ITEM 5. Other Events and Regulation FD Disclosure

First Tennessee National Corporation ("Corporation") announced today that management has been delegated the authority within defined limits to purchase up to the total principal amount outstanding of the Corporation's 6.75% November 2005 subordinated debt (\$75 million). Since this outstanding debt issue is in the last half of its term, it provides only limited regulatory capital benefit and will be replaced with short-term market rate funds.

Today a tender offer was commenced to purchase this debt issue at a price reflecting a formula-driven premium to its par value. Using the formula with the appropriate spread over the benchmark rate as of 1:30 pm CDST yesterday (07/29/03), a premium of 10.8% over par would be paid for the Corporation's debt. Because the Corporation is offering to pay a premium, the tender offer, if completed, will result in a current charge to earnings. The amount of the charge will primarily depend on the amount of the debt issue tendered and purchased in the offer, which is estimated to be between 60 percent and 90 percent of the total principal amount outstanding.

Purchase activities are expected to take place during third quarter 2003 and will be managed by FTN Financial Securities Corp., a subsidiary of First Tennessee Bank National Assoc.
