Sutherland Asbill & Brennan LLP 700 Sixth Street, NW, Suite 700 Washington, DC 20001 (202) 383-0100

COPIES TO:

Approximate date of proposed public offering: From time to time after the effective date of this Registration Statement.

If any securities being registered on this form will be offered on a delayed or continuous basis in reliance on Rule 415 under the Securities Act of 1933, other than securities offered in connection with a dividend reinvestment plan, check the following box. x

It is proposed that this filing will become effective (check appropriate box):

x when declared effective pursuant to section 8(c).

CALCULATION OF REGISTRATION FEE UNDER THE **SECURITIES ACT OF 1933**

Title of Securities Being Registered

Common Stock, \$0.01 par value per share⁽²⁾⁽³⁾ Preferred Stock, \$0.01 par value per share⁽²⁾ Warrants⁽²⁾ Subscription Rights⁽³⁾ Debt Securities⁽⁴⁾

Proposed Maximum Amount of Aggregate Offering Price⁽¹⁾

Registration $Fee^{(1)}$

- Estimated pursuant to Rule 457(o) under the Securities Act of 1933 solely for the purpose of determining the registration fee. The proposed maximum offering price per security will be determined, from time to time, by the Registrant in connection with the sale by the Registrant of the securities registered under this Registration Statement.
 - Subject to Note 6 below, there is being registered hereunder an indeterminate number of shares of common stock,
- (2) preferred stock, warrants, or subscription rights to purchase shares of common stock as may be sold, from time to time, or debt securities.
 - Includes such indeterminate number of shares of common stock as may be issued upon, from time to time,
- (3) conversion or exchange of other securities registered hereunder, to the extent any such securities are, by their terms, convertible or exchangeable for common stock.
- Subject to Note 6 below, there is being registered hereunder an indeterminate number of debt securities as may be
- (4) sold, from time to time. If any debt securities are issued at an original issue discount, then the offering price shall be in such greater principal amount as shall result in an aggregate price to investors not to exceed \$200.0 million.
- Subject to Note 6 below, there is being registered hereunder an indeterminate number of warrants as may be sold, from time to time.
- (6) In no event shall the aggregate offering price of all securities issued from time to time pursuant to the registration statement exceed \$200.0 million.
 - (7) Previously paid.

The Registrant hereby amends this Registration Statement on such date or dates as may be necessary to delay its effective date until the Registrant shall file a further amendment which specifically states that this Registration Statement shall thereafter become effective in accordance with Section 8(a) of the Securities Act of 1933 or until the Registration Statement shall become effective on such date as the Securities and Exchange Commission, acting pursuant to said Section 8(a), may determine.

TABLE OF CONTENTS

The information in this prospectus is not complete and may be changed. We may not sell these securities until the registration statement filed with the Securities and Exchange Commission is effective. This prospectus is not an offer to sell these securities and is not soliciting an offer to buy these securities in any jurisdiction where the offer or sale is not permitted.

SUBJECT TO COMPLETION, DATED June 30, 2016

\$200,000,000

OFS CAPITAL CORPORATION

Common Stock Preferred Stock Warrants Subscription Rights Debt Securities

We are an externally managed, non-diversified, closed-end management investment company that has elected to be treated as a business development company under the Investment Company Act of 1940, or the 1940 Act. Our investment objective is to provide our shareholders with both current income and capital appreciation primarily through debt investments and, to a lesser extent, equity investments.

We may offer, from time to time, in one or more offerings or series, up to \$200.0 million in shares of our common stock, par value \$0.01 per share, preferred stock, par value \$0.01 per share, warrants representing rights to purchase shares of our common stock, preferred stock or debt securities, subscription rights or debt securities which we refer to, collectively, as the securities. We may sell our securities through underwriters or dealers, at-the-market to or through a market maker into an existing trading market or otherwise directly to one or more purchasers or through agents or through a combination of methods of sale. The identities of such underwriters, dealers, market makers or agents, as the case may be, will be described in one or more supplements to this prospectus. The securities may be offered at prices and on terms to be described in one or more supplements to this prospectus.

The securities may be offered directly to one or more purchasers, or through agents designated from time to time by us, or to or through underwriters or dealers. The prospectus supplement relating to an offering will identify any agents or underwriters involved in the sale of shares of our securities, and will disclose any applicable purchase price, fee, commission or discount arrangement between us and our agents or underwriters or among our underwriters or the basis upon which such amount may be calculated. See Plan of Distribution. We may not sell any securities through agents, underwriters or dealers without delivery of this prospectus and a prospectus supplement describing the method and terms of the offering of the securities.

Substantially all of the debt securities in which we invest are below investment grade debt securities and are often referred to as high yield or junk securities. Exposure to below investment grade securities involves certain risk, and those securities are viewed as having predominately speculative characteristics with respect to the issuer s capacity to pay interest and repay principal. A material amount of our debt investments contain floating interest rate provisions that may make it more difficult for the borrowers to make debt repayments. Further, our debt investments generally will not pay down principal during their term which could result in a substantial loss to us if the portfolio company is unable to refinance or repay the debt at maturity.

Our common stock is traded on the NASDAQ Global Select Market under the symbol OFS. On June 28, 2016, the last reported sales price on the NASDAQ Global Select Market for our common stock was \$12.83 per share. We are required to determine the net asset value per share of our common stock on a quarterly basis. Our net asset value per share of our common stock as of March 31, 2016 was \$14.65.

We qualify as an emerging growth company, as that term is used in the Jumpstart Our Business Startups Act of 2012 (the JOBS Act). An emerging growth company may take advantage of specified reduced reporting and other burdens that are otherwise applicable generally to public companies. However, we are choosing to opt out of such extended transition period, and as a result, we will comply with new or revised accounting standards on the relevant dates on which adoption of such standards is required for non-emerging growth companies. Our decision to opt out of the extended transition period for complying with new or revised accounting standards is irrevocable.

Please read this prospectus before investing and keep it for future reference. It contains important information about us that a prospective investor ought to know before investing in our securities. We file annual, quarterly and current reports, proxy statements and other information about us with the Securities and Exchange Commission. The information is available free of charge by contacting Investor Relations of OFS Capital Corporation, 10 S. Wacker Drive, Suite 2500, Chicago, IL 60606, or by calling us at (847) 734-2000 or on our website at www.ofscapital.com. The Securities and Exchange Commission, or the SEC, maintains a website at www.sec.gov where such information is available without charge. Information contained on our website is not incorporated by reference into this prospectus, and you should not consider information contained on our website to be part of this prospectus.

Investing in our securities involves a high degree of risk, including credit risk and the risk of the use of leverage. Before buying any of our securities, you should read the discussion of the material risks of investing in our securities in Risk Factors beginning on page 16 of this prospectus.

Neither the SEC nor any state securities commission has approved or disapproved of these securities, or determined if this prospectus is truthful or complete. Any representation to the contrary is a criminal offense.

This prospectus may not be used to consummate sales of securities unless accompanied by a prospectus supplement.

TABLE OF CONTENTS 7

ABOUT THIS PROSPECTUS

This prospectus and any accompanying prospectus supplement is part of a registration statement that we have filed with the Securities and Exchange Commission using the shelf registration process. Under the shelf registration process, which constitutes a delayed offering in reliance on Rule 415 under the Securities Act of 1933, as amended, we may offer, from time to time, up to \$200.0 million of shares of our common stock, preferred stock, warrants representing rights to purchase shares of our common stock, preferred stock or debt securities, subscription rights, or debt securities on the terms to be determined at the time of the offering. We may sell our securities through underwriters or dealers, at-the-market to or through a market maker, into an existing trading market or otherwise directly to one or more purchasers or through agents or through a combination of methods of sale. The identities of such underwriters, dealers, market makers or agents, as the case may be, will be described in one or more supplements to this prospectus. Our securities may be offered at prices and on terms described in one or more supplements to this prospectus. This prospectus and any accompanying prospectus supplement provides you with a general description of our securities that we may offer. Each time we use this prospectus to offer our securities, we will provide a prospectus supplement that will contain specific information about the terms of that offering. The prospectus supplement may also add, update or change information contained in this prospectus. Please carefully read this prospectus and any such supplements together with the additional information described under Available Information and Risk Factors sections before you make an investment decision.

A prospectus supplement may also add to, update or change information contained in this prospectus.

ii

PROSPECTUS SUMMARY

This summary highlights some of the information in this prospectus. It is not complete and may not contain all of the information that you may want to consider before investing in our securities. Throughout this prospectus, we refer to OFS Capital Corporation and its consolidated subsidiaries as the Company, we, us or our; OFS Capital Management, LLC as OFS Advisor or the Advisor; and OFS Capital Services, LLC as OFS Services or the Administrator.

OFS Capital Corporation

We are an externally managed, closed-end, non-diversified management investment company. Our investment objective is to provide our shareholders with both current income and capital appreciation primarily through debt investments and, to a lesser extent, equity investments. Our investment strategy focuses primarily on investments in middle-market companies in the United States. We use the term middle-market to refer to companies that may exhibit one or more of the following characteristics: number of employees less than 2,000; revenues between \$15 million and \$300 million; annual earnings before interest, taxes, depreciation and amortization, or EBITDA, between \$3 million and \$50 million; generally, private companies owned by private equity firms or owners/operators; and enterprise value between \$10 million and \$500 million. For additional information about how we define the middle-market, see The Company Investment Criteria/Guidelines.

As of March 31, 2016, our investment portfolio consisted of outstanding loans of approximately \$218.3 million in aggregate principal amount in 35 portfolio companies and equity investments of approximately \$32.5 million, at fair value. As of March 31, 2016, 61% of our investment portfolio was comprised of senior secured loans, 26% of subordinated loans and 13% of equity investments, at fair value.

While our investment strategy focuses primarily on middle-market companies in the United States, including senior secured loans, which includes first-lien, second-lien and unitranche loans as well as subordinated loans and, to a lesser extent, warrants and other equity securities, we also may invest up to 30% of our portfolio in opportunistic investments of non-eligible portfolio companies. Specifically, as part of this 30% basket, we may consider investments in investment funds that are operating pursuant to certain exceptions to the 1940 Act and in advisers to similar investment funds, as well as in debt of middle-market companies located outside of the United States and debt and equity of public companies that do not meet the definition of eligible portfolio companies because their market capitalization of publicly traded equity securities exceeds the levels provided for in the 1940 Act.

Our investment strategy includes OFS SBIC I LP (SBIC I LP), which received a license under the U.S. Small Business Administration (SBA) Small Business Investment Company program in May 2012. The SBIC license allows SBIC I LP to receive SBA-guaranteed debenture funding, subject to the issuance of a leverage commitment by the SBA and other customary procedures. SBA leverage funding is subject to SBIC I LP s payment of certain fees to the SBA, and the ability of SBIC I LP to draw on the leverage commitment is subject to its compliance with SBA regulations and policies, including an audit by the SBA. For additional information regarding the regulation of SBIC I LP, see Regulation Small Business Investment Company Regulations.

In January 2015, we filed an application with the SBA for a second SBIC license, which, if approved, would provide up to \$75.0 million in additional SBA debentures for the funding of our future investments upon our contribution of at least \$37.5 million in additional regulatory capital and subject to the issuance of a leverage commitment by the SBA and other customary procedures. There can be no assurance as to whether or when this application will be approved by

On a stand-alone basis, SBIC I LP held approximately \$249.6 million and \$245.1 million in assets at March 31, 2016 and December 31, 2015, respectively, which accounted for approximately 85% and 83% of our total consolidated assets at March 31, 2016 and December 31, 2015, respectively.

Our investment activities are managed by OFS Capital Management, LLC (OFS Advisor), and supervised by our board of directors, a majority of whom are independent of us, OFS Advisor and its affiliates. Under the investment advisory agreement between us and OFS Advisor (the Investment Advisory Agreement), we have agreed to pay OFS Advisor an annual base management fee based on the average

value of our total assets (other than cash and cash equivalents but including assets purchased with borrowed amounts and including assets owned by any consolidated entity) as well as an incentive fee based on our investment performance. We have elected to exclude from the base management fee calculation any base management fee that would be owed in respect of the intangible asset and goodwill resulting from our acquisitions of the remaining ownership interests in SBIC I LP and SBIC I GP, LLC (SBIC I GP) on December 4, 2013.

We have also entered into an administration agreement (Administration Agreement) with OFS Capital Services, LLC (OFS Services). Under our Administration Agreement, we have agreed to reimburse OFS Services for our allocable portion (subject to the review and approval of our independent directors) of overhead and other expenses incurred by OFS Services in performing its obligations under the Administration Agreement.

As a business development company (BDC), we must not acquire any assets other than qualifying assets specified in the 1940 Act unless, at the time the acquisition is made, at least 70% of our assets, as defined by the 1940 Act, are qualifying assets (with certain limited exceptions). Qualifying assets include investments in eligible portfolio companies. Under the relevant Securities and Exchange Commission (SEC) rules, the term eligible portfolio company includes all private companies, companies whose securities are not listed on a national securities exchange, and certain public companies that have listed their securities on a national securities exchange and have a market capitalization of less than \$250 million, in each case organized in the United States.

We are permitted to borrow money from time to time within the levels permitted by the 1940 Act (which generally allows us to incur leverage for up to 50% of our asset base). We may borrow money when the terms and conditions available are favorable to do so and are aligned with our investment strategy and portfolio composition. The use of borrowed funds or the proceeds of preferred stock to make investments would have its own specific benefits and risks, and all of the costs of borrowing funds or issuing preferred stock would be borne by holders of our common stock.

We have elected to be treated for tax purposes as a regulated investment company (RIC) under Subchapter M of the Internal Revenue Code of 1986, as amended (Code). To qualify as a RIC, we must, among other things, meet certain source-of-income and assets diversification requirements. Pursuant to these elections, we generally will not have to pay corporate-level taxes on any income we distribute to our shareholders.

Organizational Structure

About OFS and Our Adviser

OFS (which refers to the collective activities and operations of OFSAM and its subsidiaries and certain affiliates) is an established investment platform focused on meeting the capital needs of middle-market companies.

As of March 31, 2016, OFS had 41 full-time employees. OFS is headquartered in Chicago, Illinois, and has additional offices in New York, New York and Los Angeles, California.

Our investment activities are managed by OFS Advisor, our investment adviser. OFS Advisor is responsible for sourcing potential investments, conducting research and diligence on potential investments and equity sponsors, analyzing investment opportunities, structuring our investments and monitoring our investments and portfolio companies on an ongoing basis. OFS Advisor is a subsidiary of OFSAM, our parent company prior to the completion of our initial public offering (IPO), and is a registered investment adviser under the Investment Advisers Act of 1940 (the Advisers Act).

Our relationship with OFS Advisor is governed by and dependent on the Investment Advisory Agreement and may be subject to conflicts of interest. OFS Advisor provides us with advisory services in exchange for a base management fee and incentive fee. See Management and Other Agreements Investment Advisory Agreement for a discussion of the base management fee and incentive fee payable by us to OFS Advisor. The base management fee is based on our total assets (other than cash and cash equivalents and the intangible asset and goodwill resulting from the SBIC Acquisitions but including assets purchased with borrowed amounts and including assets owned by any consolidated entity) and, therefore, OFS Advisor will benefit when we incur debt or use leverage. Our board of directors is charged with protecting our interests by monitoring how OFS Advisor addresses these and other conflicts of interest associated with its management services and compensation. While our board of directors is not expected to review or approve each borrowing or incurrence of leverage, our independent directors will periodically review OFS Advisor s services and fees as well as its portfolio management decisions and portfolio performance.

OFS Advisor has entered into a Staffing Agreement with Orchard First Source Capital, Inc. (OFSC), a wholly-owned subsidiary of OFSAM. Under the Staffing Agreement, OFSC makes experienced investment professionals available to OFS Advisor and provides access to the senior investment personnel of OFS and its affiliates. The Staffing Agreement provides OFS Advisor with access to deal flow generated by OFS and its

affiliates in the ordinary course of their businesses and commits the members of OFS Advisor s investment committee to serve in that capacity. As our investment adviser, OFS Advisor is obligated to allocate investment opportunities among us and any other clients fairly and equitably over time in accordance with its allocation policy.

OFS Advisor capitalizes on the deal origination and sourcing, credit underwriting, due diligence, investment structuring, execution, portfolio management and monitoring experience of OFS s professionals. The senior management team of OFS, including Bilal Rashid, Jeff Cerny and Mark Hauser, provides services to OFS Advisor. These managers have developed a broad network of contacts within the investment community, averaging over 20 years of experience investing in debt and equity securities of middle-market companies. In addition, these managers have gained extensive experience investing in assets that will constitute our primary focus and have expertise in investing across all levels of the capital structure of middle-market companies.

Our Administrator

OFS Services, an affiliate of OFS Advisor, provides the administrative services necessary for us to operate. OFS Services furnishes us with office facilities and equipment, necessary software licenses and subscriptions and clerical, bookkeeping and recordkeeping services at such facilities. OFS Services oversees our financial reporting as well as prepares our reports to shareholders and all other reports and materials required to be filed with the SEC or any other regulatory authority. OFS Services also manages the determination and publication of our net asset value and the preparation and filing of our tax returns and generally monitors the payment of our expenses and the performance of administrative and professional services rendered to us by others. OFS Services may retain third parties to assist in providing administrative services to us. To the extent that OFS Services outsources any of its functions, we will pay the fees associated with such functions at cost, on a direct basis.

Market Opportunity

Our investment strategy is focused primarily on investments in middle-market companies in the United States. We find the middle-market attractive for the following reasons:

Large Target Market. According to the U.S. Census Bureau in its 2012 economic census, there were approximately 197,000 companies in the United States with annual revenues between \$10 million and \$2.5 billion, compared with approximately 1,300 companies with revenues greater than \$2.5 billion at the time of the census. We believe that these middle-market companies represent a significant growth segment of the U.S. economy and often require substantial capital investments to grow. Middle-market companies have historically constituted the vast bulk of OFS s portfolio companies since its inception, and constituted the vast bulk of our portfolio as of March 31, 2016. We believe that this market segment will continue to produce significant investment opportunities for us.

Specialized Lending Requirements with High Barriers to Entry. We believe that several factors render many U.S. financial institutions ill-suited to lend to U.S. middle-market companies. For example, based on the experience of our management team, lending to private middle-market companies in the United States (a) is generally more labor-intensive than lending to larger companies due to the smaller size of each investment and the fragmented nature of information for such companies, (b) requires due diligence and underwriting practices consistent with the demands and economic limitations of the middle-market, and (c) may also require more extensive ongoing monitoring by the lender. As a result, middle-market companies historically have been served by a limited segment of the lending community. As a result of the unique challenges facing lenders to middle-market companies, there are high barriers to entry that a new lender must overcome.

Robust Demand for Debt Capital. We believe that private equity firms have significant committed but uncalled capital, a large portion of which is still available for investment in the United States. Subject to market conditions, we expect the large amount of unfunded buyout commitments will drive demand for leveraged buyouts over the next several years, which should, in turn, create leveraged lending opportunities for us.

4

Market Opportunity 14

Competitive Strengths and Core Competencies

Deep Management Team Experienced in All Phases of Investment Cycle and Across All Levels of the Capital Structure. We are managed by OFS Advisor, which has access through the Staffing Agreement with OFSC to the resources and expertise of OFS s investment professionals. As of March 31, 2016, OFS s credit and investment professionals (including all investment committee members) employed by OFSC had an average of over 20 years of investment experience with strong institutional backgrounds.

Significant Investment Capacity. The net proceeds of equity and debt offerings and borrowing capacity under our credit facilities, will provide us with a substantial amount of capital available for deployment into new investment opportunities in our targeted asset class.

Scalable Infrastructure Supporting the Entire Investment Cycle. We believe that our loan acquisition, origination and sourcing, underwriting, administration and management platform is highly scalable (that is, it can be expanded on a cost efficient basis within a timeframe that meets the demands of business growth). Our platform extends beyond origination and sourcing and includes a regimented credit monitoring system. We believe that our careful approach, which involves ongoing review and analysis by an experienced team of professionals, should enable us to identify problems early and to assist borrowers before they face difficult liquidity constraints.

Extensive Loan Sourcing Capabilities. OFS Advisor gives us access to the deal flow of OFS. We believe OFS s 20-year history as a middle-market lending platform and its market position make it a leading lender to many sponsors and other deal sources, especially in the currently under-served lending environment, and we have extensive relationships with potential borrowers and other lenders.

Structuring with a High Level of Service and Operational Orientation. We provide client-specific and creative financing structures to our portfolio companies. Based on our experience in lending to and investing in middle-market companies, we believe that the middle-market companies we target, as well as sponsor groups we may pursue, require a higher level of service, creativity and knowledge than has historically been provided by other service providers more accustomed to participating in commodity-like loan transactions.

Rigorous Credit Analysis and Approval Procedures. OFS Advisor utilizes the established, disciplined investment process of OFS for reviewing lending opportunities, structuring transactions and monitoring investments. Using OFS s disciplined approach to lending, OFS Advisor seeks to minimize credit losses through effective underwriting, comprehensive due diligence investigations, structuring and, where appropriate, the implementation of restrictive debt covenants.

Structure of Investments

We anticipate that our loan portfolio will continue to contain investments of the following types with the following characteristics:

Senior Secured First-Lien Loans. First-lien senior secured loans comprise, and will continue to comprise, a significant portion of our investment portfolio. We obtain security interests in the assets of these portfolio companies as collateral in support of the repayment of these loans (in certain cases, subject to a payment waterfall). The collateral takes the form of first-priority liens on specified assets of the portfolio company borrower and, typically, first-priority pledges of the ownership interests in the borrower. Our first lien loans may provide for moderate loan amortization in the early years of the loan, with the majority of the amortization deferred until loan maturity.

Senior Secured Unitranche Loans. Unitranche loans are loans that combine both senior and subordinated debt into one loan under which the borrower pays a single blended interest rate that is intended to reflect the relative risk of the secured and unsecured components. We typically structure our unitranche loans as senior secured loans. We obtain security interests in the assets of these portfolio companies as collateral in support of the repayment of these loans. This collateral takes the form of first-priority liens on the assets of a portfolio company and, typically, first-priority pledges of the ownership interests in the company. We believe that unitranche lending represents a significant growth opportunity for us, offering the borrower the convenience of dealing with one lender, which may result in a higher blended rate of interest to us than we might realize in a traditional multi-tranche structure. Unitranche loans typically provide for moderate loan

5

Structure of Investments 16

TABLE OF CONTENTS

amortization in the initial years of the facility, with the majority of the amortization deferred until loan maturity. Unitranche loans generally allow the borrower to make a large lump sum payment of principal at the end of the loan term, and there is a risk of loss if the borrower is unable to pay the lump sum or refinance the amount owed at maturity. In many cases, we will be the sole lender, or we, together with our affiliates, will be the sole lender, of unitranche loans, which can afford us additional influence with a borrower in terms of monitoring and, if necessary, remediation in the event of underperformance.

Senior Secured Second-lien Loans. We obtain security interests in the assets of these portfolio companies as collateral in support of the repayment of such loans. This collateral typically takes the form of second-priority liens on the assets of a portfolio company, and we may enter into an intercreditor agreement with the holders of the portfolio company s first-lien senior secured debt. These loans typically provide for no contractual loan amortization in the initial years of the facility, with all amortization deferred until loan maturity.

Subordinated (Mezzanine) Loans. We typically structure these investments as unsecured, subordinated loans that typically provide for relatively high, fixed interest rates that provide us with significant current interest income. These loans typically will have interest-only payments (often representing a combination of cash pay and payment-in-kind (PIK) interest) in the early years, with amortization of principal deferred to maturity. Mezzanine loans generally allow the borrower to make a large lump sum payment of principal at the end of the loan term, and there is a risk of loss if the borrower is unable to pay the lump sum or refinance the amount owed at maturity. Mezzanine investments are generally more volatile than secured loans and may involve a greater risk of loss of principal. Mezzanine loans often include a PIK feature (meaning a feature allowing for the payment of interest in the form of additional principal amount of the loan instead of in cash), which effectively operates as negative amortization of loan principal, thereby increasing credit risk exposure over the life of the loan.

Warrants and Other Equity Securities. In some cases, we will also acquire an equity interest in the portfolio company in connection with making a loan, or receive nominally priced warrants or options to buy a minority equity interest in the portfolio company in connection with a loan. As a result, as a portfolio company appreciates in value, we may achieve additional investment return from this equity interest. We may structure such warrants to include provisions protecting our rights as a minority-interest holder, as well as a put, or right to sell such securities back to the issuer, upon the occurrence of specified events. In many cases, we may also seek to obtain registration rights in connection with these equity interests, which may include demand and piggyback registration rights.

General Structuring Considerations. We tailor the terms of each investment to the facts and circumstances of the transaction and the prospective portfolio company, negotiating a structure that protects our rights and manages our risk while creating incentives for the portfolio company to achieve its business plan and improve its operating results.

We seek to limit the downside potential of our investments by:

selecting investments that we believe have a very low probability of loss;

requiring a total return on our investments (including both interest and potential equity appreciation) that we believe will compensate us appropriately for credit risk; and

negotiating covenants in connection with our investments that afford our portfolio companies as much flexibility in managing their businesses as possible, consistent with the preservation of our capital. Such restrictions may include affirmative and negative covenants, default penalties, lien protection, change of control provisions and board rights, including either observation or rights to a seat on the board of directors under some circumstances.

We expect to hold most of our investments to maturity or repayment, but we may sell some of our investments earlier if a liquidity event occurs, such as a sale, recapitalization or worsening of the credit quality of the portfolio company.

Structure of Investments 17

Conflicts of Interests

Subject to certain 1940 Act restrictions on co-investments with affiliates, OFS Advisor will offer us the right to participate in investment opportunities that it determines are appropriate for us in view of our

6

Conflicts of Interests 18

TABLE OF CONTENTS

investment objective, policies and strategies and other relevant factors. Such offers will be subject to the exception that, in accordance with OFS Advisor s allocation policy, we might not participate in each individual opportunity but will, on an overall basis, be entitled to participate fairly and equitably with other entities managed by OFS Advisor and its affiliates.

To the extent that we compete with entities managed by OFS Advisor or any of its affiliates for a particular investment opportunity, OFS Advisor will allocate investment opportunities across the entities for which such opportunities are appropriate, consistent with (a) its internal allocation policy, (b) the requirements of the Advisers Act, and (c) certain restrictions under the 1940 Act and rules thereunder regarding co-investments with affiliates. OFS Advisor s allocation policy is intended to ensure that we generally share fairly and equitably with other investment funds or other investment vehicles managed by OFS Advisor or its affiliates in investment opportunities that OFS Advisor determines are appropriate for us in view of our investment objective, policies and strategies and other relevant factors, particularly those involving a security with limited supply or involving differing classes of securities of the same issuer that may be suitable for us and such other investment funds or other investment vehicles. Under this allocation policy, if two or more investment vehicles with similar or overlapping investment strategies are in their investment periods, an available opportunity will be allocated based on the provisions governing allocations of such investment opportunities in the relevant organizational, offering or similar documents, if any, for such investment vehicles. In the absence of any such provisions, OFS Advisor will consider the following factors and the weight that should be given with respect to each of these factors:

investment guidelines and/or restrictions, if any, set forth in the applicable organizational, offering or similar documents for the investment vehicles:

risk and return profile of the investment vehicles;
suitability/priority of a particular investment for the investment vehicles;
if applicable, the targeted position size of the investment for the investment vehicles;
level of available cash for investment with respect to the investment vehicles;
total amount of funds committed to the investment vehicles; and
the age of the investment vehicles and the remaining term of their respective investment periods, if any.

In situations where co-investment with such other accounts is not permitted or appropriate, such as when there is an opportunity to invest in different securities of the same issuer, OFS Advisor will need to decide which account will proceed with the investment. The decision by OFS Advisor to allocate an opportunity to another entity could cause us to forego an investment opportunity that we otherwise would have made. See Related-Party Transactions and Certain Relationships.

On January 15, 2016, we filed an exemptive application with the SEC to permit us to co-invest with funds or entities managed by OFS Advisor in certain negotiated transactions where co-investing would otherwise be prohibited under the 1940 Act. Any such order, if granted by the SEC, will be subject to certain terms and conditions. There can be no assurance when or if such exemptive relief will be granted by the SEC. If such relief is granted, then we will be permitted to co-invest with our affiliates if a required majority (as defined in Section 57(o) of the 1940 Act) or our independent directors make certain conclusions in connection with a co-investment transaction, including that (1) the terms of the transactions, including the consideration to be paid, are reasonable and fair to us and our stockholders and do not involve overreaching by us or our stockholders on the part of any person concerned and (2) the transaction is consistent with the interests of our stockholders and is consistent with our investment objective and strategies.

Corporate Information

Our principal executive offices are located at 10 S. Wacker Drive, Suite 2500, Chicago, IL, 60606, and our telephone number is (847) 734-2060. Our corporate website is located at http://www.ofscapital.com. Information on our website is not incorporated into or a part of this prospectus.

Implications of Being an Emerging Growth Company

We qualify as an emerging growth company, as that term is used in the JOBS Act. An emerging growth company may take advantage of specified reduced reporting and other burdens that are otherwise applicable generally to public companies. These provisions include:

An exemption from the auditors attestation requirement in the assessment of the emerging growth company s internal control over financial reporting under Section 404 of the Sarbanes-Oxley Act of 2002 (the Sarbanes-Oxley Act);

No non-binding advisory votes on executive compensation or golden parachute arrangements; and

Reduced financial statement and executive compensation requirements.

Notwithstanding the foregoing, we have complied with Section 404(b) of the Sarbanes-Oxley Act regarding auditor attestation for the fiscal year ended December 31, 2015.

In addition, Section 107 of the JOBS Act also provides that an emerging growth company can take advantage of the extended transition period provided in Section 7(a)(2)(B) of the Securities Act of 1933, as amended (the Securities Act), for complying with new or revised accounting standards. However, we are choosing to opt out of such extended transition period, and as a result, we will comply with new or revised accounting standards on the relevant dates on which adoption of such standards is required for non-emerging growth companies. Our decision to opt out of the extended transition period for complying with new or revised accounting standards is irrevocable.

We could remain an emerging growth company for up to five years, or until the earliest of (a) the last day of the first fiscal year in which our annual gross revenues exceed \$1 billion, (b) the date that we become a large accelerated filer as defined in Rule 12b-2 under the Exchange Act, which would occur if the market value of our common stock that is held by non-affiliates exceeds \$700 million as of the last business day of our most recently completed second fiscal quarter, or (c) the date on which we have issued more than \$1 billion in non-convertible debt during the preceding three year period.

Risks

Investing in our securities may be speculative and involves certain risks relating to our structure and our investment objective that you should consider before deciding whether to invest. Certain of these risks are referenced below:

Capital markets are currently functional, but may experience periods of disruption and instability, which could have a negative impact on our business and operations.

There are numerous risks relating to our business, including credit losses on our investments, the risk of loss associated with leverage, illiquidity and valuation uncertainties in our investments, possible lack of appropriate investments, the lack of experience in operating a BDC of our investment adviser and our dependence on such investment adviser.

There are also numerous risks relating to our investments, including the risky nature of the securities in which we invest, the subordinated nature of select investments, our potential lack of control over our portfolio companies, our limited ability to invest in public or foreign companies and the potential incentives in our investment adviser to invest more speculatively than it would if it did not have an opportunity to earn incentive fees.

We also have various risks relating to our status as a BDC, including limitations on raising additional capital, failure to qualify as a BDC and loss of tax status as a RIC. In addition, SBIC I LP has the risk of losing its SBIC status.

There are also risks relating to this offering, including volatility in our stock price and the anti-takeover effect of certain provisions in our certificate of incorporation.

See Risk Factors beginning on page 16 of this prospectus for a more detailed discussion of these and other material risks you should carefully consider before deciding to invest in our securities.

8

Risks 22

FEES AND EXPENSES

The following table is intended to assist you in understanding the costs and expenses that you will bear directly or indirectly. We caution you that the percentages indicated in the table below are estimates and may vary. Except where the context suggests otherwise, whenever this prospectus contains a reference to fees or expenses paid by us, the Company or OFS Capital, or that we will pay fees or expenses, you will indirectly bear such fees or expenses as an investor in OFS Capital.

Shareholder transaction expenses:	
Sales load (as a percentage of offering price)	%)
Offering expenses (as a percentage of offering price)	%)
Distribution reinvestment plan expenses	1
Total shareholder transaction expenses (as a percentage of offering price)	%
Annual expenses (as a percentage of net assets attributable to common stock):	
Base management fee payable under Investment Advisory Agreement	$3.14\%^{(4)}$
Incentive fees payable under Investment Advisory Agreement	$2.46\%^{(5)}$
Interest payments on borrowed funds	$3.74\%^{(6)}$
Other expenses	$2.91\%^{(7)}$
Acquired fund fees and expenses	1 /8)
Total annual expenses	$12.25\%^{(4)}$

In the event that the securities to which this prospectus relates are sold to or through underwriters, a corresponding (1)prospectus supplement will disclose the applicable sales load and the following Example will be updated accordingly.

- (2) The related prospectus supplement will disclose the applicable offering expenses and total shareholder transaction expenses.
 - (3) The expenses of the distribution reinvestment plan are included in other expenses. For additional information, see Distribution Reinvestment Plan.

Our base management fee, under the investment management agreement, is 1.75% of our total assets (other than cash and cash equivalents, intangible assets, and goodwill, but including assets purchased with borrowed amounts

- (4) and including assets owned by any consolidated entity). We may from time to time decide it is appropriate to change the terms of the agreement. Under the 1940 Act, any material change to our Investment Advisory Agreement must be submitted to stockholders for approval. See Management and Other Agreements Investment Advisory Agreement.
- The 3.14% fee reflected in the table is the ratio of the base management fee, calculated based on our statement of operations for the three months ended March 31, 2016, to our net assets attributable to common stock (rather than our total assets) as of March 31, 2016. We use leverage in our operations and the management fee is based on our total assets (other than cash and cash equivalents, intangible assets, and goodwill, but including assets purchased with borrowed money and assets of any consolidated entity). Thus, the ratio reported in this table will exceed the 1.75% of total assets stated in the investment management agreement. See Risk Factors Risks Related to Our Investments Our base management fee may induce OFS Advisor to incur leverage.
- (5) Assumes an incentive fee of \$3.5 million, which was calculated based on our statement of operations for the quarter ended March 31, 2016, excluding the Capital Gains Fee of \$(0.1) million, which represents the reversal of the Capital Gains Fee accrued at December 31, 2015. For the quarter ended March 31, 2016, we incurred an actual incentive fee expense of \$0.7 million, which consisted of part one incentive fees (based on net investment income) of \$0.8 million and part two incentive fees (based upon net realized and unrealized gains and losses, or capital

FEES AND EXPENSES 23

gains) of (0.1) million.

The incentive fee consists of two parts:

The first part (part one), payable quarterly in arrears, equals 20.0% of our pre-incentive fee net investment income initially calculated based on values at the closing of this offering (including income that is accrued but not yet received in cash), subject to a 2.0% quarterly (8.0% annualized) hurdle rate and a catch-up provision measured as of the end of each calendar quarter. Under this provision, in any calendar quarter, OFS Advisor receives no incentive fee until our pre-incentive fee net investment income equals the hurdle rate of

2.0% but then receives, as a catch-up, 100% of our pre-incentive fee net investment income with respect to that portion of such pre-incentive fee net investment income, if any, that exceeds the hurdle rate but is less than 2.5%. The effect of this provision is that, if pre-incentive fee net investment income exceeds 2.5% in any calendar quarter, OFS Advisor will receive 20.0% of our pre-incentive fee net investment income as if a hurdle rate did not apply.

The hurdle rate is fixed at 2.0% quarterly (8% annualized), which means that, if interest rates rise, it will be easier for our pre-incentive fee net investment income to surpass the hurdle rate, which could lead to the payment of fees to OFS Advisor in an amount greater than expected. There is no accumulation of amounts on the hurdle rate from quarter to quarter and accordingly there is no clawback of amounts previously paid if subsequent quarters are below the quarterly hurdle rate and there is no delay of payment if prior quarters are below the quarterly hurdle rate. The second part (part two), payable annually in arrears, equals 20.0% of our realized capital gains on a cumulative basis as of the closing of this offering through the end of the year, if any (or upon the termination of the Investment Advisory Agreement, as of the termination date), computed net of all realized capital losses and unrealized capital depreciation on a cumulative basis, less the aggregate amount of any previously paid capital gain incentive fees. Unrealized capital appreciation is accrued, but not paid until said appreciation is realized. We accrue the Capital Gains Fee if, on a cumulative basis, the sum of the net realized capital gains (and losses) plus net unrealized appreciation (and depreciation) is positive. See Management and Other Agreements Investment Advisory Agreement.

Interest payments on borrowed funds represents an estimate of our annualized interest expenses on our SBA debentures and our expected interest expense under the PWB Credit Facility over the next twelve months. At

(6) March 31, 2016, we had \$149.9 million of SBA debentures outstanding with an effective interest rate of 3.42%. At March 31, 2016, the PWB Credit Facility was undrawn. Any advances under the facility bear interest at a fixed rate per annum equal to 4.75%. For purposes of this calculation, we have assumed an average amount outstanding over the next twelve months under the facility of \$3.8 million at a fixed rate per annum of 4.75%.

We may borrow additional funds from time to time to make investments to the extent we determine that the economic situation is conducive to doing so. We do not expect to issue any preferred stock during the next twelve months and, therefore, have not included the cost of issuing and servicing preferred stock in the table. In January 2015, we filed an application with the SBA for a second SBIC license, which, if approved, would provide up to \$75.0 million in additional SBA debentures for the funding of our future investments upon our contribution of at least \$37.5 million in additional regulatory capital and subject to the issuance of a leverage commitment by the SBA and other customary procedures. There can be no assurance as to whether or when this application will be approved by the SBA. Our stockholders will bear directly or indirectly the costs of borrowings under any debt instruments we may enter into.

Includes our estimated overhead and other expenses, including payments under the Administration Agreement (7) based on our allocable portion of overhead and other expenses incurred by OFS Services. See Management and Other Agreements Administration Agreement.

Our shareholders indirectly bear the expenses of underlying funds or other investment vehicles that would be investment companies under section 3(a) of the 1940 Act but for the exceptions to that definition provided for in sections 3(c)(1) and 3(c)(7) of the 1940 Act (Acquired Funds) in which we invest. We do not currently invest in underlying funds or other investment companies.

Example

The following example demonstrates the projected dollar amount of total cumulative expenses over various periods with respect to a hypothetical investment in our common stock. In calculating the following expense amounts, we have assumed we would have no additional leverage and that our annual operating expenses would remain at the levels set forth in the table above. The expense amounts assume an annual base management fee 1.75% for each year.

Transaction expenses are not included in the following example.

	1 year	3 years	5 years	10 years
You would pay the following expenses on a \$1,000 investment, assuming a 5% annual return	\$ 93	\$ 265	\$ 420	\$ 745
You would pay the following expenses on a \$1,000 investment, assuming a 5% annual return from realized capital gains	\$ 102	\$ 289	\$ 454	\$ 787

The foregoing table is to assist you in understanding the various costs and expenses that an investor in our common stock will bear directly or indirectly. While the example assumes, as required by the SEC, a 5% annual return, our performance will vary and may result in a return greater or less than 5%. The incentive fee under the Investment Advisory Agreement, which, assuming a 5% annual return, would not be payable and is not included in the example. In addition, while the example assumes reinvestment of all distributions at net asset value, if our board of directors authorizes and we declare a cash distribution, participants in our distribution reinvestment plan who have not otherwise elected to receive cash will receive a number of shares of our common stock, determined by dividing the total dollar amount of the distribution payable to a participant by the market price per share of our common stock at the close of trading on the valuation date for the distribution. See Distribution Reinvestment Plan for additional information regarding our distribution reinvestment plan.

This example and the expenses in the table above should not be considered a representation of our future expenses, and actual expenses (including the cost of debt, if any, and other expenses) may be greater or less than those shown.

11

Example 26

SELECTED CONSOLIDATED FINANCIAL DATA

The following selected financial and other data for the years ended December 31, 2015 and 2014 are derived from our consolidated financial statements that have been audited by BDO USA, LLP, our independent registered public accounting firm.

Selected financial and other data for the year ended December 31, 2013, the period November 8, 2012 to December 31, 2012, the period January 1, 2012 through November 7, 2012, and the year ended December 31, 2011 are derived from our consolidated financial statements that have been audited by RSM US LLP, our previous independent registered public accounting firm. The selected financial data and other data for the three months ended March 31, 2016 and 2015 are derived from our unaudited financial statements. Interim results as of and for the three months ended March 31, 2016 are not necessarily indicative of the results that may be expected for the year ending December 31, 2016. The data should be read in conjunction with Management's Discussion and Analysis of Financial Condition and Results of Operations, Senior Securities, and the consolidated financial statements and related notes included elsewhere herein.

- The consolidated statement of operations for the year ended December 31, 2012 included the Company's Pre-IPO and Post-IPO operations during 2012.
 - Weighted average annualized yield on income producing investments at fair value for the year ended December 31,
- (2)2011 gives pro forma effect to OFS Capital s consolidation of OFS Capital WM as if the consolidation took place at December 31, 2011.
 - The number of portfolio companies at December 31, 2011 gives pro forma effect to OFS Capital's consolidation of
- (3)OFS Capital WM as a result of the WM 2012 Credit Facility Amendments, as if the consolidation took place at December 31, 2011.
 - The determination of the tax attributes of our distributions is made annually as of the end of our fiscal year based upon our taxable income for the full year and distributions paid for the full year. Therefore, a determination made on a quarterly basis may not be representative of the actual tax attributes of our distributions for a full year. If the
- (4) tax characteristics of our distributions paid during 2016 were determined as of March 31, 2016, approximately \$.04 per share would represent a return of capital. The return of capital portion of these distributions as of December 31, 2015, 2014, and 2013 (which includes the period December 8, 2012 to December 31, 2012), was \$0.23, \$0.72, and \$0.40.
 - (5)This represents investments at book value.
- On January 1, 2016, we adopted Accounting Standards Update (ASU) 2015-03 which requires that debt issuance costs related to a recognized debt liability to be presented on the balance sheet as a direct 13

deduction from the carrying amount of the debt liability rather than as an asset. Adoption of ASU 2015-03 requires the changes to be applied retrospectively.

(7) This represents member s equity.

The following tables set forth certain quarterly financial information for the first quarter in the year ended December 31, 2016, and each of the first, second, third, and fourth quarters in the years ended December 31, 2015 and 2014. This information was derived from our unaudited consolidated financial statements. Results for any quarter are not necessarily indicative of results for the full year or for any future quarter.

RATIO OF EARNINGS TO FIXED CHARGES

The following table contains our ratio of earnings to fixed charges for the periods indicated, computed as set forth below. You should read these ratios of earnings to fixed charges in connection with our consolidated financial statements, including the notes to those statements, included in this prospectus.

	For the	For the	For the	For the	For the	For the
	Three	Year	Year	Year	Year	Year
	Months	Ended	Ended	Ended	Ended	Ended
	Ended	December	December	December	December	December
	March 31,	31,	31,	31,	31,	31,
	2016	2015	2014	2013	2012	2011
Earnings to Fixed Charges ⁽¹⁾⁽²⁾	2.74	3.52	2.58	2.42	2.16	N/A

For purposes of computing the ratios of earnings to fixed charges, earnings represent net increase in net assets resulting from operations plus (or minus) income tax expense (benefit) including excise tax expense plus fixed charges. Fixed charges include interest and credit facility fees expense and amortization of debt issuance costs.

Earnings include net realized and unrealized gains or losses. Net realized and unrealized gains or losses can vary substantially from period to period.

⁽²⁾ Not applicable for year ended December 31, 2011 as the Company had no fixed charges.

RISK FACTORS

Before you invest in our securities, you should be aware of various risks, including those described below. You should carefully consider these risk factors, together with all of the other information included in this prospectus, and any prospectus supplement accompanying this prospectus, before you decide whether to make an investment in our securities. The risks set out below are not the only risks we face, but they are the principal risks associated with an investment in us. If any of the following events occur, our business, financial condition and results of operations could be materially adversely affected. In such case, our net asset value and the trading price of our common stock could decline, and you may lose all or part of your investment. The risk factors described below, together with those set forth in any prospectus supplement accompanying this prospectus, are the principal risk factors associated with an investment in our securities, as well as those factors generally associated with an investment company with investment objectives, investment policies, capital structure or trading markets similar to ours.

Risks Related to Our Business and Structure

Global capital markets could enter a period of severe disruption and instability. These conditions have historically affected and could again materially and adversely affect debt and equity capital markets in the United States and around the world and our business.

The U.S. and global capital markets experienced extreme volatility and disruption during the economic downturn that began in mid-2007, and the U.S. economy was in a recession for several consecutive calendar quarters during the same period. In 2010, a financial crisis emerged in Europe, triggered by high budget deficits and rising direct and contingent sovereign debt, which created concerns about the ability of certain nations to continue to service their sovereign debt obligations. Risks resulting from such debt crisis and any future debt crisis in Europe or any similar crisis elsewhere could have a detrimental impact on the global economic recovery, sovereign and non-sovereign debt in certain countries and the financial condition of financial institutions generally. In July and August 2015, Greece reached agreements with its creditors for bailouts that provide aid in exchange for certain austerity measures. These and similar austerity measures may adversely affect world economic conditions and have an adverse impact on our business and that of our portfolio companies. In the second quarter of 2015, stock prices in China experienced a significant drop, resulting primarily from continued sell-off of shares trading in Chinese markets. In August 2015, Chinese authorities sharply devalued China's currency. These market and economic disruptions adversely affected, and these and other similar market and economic disruptions may in the future affect, the U.S. capital markets, which could adversely affect our business and that of our portfolio companies. These market disruptions materially and adversely affected, and may in the future affect, the broader financial and credit markets and has reduced the availability of debt and equity capital for the market as a whole and to financial firms, in particular. At various times, these disruptions resulted in, and may in the future result, a lack of liquidity in parts of the debt capital markets, significant write-offs in the financial services sector and the repricing of credit risk. These conditions may reoccur for a prolonged period of time again or materially worsen in the future, including as a result of further downgrades to the U.S. government s sovereign credit rating or the perceived credit worthiness of the United States or other large global economies. Unfavorable economic conditions, including future recessions, also could increase our funding costs, limit our access to the capital markets or result in a decision by lenders not to extend credit to us. We may in the future have difficulty accessing debt and equity capital on attractive terms, or at all, and a severe disruption and instability in the global financial markets or deteriorations in credit and financing conditions may cause us to reduce the volume of loans we originate and/or fund, adversely affect the value of our portfolio investments or otherwise have a material

RISK FACTORS 32

adverse effect on our business, financial condition, results of operations and cash flows.

Prior to November 7, 2012, we had not operated as a BDC or qualified to be treated as a RIC, and none of OFS Advisor or its affiliates had ever managed a BDC or a RIC, and we may not be able to operate our business successfully or generate sufficient revenue to make or sustain distributions to our shareholders.

Prior to November 7, 2012, we had not operated as a BDC or qualified to be treated as a RIC, and none of OFS Advisor or its affiliates has ever managed a BDC. As a result of our limited experience as a BDC, we are subject to the business risks and uncertainties associated with new entities of these types, including the risk that we will not achieve our investment objective, or that we will not qualify or maintain our qualification to be treated as a RIC, and that the value of your investment could decline substantially.

TABLE OF CONTENTS

The 1940 Act and the Code impose numerous constraints on the operations of business development companies and RICs. Business development companies are required, for example, to invest at least 70% of their assets, as defined by the 1940 Act, primarily in securities of U.S. private or thinly traded public companies, cash, cash equivalents, U.S. government securities and other high-quality debt instruments that mature in one year or less from the date of investment. Furthermore, any failure to comply with the requirements imposed on business development companies by the 1940 Act could cause the SEC to bring an enforcement action against us and/or expose us to claims of private litigants. In addition, upon approval of a majority of our shareholders, we may elect to withdraw our status as a BDC. If we decide to withdraw our election, or if we otherwise fail to qualify, or maintain our qualification, as a BDC, we may be subject to the substantially greater regulation under the 1940 Act as a closed-end investment company. Compliance with such regulations would significantly decrease our operating flexibility, and could significantly increase our costs of doing business. Moreover, qualification for treatment as a RIC requires satisfaction of source-of-income, asset diversification and distribution requirements. None of us, OFS Advisor or any of our or their respective affiliates has any experience operating under these constraints, which may hinder our ability to take advantage of attractive investment opportunities and to achieve our investment objective.

We are dependent upon the OFS senior professionals for our future success and upon their access to the investment professionals and partners of OFS and its affiliates.

We do not have any internal management capacity or employees. We will depend on the diligence, skill and network of business contacts of the OFS senior professionals to achieve our investment objective. Our future success will depend, to a significant extent, on the continued service and coordination of the OFS senior management team, particularly Bilal Rashid, Senior Managing Director and President of OFSC, Jeffrey Cerny, Senior Managing Director and Treasurer of OFSC and Mark Hauser, Senior Managing Director of OFSC. Each of these individuals is an employee at will of OFSC and, with the exception of Mr. Hauser, is not subject to an employment contract. In addition, we rely on the services of Richard Ressler, Chairman of the executive committee of OFSAM and Chairman of the Advisor Investment Committee (as defined below) pursuant to a consulting agreement with Orchard Capital Corporation. The departure of Mr. Ressler or any of the senior managers of OFSC, or of a significant number of its other investment professionals, could have a material adverse effect on our ability to achieve our investment objective.

We expect that OFS Advisor will evaluate, negotiate, structure, close and monitor our investments in accordance with the terms of the Investment Advisory Agreement. We can offer no assurance, however, that OFS senior professionals will continue to provide investment advice to us. If these individuals do not maintain their existing relationships with OFS and its affiliates and do not develop new relationships with other sources of investment opportunities, we may not be able to grow our investment portfolio or achieve our investment objective. In addition, individuals with whom the OFS senior professionals have relationships are not obligated to provide us with investment opportunities.

Therefore, we can offer no assurance that such relationships will generate investment opportunities for us.

OFS Advisor is a subsidiary of OFSAM that has no employees and depends upon access to the investment professionals and other resources of OFS and its affiliates to fulfill its obligations to us under the Investment Advisory Agreement. OFS Advisor also depends upon OFS to obtain access to deal flow generated by the professionals of OFS and its affiliates. Under a Staffing Agreement between OFSC, a subsidiary of OFSAM that employs OFS s personnel, and OFS Advisor, OFSC has agreed to provide OFS Advisor with the resources necessary to fulfill these obligations. The Staffing Agreement provides that OFSC will make available to OFS Advisor experienced investment

professionals and access to the senior investment personnel of OFSC for purposes of evaluating, negotiating, structuring, closing and monitoring our investments. We are not a party to this Staffing Agreement and cannot assure shareholders that OFSC will fulfill its obligations under the agreement. If OFSC fails to perform, we cannot assure

shareholders that OFS Advisor will enforce the Staffing Agreement or that such agreement will not be terminated by either party or that we will continue to have access to the investment professionals of OFSC and its affiliates or their information and deal flow.

The investment committees that oversee our investment activities are provided by OFS Advisor under the Investment Advisory Agreement, as well as by SBIC I GP. The Advisor Investment Committee consists of Richard Ressler (Chairman), Jeffrey Cerny, Mark Hauser and Bilal Rashid. The SBIC Investment Committee consists of Mark Hauser and Bilal Rashid. The loss of any member of the Investment Committees or of other

TABLE OF CONTENTS

OFS senior professionals could limit our ability to achieve our investment objective and operate as we anticipate. This could have a material adverse effect on our financial condition and results of operation.

Our business model depends to a significant extent upon strong referral relationships with financial institutions, sponsors and investment professionals. Any inability of OFS Advisor to maintain or develop these relationships, or the failure of these relationships to generate investment opportunities, could adversely affect our business.

We depend upon OFS Advisor to maintain OFS s relationships with financial institutions, sponsors and investment professionals, and we will continue to rely to a significant extent upon these relationships to provide us with potential investment opportunities. If OFS Advisor fails to maintain such relationships, or to develop new relationships with other sources of investment opportunities, we will not be able to grow our investment portfolio. In addition, individuals with whom the principals of OFS Advisor have relationships are not obligated to provide us with investment opportunities, and, therefore, we can offer no assurance that these relationships will generate investment opportunities for us in the future.

Our financial condition and results of operation will depend on our ability to manage our business effectively.

Our ability to achieve our investment objective and grow will depend on our ability to manage our business. This will depend, in turn, on the ability of the Investment Committees to identify, invest in and monitor companies that meet our investment criteria. The achievement of our investment objectives on a cost-effective basis will depend upon the execution by the Investment Committees to execute our investment process, their ability to provide competent, attentive and efficient services to us and, to a lesser extent, our access to financing on acceptable terms. OFS Advisor will have substantial responsibilities under the Investment Advisory Agreement. The OFS senior professionals and other personnel of OFS Advisor s affiliates, including OFSC, may be called upon to provide managerial assistance to our portfolio companies. These activities may distract them or slow our rate of investment. Any failure to manage our business and our future growth effectively could have a material adverse effect on our business, financial condition and results of operations.

We have potential conflicts of interest related to obligations that OFS Advisor or its affiliates may have to other clients.

OFS Advisor and its affiliates manage other assets and collateralized loan obligation (CLO) funds and may manage other entities in the future, and these other funds and entities may have similar or overlapping investment strategies. The members of the Investment Committees serve or may serve as officers, directors or principals of entities that operate in the same or a related line of business as we do, or of investment funds or other investment vehicles managed by OFS Advisor or its affiliates. Similarly, OFS Advisor and/or its affiliates may have other clients with, similar, different or competing investment objectives. In serving in these multiple capacities, they may have obligations to other clients or investors in those entities, the fulfillment of which may not be in the best interests of us or our shareholders. OFS Advisor will seek to allocate investment opportunities among eligible accounts in a manner that is fair and equitable over time and consistent with its allocation policy. Under this allocation policy, if two or more investment vehicles with similar or overlapping investment strategies are in their investment periods, an available opportunity will be allocated based on the provisions governing allocations of such investment opportunities

in the relevant organizational, offering or similar documents, if any, for such investment vehicles. In the absence of any such provisions, OFS Advisor will consider the following factors and the weight that should be given with respect to each of these factors:

investment guidelines and/or restrictions, if any, set forth in the applicable organizational, offering or similar documents for the investment vehicles;

risk and return profile of the investment vehicles; suitability/priority of a particular investment for the investment vehicles; if applicable, the targeted position size of the investment for the investment vehicles; level of available cash for investment with respect to the investment vehicles;

TABLE OF CONTENTS

total amount of funds committed to the investment vehicles; and the age of the investment vehicles and the remaining term of their respective investment periods, if any. There can be no assurance that we will be able to participate in all investment opportunities that are suitable to us.

Members of the Investment Committees, OFS Advisor or its affiliates may, from time to time, possess material non-public information, limiting our investment discretion.

OFS senior professionals and members of the Investment Committees may serve as directors of, or in a similar capacity with, companies in which we invest, the securities of which are purchased or sold on our behalf. In the event that material nonpublic information is obtained with respect to such companies, or we become subject to trading restrictions under the internal trading policies of those companies or as a result of applicable law or regulations, we could be prohibited for a period of time from purchasing or selling the securities of such companies, and this prohibition may have an adverse effect on us and our stockholders.

Our incentive fee structure may create incentives for OFS Advisor that are not fully aligned with the interests of our shareholders.

In the course of our investing activities, we will pay management and incentive fees to OFS Advisor. The base management fee is based on our total assets (other than cash and cash equivalents and the intangible asset and goodwill resulting from the SBIC Acquisitions but including assets purchased with borrowed amounts and including assets owned by any consolidated entity). As a result, investors in our common stock will invest on a gross basis and receive distributions on a net basis after expenses, resulting in a lower rate of return than one might achieve through direct investments. Because these fees are based on our total assets, other than cash and cash equivalents but including assets purchased with borrowed amounts and including any assets owned by any consolidated entity, OFS Advisor will benefit when we incur debt or use leverage. Our board of directors is charged with protecting our interests by monitoring how OFS Advisor addresses these and other conflicts of interests associated with its management services and compensation. While our board of directors is not expected to review or approve each borrowing or incurrence of leverage, our independent directors will periodically review OFS Advisor s services and fees as well as its portfolio management decisions and portfolio performance. In connection with these reviews, our independent directors will consider whether our fees and expenses (including those related to leverage) remain appropriate. As a result of this arrangement, OFS Advisor or its affiliates may from time to time have interests that differ from those of our shareholders, giving rise to a conflict.

We may pay an incentive fee on income we do not receive in cash.

The part of the incentive fee payable to OFS Advisor that relates to our pre-incentive fee net investment income is computed and paid on income that may include interest income that has been accrued but not yet received in cash. This fee structure may be considered to involve a conflict of interest for OFS Advisor to the extent that it may encourage OFS Advisor to favor debt financings that provide for deferred interest, rather than current cash payments of interest. OFS Advisor may have an incentive to invest in deferred interest securities in circumstances where it would not have done so but for the opportunity to continue to earn the incentive fee even when the issuers of the deferred interest securities would not be able to make actual cash payments to us on such securities. This risk could be increased because OFS Advisor is not obligated to reimburse us for any incentive fees received even if we subsequently incur losses or never receive in cash the deferred income that was previously accrued.

To the extent PIK interest and PIK dividends constitute a portion of our income, we will be exposed to typical risks associated with such income being required to be included in taxable and accounting income prior to receipt of cash representing such income.

Our investments may include contractual PIK interest or PIK dividends, which represents contractual interest or dividends added to a loan balance or equity security and due at the end of such loan s or equity security s term. To the extent PIK interest and PIK dividends constitute a portion of our income, we are exposed to typical risks associated with such income being required to be included in taxable and accounting income prior to receipt of cash. Such risks include:

The higher interest or dividend rates of PIK instruments reflect the payment deferral and increased risk associated with these instruments, and PIK instruments often represent a significantly higher risk than non-PIK instruments. Even if the accounting conditions for income accrual are met, the borrower could still default when our actual collection is supposed to occur at the maturity of the obligation.

PIK instruments may have unreliable valuations because their continuing accruals require continuing judgments about the collectability of the deferred payments and the value of any associated collateral. PIK income may also create uncertainty about the source of our cash distributions.

For accounting purposes, any cash distributions to shareholders representing PIK income are not treated as coming from paid-in capital, even though the cash to pay them comes from the offering proceeds. As a result, despite the fact that a distribution representing PIK income could be paid out of amounts invested by our shareholders, the 1940 Act does not require that shareholders be given notice of this fact by reporting it as a return of capital.

PIK interest or dividends have the effect of generating investment income at a compounding rate, thereby further increasing the incentive fees payable to OFS Advisor. Similarly, all things being equal, the deferral associated with PIK interest or dividends also decreases the investment principal-to-value ratio at a compounding rate.

The valuation process for certain of our portfolio holdings creates a conflict of interest.

Many of our portfolio investments are made in the form of securities that are not publicly traded. As a result, our board of directors will determine the fair value of these securities in good faith as described below in Many of our portfolio investments are recorded at fair value as determined in good faith by our board of directors and, as a result, there may be uncertainty as to the value of our portfolio investments. In connection with that determination, investment professionals from OFS Advisor may provide our board of directors with portfolio company valuations based upon the most recent portfolio company financial statements available and projected financial results of each portfolio company. In addition, the members of our board of directors who are not independent directors have a substantial indirect pecuniary interest in OFS Advisor. The participation of OFS Advisor s investment professionals in our valuation process, and the indirect pecuniary interest in OFS Advisor by those members of our board of directors, could result in a conflict of interest since OFS Advisor s management fee is based, in part, on our total assets (other than cash and cash equivalents but including assets purchased with borrowed amounts and including assets owned by any consolidated entity).

We may have additional conflicts related to other arrangements with OFS Advisor or its affiliates.

We have entered into a license agreement with OFSAM under which OFSAM has granted us a non-exclusive, royalty-free license to use the name OFS. See Management and Other Agreements License Agreement. In addition, we will rent office space from a subsidiary of OFSAM and pay to that subsidiary our allocable portion of overhead and other expenses incurred in performing its obligations under the Administration Agreement, such as rent and our allocable portion of the cost of our officers, including our chief executive officer, chief financial officer, chief compliance officer and chief accounting officer. This will create conflicts of interest that our board of directors must monitor.

The Investment Advisory Agreement with OFS Advisor and the Administration Agreement with OFS Services were not negotiated on an arm s length basis and may not be as favorable to us as if they had been negotiated with an unaffiliated third party.

The Investment Advisory Agreement and the Administration Agreement were negotiated between related parties. Consequently, their terms, including fees payable to OFS Advisor, may not be as favorable to us as if they had been negotiated with an unaffiliated third party. In addition, we could choose not to enforce, or to enforce less vigorously, our rights and remedies under these agreements because of our desire to maintain our ongoing relationship with OFS Advisor, OFS Services and their respective affiliates. Any such decision, however, would breach our fiduciary obligations to our shareholders.

Our ability to enter into transactions with our affiliates will be restricted, which may limit the scope of investments available to us.

Because we have elected to be treated as a BDC under the 1940 Act, we are prohibited under the 1940 Act from participating in certain transactions with our affiliates without the prior approval of our independent directors and, in some cases, of the SEC. Those transactions include purchases and sales, and so-called joint transactions, in which we and one or more of our affiliates are engaging together in certain types of profit-making activities. Any person that owns, directly or indirectly, five percent or more of our outstanding voting securities will be our affiliate for purposes of the 1940 Act, and we are generally prohibited from engaging in purchases or sales of assets or joint transactions with such affiliates, absent the prior approval of our independent directors. Additionally, without the approval of the SEC, we are prohibited from engaging in purchases or sales of assets or joint transactions with the following affiliated persons: (a) our officers, directors, and employees; (b) OFS Advisor and its affiliates; and (c) OFSAM or its affiliates.

We may, however, invest alongside OFSAM and its affiliates or their respective other clients in certain circumstances where doing so is consistent with current law and SEC staff interpretations. For example, we may invest alongside such accounts consistent with guidance promulgated by the SEC staff permitting us and such other accounts to purchase interests in a single class of privately placed securities so long as certain conditions are met, including that OFS Advisor, acting on our behalf and on behalf of other clients, negotiates no term other than price. Co-investment with such other accounts is not permitted or appropriate under this guidance when there is an opportunity to invest in different securities of the same issuer or where the different investments could be expected to result in a conflict between our interests and those of other accounts. Moreover, except in certain circumstances, this guidance does not permit us to invest in any issuer in which OFSAM and its affiliates or a fund managed by OFSAM or its other affiliates has previously invested.

With the exception of investments specifically permitted by current law or regulatory guidance, we will not be permitted to co-invest with other funds managed by OFSAM or its affiliates unless we receive exemptive relief from the SEC permitting us to do so. On January 15, 2016, we filed an application for such relief with the SEC. See Regulation Exemptive Relief. There can be no assurance when or if such exemptive relief will be granted by the SEC.

Where we are or may in the future be permitted to invest alongside OFSAM and its affiliates or their respective other clients, OFS Advisor will, to the extent consistent with applicable law, regulatory guidance, or exemptive relief, allocate investment opportunities in accordance with its allocation policy. Under this allocation policy, if two or more investment vehicles with similar or overlapping investment strategies are in their investment periods, an available opportunity will be allocated based on the provisions governing allocations of such investment opportunities in the relevant organizational, offering or similar documents, if any, for such investment vehicles. In the absence of any such provisions, OFS Advisor will consider the following factors and the weight that should be given with respect to each of these factors:

investment guidelines and/or restrictions, if any, set forth in the applicable organizational, offering or similar documents for the investment vehicles:

risk and return profile of the investment vehicles;
suitability/priority of a particular investment for the investment vehicles;
if applicable, the targeted position size of the investment for the investment vehicles;
level of available cash for investment with respect to the investment vehicles;
total amount of funds committed to the investment vehicles; and
the age of the investment vehicles and the remaining term of their respective investment periods, if any.

In situations where co-investment with other accounts is not permitted or appropriate, OFS Advisor will need to decide which account will proceed with the investment. The decision by OFS Advisor to allocate an opportunity to another entity could cause us to forego an investment opportunity that we otherwise would

TABLE OF CONTENTS

have made. These restrictions, and similar restrictions that limit our ability to transact business with our officers or directors or their affiliates, may limit the scope of investment opportunities that would otherwise be available to us.

SBA regulations limit the outstanding dollar amount of SBA guaranteed debenture funding that may be received by an SBIC or group of SBICs under common control.

SBA regulations currently limit the amount that an SBIC may borrow to up to a maximum of \$150 million when it has at least \$75 million in regulatory capital, receives a leverage commitment from the SBA and has been through an examination by the SBA subsequent to licensing. For two or more SBICs under common control, the maximum amount of outstanding SBA-provided leverage cannot exceed \$225 million. A bill proposed in the U.S. House of Representatives would increase the total SBIC leverage capacity for affiliated SBIC funds from \$225 million to \$350 million. However, the ultimate form and likely outcome of such legislation, if reintroduced, or any similar legislation cannot be predicted.

We cannot presently predict whether or not we will borrow the maximum permitted amount; if we reach the maximum dollar amount of SBA guaranteed debentures permitted, and thereafter require additional capital, our cost of capital may increase, and there is no assurance that we will be able to obtain additional financing on acceptable terms.

Moreover, SBIC I LP s status as an SBIC does not automatically assure that it will receive SBA guaranteed debenture funding. Receipt of SBA leverage funding is dependent upon whether SBIC I LP is and continues to be in compliance with SBA regulations and policies and whether funding is available. The amount of SBA leverage funding available to SBICs is dependent upon annual Congressional authorizations and in the future may be subject to annual Congressional appropriations. There can be no assurance that there will be sufficient debenture funding available at the times desired by SBIC I LP. As of March 31, 2016, the Company had fully funded its \$75.0 million commitment to SBIC I LP. As of December 31, 2015, SBIC I LP had leverage commitments of approximately \$149.9 million from the SBA, and \$149.9 million of outstanding SBA-guaranteed debentures, leaving no incremental borrowing capacity under present SBA regulations. In January 2015, we filed an application with the SBA for a second SBIC license, which, if approved, would provide up to \$75.0 million in additional SBA debentures for the funding of our future investments upon our contribution of at least \$37.5 million in additional regulatory capital and subject to the issuance of a leverage commitment by the SBA and other customary procedures. There can be no assurance as to whether or when this application will be approved by the SBA.

SBIC I LP is subject to SBA regulations.

Our investment strategy includes SBIC I LP, which is regulated by the SBA. On December 4, 2013, we acquired the remaining limited and general partnership interests of SBIC I LP that we did not already own, which resulted in SBIC I LP becoming our wholly-owned subsidiary.

The SBIC license allows SBIC I LP to receive SBA-guaranteed debenture funding, subject to the issuance of leverage commitments by the SBA and other customary procedures. Prior to becoming our wholly-owned subsidiary, SBIC I LP had received \$67.3 million in SBA leverage commitments. In July 2014, the Company funded the remaining \$13.6 million of its \$75 million commitment to SBIC I LP. As of March 31, 2016, SBIC I LP had leverage commitments of approximately \$149.9 million from the SBA, and \$149.9 million of outstanding SBA-guaranteed debentures, leaving no incremental borrowing capacity under present SBA regulations.

Further, the SBA regulations require that a licensed SBIC be periodically examined and audited by the SBA to determine its compliance with the relevant SBA regulations. If SBIC I LP fails to comply with applicable SBA regulations, the SBA could, depending on the severity of the violation, limit or prohibit its use of debentures, declare outstanding debentures immediately due and payable, and/or limit its ability to make new investments. The SBA, as a creditor, will have a superior claim to SBIC I LP s assets over SBIC I LP s limited partners and our shareholders in the event SBIC I LP is liquidated or the SBA exercises its remedies under the SBA debentures issued by SBIC I LP in the event of a default. In addition, the SBA can revoke or suspend a license for willful or repeated violation of, or willful or repeated failure to observe, any provision

TABLE OF CONTENTS

of the Small Business Investment Act of 1958 or any rule or regulation promulgated thereunder. These actions by the SBA would, in turn, negatively affect us because of our ownership interest in SBIC I LP.

The SBA places certain limitations on the financing terms of investments by SBICs in portfolio companies and prohibits an SBIC from providing funds to small businesses for certain purposes, such as relending, real estate or investing in companies outside of the United States, and providing funds to businesses engaged in a few prohibited industries and to certain passive (i.e., non-operating) companies. In addition, without prior SBA approval, an SBIC may not invest an amount equal to more than approximately 30% of the SBIC s regulatory capital in any one company and its affiliates. Compliance with SBIC requirements may cause SBIC I LP to forego attractive investment opportunities that are not permitted under SBA regulations.

SBIC I LP is subject to ongoing regulation and oversight by the SBA, including requirements with respect to maintaining certain minimum financial ratios and other covenants. In addition, SBIC I LP may also be limited in its ability to make distributions to us if it does not have sufficient accumulated net profit, in accordance with SBA regulations. These requirements may make it more difficult for us to achieve our investment objective.

We finance our investments with borrowed money, which magnifies the potential for gain or loss on amounts invested and may increase the risk of investing in us.

The use of leverage magnifies the potential for gain or loss on amounts invested. The use of leverage is generally considered a speculative investment technique and increases the risks associated with investing in our securities. We may pledge up to 100% of our assets and may grant a security interest in all of our assets, other than assets held in SBIC I LP and our ownership interest in SBIC I LP and SBIC I GP, under the terms of any debt instruments we may enter into with lenders. In addition, under the terms of any credit facility or other debt instrument we enter into, we are likely to be required by its terms to use the net proceeds of any investments that we sell to repay a portion of the amount borrowed under such facility or instrument before applying such net proceeds to any other uses. If the value of our assets decreases, leveraging would cause net asset value to decline more sharply than it otherwise would have had we not leveraged, thereby magnifying losses or eliminating our equity stake in a leveraged investment. Similarly, any decrease in our revenue or income will cause our net income to decline more sharply than it would have had we not borrowed. Such a decline would also negatively affect our ability to make distribution payments on our common stock or preferred stock. Our ability to service our debt will depend largely on our financial performance and will be subject to prevailing economic conditions and competitive pressures. Moreover, because the management fee payable to OFS Advisor is payable based on our total assets (other than cash and cash equivalents and goodwill and intangible assets related to the SBIC Acquisitions but including assets purchased with borrowed amounts and including assets owned by any consolidated entity), OFS Advisor will have a financial incentive to incur leverage which may not be consistent with our shareholders interests. In addition, our common shareholders will bear the burden of any increase in our expenses as a result of our use of leverage, including interest expenses and any increase in the management fee

As a BDC, we are generally required to meet a coverage ratio of total assets to total borrowings and other senior securities, which include all of our borrowings and any preferred stock that we may issue in the future, of at least 200%. An asset coverage ratio of 200% means that for every \$100 in net assets, the Company may raise \$100 from borrowings or other debt. If this ratio declines below 200%, we will not be able to incur additional debt and could be required to sell a portion of our investments to repay some debt when it is disadvantageous to do so. This could have a material adverse effect on our operations, and we may not be able to make distributions. The amount of leverage that we employ will depend on OFS Advisor s and our board of directors assessment of market and other factors at the time

payable to OFS Advisor.

We finance our investments with borrowed money, which magnifies the potential for gain or loss on amound investments with borrowed money, which magnifies the potential for gain or loss on amound investments.

of any proposed borrowing. We cannot assure shareholders that we will be able to obtain credit at all or on terms acceptable to us. 23

We finance our investments with borrowed money, which magnifies the potential for gain or loss on amounts invest

TABLE OF CONTENTS

The following table illustrates the effect of leverage on returns from an investment in our common stock assuming various annual returns, net of expenses. The calculations in the table below are hypothetical and actual returns may be higher or lower than those appearing in the table below.

	Assumed Return on Our Portfolio (Net of Expenses)				
	-10%	-5%	0%	5%	10%
Corresponding return to common stockholder ⁽¹⁾	-21 %	-12 %	-4 %	5 %	14 %

Assumes \$245.4 million in investments at fair value, \$149.9 million in debt outstanding, \$142.0 million in net (1) assets and an average cost of funds of 3.42%. Assumptions are based on our financial condition and our average cost of funds at March 31, 2016.

Based on our outstanding indebtedness of \$149.9 million as of March 31, 2016 and the average cost of funds of 3.42% as of that date, our investment portfolio must experience an annual return of at least 2.1% to cover interest payments on the outstanding debt.

Changes in interest rates will affect our cost of capital and net investment income.

To the extent we borrow money or issue preferred stock to make investments, our net investment income will depend, in part, upon the difference between the rate at which we borrow funds or pay distributions on preferred stock and the rate at which we invest those funds. As a result, we can offer no assurance that a significant change in market interest rates will not have a material adverse effect on our net investment income in the event we use debt to finance our investments. In periods of rising interest rates, our cost of funds would increase, which could reduce our net investment income. We may use interest rate risk management techniques in an effort to limit our exposure to interest rate fluctuations. Such techniques may include various interest rate hedging activities to the extent permitted by the 1940 Act.

A rise in the general level of interest rates typically leads to higher interest rates applicable to our debt investments. Accordingly, an increase in interest rates may result in an increase of the amount of incentive fees payable to OFS Advisor.

We may enter into reverse repurchase agreements, which are another form of leverage.

We may enter into reverse repurchase agreements as part of our management of our temporary investment portfolio. Under a reverse repurchase agreement, we will effectively pledge our assets as collateral to secure a short-term loan. Generally, the other party to the agreement makes the loan in an amount equal to a percentage of the fair value of the pledged collateral. At the maturity of the reverse repurchase agreement, we will be required to repay the loan and correspondingly receive back our collateral. While used as collateral, the assets continue to pay principal and interest which are for the benefit of us.

Our use of reverse repurchase agreements, if any, involves many of the same risks involved in our use of leverage, as the proceeds from reverse repurchase agreements generally will be invested in additional securities. There is a risk that the market value of the securities acquired in the reverse repurchase agreement may decline below the price of the securities that we have sold but remain obligated to purchase. In addition, there is a risk that the market value of the securities retained by us may decline. If a buyer of securities under a reverse repurchase agreement were to file for

bankruptcy or experience insolvency, we may be adversely affected. Also, in entering into reverse repurchase agreements, we would bear the risk of loss to the extent that the proceeds of such agreements at settlement are less than the fair value of the underlying securities being pledged. In addition, due to the interest costs associated with reverse repurchase agreements transactions, our net asset value would decline, and, in some cases, we may be worse off than if we had not used such instruments.

We may in the future determine to fund a portion of our investments with preferred stock, which would magnify the potential for gain or loss and the risks of investing in us in the same way as our borrowings.

Preferred stock, which is another form of leverage, has the same risks to our common shareholders as borrowings because the distributions on any preferred stock we issue must be cumulative. Payment of such distributions and repayment of the liquidation preference of such preferred stock must take preference over

any dividends or other payments to our common shareholders, and preferred shareholders are not subject to any of our expenses or losses and are not entitled to participate in any income or appreciation in excess of their stated preference.

We operate in a highly competitive market for investment opportunities, which could reduce returns and result in losses.

A number of entities compete with us to make the types of investments that we plan to make. We will compete with public and private funds, commercial and investment banks, commercial financing companies and, to the extent they provide an alternative form of financing, private equity and hedge funds. Many of our competitors are substantially larger and have considerably greater financial, technical and marketing resources than we do. For example, some of our competitors may have access to funding sources that are not available to us. In addition, some of our competitors may have higher risk tolerances or different risk assessments than us. Furthermore, many of our competitors are not subject to the regulatory restrictions that the 1940 Act imposes on us as a BDC or the source of income, asset diversification and distribution requirements we must satisfy to maintain our RIC status. These characteristics could allow our competitors to consider a wider variety of instruments, establish more relationships and offer better pricing and more flexible structuring than we are able to. The competitive pressures we face may have a material adverse effect on our business, financial condition and results of operations. As a result of this competition, we may not be able to take advantage of attractive investment opportunities from time to time, and we may not be able to identify and make investments that are consistent with our investment objective.

With respect to the investments we make, we will not seek to compete based primarily on the interest rates we will offer, and we believe that some of our competitors may make loans with interest rates that will be lower than the rates we offer. In the secondary market for acquiring existing loans, we expect to compete generally on the basis of pricing terms. With respect to all investments, we may lose some investment opportunities if we do not match our competitors pricing, terms and structure. However, if we match our competitors pricing, terms and structure, we may experience decreased net interest income, lower yields and increased risk of credit loss. We may also compete for investment opportunities with OFSAM and its other affiliates or accounts managed by OFSAM or one of its other affiliates. Although OFS Advisor will allocate opportunities in accordance with its policies and procedures, allocations to such other accounts will reduce the amount and frequency of opportunities available to us and may not be in the best interests of us and our shareholders. Moreover, the performance of investments will not be known at the time of allocation.

We may suffer credit losses.

Investment in middle market companies is highly speculative and involves a high degree of risk of credit loss, and therefore our securities may not be suitable for someone with a low tolerance for risk. These risks are likely to increase during volatile economic periods, such as the U.S. and many other economies have recently been experiencing.

We will be subject to corporate-level federal income tax if we are unable to qualify or maintain our qualification as a RIC.

We have elected to be treated as a RIC under Subchapter M of the Code, but no assurance can be given that we will be able to maintain RIC status. As a RIC, we are not required to pay corporate-level federal income taxes on our income and capital gains distributed (or deemed distributed) to our shareholders. To continue to qualify as a RIC under the Code and to be relieved of federal taxes on income and gains distributed to our shareholders, we must meet certain

We may in the future determine to fund a portion of our investments withpreferred stock, which would massify the p

source-of-income, asset diversification and distribution requirements. The distribution requirement for a RIC is satisfied if we distribute at least 90% of our net ordinary income and net short-term capital gains in excess of net long-term capital losses, if any, to our shareholders on an annual basis. We will be subject, to the extent we use debt financing or preferred stock, to certain asset coverage ratio requirements under the 1940 Act and financial covenants under loan and credit agreements or preferred stock that could, under certain circumstances, restrict us from making distributions necessary to qualify as a RIC. If we are unable to obtain cash from other sources, we may fail to qualify and maintain our qualification for the tax benefits available to RICs and, thus, may be subject to corporate-level federal income tax. To maintain our qualification as a RIC, we must also meet certain asset diversification

TABLE OF CONTENTS

requirements at the end of each calendar quarter. Failure to meet these tests may result in our having to dispose of certain investments quickly in order to prevent the loss of RIC status. Because most of our investments are in private or thinly traded public companies, any such dispositions could be made at disadvantageous prices and may result in substantial losses. If we fail to continue to qualify, as a RIC for any reason and become subject to corporate-level federal income tax, the resulting corporate taxes could substantially reduce our net assets, the amount of income available for distributions to shareholders and the amount of our distributions and the amount of funds available for new investments. Such a failure would have a material adverse effect on us and our shareholders. See Material U.S. Federal Income Tax Considerations Taxation as a RIC.

Our subsidiaries and portfolio companies may be unable to make distributions to us that will enable us to meet RIC requirements, which could result in the imposition of an entity-level tax.

In order for us to continue to maintain our status as a RIC and to minimize corporate-level taxes, we are required to distribute on an annual basis substantially all of our taxable income, which includes income from our subsidiaries and portfolio companies. As a substantial portion of our investments are made through SBIC I LP, we are significantly dependent on that entity for cash distributions to enable us to maintain the RIC distribution requirements. SBIC I LP may be limited by the Small Business Investment Act of 1958 and SBA regulations governing SBICs from making certain distributions to us that may be necessary to enable us to continue to qualify as a RIC. We may have to request a waiver of the SBA s restrictions for SBIC I LP to make certain distributions to maintain our status as a RIC and we cannot assure shareholders that the SBA will grant such waiver. If our subsidiaries and portfolio companies are unable to make distributions to us, this may result in loss of RIC status and a consequent imposition of a corporate-level federal income tax on us.

We may have difficulty paying our required distributions if we recognize income before, or without, receiving cash representing such income.

For U.S. federal income tax purposes, we will include in income certain amounts that we have not yet received in cash, such as the accretion of OID. This may arise if we purchase assets at a discount, receive warrants in connection with the making of a loan or in other circumstances, or through contracted PIK interest or dividends (meaning interest or dividends paid in the form of additional principal amount of the loan or equity security instead of in cash), which represents contractual interest or dividends added to the loan balance or equity security and due at the end of the investment term. Such OID, which could be significant relative to our overall investment activities, or increases in loan or equity investment balances as a result of contracted PIK arrangements, will be included in income before we receive any corresponding cash payments. We also may be required to include in income certain other amounts that we will not receive in cash.

Since in certain cases we may recognize income before or without receiving cash representing such income, we may have difficulty meeting the requirement to distribute at least 90% of our net ordinary income and net short-term capital gains in excess of net long-term capital losses, if any, to maintain the tax benefits available to RICs. In such a case, we may have to sell some of our investments at times and/or at prices we would not consider advantageous, raise additional debt or equity capital or reduce new investment originations and sourcings to meet these distribution requirements. If we sell built-in-gain assets, we may be required to recognize taxable income in respect of the built-in-gain on such assets. In such a case, we would have to distribute all of our taxable gain (including the built-in-gain) in respect of such sale to avoid the imposition of entity-level tax on such gain. If we are not able to obtain such cash from other sources, we may fail to maintain the tax benefits available to RICs and thus be subject to

corporate-level income tax. See Material U.S. Federal Income Tax Considerations Taxation as a RIC.

We may in the future choose to pay distributions in our own stock, in which case shareholders may be required to pay tax in excess of the cash they receive.

We make taxable distributions that are payable in cash or shares of our common stock at the election of each shareholder. Under certain applicable provisions of the Code and the Treasury regulations, taxable distributions payable in cash or in shares of stock at the election of shareholders are treated as taxable dividends. The Internal Revenue Service has issued private rulings indicating that this rule will apply even where the total amount of cash that may be distributed is limited to no more than 20% of the total

TABLE OF CONTENTS

distribution. Under these rulings, if too many shareholders elect to receive their distributions in cash, each such shareholder would receive a pro rata share of the total cash to be distributed and would receive the remainder of their distribution in shares of stock. If we decide to make any distributions consistent with these rulings that are payable in part in our stock, taxable shareholders receiving such distributions will be required to include the full amount of the distributions (whether received in cash, our stock, or a combination thereof) as ordinary income (or as long-term capital gain to the extent such distribution is properly reported as a capital gain dividend) to the extent of our current and accumulated earnings and profits for United States federal income tax purposes. As a result, a U.S. shareholder may be required to pay tax with respect to such distributions in excess of any cash received. If a U.S. shareholder sells the stock it receives as a distribution in order to pay this tax, the sales proceeds may be less than the amount included in income with respect to the distribution, depending on the market price of our stock at the time of the sale.

Furthermore, with respect to non-U.S. shareholders, we may be required to withhold U.S. tax with respect to such distributions, including in respect of all or a portion of such distribution that is payable in stock. In addition, if a significant number of our shareholders determine to sell shares of our stock in order to pay taxes owed on distributions, it may put downward pressure on the trading price of our stock.

Because we expect to distribute substantially all of our net investment income and net realized capital gains to our shareholders, we may need additional capital to finance our growth and such capital may not be available on favorable terms or at all.

We have elected to be taxed for federal income tax purposes as a RIC under Subchapter M of the Code. If we meet certain requirements, including source of income, asset diversification and distribution requirements, and if we continue to qualify as a BDC, we will continue to qualify to be a RIC under the Code and will not have to pay corporate-level taxes on income we distribute to our shareholders as distributions, allowing us to substantially reduce or eliminate our corporate-level tax liability. As a BDC, we are generally required to meet a coverage ratio of total assets to total senior securities, which includes all of our borrowings and any preferred stock we may issue in the future, of at least 200% at the time we issue any debt or preferred stock. This requirement limits the amount that we may borrow. Because we will continue to need capital to grow our investment portfolio, this limitation may prevent us from incurring debt or preferred stock and require us to raise additional equity at a time when it may be disadvantageous to do so. We cannot assure investors that debt and equity financing will be available to us on favorable terms, or at all, and debt financings may be restricted by the terms of any of our outstanding borrowings. In addition, as a BDC, we are generally not permitted to issue common stock priced below net asset value without shareholder approval. If additional funds are not available to us, we could be forced to curtail or cease new lending and investment activities, and our net asset value could decline.

Regulations governing our operation as a BDC affect our ability to and the way in which we raise additional capital. As a BDC, we will need to raise additional capital, which will expose us to risks, including the typical risks associated with leverage.

We may issue debt securities or preferred stock and/or borrow money from banks or other financial institutions, which we refer to collectively as senior securities, up to the maximum amount permitted by the 1940 Act. Under the provisions of the 1940 Act, we are permitted as a BDC to issue senior securities in amounts such that our asset coverage ratio, as defined in the 1940 Act, equals at least 200% of gross assets less all liabilities and indebtedness not represented by senior securities, after each issuance of senior securities. If the value of our assets declines, we may be unable to satisfy this test. If that happens, we may be required to sell a portion of our investments and, depending on

We may in the future choose to pay distributions in our own stock, in whichcase shareholders may be required to pay

the nature of our leverage, repay a portion of our indebtedness at a time when such sales may be disadvantageous. Also, any amounts that we use to service our indebtedness would not be available for distributions to our common shareholders. If we issue senior securities, we will be exposed to typical risks associated with leverage, including an increased risk of loss.

As of March 31, 2016, we had debt outstanding in the amount of \$149.9 million. Our ability to incur additional debt and remain in compliance with the asset coverage test will be limited. We may seek an additional credit facility to finance investments or for working capital requirements. There can be no assurance that we will be able to obtain such financing on favorable terms or at all. We have received an exemptive order from the SEC to permit us to exclude the debt of SBIC I LP guaranteed by the SBA from our definition of senior securities in our statutory 200% asset coverage ratio under the 1940 Act.

If we issue preferred stock, the preferred stock would rank senior to common stock in our capital structure, preferred shareholders would have separate voting rights on certain matters and might have other rights, preferences or privileges more favorable than those of our common shareholders, and the issuance of preferred stock could have the effect of delaying, deferring or preventing a transaction or a change of control that might involve a premium price for holders of our common stock or otherwise be in our shareholders best interest. Holders of our common stock will directly or indirectly bear all of the costs associated with offering and servicing any preferred stock that we issue. In addition, any interests of preferred shareholders may not necessarily align with the interests of holders of our common stock and the rights of holders of shares of preferred stock to receive dividends would be senior to those of holders of shares of our common stock. We are not generally able to issue and sell our common stock at a price below net asset value per share. We may, however, sell our common stock, or warrants, options or rights to acquire our common stock, at a price below the then-current net asset value per share of our common stock if our board of directors determines that such sale is in the best interests of us and our shareholders, and if our shareholders approve any such sale. In any such case, the price at which our securities are to be issued and sold may not be less than a price that, in the determination of our board of directors, closely approximates the market value of such securities (less any distributing commission or discount). If we raise additional funds by issuing common stock or senior securities convertible into, or exchangeable for, our common stock, then the percentage ownership of our shareholders at that time will decrease, and our shareholders might experience dilution.

Our ability to invest in public companies may be limited in certain circumstances.

To maintain our status as a BDC, we are not permitted to acquire any assets other than qualifying assets specified in the 1940 Act unless, at the time the acquisition is made, at least 70% of our assets, as defined by the 1940 Act, are qualifying assets (with certain limited exceptions). Subject to certain exceptions for follow-on investments and distressed companies, an investment in an issuer that has outstanding securities listed on a national securities exchange may be treated as a qualifying asset only if such issuer has a common equity market capitalization that is less than \$250 million at the time of such investment and meets the other specified requirements.

The PWB Credit Facility contains various covenants and restrictions which, if not complied with, could accelerate our repayment obligations under the credit facility or limit its use, thereby materially and adversely affecting our liquidity, financial condition, results of operations and ability to pay distributions.

On November 5, 2015, we became party to the PWB Credit Facility, which provides us with a senior secured revolving line of credit of up to \$15.0 million, with maximum availability equal to 50% of the aggregate outstanding principal amount of eligible loans included in the borrowing base and otherwise specified in the credit agreement. The PWB Credit Facility is guaranteed by our subsidiary OFS Capital WM, LLC (OFS Capital WM) and secured by all of our current and future assets excluding assets held by SBIC I LP and our SBIC I LP and SBIC I GP partnership interests. The PWB Credit Facility contains customary terms and conditions, including, without limitation, affirmative and negative covenants such as information reporting requirements, a minimum tangible net asset value, a minimum quarterly net investment income after incentive fees, and a statutory asset coverage test. The PWB Credit Facility also contains customary events of default, including, without limitation, nonpayment, misrepresentation of representations and warranties in a material respect, breach of covenant, cross-default to other indebtedness, bankruptcy, change in investment advisor, and the occurrence of a material adverse change in our financial condition. The Credit Facility permits us to fund additional investments as long as we are within the conditions set out in the credit agreement. Our

continued compliance with these covenants depends on many factors, some of which are beyond our control, and there are no assurances that we will continue to comply with these covenants. Our failure to satisfy these covenants could result in foreclosure by our lenders, which would accelerate our repayment obligations under the facility and thereby have a material adverse effect on our business, liquidity, financial condition, results of operations and ability to pay distributions to our stockholders. The Credit Facility remained undrawn at March 31, 2016.

Adverse developments in the credit markets may impair our ability to secure debt financing.

During the economic downturn in the United States that began in mid-2007, many commercial banks and other financial institutions stopped lending or significantly curtailed their lending activity. In addition, in an

effort to stem losses and reduce their exposure to segments of the economy deemed to be high risk, some financial institutions limited routine refinancing and loan modification transactions and even reviewed the terms of existing facilities to identify bases for accelerating the maturity of existing lending facilities. As a result, it may be difficult for us to obtain desired financing to finance the growth of our investments on acceptable economic terms, or at all.

If we are unable to consummate credit facilities on commercially reasonable terms, our liquidity may be reduced significantly. If we are unable to repay amounts outstanding under any facility we may enter into and are declared in default or are unable to renew or refinance any such facility, it would limit our ability to initiate significant originations or to operate our business in the normal course. These situations may arise due to circumstances that we may be unable to control, such as inaccessibility of the credit markets, a severe decline in the value of the U.S. dollar, a further economic downturn or an operational problem that affects third parties or us, and could materially damage our business. Moreover, we are unable to predict when economic and market conditions may become more favorable. Even if such conditions improve broadly and significantly over the long term, adverse conditions in particular sectors of the financial markets could adversely impact our business.

Terrorist attacks, acts of war or natural disasters may affect any market for our common stock, impact the businesses in which we invest and harm our business, operating results and financial condition.

Terrorist acts, acts of war or natural disasters may disrupt our operations, as well as the operations of the businesses in which we invest. Such acts have created, and continue to create, economic and political uncertainties and have contributed to global economic instability. Future terrorist activities, military or security operations, or natural disasters could further weaken the domestic/global economies and create additional uncertainties, which may negatively impact the businesses in which we invest directly or indirectly and, in turn, could have a material adverse impact on our business, operating results and financial condition. Losses from terrorist attacks and natural disasters are generally uninsurable.

The failure in cyber security systems, as well as the occurrence of events unanticipated in our disaster recovery systems and management continuity planning could impair our ability to conduct business effectively.

The occurrence of a disaster such as a cyber-attack, a natural catastrophe, an industrial accident, events unanticipated in our disaster recovery systems, or a support failure from external providers, could have an adverse effect on our ability to conduct business and on our results of operations and financial condition, particularly if those events affect our computer-based data processing, transmission, storage, and retrieval systems or destroy data. If a significant number of our managers were unavailable in the event of a disaster, our ability to effectively conduct our business could be severely compromised.

We depend heavily upon computer systems to perform necessary business functions. Despite our implementation of a variety of security measures, our computer systems could be subject to cyber-attacks and unauthorized access, such as physical and electronic break-ins or unauthorized tampering. Like other companies, we may experience threats to our data and systems, including malware and computer virus attacks, unauthorized access, system failures and disruptions.

If one or more of these events occurs, it could potentially jeopardize the confidential, proprietary and other information processed and stored in, and transmitted through, our computer systems and networks, or otherwise cause interruptions or malfunctions in our operations, which could result in damage to our reputation, financial losses, litigation, increased costs, regulatory penalties and/or customer dissatisfaction or loss.

Third parties with which we do business may also be sources of cybersecurity or other technological risks. We outsource certain functions and these relationships allow for the storage and processing of our information, as well as customer, counterparty, employee and borrower information. While we engage in actions to reduce our exposure resulting from outsourcing, ongoing threats may result in unauthorized access, loss, exposure or destruction of data, or other cybersecurity incidents, with increased costs and other consequences, including those described above.

TABLE OF CONTENTS

If we do not invest a sufficient portion of our assets in qualifying assets, we could fail to continue to qualify as a BDC or be precluded from investing according to our current business strategy.

As a BDC, we may not acquire any assets other than qualifying assets unless, at the time of and after giving effect to such acquisition, at least 70% of our assets, as defined by the 1940 Act, are qualifying assets. See Regulation.

We believe that most of the investments that we may acquire in the future will constitute qualifying assets. However, we may be precluded from investing in what we believe are attractive investments if such investments are not qualifying assets for purposes of the 1940 Act. If a sufficient portion of our assets are not qualifying assets, we could violate the 1940 Act provisions applicable to business development companies. As a result of such violation, specific rules under the 1940 Act could prevent us, for example, from making follow-on investments in existing portfolio companies (which could result in the dilution of our position) or could require us to dispose of investments at inappropriate times in order to come into compliance with the 1940 Act. If we need to dispose of such investments quickly, it could be difficult to dispose of such investments on favorable terms. We may not be able to find a buyer for such investments and, even if we do find a buyer, we may have to sell the investments at a substantial loss. Any such outcomes would have a material adverse effect on our business, financial condition and results of operations.

If we do not maintain our status as a BDC, we would be subject to regulation as a registered closed-end investment company under the 1940 Act. As a registered closed-end fund, we would be subject to substantially more regulatory restrictions under the 1940 Act which would significantly decrease our operating flexibility.

Many of our portfolio investments are recorded at fair value as determined in good faith by our board of directors and, as a result, there may be uncertainty as to the value of our portfolio investments.

Many of our portfolio investments, including those of our subsidiaries, take the form of securities that are not publicly traded. The fair value of securities and other investments that are not publicly traded may not be readily determinable. We value these securities at fair value as determined in good faith by our board of directors, including to reflect significant events affecting the value of our securities. Most of our investments (other than cash and cash equivalents) are classified as Level 3 under Accounting Standards Codification Topic 820, Fair Value Measurement and Disclosures (ASC Topic 820). This means that our portfolio valuations are based on unobservable inputs and our own assumptions about how market participants would price the asset or liability in question. Inputs into the determination of fair value of our portfolio investments require significant management judgment or estimation. Even if observable market data are available, such information is result of consensus pricing information or broker quotes, which include a disclaimer that the broker would not be held to such a price in an actual transaction. The non-binding nature of consensus pricing and/or quotes accompanied by disclaimers materially reduces the reliability of such information. We presently retain the services of two independent service providers to review the valuation of these securities.

The types of factors that the board of directors takes into account in determining the fair value of our investments generally include, as appropriate, comparison to third-party yield benchmarks and comparison to publicly traded securities including such factors as yield, maturity and measures of credit quality, the enterprise value of a portfolio company, the nature and realizable value of any collateral, the portfolio company s ability to make payments and its earnings and discounted cash flow, the markets in which the portfolio company does business and other relevant factors. Because such valuations, and particularly valuations of private securities and private companies, are inherently uncertain, may fluctuate over short periods of time and may be based on estimates, our determinations of

If we do not invest a sufficient portion of our assets in qualifying assets, we could fail to continue to qualify6as a BD0

fair value may differ materially from the values that would have been used if a ready market for these securities existed. Our net asset value could be adversely affected if our determinations regarding the fair value of our investments were materially higher than the values that we ultimately realize upon the disposal of such securities.

We adjust quarterly the valuation of our portfolio to reflect our board of directors determination of the fair value of each investment in our portfolio. Any changes in fair value are recorded in our statement of income as net change in unrealized appreciation or depreciation.

We may experience fluctuations in our quarterly operating results.

We could experience fluctuations in our quarterly operating results due to a number of factors, including the interest rate payable on the debt securities we acquire, the default rate on such securities, the level of our expenses, variations in and the timing of the recognition of realized and unrealized gains or losses, distributions from our subsidiaries and portfolio companies, the degree to which we encounter competition in our markets and general economic conditions. In light of these factors, results for any period should not be relied upon as being indicative of performance in future periods.

Changes in the laws or regulations governing our business, or changes in the interpretations thereof, and any failure by us to comply with these laws or regulations, could have a material adverse effect on our, and our portfolio companies, business, results of operations or financial condition.

We and our portfolio companies are subject to regulation by laws at the U.S. federal, state and local levels, including those that govern BDCs, RICs, SBICs or non-depository commercial lenders. These laws and regulations, including applicable accounting standards, as well as their interpretation, may change from time to time, and new laws, regulations, accounting standards and interpretations may also come into effect. Any such new or changed laws or regulations could have a material adverse effect on our business.

We are also subject to judicial and administrative decisions that affect our operations, including our loan originations, maximum interest rates, fees and other charges, disclosures to portfolio companies, the terms of secured transactions, collection and foreclosure procedures and other trade practices. If these laws, regulations or decisions change, or if we expand our business into jurisdictions that have adopted more stringent requirements than those in which we currently conduct business, we may have to incur significant expenses in order to comply, or we might have to restrict our operations. If we do not comply with applicable laws, regulations and decisions, we may lose licenses needed for the conduct of our business and may be subject to civil fines and criminal penalties.

In addition, changes to the laws and regulations governing our operations related to permitted investments may cause us to alter our investment strategy, including making investments in entities such as OFS Capital WM and SBIC I LP, in order to avail ourselves of new or different opportunities. Such changes could result in material differences to the strategies and plans set forth in this annual report on Form 10-K and our accounting practices described in this annual report on Form 10-K, and may shift our investment focus from the areas of expertise of OFS Advisor to other types of investments in which OFS Advisor may have little or no expertise or experience. Any such changes, if they occur, could have a material adverse effect on our results of operations and the value of your investment.

On July 21, 2010, the Wall Street Reform and Consumer Protection Act, or Dodd-Frank Act, was signed into law. Although passage of the Dodd-Frank Act has resulted in extensive rulemaking and regulatory changes that affect us and the financial industry as a whole, many of its provisions remain subject to extended implementation periods and delayed effective dates and will require extensive rulemaking by regulatory authorities. While the full impact of the Dodd-Frank Act on us and our portfolio companies may not be known for an extended period of time, the Dodd-Frank Act, including future rules implementing its provisions and the interpretation of those rules, along with other legislative and regulatory proposals directed at the financial services industry or affecting taxation that are proposed or pending in the U.S. Congress, may negatively impact the operations, cash flows or financial condition of us or our portfolio companies, impose additional costs on us or our portfolio companies, intensify the regulatory supervision of us or our portfolio companies or otherwise adversely affect our business or the business of our portfolio companies.

Over the last several years, there has been an increase in regulatory attention to the extension of credit outside of the traditional banking sector, raising the possibility that some portion of the non-bank financial sector will be subject to new regulation. While it cannot be known at this time whether these regulations will be implemented or what form they will take, increased regulation of non-bank credit extension could negatively impact our operations, cash flows or financial condition, impose additional costs on us, intensify the regulatory supervision of us or otherwise adversely affect our business.

The effect of global climate change may impact the operations of our portfolio companies.

There may be evidence of global climate change. Climate change creates physical and financial risk and some of our portfolio companies may be adversely affected by climate change. For example, the needs of customers of energy companies vary with weather conditions, primarily temperature and humidity. To the extent weather conditions are affected by climate change, energy use could increase or decrease depending on the duration and magnitude of any changes. Increases in the cost of energy could adversely affect the cost of operations of our portfolio companies if the use of energy products or services is material to their business. A decrease in energy use due to weather changes may affect some of our portfolio companies financial condition, through decreased revenues. Extreme weather conditions in general require more system backup, adding to costs, and can contribute to increased system stresses, including service interruptions.

Proposed legislation may allow us to incur additional leverage.

Legislation has been introduced in the U.S. House of Representatives which is intended to revise certain regulations applicable to BDCs. The legislation provides for (i) increasing the amount of funds BDCs may borrow by reducing asset to debt limitations from 2:1 to 3:2, (ii) permitting BDCs to file registration statements with the U.S. Securities and Exchange Commission that incorporate information from already-filed reports by reference, (iii) utilizing other streamlined registration processes afforded to operating companies, and (iv) allowing BDCs to own investment adviser subsidiaries. There are no assurances as to when the legislation will be reintroduced and enacted by Congress, if at all, or, if enacted, what final form the legislation would take.

Loss of status as a RIC would reduce our net asset value and distributable income.

We have qualified as a RIC under the Code. As a RIC, we do not have to pay federal income taxes on our income (including realized gains) that we distribute to our shareholders, provided that we satisfy certain distribution and other requirements. Accordingly, we are not permitted under accounting rules to establish reserves for taxes on our unrealized capital gains. If we fail to qualify for RIC status in any year, to the extent that we had unrealized gains, we would have to establish reserves for taxes, which would reduce our net asset value and the amount potentially available for distribution. In addition, if we, as a RIC, were to decide to make a deemed distribution of net realized capital gains and retain the net realized capital gains, we would have to establish appropriate reserves for taxes that we would have to pay on behalf of shareholders. It is possible that establishing reserves for taxes could have a material adverse effect on the value of our common stock. See Material U.S. Federal Income Tax Considerations Taxation as a RIC.

Our board of directors may change our investment objective, operating policies and strategies without prior notice or shareholder approval.

Our board of directors has the authority, except as otherwise provided in the 1940 Act, to modify or waive certain of our operating policies and strategies without prior notice and without shareholder approval. However, absent shareholder approval, we may not change the nature of our business so as to cease to be, or withdraw our election as, a BDC. Under Delaware law, we also cannot be dissolved without prior shareholder approval except by judicial action. We cannot predict the effect any changes to our current operating policies and strategies would have on our business,

operating results and the price value of our common stock. Nevertheless, any such changes could adversely affect our business and impair our ability to make distributions.

OFS Advisor can resign on 60 days notice, and we may not be able to find a suitable replacement within that time, resulting in a disruption in our operations that could adversely affect our financial condition, business and results of operations.

OFS Advisor has the right, under the Investment Advisory Agreement, to resign at any time upon not less than 60 days written notice, whether we have found a replacement or not. If OFS Advisor resigns, we may not be able to find a new investment adviser or hire internal management with similar expertise and ability to provide the same or equivalent services on acceptable terms within 60 days, or at all. If we are unable to do

TABLE OF CONTENTS

so quickly, our operations are likely to experience a disruption, our financial condition, business and results of operations as well as our ability to pay distributions are likely to be adversely affected and the market price of our shares may decline. In addition, the coordination of our internal management and investment activities is likely to suffer if we are unable to identify and reach an agreement with a single institution or group of executives having the expertise possessed by OFS Advisor and its affiliates. Even if we are able to retain comparable management, whether internal or external, the integration of such management and their lack of familiarity with our investment objective may result in additional costs and time delays that may adversely affect our financial condition, business and results of operations.

OFS Services can resign from its role as our administrator under the Administration Agreement, and we may not be able to find a suitable replacement, resulting in a disruption in our operations that could adversely affect our financial condition, business and results of operations.

OFS Services has the right to resign under the Administration Agreement, whether we have found a replacement or not. If OFS Services resigns, we may not be able to find a new administrator or hire internal management with similar expertise and ability to provide the same or equivalent services on acceptable terms, or at all. If we are unable to do so quickly, our operations are likely to experience a disruption, our financial condition, business and results of operations as well as our ability to pay distributions are likely to be adversely affected and the market price of our shares may decline. In addition, the coordination of our internal management and administrative activities is likely to suffer if we are unable to identify and reach an agreement with a service provider or individuals with the expertise possessed by OFS Services. Even if we are able to retain a comparable service provider or individuals to perform such services, whether internal or external, their integration into our business and lack of familiarity with our investment objective may result in additional costs and time delays that may adversely affect our financial condition, business and results of operations.

We incur significant costs as a result of being a publicly traded company.

As a publicly traded company, we incur legal, accounting and other expenses, including costs associated with the periodic reporting requirements applicable to a company whose securities are registered under the Exchange Act, as well as additional corporate governance requirements, including requirements under the Sarbanes-Oxley Act and other rules implemented by the SEC.

Efforts to comply with Section 404 of the Sarbanes-Oxley Act involve significant expenditures, and non-compliance with Section 404 of the Sarbanes-Oxley Act may adversely affect us and the market price of our securities.

Under current SEC rules, beginning with our fiscal year ended December 31, 2013, we have been required to report on our internal control over financial reporting pursuant to Section 404 of the Sarbanes-Oxley Act and related rules and regulations of the SEC. We are required to review our internal control over financial reporting on an annual basis, and evaluate and disclose changes in our internal control over financial reporting on a quarterly and annual basis.

As a result, we expect to continue to incur additional expenses that may negatively impact our financial performance and our ability to make distributions. This process also results in a diversion of management stime and attention. In

the event that we are unable to maintain compliance with Section 404 of the Sarbanes-Oxley Act and related rules, we and the market price of our securities may be adversely affected.

We have identified a material weakness in our internal control over financial reporting and our business and stock price may be adversely affected if we have not adequately addressed the weakness.

Effective internal controls over financial reporting are necessary for us to provide reliable financial reports and, together with adequate disclosure controls and procedures, are designed to prevent fraud. Any failure to implement required new or improved controls, or difficulties encountered in their implementation could cause us to fail to meet our reporting obligations.

As a result of our evaluation of our internal control over financial reporting for the year ended December 31, 2015, management identified a material weakness related to reconciliation of components of

TABLE OF CONTENTS

distributions in the statement of changes in net assets and net assets within the balance sheet. As part of its fourth quarter close, which was completed during the first quarter of 2016, the Company discovered and corrected errors related to certain reclassifications between the components of net assets primarily related to accounting for the tax character of, and basis differences between tax and accounting principles generally accepted in the United States of America (GAAP), and the presentation of certain unrealized gains and losses within the components of net assets. The error correction impacted the classification of certain components of consolidated net assets as of December 31, 2014 and distributions reported in the consolidated statement of changes in net assets for the year ended December 31, 2014 and 2013. In addition, it impacted the presentation of unrealized gains and losses within the components of net assets as of December 31, 2013. The purpose of the reclassifications was to (a) give effect to the tax character of, and basis differences between tax and GAAP in (i) accumulated shareholder distributions, (ii) accumulated undistributed net investment income, and (iii) accumulated net realized gains/losses, and (iv) net unrealized appreciation (depreciation) on investments. The adjustments had no impact on previously reported consolidated total net assets, net investment income, net increase in net assets resulting from operations, or consolidated cash flows. The Company discovered the error through the implementation of a new control as part of its fourth quarter close, which was completed during the first quarter of 2016, and as a result a material weakness existed at December 31, 2015. We believe that the audited consolidated financial statements included in this prospectus are accurate. As of March 31, 2016, we addressed the underlying causes of the material weakness as described further in Remediation Efforts. Accordingly, we believe that the unaudited consolidated financial statements included in this prospectus do fairly present, in all material respects, our financial position, results of operations and cash flows for the periods presented.

Remediation Efforts

We are currently in the process of remediating the material weakness in our internal control over financial reporting as described above and are taking the necessary steps that we believe will address the underlying causes of the material weakness. We have completed the development and formal documentation of our policies and procedures relating to our internal control over financial reporting, but we have not completed the testing of these formalized controls. The identified material weakness in internal control will not be considered fully remediated until sufficient time has elapsed to provide evidence that the new controls have been implemented and are operating effectively. We implemented the following remediation steps to address the material weakness discussed above and to improve our internal control over financial reporting:

Our account reconciliation process for components of net assets and distributions was enhanced (1) to ensure the proper reclassification entries are recorded to account for the tax character of, and basis differences between tax and GAAP and (2) to ensure the beginning of the quarter and normal, recurring elements of changes in net assets appropriate to the account, equal the reconciled balance at the end of the quarter for components of net assets and distributions.

If we cannot produce reliable financial reports, investors could lose confidence in our reported financial information, the market price of our stock could decline significantly, we may be unable to obtain additional financing to operate and expand our business, and our business and financial condition could be harmed.

Capital markets may experience periods of disruption and instability and we cannot predict when these conditions will occur. Such market conditions could materially and adversely affect debt and equity capital markets in the United States and abroad, which could have a negative impact on our business, financial condition and results of operations.

The global capital markets have experienced a period of disruption as evidenced by a lack of liquidity in the debt capital markets, write-offs in the financial services sector, the re-pricing of credit risk and the failure of certain major financial institutions. While the capital markets have improved, these conditions could deteriorate again in the future. During such market disruptions, we may have difficulty raising debt or equity capital, especially as a result of regulatory constraints.

Market conditions may in the future make it difficult to extend the maturity of or refinance our existing indebtedness and any failure to do so could have a material adverse effect on our business. The illiquidity of our investments may make it difficult for us to sell such investments if required. As a result, we may realize significantly less than the value at which we have recorded our investments. In addition, significant changes in

the capital markets, including the disruption and volatility, have had, and may in the future have, a negative effect on the valuations of our investments and on the potential for liquidity events involving our investments. An inability to raise capital, and any required sale of our investments for liquidity purposes, could have a material adverse impact on our business, financial condition and results of operations.

Various social and political tensions in the United States and around the world, including in the Middle East, Eastern Europe and Russia, may continue to contribute to increased market volatility, may have long-term effects on the United States and worldwide financial markets, and may cause further economic uncertainties or deterioration in the United States and worldwide. Several European Union (EU) countries, including Greece, Ireland, Italy, Spain, and Portugal, continue to face budget issues, some of which may have negative long-term effects for the economies of those countries and other EU countries. There is also continued concern about national-level support for the euro and the accompanying coordination of fiscal and wage policy among European Economic and Monetary Union member countries. The recent United States and global economic downturn, or a return to the recessionary period in the United States, could adversely impact our investments. We cannot predict the duration of the effects related to these or similar events in the future on the United States economy and securities markets or on our investments. We monitor developments and seek to manage our investments in a manner consistent with achieving our investment objective, but there can be no assurance that we will be successful in doing so.

Risks Related to Our Investments

Economic recessions or downturns could impair our portfolio companies and harm our operating results.

Many of our portfolio companies are susceptible to economic slowdowns or recessions and may be unable to repay our loans during these periods. Therefore, our non-performing assets are likely to increase and the value of our portfolio is likely to decrease during these periods. Adverse economic conditions may decrease the value of collateral securing some of our loans and the value of our equity investments. Economic slowdowns or recessions could lead to financial losses in our portfolio and a decrease in revenues, net income and assets. Unfavorable economic conditions also could increase our funding costs, limit our access to the capital markets or result in a decision by lenders not to extend credit to us. These events could prevent us from increasing our investments and harm our operating results.

A portfolio company s failure to satisfy financial or operating covenants imposed by us or other lenders could lead to defaults and, potentially, termination of its loans and foreclosure on its assets, which could trigger cross-defaults under other agreements and jeopardize our portfolio company s ability to meet its obligations under the debt securities that we hold. We may incur expenses to the extent necessary to seek recovery upon default or to negotiate new terms with a defaulting portfolio company. In addition, lenders in certain cases can be subject to lender liability claims for actions taken by them when they become too involved in the borrower s business or exercise control over a borrower. It is possible that we could become subject to a lender liability claim, including as a result of actions taken if we render significant managerial assistance to the borrower. Furthermore, if one of our portfolio companies were to file for bankruptcy protection, even though we may have structured our investment as senior secured debt, depending on the facts and circumstances, including the extent to which we provided managerial assistance to that portfolio company, a bankruptcy court might re-characterize our debt holding and subordinate all or a portion of our claim to claims of other creditors.

Our investments in leveraged portfolio companies may be risky, and we could lose all or part of their investment.

Investment in leveraged companies involves a number of significant risks. Leveraged companies in which we invest may have limited financial resources and may be unable to meet their obligations under their debt securities that we hold. Such developments may be accompanied by a deterioration in the value of any collateral and a reduction in the likelihood of our realizing any guarantees that we may have obtained in connection with our investment. In addition, our mezzanine loans are generally subordinated to senior loans and are generally unsecured. As such, other creditors may rank senior to us in the event of an insolvency. Smaller leveraged companies also may have less predictable operating results and may require substantial additional capital to support their operations, finance their expansion or maintain their competitive position.

TABLE OF CONTENTS

Our investments in lower credit quality obligations are risky and highly speculative, and we could lose all or part of our investment.

Most of our debt investments are likely to be in lower grade obligations. The lower grade investments in which we invest may be rated below investment grade by one or more nationally-recognized statistical rating agencies at the time of investment or may be unrated but determined by OFS Advisor to be of comparable quality. Debt securities rated below investment grade are commonly referred to as junk bonds and are considered speculative with respect to the issuer s capacity to pay interest and repay principal. The debt in which we invest typically is not rated by any rating agency, but we believe that if such investments were rated, they would be below investment grade (rated lower than Baa3 by Moody s Investors Service, lower than BBB- by Fitch Ratings or lower than BBB- by Standard & Poor s). may invest without limit in debt of any rating, as well as debt that has not been rated by any nationally recognized statistical rating organization.

Investment in lower grade investments involves a substantial risk of loss. Lower grade securities or comparable unrated securities are considered predominantly speculative with respect to the issuer sability to pay interest and principal and are susceptible to default or decline in market value due to adverse economic and business developments. The market values for lower grade debt tend to be very volatile and are less liquid than investment grade securities. For these reasons, your investment in our company is subject to the following specific risks: increased price sensitivity to a deteriorating economic environment; greater risk of loss due to default or declining credit quality; adverse company specific events are more likely to render the issuer unable to make interest and/or principal payments; and if a negative perception of the lower grade debt market develops, the price and liquidity of lower grade securities may be depressed. This negative perception could last for a significant period of time.

Our investments in private and middle-market portfolio companies are risky, and we could lose all or part of our investment.

Investment in private and middle-market companies involves a number of significant risks. Generally, little public information exists about these companies, and we rely on the ability of OFS Advisor s investment professionals to obtain adequate information to evaluate the potential returns from investing in these companies. If we are unable to uncover all material information about these companies, we may not make a fully informed investment decision, and we may lose money on our investments. Middle-market companies may have limited financial resources and may be unable to meet their obligations under their debt securities that we hold, which may be accompanied by a deterioration in the value of any collateral and a reduction in the likelihood of our realizing any guarantees we may have obtained in connection with our investment. In addition, such companies typically have shorter operating histories, narrower product lines and smaller market shares than larger businesses, which tend to render them more vulnerable to competitors actions and market conditions, as well as general economic downturns. Additionally, middle-market companies are more likely to depend on the management talents and efforts of a small group of persons. Therefore, the death, disability, resignation or termination of one or more of these persons could have a material adverse impact on our portfolio company and, in turn, on us. Middle-market companies also may be parties to litigation and may be engaged in rapidly changing businesses with products subject to a substantial risk of obsolescence. In addition, our executive officers, directors and OFS Advisor may, in the ordinary course of business, be named as defendants in litigation arising from our investments in the portfolio companies.

If the assets securing the loans that we make decrease in value, then we may lack sufficient collateral to cover losses.

We will at times take a security interest in the available assets of our portfolio companies, including the equity interests of their subsidiaries and, in some cases, the equity interests of our portfolio companies held by their shareholders. There is a risk that the collateral securing these types of loans may decrease in value over time, may be difficult to sell in a timely manner, may be difficult to appraise and may fluctuate in value based upon the success of the business and market conditions, including as a result of the inability of a portfolio company to raise additional capital. In some circumstances, our lien could be subordinated to claims of other creditors. Additionally, deterioration in a portfolio company s financial condition and prospects, including its inability to raise additional capital, may be accompanied by deterioration in the value of the collateral for

TABLE OF CONTENTS

these types of loans. Moreover, in the case of certain of our investments, we do not have a first lien position on the collateral. Consequently, the fact that a loan may be secured does not guarantee that we will receive principal and interest payments according to the loan sterms, or that we will be able to collect on the loan should we be forced to enforce our remedies.

Our equity ownership in a portfolio company may represent a control investment. Our ability to exit a control investment in a timely manner could result in a realized loss on the investment.

If we obtain a control investment in a portfolio company, our ability to divest ourselves from a debt or equity investment could be restricted due to illiquidity in a private stock, limited trading volume on a public company s stock, inside information on a company s performance, insider blackout periods, or other factors that could prohibit us from disposing of the investment as we would if it were not a control investment. Additionally, we may choose not to take certain actions to protect a debt investment in a control investment portfolio company. As a result, we could experience a decrease in the value of our portfolio company holdings and potentially incur a realized loss on the investment.

We may suffer a loss if a portfolio company defaults on a loan and the underlying collateral is not sufficient.

In the event of a default by a portfolio company on a secured loan, we will only have recourse to the assets collateralizing the loan. If the underlying collateral value is less than the loan amount, we will suffer a loss.

In the event of bankruptcy of a portfolio company, we may not have full recourse to its assets in order to satisfy our loan, or our loan may be subject to equitable subordination. In addition, certain of our loans are subordinate to other debt of the portfolio company. If a portfolio company defaults on our loan or on debt senior to our loan, or in the event of a portfolio company bankruptcy, our loan will be satisfied only after the senior debt receives payment. Where debt senior to our loan exists, the presence of inter-creditor arrangements may limit our ability to amend our loan documents, assign our loans, accept prepayments, exercise our remedies (through standstill periods) and control decisions made in bankruptcy proceedings relating to the portfolio company. Bankruptcy and portfolio company litigation can significantly increase collection losses and the time needed for us to acquire the underlying collateral in the event of a default, during which time the collateral may decline in value, causing us to suffer losses.

If the value of collateral underlying our loan declines or interest rates increase during the term of our loan, a portfolio company may not be able to obtain the necessary funds to repay our loan at maturity through refinancing. Decreasing collateral value and/or increasing interest rates may hinder a portfolio company s ability to refinance our loan because the underlying collateral cannot satisfy the debt service coverage requirements necessary to obtain new financing. If a borrower is unable to repay our loan at maturity, we could suffer a loss which may adversely impact our financial performance.

The lack of liquidity in our investments may adversely affect our business.

All of our assets are presently invested in illiquid securities, and a substantial portion of our investments in leveraged companies is subject to legal and other restrictions on resale or is otherwise less liquid than more broadly traded public securities. The illiquidity of these investments may make it difficult for us to sell such investments if the need arises. In addition, if we are required to liquidate all or a portion of our portfolio quickly, we may realize significantly

Our equity ownership in a portfolio company may represent a control investment. Our ability to exit a control investment.

less than the value at which we have previously recorded our investments. We may also face other restrictions on our ability to liquidate an investment in a portfolio company to the extent that we, OFS Advisor, OFSAM or any of its other affiliates have material nonpublic information regarding such portfolio company.

Price declines and illiquidity in the corporate debt markets may adversely affect the fair value of our portfolio investments, reducing our net asset value through increased net unrealized depreciation.

As a BDC, we are required to carry our investments at market value or, if no market value is ascertainable, at fair value as determined in good faith by our board of directors. As part of the valuation process, we may take into account the following types of factors, if relevant, in determining the fair value of our investments:

TABLE OF CONTENTS

a comparison of the portfolio company s securities to publicly traded securities;
the enterprise value of a portfolio company;
the nature and realizable value of any collateral;
the portfolio company s ability to make payments and its earnings and discounted cash flow;
the markets in which the portfolio company does business; and
changes in the interest rate environment and the credit markets generally that may affect the price at which similar investments may be made in the future and other relevant factors.

When an external event such as a purchase transaction, public offering or subsequent equity sale occurs, we use the pricing indicated by the external event to corroborate our valuation. We record decreases in the market values or fair values of our investments as unrealized depreciation. Declines in prices and liquidity in the corporate debt markets may result in significant net unrealized depreciation in our portfolio. The effect of all of these factors on our portfolio may reduce our net asset value by increasing net unrealized depreciation in our portfolio. Depending on market conditions, we could incur substantial realized losses and may suffer additional unrealized losses in future periods, which could have a material adverse effect on our business, financial condition and results of operations.

We are a non-diversified management investment company within the meaning of the 1940 Act, and therefore we are not limited with respect to the proportion of our assets that may be invested in securities of a single issuer.

We are classified as a non-diversified management investment company within the meaning of the 1940 Act, which means that we are not limited by the 1940 Act with respect to the proportion of our assets that we may invest in securities of a single issuer. To the extent that we assume large positions in the securities of a small number of issuers, our net asset value may fluctuate to a greater extent than that of a diversified investment company as a result of changes in the financial condition or the market s assessment of the issuer. We may also be more susceptible to any single economic or regulatory occurrence than a diversified investment company. Beyond our asset diversification requirements as a RIC under the Code, we do not have fixed guidelines for diversification, and our investments could be concentrated in relatively few portfolio companies.

Our portfolio may be concentrated in a limited number of portfolio companies and industries, which will subject us to a risk of significant loss if any of these companies defaults on its obligations under any of its debt instruments or if there is a downturn in a particular industry.

Although we believe our portfolio is well-diversified across companies and industries, our portfolio is and may in the future be concentrated in a limited number of portfolio companies and industries. Beyond the asset diversification requirements associated with our qualification as a RIC under the Code, we do not have fixed guidelines for diversification. As a result, the aggregate returns we realize may be significantly adversely affected if a small number of investments perform poorly or if we need to write down the value of any one investment. Additionally, while we are not targeting any specific industries, our investments may be concentrated in relatively few industries. As a result, a downturn in any particular industry in which we are invested could also significantly impact the aggregate returns we realize.

We may hold the debt securities of leveraged companies that may, due to the significant volatility of such companies, enter into bankruptcy proceedings.

Although we generally do not expect to make investments in companies or securities that OFS Advisor determines to be distressed investments, we may hold debt securities of leveraged companies that may, due to the significant volatility of such companies, enter into bankruptcy proceedings or experience similar financial distress. The bankruptcy process has a number of significant inherent risks. Many events in a bankruptcy proceeding are the product of contested matters and adversary proceedings and are beyond the control of the creditors. A bankruptcy filing by an issuer may adversely and permanently affect the issuer. If the proceeding is converted to a liquidation, the value of the issuer may not equal the liquidation value that was believed to

exist at the time of the investment. The duration of a bankruptcy proceeding is also difficult to predict, and a creditor s return on investment can be adversely affected by delays until the plan of reorganization or liquidation ultimately becomes effective. The administrative costs in connection with a bankruptcy proceeding are frequently high and would be paid out of the debtor s estate prior to any return to creditors. Because the standards for classification of claims under bankruptcy law are vague, our influence with respect to the class of securities or other obligations we own may be lost by increases in the number and amount of claims in the same class or by different classification and treatment. In the early stages of the bankruptcy process, it is often difficult to estimate the extent of, or even to identify, any contingent claims that might be made. In addition, certain claims that have priority by law (for example, claims for taxes) may be substantial.

Our failure to make follow-on investments in our portfolio companies could impair the value of our portfolio.

Following an initial investment in a portfolio company, we may make additional investments in that portfolio company as follow-on investments, in seeking to:

increase or maintain in whole or in part our position as a creditor or equity ownership percentage in a portfolio company;

exercise warrants, options or convertible securities that were acquired in the original or subsequent financing; or preserve or enhance the value of our investment.

We have discretion to make follow-on investments, subject to the availability of capital resources. Failure on our part to make follow-on investments may, in some circumstances, jeopardize the continued viability of a portfolio company and our initial investment, or may result in a missed opportunity for us to increase our participation in a successful operation. Even if we have sufficient capital to make a desired follow-on investment, we may elect not to make a follow-on investment because we may not want to increase our level of risk, because we prefer other opportunities or because we are inhibited by compliance with BDC requirements or the desire to maintain our RIC status. Our ability to make follow-on investments may also be limited by OFS Advisor s allocation policy.

Because we generally do not hold controlling equity interests in our portfolio companies, we may not be able to exercise control over our portfolio companies or to prevent decisions by management of our portfolio companies that could decrease the value of our investments.

We generally do not hold controlling equity positions in our portfolio companies. For portfolio companies in which we do not hold a controlling equity interest, we are subject to the risk that a portfolio company may make business decisions with which we disagree, and that the management and/or shareholders of a portfolio company may take risks or otherwise act in ways that are adverse to our interests. Due to the lack of liquidity of the debt and equity investments that we typically hold in our portfolio companies, we may not be able to dispose of our investments in the event we disagree with the actions of a portfolio company and may therefore suffer a decrease in the value of our investments.

Defaults by our portfolio companies will harm our operating results.

A portfolio company s failure to satisfy financial or operating covenants imposed by us or other lenders could lead to defaults and, potentially, termination of its loans and foreclosure on its assets. This could trigger cross-defaults under other agreements and jeopardize such portfolio company s ability to meet its obligations under the debt or equity

Our failure to make follow-on investments in our portfolio companies could impair the value of our portfolio.

securities that we hold. We may incur expenses to the extent necessary to seek recovery upon default or to negotiate new terms, which may include the waiver of certain financial covenants, with a defaulting portfolio company.

Our portfolio companies may incur debt that ranks equally with, or senior to, our investments in such companies.

We have invested a substantial portion of our capital in senior secured, unitranche, second-lien and mezzanine loans issued by our portfolio companies. The portfolio companies may be permitted to incur, other debt that ranks equally with, or senior to, the debt securities in which we invest. By their terms, such debt

TABLE OF CONTENTS

instruments may provide that the holders are entitled to receive payment of interest or principal on or before the dates on which we are entitled to receive payments in respect of the debt securities in which we invest. Also, in the event of insolvency, liquidation, dissolution, reorganization or bankruptcy of a portfolio company, holders of debt instruments ranking senior to our investment in that portfolio company would typically be entitled to receive payment in full before we receive any distribution in respect of our investment. After repaying senior creditors, the portfolio company may not have any remaining assets to use for repaying its obligation to us. In the case of debt ranking equally with debt securities in which we invest, we would have to share any distributions on an equal and ratable basis with other creditors holding such debt in the event of an insolvency, liquidation, dissolution, reorganization or bankruptcy of the relevant portfolio company.

Additionally, certain loans that we make to portfolio companies may be secured on a second-priority basis by the same collateral securing first-priority debt of such companies. The senior secured liens on the collateral will secure the portfolio company s obligations under any outstanding senior debt and may secure certain other future debt that may be permitted to be incurred by the portfolio company under the agreements governing the loans. The holders of obligations secured by first-priority liens on the collateral will generally control the liquidation of, and be entitled to receive proceeds from, any realization of the collateral to repay their obligations in full before us. In addition, the value of the collateral in the event of liquidation will depend on market and economic conditions, the availability of buyers and other factors. There can be no assurance that the proceeds, if any, from sales of all of the collateral would be sufficient to satisfy the loan obligations secured by the second-priority liens after payment in full of all obligations secured by the first-priority liens on the collateral. If such proceeds were not sufficient to repay amounts outstanding under the loan obligations secured by the second-priority liens, then we, to the extent not repaid from the proceeds of the sale of the collateral, would only have an unsecured claim against the portfolio company s remaining assets, if any.

The rights we may have with respect to the collateral securing the loans we make to our portfolio companies with more senior debt outstanding may also be limited pursuant to the terms of one or more intercreditor agreements that we enter into with the holders of such senior debt. Under a typical intercreditor agreement, at any time that obligations that have the benefit of the first-priority liens are outstanding, any of the following actions that may be taken in respect of the collateral will be at the direction of the holders of the obligations secured by the first-priority liens:

the ability to cause the commencement of enforcement proceedings against the collateral;
the ability to control the conduct of such proceedings;
the approval of amendments to collateral documents;
releases of liens on the collateral; and
waivers of past defaults under collateral documents.

We may not have the ability to control or direct such actions, even if our rights are adversely affected.

We may also make unsecured loans to portfolio companies, meaning that such loans will not benefit from any interest in collateral of such companies. Liens on such portfolio companies collateral, if any, will secure the portfolio company s obligations under its outstanding secured debt and may secure certain future debt that is permitted to be incurred by the portfolio company under its secured loan agreements. The holders of obligations secured by such liens will generally control the liquidation of, and be entitled to receive proceeds from, any realization of such collateral to repay their obligations in full before us. In addition, the value of such collateral in the event of liquidation will depend on market and economic conditions, the availability of buyers and other factors. There can be no assurance that the proceeds, if any, from sales of such collateral would be sufficient to satisfy our unsecured loan obligations after payment in full of all secured loan obligations. If such proceeds were not sufficient to repay the outstanding secured loan obligations, then our unsecured claims would rank equally with the unpaid portion of such secured creditors claims against the portfolio company s remaining assets, if any.

TABLE OF CONTENTS

If we make subordinated investments, the obligors or the portfolio companies may not generate sufficient cash flow to service their debt obligations to us.

We make subordinated investments that rank below other obligations of the obligor in right of payment. Subordinated investments are subject to greater risk of default than senior obligations as a result of adverse changes in the financial condition of the obligor or in general economic conditions. If we make a subordinated investment in a portfolio company, the portfolio company may be highly leveraged, and its relatively high debt-to-equity ratio may create increased risks that its operations might not generate sufficient cash flow to service all of its debt obligations.

The disposition of our investments may result in contingent liabilities.

A significant portion of our investments involve private securities. In connection with the disposition of an investment in private securities, we may be required to make representations about the business and financial affairs of the portfolio company typical of those made in connection with the sale of a business. We may also be required to indemnify the purchasers of such investment to the extent that any such representations turn out to be inaccurate, or with respect to potential liabilities. These arrangements may result in contingent liabilities that ultimately result in funding obligations that we must satisfy through our return of distributions previously made to us.

Our investments in the healthcare industry are subject to extensive government regulation, litigation risk and certain other risks particular to that industry.

We invest in companies in the healthcare industry that are subject to extensive regulation by the Food and Drug Administration, or the FDA, and to a lesser extent, other federal, state and other foreign agencies. If any of these portfolio companies fail to comply with applicable regulations, they could be subject to significant penalties and claims that could materially and adversely affect their operations. Portfolio companies that produce medical devices or drugs are subject to the expense, delay and uncertainty of the regulatory approval process for their products and, even if approved, these products may not be accepted in the marketplace. In addition, governmental budgetary constraints effecting the regulatory approval process, new laws, regulations or judicial interpretations of existing laws and regulations might adversely affect a portfolio company in this industry. Changes in healthcare or other laws and regulations applicable to the businesses of some of our portfolio companies may occur that could increase their compliance and other costs of doing business, require significant systems enhancements, or render their products or services less profitable or obsolete, any of which could have a material adverse effect on their results of operations. Portfolio companies in the healthcare industry may also have a limited number of suppliers of necessary components or a limited number of manufacturers for their products, and therefore face a risk of disruption to their manufacturing process if they are unable to find alternative suppliers when needed. Any of these factors could materially and adversely affect the operations of a portfolio company in the healthcare industry and, in turn, impair our ability to timely collect principal and interest payments owed to us and adversely affect the value of these portfolio companies.

Our investments in Internet and software companies are subject to many risks, including regulatory concerns, litigation risks and intense competition.

Our investments in Internet and software companies are subject to substantial risks. For example, our portfolio companies face intense competition since their businesses are rapidly evolving and intensely competitive, and are subject to changing technology, shifting user needs, and frequent introductions of new products and services. Internet and software companies have many competitors in different industries, including general purpose search engines,

If we make subordinated investments, the obligors or the portfolio companies may not generate sufficient &2sh flow

vertical search engines and e-commerce sites, social networking sites, traditional media companies, and providers of online products and services. Potential competitors to our portfolio companies in the Internet and software industries range from large and established companies to emerging start-ups. Further, such companies are subject to laws that were adopted prior to the advent of the Internet and related technologies and, as a result, do not contemplate or address the unique issues of the Internet and related technologies. The laws that do reference the Internet are being interpreted by the courts, but their applicability and scope remain uncertain. For example, the laws relating to the liability of providers of online services are currently unsettled both within the U.S. and abroad. Claims have been threatened and

filed under both U.S. and foreign laws for defamation, invasion of privacy and other tort claims, unlawful activity, copyright and trademark infringement, or other theories based on the nature and content of the materials searched and the ads posted by a company s users, a company s products and services, or content generated by a company s users. Further, the growth of Internet and software companies into a variety of new fields implicate a variety of new regulatory issues and may subject such companies to increased regulatory scrutiny, particularly in the U.S. and Europe. As a result, these portfolio company investments face considerable risk. This could, in turn, materially adversely affect the value of the Internet and software companies in our portfolio.

Our base management fee may induce OFS Advisor to cause us to incur leverage.

Our base management fee is payable based upon our total assets, other than cash and cash equivalents but including assets purchased with borrowed amounts and including assets owned by any consolidated entity. This fee structure may encourage OFS Advisor to cause us to borrow money to finance additional investments. Under certain circumstances, the use of borrowed money may increase the likelihood of default, which would disfavor holders of our common stock. Given the subjective nature of the investment decisions made by OFS Advisor on our behalf, our board of directors may not be able to monitor this potential conflict of interest effectively.

Our incentive fee may induce OFS Advisor to make certain investments, including speculative investments.

The incentive fee payable by us to OFS Advisor may create an incentive for OFS Advisor to make investments on our behalf that are riskier or more speculative than would be the case in the absence of such compensation arrangement. The way in which the incentive fee payable to OFS Advisor is determined may encourage OFS Advisor to use leverage to increase the return on our investments. Under certain circumstances, the use of leverage may increase the likelihood of default, which would disfavor our shareholders.

OFS Advisor receives an incentive fee based, in part, upon net capital gains realized on our investments. Unlike that portion of the incentive fee based on income, there is no hurdle rate applicable to the portion of the incentive fee based on net capital gains. As a result, OFS Advisor may have a tendency to invest more capital in investments that are likely to result in capital gains as compared to income producing securities. Such a practice could result in our investing in more speculative securities than would otherwise be the case, which could result in higher investment losses, particularly during economic downturns.

We may invest, to the extent permitted by law, in the securities and instruments of other investment companies, including private funds, and, to the extent we so invest, will bear our ratable share of any such investment company s expenses, including management and performance fees. We will also remain obligated to pay management and incentive fees to OFS Advisor with respect to the assets invested in the securities and instruments of other investment companies. With respect to each of these investments, each of our shareholders will bear his or her share of the management and incentive fee of OFS Advisor as well as indirectly bearing the management and performance fees and other expenses of any investment companies in which we invest. For example, by virtue of our investment in OFS Capital WM, our shareholders indirectly incur management fees payable to the loan manager of the OFS Capital WM portfolio prior to the May 28, 2015, sale of senior secured debt investments with an aggregate principal balance of approximately \$67.8 million by the Company and OFS Capital WM to Madison Capital Funding LLC (Madison) (the WM Asset Sale) (see Financial Condition, Liquidity and Capital Resources WM Asset Sale and Related Transactions).

Our board of directors is charged with protecting our interests by monitoring how OFS Advisor addresses these and other conflicts of interests associated with its management services and compensation. While our board of directors is not expected to review or approve each borrowing or incurrence of leverage, our independent directors will periodically review OFS Advisor s services and fees. In connection with these reviews, our independent directors will consider whether our fees and expenses (including those related to leverage) remain appropriate.

TABLE OF CONTENTS

OFS Advisor s liability is limited under the Investment Advisory Agreement, and we have agreed to indemnify OFS Advisor against certain liabilities, which may lead OFS Advisor to act in a riskier manner on our behalf than it would when acting for its own account.

Under the Investment Advisory Agreement, OFS Advisor will not assume any responsibility to us other than to render the services called for under that agreement, and it will not be responsible for any action of our board of directors in following or declining to follow OFS Advisor's advice or recommendations. Under the terms of the Investment Advisory Agreement, OFS Advisor and its affiliates respective officers, directors, members, managers, shareholders and employees will not be liable to us, any subsidiary of ours, our directors, our shareholders or any subsidiary shareholders or partners for acts or omissions performed in accordance with and pursuant to the Investment Advisory Agreement, except those resulting from acts constituting gross negligence, willful misconduct, bad faith or reckless disregard of such person's duties under the Investment Advisory Agreement. In addition, we have agreed to indemnify OFS Advisor and its affiliates respective officers, directors, members, managers, shareholders and employees from and against any claims or liabilities, including reasonable legal fees and other expenses reasonably incurred, arising out of or in connection with our business and operations or any action taken or omitted on our behalf pursuant to authority granted by the Investment Advisory Agreement, except where attributable to gross negligence, willful misconduct, bad faith or reckless disregard of such person's duties under the Investment Advisory Agreement. These protections may lead OFS Advisor to act in a riskier manner when acting on our behalf than it would when acting for its own account.

We may be subject to additional risks if we engage in hedging transactions and/or invest in foreign securities.

The 1940 Act generally requires that 70% of our investments be in issuers each of whom is organized under the laws of, and has its principal place of business in, any state of the United States, the District of Columbia, Puerto Rico, the Virgin Islands or any other possession of the United States. Our investment strategy does not presently contemplate investments in securities of non-U.S. companies. We expect that these investments would focus on the same junior debt securities investments that we make in U.S. middle-market companies and accordingly would be complementary to our overall strategy and enhance the diversity of our holdings. Investing in securities of emerging market issuers involves many risks, including economic, social, political, financial, tax and security conditions in the emerging market, potential inflationary economic environments, regulation by foreign governments, different accounting standards and political uncertainties. Economic, social, political, financial, tax and security conditions also could negatively affect the value of emerging market companies. These factors could include changes in the emerging market government s economic and fiscal policies, the possible imposition of, or changes in, currency exchange laws or other laws or restrictions applicable to the emerging market companies or investments in their securities and the possibility of fluctuations in the rate of exchange between currencies.

Engaging in either hedging transactions or investing in foreign securities would entail additional risks to our shareholders. We could, for example, use instruments such as interest rate swaps, caps, collars and floors and, if we were to invest in foreign securities, we could use instruments such as forward contracts or currency options and borrow under a credit facility in currencies selected to minimize our foreign currency exposure. In each such case, we generally would seek to hedge against fluctuations of the relative values of our portfolio positions from changes in market interest rates or currency exchange rates. Hedging against a decline in the values of our portfolio positions would not eliminate the possibility of fluctuations in the values of such positions or prevent losses if the values of the positions declined. However, such hedging could establish other positions designed to gain from those same

developments, thereby offsetting the decline in the value of such portfolio positions. Such hedging transactions could also limit the opportunity for gain if the values of the underlying portfolio positions increased. Moreover, it might not be possible to hedge against an exchange rate or interest rate fluctuation that was so generally anticipated that we would not be able to enter into a hedging transaction at an acceptable price.

While we may enter into such transactions to seek to reduce currency exchange rate and interest rate risks, unanticipated changes in currency exchange rates or interest rates could result in poorer overall investment performance than if we had not engaged in any such hedging transactions. In addition, the degree of correlation between price movements of the instruments used in a hedging strategy and price movements in

the portfolio positions being hedged could vary. Moreover, for a variety of reasons, we might not seek to establish a perfect correlation between the hedging instruments and the portfolio holdings being hedged. Any such imperfect correlation could prevent us from achieving the intended hedge and expose us to risk of loss. In addition, it might not be possible to hedge fully or perfectly against currency fluctuations affecting the value of securities denominated in non-U.S. currencies because the value of those securities would likely fluctuate as a result of factors not related to currency fluctuations.

We may not realize gains from our equity investments.

When we invest in senior secured, unitranche, second-lien and mezzanine loans, we may acquire warrants or other equity securities of portfolio companies as well. We also invest in equity securities directly. To the extent we hold equity investments, except as described below, we will attempt to dispose of them and realize gains upon our disposition of them. However, the equity interests we receive may not appreciate in value and may decline in value. As a result, we may not be able to realize gains from our equity interests, and any gains that we do realize on the disposition of any equity interests may not be sufficient to offset any other losses we experience. In the case of SBIC I LP, our wholly-owned subsidiary, we will not receive direct benefits from the sale of assets in their portfolios. Rather, our return on our investment in such assets will depend on the ability of SBIC I LP s portfolio to generate cash flow in excess of payments required, as appropriate, to be made to other parties under the terms of the SBA debentures, and distribution, subject to SBA regulation, of the excess to us.

Uncertainty relating to the London Interbank Offered Rate (LIBOR) calculation process may adversely affect the value of our portfolio of LIBOR-indexed, floating-rate debt securities.

Concerns have been publicized that some of the member banks surveyed by the British Bankers Association (BBA) in connection with the calculation of LIBOR across a range of maturities and currencies may have been under-reporting or otherwise manipulating the inter-bank lending rate applicable to them in order to profit on their derivatives positions or to avoid an appearance of capital insufficiency or adverse reputational or other consequences that may have resulted from reporting inter-bank lending rates higher than those they actually submitted. A number of BBA member banks have entered into settlements with their regulators and law enforcement agencies with respect to alleged manipulation of LIBOR, and investigations by regulators and governmental authorities in various jurisdictions are ongoing.

Actions by the BBA, regulators or law enforcement agencies may result in changes to the manner in which LIBOR is determined. Uncertainty as to the nature of such potential changes may adversely affect the market for LIBOR-based securities, including our portfolio of LIBOR-indexed, floating-rate debt securities. In addition, any further changes or reforms to the determination or supervision of LIBOR may result in a sudden or prolonged increase or decrease in reported LIBOR, which could have an adverse impact on the market for LIBOR-based securities or the value of our portfolio of LIBOR-indexed, floating-rate debt securities.

Risks Related to Our Securities

Shareholders may not receive distributions or that our distributions may not grow over time and a portion of our distributions may be a return of capital.

We have made distributions on a quarterly basis to our shareholders out of assets legally available for distribution. We cannot assure shareholders that we will achieve investment results that will allow us to make a specified level of cash distributions or year-to-year increases in cash distributions. Our ability to pay distributions might be adversely affected by the impact of one or more of the risk factors described in this Registration Statement. Due to the asset coverage test applicable to us under the 1940 Act as a BDC, we may be limited in our ability to make distributions.

When we make distributions, we will be required to determine the extent to which such distributions are paid out of current or accumulated earnings and profits. Distributions in excess of current and accumulated earnings and profits will be treated as a non-taxable return of capital to the extent of an investor s basis in our stock and, assuming that an investor holds our stock as a capital asset, thereafter as a capital gain. A return of capital is a return to shareholders of a portion of their original investment in us rather than income or capital gains. A return of capital reduces the basis that the investor has in the Company s shares, which may result in

an increase in the amount of any taxable gain or a reduction in any deductible loss upon a subsequent sale of such shares. See Material U.S. Federal Income Tax Considerations.

The market price of our common stock may fluctuate significantly.

As with any stock, the market price of our common stock will fluctuate with market conditions and other factors. The market price and liquidity of the market for shares of our common stock may be significantly affected by numerous factors, some of which are beyond our control and may not be directly related to our operating performance. These factors include:

significant volatility in the market price and trading volume of securities of BDCs or other companies in our sector, which is not necessarily related to the operating performance of these companies;

exclusion of our common stock from certain market indices, such as the Russell 2000 Financial Services Index, which could reduce the ability of certain investment funds to own our common stock and put short-term selling pressure on our common stock:

changes in regulatory policies or tax guidelines, particularly with respect to RICs, SBICs or BDCs; loss of RIC or BDC status;

failure of SBIC I LP to maintain its status as an SBIC; changes or perceived changes in earnings or variations in operating results; changes or perceived changes in the value of our portfolio of investments; changes in accounting guidelines governing valuation of our investments;

any shortfall in revenue or net income or any increase in losses from levels expected by investors or securities analysts;

departure of OFS Advisor s, OFSC s or any of their affiliates key personnel; operating performance of companies comparable to us; general economic trends and other external factors; and loss of a major funding source.

Sales of substantial amounts of our common stock in the public market may have an adverse effect on the market price of our common stock.

The shares of our common stock beneficially owned by our principal shareholders are generally available for resale, subject to the provisions of Rule 144 promulgated under the Securities Act. Sales of substantial amounts of our common stock, or the availability of such common stock for sale, could adversely affect the prevailing market prices for our common stock. If this occurs and continues, it could impair our ability to raise additional capital through the sale of securities should we desire to do so.

Certain provisions of the Delaware General Corporation Law and our certificate of incorporation and bylaws could deter takeover attempts and have an adverse impact on the price of our common stock.

The Delaware General Corporation Law, our certificate of incorporation and our bylaws contain provisions that may have the effect of discouraging a third party from making an acquisition proposal for us. We have also adopted measures that may make it difficult for a third party to obtain control of us, including provisions of our articles of incorporation dividing our board of directors into three classes with the term of one class expiring at each annual meeting of shareholders. These anti-takeover provisions may inhibit a change in control in circumstances that could give the holders of our common stock the opportunity to realize a premium over the market price of our common

TABLE OF CONTENTS

Our common stock may trade below its net asset value per share, which limits our ability to raise additional equity capital.

If our common stock is trading below its net asset value per share, we will generally not be able to issue additional shares of our common stock at its market price without first obtaining the approval for such issuance from our shareholders and our independent directors. Shares of BDCs, including shares of our common stock, have traded at discounts to their net asset values. As of March 31, 2016, our net asset value per share was \$14.65. The daily average closing price of our shares on the NASDAQ Global Select Market for the three months ended March 31, 2016 was \$11.36. If our common stock trades below net asset value, the higher the cost of equity capital may result in it being unattractive to raise new equity, which may limit our ability to grow. The risk of trading below net asset value is separate and distinct from the risk that our net asset value per share may decline. We cannot predict whether shares of our common stock will trade above, at or below our net asset value.

If we issue preferred stock, debt securities or convertible debt securities, the net asset value and market value of our common stock may become more volatile.

We cannot assure you that the issuance of preferred stock and/or debt securities would result in a higher yield or return to the holders of our common stock. The issuance of preferred stock, debt securities or convertible debt would likely cause the net asset value and market value of our common stock to become more volatile. If the dividend rate on the preferred stock, or the interest rate on the debt securities, were to approach the net rate of return on our investment portfolio, the benefit of leverage to the holders of our common stock would be reduced. If the dividend rate on the preferred stock, or the interest rate on the debt securities, were to exceed the net rate of return on our portfolio, the use of leverage would result in a lower rate of return to the holders of common stock than if we had not issued the preferred stock or debt securities. Any decline in the net asset value of our investment would be borne entirely by the holders of our common stock. Therefore, if the market value of our portfolio were to decline, the leverage would result in a greater decrease in net asset value to the holders of our common stock than if we were not leveraged through the issuance of preferred stock. This decline in net asset value would also tend to cause a greater decline in the market price for our common stock.

There is also a risk that, in the event of a sharp decline in the value of our net assets, we would be in danger of failing to maintain required asset coverage ratios which may be required by the preferred stock, debt securities, convertible debt or units or of a downgrade in the ratings of the preferred stock, debt securities, convertible debt or units or our current investment income might not be sufficient to meet the dividend requirements on the preferred stock or the interest payments on the debt securities. If we do not maintain our required asset coverage ratios, we may not be permitted to declare dividends. In order to counteract such an event, we might need to liquidate investments in order to fund redemption of some or all of the preferred stock, debt securities or convertible debt. In addition, we would pay (and the holders of our common stock would bear) all costs and expenses relating to the issuance and ongoing maintenance of the preferred stock, debt securities, convertible debt or any combination of these securities. Holders of preferred stock, debt securities or convertible debt may have different interests than holders of common stock and may at times have disproportionate influence over our affairs.

Holders of any preferred stock that we may issue will have the right to elect members of the board of directors and have class voting rights on certain matters.

Our common stock may trade below its net asset value per share, which limits our ability to raise addition@2equity of

The 1940 Act requires that holders of shares of preferred stock must be entitled as a class to elect two directors at all times and to elect a majority of the directors if dividends on such preferred stock are in arrears by two years or more, until such arrearage is eliminated. In addition, certain matters under the 1940 Act require the separate vote of the holders of any issued and outstanding preferred stock, including changes in fundamental investment restrictions and conversion to open-end status and, accordingly, preferred shareholders could veto any such changes. Restrictions imposed on the declarations and payment of dividends or other distributions to the holders of our common stock and preferred stock, both by the 1940 Act and by requirements imposed by rating agencies, might impair our ability to maintain our qualification as a RIC for U.S. federal income tax purposes.

Your interest in us may be diluted if you do not fully exercise your subscription rights in any rights offering. In addition, if the subscription price is less than our net asset value per share, then you will experience an immediate dilution of the aggregate net asset value of your shares.

In the event we issue subscription rights, shareholders who do not fully exercise their subscription rights should expect that they will, at the completion of a rights offering pursuant to this prospectus, own a smaller proportional interest in us than would otherwise be the case if they fully exercised their rights. We cannot state precisely the amount of any such dilution in share ownership because we do not know at this time what proportion of the shares will be purchased as a result of such rights offering.

In addition, if the subscription price is less than the net asset value per share of our common stock, then our shareholders would experience an immediate dilution of the aggregate net asset value of their shares as a result of the offering. The amount of any decrease in net asset value is not predictable because it is not known at this time what the subscription price and net asset value per share will be on the expiration date of a rights offering or what proportion of the shares will be purchased as a result of such rights offering. Such dilution could be substantial.

The trading market or market value of our publicly issued debt securities may fluctuate.

Our publicly issued debt securities may or may not have an established trading market. We cannot assure you that a trading market for our publicly issued debt securities will ever develop or be maintained if developed. In addition to our creditworthiness, many factors may materially adversely affect the trading market for, and market value of, our publicly issued debt securities. These factors include, but are not limited to, the following:

the time remaining to the maturity of these debt securities;
the outstanding principal amount of debt securities with terms identical to these debt securities;
the ratings assigned by national statistical ratings agencies;
the general economic environment;
the supply of debt securities trading in the secondary market, if any;
the redemption or repayment features, if any, of these debt securities;
the level, direction and volatility of market interest rates generally; and
market rates of interest higher or lower than rates borne by the debt securities.
You should also be aware that there may be a limited number of buyers when you decide to sell your debt securities.
This too may materially adversely affect the market value of the debt securities or the trading market for the debt securities.

Terms relating to redemption may materially adversely affect your return on any debt securities that we may issue.

If your debt securities are redeemable at our option, we may choose to redeem your debt securities at times when prevailing interest rates are lower than the interest rate paid on your debt securities. In addition, if your debt securities are subject to mandatory redemption, we may be required to redeem your debt securities also at times when prevailing interest rates are lower than the interest rate paid on your debt securities. In this circumstance, you may not be able to reinvest the redemption proceeds in a comparable security at an effective interest rate as high as your debt securities being redeemed.

Your interest in us may be diluted if you do not fully exercise your subscription rights in any rights offering9th additionally additionally and the subscription rights in any rights offering9th additionally additionally and rights are represented by the subscription rights in any rights offering9th additionally additionally additionally and rights are represented by the subscription rights rights are represented by the represented by th

Our credit ratings may not reflect all risks of an investment in our debt securities.

Our credit ratings are an assessment by third parties of our ability to pay our obligations. Consequently, real or anticipated changes in our credit ratings will generally affect the market value of our debt securities. Our credit ratings, however, may not reflect the potential impact of risks related to market conditions generally or other factors discussed above on the market value of or trading market for the publicly issued debt securities.

SPECIAL NOTE REGARDING FORWARD-LOOKING STATEMENTS

In addition to factors previously identified elsewhere in this prospectus, including the Risks section of this prospectus, the following factors, among others, could cause actual results to differ materially from forward-looking statements or historical performance:

the introduction, withdrawal, success and timing of business initiatives and strategies; changes in political, economic or industry conditions, the interest rate environment or financial and capital markets, which could result in changes in the value of our assets;

the relative and absolute investment performance and operations of our investment adviser;

the impact of increased competition;

the impact of future acquisitions and divestitures;

the unfavorable resolution of legal proceedings;

our business prospects and the prospects of our portfolio companies;

the impact, extent and timing of technological changes and the adequacy of intellectual property protection; the impact of legislative and regulatory actions and reforms and regulatory, supervisory or enforcement actions of government agencies relating to us or OFS Advisors;

the ability of OFS Advisors to identify suitable investments for us and to monitor and administer our investments; our contractual arrangements and relationships with third parties;

any future financings by us;

the ability of OFS Advisors to attract and retain highly talented professionals;

fluctuations in foreign currency exchange rates; and

the impact of changes to tax legislation and, generally, our tax position.

This prospectus and any prospectus supplement, and other statements that we may make, may contain forward-looking statements with respect to future financial or business performance, strategies or expectations. Forward-looking statements are typically identified by words or phrases such as trend, opportunity, pipeline, believe anticipate, intention. estimate. position, comfortable. expect, current. outlook, achieve and similar expressions, or future or conditional verbs such as will, maintain, would, sustain, could. may or similar expressions.

Forward-looking statements are subject to numerous assumptions, risks and uncertainties, which change over time. Forward-looking statements speak only as of the date they are made, and we assume no duty to and do not undertake to update forward-looking statements. These forward-looking statements do not meet the safe harbor for forward-looking statements pursuant to Section 27A of the Securities Act of 1933, as amended, or the Securities Act or Section 21E of the Securities Exchange Act of 1934. Actual results could differ materially from those anticipated in forward-looking statements and future results could differ materially from historical performance.

USE OF PROCEEDS

We intend to use the net proceeds from the sale of our securities for general corporate purposes, which include investing in debt and equity securities, repayment of any outstanding indebtedness, acquisitions and other general corporate purposes. The supplement to this prospectus relating to an offering will more fully identify the use of proceeds from such offering.

We anticipate that substantially all of the net proceeds from any offering of our securities will be used as described above within twelve months, but in no event longer than two years, depending on the availability of attractive opportunities and market conditions. However, there can be no assurance that we will be able to achieve this goal.

Pending such uses and investments, we will invest the remaining net proceeds primarily in cash, cash equivalents, U.S. government securities or high-quality debt securities maturing in one year or less from the time of investment. The management fee payable by us to our investment adviser will not be reduced while our assets are invested in such securities. Our ability to achieve our investment objective may be limited to the extent that the net proceeds of any offering, pending full investment, are held in lower yielding short-term instruments.

49

USE OF PROCEEDS 97

PRICE RANGE OF COMMON STOCK AND DISTRIBUTIONS

Our common stock, traded on the NASDAQ Global Select Market under the symbol OFS, began trading on November 8, 2012. The following table sets forth the range of high and low sales prices of our common stock as reported on the NASDAQ Global Market, the sales price as a percentage of net asset value and the distributions declared by us for each fiscal quarter. The stock quotations are interdealer quotations and do not include markups, markdowns or commissions.

		Closing Price		Premium or		Premium or			
		Range		Discount of				Cash	
	NAV ⁽¹⁾	High	Low	High Sa Price to NAV ⁽²⁾		Low Sales Price to NAV ⁽²⁾			istributions er Share ⁽³⁾
Fiscal 2016

NAV per share is determined as of the last day in the relevant quarter and therefore may not reflect the NAV per (1)share on the date of the high and low sales prices. The NAVs shown are based on outstanding shares at the end of each period.

(2) Calculated as of the respective high or low sales price divided by NAV.

The determination of the tax attributes of our distributions is made annually as of the end of our fiscal year based upon our taxable income for the full year and distributions paid for the full year. Therefore, a determination made on a quarterly basis may not be representative of the actual tax attributes of our distributions for a full year. If the (3)tax characteristics of our distributions paid during 2016 were determined as of March 31, 2016, approximately \$.04 per share would represent a return of capital. The return of capital portion of each distribution as of December 31, 2015 and 2014 was \$0.23 and \$0.72, respectively. The tax attribute of our distribution declared during the second quarter of 2016 has not been determined.

NAV for this period has not been determined.

The last reported price for our common stock on June 28, 2016 was \$12.83 per share. We were added to the NASDAQ Global Select Market beginning January 2, 2014. As of June 28, 2016, there were two holders of record of the common stock, one of which was OFSAM. The other holder of record does not identify shareholders for whom shares are held beneficially in nominee or street name.

Shares of business development companies may trade at a market price that is less than the value of the net assets attributable to those shares. The possibility that our shares of common stock will trade at a discount from net asset value or at premiums that are unsustainable over the long term is separate and distinct from the risk that our net asset value will decrease. At times, our shares of common stock have traded at a premium to net asset value and at times our shares of common stock have traded at a discount to the net assets attributable to those shares. It is not possible to predict whether the shares offered hereby will trade at, above, or below net asset value.

Distributions

We are taxed as a RIC under the Code. Generally, a RIC is entitled to deduct distributions it pays to its shareholders from its income to determine taxable income. Taxable income includes our taxable interest, distribution and fee income, and taxable net capital gains. Taxable income generally differs from net income for financial reporting purposes due to temporary and permanent differences in the recognition of income and expenses, and generally excludes net unrealized appreciation or depreciation, as gains or losses are not included in taxable income until they are realized and may include passive gains and losses from certain portfolio companies. In addition, gains realized for financial reporting purposes may differ from gains included in taxable income as a result of our election to recognize gains using installment sale treatment, which generally result in the deferment of gains for tax purposes until notes or other amounts, including amounts held in escrow, received as consideration from the sale of investments are collected in cash. Taxable income includes non-cash income, such as changes in accrued and reinvested interest and dividends, which includes contractual PIK interest and PIK dividends, and the amortization of discounts and fees. Cash collections of income resulting from contractual PIK interest or PIK dividends generally occur at the end of the term of a loan or an equity security. Non-cash taxable income is reduced by non-cash expenses, such as realized losses and depreciation, and amortization expense.

Our board of directors will maintain a variable distribution policy with the objective of distributing four quarterly distributions in an amount that approximates at least 90% of our taxable quarterly income or potential annual income for a particular year. In addition, at the end of the year, we may also pay an additional special distribution, or fifth distribution, such that we may distribute approximately all of our annual taxable income in the year it was earned, while maintaining the option to spill over our excess taxable income.

The following table summarizes our distributions declared and paid on all shares to date (amount in thousands except per share data):

Date Declared	Record Date	Payment Date	Amount Per Share ⁽²⁾	Total Amount
Fiscal 2016				
May 2, 2016	June 16, 2016	June 30, 2016	\$ 0.34	\$ 3,295
March 7, 2016	March 17, 2016	March 31, 2016	0.34	3,295
Fiscal 2015				
December 2, 2015	December 17, 2015	December 31, 2015	\$ 0.34	\$ 3,295
August 6, 2015	September 16, 2015	September 30, 2015	0.34	3,289
May 4, 2015	June 16, 2015	June 30, 2015	0.34	3,286
March 4, 2015	March 17, 2015	March 31, 2015	0.34	3,281
Fiscal 2014				
November 4, 2014	December 17, 2014	December 31, 2014	\$ 0.34	\$ 3,278

June 25, 2013	July 17, 2013	July 31, 2013	0.34	3,272
March 26, 2013	April 17, 2013	April 30, 2013	0.34	3,269
Fiscal 2012	-			
November 26, 2012 ⁽¹⁾	January 17, 2013	January 31, 2013	\$ 0.17	\$ 1,628

⁽¹⁾ Represents the distribution declared in the specified period, which, if prorated for the number of days remaining in the fourth quarter after our IPO in November 2012, would have been \$0.34 per share.

The determination of the tax attributes of our distributions is made annually as of the end of our fiscal year based upon our taxable income for the full year and distributions paid for the full year. Therefore, a determination made on a quarterly basis may not be representative of the actual tax attributes of our distributions for a full year. If the

⁽²⁾ tax characteristics of our distributions paid during 2016 were determined as of March 31, 2016, approximately \$.04 per share would represent a return of capital. The return of capital portion of distributions for the years ended December 31, 2015, 2014, and 2013 (which includes the distribution declared on November 26, 2012) was \$0.23, \$0.72, and \$0.40, respectively.

We may not be able to achieve operating results that will allow us to make distributions at a specific level or to increase the amount of these distributions from time to time. If we do not distribute a certain percentage of our income annually, we will suffer adverse tax consequences, including possible loss of our status as a regulated investment company. We cannot assure shareholders that they will receive any distributions at a particular level.

Distributions in excess of our current and accumulated earnings and profits generally are treated first as a return of capital to the extent of the shareholder s tax basis, and any remaining distributions are treated as a capital gain. The determination of the tax attributes of our distributions is made annually as of the end of our fiscal year based upon our taxable income for the full year and distributions paid for the full year; therefore, a determination made on a quarterly basis may not be representative of the tax attributes of our annual distributions to shareholders. For the distribution paid during the year ended December 31, 2015, out of the approximately \$13.2 million in distribution, approximately 83% represented ordinary income and 17% represented a return of capital.

Each year a statement on Form 1099-DIV identifying the source of the distribution (i.e., paid from ordinary income, paid from net capital gains on the sale of securities, and/or a return of paid-in-capital surplus, which is a nontaxable distribution) is mailed to our U.S. shareholders. To the extent our taxable earnings fall below the total amount of our distributions for that fiscal year, a portion of those distributions may be deemed a tax return of capital to our shareholders.

We maintain an opt-out distribution reinvestment plan for our common shareholders. As a result, if we declare a distribution, cash distributions will be automatically reinvested in additional shares of our common stock unless the shareholder specifically opts out of the distribution reinvestment plan and chooses to receive cash distributions.

TABLE OF CONTENTS

MANAGEMENT S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

The information contained in this section should be read in conjunction with the Selected Consolidated Financial Data and our Financial Statements and notes thereto appearing elsewhere in this prospectus. In addition to historical information, the following discussion and other parts of this prospectus contain forward-looking information that involves risks and uncertainties. Our actual results could differ materially from those anticipated by such forward-looking information due to the factors discussed under Risk Factors and Special Note Regarding Forward-Looking Statements appearing elsewhere herein.

Overview

We are an externally managed, closed-end, non-diversified management investment company. Our investment objective is to provide our shareholders with both current income and capital appreciation primarily through debt investments and, to a lesser extent, equity investments. Our investment strategy focuses primarily on investments in middle-market companies in the United States. We use the term middle-market to refer to companies that may exhibit one or more of the following characteristics: number of employees less than 2,000; revenues between \$15 million and \$300 million; annual earnings before interest, taxes, depreciation and amortization, or EBITDA, between \$3 million and \$50 million; generally, private companies owned by private equity firms or owners/operators; and enterprise value between \$10 million and \$500 million. For additional information about how we define the middle-market, see

General Investment Criteria/Guidelines.

As of March 31, 2016, our investment portfolio consisted of outstanding loans of approximately \$218.3 million in aggregate principal amount in 35 portfolio companies and equity investments of approximately \$32.5 million, at fair value. As of March 31, 2016, 61% of our investment portfolio was comprised of senior secured loans, 26% of subordinated loans and 13% of equity investments, at fair value.

While our investment strategy focuses primarily on middle-market companies in the United States, including senior secured loans, which includes first-lien, second-lien and unitranche loans as well as subordinated loans and, to a lesser extent, warrants and other equity securities, we also may invest up to 30% of our portfolio in opportunistic investments of non-eligible portfolio companies. Specifically, as part of this 30% basket, we may consider investments in investment funds that are operating pursuant to certain exceptions to the 1940 Act and in advisers to similar investment funds, as well as in debt of middle-market companies located outside of the United States and debt and equity of public companies that do not meet the definition of eligible portfolio companies because their market capitalization of publicly traded equity securities exceeds the levels provided for in the 1940 Act.

Our investment strategy includes OFS SBIC I LP (SBIC I LP), which received a license under the U.S. Small Business Administration (SBA) Small Business Investment Company program, in May 2012. The SBIC license allows SBIC I LP to receive SBA-guaranteed debenture funding, subject to the issuance of a leverage commitment by the SBA and other customary procedures. SBA leverage funding is subject to SBIC I LP s payment of certain fees to the SBA, and the ability of SBIC I LP to draw on the leverage commitment is subject to its compliance with SBA regulations and policies, including an audit by the SBA. For additional information regarding the regulation of SBIC I LP, see Regulation Small Business Investment Company Regulations.

In January 2015, we filed an application with the SBA for a second SBIC license, which, if approved, would provide up to \$75.0 million in additional SBA debentures for the funding of our future investments upon our contribution of at least \$37.5 million in additional regulatory capital and subject to the issuance of a leverage commitment by the SBA and other customary procedures. There can be no assurance as to whether or when this application will be approved by the SBA.

On a stand-alone basis, SBIC I LP held approximately \$249.6 million and \$245.1 million in assets at March 31, 2016 and December 31, 2015, respectively, which accounted for approximately 85% and 83% of our total consolidated assets at March 31, 2016 and December 31, 2015, respectively.

Our investment activities are managed by OFS Capital Management, LLC (OFS Advisor) and supervised by our board of directors, a majority of whom are independent of us, OFS Advisor and its

54

Overview 104

Agreement) we have agreed to pay OFS Advisor an annual base management fee based on the average value of our total assets (other than cash and cash equivalents but including assets purchased with borrowed amounts and including assets owned by any consolidated entity) as well as an incentive fee based on our investment performance. We have elected to exclude from the base management fee calculation any base management fee that would be owed in respect of the intangible asset and goodwill resulting from our acquisitions of the remaining ownership interests in SBIC I LP and SBIC I GP, LLC (SBIC I GP) on December 4, 2013. We have also entered into an administration agreement (Administration Agreement) with OFS Capital Services, LLC (OFS Services). Under our Administration Agreement, we have agreed to reimburse OFS Services for our allocable portion (subject to the review and approval of our independent directors) of overhead and other expenses incurred by OFS Services in performing its obligations under the Administration Agreement.

As a business development company (BDC), we must not acquire any assets other than qualifying assets specified in the 1940 Act unless, at the time the acquisition is made, at least 70% of our assets, as defined by the 1940 Act, are qualifying assets (with certain limited exceptions). Qualifying assets include investments in eligible portfolio companies. Under the relevant Securities and Exchange Commission (SEC) rules, the term eligible portfolio company includes all private companies, companies whose securities are not listed on a national securities exchange, and certain public companies that have listed their securities on a national securities exchange and have a market capitalization of less than \$250 million, in each case organized in the United States.

We are permitted to borrow money from time to time within the levels permitted by the 1940 Act (which generally allows us to incur leverage for up to 50% of our asset base). We may borrow money when the terms and conditions available are favorable to do so and are aligned with our investment strategy and portfolio composition. The use of borrowed funds or the proceeds of preferred stock to make investments would have its own specific benefits and risks, and all of the costs of borrowing funds or issuing preferred stock would be borne by holders of our common stock.

We have elected to be treated for tax purposes as a regulated investment company (RIC) under Subchapter M of the Internal Revenue Code of 1986, as amended (Code). To qualify as a RIC, we must, among other things, meet certain source-of-income and assets diversification requirements. Pursuant to these elections, we generally will not have to pay corporate-level taxes on any income we distribute to our shareholders.

Critical Accounting Policies

The preparation of financial statements and related disclosures in conformity with generally accepted accounting principles in the United States requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities, disclosure of contingent assets and liabilities at the date of the financial statements, and revenues and expenses during the periods reported. Actual results could materially differ from those estimates.

We have identified the following items as critical accounting policies:

Valuation of Portfolio Investments.

The most significant estimate inherent in the preparation of our consolidated financial statements is the valuation of investments and the related amounts of unrealized appreciation and depreciation of investments recorded.

Our investments are carried at fair value in accordance with the 1940 Act and ASC Topic 820. At March 31, 2016, all of our investments in portfolio companies that are valued at fair value by our board of directors. Value, as defined in Section 2(a)(41) of the 1940 Act, is (i) the market price for those securities for which a market quotation is readily

available and (ii) for all other securities and assets, fair value as determined in good faith by the board of directors. Our debt and equity securities are primarily comprised of investments in middle market companies whose securities are not publicly traded. Our investments in these portfolio companies are generally considered Level 3 assets under ASC Topic 820 because the inputs used to value the investments are generally unobservable. As such, we value substantially all of our investments at fair value as determined in good faith by our board of directors pursuant to a consistent valuation policy in

TABLE OF CONTENTS

accordance with the provisions of ASC Topic 820 and the 1940 Act. Due to the inherent uncertainty in determining the fair value of investments that do not have a readily available market value, the fair value of our investments determined in good faith by our board of directors may differ significantly from the value that would have been used had a readily available market existed for such investments, and the differences could be material.

Revenue Recognition. Our revenue recognition policies are as follows:

Interest Income: Interest income is recorded on an accrual basis. Recognized interest income, if payable monthly or quarterly, is reported as interest receivable until collected. Recognized interest income due at maturity or at another stipulated date (PIK interest) is recorded as an adjustment to the cost basis of the investment. We accrue interest income until events occur that place a loan into a non-accrual status (see below). Loan origination fees, original issue discount (OID), market discount or premium, and loan amendment fees (collectively, net loan origination fees) are capitalized, and we accrete or amortize such amounts as additional interest income over the life of the loan using a method that approximates the effective interest method. Unamortized OID is recorded as an adjustment to the cost basis of the investment and unamortized loan amendment fees are reported as deferred loan fee revenue. When we receive a loan principal payment, the unamortized OID related to the paid principal is accelerated and recognized in interest income. All other interest income is recognized as contractually earned. Further, in connection with our debt investments, we may receive warrants or similar equity-related securities (Warrants). We determine the cost basis of Warrants based upon their fair values on the date of receipt relative to the total fair value of the debt and Warrants received. Any resulting difference between the face amount of the debt and its recorded cost resulting from the assignment of value to the Warrants is treated as OID, and accreted into interest income as described above.

Unamortized net loan origination fees on debt investments were \$2.4 million and \$1.9 million as of March 31, 2016 and December 31, 2015, respectively. We recognized net loan origination fee income of \$0.4 million and \$0.4 million for the three months ended March 31, 2016 and 2015, respectively. We recognized PIK interest income of \$0.3 million and \$0.3 million for the three months ended March 31, 2016 and 2015, respectively. To maintain its status as a RIC, we include non-cash interest income in the determination of distributable income.

Dividend Income: Dividend income on common stock, generally payable in cash, is recorded at the time dividends are declared. Dividend income on preferred equity securities is accrued as earned. Dividends on preferred equity securities may be payable in cash or in additional preferred securities, and are generally not payable unless declared or upon liquidation. Declared dividends payable in cash are reported as dividend receivables until collected. Dividends payable in additional preferred securities or contractually earned but not declared (PIK dividends) are recorded as an adjustment to the cost basis of the investment. We discontinue accrual of dividends on preferred equity securities when we determine that the dividend may not be collectible. We assess the collectability of the preferred dividends based on factors including the fair value of the preferred equity security, the valuation of the portfolio company s enterprise value, and proceeds expected to be received over the life of the investment. Distributions received from common or preferred equity securities that do not qualify as dividend income are recorded as return of capital and a reduction in the cost basis of the investment. In addition, we may receive cash distributions from portfolio companies that are taxed as flow-through entities. Each distribution is evaluated to determine whether it should be recorded as income or as a return of capital. Distributions classified as a returns of capital are recorded as reductions in the cost basis of the investments. We recognized preferred dividend income of \$0.5 million and \$0.3 million, of which \$0.3 million and \$0.3 million, respectively, was contractually earned but not declared for the three months ended March 31, 2016 and 2015. We recognized common stock dividends of \$43 thousand for the three months ended March 31, 2016. We did not recognize common stock dividends during the three months ended March 31, 2015.

Fee Income: We generate revenue in the form of commitment, structuring or due diligence fees, fees for providing managerial assistance, consulting fees, and other contractual fees. Such revenue is recognized as the related services

are rendered. Prepayment penalties for debt instruments repaid prior to their stated maturity are recorded as income upon receipt.

Net Realized and Unrealized Gain or Loss on Investments: Investment transactions are reported on a trade-date basis. Realized gains or losses on investments are measured by the difference between the net proceeds from the disposition and the cost basis of the investment, without regard to unrealized gains or losses as of the date of disposition. Investments are reported at fair value as determined by our Board. After recording all appropriate interest, dividend, and other income, some of which is recorded as an adjustment to the cost basis of the investment as described above, we report changes in the fair value of investments as a component of the net changes in unrealized appreciation/depreciation on investments in the consolidated statements of operations.

Non-accrual loans: Loans on which the accrual of interest income has been discontinued are designated as non-accrual loans, and non-accrual loans are further classified as and accounted for under either a non-accrual cash method or a non-accrual cost recovery method. Loans are generally placed on non-accrual status when a loan either:

(i) is delinquent for 90 days or more on principal or interest according to contractual terms of the loan (unless well secured and in the process of collection), or (ii) in the opinion of management, there is reasonable doubt about its collectability. When loans are placed on non-accrual status, all interest previously accrued but not collected interest, other than PIK interest that has been contractually added to the principal balance prior to the designation date, is reversed against current period interest income. Interest payments subsequently received on non-accrual loans may be recognized as income or applied to principal depending upon management s judgment. Interest accruals are resumed on non-accrual loans only when they are brought current with respect to interest and principal and when, in the judgment of management, the loans are estimated to be fully collectible as to all principal and interest.

Portfolio Composition and Investment Activity

Portfolio Composition

The total fair value of our investments was \$245.4 million and \$257.3 million at March 31, 2016 and December 31, 2015, respectively. Our investment portfolio as of March 31, 2016 consisted of outstanding loans to 35 portfolio companies, totaling approximately \$218.3 million in aggregate principal amount, of which 70% were senior secured loans, 30% were subordinated loans, and approximately \$32.5 million were equity investments, at fair value, in 16 portfolio companies in which it also held debt investments and one portfolio company in which it solely held an equity investment. Our investment portfolio encompassed a broad range of geographical regions within the United States and industries. We had unfunded commitments of \$5.3 million and \$3.8 million to four portfolio companies and three portfolio companies at March 31, 2016 and December 31, 2015, respectively. Set forth in the tables below is selected information with respect to our portfolio as of March 31, 2016 and December 31, 2015.

The following table summarizes the composition of our investment portfolio as of March 31, 2016 and December 31, 2015.

	March 31, 2016			December 31, 2015
