NOTES TO THE INTERIM FINANCIAL STATEMENTS
May 31, 2005
(Stated in US Dollars)
(Unaudited)

Note 1 Nature of Continued Operations and Basis of Presentation

The Company is an exploration stage company. The Company was organized for the purpose of acquiring, exploring and developing mineral properties. The recoverability of amounts from properties acquired will be dependant upon discovery of economically recoverable reserves, confirmation of the Company's interest in the underlying property, the ability of the Company to obtain necessary financing to satisfy the expenditure requirements under the property agreement and to complete the development of the property and upon future profitable production.

Going Concern

The financial statements have been prepared on the basis of a going concern which contemplates the realization of assets and the satisfaction of liabilities in the normal course of business. The Company has incurred losses since inception of \$2,766,500 and further losses are anticipated in the development of its mineral properties raising substantial doubt as to the Company's ability to continue as a going concern. The ability of the Company to continue as a going concern is dependent on raising additional capital to fund ongoing exploration and development and ultimately on generating future profitable operations. The Company will continue to fund operations with advances, other debt sources and further equity placements.

Unaudited Interim Financial Statements

The accompanying unaudited interim consolidated financial statements have been prepared in accordance with generally accepted accounting principles for interim financial information and with the instructions to Form 10-QSB of Regulation S-B. They do not include all information and footnotes required by generally accepted accounting principles for complete financial statements. However, except as disclosed herein, there have been no material changes in the information disclosed in the notes to the financial statements for the year ended November 30, 2004 included in the Company's Annual Report on Form 10-KSB filed with the Securities and Exchange Commission. The interim unaudited financial statements should be read in conjunction with those financial statements included in the Form 10-KSB. In the opinion of Management, all adjustments considered necessary for a fair presentation, consisting solely of normal recurring adjustments, have been made. Operating results for the six months ended May 31, 2005 are not necessarily indicative of the results that may be expected for the year ending November 30, 2005.

Item 2. Management's Discussion and Analysis or Plan of Operation

FORWARD LOOKING STATEMENTS

This quarterly report contains forward-looking statements that involve risks and uncertainties. We use words such as anticipate, believe, plan, expect, future, intend and similar expressions to identify such forward-looking statements. You should not place too much reliance on these forward-looking statements. Our actual results are likely to differ materially from those anticipated in these forward-looking statements for many reasons, including the risks faced by us described in this Risk Factors section and elsewhere in this annual report.

Item 3. Controls and Procedures

As required by Rule 13a-15 under the Exchange Act, within the 90 days prior to the filing date of this report, the Company carried out an evaluation of the effectiveness of the design and operation of the Company's disclosure controls and procedures. This evaluation was conducted by directors of the Company.

Based upon that evaluation, the Company concluded that the disclosure controls and procedures are effective. There have been no significant changes in the Company's internal controls or in other factors, which could significantly affect internal controls subsequent to the date the Company carried out its evaluation.

Plan of Operation

Our plan of operations for the twelve months following the date of this quarterly report is to complete initial exploration programs on the Brookmount and Mercedes properties, as well as proceeding with the development of the Mooseland Deposit property located in Halifax County, Nova Scotia. We anticipate that the programs on the Brookmount and Mercedes properties will cost \$10,000 and \$220,000 respectively. In addition, we expect to pay approximately \$830,000 (CDN\$1,000,000) to Globex Mining Enterprises Inc. pursuant to our agreement concerning the Mooseland Deposit property, as well as \$250,000 on the development of the property.

In addition, we anticipate spending \$17,200 on professional fees, \$99,000 on salaries and wages, \$10,000 on travel costs, \$15,000 on promotional expenses and \$50,000 on other administrative expenses in the next 12 months.

Total expenditures over the next 12 months are therefore expected to be \$1,501,200. We will not be able to proceed with either exploration program, or meet our administrative expense requirements, without additional financing.

We will not be able to complete the initial exploration programs on our mineral properties without additional financing. We currently do not have a specific plan of how we will obtain such funding; however, we anticipate that additional funding will be in the form of equity financing from the sale of our common stock. We may also seek to obtain short-term loans from our directors, although no such arrangement has been made. At this time, we cannot provide investors with any assurance that we will be able to raise sufficient funding from the sale of our common stock or through a loan from our directors to meet our obligations over the next twelve months. We do not have any arrangements in place for any future equity financing.
