To Our Shareholders:

We regret to report on the discovery that false data had been produced and submitted to the Tokyo Metropolitan Government with respect to products manufactured by our wholly owned subsidiary, resulting in the provision of products whose filtration ratios did not meet the regulatory standard. The product is Diesel Particulate Filter (DPF), which reduces the particulate matters contained in the emissions of diesel vehicles. We express our utmost regret to our shareholders, as well as all other parties concerned, for the occurrence of this incident.

While making best efforts to fully investigate this incident, we will undertake to replace our DPFs for free by engaging in a series of activities, including, supplying products of other manufacturers, reforming our existing products and developing alternative products.

In order to prevent the recurrence of similar cases in the future, we will carry out a company-wide effort to reinforce the existing compliance programs and to ensure higher corporate ethics, and ask for the kind understanding and support of our shareholders.

Shoei Utsuda
President and Chief Executive Officer

Interim Business Report

**First half of the fiscal year
ending March 31, 2005**

**April 1, 2004 to
September 30, 2004**

The 86th financial year of Mitsui & Co., Ltd.

Translated document

This report has been prepared in English solely for the convenience of foreign readers, based on the *Chukanhokokusho* for the first half of Mitsui's 86th year. The original statements in Japanese are definitive.

Table of Contents

From the President

We are delighted to bring you our Interim Business Report for the 86th year of Mitsui & Co., Ltd. (Mitsui), the fiscal year ending March 31, 2005.

In the interim period from April 1, 2004 to September 30, 2004 we achieved record results, with consolidated net income of 62.1 billion yen and unconsolidated net income of 40.6 billion yen. In reflection of these results we revised our full year consolidated net income forecasts upwards to 110.0 billion yen.

The interim dividend payment has also been increased to 5 yen per share, 1 yen per share higher than for the previous interim period. Moreover, based on our new dividend policy of targeting a consolidated payout ratio of 20%, we intend to increase the final dividend for the year above the 8 yen per share paid in the previous fiscal year by improving our business performance. Achieving our consolidated net income target of 110.0 billion yen would equate to a dividend of 14 yen per share for the full year.

In the second half of this year we will continue making every effort to build the earning power of Mitsui. We look forward to your support.

Shoei Utsuda

President and Chief Executive Officer

Table of Contents

Operating Environment

General Economic Conditions

Global economic conditions improved during the interim period under review, with growth in the major developed economies as well as in emerging countries such as China, India, and Russia. Contributing factors included the effects of historically low interest rates, higher demand for digital home appliances such as flat-screen televisions, a recovery in demand for personal computers and other IT-related items, and significant growth in demand for motor vehicles and infrastructure developments particularly in China but also in other emerging economies. These factors contributed to a substantial increase in global trade, with a considerable lift in commodity markets such as oil and mineral resources. In addition, momentum grew in corporations' efforts to engage constructively in CSR (corporate social responsibility).

The Japanese Economy

The Japanese economy continued to recover, underpinned by strong exports and capital expenditure. Key contributing factors included global growth in demand for highly competitive Japanese products such as digital electronics and hybrid vehicles, and strong ongoing growth in Japan's key export markets in Asia. Personal consumption also showed a mild upturn, with recovery in the labor market and stronger consumer sentiment. Increased activity in international commodity markets led to higher prices for raw and intermediate materials, but the impact of this on finished product prices was delayed and consumer prices remained weak.

Japan's economic recovery is characterized by progress in the clearing up non-performing loans in the financial sector, widespread corporate restructuring, and other aspects of longer-term economic reform that have strengthened corporate financial fundamentals. More stable and sustainable economic growth can be expected, as quantitative monetary easing continues, the government undertakes further fiscal and regulatory reform, and individual companies pursue their own reform programs and direct resources into growth areas.

Recognition of our Operating Environment

As the pace of globalization increases, the influence of new and rapidly developing economies, in particular the so-called BRICS countries of Brazil, Russia, India and China, is rapidly growing. At the same time the unification of regional economies is progressing in Asia, Europe and the Americas. The ongoing infiltration of information technology into every industry, meanwhile, is propelling a shift from supply-driven economies to consumer-driven economies. In addition, global trends concerning health, safety and environmental protection are strengthening, and companies are increasingly expected to demonstrate high levels of accountability and transparency.

Based on awareness of the operating environment as described above, Mitsui is engaging in a range of activities with the aim of further increasing earnings growth.

Table of Contents

**Management policy and New Medium-term
Strategic and Financial Plan
Management Philosophy**

In August of this year we elaborated our management philosophy to create the following Mission, Vision and Values.

Mission

We will contribute to the creation of a future where the dreams of the inhabitants of our irreplaceable Earth can be fulfilled.

Vision

We aim to become a global business enabler that can meet the needs of our customers throughout the world.

Values

- 1 Making it a principle to be fair and humble, we, with sincerity and in good faith, will strive to be worthy of the trust society places in us.
- 1 With lofty aspirations and from an honest perspective, we will pursue business that benefits society.
- 1 Always taking on the challenge of new fields, we will dynamically create business that can lead the times.
- 1 Making the most of our corporate culture that fosters Freedom and Open-mindedness, we will fully demonstrate our abilities as a corporation as well as individuals.
- 1 In order to nurture human resources full of creativity and a superior sense of balance, we will provide our people with a workplace for self-development as well as self-realization.

In line with this management philosophy, we are currently in the process of reshaping our operations with aim of making use of our business engineering capabilities and worldwide network to generate new value as a *global business enabler*. Through measures such as revising our business structure and allocating resources to areas of strategic importance we are seeking to increase earning power and maximize corporate value.

Table of Contents

New Medium-Term Strategic and Financial Plan

(1) Summary of Medium-term Strategic and Financial Plan to March 31, 2006

In the previous fiscal year, ended March 2004, we achieved record consolidated net income of 68.4 billion yen. At the same time we made steady and substantial qualitative improvements through measures such as creating more effective management and sales structures, allocating management resources to areas of strategic importance, reviewing subsidiaries and related companies, and engaging in business process engineering. Based on these results, in May 2004 we announced Global Growth 2006, our new medium-term strategic and financial plan for the two years to March 31, 2006 that provides a blueprint for a new stage of growth across our entire organization. The key elements of this plan are as follows.

1. Quantitative targets

Mitsui's target for the final year of the plan, ending March 2006, is consolidated net income of 100 billion yen with a 9% return on equity and a net debt-to-equity ratio of around 3 times. Our aim is to maintain strong financial fundamentals while expanding our earnings foundation to generate sustainable growth.

2. Key initiatives

Key initiatives in Global Growth 2006 include the following.

(a) Continuously reviewing Mitsui's business portfolio

With the aim of making optimum use of our available management resources, we will concentrate on and invest in core and growing business areas, continuously review subsidiaries and associated companies, and reallocate human resources. Specific measures over the two years to March 2006 include 400 billion yen of investment, comprising 300 billion yen in core mineral, energy and plant project business, with 100 billion yen being targeted towards fueling growth in key strategic areas such as retail and foods businesses, consumer products and services businesses, lifestyle-related businesses, and automobile-related businesses.

(b) Developing a new growth model and leveraging our comprehensive capabilities

We intend to generate further growth, strengthening our existing core businesses while anticipating structural changes within Japan and around the world to take the lead in developing new business opportunities. Through the three strategies of *value chain*, *cross border*, and *innovation* we intend to make powerful use of our comprehensive group capabilities.

(c) Implementation of global strategy

In response to the development of unified regional economies in Asia, Europe and the Americas, we will strengthen operations in growth areas such as Greater China, Central and Eastern Europe, Russia /CIS, Brazil and Chile, forming strategic alliances with leading domestic and international companies as appropriate. At the same time we will take steps to inculcate the Mitsui culture throughout our operations, training and recruiting people globally.

(d) Strengthening corporate governance and CSR

We will strengthen corporate governance and internal controls and focus on CSR in our business management processes, with the aim of increasing the quality and transparency of our management processes and meeting the trust placed in us by stakeholders.

Table of Contents

(2) Initiatives during the six-month period ended September 30, 2004

During the fiscal period under review, specific measures implemented based on the medium-term strategic and financial plan outlined above were as follows.

1. Enhancement of management system

Corporate governance and internal control has been strengthened through the following measures.

- 1 In April this year three advisory committees to the board of directors (the Governance Committee, the Nomination Committee, and the Remuneration Committee) were introduced while maintaining the corporate auditor system.
- 1 The term of appointment for directors and executive officers has been reduced, and the number of external directors increased.
- 1 In working toward the establishment of a consolidated compliance system covering domestic and international Group businesses including compliance with the Sarbanes-Oxley Act and other responsibilities an Internal Control Committee was established in April 2004.
- 1 Also in April 2004 a CSR Promotion Committee was established. (Further information on Mitsui's approach to CSR management systems can be found on page 8 of this document).

2. Reorganization of business units

In April 2004 we adopted the following organizational structure, with the aim of increasing speed and efficiency in executing our global strategy, and optimizing the allocation of management resources from a groupwide perspective.

- 1 We reorganized business units and reduced them in number from 19 to 13.
- 1 We created a Consumer Services Business Unit, containing operations that reflect the rapid expansion in Japan of service industries such as knowledge-based businesses, health care and services to the elderly. The mission of this unit is to develop new business models based on identifying consumer needs.
- 1 With the aim of building on our global logistics capability as a general trading company and developing new business opportunities, a separate Transportation Logistics Business Unit has been created.

1

We have also taken steps to enhance the efficiency and capabilities of our domestic business network by introducing a new management structure in April 2004 in which each Chief Operating Officer (instead of the general manager of each branch or office) is responsible for the management of business activities in domestic branches and offices based on product lines.

Table of Contents

3. Strategic allocation of management resources

We have continued to prioritize the allocation of resources into core and growth business areas. Specific examples include:

- 1 Acquiring interests in the development of the Enfield oil project in Western Australia
- 1 Participating in the acquisition of the overseas power plant portfolio held by US company Edison Mission Energy
- 1 Investing in Quintiles Transnational Japan, a company that provides outsourcing services for the pharmaceutical industry
- 1 Forming a capital and business alliance with Duskin Co., Japan's leading home services provider

4. Boosting consolidated Group value: rigorous review of subsidiaries and associated companies

In the fiscal year ended March 31, 2004 we undertook a comprehensive review of 702 subsidiaries and associated companies throughout the Group, and having decided to exit from 190 of these took definitive action on 104 companies. Out of approximately 50 companies scheduled for exit during the year ending March 31, 2005, we have taken definitive action on 19 companies during the interim period under review.

5. Executing our Global strategy: Start of Pan-Asian management organization

Since the entry of China and Taiwan into the WTO we have placed increasing importance on the growing Greater China and Association of Southeast Asian Nations (ASEAN) free trade regions. In October 2004 we appointed a Regional Managing Director, Asia, who supervises the operations of foreign trading subsidiaries and branches in Asia, with the aim of enhancing the gaining and sharing of knowledge within the region to allow better leveraging of our capabilities and promote a new stage of business expansion in the region.

6. Business Process Re-engineering

Over the past three years, we have been carrying out Business Process Re-engineering with the aim of standardizing our business procedures through the use of Enterprise Resource Planning. The objectives are to improve productivity and enhance knowledge sharing, thereby enabling faster management decisions and value creation. In April 2004 we began operations at our Shared Service Center, which handles all cash settlements and delivery tasks in Mitsui, and in November 2004 we plan to begin full-scale operation of MICAN, a new information system infrastructure.

Table of Contents

Corporate Social Responsibility (CSR)

Basic Approach to CSR

We fully recognize the importance of CSR as a management issue, and are committed to CSR management systems. In April 2004 we established a CSR Promotion Committee with members from a range of functions, which is the central body coordinating our CSR-oriented management program and CSR initiatives. In pursuit of socially responsible management we believe it is important to strengthen our management foundation of corporate governance and internal controls, to increase each employee's awareness of CSR and commitment to Mitsui's mission, vision and values, and to create an environment in which people *do good work*. In September 2004 we published *Mitsui's Basic Approach to CSR*, as one part of measures to raise awareness of CSR among all employees.

Mitsui's Basic Approach to CSR

- 1) We aim to carry out our business activities with integrity, working to continuously raise our corporate value by giving due consideration to both our economic role and our role in society and remaining highly aware of our relationship with the environment.
- 2) We seek to increase each employee's awareness of CSR, and by further strengthening corporate governance and internal control build a strong CSR-based management foundation as a company that actively contributes to society.
- 3) We place high value on dialogue with stakeholders. We intend to engage in a continuous cycle of explanation to stakeholders, feedback from stakeholders, and subsequent improvement of our CSR initiatives.

Support for United Nations Global Compact

In October 2004 we announced our support for the ten principles of the United Nations Global Compact. The Global Compact asks companies to embrace, support and enact, within their sphere of influence, these ten principles in the area of human rights, labor standards, the environment, and anti-corruption. We intend to conduct periodic internal reviews covering our adherence to these principles, through which we will reveal any deficiencies in our approach, implement corrective initiatives, and clearly disclose what we have done. By making this cycle part of our normal operational process we are aiming to continuously improve the transparency and integrity of our business methods. We have also published a revised edition of our Mitsui Business Conduct Guidelines for Executives and Employees, which includes a new section on CSR-oriented management.

Centered on the CSR Promotion Committee, we intend to continue our pursuit of CSR management systems, promote CSR initiatives throughout the Group, and engage in ongoing dialogue with our stakeholders.

Table of Contents

Operating performance
Consolidated Interim Operating Results

The operating performance of Mitsui and its subsidiaries (the companies) for the six-month period ended September 30, 2004 is summarized as follows:

Total Trading Transactions

Total trading transactions for the six-month period ended September 30, 2004 increased ¥776.8 billion, or 13.1% over the corresponding six-month period of the previous year, to ¥6,722.9 billion mainly attributable to:

the increase in transactions of steel products driven by demand from Chinese and other Asian markets and the increase in offshore trading transactions of iron ore in the Metal Products & Minerals Segment;

the increase at an energy related subsidiary and steel products related subsidiaries in the United States reflecting the rising prices of crude oil and steel products in the Americas Segment; and

higher overall market prices for petrochemicals in the Chemical Segment.

See note 2 to Trends in Company Performance (Consolidated) for an explanation on total trading transactions.

Earnings

Gross profit increased ¥60.0 billion to ¥352.5 billion mainly attributable to:

the increase at overseas iron and steel raw material related subsidiaries against strong demand from China and other Asian countries as well as higher prices of these commodities in the Metal Products & Minerals Segment;

higher oil price in this six-month period and the increase in the trading profit in crude oil trading at overseas subsidiaries and oil product trading at Mitsui in the Energy Segment; and

the increase of trading profit in commodity trading such as raw sugar and grain and the sale of large commercial facility in the United States in the Consumer Products & Services Segment.

Selling, general and administrative expenses increased ¥13.0 billion to ¥250.8 billion across the whole segments reflecting overall expanding business activities including acquisitions of subsidiaries such as Mitsui Norin Co., Ltd., which outweighed the decrease in employee pension benefit costs at Mitsui.

Dividend income increased ¥2.9 billion to ¥13.7 billion reflecting the increase in dividend from liquefied natural gas projects in the Middle East.

Gain on sales of securities net increased ¥13.3 billion to ¥24.3 billion due to the sale of the stocks of an IT related subsidiary Telepark Corp. (formerly Mitsui & Associates Telepark Corporation) at its initial public offering and the sale of the marketable securities of a domestic telecommunication company.

Impairment loss of long-lived assets increased ¥1.6 billion to ¥8.6 billion due to a loss on the land held for development in Japan.

Other expense net was ¥1.2 billion, improved by ¥10.1 billion compared with the loss of ¥11.3 billion in the corresponding six-month period of the previous year which contained the charges for the settlement of an antitrust lawsuit in the United States.

As a result of the above, income from continuing operations before income taxes, minority interests and equity in earnings increased ¥72.8 billion to ¥119.0 billion.

Table of Contents

Equity in earnings of associated companies net (after income tax effect) increased ¥10.1 billion to ¥26.2 billion, due to the strong performance of overseas mineral resources related associated companies. In addition, domestic associated companies reported overall improvement compared with the corresponding six-month period of the previous year.

As a result of these developments, net income increased ¥36.3 billion, or 140.5% over the corresponding six-month period of the previous year, to ¥62.1 billion, after the addition of income from discontinued operations net of ¥0.7 billion which showed an improvement from a ¥5.1 billion loss mainly caused by a loss from the disposal of golf courses for the corresponding six-month period of the previous year.

Total Trading Transactions	¥ 6,722,917	¥ 5,946,101	¥ 5,455,283	¥ 5,594,166
Operating Income	98,020	51,068	49,076	45,937
Net Income	62,101	25,822	24,789	23,418

Notes:

- The figures shown in this table have been prepared on the basis of accounting principles generally accepted in the United States of America.
- Total Trading Transactions are a voluntary disclosure as permitted by Financial Accounting Standards Board Emerging Issues Task Force Issue (EITF) No. 99-19, and represent the gross transaction volume or the aggregate nominal value of the sales contracts in which the companies act as principal and transactions in which the companies serve as agent. Total Trading Transactions should not be construed as equivalent to, or a substitute or a proxy for, revenues, or as an indicator of the companies' operating performance, liquidity or cash flows generated by operating, investing or financing activities. The companies have included the gross transaction volume information because similar Japanese trading companies have generally used it as an industry benchmark. As such, management believes that Total Trading Transactions are a useful supplement to the results of operations information for users of the consolidated financial statements.
- Operating Income reflects the companies' a) Gross Profit, b) Selling, general and administrative expenses, and c) Provision for doubtful receivables.
- In accordance with Statement of Financial Accounting Standards (SFAS) No. 144, Accounting for the Impairment or Disposal of Long-Lived Assets, the prior period figures relating to discontinued operations have been reclassified.
- Figures are rounded to the nearest million yen.

Notes:

- In accordance with SFAS No. 144, the figures of Consolidated Total for the six-month period ended September 30, 2003 have been reclassified. The reclassifications to Income (Loss) from Discontinued Operations Net (After Income Tax Effect) are included in Adjustments and Eliminations.
- Effective April 1, 2004, the companies integrated the business operations of their domestic branches and offices into business units in the Head Office, reorganized business units in the Head Office, and the composition of reportable operating segments was changed in the six-month period ended September 30, 2004. The operating segment information for the six-month period ended September 30, 2003 has been restated to conform to the current period presentation. The primary changes are as follows:
 - The former Domestic Branches and Offices was abolished and transferred to each product-focused operating segment in the Head Office based on the nature of previous operations.
 -

Certain operations, which had been included in Metal Products and Minerals and All Other, were reported as Logistics & Financial Markets.

- (c) The media-related businesses oriented to consumers, which had been included in Machinery, Electronics & Information, were transferred to Consumer Products & Services.
3. All Other includes business activities which primarily provides services, such as development and marketing of systems, financing service, and operation services to external customers and/or to the companies and associated companies. Total assets of All Other at September 30, 2004 and 2003 consist primarily of cash and cash equivalents and time deposits related to financing activities, and assets of certain subsidiaries related to the above services.
4. Net loss of Adjustments and Eliminations includes income and expense items that are not allocated to specific reportable operating segments, such as certain expenses of the corporate departments, and eliminations of inter-segment transactions.
Net loss of Adjustments and Eliminations for the six-month period ended September 30, 2004 includes a) a charge of ¥19,118 million for the valuation allowance for deferred tax assets and b) ¥8,487 million in general and administrative expenses of the corporate departments (all amounts are after income tax effects).
Net loss of Adjustments and Eliminations for the six-month period ended September 30, 2003 includes a) a charge of ¥11,868 million for pension related items and b) ¥6,355 million in general and administrative expenses of the corporate departments excluding pension costs (all amounts are after income tax effects).
5. Transfers between operating segments are made at cost plus a markup.
6. Operating Income (Loss) reflects the companies a) Gross Profit, b) Selling, general and administrative expenses, and c) Provision for doubtful receivables.
