential real estate and the single-family real estate. The personal problems between the borrowers also resulted in the borrowers' inability to make the required personal cash infusions. In the latter part of 2010 and into early 2011, one of the borrowers effectively took control of the multi-family residential real estate and the single-family real estate, and brought the business current with respect to property taxes, deposit refunds to former tenants, and made required monthly loan payments in January and February 2011. Other than the January and February 2011 loan payments, the borrowers were unable to make payments to bring the loan current. Based upon those developments, management completed a detailed analysis of the total lending relationship with the borrowers. As a result of this analysis, these loans were again restructured, using the Note A/B split note strategy in March 2011. The terms of the first loan (a Note A loan) were calculated using the borrowers' then current financial information to yield a payment having a debt service coverage ratio of approximately 1.5x, which was more stringent than the Bank's normal underwriting standards. A restructuring fee of \$7,000 was charged and included in the second loan (a Note B loan) at March 31, 2011. After the restructuring in March 2011, the Note A loan had a balance of \$475,000, was put on nonaccrual, classified as substandard and reported as a TDR. The Note B loan had a balance of \$405,000. The full amount of the Note B loan was charged-off in the quarter ended March 31, 2011, inclusive of the previous specific reserve of \$216,800 from December 31, 2010.

A two-year balloon payment was due in March 31, 2013 on the loans unless the borrower refinanced the loans to a market rate loan at that time. During the quarter ended December 31, 2012, as a result of the continued personal problems of the co-borrowers, the two loans were modified with one of the borrowers who had taken control of the two properties in early 2011. The other borrower relinquished all of its interest in the two properties. However, in addition to the one borrower retained on the loan, two other borrowers were added to the loans to provide managerial strength to the relationship and increase the property's income potential. The Bank had been reviewing the cash flow of the property on a monthly basis and determined that the cash flows had improved due to the borrowers' enhanced managerial ability. An independent appraisal was ordered to provide the "as is" value of the properties. The Bank obtained the appraisal in December 2012, and the appraised value of the properties had decreased to \$730,000 from \$774,000 in February 2011. During the quarter ended December 31, 2012, the two loans were modified, again using the Note A/B split note strategy, with both loans having three year balloon payments. The Note A loan was modified to a market interest rate of 5.50%, with no increase in the principal balance (\$453,000). The term of the loan was also reduced to 324 months from the remaining term of 339 months. Even with the higher market interest rate and the shorter term of the loan, the debt service coverage ratio is above 1.20x, which complied with the Bank's current loan underwriting standards. This loan was put on accrual (because of its sufficient payment history), classified as substandard, and reported as a TDR. There was no increase in the principal balance (\$405,000) of the Note B loan from that loan's prior restructuring in March 2011, and therefore, the charge-off amount (\$405,000) remained the same as in March 2011. However, the interest rate was reduced to 0%, as the loan had been charged-off.

During the December 2015 quarter, the balloon payment from the December 2012 renewal became due. As a result of the upcoming balloon payment, the Bank ordered new appraisals on the two properties. The Bank received the appraisals in October 2015, and the appraised value of the properties increased to \$773,000 from \$730,000 in December 2012. The Bank also reviewed the cash flow from updated financials of the borrowers and co-borrowers. After this review and based on the increase in value of the properties, the Bank extended the two loans, again using the Note A/B split note strategy, with both loans having three year balloon payments. The Note A Loan was renewed at the market interest rate of 5.50%, with no increase in the principal balance (\$421,000). The term of the loan was renewed at 288 months. This loan was put on accrual because of its sufficient payment history and classified as watch. There was no increase in the principal balance (\$405,000) of the Note B loan from that loan's prior restructuring in December 2012, and therefore, the charge-off amount (\$405,000) remained the same as in December 2012. The interest rate remained at 0%, as the loan had been charged-off.

Loan Relationship H. At December 31, 2015 and June 30, 2015, Loan Relationship H was comprised of three loans having an aggregate carrying value of \$922,000 and \$941,000, respectively. Two of the loans, a Note A loan (Loan H-1) and a Note B loan, had an aggregate carrying value of \$703,000 and \$710,000, respectively. Loan H-1 is secured by a first lien on an 18-unit apartment complex, a single-family rental dwelling, a 6.3 acre tract of land, and a second lien on a single-family owner occupied dwelling on 11.36 acres. The borrower is a limited liability company and the two co-borrowers are the principals of the limited liability company. At December 31, 2015 and June 30, 2015, Loan H-1 is included in the table as "Accruing restructured loans" and classified as "Multi-family residential real estate, Watch" in the "Credit Risk Profile by Internally Assigned Grade" table. As of June 30, 2014, Loan H-1 was no longer reported as a TDR loan because the loan was current and there were more than 12 consecutive market rate monthly payments made on time. Also, recent appraisals indicated that the loan to value was adequate and the cash flows from updated financial information of the properties securing the loan indicated that the debt service coverage ratio was adequate.

During the quarter ended June 30, 2013, the Bank refinanced the principal residence of the co-borrowers (the single-family owner occupied dwelling on 11.36 acres mentioned above). This loan, Loan H-2, had an original balance of \$280,000 at a market rate of interest for a ten year term. At December 31, 2015 and June 30, 2015, the balance of Loan H-2 was \$219,000 and \$232,000, respectively. Loan H-2 is secured by a first lien on the single-family owner occupied dwelling on 11.36 acres mentioned above. The borrowers are a husband and wife who are the principals in the limited liability company mention above. Loan H-2 is not included in the table as “Accruing restructured loans” at December 31, 2015 and June 30, 2015. At December 31, 2015 and June 30, 2015, Loan H-2 was classified as “One- to Four-Family Owner-Occupied Mortgage, Watch” in the “Credit Risk Profile by Internally Assigned Grade” table.

At December 31, 2015, Loan H-1 was performing in accordance with its restructured terms and Loan H-2 was performing in accordance with its original terms. A more detailed history of the Note A loan (Loan H-1) and the Note B loan follows.

During the quarter ended December 31, 2008, the Note A loan (Loan H-1) and the Note B loan were comprised of one loan with a carrying value of \$1.3 million and classified as special mention. In the quarter ended June 30, 2009, the co-borrowers approached the Bank and advised that the only co-borrower who was employed had experienced a substantial salary reduction. The borrowers requested an interest rate reduction to 3% and interest only payments for three years. Independent appraisals were ordered and received and reflected that the properties on which the Bank had a first lien position had an aggregate value of \$1.0 million. The loan was classified as substandard, placed on nonaccrual, and reported as a TDR. Due to the reduced interest rate, a specific valuation of \$123,000 was established for the loan through a charge-off to the general allowance. Under the loan’s modified terms, the interest rate was to reset to 5.75% on June 1, 2012. In June 2012, the co-borrowers approached the Bank and advised that the properties’ cash flow could not service the increase in interest rate. Independent appraisals were ordered and received in June 2012 and reflected that the properties on which the Bank had a first lien position had a value of \$978,000. As a result, the Bank recorded a charge-off of \$481,000, (inclusive of the \$123,000 specific allocation established) to reflect the carrying value of the loan at \$744,000. The one loan performed in accordance with its restructured terms until the September 30, 2012 quarter, when the co-borrowers again approached the Bank and advised that the properties’ cash flow could not service the loan. Therefore, the one loan was restructured using the Note A/B split note strategy. The Note A loan (Loan H-1) was for \$748,000, with a market rate of interest of 5.00%, for a 30-year term and a three year balloon payment. The carrying value of this loan was placed on nonaccrual, classified as substandard, and reported as a TDR. The Note B loan was for \$515,000 (inclusive of the \$481,000 that was charged-off in the June 30, 2012 quarter) and was charged-off. The interest rate was reduced to 0% as the loan had been charged-off.

During the September 2015 quarter, the balloon payment from the September 2012 renewal became due. As a result of the upcoming balloon payment, the Bank ordered new appraisals on two properties. The Bank received new appraisals on the 18 unit apartment complex and a single-family rental dwelling in September 2015. In addition, the Bank used the June 2014 value of the 6.3 acre tract of land. The total appraised value of the three properties increased to \$1,048,000 as compared to the \$978,000 total appraised value in June 2012. The Bank also reviewed the cash flow from updated financials of the borrower and co-borrowers. After this review and based on the increase in value of the properties, the Bank extended the two loans, again using the Note A/B split note strategy, with both loans having three year balloon payments. The Note A loan (Loan H-1) was renewed at the market interest rate of 5.00%, using a 1/1

Edgar Filing: United Community Bancorp - Form 10-Q

ARM, with a 5% floor rate, and with no increase in the principal balance (\$710,000). The term of the loan was renewed at 324 months. This loan was put on accrual (because of its sufficient payment history) and classified as watch. There was no increase in the principal balance (\$515,000) of the Note B loan from that loan's prior restructuring in September 2012, and therefore, the charge-off amount (\$515,000) remained the same as in September 2012. The interest rate remained at 0%, as the loan had been charged-off.

Loan Relationship J. At December 31, 2015 and June 30, 2015, this relationship was comprised of two loans having an aggregate carrying value of \$1.5 million and \$1.6 million, respectively. At December 31, 2015 and June 30, 2015, Loan J-1 had an aggregate carrying value of \$734,000 and \$775,000, respectively. Loan J-1 is secured by a first mortgage on a nonresidential real estate property located on 2.17 acres of land and an additional 1.753 acre tract of land that is contiguous to the nonresidential real estate and is zoned for commercial development. Two of the Loan J-1 borrowers are corporate entities, each of whose principals individually signed as co-borrowers. At December 31, 2015 and June 30, 2015, Loan J-2 had an aggregate carrying value of \$774,000 and \$780,000, respectively. Loan J-2 is secured by a first mortgage on six one-to four-family non-owner occupied residential properties and an 80 acre tract of land. One of the Loan J-2 borrowers is a corporate entity whose principal individually signed as a co-borrower. At December 31, 2015 and June 30, 2015, Loan J-1 is included in the table in “Nonaccrual, Nonresidential Real Estate”, and was classified as “Nonresidential Real Estate, Substandard” in the “Credit Risk Profile by Internally Assigned Grade” table. At December 31, 2015 and June 30, 2015, Loan J-2 is not included in the Nonaccrual table and was classified as “One-to Four-Family Non Owner-Occupied Mortgage, Watch” in the “Credit Risk Profile by Internally Assigned Grade” table. During the quarter ended March 31, 2015, the Bank entered into discussions with the co-borrowers about increasing the payments paid each month on Loan J-1 and the fact that this property had not been sold after several promising leads. Subsequent to the quarter ended March 31, 2015, the Bank entered into a forbearance agreement with the borrower and co-borrowers. Basically, the terms of this agreement are that increasing principal and interest payments will be made over 13 months, beginning with the June 2015 payment. Also, all monthly escrow payments will continue to be made. Also, the maturity date for this loan is now June 30, 2016. If the loan is paid off before the new maturity date, there will be a discounted payoff, but the Bank would experience no additional loss to the loan’s carrying value by any such discounted payoff. At December 31, 2015, Loan J-1 was performing in accordance with its restructured terms, and Loan J-2 was performing in accordance with its original terms. A more detailed history of Loan Relationship J follows.

During the quarter ended June 30, 2013, the co-borrowers of Loan J-1 approached the Bank and advised it that the entity buying the nonresidential real estate portion of this property on land contract was vacating the premises. The contract buyers also stated they were unable to make the contract loan payments. The co-borrowers had been using the payments from this land contract to make loan payments to the Bank. The Bank ordered an independent appraisal of the nonresidential real estate and the contiguous 1.753 acre tract of land. The appraised value, received in June 2013, totaled \$1.1 million, \$720,000 for the nonresidential real estate property; and \$390,000 for the 1.753 acre tract of land. This was a decrease from the April 2007 aggregate appraised value of \$1.6 million. During the quarter ended June 30, 2013, it was determined that the co-borrowers were able to pay \$1,550 per month for the monthly real estate taxes and \$3,450 for the monthly loan payment on Loan J-1. Therefore, in the June 30, 2013 quarter, Loan J-1, with a carrying value of \$869,000, net of the charge off amount of \$161,000, was put on nonaccrual and classified as substandard and was reported as a TDR. The carrying value and the charge off amount were determined by an impairment analysis using 80% of the appraised value of the nonresidential real estate plus 75% of the appraised value of the 1.753 acre tract of land. Subsequent to June 30, 2013, the borrowers signed a purchase agreement with an unrelated third party for the nonresidential real estate property at a sales price that would enable any unpaid principal balance to be fully collateralized by the remaining 1.753 acre tract of land. During the quarter ended March 31, 2014, the purchase agreement expired and the potential purchaser determined not to purchase the property. At the time of this filing, the borrowers are pursuing other possible sale or refinance opportunities for this property.

Loan Relationship K. At December 31, 2015 and June 30, 2015, this Loan Relationship was comprised of seven loans having an aggregate carrying value of \$1.4 million. At December 31, 2015 and June 30, 2015, two of the loans, a Note A loan (Loan K-1) and a Note B loan, had an aggregate carrying value of \$719,000 and \$724,000, respectively. Loan K-1 is secured by 11 one-to four-family non-owner occupied properties and one multi-family property. As further described below, Loan K-1 was previously restructured using the Note A/B split note strategy. At December 31, 2015 and June 30, 2015, Loan K-2 had an aggregate carrying value of \$222,000 and \$235,000, respectively. Loan K-2 is secured by a first mortgage on the principal residence of two of the individual co-borrowers. At December 31, 2015 and June 30, 2015, Loan K-3 had an aggregate carrying value of \$1,800 and \$.01, respectively. Loan K-3 is a home equity line of credit secured by a second mortgage on the principal residence of two of the individual co-borrowers. At December 31, 2015 and June 30, 2015, Loan K-5 had an aggregate carrying value of \$123,000 and \$125,000, respectively. Loan K-5 is secured by a first mortgage on the principal residence of the two individual co-borrowers. At December 31, 2015 and June 30, 2015, Loan K-6 had an aggregate carrying value of \$161,000 and \$179,000, respectively. Loan K-6 is secured by a UCC-1 filing and a second mortgage on the principal residence of the two individual co-borrowers. At December 31, 2015 and June 30, 2015, Loan K-7 had an aggregate carrying value of \$132,000 and \$134,000, respectively. Loan K-7 is secured by a first mortgage on a nonresidential property and a third mortgage on the principal residence of the two individual co-borrowers. One of the Loan K-1 co-borrowers is a corporate entity, each of whose principals, together with their respective spouses, is a co-borrower. Two co-borrowers of Loans K-2 and K-3 are individual co-signors. Loan K-5 co-borrowers are individually signed. One co-borrower of Loans K-6 and K-7 is a corporate entity whose principal, together with their spouse, is a co-borrower.

At December 31, 2015 and June 30, 2015, Loan K-1 is included in the table in “Accruing Restructured Loans.” At December 31, 2015 and June 30, 2015, Loans K-2, K-3, K-5, K-6, and K-7, are not included in the Nonaccrual table. At December 31, 2015 and June 30, 2015, Loan K-1 was classified as “Multi-Family, Substandard” in the “Credit Risk Profile by Internally Assigned Grade” table. At December 31, 2015 and June 30, 2015, Loan K-2 was classified as “One-to Four-Family Owner-Occupied Mortgage, Watch” in the “Credit Risk Profile by Internally Assigned Grade” table. At December 31, 2015 and June 30, 2015, Loan K-3 was classified as “Consumer, Pass” in the “Credit Risk Profile by Internally Assigned Grade” table. At December 31, 2015 and June 30, 2015, Loan K-5 was classified as “One-to Four-Family Owner-Occupied Mortgage, Pass” in the “Credit Risk Profile by Internally Assigned Grade” table. At December 31, 2015 and June 30, 2015, Loan K-6 was classified as “Commercial and Agricultural, Pass” in the “Credit Risk Profile by Internally Assigned Grade” table. At December 31, 2015 and June 30, 2015, Loan K-7 was classified as “Nonresidential Real Estate, Pass” in the “Credit Risk Profile by Internally Assigned Grade” table. At December 31, 2015, Loan K-1 was performing in accordance with its restructured terms, and Loans K-2, K-3, K-5, K-6, and K-7, were performing in accordance with their original terms. A more detailed history of the Note A loan (Loan K-1) and the Note B loan follows.

In November 2011, a charge-off in the amount of \$406,000 was established for Loan K-1 because of cash flow issues of the rental properties securing this loan. At that time independent appraisals were ordered. The new appraisals, received in December 2011, reflected that the values of the properties had decreased to \$1.3 million from \$2.0 million as of May 2007. The Bank determined to restructure the loan utilizing the Note A/B split note strategy. The first loan (Loan K-1, a Note A loan) was for \$1.1 million with the market rate of interest of 5.50% and a two year balloon payment. This loan was put on nonaccrual, classified as substandard, and reported as a TDR. The second loan (a Note B loan) had a balance of \$415,000 and was charged-off and the interest rate reduced to 0%. This charge-off amount was \$9,000 more than the charge-off amount established in November 2011. In July 2012, the borrowers sold four of

the rental properties and the net proceeds of \$301,000 were applied to Loan K-1, reducing the principal to \$823,000 from \$1.1 million. A fifth rental property was released because of the condition of the property.

During the quarter ended December 31, 2013, the Note A loan (Loan K-1) and a Note B loan, were restructured again utilizing the Note A/B split note strategy due to the balloon payment described above. Loan K-1 was renewed at the market interest rate of 5.50%, with no increase in the principal balance (\$809,000), with a three year balloon payment. This loan was put on accrual (because of its sufficient payment history), classified as substandard, and reported as a TDR. There was no increase in the principal balance (\$415,000) of the Note B loan from that loan's prior restructuring in December 2011, and therefore, the charge-off amount (\$415,000) remained the same as in December 2011. The interest rate remained at 0%, as the loan had been charged-off. In March 2014, the borrowers sold one of the rental properties and the net proceeds of \$65,000 were applied to Loan K-1, reducing the loan's principal balance to \$739,000. Also, in the December 31, 2013 quarter, Loan K-4 was paid in full. Therefore, at December 31, 2015, there were a total of 12 rental properties remaining as collateral for loan K-1.

Loan Relationship M. At December 31, 2015 and June 30, 2015, Loan Relationship M was comprised of two loans having an aggregate carrying value of \$1.3 million and \$1.7 million, respectively. At December 31, 2015 and June 30, 2015, Loan M-1 had an aggregate carrying value of \$704,000 and \$884,000, respectively. At December 31, 2015 and June 30, 2015, Loan M-2 had an aggregate carrying value of \$624,000 and \$798,000, respectively. The loans are secured by a first mortgage on two golf courses, including a club house on each, in the greater Cincinnati area, an approximately 25 acre tract of land, and a second mortgage on the principal residence of two of the individual co-borrowers. The borrower of Loans M-1 and M-2 is a corporate entity, each of whose principals, a husband and wife, has individually signed as a co-borrower, as have the father and stepmother of one of the co-borrowers. At December 31, 2015 and June 30, 2015, Loans M-1 and M-2 are included in the table in “Nonaccrual, Nonresidential Real Estate” and classified as “Nonresidential Real Estate, Substandard” in the “Credit Risk Profile by Internally Assigned Grade” table. During the June 30, 2015 quarter, the Bank entered into a forbearance agreement with the borrower and co-borrowers, pursuant to which full principal, interest and escrow payments will be made for the months of May through October of each year, beginning in 2015. The maturity date for these loans is now October 1, 2018. If either of these loans is paid off before the new maturity date, there will be a discounted payoff, but the Bank would experience no additional loss to the loan’s carrying value by any such discounted payoff. Loans M-1 and M-2 were performing in accordance with their restructured terms at December 31, 2015, except for a partial escrow payment that was due, which was brought current subsequent to the end of the December 31, 2015 quarter. A more detailed history of Loan Relationship M follows.

Loan M-1 originated in December 2007 and Loan M-2 originated in July 2009, each with a 20 year term. Under each loan’s terms, payments were due from April through December of each year; no payments were required in January, February and March of each year. Due to reduced cash flows resulting from inclement weather, in December 2013, the co-borrowers advised the Bank that they would pay the amounts due for November and December 2013 in February and March 2014, respectively. Due to the continuation of the severe winter weather and resultant reduced cash flows, borrowers were unable to make the payment due in February 2014 and were unable to make the real estate tax payment due during the period ended March 31, 2014. As a result of the failure to make the November payment, the decrease in cash flow and the borrowers’ failure to pay real estate taxes, the Bank had both properties appraised. The appraisals were received in March 2014 and reflected an aggregate decrease in value of approximately \$500,000 as compared to their March 2009 appraised value. Based on the new appraised value, there was no known loss to the Bank. The Bank also performed an impairment analysis on each loan in March 2014 resulting in an aggregate impairment of \$41,000. In March 2014, the Bank and the co-borrowers agreed to a revised repayment plan to bring all payments, and real estate taxes due, but not paid during the period ended March 31, 2014, current by July 31, 2014. At June 30, 2014, an impairment analysis was performed. The impairment analysis showed that no further impairment was needed on either Loan M-1 or Loan M-2.

At December 31, 2014, the borrowers had successfully complied with the revised payment plan agreement from March 31, 2014 and both loans were current. Additionally, the real estate taxes due during the March 31, 2014 quarter were paid. However, at December 31, 2014, the real estate taxes that were due in July 2014 were not paid. Also, subsequent to the quarter ending December 31, 2014, due to cash flow issues caused by inclement weather during the month of October 2014, the payments due for October 2014 were not made. During the December 31, 2014 quarter, the real estate taxes that were due in July 2014 were still not paid, and the loan payments due for October, November, and December 2014 were not paid. The Bank met with the husband and wife co-borrowers during the December 31, 2014 quarter. The co-borrowers advised the Bank that they would not be able to make the past due payments and the past due real estate taxes because of the inclement weather during the quarter until the golf season opened in spring

2015. Because of these developments, the Bank performed another impairment analysis of these two loans. While the appraisals of the properties showed no need for an impairment, the Bank further analyzed the cash flow of the golf courses. After this analysis, the Bank determined that an impairment of \$466,000 was needed and a charge-off of \$466,000 was established for this loan relationship through a charge-off to the general allowance. During the quarter ended March 31, 2015, the Bank entered into discussions with the co-borrowers about another revised payment plan. As stated above, during the June 30, 2015 quarter, the Bank entered into a forbearance agreement with the borrower and co-borrowers. An impairment analysis was performed for the quarter ended June 30, 2015. The impairment analysis showed that no further impairment was needed on either Loan M-1 or M-2. However, for the quarter ended December 31, 2015, because there was still the partial escrow payment due for the October 2015 escrow payment, the Bank performed another impairment analysis. Even though the partial escrow payment was paid subsequent to the December 31, 2015 quarter, and the appraisals of the properties indicated no further impairment was needed, the Bank reviewed the observable market price of the properties and determined that an additional impairment was needed and a charge-off of \$250,000 was established for this relationship through a charge-off to the general allowance.

Loan Relationship N. At December 31, 2015 and June 30, 2015, Loan Relationship N was comprised of four loans having an aggregate carrying value of \$680,000. At December 31, 2015 and June 30, 2015, Loan N-1 had an aggregate carrying value of \$252,000. Loan N-1 is secured by a single family, non-owner occupied property located on 13 acres, and by another single family, non-owner occupied property on a .52 acre lot. At December 31, 2015 and June 30, 2015, Loan N-2 had an aggregate carrying value of \$135,000. Loan N-2 is secured by land, on which there is a 16 lot residential development. At December 31, 2015 and June 30, 2015, Loan N-3 had an aggregate carrying value of \$222,000. At December 31, 2015 and June 30, 2015, Loan N-4 had an aggregate carrying value of \$72,000. Loan N-3 and Loan N-4 are secured by a single family non-owner occupied property, located on 51 acres, with Loan N-3 being the first mortgage on this property and Loan N-4 being a home equity line of credit secured by a second mortgage on this property. The borrower of Loan N-1 is a corporate entity, each of whose principals, along with their spouses, have individually signed as a co-borrower. The borrower of Loan N-2 is a corporate entity, with one of the principals individually signed as a co-borrower, together with his wife and parents. The borrowers of Loans N-3 and N-4 are a husband and wife who are also co-borrowers on Loans N-1 and N-2. Loans N-1 and N-3 are included in the table in “Nonaccrual, one- to-four Family, Non-owner Occupied” Loans as of December 31, 2015 and June 30, 2015. Loan N-2 is included in the table in “Nonaccrual, Land loans” as of December 31, 2015 and June 30, 2015. Loan N-4 is included in the table in “Nonaccrual, Consumer loans” as of December 31, 2015 and June 30, 2015. In the “Credit Risk Profile by Internally Assigned Grade” table, Loans N-1 and N-3 are classified as “One-to-Four Family, Non-owner Occupied, Substandard” at December 31, 2015 and June 30, 2015. Loan N-2 is classified as “Land, Substandard” at December 31, 2015 and June 30, 2015. Loan N-4 is classified as “Consumer, Substandard” at December 31, 2015 and June 30, 2015. These loans were not performing in accordance with their original terms at December 31, 2015. A more detailed history of Loan Relationship N follows.

Loan N-1 originated in March 2009 to purchase a 13 acre tract of land on which there was a single family residence. This loan was secured by this property and an additional single family residence on a one acre lot. The house and one acre of the 13 acre tract, on which the house was located, was to be sold, with the remaining 12 acres utilized for residential development. The original appraised value of the house and 13 acres was \$283,000. The additional single family residence on a one acre tract was destroyed by fire in December 2013. Before its destruction, the appraised value of that collateral was \$105,000. A separate single-family residence on a .52 acre tract of land was substituted as collateral for the destroyed property. This replacement property was owned by one of the Loan N-1 principal borrowers and his father. The value of this replacement property was \$135,000 based on an appraisal dated February 2014. Because the loan became 90 days delinquent, the Bank reappraised all of the properties securing Loan N-1 in December 2014. The appraised value of all properties totaled \$352,500, compared to the original appraised aggregate value of \$418,000. The loan had a market rate of interest with monthly interest only payments and an original term of one year. The loan was renewed for an additional five years in 2010, with a maturity date of March 2015. Before the March 2015 maturity date, because of market conditions, the borrower was unable to sell the single family residence and one acre lot, and was also unable to develop the additional 12 acres for residential development. In the December 2014 quarter, the borrower was not able to make the monthly payments due to difficulties with other business ventures of the co-borrowers with which the Bank is not involved, and the loan became more than 90 days delinquent. The Bank is in regular contact with the borrower and co-borrowers of Loan N-1, and the borrower continues to try to sell the properties. However, in October 2015 a foreclosure action was filed due to the ongoing delinquency and continued nonpayment of this loan.

Loan N-2 originated in November 2012 to refinance two existing loans the Bank made that were secured by a 19 lot residential development. Proceeds from the sale of the lots were to be used to repay the loan. This property appraised for \$483,000 in 2012. During the previous two years, the borrower was able to sell two of the 19 lots. Because the loan went 90 days delinquent, the Bank obtained an updated appraisal of the remaining 17 lots in December 2014. The updated appraised value was \$300,000. Also, in the June 30, 2015 quarter, the borrower sold another lot and the Bank applied the net proceeds to the loan balance. Also, an updated appraisal on the remaining 16 lots was received in July 2015. The updated appraised value was \$274,000. This loan had a market rate of interest with monthly interest only payments. The original term of this loan was three years, with a maturity date of December 2015. Because of market conditions, the borrower was not able to sell the lots in a timely manner. In the December 2014 quarter, the borrower was not able to make the monthly payments due to other business ventures of the co-borrowers with which the Bank is not involved, and the loan became more than 90 days delinquent. The Bank is in regular contact with the borrower and co-borrowers of Loan N-2 and the borrower continues to try to sell the properties. However, in October 2015 a foreclosure action was filed due to the ongoing delinquency and continued nonpayment of this loan.

Loan N-3 and Loan N-4 were originated in April 2007 and June 2008, respectively. The purpose of Loan N-3 was to refinance and purchase an additional 33 acres of adjoining property. Loan N-4, an equity line of credit, was used to buy a single family rental property. Loans N-3 and N-4 are secured by the same property, a single family residence and 50.57 acres of land. This property appraised for \$405,000 in March 2007 and \$406,000 in February 2008. Because the loan went 90 days delinquent in the December 2014 quarter, the Bank updated the appraisal on this property. The updated appraised value was \$378,000 compared to the \$406,000 appraised value in February 2008. As stated previously, in the December 2014 quarter, the borrowers were not able to make the monthly payments, mainly because of other business ventures of the borrowers with which the Bank is not involved. However, in October 2015 a foreclosure action was filed due to the ongoing delinquency and continued nonpayment of this loan.

An impairment analysis for the December 31, 2015 quarter showed that no impairment was needed on Loans N-1, N-2, N-3, or N-4.

Loan Relationship O. At December 31, 2015 and June 30, 2015, this Loan Relationship consisted of three loans having an aggregate carrying value of \$1.6 million. Two of the loans, a Note A loan (Loan O-1) and a Note B loan, had an aggregate carrying value of \$729,000 and \$734,000, respectively. Loan O-1 is secured by a first lien on a nonresidential retail strip center. The borrower is a limited liability company and the two co-borrowers are the principals of the limited liability company. At December 31, 2015 and June 30, 2015, the Loan O-1 is included in the table as "Accruing Restructured Loans", and classified as "Nonresidential Real Estate, Substandard" in the "Credit Risk Profile by Internally Assigned Grade" table. As of September 30, 2011, Loan O-1 was put on accrual because of its sufficient payment history, but was still considered a TDR and thus continued to be classified as substandard. Loan O-1 was performing in accordance with its restructured terms. At December 31, 2015 and June 30 2015, the balance of Loan O-2 was \$895,000 and \$911,000, respectively. Loan O-2 is secured by a nonresidential, eight bay, retail strip center. Loan O-2 is not included in the table as "Accruing Restructured Loans" at December 31, 2015 and June 30, 2015. At December 31, 2015 and June 30, 2015, Loan O-2 was classified as "Nonresidential Real Estate, Watch" in the "Credit Risk Profile by Internally Assigned Grade" table. This loan was originated in December 2004, for the purchase of the land (which was an Other Real Estate Owned property of the Bank) and the construction of the eight bay, retail

strip center. The original loan amount was \$1,080,000 at a market rate of interest, based on a 3/3 ARM, for a 30 year term. In August 2013, the original loan was refinanced for \$965,000, at a market rate of interest, based on a 5/1 ARM, for a 22 year term. The borrower, for the original loan and the refinanced loan, is a limited liability company and the four co-borrowers are the principals of the limited liability company. Three of the spouses of the four co-borrowers are also signed on the loan. On both the original loan and the refinanced loan, all seven co-borrowers were and are signed. Two of the co-borrowers of the loan O-2 are principals of the limited liability company for the Loan O-1 described above. Loan O-2, both the original loan and the refinanced loan, did and has performed in accordance with its terms. A more detailed history of Note A loan (Loan O-1) and the Note B loan follows.

In June 2006, Loan O-1 was originated and comprised of one loan for \$1.1 million. In the June 2010 quarter, the co-borrowers approached the Bank and said that the anchor tenant was vacating the retail strip center. Independent appraisals were ordered and received, and reflected the value of the property had decreased to a value of \$900,000 from the value of \$1.4 million in June 2006. A specific valuation allowance was established for \$360,000 to reduce the net carrying value down to \$720,000, or 80% loan to value. In the March 2011 quarter, the co-borrowers again approached the Bank and stated that even though they had been able to replace the anchor tenant, the lease amount that they were receiving was 20% less than the previous tenant. A new appraisal was ordered and received in the March 2011 quarter, and reflected the value of the property had decreased to a value of \$828,000 from the value of \$900,000 in June 2010. The Bank reviewed the present value of future cash flow of this property and the one loan was restructured using the Note A/B split note strategy. Based on the present value of future cash flow of the property, the Note A loan (Loan O-1) was for \$810,000, with a below market rate of interest of 2%, for a 30 year term, and a two year balloon payment. The carrying value of the A loan (Loan O-1) continued on nonaccrual and a classification of substandard, but was also reported as a TDR. The Note B loan was for \$360,000 (inclusive of the \$360,000 specific valuation allowance established in June 2010) and was charged-off. In September 2011, because there were six consecutive payments made and the cash flow of the property from updated financial information indicated that the debt service coverage ratio was adequate, the loan was placed on accrual. However, because of the below market interest rate, an impairment of \$28,750 was established. During the March 2013 quarter, the balloon payment from the March 2011 loan became due. As a result of the upcoming balloon payment, the Bank ordered and received a new appraisal on the property. The new appraisal dated March 2013 showed a value of \$825,000, a decrease of \$3,000 from the value of \$828,000 in the March 2011 quarter. The Bank reviewed the present value of the future cash flow of this property from updated financial information of the borrower and co-borrowers. After this review, the Bank extended the two loans, again using the Note A/B split note strategy, with both loans having three year balloon payments. The loan amount for the A loan (Loan O-1) was decreased to \$761,000. The Note A loan (Loan O-1) was renewed at a market rate of interest of 5.5%, for a 30 year term, and a three year balloon payment. This loan was placed on accrual (because of its sufficient payment history). However, the classification remained substandard and the loan was still reported as TDR. Also, because this loan now had a market rate of interest, the impairment amount of \$28,750 was removed. The Note B loan was for \$376,000 (inclusive of the \$366,000 charge-off from March 2011) and was charged-off.

Loan Relationship P. At December 31, 2015 and June 30, 2015, this Loan Relationship was comprised of two loans having an aggregate carrying value of \$483,000 and \$2.5 million, respectively. At December 31, 2015 and June 30, 2015, Loan P-1 had an aggregate carrying value of \$483,000 and \$2.0 million, respectively. Loan P-1 is secured by a first mortgage on an 18 hole golf course, including a club house and a reception center, located in Dearborn County, Indiana. Loan P-1 was additionally secured by eight 4-Family units located in Cincinnati, Ohio. The Bank had a first mortgage on these eight 4-Family units as described below for Loan P-2. The borrower for Loan P-1 is a limited liability company and the two co-borrowers are the principals of the limited liability company. At December 31, 2015 and June 30, 2015, Loan P-2 has an aggregate carrying value of \$0 and \$478,000, respectively. Loan P-2 was secured by a first mortgage on eight 4-Family units located in Cincinnati, Ohio. The borrower was a limited liability company and the one co-borrower was the principal of the limited liability company. This co-borrower is also one of the two co-borrowers for Loan P-1. At December 31, 2015 and June 30, 2015, Loan P-1 is included in the table in "Accruing Restructured Loans", and was classified as "Nonresidential real estate, Substandard" in the "Credit Risk Profile by Internally Assigned Grade" table. At December 31, 2015 and June 30, 2015, Loan P-2 is not included in the Nonaccrual table and was classified as "Multi-Family, Pass" in the "Credit Risk Profile by Internally Assigned Grade" table. During the quarter ending December 31, 2015, the one co-borrower who is a co-borrower for Loan P-1 and P-2, refinanced Loan P-2 with another bank for approximately \$1.7 million. After paying off Loan P-2,

approximately \$1.2 million was applied to the principal balance of Loan P-1. Additionally, the co-borrower borrowed \$200,000 from a private investor and also applied this \$200,000 to the principal balance of Loan P-1. Due to these reductions in the principal balance of Loan P-1, the Bank discounted the principal balance of Loan P-1 by \$75,000. At December 31, 2015, Loan P-1 was performing in accordance to its restructured terms, and Loan P-2, as stated above, was paid in full. A more detailed history of only Loan P-1 follows because Loan P-2 is now paid in full with no loss to the Bank.

In December 2009, Loan P-1 consisted of two loans. The first loan was for \$1.6 million and was used to purchase the 18 hole golf course, club house, and reception center, discussed above, from Real Estate Management Holdings, LLC, a subsidiary of the Bank. The second loan was for \$150,000, a line of credit to be used for working capital for the golf course. The borrower for both loans was a limited liability company and the two co-borrowers were the principals of this limited liability company, that were discussed above. The co-borrowers had been managing the golf course for the subsidiary of the Bank since it had been acquired at a foreclosure sale by the Bank in June 2008. The co-borrowers also owned and operated another golf course in Cincinnati, Ohio. The first loan and second loan were secured by the golf course, club house, reception center, equipment, furniture, fixtures, etc. Both loans were also secured by a second mortgage on ten 4-Family units. In December 2009, the golf course appraised for \$1.9 million. In December 2009, the ten 4-Family units appraised for \$2.8 million, with a first mortgage of \$1.2 million. The first loan had a below market interest rate, and a \$200,000 impairment reserve was established. The payments were interest only and there was a three year balloon payment. This loan was placed on accrual because the cash flow indicated all payments could be made. However, because of the below market interest rate, this loan was considered a TDR and classified as substandard. The second loan had the same security as the first loan, had a market rate of interest that adjusted monthly, interest only payments, and a three year balloon payment. This loan was placed on accrual, not considered a TDR, but classified as substandard. In March 2011, the co-borrowers approached the Bank about borrowing an additional \$200,000 for improvements to the golf course. The security of this loan was the same as the security for the two loans described in this paragraph. This loan had a below market interest rate, interest only payments, and a two year balloon payment. This loan was placed on nonaccrual, considered a TDR, and classified as substandard. During the December 2012 quarter, the balloon payments from the two loans made in 2009 and the one loan made in April 2011 became due and the Bank ordered new appraisals. The appraisal on the golf course decreased to \$1.6 million as compared to the \$1.9 million appraisal in November 2009. As far as the ten 4-Family units, in June 2010, two of the ten 4-Family units were sold for \$700,000, with \$620,000 being paid down on the principal balance of Loan P-2, leaving a loan balance of \$523,000. Therefore, the remaining eight 4-Family units appraised for \$2.3 million in the December 2012 quarter. The Bank also reviewed the cash flow from updated financials received from the borrower. After this review and based on the values of the properties securing these loans, the Bank combined the three loans (the \$1.6 million loan, the \$150,000 loan, and the \$200,000 loan) in to one loan of \$2.0 million. This new loan had a below market interest rate and a \$120,000 impairment reserve was established. The payments were interest only and there was a three year balloon payment. This loan was placed on accrual (because of its sufficient payment history), considered a TDR, and classified as substandard. The balloon payment for Loan P-1 came due in December 2015. In numerous discussions with the co-borrowers leading up to the December 2015 balloon payment date, the Bank stated that the loan would not be renewed under the present interest rate and terms. Therefore, the co-borrowers took the actions described in the first paragraph of this narrative. The co-borrowers hope to refinance the remaining carrying value of \$483,000 by March 31, 2016. If this is not accomplished, the Bank will take further legal action including the possibility of foreclosure proceedings.

The following table summarizes all Note A/B format loans at December 31, 2015:

(Dollars in thousands)	Loan Balances			Number of Loans	
	Note A	Note B	Total	Note A	Note B
One- to four-family residential real estate	\$91	\$21	\$112	1	1
Nonresidential real estate	1,810	2,778	4,588	3	3
Multi-family residential real estate	1,841	1,335	3,176	3	3

Total (1)	\$3,742	\$4,134	\$7,876	7	7
-----------	---------	---------	---------	---	---

(1) Included in this total are an aggregate of \$2.6 million comprised of Note A loans and \$3.6 million comprised of Note B loans that are included in the discussion of Loan Relationships B, F, H and K.

The following table provides information with respect to all of our loans that are classified as troubled debt restructurings. For additional information regarding troubled debt restructurings on nonaccrual status, see the table of nonperforming assets above.

(in thousands)	At December 31, 2015						
	Loan Status		Total Unpaid Principal Balance	Related Allowance	Recorded Investment	Number of Loans	Average Recorded Investment
	Accrual	Nonaccrual					
One- to four-family residential real estate	\$ 1,627	\$ 337	\$ 1,964	\$ —	\$ 1,964	20	\$ 2,063
Multi-family residential real estate	719	—	719	—	719	4	723
Nonresidential real estate	1,212	2,050	3,262	—	3,262	8	4,448
Total	\$3,558	\$ 2,387	\$ 5,945	\$ —	\$ 5,945	32	\$ 7,234

The following table is a roll forward of activity in our TDRs:

(Dollar amounts in thousands)	Three Months Ended December 31, 2015		Six Months Ended December 31, 2015	
	Recorded Investment	Number of Loans	Recorded Investment	Number of Loans
Beginning balance	\$ 7,729	32	\$ 7,854	32
Additions to TDR	-	-	-	-
Charge-offs	(325)	-	(325)	-
Removal of TDRs	-	-	-	-
Impairment Reversal	120	-	120	-
Payments	(1,579)	-	(1,704)	-
Ending balance	\$ 5,945	32	\$ 5,945	32

Loans that were included in TDRs at December 31, 2015 and June 30, 2015 were generally given concessions of interest rate reductions of between 25 and 300 basis points, and/or structured as interest only payment loans for periods of one to three years. Fifteen of these loans, with an aggregate carrying value of \$4.2 million at December 31, 2015, also have balloon payments due at the end of their lowered interest rate period. At December 31, 2015, there were 23 loans with an aggregate carrying value of \$5.3 million with required principal and interest payments and two loans with an aggregate carrying value of \$658,000 with required interest only payments. The remaining seven loans that were restructured into the Note A/B split note format, represent the B notes which had zero carrying value at December 31, 2015 and are due at maturity. At June 30, 2015, there were 23 loans with an aggregate carrying value of \$5.8 million with required principal and interest payments and two loans with an aggregate carrying value of \$2.2 million with required interest only payments. The remaining seven loans that were restructured into the Note A/B split note format, represent the B notes which had zero carrying value at June 30, 2015 and are due at maturity.

The following table shows the aggregate amounts of our classified loans at the dates indicated.

Liquidity Management. Liquidity is the ability to meet current and future financial obligations of a short-term nature. These obligations consist of new loans, investment security purchases, deposit outflows, repayment of borrowings and routine operating expense payments. Our primary sources of funds consist of loan repayments, maturities and sales of investment securities, deposit inflows and borrowings from the Federal Home Loan Bank of Indianapolis. While maturities and scheduled loan payments as well as cash flows from investment securities are predictable sources of funds, deposit flows and loan prepayments are greatly influenced by general interest rates, economic conditions and competition, among other factors.

We regularly adjust our investments in liquid assets based upon our assessment of: (1) expected loan demand; (2) expected deposit flows, in particular municipal deposit flows; (3) yields available on interest-earning deposits and securities; and (4) the objectives of our asset/liability management policy.

Our most liquid assets are cash and cash equivalents. The levels of these assets depend on our operating, financing, lending and investing activities during any given period. Cash and cash equivalents totaled \$23.5 million at December 31, 2015 and \$18.5 million at June 30, 2015. Securities classified as available-for-sale whose market value exceeds our cost, which provide additional sources of liquidity, totaled \$48.2 million at December 31, 2015. Total securities classified as available-for-sale were \$145.8 million at December 31, 2015. In addition, at December 31, 2015, we had the ability to borrow a total of approximately \$60.4 million from the Federal Home Loan Bank of Indianapolis.

At December 31, 2015, we had \$43.3 million in loan commitments outstanding, consisting of \$6.9 million in mortgage loan commitments, \$26.0 million in unused home equity lines of credit, \$4.8 million in commercial lines of credit and \$5.6 million in other loan commitments. Certificates of deposit due within one year of December 31, 2015 totaled \$79.8 million. This represented 54.3% of certificates of deposit at December 31, 2015. We believe that the large percentage of certificates of deposit that mature within one year reflects customers' hesitancy to invest their funds for longer periods in the current low interest rate environment. If these maturing deposits do not remain with us, we will be required to seek other sources of funding, including other certificates of deposit and borrowings. Depending on market conditions, we may be required to pay higher rates on such deposits or other borrowings than we currently pay on the certificates of deposit due on or before December 31, 2015. However, based on past experience, we believe that a significant portion of our certificates of deposit will remain with us. We have the ability to attract and retain deposits by adjusting the interest rates offered.

Our primary investing activities are the origination and purchase of loans and the purchase of investment securities. Our primary financing activities consist of activity in deposit accounts and Federal Home Loan Bank advances. Deposit flows are affected by the overall market level of interest rates, the interest rates and products offered by us and our local competitors, among other factors. We generally manage the pricing of our deposits to be competitive and to increase core deposit relationships. On occasion, we offer promotional rates on certain deposit products to attract deposits.

Capital Management. United Community Bank is subject to various regulatory capital requirements administered by the OCC, including a risk-based capital measure. The risk-based capital guidelines include both a definition of capital and a framework for calculating risk-weighted assets by assigning balance sheet assets and off-balance sheet items to broad risk categories. At December 31, 2015, we exceeded all of our regulatory capital requirements and we are considered “well capitalized” under regulatory guidelines. See “*Regulation and Supervision—Regulation of Federal Savings Associations—Capital Requirements*,” and Note 15 to the Consolidated Financial Statements included in Item 8 to the Annual Report on Form 10-K filed with the Securities and Exchange Commission on September 28, 2015.

The following table summarizes the Bank’s capital amounts and the ratios required at December 31, 2015:

	Actual		For capital adequacy purposes		To be well capitalized under prompt corrective action provisions	
	Amount	Ratio	Amount	Ratio	Amount	Ratio
December 31, 2015 (unaudited)	(in thousands)					
Common equity tier 1 risk-based capital	\$58,464	21.42 %	\$ 12,282	4.5 %	\$ 17,741	6.5 %
Tier 1 risk-based capital	58,454	21.42	16,376	6.0	21,834	8.0
Total risk-based capital	61,898	22.68	21,834	8.0	27,293	10.0
Tier 1 leverage	58,464	11.40	20,514	4.0	25,643	5.0

Off-Balance Sheet Arrangements. In the normal course of operations, we engage in a variety of financial transactions that, in accordance with U.S. generally accepted accounting principles, are not recorded in our financial statements. These transactions involve, to varying degrees, elements of credit, interest rate and liquidity risk. Such transactions are used primarily to manage customers’ requests for funding and take the form of loan commitments, letters of credit and lines of credit. We currently have no plans to engage in hedging activities in the future.

For the three and six months ended December 31, 2015, we engaged in no off-balance sheet transactions reasonably likely to have a material effect on our financial condition, results of operations or cash flows.

Item 3. Quantitative and Qualitative Disclosures about Market Risk

For a discussion of the Company’s asset and liability management policies as well as the potential impact of interest rate changes upon the market value of the Company’s portfolio equity, see “Management’s Discussion and Analysis of Financial Condition and Results of Operations” in the Company’s Annual Report on Form 10-K, filed with the

Securities and Exchange Commission on September 28, 2015. The main components of market risk for the Company are interest rate risk and liquidity risk. The Company manages interest rate risk and liquidity risk by establishing and monitoring the volume, maturities, pricing and mix of assets and funding sources with the objective of managing assets and funding sources to provide results that are consistent with liquidity, growth, risk limits and profitability goals. Model simulation is used to measure the net interest margin and earnings volatility under both increasing and decreasing interest rate scenarios. These simulations are also used to measure earnings volatility under parallel and non-parallel shifts in the yield curve assuming both immediate and sustained rate shocks as well as ramped changes to interest rates over one year and two year time horizons. In addition to simulating the net interest margin and earnings under various interest rate scenarios, the Company uses an economic value of equity analysis prepared by a consulting firm to review the level of long term interest rate risk. This analysis measures long term interest rate risk by computing changes in economic value of assets, liabilities and off-balance sheet items in the event of a range of assumed changes in market interest rates. Economic value of equity represents an estimation of the market value of the Bank's equity and is calculated by subtracting the economic value of liabilities from the economic value of assets, with adjustments made for off-balance sheet items. These analyses assess the risk of loss in economic value the equity in the event of a range of market interest rate scenarios including both parallel and non-parallel shifts in the yield curve assuming both immediate and sustained rate shocks as well as ramped changes to interest rates. The model does not provide for the effect of any steps that the Bank might take to counter the effect of interest rate movements. Because of the low level of market interest rates at this time, these analyses are not performed for decreases of more than 100 basis points.

The following table presents the change in our net economic value of equity at September 30, 2015, the most recently completed date, that would occur in the event of an immediate change in interest rates, with no effect given to any steps that we might take to counteract that change.

Basis Point (“bp”)	Economic Value of Equity (Dollars in Thousands)			Economic Value of Equity as % of Economic Value of Total Assets		
	Amount	Change	% Change		Economic Value Ratio	
Change in Rates						
400	\$73,144	\$(9,494)	(11.49))%	15.67	%
300	80,213	(2,425)	(2.93))%	16.69	%
200	82,471	(167)	(0.20))%	16.68	%
100	83,631	993	1.20	%	16.44	%
0	82,638	—	—	%	15.77	%
(100)	80,322	(2,316)	(2.80))%	14.93	%

The model uses various assumptions in assessing interest rate risk. The most critical assumptions in the model relate to deposit decay rates, deposit beta factors, loan prepayment speeds, reinvestment rates, and market interest rates, among others. As with any method of measuring interest rate risk involving forecasting, certain shortcomings are inherent in the calculations. Borrower and depositor behavior in the future is unknown. Historical data has been compiled, where available, to allow the Company to see the impact of customer behavior in prior interest rate cycles. However, the future behavior is inherently unknown. For example, although certain assets and liabilities may have similar maturities or repricing dates, they may react in different degrees to changes in market interest rates. Also, the interest rates on certain types of assets and liabilities may fluctuate in advance of changes in market interest rates, while interest rates on other types may lag behind changes in market rates. Additionally, certain assets, such as adjustable-rate mortgage loans, have features that restrict changes in interest rates on a short-term basis and over the life of the asset. Further, in the event of a change in interest rates, expected rates of prepayments on loans and early withdrawals from certificates could deviate significantly from those assumed in calculating the table. Prepayment rates can have a significant impact on interest income. Because of the large percentage of loans and mortgage-backed securities held by the Bank, increasing or decreasing interest rates have a significant impact on the prepayment speeds of our earning assets that in turn could affect the rate sensitivity position. When market interest rates increase, prepayments tend to slow. When market interest rates decrease, prepayments tend to rise. While the Company believes the assumptions used in the model to be reasonable, there can be no assurance that assumed customer behavior will approximate actual behavior in the future.

Item 4. Controls and Procedures

The Company's management, including the Company's principal executive officer and principal financial officer, have evaluated the effectiveness of the Company's "disclosure controls and procedures," as such term is defined in Rule 13a-15(e) promulgated under the Securities Exchange Act of 1934, as amended, (the "Exchange Act"). Based upon their evaluation, the principal executive officer and principal financial officer concluded that, as of the end of the period covered by this report, the Company's disclosure controls and procedures were effective for the purpose of ensuring that the information required to be disclosed in the reports that the Company files or submits under the Exchange Act with the Securities and Exchange Commission (the "SEC") (1) is recorded, processed, summarized and reported within the time periods specified in the SEC's rules and forms, and (2) is accumulated and communicated to the Company's management, including its principal executive and principal financial officers, as appropriate to allow timely decisions regarding required disclosure. During the quarterly period ended December 31, 2015, there were no changes in the Company's internal control over financial reporting which materially affected, or are reasonably likely to materially affect, the Company's internal controls over financial reporting.

PART II. OTHER INFORMATION**Item 1. Legal Proceedings**

Periodically, there have been various claims and lawsuits against us, such as claims to enforce liens and contracts, condemnation proceedings on properties in which we hold security interests, claims involving the making and servicing of real property loans and other issues incident to our business. We are not party to any pending legal proceedings that we believe would have a material adverse effect on our financial condition, results of operations or cash flows.

Item 1A. Risk Factors

In addition to the risk factors and other information set forth in this report, you should carefully consider the factors discussed in Part I, “Item 1A. Risk Factors” in the Company’s Annual Report on Form 10-K for the year ended June 30, 2015, which could materially affect our business, financial condition or future results. The risks described in the Company’s Annual Report on Form 10-K are not the only risks that we face. Additional risks and uncertainties not currently known to us or that we currently deem to be immaterial also may materially affect our business, financial condition and/or operating results.

Item 2. Unregistered Sales of Equity Securities and Use of Proceeds

During the quarter ended December 31, 2015, repurchases of the Company’s common stock were as follows:

	Total number of shares purchased	Average price paid per share	Total number of shares purchased as part of publicly announced plans or programs	Maximum number of shares that may yet be purchased under the plans or programs
October 1 to October 31, 2015	10,400	\$ 14.686	10,400	120,214
November 1 to November 30, 2015	318,756	\$ 15.000	120,214	—
December 1 to December 31, 2015	—	—	—	—
Total	329,156	\$ 14.990	130,614
