

ELBIT SYSTEMS LTD
Form 20-F
March 15, 2011

UNITED STATES
SECURITIES AND EXCHANGE COMMISSION
Washington, D.C. 20549

FORM 20-F

ANNUAL REPORT PURSUANT TO SECTION 13 OR 15(d)
OF THE SECURITIES EXCHANGE ACT OF 1934
for the fiscal year ended December 31, 2010
Commission File No. 0-28998

ELBIT SYSTEMS LTD.

(Exact name of registrant as specified in its charter and translation of registrant's name into English)

Israel

(Jurisdiction of incorporation or organization)

Advanced Technology Center, Haifa 31053, Israel
(Address of principal executive offices)

Joseph Gaspar
c/o Elbit Systems Ltd.
P.O. Box 539
Advanced Technology Center
Haifa 31053
Israel

Tel: 972-4-831-6404

Fax: 972-4-831-6944

E-mail: j.gaspar@elbitsystems.com

(Name, telephone, e-mail and/or facsimile number and address of Company contact person)

Securities registered or to be registered pursuant to Section 12(b) of the Act:

Ordinary Shares, nominal value 1.0 New Israeli Shekels per share

(Title of Class)

The NASDAQ Global Select Market

(Name of each Exchange on which registered)

Securities registered or to be registered pursuant to Section 12(g) of the Act:

Not Applicable

Securities for which there is a reporting obligation pursuant to Section 15(d) of the Act:

Not Applicable

Indicate the number of outstanding shares of each of the issuer's classes of capital or common stock as of the close of the period covered by the annual report: 42,693,340 Ordinary Shares

Edgar Filing: ELBIT SYSTEMS LTD - Form 20-F

Indicate by check mark whether the registrant is a well-known seasoned issuer, as defined in Rule 405 of the Securities Act.

Yes No

If this report is an annual or transition report, indicate by check mark if the registrant is not required to file reports pursuant to Section 13 or 15(d) of the Securities Exchange Act of 1934.

Yes No

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days.

Yes No

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T (232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files).

Yes No

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, or a non-accelerated filer. See definition of "accelerated filer and large accelerated filer" in Rule 12b-2 of the Exchange Act (Check One).

Large accelerated filer Accelerated filer Non-accelerated filer

Indicate by check mark which basis of accounting the registrant has used to prepare the financial statements included in this filing.

U.S. GAAP International Financial Reporting Standards as issued by the International Accounting Standards Board Other

If "Other" has been checked in response to the previous question, indicate by check mark which financial statement item the registrant has elected to follow.

Item 17 Item 18 No

If this is an annual report, indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act).

Yes No

PART I

General Disclosure Standards

The consolidated financial statements of Elbit Systems Ltd. (Elbit Systems) included in this annual report on Form 20-F are prepared in accordance with United States generally accepted accounting principles (U.S. GAAP). Unless otherwise indicated, all financial information contained in this annual report is presented in U.S. dollars. References in this annual report to the “Company”, “we”, “our”, “us” and terms of similar meaning refer to Elbit Systems and our subsidiaries unless the context requires otherwise.

Cautionary Statement with Respect to Forward-Looking Statements

This annual report on Form 20-F contains forward-looking statements within the meaning of Section 27A of the Securities Act of 1933, as amended, and Section 21E of the Securities Exchange Act of 1934, as amended. These statements relate to our current plans, estimates, strategies, goals and beliefs and as such do not relate to historical or current fact. Forward-looking statements are made pursuant to the safe harbor provisions of the Private Securities Litigation Reform Act of 1995, as amended.

Forward-looking statements contained herein generally are identified by the words “believe,” “project”, “expect”, “will likely result”, and “strategy”, “plan”, “may”, “should”, “will”, “would”, “will be”, “will continue”, “will likely result” and similar expressions. Forward-looking statements are based on management’s current expectations, estimates, projections and assumptions and are not guarantees of future performance and involve certain risks and uncertainties, the outcomes of which cannot be predicted. Therefore, actual future results, performance and trends may differ materially from these forward-looking statements due to a variety of factors, including, without limitation:

- the scope and length of customer contracts;
- governmental regulations and approvals;
- changes in governmental budgeting priorities;

• general market, political and economic conditions in the countries in which we operate or sell, including Israel and the United States among others;

• differences in anticipated and actual program performance, including the ability to perform under long-term fixed-price contracts; and

- the outcome of legal and/or regulatory proceedings.

The factors listed above are not all-inclusive, and further information about risks and other factors that will affect our future performance is contained in this annual report on Form 20-F. All forward-looking statements speak only as of the date of this annual report. We expressly disclaim any obligation to update or review any forward-looking statements, whether as a result of new information, future events or otherwise, except as may be required by applicable law.

Item 1. Identity of Directors, Senior Management and Advisers.

Information not required in annual report on Form 20-F.

Item 2.

Offer Statistics and Expected Timetable.

Information not required in annual report on Form 20-F.

Item 3.

Key Information.

Selected Financial Data

The following selected consolidated financial data of the Company as of and for the years ended December 31, 2006, 2007, 2008, 2009 and 2010 are derived from our audited consolidated financial statements, including our audited consolidated financial statements as of December 31, 2009 and 2010, and for each of the years ended December 31, 2008, 2009 and 2010, which appear in Item 18 in this annual report on Form 20-F. You should read the audited consolidated financial statements appearing in Item 18 together with the selected financial data set forth below. (For non-GAAP financial data see Item 5. Operating and Financial Review and Prospects – Non-GAAP Financial Data.)

Risk Factors

General Risks Related to Our Business and Market

Our revenues depend on a continued level of government business. We derive most of our revenues directly or indirectly from government agencies, mainly the Israeli Ministry of Defense (IMOD), the U.S. Department of Defense (DOD) and defense ministries of certain other countries, pursuant to contracts awarded to us under defense-related programs. The funding of these programs is subject to government budgeting decisions affected by numerous factors, including geo-political events and macro-economic conditions that are beyond our control. Government spending under such contracts may cease or may be reduced, which would cause a negative effect on our revenues, results of operations, cash flow and financial condition.

The current worldwide economic and financial situation as well as possible reductions in U.S. defense expenditures may have a material adverse effect on our results. Over the past few years many of the world's economies and financial institutions have experienced a reduction in economic activity, a decline in asset prices, liquidity problems and limited availability of credit. Also, statements by U.S. government officials indicate that overall U.S. defense spending may decrease. Such factors may result in a reduction in demand and downward pressure on pricing in some or all of our markets, which could adversely affect our business, results of operations and financial condition. The economic and financial situation may: (i) cause the value of our investments in our pension plans to decrease, requiring us to increase our funding of those pension plans; (ii) result in a lower return and value on our assets; (iii) increase the cost or hinder our ability to finance future projects; and (iv) negatively impact our customers, which in turn could negatively impact our ability to collect accounts receivable.

Our contracts may be terminated for convenience of the customer. Our contracts with governments often contain provisions permitting termination for convenience of the customer. Our subcontracts with non-governmental prime contractors sometimes contain similar provisions. In a minority of these contracts, an early termination for convenience would not entitle us to reimbursement for all of our incurred contract costs or for a proportionate share of our fee or profit for work performed.

We depend on governmental approval of our exports. Our international sales as well as our international procurement of skilled human resources, technology and components depend largely on export license approvals from the governments of Israel, the U.S. and other countries. If we fail to obtain material approvals in the future, if material approvals previously obtained are revoked or if government export policies change, our ability to sell our products and services to overseas customers and our ability to obtain goods and services essential to our business could be interrupted, resulting in a material adverse effect on our business, revenues, assets and results of operations. (See Item 4. Information on the Company – Governmental Regulation.)

As a government contractor, we are subject to a number of procurement rules and regulations. We are required to comply with specific procurement rules and regulations, including those relating to cost accounting, anti-bribery, procurement integrity and others, which increase our performance and compliance costs. (See Item 4. Information on the Company – Governmental Regulation.) If these rules and regulations change, our costs of complying with them could increase and reduce our margins. In addition, failure to comply with these rules and regulations could result in reductions of the value of contracts, contract modifications or termination, and the assessment of penalties and fines, which could negatively impact our results of operations and financial condition. Failure to comply with these rules and regulations could also lead to suspension or debarment from government contracting or subcontracting for a period of time, which could have a negative impact on our results of operations, financial condition and reputation.

We depend on international operations. We expect that international sales will continue to account for a significant portion of our revenues for the foreseeable future. As a result, changes in international, political, economic or

geographic events could result in significant shortfalls in orders or revenues. These shortfalls could cause our business, financial condition and results of operations to be harmed. In addition to the other risks from international operations set forth in these Risk Factors, some of the risks of doing business internationally include:

- unexpected changes in regulatory requirements;
- changes in governmental defense budgets and national priorities;
- imposition of tariffs and other barriers and restrictions;
- burdens of complying with a variety of foreign laws;
- political and economic instability; and
- changes in diplomatic and trade relationships.

Some of these factors, such as the ability to obtain foreign government approvals and changes in diplomatic relationships, may be affected by Israel's overall political situation. (See "Risks Related to Our Israeli Operations" below.) In addition, the economic and political stability of the countries of our major customers and suppliers may impact our business.

We have risks related to our pension plans, which could impact our liquidity. Funding obligations for certain of our pension plans are impacted by the performance of the financial markets and interest rates. When interest rates are low, or if the financial markets do not provide long-term returns as expected, there is an increased likelihood we may be required to make additional contributions to these pension plans. Because of the volatility in the equity markets, our estimate of future contribution requirements can change dramatically in relatively short periods of time. (See Item 18. Financial Statements – Notes 2(T) and 17.)

We face currency exchange risks. As more of our revenues are generated in currencies other than the U.S. dollar (which is the functional currency we use for financial reporting purposes), mainly in New Israeli Shekels (NIS), Great Britain Pounds (GBP) and Euros, we are subject to increasingly significant foreign currency risks. For example, we could be negatively affected by exchange rate changes during the period from the date we submit a price proposal until the date of contract award or until the date(s) of payment. Moreover, since a significant portion of our expenses is denominated in NIS, if we do not adequately hedge against exchange rate risks, our financial results could be adversely affected. Accordingly, our level of revenues and profits may be adversely affected by exchange rate fluctuations. (See below "Risks Related to Our Israeli Operations – Changes in the U.S. Dollar – NIS Exchange Rate" and Item 5. Operating and Financial Review and Prospects – Impact of Inflation and Exchange Rates.)

We operate in a competitive industry. The markets in which we participate are highly competitive and characterized by technological change. If we are unable to improve existing systems and products and develop new systems and technologies in order to meet evolving customer demands, our business could be adversely affected. In addition, our competitors could introduce new products with innovative capabilities, which could adversely affect our business. We compete with many large and mid-tier defense contractors on the basis of system performance, cost, overall value, delivery and reputation. Many of these competitors are larger and have greater resources than us, and therefore may be better positioned to take advantage of economies of scale and develop new technologies. Some of these competitors are also our suppliers in some programs.

Due to significant consolidation in our industry, we are more likely to compete with certain potential customers. As the number of companies in the defense industry has decreased in recent years, the market share of some prime contractors has increased. Some of these companies are vertically integrated with in-house capabilities similar to ours in certain areas. Thus, at times we could be seeking business from certain of these prime contractors, while at other times we could be in competition with some of them. Failure to maintain good business relations with these major contractors could negatively impact our future business.

We face risks of changes in costs under fixed-price contracts. Most of our contracts are fixed-price contracts, as opposed to cost-plus or cost-share type contracts. Generally, a fixed-price contract price is not adjusted as long as the work performed falls within the original contract scope. Therefore, under these contracts, we generally assume the risk that increased or unexpected costs may reduce profits or generate a loss. The risk can be particularly significant under a fixed-price contract involving research and development for new technology, where estimated gross profit or loss from long-term projects may change and such changes in estimated gross profit/loss are recorded on a cumulative catch-up basis. (See Item 5. Operating and Financial Review and Prospects – General – Critical Accounting Policies and Estimates – Revenue Recognition.) To the extent we underestimate the costs to be incurred in any fixed-price contract, we could experience a loss on the contract, which would have a negative effect on our results of operations, financial position and cash flow.

We face fluctuations in revenues and profit margins. The level of our revenues may fluctuate over different periods due to changes in pricing or sales volume or our mix of projects during any given period. Moreover, since certain of our project revenues are recognized in connection with achievement of specific performance milestones, we may experience significant fluctuations in year-to-year and quarter-to-quarter financial results. Similarly, our profit margins may vary significantly from project to project as a result of changes in estimated project gross profits that are recorded in results of operations on a cumulative catch-up basis pursuant to the percentage-of-completion accounting method. (See Item 5. Operating and Financial Review and Prospects – General – Critical Accounting Policies and Estimates – Revenue Recognition.) As a result, comparisons of our financial results for prior periods may not provide a reliable indicator of our future results. Moreover, our share price may be subject to significant fluctuation in response to period-to-period variations in our financial results.

We may experience production delays or liability if suppliers fail to make compliant or timely deliveries. The manufacturing process for some of our products largely consists of the assembly, integration and testing of purchased components. Some components are available from a small number of suppliers, and in a few cases we work with suppliers that are effectively our sole source. If a supplier stops delivery of such components, finding another source could result in added cost and manufacturing delays. Moreover, if our subcontractors fail to meet their design, delivery schedule or other obligations we could be held liable by our customers, and we may be unable to obtain full or partial recovery from our subcontractors for those liabilities. The foregoing risks could have a material adverse effect on our operating results. In addition, the current global economic situation could impair the ability of our suppliers to meet their obligations to us.

We may be affected by failures of our prime contractors. We often act as a subcontractor, and a failure of our prime contractor to meet its obligations may affect our ability to receive payments under our subcontract.

Undetected problems in our products could impair our financial results and give rise to potential product liability claims. If there are defects in the design, production or testing of our or our subcontractors' products and systems, including our products sold for public safety purposes in the homeland security area, we could face substantial repair, replacement or service costs and potential liability and damage to our reputation. Our efforts to implement appropriate design, testing and manufacturing processes for our products or systems may not be sufficient to prevent such occurrences, which could have a material adverse effect on our business, results of operations and financial condition.

Our future success depends on our ability to develop new offerings and technologies for our current and future markets. To achieve our business strategies and continue to grow our revenues and operating profits, we must successfully develop new, or adapt or modify our existing, offerings and technologies for our current core defense markets and our future markets, including adjacent and emerging markets. Accordingly, our future performance depends on a number of factors, including our ability to:

- identify emerging technological trends in our current and future markets;
- identify additional uses for our existing technology to address customer needs in our current or future markets;
- develop and maintain competitive products and services for our current and future markets;
- enhance our offerings by adding innovative features that differentiate our offerings from those of our competitors;
- develop, manufacture and bring solutions to the market quickly at cost-effective prices;
- develop working prototypes as a condition to receiving contract awards; or
- effectively structure our business, through the use of joint ventures, teaming agreements and other forms of alliances, to reflect the competitive environment.

To remain competitive in the future, we believe we will need to invest significant financial resources to develop new, and adapt or modify our existing, offerings and technologies, including through internal research and development, acquisitions and joint ventures or other teaming arrangements. In addition, our customers more frequently require demonstration of working prototypes prior to awarding contracts for new programs. Expenditures for new, adapted or modified offerings and technologies and for production of prototypes could divert our attention and resources from other projects and may not ultimately lead to the timely development of new offerings and technologies or new contracts. Due to the design complexity of our products, we may experience delays in completing the development and introduction of new products. Any delays could result in increased costs and development, deflect resources from

other projects or increase the risk that our competitors may develop competing technologies, which gain market acceptance in advance of our products. If we fail in our new product development efforts, or our products or services fail to achieve market acceptance more rapidly than our competitors, our ability to procure new contracts could be negatively impacted, which would negatively impact our results of operations and financial condition.

5

Our business depends on proprietary technology that may be infringed. Many of our systems and products depend on our proprietary technology for their success. Like other technology oriented companies, we rely on a combination of patents, trade secrets, copyrights and trademarks, together with non-disclosure agreements, contractual confidentiality clauses, including those in employment agreements, and technical measures to establish and protect proprietary rights in our products. Our ability to successfully protect our technology may be limited because:

- some foreign countries may not protect proprietary rights as comprehensively as the laws of the United States and Israel;
- detecting infringements and enforcing proprietary rights may be time consuming and costly, diverting management's attention and company resources;
 - measures such as non-disclosure agreements afford only limited protection;
- unauthorized parties may copy aspects of our products or technologies to develop similar products or technologies or obtain and use information that we regard as proprietary;
 - our patents may expire, thus providing competitors access to the applicable technology;
- competitors may independently develop products that are substantially equivalent or superior to our products or circumvent our intellectual property rights; and
 - competitors may register patents in technologies relevant to our business areas.

In addition, others may allege infringement claims against us. The cost of defending infringement claims could be significant, regardless of whether the claims are valid. To the extent we are not successful in defending such claims, we may be prevented from the use or sale of certain of our products, subject to liabilities for damages and required to obtain licenses, which may not be available on reasonable terms, any of which may have a material adverse impact on our business, results of operation or financial condition.

We sometimes have risks relating to financing for our programs. A number of our major projects require us to arrange, or to provide, guarantees in connection with the customer's financing of the project. These include commitments by us as well as guarantees provided by financial institutions relating to advance payments received from customers. Customers typically have the right to drawdown against advance payment guarantees if we were to default under the applicable contract. In addition, some customers require that the payment period under the contract be extended for a number of years, sometimes beyond the period of contract performance. We may face difficulties in issuing guarantees or providing financing to our customers. (See Item 4. Information on the Company – Financing Terms.)

We are subject to buy-back obligations. A number of our international programs require us to meet "buy-back" obligations. (See Item 5. Operating and Financial Review and Prospects – Off Balance Sheet Transactions.) Should we be unable to meet such obligations we may be subject to contractual penalties, and our chances of receiving further business from the applicable customers could be reduced or, in certain cases, eliminated.

We sometimes participate in risk-sharing contracts. We sometimes participate in "risk-sharing" type contracts, in which our non-recurring costs are only recoverable if there is a sufficient level of sales for the applicable product, which level of sales typically is not guaranteed. If sales do not occur at the level anticipated, we may not be able to recover our non-recurring costs under the contract.

We would be adversely affected if we are unable to retain key employees. Our success depends in part on key management, scientific and technical personnel and our continuing ability to attract and retain highly qualified personnel. There is competition for the services of such personnel. The loss of the services of key personnel, and the failure to attract highly qualified personnel in the future, may have a negative impact on our business. Moreover, our competitors may hire and gain access to the expertise of our former employees.

We may face labor relations disputes or not be able to amend collective bargaining agreements in a timely manner. A number of our subsidiaries in Israel and certain other countries are parties to collective bargaining agreements that cover a substantial number of our employees. These agreements contain a range of conditions that vary depending on the applicable company and are for various periods of time. Disputes with trade unions or other labor relations difficulties as well as failure to timely amend or extend collective bargaining agreements could lead to worker disputes, slow-downs, strikes and other measures, which could negatively impact our results of operations.

We face acquisition and integration risks. We have made in the past and plan to continue to make acquisitions and investments in companies and technology ventures that we believe complement our business. (See Item 4. Information on the Company – Recent Acquisitions.) Acquisitions typically involve a certain amount of risks and uncertainties such as:

• the difficulty in integrating newly-acquired businesses and operations in an efficient and cost-effective manner and the risk that we encounter significant unanticipated costs or other problems associated with integration;

• failure to meet the challenges of achieving strategic objectives, cost savings and other benefits expected from acquisitions could lead to impairment of intangible assets related to the acquired companies;

• the risk that our markets do not evolve as anticipated and that the technologies acquired do not prove to be those needed to be successful in those markets;

• the risk that we assume significant liabilities that exceed the enforceability or other limitations of applicable indemnification provisions, if any, or the financial resources of any indemnifying parties, including indemnity for regulatory compliance issues that may result in our incurring successor liability;

- the potential loss of key employees of the acquired businesses;
- the risk of diverting the attention of senior management from our existing operations; and

• the risk that certain of our newly acquired operating subsidiaries in various countries could be subject to more restrictive regulations by the local authorities after our acquisition.

Our acquisitions are subject to governmental approvals. Most countries require local governmental approval of acquisitions of domestic defense businesses, which approval may be denied, or unfavorable conditions imposed, if the local government determines the acquisition is not in its national interest. We may also be unable to obtain antitrust approvals for certain acquisitions as our operations expand. Failure to obtain such governmental approvals could negatively impact our future business and prospects.

Our due diligence in acquisitions may not adequately cover all risks. There may be liabilities or risks that we fail to discover in performing due diligence investigations relating to businesses we have acquired or may acquire in the future. Examples of these liabilities include employee benefit contribution obligations, estimated costs to complete contracts, environmental liabilities, regulatory compliance liabilities or liabilities for infringement of third party intellectual property rights for which we, as a successor owner, may be responsible. Such risks may include changes in estimated costs to complete programs and estimated future revenues. In addition, there may be additional costs relating to acquisitions including, but not limited to, possible purchase price adjustments provided in the applicable acquisition agreement or impairment write downs, if the value of the acquired company were to decrease after the acquisition, or after follow-on investments in that company. Such liabilities could have a material adverse effect on our business, financial condition, results of operations or prospects. In addition, there may be situations in which our management determines, based on market conditions or other applicable considerations, to pursue an acquisition with limited due diligence or without performing any due diligence at all.

Our share price may be volatile and may decline. Numerous factors, some of which are beyond our control and unrelated to our operating performance or prospects, may cause the market price of our ordinary shares to fluctuate significantly. Factors affecting market price include, but are not limited to: (i) variations in our operating results and whether we have achieved our key business targets; (ii) sales or purchases of large blocks of stock; (iii) changes in securities analysts' earnings estimates or recommendations; (iv) differences between reported results and those

expected by investors and securities analysts; and (v) changes in our business including announcements of new contracts by us or by our competitors. In the past, securities class action litigation has been instituted against companies following periods of volatility in the market price of their securities.

7

Other general factors and market conditions that could affect our stock price include changes in: (i) the market's perception of our business; (ii) the businesses, earnings estimates or market perceptions of our competitors or customers; (iii) the outlook for the defense industry; (iv) the general market or economic conditions unrelated to our performance; (v) the legislative or regulatory environment; (vi) government defense spending or appropriations; (vii) military or defense activities worldwide; (viii) the level of national or international hostilities; and (ix) the general geo-political environment.

We have risks related to our issuance of Series A Notes under an Israeli debt offering. We face various risks relating to our issuance of Series A Notes (the Notes). (See Items 5. Operating and Financial Review and Prospects – Liquidity and Capital Resources – Israeli Debt Offering.) The risks we face include our ability to generate sufficient cash flow to make payments on the Notes. In addition, the "Aa1" (on a local scale) rating assigned with respect to the Notes may not be maintained.

We have risks related to the inherent limitations of internal control systems. Despite our internal control measures, we may still be subject to financial reporting errors or even fraud. A control system, no matter how well conceived and operated, can provide only reasonable, not absolute assurance that the objectives of the control system are met. In addition, the design of a control system must reflect the fact that there are resource constraints and the benefit of controls must be relative to their costs. These inherent limitations include the realities that judgments in decision-making can be faulty and that breakdowns can occur because of simple error or mistake. Further, controls can be circumvented by individual acts of some persons by collusion of two or more persons or by management override of the controls. The design of any system of controls also is based in part upon certain assumptions about the likelihood of future events, and any design may fail to achieve its stated goals, under some or all future conditions. Over time, a control may be inadequate because of changes in conditions or the degree of compliance with the policies or procedures may deteriorate. Because of inherent limitations in a cost effective control system, misstatements due to error or fraud may occur and not be detected. (See Item 15. Controls and Procedures.)

Risks Related to Our Israeli Operations

Conditions in Israel may affect our operations. Political, economic and military conditions in Israel directly affect our operations. Since the establishment of the State of Israel, a number of armed conflicts have taken place between Israel and its Arab neighbors. A state of hostility, varying in degree and intensity has led to security and economic problems for Israel. For a number of years there have been ongoing hostilities between Israel and the Palestinians, which have adversely affected the peace process and at times have negatively influenced Israel's economy as well as its relationship with several other countries. Hamas, an Islamist movement responsible for many attacks, including missile strikes, against Israelis has been in control of the Gaza Strip for the past several years. These developments have further strained relations between Israel and the Palestinians. Israel also faces threats from Hezbollah militants in Lebanon and other potential threats from neighboring countries, some of whom have recently undergone significant political changes. These political, economic and military conditions in Israel could have a material adverse effect on our business, financial condition, results of operations and future growth.

Political relations could limit our ability to sell or buy internationally. We could be adversely affected by the interruption or reduction of trade between Israel and its trading partners. Some countries, companies and organizations continue to participate in a boycott of Israeli firms and others doing business with Israel or with Israeli companies. Foreign government defense export policies towards Israel could also make it more difficult for us to obtain the export authorizations necessary for our activities. Also, over the past several years there have been calls in Europe and elsewhere to reduce trade with Israel. There can be no assurance that restrictive laws, policies or practices directed towards Israel or Israeli businesses will not have an adverse impact on our business.

Reduction in Israeli government spending or changes in priorities for defense products may adversely affect our earnings. The Israeli government may reduce its expenditures for defense items or change its defense priorities in the coming years. There is no assurance that our programs will not be affected in the future if there is a reduction in Israeli government defense spending for our programs or a change in priorities to products other than ours.

Israel's economy may become unstable. Over the years, Israel's economy has been subject to periods of inflation, low foreign exchange reserves, fluctuations in world commodity prices, military conflicts and civil unrest. For these and other reasons, the government of Israel has intervened in the economy employing fiscal and monetary policies, import duties, foreign currency restrictions, controls of wages, prices and foreign currency exchange rates and regulations regarding the lending limits of Israeli banks to companies considered to be in an affiliated group. The Israeli government has periodically changed its policies in these areas. Reoccurrence of previous destabilizing factors could make it more difficult for us to operate our business as we have in the past and could adversely affect our business.

Changes in the U.S. dollar – NIS exchange rate. The exchange rate between the NIS and the U.S. dollar has fluctuated in recent years. For example, at the end of 2008, 2009 and 2010, the NIS/U.S. dollar exchange rate was 3.802, 3.775 and 3.549 respectively. This represented a strengthening of the NIS against the U.S. dollar of approximately 1% in 2009 and approximately 6% in 2010. During 2010, the NIS/U.S. dollar exchange rate fluctuated significantly. For example, at the end of each of the fiscal quarters of 2010, the exchange rate of the NIS against the U.S. dollar was 3.713, 3.875, 3.665 and 3.549, respectively. During the first two months of 2011, the U.S. dollar strengthened against the NIS by approximately 2% and the NIS/U.S. dollar exchange rate as of February 28, 2011 was 3.622. While most of our sales and expenses are denominated in U.S. dollars, a significant portion of our expenses is paid in NIS, and most of our sales to customers in Israel are in NIS. Our primary expenses paid in NIS that are not linked to the dollar are employee expenses in Israel and lease payments on some of our Israeli facilities. As a result, if we do not hedge our position in NIS, a change in the value of the NIS compared to the dollar, which over the past year has undergone numerous fluctuations, could affect our research and development expenses, manufacturing labor costs and general and administrative expenses. (See Item 5. Operating and Financial Review and Prospects – Impact of Inflation and Exchange Rates – Inflation and Currency Exchange Rates.)

Israeli government programs and tax benefits may be terminated or reduced in the future. Elbit Systems and some of our Israeli subsidiaries participate in programs of the Israeli Office of the Chief Scientist (OCS) and the Israel Investment Center, for which we receive tax and other benefits as well as funding for the development of technologies and products. The benefits available under these programs depend on meeting specified conditions. (See Item 4. Information on the Company – Conditions in Israel – Chief Scientist (OCS) and Investment Center Funding.) If we fail to comply with these conditions, we may be required to pay additional taxes and penalties, make refunds and may be denied future benefits. From time to time, the government of Israel has discussed reducing or eliminating the benefits available under these programs, and therefore these benefits may not be available in the future at their current levels or at all.

Israeli law regulates acquisition of a controlling interest in Israeli defense industries. Israeli legislation regarding the domestic defense industry requires Israeli government approval of an acquisition of a 25% or more equity interest (or a smaller percentage that constitutes a “controlling interest”) in companies such as Elbit Systems. This could limit the ability of a potential purchaser to acquire a significant interest in our shares. (See Item 4. Information on the Company – Governmental Regulation – Approval of Israeli Defense Acquisitions.)

Israel has enhanced its export control regulations. In recent years the Israeli government adopted laws and regulations regarding enhanced defense export controls and the export of “dual use” items (items that are typically sold in the commercial market but that may also be used in the defense market). If government approvals required under these laws and regulations are not obtained, our ability to export our products from Israel could be negatively impacted, including revocation of authorizations previously granted, thus causing a reduction in our revenues. (See Item 4. Information on the Company – Governmental Regulation – Israeli Export Regulations.)

Many of our employees and some of our officers are obligated to perform military reserve duty in Israel. Generally, Israeli adult male citizens and permanent residents are obligated to perform annual military reserve duty up to a specified age. They also may be called to active duty at any time under emergency circumstances, which could have a

disruptive impact on our workforce.

It may be difficult to enforce a non-Israeli judgment against us, our officers and directors. We are incorporated in Israel. Most of our executive officers and directors are not residents of the United States, and a substantial portion of our assets and the assets of these persons are located outside the United States. Therefore, it may be difficult for an investor, or any other person or entity, to enforce against us or any of those persons in an Israeli court a U.S. court judgment based on the civil liability provisions of the U.S. federal securities laws. It may also be difficult to effect service of process on these persons in the United States. Additionally, it may be difficult for an investor, or any other person or entity, to enforce civil liabilities under U.S. federal securities laws in original actions filed in Israel. (See below – Item 4. Information on the Company – Conditions in Israel – Enforcement of Judgments.)

Item 4. Information on the Company.

Business Overview

Principal Activities

We are an international defense electronics company engaged in a wide range of programs throughout the world. The Company, operates in the areas of aerospace, land and naval systems, command, control, communications, computers, intelligence, surveillance and reconnaissance (C4ISR), unmanned aircraft systems, advanced electro-optics, electro-optic space systems, electronic warfare (EW) suites, airborne warning systems, electronic intelligence systems, data links, military communications systems and radios. We also focus on the upgrading of existing military platforms and developing new technologies for defense, homeland security and commercial aviation applications. In addition, we provide a range of support services.

Our major activities include:

- military aircraft and helicopter systems;
- helmet mounted systems;
- commercial aviation systems and aerostructures;
- unmanned aircraft systems;
- naval systems;
- land vehicle systems;
- command, control, communications, computer and intelligence (C4I) systems;
- electro-optic and countermeasures systems;
- homeland security systems;
- EW and signal intelligence systems; and
- various commercial activities.

Many of these major activities have a number of common and related elements. Therefore, we often jointly conduct marketing, research and development, manufacturing, performance of programs, sales and after sales support among these areas of activities.

Principal Market Environment

We operate primarily in the defense and homeland security arenas. The nature of military actions in recent years, including low intensity conflicts and ongoing terrorist activities, has caused a shift in the defense priorities for many of our major customers. As a result we believe there is a greater demand in the areas of C4I, as well as intelligence, surveillance and reconnaissance (ISR), including network centric information systems, intelligence gathering systems, border and perimeter security systems, unmanned aircraft systems (UAS), unmanned ground vehicles (UGVs),

unmanned surface vessels (USVs), remote controlled systems, space and satellite based defense capabilities and homeland security applications. There is also a growing demand for cost effective logistic support and training and simulation services. We believe our systems, products and capabilities position us to meet evolving customer requirements in several of these areas.

We tailor and adapt our technologies, integration skills, market knowledge and battle-proven systems to each customer's individual requirements in both existing and new platforms. By upgrading existing platforms with advanced electronic and electro-optic technologies, we provide customers with cost-effective solutions, and our customers are able to improve their technological and operational capabilities within limited defense budgets. We have a growing expertise in providing "systems of systems", which enables us to increasingly provide overall solutions to our customers' comprehensive defense and security needs.

The worldwide defense market has been characterized in recent years by significant consolidation and merger and acquisition activities. Part of our growth strategy includes our continued activity in mergers and acquisitions both in Israel and internationally. We operate as a multi-domestic organization in order to meet the needs of our customers around the world. The Company's structure enables us to benefit from the synergy of our overall capabilities while at the same time focus on local requirements.

Company History

We have many decades of operational experience. Our predecessor Elbit Ltd. was incorporated in Israel in 1966 as Elbit Computers Ltd. We were formed in 1996, as part of the Elbit Ltd. corporate demerger, under which Elbit Ltd.'s defense related assets and business were spun-off to us. From its founding in 1966 until the demerger, Elbit Ltd. was involved in a wide range of defense-related airborne, land, naval and C4I programs throughout the world. We continue these activities today as the largest non-government-owned defense company in Israel. Several of our subsidiaries in Israel and around the world have decades of experience in their respective markets. Our companies have collectively been awarded the Israel Defense Prize ten times, recognizing extraordinary contributions to defense technological innovations.

Elbit Systems Ltd. is a corporation domiciled and incorporated in Israel where we operate in accordance with the provisions of the Israeli Companies Law – 1999 (the Companies Law).

Trading Symbols and Address

Our shares are traded on the Nasdaq National Market (Nasdaq), as part of the Nasdaq Global Select Market, under the symbol "ESLT" and on the Tel-Aviv Stock Exchange (TASE).

Our main offices are in the Advanced Technology Center, Haifa 31053, Israel, and our main telephone number at that address is (972-4) 8315315. Our website home page is www.elbitsystems.com. We make our website content available for informational purposes only. It should not be relied upon for investment purposes, nor is it incorporated by reference in this annual report on Form 20-F.

Our principal offices in the United States are the headquarters of Elbit Systems of America, LLC at 4700 Marine Creek Parkway, Fort Worth, Texas 76179-6969, and the main telephone number at that address is 817-234-6799.

Revenues

The table below shows our consolidated revenues by major areas of operations for the years ended December 31, 2008, 2009 and 2010:

	2008	2009	2010
	(U.S. dollars in millions)		
Airborne systems:	\$ 635	\$ 693	\$ 791
Land systems:	699	450	363
C4ISR systems:	844	1,169	1,019
Electro-optic systems:	337	406	369
Other (mainly non-defense engineering and production services):	123	114	128

Edgar Filing: ELBIT SYSTEMS LTD - Form 20-F

Total: \$ 2,638 \$ 2,832 \$ 2,670

The following table provides our consolidated revenues by geographic region, expressed as a percentage of total revenues for the years ended December 31, 2008, 2009 and 2010:

	2008		2009		2010	
Israel	18	%	22	%	24	%
United States	34	%	29	%	32	%
Europe	25	%	26	%	20	%
Others	23	%	23	%	24	%

Subsidiary Organizational Structure

The following is a general description of our principal subsidiaries.

U.S. Subsidiaries

Elbit Systems of America

We conduct most of our U.S. business through Elbit Systems of America, LLC (Elbit Systems of America), a Delaware limited liability company, and its wholly-owned subsidiaries including: EFW Inc. (EFW), Kollsman, Inc. (Kollsman), International Enterprises, Inc. (IEI), Innovative Concepts, Inc. (ICI), M7 Aerospace LP (M7), Talla-Com, Tallahassee Communications Industries, Inc. (Talla-Com) and Real-Time Laboratories, LLC (RTL). These are in addition to Elbit Systems of America's 50% ownership in Vision Systems International, LLC and in UAS Dynamics, LLC as described below. We hold our 100% interest in Elbit Systems of America through an intermediate Delaware holding companies. Elbit Systems of America provides products and system solutions focusing on U.S. military, commercial aviation, homeland security and medical instrumentation customers. Elbit Systems of America is organized along a number of main business lines operating out of several primary operational facilities. The business lines include Airborne Solutions, Land and C4I Solutions, Sensor and Electro-Optics Solutions, Services and Support Solutions, Commercial Aviation – Kollsman and Medical Instruments – KMC Systems. Elbit Systems of America's main operation centers include its facilities in Fort Worth, Texas; San Antonio, Texas; Merrimack, New Hampshire; Tallahassee, Florida; Boca Raton, Florida; Talladega, Alabama and McLean, Virginia.

In December 2010, ESA acquired M7, a company based in San Antonio, Texas, engaged in the areas of aerostructures, manufacturing, logistic support services, maintenance, repair and overhaul and supply chain management. (See below “Recent Acquisitions – M7.”) M7 operates as part of Elbit Systems of America’s Services and Support Solutions business unit. In January 2011, we transferred ownership of RTL to Elbit Systems of America. RTL, based in Boca Raton, Florida, and with an additional manufacturing facility in Choctaw, Mississippi, had previously been a subsidiary of Kinetics. RTL is engaged in the areas of life support systems, auxiliary power units and hydraulic systems for ground vehicles and is operating as part of Elbit Systems of America’s Land and C4I Solutions business unit. During 2010, the Tallahassee, Florida operations began consolidation into Elbit Systems of America’s operations in McLean, Virginia and Fort Worth, Texas, which process is expected to be completed during 2011.

Elbit Systems of America acts as a contractor for U.S. Foreign Military Financing (FMF) and Foreign Military Sales (FMS) programs. (See below “Governmental Regulations – Foreign Military Financing.”) Each of Elbit Systems of America’s major operational facilities has engineering and manufacturing capabilities. Elbit Systems of America’s facilities in Alabama and Texas have significant maintenance and repair capabilities. (See below “Manufacturing” and “Customer Satisfaction and Quality Assurance.”)

Elbit Systems of America, Elbit Systems and intermediate Delaware holding company subsidiaries are parties to a Special Security Agreement (SSA) with the DoD. The SSA provides the framework for controls and procedures to protect classified information and export controlled data. The SSA allows the Elbit Systems of America companies to participate in classified U.S. government programs even though, due to their ownership by Elbit Systems, the Elbit Systems of America companies are considered under the control of a non-U.S. interest. Under the SSA, a Government Security Committee of Elbit Systems of America’s board of directors was permanently established to supervise and monitor compliance with Elbit Systems of America’s export control and national security requirements. The SSA also requires Elbit Systems of America’s board of directors to include outside directors who have no other affiliation with the Company. Elbit Systems of America’s board of directors also contains officers of Elbit Systems of America and up to two inside directors, who have other affiliations with the Company. The SSA requires outside directors and officers of the Elbit Systems of America companies who are directors, and certain other senior officers, to be U.S. resident citizens and eligible for DOD personal security clearances.

VSI. Vision Systems International LLC (VSI) is a California limited liability company based in San Jose, California. Elbit Systems of America and Rockwell Collins Inc. (Rockwell Collins) each own 50% of VSI. VSI acts on a world-wide basis on behalf of Rockwell Collins and Elbit Systems/ Elbit Systems of America in the area of helmet mounted display systems for fixed-wing military and paramilitary aircraft. VSI performs marketing, project management, contract administration and systems engineering. Elbit Systems, Elbit Systems of America and Rockwell Collins each have provided VSI with licenses to use their helmet mounted display technologies. In general, VSI subcontracts product development and production to its owners on an approximately equal basis. Each owner has equal representation in VSI’s management.

UAS Dynamics. UAS Dynamics, LLC (UAS Dynamics) is a Delaware limited liability company based in Charlotte, North Carolina, with operations in Fort Worth, Texas. Elbit Systems of America and GDATP Holdings, Inc. each own 50% of UAS Dynamics, which was established to market, design, manufacture and supply UAS solutions to customers in the U.S. market. Elbit Systems and General Dynamics Armament and Technical Products, Inc. (the corporate parent of GDATP Holdings, Inc.) each have licensed to UAS Dynamics certain technology in support of the unmanned aircraft vehicle business. Each owner has equal representation on the board of directors and in UAS Dynamics’ management.

Israeli Subsidiaries

Elop. Based in Rehovot, Israel, our wholly-owned subsidiary Elbit Systems Electro-Optics Elop Ltd. (Elop) (formerly Elop Electro-Optics Industries Ltd.) designs, engineers, manufactures and supports a wide range of electro-optic systems and products mainly for defense, space and homeland security applications. With more than 70 years of operational experience, Elop has a broad customer base, both in Israel and internationally.

ESLC. Elbit Systems Land and C4I Ltd. (ESLC) (formerly Elbit Systems Land and C4I – Tadiran Ltd.) is a wholly-owned Israeli subsidiary, with headquarters in Netanya, Israel. ESLC is engaged in the worldwide market for land-based systems and products for military vehicles, C4I systems and communications systems and equipment.

Elisra. Elisra Electronic Systems Ltd. (Elisra) is an Israeli company located in Bnei Brak and Holon, Israel, that was owned 70% by Elbit Systems as of December 31, 2010. In February 2011, an agreement was reached under which Elbit Systems will acquire the remaining 30% of Elisra's shares from Elta Systems Ltd., a subsidiary of Israel Aerospace Industries Ltd. (IAI). (See below "Recent Acquisitions – Elisra.") Elisra has two principal wholly-owned Israeli subsidiaries – Tadiran Electronic Systems Ltd. (Tadiran Systems) and Tadiran Spectralink Ltd. (Tadiran Spectralink), each located in Holon, Israel. Elisra and its subsidiaries provide a wide range of EW, signal intelligence (SIGINT), infrared (IR) passive warning systems and C4ISR technological solutions.

Cyclone. Elbit Systems – Cyclone Ltd. (Cyclone) is a wholly-owned Israeli subsidiary of Elbit Systems. Located near Karmiel, Israel, Cyclone designs and produces composite and metal aerostructure parts for civil and military aircraft and performs maintenance, integration and installation engineering for aircraft and helicopters. Cyclone also manufactures weapons pylons and external fuel tanks for fighter aircraft. Both directly and through our wholly-owned subsidiary Snunit Aviation Services Ltd., Cyclone supplies maintenance and operation services for fixed-wing aircraft and helicopter fleets.

ELSEC. Elbit Security Systems Ltd. (ELSEC) is a wholly-owned Israeli subsidiary of Elbit Systems. Located in Sderot, Israel, ELSEC operates mainly in the fields of homeland security, electro-optic surveillance systems, E-fences, border and coastal integrated security systems, aviation security systems, airport security systems, other transportation security systems and strategic perimeter sites security.

Azimuth. Azimuth Technologies Ltd. (Azimuth) is a wholly-owned Israeli subsidiary acquired in full in May 2010. (See below "Recent Acquisitions - Azimuth.") Located in Rehovot, Israel, Azimuth is engaged in the area of navigation and target acquisition, fire coordination, north finding systems as well as electro-optics for defense and government solutions.

Kinetics. Kinetics Ltd. (Kinetics), based in Airport City, Israel, is a wholly-owned Israeli subsidiary. Kinetics develops technologies, systems and products in the field of advanced life support and environmental controls, such as climate control systems and nuclear, biological and chemical protection systems for combat vehicles. Also, Kinetics develops and manufactures other products for land vehicles, such as hydraulic, fuel, braking and suspension systems, an auxiliary power unit for land vehicle power pack systems and hydraulic systems for aircraft.

Soltam. Soltam Systems Ltd. (Soltam) is a wholly-owned Israeli subsidiary, acquired in full in October 2010. (See below "Recent Acquisitions – Mikal Subsidiaries.") Soltam, located in Yokneam, Israel, is engaged in the area of artillery and mortar systems.

ITL Optronics. ITL Optronics Ltd. (ITL Optronics) is a wholly-owned Israeli subsidiary, in which an 88% interest was acquired in October 2010 and the remaining 12% interest in February 2011. See below "Recent Acquisitions – Mikal Subsidiaries.") ITL is engaged in the area of optronic systems. Through a U.S. subsidiary, ITL holds a 55%

interest in Fraser-Volpe LLC, a company based in Warminster, Pennsylvania, engaged, in the area of stabilized fire control and optical viewing systems.

SCD. Semi-Conductor Devices (SCD) is an Israeli registered partnership equally owned by Elbit Systems and Rafael Advanced Defense Systems Ltd. (Rafael). Located in Leshem, Israel, SCD develops and manufactures cooled and uncooled IR detectors for thermal imaging equipment and laser diodes used in defense and commercial applications.

Opgal. Opgal – Optronics Industries Ltd. (Opgal) is an Israeli company owned 50.1% by Elbit Systems and 49.9% by Rafael. Located in Karmiel, Israel, Opgal provides commercial applications of thermal imaging and electro-optic technologies, including an enhanced vision sensor designed to assist in landing aircraft under limited visibility and harsh weather conditions and thermal imaging cameras and systems for surveillance, industrial, medical and fire fighting applications. Opgal also produces IR subassemblies for forward-looking infrared (FLIR) sensors for defense applications.

Subsidiaries in Other Countries

Ferranti. Ferranti Technologies (Group) Limited (Ferranti), is a wholly-owned U.K. subsidiary. Located in Oldham, U.K, Ferranti's principal activities include engineering, manufacturing and logistic support to aerospace and defense industries in the U.K. and internationally.

U-TacS. UAV Tactical Systems Ltd. (U-TacS) is a U.K. subsidiary located in Leicester, U.K., held 51% by Elbit Systems (through a wholly-owned U.K. holding company – Elbit Systems UK Limited), with the remaining 49% owned by Thales UK Limited, a subsidiary of Thales S.A. U-TacS' main business is to perform a major part of the Watchkeeper Program and other related programs. See below "Current Business Operations – UAS –Programs."

European Subsidiary (Belgium). The European Subsidiary (Belgium) is a wholly-owned Belgium subsidiary located near Ghent, Belgium. It develops, manufactures and supports electro-optical products, mainly for the defense and space markets.

European Subsidiary (Austria). The European Subsidiary (Austria) is a wholly-owned Austrian subsidiary located near Vienna, Austria. It is engaged in programs relating to airborne, land and C4I systems.

Elbit Systeme. Elbit Systems S.A. (Elbit Systeme) is a wholly-owned Romanian subsidiary located in Bucharest, Romania. Elbit Systeme serves as the base for our various defense and commercial operations and holdings in Romania.

Telefunken RACOMS. Telefunken Radio Communications Systems GmbH (Telefunken RACOMS) is a wholly-owned German subsidiary located in Ulm, Germany. Telefunken RACOMS is active in both military and civilian communications projects in Germany and internationally.

AEL Sistemas S.A. (formerly Aeroeletronica Ltda.) (AEL) is a wholly-owned Brazilian subsidiary. AEL, located in Porto Alegre, Brazil, performs engineering, manufacturing and logistic support activities for defense and commercial applications.

Ares. Ares Aeroespacial e Defesa S.A. (Ares) is a wholly-owned Brazilian subsidiary acquired in December 2010. (See below "Recent Acquisitions – Ares/Periscopio.") Ares is located near Rio de Janeiro and is engaged in the area of defense electronic systems for the Brazilian military and other customers.

Elbit Systems of Australia. Elbit Systems of Australia Pty Ltd. (Elbit Systems of Australia) is a wholly-owned subsidiary established in May 2010. Located in Melbourne, Australia, it is engaged in defense electronic systems for the Australian armed forces and other customers.

Elbit Systems of Korea. Elbit Systems of Korea Ltd. is a wholly-owned Korean subsidiary. Based in Seoul, Korea, it performs defense related projects for end use by the Korean Government.

HALBIT. HALBIT Avionics Private Limited (HALBIT) is an Indian company owned 26% by Elbit Systems, with the largest shareholder being Hindustan Aerospace Limited. Located in Bangalore, India, HALBIT is engaged in avionics programs for the Indian defense market.

Others. We have several other small subsidiaries and investee companies in Israel and other countries that conduct marketing, manufacturing, logistic support and other activities principally in the subsidiary's local market.

Recent Acquisitions

During 2010 and the beginning of 2011, we continued to expand our capabilities through acquisitions.

Elisra. In February 2011, Elbit Systems reached an agreement with Elta Systems Ltd. (Elta) to acquire the 30% of Elisra's shares that are not held by Elbit Systems. The amount to be paid by Elbit Systems for the 30% of Elisra's shares is \$67.5 million, and the transaction will be completed following the parties' receipt of any necessary third party approvals. Following the acquisition, Elisra will be a wholly-owned subsidiary of Elbit Systems.

Pearls of Wisdom. In January 2011, Elbit Systems entered into an agreement to invest an amount of approximately \$18 million in the Israeli company Pearls of Wisdom Advanced Technologies Ltd. (Pearls of Wisdom). The investment will be made in several stages over several years, according to a schedule and plan agreed by Elbit Systems and the other investors. As of December 31, 2010, Elbit Systems held less than 50% of Pearls of Wisdom's shares, and Elbit Systems' holdings in Pearls of Wisdom will increase gradually to 90%. Pearls of Wisdom develops micro-systems for intelligence gathering, enabling terrain dominance. (See Item 18. Financial Statements – Note 2(K).)

Ares/Periscopio. In December 2010, Elbit Systems acquired the Brazilian companies Ares and Periscopio Equipamentos Optronicos S.A. (Periscopio). The acquisition was accomplished in a series of transactions totaling approximately \$35 million. Located near Rio de Janeiro, Ares and Periscopio are involved in the area of defense electronic systems and supply a range of products to the Brazilian military as well to additional markets in South America. (See Item 18. Financial Statements – Note 1(D)(3).)

M7. In December 2010, Elbit Systems of America acquired M7 for \$85 million. Located in San Antonio, Texas, M7 is an integrated service company, offering aviation services in the areas of aerostructures manufacturing, government logistics support services, maintenance, repair and overhaul, engineering services, aircraft parts and support, supply chain management and purchasing. M7 is engaged in avionics upgrades, special mission modifications, reset programs and airframe modification and repair for numerous aircraft platforms operated by both commercial and military customers. (See Item 18. Financial Statements – Note 1(D)(4).)

Mikal Subsidiaries. In October 2010, Elbit Systems acquired all the shares of the Israeli companies Soltam, Saymar Ltd. (Saymar) and ITL Optronics that were held by Mikal Ltd. (Mikal) and Mikal's subsidiaries. As a result of the acquisition, Elbit Systems obtained a 100% interest in Soltam and Saymar and an 87.85% interest in ITL Optronics. The balance of ITL Optronics' shares were traded on the TASE and held by the public. Simultaneously with the completion of the acquisition, Elbit Systems sold its holdings in Mikal (approximately 19%) to the other Mikal shareholders. The consideration paid by Elbit Systems for the acquisition of the three companies from Mikal was approximately \$87 million. The consideration paid to Elbit Systems for its 19% holding in of Mikal's shares was \$18 million. In addition, the acquisition agreement contains a provision for possible future payments to Mikal subject to the acquired subsidiaries achieving certain business goals. Approximately \$26 million of the purchase price payable by Elbit Systems for the acquisition was placed in escrow with respect to various matters pursuant to the purchase agreement. Soltam is engaged in the area of artillery and mortar systems, Saymar is engaged in the area of armored fighting vehicles and ITL Optronics is engaged in the area of optronics. In February 2011, in a cash tender offer in Israel, Elsec acquired the balance of ITL Optronics' shares that were held by the public for a total consideration of approximately \$5.9 million. (See Item 18. Financial Statements – Note 1(D)(2).)

Azimuth. In May 2010, Elbit System completed the acquisition of the balance of shares in Azimuth pursuant to the merger agreement signed by Azimuth and Elsec in January 2010. This was further to Elbit Systems' purchase in 2008 of 19% of Azimuth's shares. The purchase price for the balance of Azimuth's shares acquired in May 2010, following certain adjustments made in accordance with the merger agreement, was approximately \$41.5 million. Azimuth is an Israeli company engaged mainly in the areas of satellite navigation systems (GPS), electro-optics and data communications, for defense and para-government applications. Its systems are designed for target acquisition, fire coordination, navigation and orientation solutions, command and control as well as optical measurement systems for high accuracy. Azimuth's U.K. subsidiary is engaged in similar activities. (See Item 18. Financial Statements – Note 1(D)(1).)

Current Business Operations

We generally operate and manage the major activities described below in an interrelated manner and on a project-oriented basis. This means that contracts are frequently performed by more than one operating subsidiary or

division within the Company, on the basis of the multiple skills and available resources that may be needed or appropriate for the contract. Thus, the involvement of an operating subsidiary or division in the performance of a contract is not a function of management's review for purposes of allocation of resources within the Company.

Military Aircraft and Helicopter Systems

Overview

We supply a comprehensive portfolio of advanced airborne electronic and electro-optic systems and products to leading military aircraft manufacturers and end users. Our systems and products are designed to enhance operational capabilities and extend aircraft life cycles. Our military airborne systems are compatible with emerging net-centric concepts supporting enhanced situational awareness, faster decision making and optimal response. Our airborne C4ISR solutions provide pilots with data, communications and real-time situation pictures, as well as the ability to share mission-critical data with ground and naval platforms, thus enhancing joint, effective operations between air to air, air to ground, manned and unmanned platforms via common avionics and C4I solutions. Our multidisciplinary approach extends to designing training and simulation systems that accommodate evolving missions and combine air and ground systems in a single architecture.

Our airborne systems provide a range of solutions from a single sensor to an entire cockpit avionics suite. We integrate our systems on fixed and rotary-wing, eastern and western, new and mature aircraft. As a world leader in aircraft and helicopter upgrade programs, we integrate advanced weapon, communication, navigation, electro-optic and EW systems, providing advanced net-centric capabilities for fast, precise missions. Our upgrade programs support greater fleet availability, allowing fewer aircraft to perform more missions. We support life cycle extension of our customers' fleets. We supply logistic support services for airborne platforms, including repair and maintenance centers, training and spare parts. In 2010, we enhanced our capabilities in the logistic support and aircraft modification areas through Elbit Systems of America's acquisition of M7. (See above "Recent Acquisitions – M7.") Elbit Systems, Elbit Systems of America, Elop, Elisra, Cyclone, Ferranti, AEL and certain other of our subsidiaries are engaged in our military aircraft and helicopter systems activities.

Systems Portfolio

Our systems and products for military fixed-wing aircraft and helicopters include a range of advanced avionics systems, electro-optic and aerial reconnaissance systems, precision guidance systems, fighter aircraft structural components, data links, training systems and simulators. This is in addition to our helmet mounted systems and EW airborne systems described below.

Avionics Systems. Our avionics systems include integrated flight deck systems (glass cockpits), mission and aircraft management computers, weapon delivery and navigation systems, large display systems, airborne C4I systems, digital map systems, enhanced vision systems, stores management systems and digital recording devices.

Electro-Optic Systems. Our airborne electro-optic systems include direct infrared countermeasures (DIRCM) systems, head-up displays, laser range-finders and laser designators, FLIR systems, laser obstacle ranging & display systems such as SWORD, payloads such as the CoMPASS™ family, countermeasures systems and aerial reconnaissance systems such as the CONDOR® long-range oblique photography system and the CONDOR® TAC system for vertical photographs.

Precision Guidance Systems. We supply a range of precision guidance systems for airborne applications including the Whizzard family (LIZARD and GAL) of laser-based precision guidance kits, semi-active laser (SAL) seekers, the STAR (smart tactical advance rocket) and the GATR (guided advanced tactical rocket).

Fighter Aircraft and Helicopter Structural Components. We supply external fuel tanks, pylons, horizontal stabilizers, fin access doors, leading edge flaps, ventral fins and rudders for F-15 and F-16 aircraft. We also supply landing gear doors, leading edge extensions and 330 gallon fuel tanks for F-18 aircraft. In addition, we supply structural parts for

UH-60 and CH-53 helicopters.

Trainers and Simulators. Our products and training solutions are delivered to all military branches, including air force, army, navy and homeland security forces worldwide. Our products and training solutions include a variety of simulators, complete training centers for tactical, virtual, appended and embedded training, full mission trainers, partial task trainers and computer-based trainers. We also supply air defense simulators, naval embedded and tactical trainers and ACMI pods.

17

Cpnet™. We provide Cpnet™, an end-to-end situation awareness solution providing a shared view and common operational pictures of military and non-military applications scenarios requiring mobilization of air, naval and ground units. Cpnet™ provides mission plans, location information and live video.

Programs

Our programs for military fixed-wing aircraft and helicopters encompass full scale aircraft upgrades, system upgrades, system and product supply, training, simulators and logistic support.

The customers and end users for our military fixed-wing aircraft and helicopters programs include the Israeli Air Force (IAF), the U.S. Air Force (USAF), the U.S. Navy (USN), the U.S. Army, the U.S. Marine Corps (USMC), the U.S. Coast Guard, air forces and other branches of the armed forces of the North American Treaty Organization (NATO) member governments and/or European Union (EU) member governments as well as of other governments around the world. Our customers also include major fixed-wing aircraft and helicopter manufacturers such as Lockheed Martin Inc. (Lockheed Martin), the Boeing Company (Boeing), Raytheon Company (Raytheon), Embraer S.A. (Embraer), European Aerospace Defense and Space Company (EADS), EADS – CASA, Alenia Aermacchi S.p.A. (Aermacchi), Dassault Aviation S.A., Eurocopter S.A. (Eurocopter), BAE Systems Ltd., Grob Aircraft AG, Hindustan Aeronautics Limited (HAL), Bell Helicopters Textron Inc. (Bell Helicopters), Sikorsky Aircraft Company (Sikorsky) and Agusta S.p.A. (Agusta), among others.

Our upgrade programs for fixed-wing fighter, trainer and transport aircraft include those for aircraft such as the F-4, F-5, T-38, AL-X Super Tucano, AMX, AT-63 Pampa, MiG-21, SU-25, L-39, IAR 99, Grob 120-TP, C-95 and C-130.

Our helicopter upgrade programs include those for helicopters such as the Puma 330, CH-53, UH-60, AH-1, AS-365, Mi-8, Mi-17 and Mi-24.

We also supply on a stand-alone basis advanced avionics systems such as mission computers, displays, moving maps, digital video recorders, tactical data links and operational flight protocol software for fixed-wing aircraft such as the F-15 Eagle, F-16, F-18 Hornet/Super Hornet, T-38, C-130 Hercules and T-45. In addition, we supply advanced avionics systems such as mission computers, displays, moving maps, digital video recorders, tactical data links and operational flight protocol software for helicopters such as the UH-60 Black Hawk, AH-1 Cobra, AH-64 Apache, CH-47 Chinook, CH-48, CH-53 Stallion, OH-58 Kiowa, Mi-17, Mi-24 and KMH, as well as the V-22 Osprey tilt rotocraft.

For more than two decades we have supplied numerous systems, products and support services for Lockheed Martin's F-16 aircraft. This includes mission computers, display systems, stores management systems, commercial data entity electronic units, digital video recorders, data link hardware and software, head-up displays, helmet mounted systems, structural assemblies and simulators.

In the area of airborne electro-optic systems, we supply head-up displays for fixed-wing fighter and trainer aircraft such as the F-4, F-5, F-16, T-38, C-17, MiG-21, MiG-27, SU-30, A-4, AL-X, AMX, AT-63 Pampa, IAR-99, Jaguar KO-I, L-39, M-346 and Mirage. We also supply laser designators, laser range-finders and electro-optic pods for helicopters such as the Apache, Super Cobra, AH-Z, Sea King, Cheetah, Mi-17, Mi-24 and Tiger, as well as the USN Nite Hawk pod.

We supply airborne reconnaissance systems for F-16 aircraft of the IAF, the Republic of Korea Air Force and others. We supply a combined airborne imagery intelligence (IMINT) system to the Turkish Air Force, containing our CONDOR® 2 and CONDOR® TAC long-range oblique and vertical photography systems.

In the precision guidance systems area we supply our LIZARD systems to several air forces including the IAF. We supply SAL seekers for Boeing's JDAM munitions, for Northrop Grumman Corporation's (NGC) Viper Strike munitions and for other U.S. missile manufacturers. In cooperation with Alliant Techsystems Inc. (ATK), we have developed the GATR, which is currently under evaluation by several customers.

Our airborne, training and simulators programs include aircraft flight training solutions and operation of training aircraft for both fixed-wing trainers and helicopters under private financing initiative (PFI) and "power by the hour" (PBH) arrangements for the IAF Flight School and maintenance for Israel Police helicopters. In 2010, our PFI contract with the IMOD for the operation of the IAF's Snunit Trainer Aircraft program was extended for an additional 10-year period. Also in 2010, we received a contract from an Asian air force to supply EHUD Air Combat Maneuvering Instrumentation (ACMI) systems for real-time autonomous air-to-air and air-to-ground combat training and debriefing.

In coordination with Lockheed Martin, we supply the avionics simulation system, cockpit and visual system for the IAF's F-16I aircrew flight and system trainer. We were selected by the IMOD to supply a mission training center for IAF F-16 pilots. We are also supplying the IAF with a simulator for the B-200. We are supplying Boeing with the Virtual Mission Training system for the USN's T-45 Goshawk aircraft. We also supply simulators for fixed-wing aircraft such as the F-16A, F-16C/D, AL-X, F-4E, F-5, Mig-21, IAR 99 and Mirage 2000, as well as helicopters such as the Puma, Mi-8, Mi-24 and Sea King. We also supply Israel Defense Forces (IDF) ground forces with a tactical battle group trainer as well as tank appended trainers. In addition, we are supplying the IDF's Home Front Command with a crises management simulator.

Our logistic support services programs for fixed-wing aircraft and helicopters include repair and maintenance services and supply of spare parts for a range of air forces. Part of these services are performed as contractor logistic support (CLS) projects and performance based logistics (PBL). We operate and maintain the IAF's Efroni trainer aircraft. We also perform maintenance support activities for numerous products such as jammers, radar, 20 mm cannon and others. In February 2011, the IMOD announced that Elbit Systems' proposal was selected in response to the IMOD's solicitation to provide airborne fire fighting services to the Israeli government, including procurement of aircraft, pilots services, maintenance and on-call fire fighting support.

Helmet Mounted Systems

Overview

We design and supply a range of advanced helmet mounted systems (HMS), including helmet mounted displays (HMDs) for fixed-wing aircraft and rotary aircraft pilots. These include tracking and display systems, both for day and night flying. Our systems measure the pilot's line of sight, slave weapons and sensors to the target, identify target location and bring displays to the pilot's eye level. We supply our HMS as part of our upgrade programs as well as on a stand-alone basis.

We are engaged in a wide range of HMS activities. We are a leading supplier of HMDs for helicopters. Also, through our jointly-owned company VSI (see above "Principal Subsidiaries – VSI") we are a leader in HMS for fighter aircraft.

Systems Portfolio

Our HMS are designed for fixed-wing aircraft as well as helicopters.

Fixed-Wing HMS. Examples of our fixed-wing HMS currently in operational use include the Display and Sight Helmet (DASH) family, the Joint Helmet Mounted Cueing System (JHMCS), the Night Vision Cueing Display (NVCD) system and the HMS for the F-35 Joint Strike Fighter (JSF). These systems enable slaving of various aircraft systems to the pilot's line of sight, target location and identification and display of information. We have also developed TARGO™, a HMA (helmet mounted avionics) solution for fixed-wing trainer aircraft that minimizes the need for aircraft integration activities. In addition, we supply the FACT® (fast action cockpit mapping tool) for rapid electro-magnetic mapping of cockpits.

Helicopter HMS. For helicopters, our operational HMS include the Aviator Night Vision Imaging System Head-Up Display (ANVIS/HUD®) family, the Integrated Helmet and Display Sight System (IHADSS), Jedeye™ and the Panoramic Night Vision Goggle (PNVG) based on our QuadEye® system. We also supply low visibility landing (LVL) solutions. These systems facilitate safety for night flights, weapon slaving, increased operational capabilities and performance of "head-out" missions.

Programs

We are engaged in a range of programs for HMS for fighter aircraft and helicopters. Customers and end users for our HMS include the IAF, USAF, U.S. Army, USN, USMC, U.S. Coast Guard, air forces of EU and NATO member governments and other governments' air forces. Our customers also include aircraft and helicopter manufacturers such as Boeing, Lockheed Martin, Bell Helicopters, Sikorsky, Agusta and Aermacchi.

In the fighter aircraft area we supply various versions of our DASH systems for the IAF's F-15I and F-16(C, D and I) aircraft as well as for other air forces around the world.

We supply the JHMCS through VSI for Boeing's F-15 and F/A-18 aircraft and for Lockheed Martin's F-16 aircraft. More than 3,500 JHMCS production systems have been delivered and are in operational use by the USAF, the USN, the U.S. Air National Guard (ANG) and the air forces of more than 25 other countries.

Through VSI we are developing and supplying the HMS to Lockheed Martin for the U.S. F-35 Joint Strike Fighter (JSF) Program. The JSF HMD system is expected to contain the most advanced HMS ever designed and will be used as the aircraft's primary flight and weapon delivery system. We are currently performing the low rate initial production (LRIP 1, 2 and 3) phases of the program.

VSI is also supplying the NVCD to the USN. The NVCD includes the PNVG, based on our QuadEye® system.

In the trainer aircraft area we are supplying TARGO™ for the M-346 Advanced Trainer.

In the helicopter area we have supplied more than 5,000 operational ANVIS/HUD® systems for the U.S. Army, other U.S. Armed Forces programs, the IAF and customers in Korea, Australia, Canada and the U.K., among others. We also supply IHADSS to the U.S. Army for Apache helicopters, and in March 2011 Elbit Systems of America was awarded a follow-on spares order from the U.S. Army for IHADSS. We also supply IHADSS to other users of Apache helicopters as well as Agusta 129 helicopters. Elbit Systems of America supplies a Helmet Display and Tracking System for the weapon system of the USMC AH-1W helicopters. In 2010, our Jedeye™ advanced high resolution wide field-of-view HMD conducted its first flight test and was evaluated in the Boeing Mesa Apache Block III simulator.

Commercial Aviation Systems and Aerostructures

Overview

Leveraging our core competencies in airborne defense systems, as well as our legacy strengths in commercial aviation, we provide a range of systems and products for the commercial and business aviation market. These activities mainly include vision-based cockpit concept systems, other avionics systems, electrical systems, pressurization systems and aero structure products.

Our commercial aviation experience extends over 80 years, with Elbit Systems of America's Commercial Aviation Solutions – Kollsman business unit's continuation of Paul Kollsman's legacy altimeter products. Our activities in commercial avionics has evolved in recent years and covers a wide range of cockpit displays, head-up displays and other avionics systems including complete glass-cockpit integrated avionics suites. We are a world leader in the area of advanced enhanced vision systems (EVS), achieving the world's first U.S. Federal Aviation Administration (FAA)-certified EVS. In January 2011, we sold our 20% interest in Sandel Avionics Inc., which is engaged in activities in the general aviation market.

Our commercial avionics systems are employed on fixed-wing aircraft such as the Gulfstream 150, 200, 300, 350, 400, 450, 500 and 550, the MD-10 and MD-11, the Airbus A300 and A310, the Cessna CJ 1, 2, 3 and 4 Bravo, XLS, Citation Mustang, ENCORE, Hawker Beechcraft 400XP and 800XP and King Air series, as well as on helicopters such as the EC-225 and EC-725. Our aerostructure products are installed on a number of commercial aircraft. Elbit Systems, Elbit Systems of America, Elop, Opgal, Kinetics and other of our subsidiaries are involved in our commercial avionics systems and products activities, and Cyclone produces our aerostructure products.

Systems Portfolio

Vision-based Cockpit Systems. Our commercial aviation product line includes the Vision Based Cockpit™ concept, incorporating our Enhanced Vision System (EVS II) and our General Aviation – Vision System (GAViSTM). EVS II improves an aircraft’s capability to execute precision approaches and safely land in bad weather and reduced visibility conditions. GAViS™ is an IR-based vision system that mounts like an antenna for general aviation aircraft to provide greater situation awareness at night and in other low visibility conditions. We also have developed Clear Vision multi-spectral visions systems that provide a spectral solution that enhances visibility in adverse weather conditions. Our commercial aviation products provide critical information to pilots including a family of advanced head-up displays such as the Advanced Technology Head-Up Display (AT-HUD) and the Micro-ViS head-up display system.

Avionics, Electronic and Legacy Systems. We supply cabin pressurization control systems, air data test equipment, air data processor/sensor systems and flight instruments for the general aviation market. Our legacy products for commercial aircraft include altimeters, pressure meters, cockpit indicators and avionics test equipment.

Commercial Helicopter Systems. We produce full avionic suites, including displays, moving maps, electronic flight instrumentation systems and flight management systems for commercial helicopters.

Aerostructure Products. Our aerostructure parts include pressurized and non-pressurized doors, composite beams and composite landing gear doors, thrust reverse blocker doors, fan cowl doors and winglets for commercial aircraft such as the Boeing 737, Boeing 787, SSJ-100 and HBC King Air 350, as well as aerostructures for UAS.

Hydraulic Components. Through Kinetics we supply hydraulic and pneumatic components for aerial refueling, jet engines and missiles and rockets.

Programs

We supply our commercial aviation systems and products to a number of fixed-wing aircraft and helicopter manufacturers and aviation companies. Customers for our commercial and business aviation systems and products include General Dynamics – Gulfstream Aerospace Corporation (Gulfstream), Boeing, Airbus S.A.S. (Airbus), Hawker Beechcraft Corporation, Eurocopter, FedEx Express Inc. (FedEx Express), Embraer, Honeywell, Sikorsky, Piaggio America Inc. and Jetcraft Aviation Ltd. (Jetcraft). Customers for our aero structure products for commercial aircraft include Spirit Aerosystems Inc. (Spirit Aero Systems), Airbus, Boeing, IAI and others.

Our programs in the area of commercial avionics and enhanced vision systems include a number of FAA certifications for installation of our EVS on a range of Gulfstream business jets. EVS II is fully certified on FedEx Express MD11 aircraft – the first certification world-wide of an enhanced flight vision system on an FAA Part-121 air transport platform. EVS II also has received European Aviation Safety Agency (EASA) approval, is installed on Jetcraft aircraft and has been selected by Gulfstream for the G250 and G650 business jets and by Embraer for the Lineage 1000 jet. Our GAViS™ system has been FAA certified for Avanti, Grob and Citation aircraft and was selected by Sikorsky helicopters for certification for the United Technologies Flight Department. We are also supplying a head-up display to Honeywell for the FedEx Express fleet and to Jetcraft for the retrofit business jet market.

We supply our autoschedule cabin pressurization control system (KAPS™ II) to Diamant Aircraft's D-Jet program and to Cessna for its CJ4 and Mustang aircraft programs. We also supply civil avionics systems, including digital maps, displays and other avionics products for commercial helicopters such as the EC-225.

Elbit Systems of America maintains an FAA certified repair facility for commercial avionics repairs, and Cyclone performs maintenance for commercial helicopters.

We manufacture aerostructure parts based on metal and composite technologies for several types of commercial aircraft, including the Airbus 340 and the Boeing 737, 747, 767 and "Dreamliner" 787 passenger jets. This includes a multi-year contract with Spirit Aero Systems to supply entrance and cargo doors for commercial aircraft.

UAS (Unmanned Aircraft Systems)

Overview

We design and supply integrated UAS for a range of applications. We design and manufacture a variety of UAS platforms, including the Hermes® and Skylark® families of UAS. We also design and supply command and control

ground station elements that can be adapted for various types of UAS. We supply UAS training systems with capabilities to simulate payload performance, malfunctions and ground control station operation. We design and supply engines, data links, stabilized electro-optic payloads and electronic intelligence (ELINT) and communications intelligence (COMINT) payloads for UAS. Our UAS technology has also been applied to our unmanned ground vehicle and unmanned surface vessel activities described below in this annual report.

Our UAS activities are carried out by Elbit Systems, U-TacS, Elbit Systems of America, UAS Dynamics, UAV Engines Ltd., AEL, Tadiran Spectralink, Elop, Cyclone and certain other of our subsidiaries.

Systems Portfolio

Our UAS encompass comprehensive systems, including the air frames, air vehicle payloads, data link, ground control system, ground support equipment and training systems.

Hermes® UAS Family. As part of our intelligence, surveillance, target acquisition and reconnaissance (ISTAR) solutions, we developed our Hermes® family of tactical UAS. Hermes® 450 (in various configurations) is a leader in the field of tactical long endurance UAS supporting ISTAR missions. It is the basis for the WK 450 UAS being supplied under the Watchkeeper Program (see below “Programs”). Hermes® 450 has accumulated more than 170,000 flight hours. Hermes® 900 is a tactical medium altitude long endurance (MALE) UAS designed to extend the Hermes® 450 capabilities with full compatibility in mission and support infrastructures. Hermes® 900 and Hermes® 450 use the same ground segment and have a high level of commonality in their systems. Hermes® 90 is a tactical short-range UAS designed for long-endurance point-launch ISR missions.

Skylark® UAS Family. Our Skylark® family of mini-UAS includes electrically propelled and covert short-range UAS with ISR capabilities for company-brigade-level tactical echelons. The family is based on Skylark® I, a man-packed UAS for close-range surveillance and observation, Skylark® I LE, which provides longer endurance of the Skylark® I capabilities and Skylark® II, which is a close-range tactical UAS providing expanded ISR capabilities.

Ground Stations. Our UAS ground stations include mission command and control, payload operation and exploitation capabilities.

Engines. Our UAS engines include a family of Wankel rotary technology based engines providing UAS with the capability to carry multiple payloads with extended endurance.

Training Systems. Our UAS training systems include full air vehicle and payload high end operators and mission commanders training.

Data Links and Payloads. We develop and manufacture data links and payloads for our UAS as well as tactical data links and networking solutions for UAS.

Programs

We perform a broad range of development, supply, lease, support services and training activities relating to UAS. The principal customers for our UAS include the IDF, the U.K. Armed Forces through Thales U.K. and other customers (mainly governmental organizations) around the world.

Our largest UAS program is the U.K. Ministry of Defence’s (UK MOD) Watchkeeper program. In 2005, U-TacS was awarded a contract by Thales U.K. Ltd., the prime contractor to the UK MOD for the program. U-TacS’ Watchkeeper backlog as of December 31, 2010 was approximately \$277 million, to be performed mainly through 2013. The Watchkeeper program is providing the U.K. Armed Forces with ISTAR capability and is a key component of the U.K.’s Network Enabled Capability. U-TacS is supplying the Watchkeeper Subsystem comprised of the dual payload WK 450 UAS (based on the Hermes® 450) carrying our DCoMPASS™ stabilized payload incorporating day/night sensors and laser target designator, a SAR payload supplied by Thales, ground control station, ground support equipment and a data link connecting to a computerized network. The system is capable of rapid deployment and operations anywhere in the world. In 2010, U-TacS was awarded a contract amendment by Thales U.K. to provide

contractor logistics support services for the Watchkeeper program over a three-year period.

U-TacS is also under contract for the UK MOD Lydian Program to supply service-based support to an ISR capability in an overseas theatre, including Hermes® 450 UAS, training and contractor logistics support. In 2010, Thales U.K. awarded U-TacS an urgent operating capability (UOR) follow-on contract to provide the U.K. Armed Forces ISTAR support capability.

Our first large UAS program was providing Hermes® 450 to the IDF, which has been fully operational for more than a decade, providing the backbone of the IDF's tactical UAS. Under this program the Hermes® 450 has accumulated over 140,000 flight hours. Throughout the program, the Hermes® 450 has continued to develop through additional applications and enhancements. In 2010, we were awarded a contract by the IMOD to provide Hermes® 900 systems as well as additional Hermes® 450 systems.

In January 2011, AEL was awarded a contract to supply Hermes® 450 systems to the Brazilian Air Force.

The Skylark® I LE UAS was selected by the IMOD for IDF Ground Forces Battalions. This followed orders in previous years for Skylark® I from France's Special Forces and the Australian Army as well as orders from other customers for Hermes® 450 and Skylark® I systems. We also supplied the Skylark® II to the Korean Ministry of Defense. Under a partnership jointly owned with IAI, we supplied UAS for the Turkish TUAV program.

Naval Systems

Overview. Our naval systems include naval combat and C4I management systems, shipboard combat system integration, naval electro-optic observation systems, naval tactical trainers, submarine and surface electronic support measurement systems, shipboard SIGINT including COMINT and ELINT systems, shipboard decoy countermeasure launching systems and unmanned surface vessels. Elbit Systems, Elop, Elisra, ESLC, Elbit Systems of America and certain other of our subsidiaries engage in naval systems related activities.

Systems Portfolio

Combat Management Systems. Our naval systems and products include C4I based combat management systems for surface ships and submarines, including command and control, data links, sensors and effectors control systems that integrate tactical information and facilitate operation of weapon systems.

Tactical Trainers. We supply computerized naval simulators for tactical training of naval officers at shore-based locations. Our naval training and simulator systems include naval tactics and commander trainers, naval operational trainers, EW trainers and anti-submarine trainers.

Electro-Optic Payloads. We provide stabilized electro-optical payloads for naval as well as airborne applications. Our payloads provide a wide portfolio of solutions from the small micro-compass 8" payload up to the large high end AMPS system that is used for very long-range stand-off observation.

EW Systems and Countermeasures. Our EW systems for surface ships and submarines provide electronic support measurements for threat identification and electro-magnetic analysis. We also supply a range of shipboard SIGINT, COMINT and ELINT systems for sea-based electronic intelligence applications for surface vessels and submarines. Our shipboard decoy countermeasure launching systems deploy chaff and flare against missile threats.

Unmanned Surface Vessels. We are developing unmanned surface vessels such as the Silver Marlin and Stingray for various maritime applications that adopt the capabilities of our UAS to sea-based applications.

Programs

We supply our naval systems and products for both surface ships and submarines to naval and maritime authorities around the world. Customers and end users for our naval systems include the Israeli Navy, navies and coast guard authorities of numerous other countries and major ship manufacturers.

Our naval systems programs include the supply of the C4I system for the Israeli Navy's SAAR 5 corvette class missile boat as well as the anti-missile decoy countermeasure launching systems for the SAAR 5 program. Our naval training simulators are used by the Israeli Navy and several other navies world-wide. We also develop naval ELINT and COMINT systems. We supply ELINT systems for the Israeli Navy's Dolphin class submarines and ELINT and COMINT systems for submarines and surface vessels of several other navies.

Our electro-optic shipboard payloads are in use by several navy and maritime forces for both observation and fire control applications.

Our EW suites equip all Israeli Navy ships and are designed to perform threat detection and intelligence applications. Our SIGINT naval systems are in operational use by several navies worldwide for anti-missile countermeasures as well as active anti-missile protection. We supply several navies various communications systems and data links for sea-based applications, as well as the EW systems for the Canadian Navy's Halifax Frigate Modernization Program.

Land Vehicle Systems

Overview

We upgrade and modernize tanks, other combat vehicles and artillery platforms both as a prime contractor and as a systems supplier to leading platform manufacturers. Our land vehicle and platform solutions cover the entire combat vehicle spectrum, from complete modernization, to system supply to maintenance depots and life cycle support services. We provide a full suite of net-centric solutions enhancing combat effectiveness, lethality and survivability. Our systems are operational on a full range of tracked and wheeled combat vehicles including main battle tanks, medium and light tanks, light armored vehicles, armored personnel carriers, wheeled vehicles and artillery platforms. We also develop and supply unmanned ground vehicles and robotic devices for a variety of land based missions. In addition, we supply training systems for tanks and fighting vehicles.

Our land vehicle systems include fire control systems, electric gun and turret drive and stabilization systems, unmanned turrets, overhead remote control weapon stations, battle management systems, FLIRs, gunner's and commander's sights, laser range-finders, laser warning systems, threat detection systems, surveillance, reconnaissance and targeting systems, See-Through-Armor (STA), driver thermal vision systems, auxiliary power units, life support systems, individual crew and equipment cooling systems, hydraulic systems, unmanned ground vehicles, robotics, sensors and displays for tanks, personnel carriers and other combat vehicles.

Following our acquisition in 2010 of a 100% interest in Soltam (see above "Recent Acquisitions – Mikal Subsidiaries"), we offer a comprehensive range of fully integrated, modular artillery and mortar solutions, incorporating C4I and fire control systems and platform upgrades, as well as a complete range of artillery and mortar ammunition.

Utilizing our experience from advanced avionics systems, electro-optic thermal imaging and C4I systems, we adapt and develop "tankionics" for land vehicles that shorten the "sensor to shooter" loop. Land vehicles containing our systems and products include the Merkava, M1 Abrams, Centurion, M-60, T-55, T-72, Bradley A-3, Leopard, Fennek, PzH 2000, CV-90, MLRS, HIMARS, MTVR, MRAP, AMX-30, SK-105, MK-109, ULAN, Pandur, LAV, Patria AMV, Iveco LMV, Iveco APC and Piranha III. During 2010, we enhanced our position in the land vehicle area by acquiring Soltam, Saymar and Ares, including in Soltam's areas of artillery systems, autonomous mortar systems and mortar ammunition.. (See above "Recent Acquisitions".) Our land vehicle systems activities are performed mainly by ESLC, Elbit Systems, Elbit Systems of America, Elop, Kinetics, Soltam, Saymar, AEL, Ares, European Subsidiary (Belgium), Tadiran Systems, ELSEC and certain other of our subsidiaries.

Systems Portfolio

Our systems and products for land vehicles encompass a range of products and applications including tankionics capabilities.

Fire Control Systems. We supply fire control systems using day and night vision systems and displays for target identification, acquisition and engagement, incorporating thermal imaging, laser range-finders, day TV, digital

ballistic computers and sensors.

Electric Gun and Turret Drive Systems. We supply electric gun and turret drive and stabilization systems for controlling electrically driven turrets and guns using advanced brushless technology and digital/software based servo systems.

Laser Warning and Threat Detection Systems. We provide a wide range of combat proven computer and display hardware products and situation awareness peripheral vision systems. These include cutting edge laser warning systems for identifying and pinpointing the angular direction of laser sources generated by laser range-finders and laser guided and laser beamrider missiles.

Unmanned Turrets and Remote Controlled Weapon Stations. We supply advanced unmanned turrets and overhead remote controlled weapon stations. Our unmanned turrets and remote controlled weapon systems, such as the UT30 configurable unmanned turret and the Overhead Remote Controlled Weapon Station (ORCWS) family of products, enhance ground vehicle capabilities for urban warfare scenarios and convert armored personnel carriers to armored fighting vehicles with no penetration of the vehicle's deck.

Unmanned Systems. We supply various unmanned ground vehicle (UGVs) platforms. These include our small-size UGV – the Viper™ (Versatile Intelligent Portable Elbit Robot), a man-packed robot designated to perform various urban combat support missions. Through G-NIUS, our jointly-owned company with IAI, we developed and supply: (1) Guardium™, a semi-autonomous unmanned ground system suited for off-road, rough-terrain environments and capable of extended, continuous and autonomous operation, (2) Guardium-LS UGV™, capable of supplying forward positions with up to 1.2 tons of ammunition and supplies and (3) AvantGuard®, our new generation unmanned ground combat vehicle (UGCV) offering enhanced combat mission support. We also supply mini-robotic devices used by land forces for tactical missions.

Sensors. We develop unattended ground sensors that detect human and vehicle activity.

Smart All-Terrain Networked Detectors (SAND). We develop and supply SAND, an advanced, stand-alone, long-life, wireless security system that remotely monitors wide areas and detects and tracks both the movements of people as well as the movements of all types of vehicles. SAND meets the operational needs of a wide range of military and homeland security missions including perimeter security, border control, surveillance and intelligence.

C4I Systems. Our C4I systems for combat vehicles include battle management systems that process data and enhance situational awareness of land vehicle crews and commanders. Our overall situational awareness systems for land vehicles include electro-optic-based laser range-finders, TOW night targeting sights, thermal imaging systems, flat paneled color displays, threat detection systems, gunner' and commander's sights, laser warning systems, reconnaissance systems and our "See-through Armor" system providing 360° panoramic observation for 360° independent panoramic target location and identification and gun-turret direction, using day and night vision systems.

Surveillance, Reconnaissance and Targeting Systems. We supply fully-customizable ground and mobile solutions for intelligence collection and dissemination comprised of a broad array of lightweight network-ready sensors and C4I systems. The various system components can be fully customized to deliver effective intelligence in a range of operational scenarios. Our systems provide day and night observation, target detection and recognition, radar and identification of friendly forces. The sensors are fully controlled from the commander terminal, with digital maps for navigation and orientation.

Counter-IED Measures. We develop and supply deployed vehicle mounted counter remote controlled improvised explosive devices (IEDs) electronic warfare systems, which protect vehicle crews from IEDs.

Driver Thermal Vision Systems. We develop and supply uncooled thermal imaging kits, fully ruggedized and suitable for a wide range of vehicle-mounted applications. The vision systems include a thermal imaging camera based on an uncooled detector and a ruggedized LCD display installed inside the vehicle.

Auxiliary Power Units (APUs). We develop and supply APUs that improve the vehicle crew's performance and safety by reducing fatigue and minimizing exposure to noise, heat and vibrations. The APU allows the vehicle to operate in silent mode while reducing the thermal signature and also supports the increased power demand for sophisticated electronic equipment.

Life Support Systems (LSS). We supply life support systems for land vehicles for environmental, climate and chemical, biological, radiological and nuclear (CBRN) protection and control. The systems include heating, ventilation and air conditioning (HVAC), water generation and fire suppression systems. The LSS can be powered by the vehicles engine or can be self-propelled when it includes an APU.

Hydraulic Systems. We supply hydraulic systems for vehicle fueling, braking, suspension and power pack operation.

Artillery Guns. Through Soltam, we develop and supply a range of howitzers and artillery field guns. These include: (1) ATMOS, a 155mm, computerized autonomous truck mounted self-propelled gun for light, long-range and fast moving artillery on the battlefield and equipped with fire control computers, muzzle velocity radar, an inertial navigation system and a target acquisition system, (2) ATMOS-D-30, a wheeled, self-propelled 122mm howitzer with advanced tactical computation and sensors that can be mounted on almost any modern 6X6 or 8X8 truck, (3) ATHOS, a 155mm, 52 caliber autonomous towed howitzer system, (4) M-46S hybrid, a 155mm, 45 caliber cannon assembly and (5) M-114S, an upgraded version of the 155mm, 33 caliber assembly.

Mortar Systems. We develop and supply a range of Soltam-family mortar systems for special forces, commando units and infantry forces. These include the lightweight 60mm mortar for close, medium, long and extended-range shooting that operate with the SOLMAC PDA, a light handheld fire control system. We also supply 81mm mortars for short, medium, long and extended-ranges, available in both dismounted and vehicle-mounted configurations. In addition, we develop and supply the CARDOM system, a 81/120mm autonomous, self-propelled recoiling mortar mounted on a tracked or wheeled vehicle, capable of firing at every angle (360 degrees).

Mortar Ammunition. Through Soltam, we develop and supply a range of mortar ammunition that can be fired from qualified smooth bore mortars. We also supply high explosive, white phosphorus (WP) and smoke mortars in 60mm, 81mm and 120mm calibers, equipped with point detonating, proximity and electronic time fuses. In addition, we supply training and illuminating bombs.

Programs

We are engaged in a wide range of land vehicle systems programs, from comprehensive vehicle modernization programs, to stand-alone system supply to vehicle manufacturers to life cycle support programs. Customers for our land vehicle systems include the IDF, the U.S. Army, the USMC, the armed forces of numerous NATO, EU and other countries, as well as major military vehicle manufacturers such as General Dynamics Corporation (General Dynamics), BAE Systems Inc. (BAE Systems), Lockheed Martin, Patria Oyj (Patria), Mowag GmbH (Mowag), Steyr GmbH (Steyr) and Iveco S.p.A. (Iveco).

We supply a range of systems for all models of the IDF's main battle tank, the Merkava. This includes fire control and electric gun and turret drive systems, electronic and electric turret systems, day/night gunner and commander sighting systems, flat panel displays, laser warning systems, life support systems and battle management systems.

We are supplying BAE Systems with a number of systems for the U.S. Army's Bradley A-3 fighting vehicle. We are a subcontractor to Lockheed Martin for the U.S. Army Multiple Launch Rocket System (MLRS) as well as for the U.S. Army's and USMC's High Mobility Artillery Rocket System (HMARS). We also are part of Lockheed Martin's team for the upgrade of the USMC's Light Armored Vehicle (LAV) command and control (C2) vehicle. Elbit Systems of America supplies to the U.S. Army components, assembles kits and installs systems for various mounted and dismounted mortar fire control systems.

In 2010, AEL was awarded a framework agreement, valued at up to approximately \$260 million, to supply 30mm unmanned turrets for the Brazilian Army Land Forces' Guarani Project. Under this project the unmanned turrets will be installed on-board hundreds of Iveco 6x6 armored personal carriers, according to a schedule and a multi-year funding profile to be agreed upon by the parties. Also, in 2010, we were awarded a tank upgrade contract from an Asian customer that includes the installation of advanced battle management systems, as well as observation and surveillance systems.

We are engaged in numerous land vehicle modernization programs for European customers. We are supplying various systems to: Mowag for the Romanian Ministry of Defense's Piranha III vehicle program and for the Piranha III Belgium armored infantry vehicle program; Patria for the Slovenian AMV 8x8 armed vehicle program; Steyr for the Portuguese Army's Pandur II 8x8 light wheeled armored vehicle program; and Iveco for the Brazilian Army's medium wheeled armored personnel carrier program and the Austrian Army's 4x4 wheeled armored program.

We supply a range of thermal imaging systems for the Israeli Merkava, the Korean KIAI, the Leopard 2/A5 and other tanks. We also provide generic commander sights for tanks and APCs.

We also supply tank gunnery training systems to the IDF and the U.S. Army. In addition, we supply ground forces trainers to other customers worldwide including the Appended Tactical Combat Trainer System, tactical battle company trainers, artillery training centers and the Conduct of Fire Trainer.

Through Kinetics, we develop a number of systems for combat vehicles of the IDF, the U.S. Army and other customers, including advanced life support systems, such as environmental and climate control and NBC protection systems, hydraulic, fuel, braking and suspension systems as well as an auxiliary power unit. Elbit Systems of America, through RTL, supplies environmental and climate control systems for the U.S. Army and USMC mine resistant ambush protected (MRAP) vehicles.

Through G-NIUS Unmanned Ground System Ltd. (G-NIUS), our joint venture with IAI, we are developing and supplying unmanned ground vehicles (UGVs), which perform a variety of missions in support of infantry forces' combat operations, including the Guardium™ UGV suitable for off-road rough terrain environments.

C4I Systems

Overview

Our land-based C4I systems, that began years ago with the design and development of software-based building blocks, have evolved into a broad portfolio of integrated solutions linking every military echelon to real-time mission-critical information, from headquarters battle management systems, to integrated infantry combat systems to “system of systems” such as the “Digital Army Program” (see “Programs” below). Building on in-house capabilities and core technologies, we provide net-centric compatible solutions ranging from target acquisition, to battle management to communication systems. We supply our advanced land-based C4I systems as part of turn-key solutions as well as on a stand-alone basis. Our solutions cater to all types of land combatant forces and can be integrated into military vehicles.

Our land-based C4I systems are designed for real-time operational and situational awareness, assuring fighting forces constant access to command and control. As part of the “total force” concept, we provide our customers with the capabilities to deploy land forces on a networked and joint basis, maximizing power and ability to accomplish missions while minimizing the risk of friendly fire and collateral damage. Our battle-proven, interconnected systems enable modern forces to synchronize their response with speed, precision and intelligence. Our C4I systems provide comprehensive net-centric solutions for low intensity conflicts (LIC) and counter-terror activities. Our systems connect intelligence data to combat forces via C4I networks and mobile command and control posts. Our integrated infantry systems provide infantry units with C4ISR, field intelligence, urban warfare and peacekeeping capabilities. We also design and supply military information technology (IT) systems and IT and integrated information gathering systems to various governmental agencies for border control and management systems, crime prevention and other governmental applications.

We have access to the full range of radio and military communications solutions developed by Tadiran Communications over the last 40 years and recently by ESLC. Tadiran Communications' radios and communications systems and products are incorporated into our overall C4I solutions as well as sold on a stand-alone basis to other defense contractors and end users.

During 2010, we added to our C4I technological capabilities in the area of terrain dominance through the acquisition of Pearls of Wisdom. (See above “Recent Acquisitions – Pearls of Wisdom.”) Our land-based C4I radio and

communications activities are conducted by ESLC, Elbit Systems of America, Telefunken, Shiron and certain of our other subsidiaries.

Systems Portfolio

Our C4I systems portfolio for land-based applications encompasses the entire spectrum of land forces needs including “systems of systems” linking all operational forces and assets, battle management systems for specific command echelons and infantry forces, artillery, command and control systems, day-night observation systems, enhanced tactical computers and ruggedized personal data assistants (RPDAs), power amplifiers for satellite communications (SATCOM), tactical communications systems, SATCOM systems, radios, tactical group reconnaissance systems, military IT systems, tactical battle company trainers and governmental IT systems.

Digital Army's "Systems of Systems." We supply "systems of systems" such as the Digital Army Program (see below "Programs"), that incorporate advanced combat concepts geared to increase net-centric operational effectiveness and connectivity throughout all land forces echelons, in all combat situations. These systems function based upon a unified operational concept, providing computerized systems down to the single soldier level to facilitate transmission of integrated, real-time situation pictures to and from all battlefield and command echelons. This includes TORC2H®, an integrated operational command control headquarters system, that closes the sensor to shooter loop and facilitates data collection and border patrol operations. It also includes our Tactical Intranet Geographic dissemination in Real-Time (TIGER®) advanced communication system and enhanced tactical computers.

Battle Management Systems (BMS). We supply a range of battle management systems that comprise advanced electro-optical sensors, multi-functional displays, command and control software, information and dissemination systems and advanced mission computers, for enabling coordination among fighting vehicles and combat forces. These systems provide situational awareness to peace-keeping operations and maneuvering forces, including combat vehicles, engineering corps and logistic support personnel. The systems include elements such as TIGER®, data radios and tactical modem, wireless local area network (LAN) and SATCOM. Our WINBMS (Weapon-Integrated Battle Management System) integrates the entire sensor-to-shooter loop, enabling real-time coordination between fighting vehicles, and providing universal situational awareness, in-depth collaborative mission, planning and management, and a continuously updated common operational picture.

Integrated Infantry Combat Systems. We supply systems that provide real-time net-centric information to infantry forces. This includes our DOMINATOR® system that enables infantry units to send and receive real-time data, view-up-to-the-minute common operational pictures on personal displays and live video from either our external electro-optic payload advanced stabilized system (CoPASS™) and our multi-sensor stabilized integrated system (MSIS), or from body sensors, as well as transmit images and positions back to the command post. DOMINATOR® comprises elements such as a personal digital unit, tactical communication unit, eyepiece, weapon-mounted fire control system, helmet, CORAL-CR, power pack and communication system.

Artillery C4I Systems. We supply a range of systems for C4I applications among field artillery units, such as our Combat NG system, which are deployed from the platoon to brigade levels, managing all aspects of artillery operations and fire control, including for theater missile defense applications.

MapCore®. We supply MapCore®, a software design kit providing mapping capabilities for application programmers, capable of manipulating 2D maps, 2.5D maps (2D maps with elevation) and 3D maps (terrain visualization) in the application's user window and serving as an infrastructure for developing moving maps, mission planning and debriefing, C4ISR and simulator systems.

Observation and Ground Reconnaissance Systems. We supply electro-optic-based thermal imaging, day-night observation systems and tactical reconnaissance systems for border control and ground reconnaissance.

Enhanced Tactical Computers and RPDAs. We supply ruggedized enhanced tactical computers and RPDAs that bring the versatility of advanced personal computers and data assistants to the operational battlefield. Our Tacter®-31D is a versatile tactical computer in a tablet configuration supporting both vehicle mounted and dismounted applications with a unique vehicular docking station and latch enabling operation both in and out of the vehicle. It has a lightweight tablet configuration and integrated handle that allows the unit to be easily transported. Our Tacter® 31M computer system extends the same modularity and interface flexibility on a Windows-based platform.

Ground Smart Display Unit (GSDU). We supply GSDU, a multi-function high brushless C4I display unit with supporting multiple video formats. Featuring a customizable front panel, the GSDU is fully ruggedized and compliant with relevant military standards.

Tactical Multi-media Router (TMR). We supply TMR, a building block for execution of multi-media routing on a dynamic basis for command posts as well as combat vehicles.

Radio and Communications Systems and Products. Based on the Tadiran Communications' product line, we supply a range of tactical radio systems, software data radio systems, multi-channel radio systems, integrated radio communications systems, power HF communications systems, broadband communications systems based on WiMAX technology, mobile net communications systems and tactical data communications systems. We also provide MAXESS® military wireless LAN systems for wide band data transmission. Our radio and communication systems portfolio includes military communications systems and products for a wide range of customers worldwide, which are used for voice, data and video (multi-media) applications in a broad range of frequencies, starting at the VLF band through HF, VHF, UHF to the C-band and further on in the mm wave band. The range of products and systems facilitate secured and ECCM immuned voice and broadband data communications, covering the communication needs of all levels of military echelons. Our military communications product line also includes short and medium-range VHF radio systems, long-range HF radio systems, multi-band VHF-UHF handheld/man-pack radios, line-of-sight multi-channel radio systems, ruggedized computers/communication terminals, integrated communications systems combining wireless (radio) and wired (telephony), IP/LAN/WAN networks situation awareness systems and radio network management systems.

Integrated Radio Communication System (IRCS). Our field proven IRCS enables all echelons, from high-ranking commanders down to the individual soldier in the field, to directly communicate throughout the military network. IRCS facilitates direct communication among a broad range of radios and communication devices including VHF, HF and multi-channel radios, LAN, WAN, PABX, satellite and cellular networks.

BRO@DNET. We develop and supply the BRO@DNET battle-proven broadband wireless communication infrastructure solution. The first fully-operational, military wireless infrastructure solution that enables secure broadband communication, BRO@DNET integrates all echelons of military hierarchy into a unified communication solution, offering flexibility and reliability for a range of operational scenarios.

Satellite on the Move (STOM). As part of our communication portfolio we supply STOM solutions and antennas for combat platforms for continuous satellite communication.

Communications Support Products and Services. Based on Elbit Systems of America's Talla-Com product line, we supply a range of tactical radio power amplifiers for the AN/PRC-117F, AN/PSC-5 and Single Channel Ground and Airborne Radio Systems (SINCGARS). We also provide repair, overhaul and other services for SINCGARS technology refresh programs to extend the life of the SINCGARS.

Improved Data Modem (IDM) Technology. Our IDM technology is a core technology solution set that provides users in severe environments with a means of routing and processing data over IP-based or point-to-point networks using existing (and primarily voice-grade) radios. This includes a range of form factors with numerous operational flight protocol (OFP) software versions. This technology is part of the air to ground data link used by USAF to execute close air support.

Military IT Systems. We deliver and supply military IT systems such as the Integrated Component-based Exploitation (ICE) system that provides ISR centers with an end-to-end system for the entire operational cycle of multi-sensor imagery exploitation. ICE is a fully integrative multi-sensor exploitation system designed to provide an end-to-end solution for the entire operational cycle of satellite and airborne digital imagery. ICE offers a unified solution based on imagery data derived from a variety of sensors: satellite, airborne, UAS payloads, electro-optic, infrared or video. With the ability to integratively handle this data and complimentary intelligence information, interpreters benefit from a fully detailed intelligence information interview. We also supply a multi-satellite mission planning system for

planning satellite operational missions.

WiT™ (Wise Intelligence Technology). We develop and supply technology solutions supporting organizational doctrine and improving the intelligence process. A comprehensive, field proven, customized end-to-end solution for intelligence organizations, WiT™ addresses all phases of the intelligence process including the reception, adaption and conversion of intelligence data from multiple sources as well as processing and disseminating intelligence reports.

Government IT Systems. We supply operational IT solutions to governmental agencies for border-control, anti-money laundering and intelligence applications, including intelligence knowledge management systems.

Tactical Battle Company Training Systems. We supply trainers for commanders and staff from the company-level to battalion battle company and brigade-level operations.

Programs

We perform a broad range of C4I radio and communications programs with land-based applications. Our customers include the IDF, the U.S. Army, the USMC and ground forces and governmental agencies of a wide range of NATO and EU member nations as well as those of other countries.

In 2010, we were awarded a contract from the Department of Defence of the Commonwealth of Australia in the amount of approximately \$298 million for the supply, integration, installation and support of a Battle Group and Below Command, Control and Communications (BGC3) system for the Australian Army's Land 75/125 program. The BGC3 comprises a Battle Management System (BMS) for soldiers, vehicle mounted commanders and headquarters/command post staff. The purpose of this project is to enable the Australian Army to achieve a major portion of its defence network centric warfare milestone of a networked brigade with cutting edge technology in battle management and communications systems. As of December 31, 2010, we had a total backlog for this program of approximately \$231 million to be performed through 2016.

During 2010, we also were awarded a number of contracts relating to C4I systems, including an approximately \$130 million contract to supply a Latin American army with C4I and EW systems over the next three years. We also were awarded a contract by the Polish Ministry of National Defense to supply mobile multi-sensor monitoring and surveillance systems deployed on board Rosomak 8x8 vehicles. In addition, Nessbit, our joint venture with Ness Technologies, Inc., was awarded a contract by the IMOD to supply an information management system for the IAF.

In 2004, we were selected by the IMOD to be the prime contractor for the Israel Digital Army Program (DAP). Under the DAP, we are supplying the IDF with computerized systems down to the single soldier level. The systems facilitate transmission of integrated, real-time situation pictures to and from all battlefield and command echelons. The program calls for supply and support of all hardware and software, including command and control stations, data processing and distribution systems. It will enable force coordination at all levels, access to updated situational pictures, improved overall operational capabilities, including survivability and accuracy, and more efficient utilization of personnel and other resources. As of December 31, 2010, we had a total DAP backlog of approximately \$295 million, to be performed mainly through 2013. The DAP includes a significant portion being performed under U.S. FMF funding.

Other C4I programs being performed for the IDF include the Digital Infantry Soldier program providing a battle management solution and full digital soldier suit for infantry, supply of our TORC2H® border protection command and control software and supply of the BMS for Battalion Combat Teams, supply of enhanced tactical computers, supply of a wireless LAN solution, supply of a broadnet communications system and development of the IDF's new generation tactical radio system. We are supplying a BMS to the Royal Netherlands Army, and we supply C4I solutions to several armies around the world. We are supplying RPDAs and Tacter® 31M products to the USMC as well as UHF SATCOM power amplifiers to DOD agencies. We supply data modems and mesh networking elements to U.S. and international customers. We also supply a range of radios and military communications systems to land forces of governments around the world. During 2010, we received contracts from South American, European and Asian customers for tactical radio systems, including a contract from a European Ministry of Defense for advanced tactical communication systems using the Tadiran CNR 9000 and HF 6000 tactical radios.

Electro-Optic and Countermeasures Systems

Overview

Based on more than 70 years of experience in the electro-optic market, we design and manufacture a full range of electro-optic-based solutions for air, land, sea and space applications. We cover the complete spectrum of electro-optic-based solutions with products ranging from laser and thermal imaging systems to head-up displays, through ISR systems – including payloads for space, airborne, naval and land-based missions – to ground integrated sights, electro-optic countermeasures and homeland security solutions. We are one of the few companies in the world that has engineering capability and facilities in-house in all major areas of electro-optics.

Our ISR related business activities – space cameras, airborne reconnaissance and observation & surveillance – share a broad infrastructure of technologies that provide IMINT and long-range observation solutions for space, air, sea and land based sources. In the space area, we also maintain in-house Israel's national space electro-optics infrastructure. In addition, we supply dedicated satellite cameras for space research and advanced multi-spectral and high resolution pan-chromatic cameras for commercial satellites.

Our electro-optic-based solutions for military fixed-wing and helicopters systems, UAS, commercial aviation systems, naval systems, land vehicle systems and homeland security systems are described elsewhere in this annual report. Elop, Elbit Systems of America, ELSEC, Azimuth, ITL Optronics, SCD, Opgal and certain other of our subsidiaries are engaged in electro-optic related activities. During 2010 and the beginning of 2011, we enhanced our capabilities in the electro-optics area through the acquisition of the balance of Azimuth's shares and the acquisition of ITL Optronics. (See above "Recent Acquisitions – Azimuth – Mikal Subsidiaries.")

Systems Portfolio

We supply a broad range of electro-optic and countermeasures systems.

Thermal Imaging and NVG-based Systems and Products. We produce a range of FLIR systems for night observation for air, land and sea platforms, including hand-held portable solutions. These FLIRs are included in our stabilized payloads and our man-portable systems. This includes, among others, the CORAL, the CORAL Z, CORAL LS and CORAL-CR family of thermal imagers and the MARS uncooled thermal imager and target acquisition system. These systems are integrated into the north finding solutions of Azimuth, such as the Atlas family of goniometers.

Laser-Based Systems. We develop and supply a range of laser designators and laser range-finders, such as the Portable Laser Designator/Range-Finder (PLDR) and SERPENT for air, land and naval platforms based on solid state flash lamp or diode pumped technologies, both in the eye-safe and non-eye safe band. We also develop laser filters and laser radar (LADAR) and light detector and ranging (LIDAR) systems and have completed the development of Rattler, a unique mini-designator for both airborne and ground man-portable applications.

Stabilized Payloads. We design and supply a number of payloads for air, land and sea-based observation, target acquisition, target engagement, training and fire control, using stabilized line-of-sight systems and incorporating laser range-finders or designators and thermal and HD/TV cameras. This includes our Advanced Multi-Sensor Payload System (AMPS) and our Compact Multi-Purpose Advanced Stabilized System (CoMPASS™) family, including the DCoMPASS™ and the Micro-CoMPASS.

Countermeasures Systems. Our electro-optic-based countermeasure systems include our Multi-Spectral Infrared Countermeasure System (MUSIC®) for installation on commercial (C-MUSIC™) aircraft and military helicopters and transport aircraft for detection and jamming of anti-aircraft shoulder-launched missiles. We have also developed EO

SHIELD, a soft kill countermeasures solution for armored vehicles.

Head-Up Displays. We supply head-up displays for a range of fixed-wing aircraft and helicopters.

ISR Systems. Our electro-optic-based ISR systems include aerial reconnaissance systems, such as the CONDOR® 2-EO/IR LOROP – visible and IR long-range oblique photography systems. These systems provide long-range day/night IMINT real-time collection from high, medium and low altitude using digital photography, transmission processors and displays systems. Our long-range day and night surveillance systems include LORROS® (Long-Range Reconnaissance and Observation System) for border patrols and surveillance posts.

Space Cameras and Telescopes. We supply advanced panchromatic and multi-spectral cameras for high resolution, remote sensing satellites for commercial and military space IMINT, supplying high resolution ground images, and for scientific research.

Infrared Sensors. SCD develops and manufactures infrared detectors and laser diodes for electro-optical applications. Opgal develops electro-optics “engines” (camera cores) that combine detectors with proprietary electronics, as well as IR solutions for commercial and defense applications.

Hyperspectral. We are in the process of developing cutting edge hyperspectral sensors and systems for various airborne platforms, including UAS.

Programs

We perform a range of programs in the electro-optic and countermeasures systems area. Our customers include the IDF, the Israel Space Agency, the USMC, the USN, armed forces of many other governments as well as major defense contractors such as Lockheed Martin.

We supply a range of hand-held thermal imaging and binocular systems for long-range observation and reconnaissance. We supply our CORAL family of thermal imaging devices to the IDF and the armed forces of the U.S., Canada, Germany and other countries. We are supplying the IDF our MARS hand-held un-cooled thermal imager and target acquisition system. We are supplying the AN/PAS-22 and AN/PAS-25 long-range thermal imagers and thermal laser spot imagers to the USMC. We also are under contract with the USN for the repair and maintenance of various Night Targeting systems components for USMC AH-1W helicopters, as well as the upgrade of the AH-1W Night Targeting System to the NTSU configuration. We provide our QuadEye® panoramic night vision goggle to VSI as part of the JHMCS helmet for the USN and USAF (see above “Helmet Mounted Systems – Programs”). We have also produced and support thousands of AN/TAS-4 night sights for various customers.

During 2010, Elbit Systems of America was awarded a follow-on five-year indefinite delivery/indefinite quantity (ID/IQ) contract by the U.S. Army Contracting Command to supply the U.S. Army, Navy, Marine Corps and Coast Guard with AN/AVS-7 head-up display components, including flat panel and night head-up display units. Elbit Systems of America was also awarded in 2010 a five-year ID/IQ contract from the U.S. Naval Surface Warfare Center to supply the Night Targeting System Upgrade (NTSU) and associated items for the AH-1W Cobra helicopter.

We are supplying PLDRs to the German Armed Forces. We are also supplying the AN/PEQ-17 laser designator to the USMC and the Common Laser Designator Range-finder (CLDR) to Lockheed Martin, which is used on the USMC AH-1Z Super Cobra and the USAF AC-130 Gunship aircraft. We also supply laser designators and range-finders for air and ground applications to several other customers, including several in North America.

In the area of stabilized payloads we supply CoMPASS™, as well as the DCoMPASS™ and Micro-CoMPASS for helicopters, UAS and marine platforms. (See above “Military Fixed-Wing and Helicopter Systems”, “UAS” and “Naval Systems.”) Our military head-up display programs as well as our aerial reconnaissance systems programs are described in “Military Fixed-Wing and Helicopter Systems” above.

Land vehicle electro-optic-based thermal imaging and laser products programs, including integrated sights, are described above under “Land Vehicle Systems.” We supply LORROS® to the IDF for long-range day and night observation. We are also supplying the Turkish Air Force with a combined airborne IMINT system, including our CONDOR®2-TAC vertical-tactical aerial photography pods.

In the countermeasures area we are developing C-MUSIC, a laser-based countermeasure system for use on commercial passenger aircraft as well as military helicopters, transport aircraft and other commercial aircraft to protect against missiles using IR seekers. We are developing for implementation our C-MUSIC commercial DIRCM (direct infrared countermeasures) system for Israeli commercial aircraft.

We supply a variety of high resolution cameras and telescopes for space applications. This includes cameras for the various versions of the IDF's Ofek satellites, satellites of the Israel Space Agency and other countries' space agencies and EROS satellites operated by ImageSat International N.V. In 2010, another of our space cameras was successfully launched as part of the Israeli OFEK space program. We also are developing hyper-spectral systems for the IMOD.

Homeland Security Systems

Overview. We design, manufacture and integrate a wide range of comprehensive homeland security and para-government systems and products covering diverse scenarios and applications. These include integrated land, maritime and coastal control and surveillance systems, airport and seaport security systems, border control systems, “safe city” systems, large venue security systems, access and border registration control systems, pilot identification systems, transportation security systems, C4I homeland security applications, facility perimeter security products, electronic fences, electro-optic surveillance systems, tactical mini-UAS and communications systems for defense, police, airport, border patrol and coast guard applications, training and simulation solutions, energy and critical infrastructure protection and other homeland security uses. Many of our defense related activities described elsewhere in this annual report also have homeland security applications. Our homeland security systems activities are performed by Elbit Systems, Elop, ELSEC, ESLC, Elisra, Azimuth, ITL Optronics, Elbit Systems of America, AEL and certain of our other subsidiaries.

Systems Portfolio

Our homeland security systems portfolio draws upon many of the systems described above, including those under “UAS”, “C4I Systems” and “Electro-Optic and Countermeasures Systems.” We also provide a range of systems designed specifically for the homeland security market.

Border Surveillance Systems. We supply a range of systems and products for border, surveillance, including day/night observation systems, smart fences, mini-UAS, surveillance land vehicles and C4I-based systems combining some or all of the above-mentioned systems. We also supply border control and management IT systems.

Safe City Systems. We offer “safe city” crime and terror detection and crisis management solutions combining fully integrated C4I systems with advanced electro-optic surveillance, UAS, communication solutions and other systems to provide city-wide event detection and operations coordination, management and control to municipal security forces.

Airport Security Systems. We supply a variety of solutions to secure airports and related aviation security facilities from undesired intrusions, supporting secure airport operations and facilitating pilot identification, while complying with the range of regulations that govern airport and aviation security. We also supply national-based access security solutions for air traffic control missions.

Seaport and Coastal Surveillance Systems. We supply comprehensive surveillance systems for monitoring maritime traffic, prevention of smuggling, illegal shipments, customs violations and illegal immigration, controlling fishing activities and coordination of search and rescue.

Perimeter Security and Intrusion Detection Systems. We supply electronic alarm fences and virtual fences, combined with electro-optic pointing, verification and tracking to detect and deter attempts by intruders to breach secured facilities and critical infrastructures.

Transportation Security and Safety Systems. We provide security and safety solutions for railroad authorities, including railway security systems and anti-collision alert systems for crossing junctions.

Communications Systems. We supply MICOM HF radio communications systems for land and maritime-based security forces.

Training and Simulation Solutions. We supply training and simulation solutions for first responders, FEMA (Federal Emergency Management Administration) activities, crime prevention and counter-terrorism.

Programs

We perform a range of homeland security-related programs for national, regional and municipal security authorities, including airport, border guard and coastal control authorities. Customers for our homeland security systems include the Israeli Ministry of Transportation, the IMOD, the U.S. Department of Homeland Security, various commercial airports in Europe and Africa, border and security forces in Europe and Asia and security organizations of several other governments.

We are engaged in several “smart” electronic deterrence projects for the Israeli government. We have developed and supplied the Israel Police with Israel’s Border Control Management System.

We are performing programs relating to border security projects, coastal surveillance systems and integrated airport security systems for European and other governments. We also provide a system level security solution to the Israeli Railroad Authority for protecting many of its nationally deployed sites.

EW and SIGINT Systems

Overview. Through Elisra, in which we reached an agreement to increase our ownership from 70% to 100% in February 2011 (see above “Recent Acquisitions - Elisra”), we supply a range of multi-spectral self-protection suites and systems for airborne platforms including advanced EW and electronic countermeasures (ECM) systems, communications jammer solutions, missile warning systems, laser warning systems and radar warning receivers. We also furnish SIGINT systems, including ELINT, COMINT and direction finding (DF) systems, designed for air, ground and naval platforms and applications.

Systems Portfolio

We supply a range of EW suites including ECMs, SIGINT systems, counter improvised explosive devices, data links, search and rescue systems and anti-tactical ballistic missile detection simulation systems.

EW Suites including ECMs. Our EW suites provide advanced self protection integrated capabilities for various types of combat aircraft, naval and ground platforms, combining defense aid suites (DAS) with ESM in a single unit. The EW suites cover multi-spectral bands and include radar warning receivers (RWR), passive IR missile warning systems, laser warning receivers, ECM systems and other measures. Various configurations of our EW suites have been installed on airborne platforms such as fighter aircraft, helicopters, transport aircraft and commercial aircraft. As part of our IR missile warning systems we supply additional operational capabilities such as our Situation Awareness Panoramic IR (SAPIR) system with collision avoidance for increased mission safety. We also supply a range of systems for self protection and electronic attack for airborne, naval and ground platforms including the SPJ (Self Protection Jammer) and the COMJAM (Communication Jammer).

SIGINT Systems. We develop and supply full electromagnetic spectrum SIGINT (ELINT, COMINT and DF) systems for tactical and strategic intelligence gathering for airborne, ground and naval applications. Our SIGINT systems incorporate advanced receiving, signal processing and DF technologies, including different times of arrival (DTOA) and interferometer technologies.

Counter Improvised Explosive Devices (CIED). We develop and supply a range of electronic jammer anti-bomb products, including cellular selective jammer and protection systems against IEDs, such as the Electronic Jamming Anti-Bomb (EJAB) family of products.

Data Links and Video Dissemination Systems. We develop and supply smart data link solutions for unmanned platforms, guided weapons and satellites and video dissemination for airborne (including UAS), ground and naval applications. These include the V-RAMBO video receiver and monitor that features video and a telemetry receiver the size of a PDM, a man-pack receiving system (MRS-2000) that incorporates an all-digital ruggedized transceiver for receiving and disseminating real-time UAS derived video images and telemetry data and an Active Man-pack Transceiving System (AMTS) for display of IMINT for surface platforms.

Search and Rescue Systems. We develop and supply advanced solutions for pilots and rescue teams for the combat arena as well as personal search and rescue systems for non-combat situations.

Anti-Tactical Ballistic Missile Defense Systems. We are the developer of the command and control system for the Arrow missile program. We also are the developer of the core of the Israel Test Bed (ITB), a real-time simulator for tactical ballistic missile defense systems.

Programs

We supply a range of EW, SIGNIT, data links and search and rescue systems to defense forces around the world for airborne, ground and sea-based applications. Customers for these systems include the IDF, the armed forces of several other governments as well as major defense contractors. We are supplying EW systems for the Canadian Navy's Halifax Frigate Modernization Program. (See above "Naval Systems – Programs".)

We are supplying our airborne platform self-protection suites to the IAF and several other air forces around the world. During 2010, Elisra was awarded an approximately \$147 million contract to supply airborne and ground EW systems for an Asian customer over the next three years. In addition, in January 2011 Elisra was awarded a contract to supply the Korean Government with airborne EW suites and missile warning systems (MWS) for ROKAF CN-235 transporter aircraft. We supply SIGINT systems for air, ground and naval platforms to the IDF and several other customers worldwide.

We supply data links for airborne platforms including UAS. We also supply airborne search and rescue systems to various customers. In 2010, we were awarded a contract to supply Tactical Video Data Link (TVDL) systems for USMC AH-IW helicopters. Our ITB tactical ballistic missile defense trainer is used by the IDF, and our Citron Tree battle management center is utilized for the IDF's Arrow Defense Weapon system.

Various Commercial Activities

We are engaged in applications of our defense technologies to commercial applications as well as other commercial activities. Our current commercial activities, in addition to the activities described under "Commercial Aviation Systems" and elsewhere above, include medical equipment, commercial communications and mobile and wireless telephone network encryptions, microwave technologies and components and spectrum monitoring and control systems, commercial automotive fleet management products, SATCOM equipment and general manufacturing and machinery services. In 2010, we established Brightway Vision Ltd. (Brightway), an Israeli company that is engaged in leveraging specific technologies we developed in the defense area to applications for enhancing commercial automobile drivers' night vision. In January 2011, an outside equity investment was made in Brightway, reducing our equity interest to approximately 78% on a fully-diluted basis.

We own a minority interest in three companies that are engaged in activities primarily for the commercial market. We own an approximately 16% interest in Starling Advanced Communications Ltd., an Israeli company, whose shares are traded on the TASE, and which develops products in the area of internet communications through satellite transmissions and broadband information transfer for commercial aircraft. We own an approximately 19% interest in Chip PC Ltd., an Israeli company whose shares are traded on the TASE, and which is engaged in the development and manufacture of "thin client" solutions enabling server based computing technologies to replace traditional personal computers and deploy and control large numbers of work stations. We also own an approximately 14% equity interest in ImageSat International N.V., a company incorporated in Netherlands Antilles, involved in the operation of satellites for commercial and other applications and providing satellite imagery. (Also see Item 8. Financial Information – Legal Proceedings – ImageSat.)

Property, Plant and Equipment

Facilities Owned or Leased by the Company

	Israel (1)	U.S. (2)	Other Countries (3)
Owned	2,215,000 square feet	713,000 square feet	1,063,000 square feet
Leased	2,038,000 square feet	611,000 square feet	300,000 square feet

(1) Includes offices, development and engineering facilities, manufacturing facilities, maintenance facilities, hangar facilities and a landing strip in various locations in Israel used by Elbit Systems, Elop, ESLC, Elisra, Cyclone, ELSEC, Tadiran Systems, Tadiran Spectralink, Kinetics, Soltam, Saymar, Azimuth and ITL.

- (2) Includes offices, development and engineering facilities, manufacturing facilities and maintenance facilities of Elbit Systems of America primarily in Texas, New Hampshire, Florida, Alabama and Virginia. Elbit Systems of America's facilities in Texas, New Hampshire and Alabama are located on a total of approximately 153 acres of land owned by Elbit Systems of America. This does not include properties not held by Elbit Systems of America, including approximately 6,000 square feet leased by our wholly-owned subsidiary Elmec Inc. in Massachusetts.
- (3) Includes offices, design and engineering facilities and manufacturing facilities primarily in the U.K., Romania, Belgium, Germany, Austria, Brazil and Australia.

Recent Investment in Facilities. Over the last two years the average annual net investment in our facilities, including building projects, equipment, machinery and vehicles, amounted to approximately \$123 million. Each of our manufacturing facilities generally operates at or near full capacity. Accordingly, we believe that our current facilities are adequate for our operations as now conducted.

Governmental Regulation

Government Contracting Regulations. We operate under laws, regulations and administrative rules governing defense contracts, mainly in Israel and the United States. Some of these carry major penalty provisions for non-compliance, including disqualification from participating in future contracts. In addition, our participation in governmental procurement processes in Israel, the United States and other countries is subject to specific regulations governing the conduct of the process of procuring defense contracts.

Israeli Export Regulations. Israel's defense export policy regulates the sale of a number of our systems and products. Current Israeli policy encourages exports to approved customers of defense systems and products such as ours, as long as the export is consistent with Israeli government policy. A license is required to initiate marketing activities. We also must receive a specific export license for defense related hardware, software and technology eventually exported from Israel. Israeli law also regulates export of "dual use" items (items that are typically sold in the commercial market but that also may be used in the defense market). In 2010, more than 50% of our revenue was derived from exports subject to Israeli export regulations.

U.S. and Other Export Regulations. Elbit Systems of America's export of defense products, military technical data and technical services to Israel and other countries is subject to applicable approvals of the U.S. government. Such approvals are typically in the form of an export license or a technical assistance agreement (TAA). Other U.S. companies wishing to export defense products or military related services and technology to our Israeli and other non-U.S. entities are also required to obtain such export licenses and TAAs. This applies to data required by our non-U.S. entities to perform work for U.S. programs. Licenses are also required for Israeli nationals assigned to work in defense-related technical areas at our U.S. affiliated companies. An application for an export license or a TAA requires disclosure of the intended sales of the product and the use of the technology. In recent years, the U.S. has implemented enhanced scrutiny of its export control regulations, and the U.S. government may deny an export authorization if it determines that a transaction is counter to U.S. policy or national security. Other governments' export regulations also affect our business from time to time, particularly with respect to end user restrictions of our suppliers' governments.

Approval of Israeli Defense Acquisitions

The Israeli Defense Entities Law (Protection of Defense Interests) establishes conditions for the approval of an acquisition or transfer of control of an entity that is determined to be an Israeli "defense entity" under the terms of the law. Designation as a "defense entity" is to occur through an order to be issued jointly by the Israeli Prime Minister, Defense Minister and Trade and Industry Minister. Although no such orders have been issued as of the date of this annual report on Form 20-F, it is assumed that Elbit Systems and most of our Israeli subsidiaries will be designated as "defense entities" under the law. Elbit Systems and our major Israeli subsidiaries have been designated as "defense entities" under an order of the Defense Minister with respect to Israeli law governing various aspects of defense security arrangements.

Orders to be issued under the Israeli Defense Entities Law will also establish other conditions and restrictions. It is anticipated that in the case of a publicly traded company such as Elbit Systems, Israeli government approval will be required for acquisition of 25% or more of the voting securities or a smaller percentage of shares that grant "means of control." Means of control for purposes of the law include the right to control the vote at a shareholders' meeting or to

appoint a director. Orders relating to defense entities are also anticipated to, among other matters, (1) impose restrictions on the ability of non-Israeli resident citizens to hold “means of control” or to be able to “substantially influence” defense entities; (2) require that senior officers of defense entities have appropriate Israeli security clearances; (3) require that a defense entity’s headquarters be in Israel and (4) subject a defense entity’s international joint ventures and various technology transfers to the approval of the IMOD.

Approval of U.S. and Other Defense Acquisitions. Many other countries also require governmental approval of acquisitions of local defense companies or assets by foreign entities. Mergers and acquisitions of defense related businesses in the U.S. are subject to the Foreign Investment and National Security Act (FINSIA). Under FINSIA, our acquisitions of defense related businesses in the U.S. require review, and in some cases approval, by the Committee on Foreign Investment in the United States (CFIUS).

“Buy American” Laws. The U.S. “Buy American” laws impose price differentials or prohibitions on procurement of products purchased under U.S. government programs. The price differentials or prohibitions apply to products that are not made in the United States or that do not contain U.S. components making up at least 50% of the total cost of all components in the product. However, a Memorandum of Agreement between the United States and Israeli governments waives the Buy American laws for specified products, including almost all the products currently sold in the United States by Elbit Systems and our Israeli subsidiaries.

Foreign Military Financing (FMF). Elbit Systems of America participates in United States FMF programs. These programs require countries, including Israel, receiving military aid from the United States to use the funds to purchase products containing mainly U.S. origin components. In most cases, subcontracting under FMF contracts to non-U.S. entities is not permitted. As a consequence, Elbit Systems of America generally either performs FMF contracts itself or subcontracts with U.S. suppliers. The U.S. government may authorize the IMOD to utilize a portion of the FMF budget under the United States Subcontracting Procurement (USSP) channel. In such cases, companies such as Elbit Systems or our Israeli subsidiaries, who are acting as the Israeli prime contractor to the IMOD under the NIS funded portion of an IMOD program, are authorized to negotiate and enter into a subcontract directly with a U.S. supplier. However, payment of the funds under a USSP channel subcontract is administered by the IMOD Purchasing Mission to the U.S. Elbit Systems of America also participates in U.S. Foreign Military Sales (FMS) programs.

Procurement Regulations. Solicitations for procurements by governmental purchasing agencies in Israel, the United States and other countries are governed by laws, regulations and procedures relating to procurement integrity, including avoiding conflicts of interest and corruption in the procurement process.

Anti-Bribery Regulations. Laws such as the Israel Penal Code, the Organization for Economic Cooperation and Development (OECD) Convention on Combating Bribery of Foreign Public Officials in International Business Transactions, the U.S. Foreign Corrupt Practices Act and corresponding legislation in other countries, prohibit providing personal benefits or bribes to government officials in connection with the governmental procurement process. Israeli defense exporters, such as Elbit Systems, are required to maintain an anti-bribery compliance program, including specific procedures, record keeping and training.

Audit Regulations. The IMOD audits our books and records relating to its contracts with us. Our books and records and other aspects of projects related to U.S. defense contracts are subject to audit by the U.S. Defense Contract Audit Agency. Such audits review compliance with government contracting cost accounting and other applicable standards. If discrepancies are found this could result in a downward adjustment of the applicable contract’s price. Some other customers have similar rights under specific contract provisions.

Antitrust Laws. Antitrust laws and regulations in Israel, the United States and other countries often require governmental approvals for transactions that are considered to limit competition. Such transactions may include cooperative agreements for specific programs or areas, as well as mergers and acquisitions.

Civil Aviation Regulations. Several of the products sold by Company entities for commercial aviation applications are subject to flight safety and airworthiness standards of the U.S. Federal Aviation Administration (FAA) and similar civil aviation authorities in Israel, Europe and other countries.

Federal Drug Administration Regulations. Medical products designed and manufactured by Elbit Systems of America's Medical Instruments – KMC Systems business unit are subject to U.S. Federal Drug Administration (FDA) regulations.

Buy-Back

As part of their standard contractual requirements for defense programs, several of our customers include “buy-back” or “offset” provisions. These provisions are typically obligations to make, or to facilitate third parties to make, specified transactions in the customer's country. (For a description of these provisions, see Item 5. Operating and Financial Review and Prospects – Off-Balance Sheet Transactions.)

Financing Terms

Types of Financing. There are several types of financing terms applicable to our defense contracts. In some cases, we receive progress payments according to a percentage of the cost incurred in performing the contract. Sometimes we receive advances from the customer at the beginning, or during the course, of the project, and sometimes we also receive milestone payments for achievement of specific milestones. In some programs we extend credit to the customer, sometimes based on receipt of guarantees or other security. In other situations work is performed before receipt of the payment, which means that we finance all or part of the project's costs for various periods of time. Financing arrangements may extend beyond the term of the contract's performance. When we believe it is necessary, we seek to protect all or part of our financial exposure by letters of credit, insurance or other measures, although in some cases such measures may not be available.

Advance Payment Guarantees. In some cases where we receive advances prior to incurring contract costs or making deliveries, the customer may require guarantees against advances paid. These guarantees are issued either by financial institutions or by us. We have received substantial advances from customers under some of our contracts. In certain circumstances, such as if a contract is canceled for default and there has been an advance or progress payment, we may be required to return payments to the customer as provided in the specific guarantee. As part of the guarantees we provide to receive progress payments or advance payments, some of our customers require us to transfer to them title in inventory acquired with such payments. (See Item 5. Operating and Financial Review and Prospects – General – Long-Term Arrangements and Commitments – Bank Guarantees.)

Performance Guarantees. A number of projects require us to provide performance guarantees in an amount equal to a percentage of the contract price. In certain cases we also provide guarantees related to the performance of buy-back obligations. Some of our contracts contain clauses that impose penalties or reduce the amount payable to us if there is a delay or failure in performing in accordance with the contract or the completion of a phase of work, including in some cases during the warranty period. These types of guarantees may remain in effect for a period of time after completion of deliveries under the contract. Such guarantees are customary in defense transactions, and we provide them in the normal course of our business. (See Item 5. Operating and Financial Review and Prospects – General – Long-Term Arrangements and Commitments – Bank Guarantees.)

Financial Risks Relating to Our Projects. The nature of our projects and contracts creates some potential financial risks, including risks relating to dependence on governmental budgets, fixed-price contracts for development effort and production, schedule extensions beyond our control, termination for the customer's convenience, potential for monetary penalties for late deliveries or failure to perform in accordance with the contract requirements and liability for subcontractors. In addition, we receive payments for some of our projects in currencies other than U.S. dollars. In such cases, we sometimes elect to adopt measures to reduce the risk of exchange rate fluctuations. (See Item 3. Key Information – Risk Factors – General Risk Related to Our Business and Market.)

Intellectual Property

Patents, Trademarks and Trade Secrets. We own hundreds of living patent families including patents and applications registered or filed in Israel, the United States, the European Patent Office and other countries. We also hold dozens of living trademark families relating to specific products. A significant part of our intellectual property assets relates to unique applications of advanced software-based technologies, development processes and production technologies. These applications are often not easily patentable, but are considered as our trade secrets and proprietary information. We take a number of measures to safeguard our intellectual property against infringement as well as to avoid infringement of other parties' intellectual property. (For risks related to our intellectual property see Item 3. Key Information – Risk Factors – General Risk Related to Our Business and Market.)

Governmental Customers' Rights in Data. The IMOD usually retains specific rights to technologies and inventions resulting from our performance under Israeli government contracts. This generally includes the right to disclose the information to third parties, including other defense contractors that may be our competitors. Consistent with common practice in the defense industry, approximately 35% of our revenues in 2010 was dependent on products incorporating technology that a government customer may disclose to third parties. When the Israeli government funds research and development, it usually acquires rights to data and title to inventions. We often may retain a non-exclusive license for such inventions. The Israeli government usually is entitled to receive royalties on export sales in relation to sales resulting from government financed development. However, if only the end product is purchased, we normally retain the principal rights to the technology. Sales of our products to the U.S. government and some other customers are subject to similar conditions. Subject to applicable law, regulations and contract requirements, we attempt to maintain our intellectual property rights and provide customers with the right to use the technology only for the specific project under contract.

Licensing. There are relatively few cases where we manufacture under license. In such cases, the licensor typically is entitled to royalties or other types of compensation. In some cases where we have acquired business lines we obtain a royalty free license to use the applicable technology for specified applications. Occasionally, we license parts of our intellectual property to customers as part of the requirements of a particular contract. We also sometimes license technology to other companies for specific purposes or markets.

Research and Development

We invest in research and development (R&D) according to a long-term plan based on estimated market needs. Our R&D efforts focus on anticipating operational needs of our customers, achieving reduced time to market and increasing affordability. We emphasize improving existing systems and products and developing new ones using emerging or existing technologies.

We perform R&D projects to produce new systems for the IMOD and other customers. These projects give us the opportunity to develop and test emerging technologies. We developed new tools for fast prototyping for both the design and development process. This permits the operational team members to effectively specify requirements and to automatically transfer them into software code. Examples of our ongoing defense-related R&D projects include those for night operation capabilities, laser systems, display systems, helmet mounted systems, other avionics systems, aerial, land and sea-based unmanned vehicles and robotics, space based cameras, ISR systems, C4I systems, electric tank and turret drive systems, unmanned turret systems, communication systems and homeland security systems. Examples of our R&D in commercial areas include projects relating to commercial aviation and commercial night vision products for automobiles. We employ thousands of software and hardware development and systems engineers engaged in advance programs for airborne, ground and naval defense, homeland security and space applications. In addition, most of our program and business line managers have engineering backgrounds. More than 50% of our total workforce is engaged in research, development and engineering.

Our customers, the Office of the Israeli Chief Scientist (OCS) and other R&D granting authorities sometimes participate in our R&D funding. We also invest in our research and development activities. This investment is in accordance with our strategy and plan of operations. The table below shows amounts we invested in R&D activities for the years ended December 31, 2008, 2009 and 2010:

	2008	2009	2010
	(U.S. dollars in millions)		
Total Investment	\$ 217.2	\$ 245.8	\$ 268.6
Less Participation*	32.2	29.0	34.5
Net Investment	\$ 185.0	\$ 216.8	\$ 234.1

(Also see Item 5. Operating and Financial Review and Prospects – Summary of Operating Results – 2010 Compared to 2009 – Research and Development.)

* See above – “Government Rights in Data” and see below – “Conditions in Israel – Chief Scientist (OCS) and Investment Center Funding.”

Manufacturing

We manufacture and assemble our systems and products at our operational facilities in Israel, the U.S., Europe and at certain of our subsidiaries in other countries. These facilities contain warehouses, electronic manufacturing areas, mechanical workshops, final assembly and test stations with test equipment. We also have supporting infrastructure including fully automated surface mount technology lines and clean rooms for electro-optic components, solid state

components integration, environmental testing and final testing, including space simulation and thermal chambers. We also have computerized logistics systems for managing manufacturing and material supply. A number of our manufacturing activities are provided on a shared services basis by various of our in-house centers of excellence.

We manufacture commercial avionics and medical equipment in U.S. FAA and FDA registered facilities. We also manufacture and assemble composite materials, metal parts and machinery. One of our Israeli subsidiaries has a high technology semiconductor manufacturing facility where it performs electronic integration and assembly of thermal imaging detectors and laser diodes. We also manufacture and repair test equipment.

Environmental Compliance

As part of overall Company policy, we are committed to environmental, health and safety standards in all aspects of our operations. This includes all regulatory requirements as well as ISO 14001 compliance. We also conduct a number of measures on an ongoing basis to promote environmentally friendly operational practices, including measures to reduce electrical, gasoline and water consumption. There are no material environmental issues that affect the Company's use of our facilities.

Seasonality

Although revenues may sometimes increase towards the end of a fiscal year, no material portion of the Company's business is considered to be seasonal. The timing of revenue recognition is based on several factors. (See Item 5. Operating and Financial Review and Prospects – General – Critical Accounting Policies and Estimates – Revenue Recognition.)

Purchasing and Raw Materials

We conduct purchasing activities at most of our operational facilities. A number of purchasing and related support and logistic services are performed on a shared services basis by central service providers in the Company for various Company units and entities. We generally are not dependent on single sources of supply. We manage our inventory according to project requirements. In some projects, specific major subcontractors are designated by the customer. Raw materials used by us are generally available from a range of suppliers internationally, and the prices of such materials are generally not subject to significant volatility. We monitor the on-time delivery and the quality of our contractors and encourage them to continuously improve their performance.

Customer Satisfaction and Quality Assurance

We invest in continuous improvement of processes, with emphasis on prevention of deficiencies, to ensure customer satisfaction throughout all stages of our operations. This includes development, design, integration, manufacturing and services for software and hardware, for the range of our systems and products. Our quality teams are involved in assuring compliance with processes and administering quality plans. These activities begin at the pre-contract stage and continue through the customer's acceptance of the product or services.

We use a project management method based on Theory of Constraints (TOC) in many of our development projects. Using advanced software, work plans are continuously updated and are available to all integrated product team members. This method makes management more efficient and improves our ability to meet schedule demands of complex projects. Another TOC methodology is used to manage our manufacturing lines in Karmiel, Israel. We also use methods such as Kaizen and Lean. Our processes are based on a cutting edge tool case and CAD-CAM tools. This infrastructure, together with well defined development methodology and management tools, assists us in providing high quality and on-time implementation of projects.

Representatives of our customers generally test our products before acceptance. Branches of the IDF and other customers have authorized us to conduct acceptance testing of our products on their behalf. In addition, various of our Israeli operations units are certified for one or more of the following: ISO-9001, ISO-90003 for software, AS9100,

AS9006 for software ISO-14001, OSHAS 18001 and European Aviation Safety Agency (EASA) part 145 for maintaining civil products and part 21 G for production of civil products. We also comply with Capability Maturity Model Integration (CMMI) Level 3 of the U.S. Software Engineering Institute (SEI) and NATO AQAP.

Quality certifications applicable to defense products of Elbit Systems of America's operating units include certifications for CMMI Level 3 of the SEI, ISO-9001, AS9100 and compliance with NATO AQAP requirements. In the area of commercial aviation Elbit Systems of America's operating units hold EASA certification as well as a variety of FAA certifications including FAA Part 21 approval and FAA Part 145 approved repair stations. In the medical equipment area, Elbit Systems of America is certified for ISO 13485:2003, is registered with the FDA as a GMP manufacturer and is FDA compliant with Quality Systems Regulations 21 CFR Parts 820, 803 and 806.

Service and Warranty

We instruct our customers on the proper maintenance of our systems and products. In addition, we often offer training and provide equipment to assist our customers in performing their own maintenance. When required, support may be provided by a local support team or by experts sent from our facilities. We also provide performance based logistics services.

We generally offer a one or two-year warranty for our systems and products following delivery to, or installation by, the customer. In some cases we offer longer warranty periods. We accrue for warranty obligations specifically determined for each project based on our experience and engineering estimates. These accruals are intended to cover post-delivery functionality and operating issues for which we are responsible under the applicable contract.

Marketing and Sales

We actively take the initiative in identifying the individual defense needs of our customers throughout the world. We then focus our research and development activities on systems designed to provide tailored solutions to those needs. We often provide demonstrations of prototypes and existing systems to potential customers.

We market our systems and products either as a prime contractor or as a subcontractor to various governments and defense contractors worldwide. In Israel, we sell our military systems and products mainly to the IMOD, which procures all equipment for the IDF. A number of marketing related support services are provided on a central shared services basis to various units in the Company. We are assisted in marketing our systems, products and services in other parts of the world through subsidiaries, joint ventures and representatives.

In the U.S., Elbit Systems of America leads our sales and marketing activities, from its facilities throughout the U.S. Elbit Systems of America operates under a Special Security Agreement that allows it and its subsidiaries to work on certain classified U.S. government programs. See above "Principal Subsidiaries – Elbit Systems of America." Our subsidiaries in other countries typically lead the marketing activities in their home countries, often assisted by marketing and business development personnel based in Israel.

Over the past several years, a number of the major entities in the Company have entered into cooperation agreements with major defense contractors in the United States, Europe and certain other key markets. These agreements provide for joint participation in marketing and performance of a range of projects. In other countries, we actively pursue business opportunities as either a prime contractor or a subcontractor, usually together with local companies. Often we enter into cooperation agreements with other companies for such opportunities.

Competition

We operate in a competitive environment for most of our projects, systems and products. Competition is based on product and program performance, price, reputation, reliability, life cycle costs and responsiveness to customer requirements. This includes the ability to respond to rapid changes in technology. In addition, our competitive position sometimes is affected by specific requirements in particular markets.

In recent years consolidation in the defense industry has affected competition. This has decreased the number but increased the relative size and resources of our competitors. We adapt to market conditions by adjusting our business strategy to changing defense market conditions. We also anticipate continued competition in defense markets due to declining defense budgets in many countries.

Competitors in the sale of some of our products to the government of Israel include IAI and Rafael among others. From time to time we also cooperate with some of our competitors on specific projects. Outside of Israel, we compete in a number of areas with major international defense contractors principally from the United States, Europe and Israel. Our main competitors include divisions and subsidiaries of NGC, Honeywell, BAE Systems, Rockwell Collins, L-3 Communications Corporation, Thales S.A., Finmeccanica S.p.A., Harris Corporation, AAI Corporation, FLIR Systems, Inc., Rhode and Schwartz GmbH, ITT Defense Limited, Rheinmetall AG and Safran Group – Sagem Defense Securite S.A. Many of these competitors have greater financial, marketing and other resources than ours. We also compete in the worldwide defense market with numerous smaller companies. In addition, we compete with a range of companies in the commercial avionics market. In certain cases we also engage in strategic cooperative activities with some of our competitors.

Overall, we believe we are able to compete on the basis of our systems development and technological expertise, our systems' combat-proven performance and our policy of offering customers overall solutions to technological, operational and financial needs.

Major Customers

Sometimes, our revenues from an individual customer account for more than 10% of our revenues in a specific year. Our only such customer during the last three years was the IMOD, which accounted for 19% in 2008, 21% in 2009 and 23% in 2010.

Ethics

We conduct our business activities and develop Company policies based on a firm commitment to ethical practices. In addition to our Code of Conduct (see Item 16.B) and compliance with applicable laws and regulations, we have an active Company-wide ethics compliance program, incorporating ongoing training and enforcement. We are members of the Ethisphere Institute's Business Ethics Leadership Alliance.

Social Responsibility and Sustainability

We place importance on social responsibility to the communities in which we live and work. This is consistent with our policy of emphasizing ethics in our business practices. Our policy encourages the voluntary efforts of our Company entities and employees who donate their time and efforts in the support of members of our communities who are in need. In this regard, we place priority on initiatives to promote educational advancement, particularly in the technology sectors. A major activity resulting from our social responsibility policy is facilitating the placement of our employees as tutors in peripheral communities and less developed neighborhoods, providing technology-related knowledge as well as other educational resources generally lacking in those areas. We also promote numerous other community support activities, including involvement on a national level basis in major charitable organizations in Israel and the U.S. Our commitment to social responsibility initiatives has been reflected in our ongoing ranking among the top Israeli companies in the "Maala" social responsibility index.

Conditions in Israel

Political, Military and Economic Risks. Our operations in Israel are subject to several potential political, military and economic risks. (See Item 3. Key Information – Risk Factors – Risks Related to Our Israeli Operations.)

Trade Agreements

Israel is a member of the United Nations, the International Monetary Fund, the International Bank for Reconstruction and Development and the International Finance Corporation. Israel also is a party to the General Agreement on Tariffs and Trade, which provides for reciprocal lowering of trade barriers among its members. In addition, Israel has been granted preferences under the Generalized System of Preferences from several countries. These preferences allow Israel to export products covered by such programs either duty-free or at reduced tariffs.

Israel and the European Community are parties to a Free Trade Agreement that provides some advantages for Israeli exports to most European countries and requires Israel to lower its tariffs on imports from these countries over a number of years. Israel and the United States entered into an agreement to establish a Free Trade Area that eliminates tariff and some non-tariff barriers on most trade between the two countries. An agreement between Israel and the European Free Trade Association (EFTA), established a free-trade zone between Israel and the EFTA member nations.

Chief Scientist (OCS) and Investment Center Funding

The government of Israel, through the OCS and the Israel Investment Center (the Investment Center), encourages research and development projects oriented towards export products and participates in the funding of such projects as well as company investments in manufacturing infrastructures.

Our Israeli companies receiving OCS funding for development of products usually pay the Israeli government a royalty at various rates and are subject to a number of conditions. (See Item 5. Operating and Financial Review and Prospects – Long-Term Arrangements and Commitments – Government Funding of Development.) Separate Israeli government consent is required to transfer to third parties technologies developed through projects in which the government participates in the funding of the development effort.

The Investment Center promotes Israeli export products and increased industrialization of peripheral areas through investment in industrial infrastructure. The Investment Center either provides grants for qualified projects or provides tax benefits for qualified industrial investments by Israeli companies.

Israeli Labor Laws. Our employees in Israel are subject to Israeli labor laws. Some employees are also affected by some provisions of collective bargaining agreements between the Histadrut – General Federation of Labor in Israel and the Coordination Bureau of Economic Organizations, which includes the Industrialists' Association. These labor laws and collective bargaining provisions mainly concern the length of the work day, minimum daily wages for professional workers, insurance for work-related accidents, procedures for dismissing certain employees, determination of severance pay, employment of "manpower" employees and other conditions of employment.

Severance Pay. Under Israeli law, our Israeli companies are required to make severance payments to terminated Israeli employees, other than in some cases of termination for cause. The severance reserve is calculated based on the employee's last salary and period of employment. A portion of the severance pay and pension obligation is covered by payment of premiums to insurance companies under approved plans and to pension funds. The deposits presented in the balance sheet include profits accumulated to the balance sheet date. The amounts deposited may be withdrawn only after fulfillment of the obligations under the Israeli laws relating to severance pay. However, Elbit Systems and our Israeli subsidiaries have entered into agreements with some of our employees implementing Section 14 of the Severance Payment Law, which agreements relate to the treatment of severance pay. (See Item 18. Financial Statements – Note 2(S).)

National Insurance Institute. Israeli employees and employers are required to pay predetermined sums to the National Insurance Institute, which is similar to the U.S. Social Security Administration. These amounts also include payments for national health insurance. As of December 31, 2010, the payments to the National Insurance Institute were equal to approximately 17.5% of wages, subject to a cap if an employee's monthly wages exceed a specified amount. The employee contributes approximately 69%, and the employer contributes approximately 31%.

Enforcement of Judgments

Israeli courts may enforce U.S. and other foreign jurisdiction final executory judgments for liquidated amounts in civil matters, obtained after due process before a court of competent jurisdiction. This enforcement is made according to the private international law rules currently applicable in Israel, which recognize and enforce similar Israeli judgments, provided that:

- adequate service of process has been made and the defendant has had a reasonable opportunity to be heard;
- the judgment and its enforcement are not contrary to the law, public policy, security or sovereignty of the State of Israel;
- the judgment was not obtained by fraud and does not conflict with any other valid judgment in the same matter between the same parties;
- an action between the same parties in the same matter is not pending in any Israeli court at the time the lawsuit is instituted in the foreign court; and
- the judgment is no longer subject to a right of appeal.

Foreign judgments enforced by Israeli courts generally will be payable in Israeli currency. The usual practice in Israel in an action to recover an amount in a non-Israeli currency is for the Israeli court to provide for payment of the equivalent amount in Israeli currency at the exchange rate in effect on the judgment date. Under existing Israeli law, a foreign judgment payable in foreign currency may be paid in Israeli currency at the foreign currency's exchange rate on the payment date or in foreign currency. Until collection, an Israeli court judgment stated in Israeli currency will ordinarily be linked to the Israeli Consumer Price Index (CPI) plus interest at the annual rate (set by Israeli regulations) in effect at that time. Judgment creditors must bear the risk of unfavorable exchange rates.

Item 4A. Unresolved Staff Comments.

None.

Item 5. Operating and Financial Review and Prospects.

The following discussion and analysis should be read together with our audited consolidated financial statements and notes appearing in Item 18 below.

General

Critical Accounting Policies and Estimates

Our significant accounting policies are described in Item 18. Financial Statements – Note 2.

Our results of operations and financial condition are based on our consolidated financial statements, which are presented in conformity with United States generally accepted accounting principles (U.S. GAAP). The preparation of the consolidated financial statements requires management to select accounting policies for critical areas as well as estimates and assumptions and to make judgments that involve the accounting policies described below that affect the amounts reported in the consolidated financial statements. Significant changes in assumptions and/or conditions and changes in our critical accounting policies could materially impact our operating results and financial condition.

We believe our most critical accounting policies relate to:

- Revenue Recognition.
- Business Combinations and Purchase Price Allocation.
- Impairment of Long-Lived Assets and Goodwill.
- Other-Than-Temporary Decline in Value of Investments in Investee.
- Other-Than-Temporary Impairment of Debt Securities.
 - Useful Lives of Long-Lived Assets.
 - Taxes on Income.
 - Stock-Based Compensation Expense.

Revenue Recognition

We generate revenues principally from fixed-price long-term contracts involving the design, development, manufacture and integration of defense systems and products. In addition, to a minor extent, we provide support and services for such systems and products.

Revenues from long-term contracts are recognized primarily using the Financial Accounting Standards Board (FASB), Accounting Standards Codification (ASC) ASC 605-35 “Construction-Type and Production-Type Contracts” (ASC 605-35) according to which we recognize revenues on the percentage-of-completion basis.

The percentage-of-completion method of accounting requires management to estimate the cost and gross profit margin for each individual contract. Estimated gross profit or loss from long-term contracts may change due to changes in estimates resulting from differences between actual performance and original estimated forecasts. Such changes in

estimated gross profit are recorded in results of operations when they are reasonably determinable by management, on a cumulative catch-up basis. Anticipated losses on contracts are charged to earnings when determined to be probable.

We believe that the use of the percentage of completion method is appropriate as we have the ability to make reasonably dependable estimates of the extent of progress towards completion, contract revenues and contract costs. In addition, contracts executed include provisions that clearly specify the enforceable rights regarding products and services to be provided and received by the parties to the contracts, the consideration to be exchanged and the manner and terms of settlement. In all cases, revenue is recognized when we expect to perform our contractual obligations, and our customers are expected to satisfy their obligations under the contract.

Management periodically reviews the estimates of progress towards completion and project costs. These estimates are determined based on engineering estimates and past experience, by personnel having the appropriate authority and expertise to make reasonable estimates of the related costs. Such engineering estimates are reviewed periodically for each specific contract by professional personnel from various disciplines within the organization. These estimates take into consideration the probability of achievement of certain milestones, as well as other factors that might impact the contract's completion.

A number of internal and external factors affect our cost estimates, including labor rates, estimated future prices of materials, revised estimates of uncompleted work, efficiency variances, linkage to indices and exchange rates, customer specifications and testing requirement changes. If any of the above factors were to change, or if different assumptions were used in estimating project cost and measuring progress towards completion, it is likely that materially different amounts would be reported in our consolidated financial statements.

In certain circumstances, sales under short-term fixed-price production type contracts or sale of products are accounted for in accordance with the Securities and Exchange Commission's Staff Accounting Bulletin (SAB) No. 104, "Revenue Recognition in Financial Statements" (SAB 104), and recognized when all the following criteria are met: persuasive evidence of an arrangement exists, delivery has occurred, the seller's price to the buyer is fixed or determinable, no further obligation exists and collectability is reasonably assured.

In cases where the contract involves the delivery of products and performance of services, or other obligations, we follow the guidelines specified in ASC 605-25, "Multiple-Element Arrangements", in order to allocate the contract consideration between the identified different elements.

Service revenues include contracts primarily for the provision of supplies or services other than associated with design, development or manufacturing and production activities. It may be a stand-alone service contract or a service element, which was separated from the design, development or production contract according to the criteria established in ASC 605-25. Our service contracts primarily include operation and maintenance contracts, outsourcing-type arrangements, return and repair contracts, training, installation service, etc. Revenue from services were less than 10% of consolidated revenues in each of the fiscal years 2008, 2009 and 2010.

Business Combinations and Purchase Price Allocation

In accordance with ASC 805 "Business Combinations", we allocate the purchase price of acquired companies to the tangible and intangible assets acquired and liabilities assumed, as well as to IPR&D and contingent consideration, and non-controlling interest, based on their estimated fair values. Such valuations require management to make significant estimates and assumptions, especially with respect to intangible assets.

We engage third-party appraisal firms to assist management in determining the fair values of certain assets acquired and liabilities assumed. Estimating the fair value of certain assets acquired and liabilities assumed requires judgment and often involves the use of significant estimates and assumptions, mainly with respect to intangible assets. Management makes estimates of fair value based upon market participants' assumptions believed to be reasonable. These estimates are based on historical experience and information obtained from the management of the acquired

companies, and although they are deemed to be consistent with market participants' highest and best use of the assets in the principal or most advantageous market, they are inherently uncertain. While there are a number of different methods for estimating the value of intangible assets acquired, the primary method used is the discounted cash flow approach. Some of the more significant estimates and assumptions inherent in the discounted cash flow approach include projected future cash flows, including their timing, a discount rate reflecting the risk inherent in the future cash flows and a terminal growth rate. We also estimate the expected useful lives of the intangible assets, which requires judgment and can impact our results of operations. Unanticipated events and circumstances may occur that may affect the accuracy or validity of such assumptions, estimates or actual results.

To the extent intangible assets are assigned longer useful lives, there may be less amortization expense recorded in a given period. Because we operate in industries which are extremely competitive, the value of our intangible assets and their respective useful lives are exposed to future adverse changes, which can result in an impairment charge to our results of operations.

Impairment of Long-Lived Assets and Goodwill

Our long-lived assets and identifiable intangible assets are reviewed for impairment in accordance with ASC 360-10-35 "Property, Plant and Equipment Subsequent Measurement" whenever events or changes in circumstances indicate that the carrying amount of an asset may not be recoverable. Recoverability of assets to be held and used is measured by a comparison of the carrying amount of an asset to the future undiscounted cash flows expected to be generated by the asset. If an asset is determined to be impaired, the impairment to be recognized is measured by the amount by which the carrying amount of the asset exceeds its fair value. As of January 1, 2009, fair value of non-financial assets is determined based on market participant assumptions. For each of the years ended December 31, 2008, 2009 and 2010, no material impairment was identified.

Goodwill represents the excess of the cost of acquired businesses over the fair values of the assets acquired and net of liabilities assumed. Goodwill is not amortized, but is instead tested for impairment at least annually (or more frequently if impairment indicators arise).

We review goodwill for impairment on an annual basis and whenever events or changes in circumstances indicate the carrying value of goodwill may not be recoverable. Such events or circumstances could include significant changes in the business climate of our industry, operating performance indicators, competition or sale or disposal of a portion of a reporting unit. The assessment is performed at the reporting unit level. Our annual testing date for all reporting units is December 31.

Performing the goodwill impairment test requires judgment, including how we define reporting units and determine their fair value. We consider a component of our business to be a reporting unit if it constitutes a business for which discrete financial information is available and management regularly reviews the operating results of that component. We estimate the fair value of each reporting unit using a discounted cash flow methodology that requires significant judgment. Forecasts of future cash flows are based on our best estimate of future sales and operating costs, based primarily on existing backlog, expected future contracts, contracts with suppliers, labor agreements and general market conditions. We base cash flow projections for each reporting unit using a five-year forecast of cash flows and a terminal value based on the Perpetuity Growth Model. The five-year forecast and related assumptions were derived from the most recent annual financial forecast for which the planning process commenced in our fourth quarter. The discount rate applied to our forecasts of future cash flows is based on our estimated weighted average cost of capital and includes factors such as the risk-free rate of return and the return an outside investor would expect to earn based on the overall level of inherent risk. The determination of expected returns includes consideration of the beta (a measure of risk) of traded securities of comparable companies. Changes in these estimates and assumptions could materially affect the determination of fair value and/or goodwill impairment for each reporting unit.

We evaluate goodwill for impairment by comparing the estimated fair value of a reporting unit to its carrying value, including goodwill. If the carrying value exceeds the estimated fair value, we measure impairment by comparing the derived fair value of goodwill to its carrying value, and any impairment determined is recorded in the current period.

For each of the three years in the period ended December 31, 2010, no material impairment was identified.

Other-Than-Temporary Decline in Value of Investments in Investee

Management evaluates investments in affiliates and other companies for evidence of other-than-temporary declines in value. When relevant factors indicate a decline in value that is other-than-temporary we recognize an impairment loss for the decline in value. We use our judgment in determining whether an other-than-temporary decline in the value of an investment has been sustained. Such evaluation is dependent on the specific facts and circumstances. Accordingly, management evaluates financial information (e.g. budgets, business plans, financial statements, etc.) in determining whether an other-than-temporary decline in value exists. Factors indicative of an other-than-temporary decline include recurring operating losses, credit defaults and subsequent rounds of financings at an amount below the cost basis of the investment. This list is not all-inclusive, and management weighs many quantitative and qualitative factors in determining if an other-than-temporary decline in value of an investment has occurred.

During 2010, an impairment loss was recorded in the amount of \$0.7 million relating to our investment in ICI (See Item 18. Financial Statements – Note 11(D).) During 2009, an impairment loss was recognized in the amount of \$0.7 million relating to our investment in Chip PC Ltd. (Chip PC). (See Item 18. Financial Statements – Note 6(B)(5).) During 2008, impairment losses of \$10.5 million related to our investment in Sandel Avionics Inc. (Sandel) and \$0.8 million related to our investment in Chip PC were recognized. (See Item 18. Financial Statements.)

Other-Than-Temporary Impairment of Debt Securities

In 2009, we adopted a new guidance that changed the impairment and presentation model for our available for sale debt securities. Under the amended impairment model, an other-than-temporary impairment (OTTI) loss is recognized in earnings if the entity has the intent to sell the debt security, or if it is more likely than not that it will be required to sell the debt security before recovery of its amortized cost basis. However, if an entity does not expect to sell a debt security, it still needs to evaluate expected cash flows to be received and determine if a credit loss exists. In the event of a credit loss, only the amount of impairment associated with the credit loss is recognized currently in earnings. Amounts relating to factors other than credit losses are recorded in other comprehensive income.

Upon adoption of the new guidance at the beginning of 2009, we reclassified a non-credit related amount of \$7.1 million net of tax for OTTI losses recognized in earnings prior to January 1, 2009, as a cumulative effect adjustment that increased retained earnings and decreased other comprehensive income (OCI) at January 1, 2009. As of December 31, 2010, we evaluated debt securities classified as available for sale for OTTI and the existence of credit losses. As of December 31, 2010, we evaluated our auction rate securities (ARS), and as a result an unrealized loss of \$0.2 million was recorded in 2010 and was included in OCI.

Some of our marketable securities at December 31, 2010, included investments in ARS, which are private placement securities with long-term nominal maturities for which the interest rates are reset through a “dutch” auction each month. Historically, the monthly auctions have provided a liquid market for these securities. Our ARS holdings represent interests in collateralized debt obligations supported by pools of residential and commercial mortgages or credit cards, insurance securitizations and other structured credits, including corporate bonds. Some of the underlying collateral for our ARS holdings consists of sub-prime mortgages. For securities that we intend to sell or it is more likely than not that we will be required to sell the securities before recovery, the entire difference between amortized cost and fair value is recognized in earnings. For those securities we do not intend to sell and it is not more likely than not that we will be required to sell, we used a discounted cash flow analysis (supported by third party valuation) to determine the portion of the impairment that relates to the credit loss. The inputs on the future performance of the underlying assets used in the cash flow models include prepayments, defaults and loss severity assumptions. (See below “Liquidity and Capital Resources – Auction Rate Securities”.)

Prior to January 1, 2009, we reviewed various factors in determining whether we should recognize an impairment charge for our short-term interest-bearing investments, including our intent and ability to hold the investment for a period of time sufficient to allow for any anticipated recovery in market value, the length of time and extent to which the fair value has been less than our cost basis, the credit ratings of the securities and the financial condition and near-term prospects of the issuers. The OTTI on our short-term interest-bearing investments was immaterial during each of fiscal years 2008, 2009 and 2010.

In addition, in 2010 we had investments in other debt securities, composed primarily of government bonds. We have conservative investment policy guidelines and, consistent with these guidelines, in prior years we also purchased only AA and above rated investments. Our interest-bearing investments are stated at fair value and are classified as Level 1 investments, since they have a quoted market price in an active market. For those securities no other than temporary impairment was identified.

Useful Lives of Long-Lived Assets

Identifiable intangible assets and property, plant and equipment are amortized over their estimated useful lives. Determining the useful lives of such assets involves the use of estimates and judgments. In determining the useful lives we take into account various factors such as the expected use of the assets, effects of obsolescence, including technological developments, competition, demand, and changes in business, acquisitions and other economic factors. If we estimate changes and the useful lives of such assets increase or decrease, it will affect our results of operations. (See above “Impairment of Long-Lived Assets and Goodwill” for further discussion of the effects of changes in useful lives.)

Taxes on Income

We record income taxes using the asset and liability approach, whereby deferred tax assets and liability account balances are determined based on differences between financial reporting and tax bases of assets and liabilities and of operating losses and credit carry forwards, and are measured using the enacted tax rates and laws that will be in effect when the differences are expected to reverse. We record a valuation allowance, if necessary, to reduce deferred tax assets to amounts that are more likely than not to be realized. We have considered future taxable income on a jurisdiction by jurisdiction basis, prudent and feasible tax planning strategies and other available evidence in determining the need for a valuation allowance. In the event we were to determine that we would be able to realize these deferred income tax assets in the future, we would adjust the valuation allowance, which would reduce the provision for income taxes.

We establish reserves for tax-related uncertainties based on estimates of whether, and the extent to which, additional taxes will be due. These reserves are established when we believe that certain positions might be challenged despite our belief that our tax return positions are in accordance with applicable tax laws. As part of the determination of our tax liability, management exercises considerable judgment in evaluating tax positions taken by us in determining the income tax provision and establishes reserves for tax contingencies in accordance with ASC 740 guidelines. We adjust these reserves in light of changing facts and circumstances, such as the closing of a tax audit, new tax legislation or the change of an estimate based on new information. To the extent that the final tax outcome of these matters is different from the amounts recorded, such differences will affect the provision for income taxes in the period in which such determination is made. The provision for income taxes includes the effect of reserve provisions and changes to reserves that are considered appropriate, as well as the related net interest and penalties.

Management’s judgment is required in determining our provision for income taxes in each of the jurisdictions in which we operate. The provision for income tax is calculated based on our assumptions as to our entitlement to various benefits under the applicable tax laws in the jurisdictions in which we operate. The entitlement to such benefits depends upon our compliance with the terms and conditions set out in these laws. Although we believe that our estimates are reasonable and that we have considered future taxable income and ongoing prudent and feasible tax strategies in estimating our tax outcome, there is no assurance that the final tax outcome will not be different than those which are reflected in our historical income tax provisions and accruals. Such differences could have a material effect on our income tax provision, net income and cash balances in the period in which such determination is made.

Stock-Based Compensation Expense

We apply ASC 718 “Compensation – Stock Based Compensation” (ASC 718), which requires the measurement and recognition of compensation expense for all share-based payment awards made to our employees and directors including employee stock options based on estimated fair values. Stock-based compensation expense in 2010 was \$5.2 million and in each of 2009 and 2008 was \$5.1 million. (See Item 18. Financial Statements – Notes 2(AA) and 21 for additional information.)

Under ASC 718, we estimate the value of equity employee stock options on the date of grant using a lattice-based option valuation model. The determination of fair value of stock options awards on the date of grant is affected by several factors including our stock price, our stock price volatility, risk-free interest rate, expected dividends and employee stock option exercise behaviors. If such factors change and we employ different assumptions for future grants, our compensation expense may differ significantly from what we have recorded in the current period.

In addition, our compensation expense is affected by our estimate of the number of awards that will ultimately vest. In the future, if the number of equity awards that are forfeited by employees are lower than expected, the expenses recognized in such future periods will be higher. (See Item 18. Financial Statements – Notes 2(AA) and 21 for further description of our assumptions used for calculation of stock-based compensation expense.)

Governmental Policies

Governmental policies and regulations applicable to defense contractors, such as cost accounting and audit, export control, procurement solicitation and anti-bribery rules and regulations, could have a material impact on our operations. (See Item 3. Risk Factors – General Risk Related to Our Business and Market and Item 4. Information on the Company – Governmental Regulation.) According to Section 404 of the U.S. Sarbanes-Oxley Act of 2002, we are required to include in our annual report on Form 20-F an assessment, as of the end of the fiscal year, of the effectiveness of our internal controls over financial reporting. (See Item 15. Controls and Procedures – Management’s Annual Report on Internal Control Over Financial Reporting.)

Recent Accounting Pronouncements

See Item 18. Financial Statements – Notes 2(B) and (AD).

Long-Term Arrangements and Commitments

Government Funding of Development. Elbit Systems and certain Israeli subsidiaries partially finance our research and development expenditures under programs sponsored by the Government of Israel Office of the Chief Scientist (OCS) for the support of research and development activities conducted in Israel. At the time the funds are received, successful development of the funded projects is not assured. In exchange for the funds, Elbit Systems and the subsidiaries pay 2% – 5% of total sales of the products developed under these programs. The obligation to pay these royalties is contingent on actual sales of the products. Elbit Systems and some of our subsidiaries may also be obligated to pay certain amounts to the IMOD and others on certain sales including sales resulting from the development of some of the technologies developed with such respective entity’s funds. (See Item 4. Information on the Company – Conditions in Israel – Chief Scientist (OCS) and Investment Center Funding.)

Lease Commitments. The future minimum lease commitments of the Company under various non-cancelable operating lease agreements for property, motor vehicles and office equipment as of December 31, 2010 are as follows: \$35 million for 2011, \$25 million for 2012, \$16 million for 2013, \$11 million for 2014, \$5 million for 2015 and \$8 million for 2016 and thereafter. (See below “Contractual Obligations”.)

Bank Covenants. In connection with bank credits and loans, including performance guarantees issued by banks and bank guarantees in order to secure certain advances from customers, Elbit Systems and certain subsidiaries are obligated to meet certain financial covenants. (See below – “Liquidity and Capital Resources – Financial Resources.”) Such covenants include requirements for shareholders’ equity, current ratio, operating profit margin, tangible net worth, EBITDA, interest coverage ratio and total leverage. (See Item 18. Financial Statements – Note 20(F).) As of December 31, 2010, Elbit Systems and our subsidiaries were in compliance with all covenants.

Bank Guarantees. As of December 31, 2010 and 2009, guarantees in the aggregate amount of approximately \$967 million and \$861 million, respectively, were issued by banks on behalf of several Company entities primarily in order to secure certain advances from customers and performance bonds.

Purchase Commitments. As of December 31, 2010 and 2009, we had purchase commitments of approximately \$1,046 and \$876 million, respectively. These purchase orders and subcontracts are typically in standard formats proposed by us. These subcontracts and purchase orders also reflect provisions from the applicable prime contract that apply to subcontractors and vendors. The terms typically included in these purchase orders and subcontracts are consistent with Uniform Commercial Code provisions in the United States for sales of goods, as well as with specific terms requested by our customers in international contracts. These terms include our right to terminate the purchase order or subcontract in the event of the vendor’s or subcontractor’s default, as well as our right to terminate the order or

subcontract for our convenience (or if our prime contractor has so terminated the prime contract). Such purchase orders and subcontracts typically are not subject to variable price provisions.

Acquisitions During 2010

See Item 4. Information on the Company – Recent Acquisitions. See also, Item 18. Financial Statements – Note 1(D).

Backlog of Orders

Our backlog includes firm commitments received from customers for systems, products and projects that have yet to be completed. Our policy is to include orders in our backlog only when specific conditions are met. Examples of these conditions may include, among others, receipt of a letter of commitment, program funding, advances, letters of credit, guarantees and/or other commitments from customers. As a result, from time to time we could have unrecorded orders in excess of the level of backlog.

We reduce backlog when revenues for a specific contract are recognized. We reduce backlog as delivery or acceptance occurs or when contract milestones or engineering progress under the long-term contracts are recognized as achieved. In some cases we reduce backlog when costs are incurred. In the unusual event of a contract cancellation, we would also be required to reduce our backlog accordingly. The method of backlog recognition used may differ depending on the particular contract. Orders in currencies other than U.S. dollars are translated periodically into U.S. dollars and recorded accordingly.

Our backlog of orders as of December 31, 2010 was \$5,446 million, of which 74% was for orders outside Israel. Our backlog as of December 31, 2009 was \$5,044 million, of which 65% was for orders outside Israel. Approximately 72% of our backlog as of December 31, 2010 is scheduled to be performed during 2011 and 2012. The majority of the 38% balance is scheduled to be performed in 2013 and 2014. Backlog information and any comparison of backlog as of different dates may not necessarily represent an indication of future sales.

Trends

Trends in the defense electronics and homeland security markets in which we operate have been impacted by the nature of recent conflicts and terrorism activities throughout the world, increasing the focus of defense forces on low intensity conflicts and homeland security.

In the defense electronics market, there is an increasing demand for products and systems in the areas of C4ISR and unmanned vehicles. Accordingly, while we continue to perform platform upgrades, in recent years more emphasis is being placed on C4ISR, including information systems, intelligence gathering, situational awareness, precision guidance, all weather and day/night operations, border and perimeter security, UAS, other unmanned vehicles, training and simulation, space and satellite based defense capabilities and homeland security systems. We believe that our core technologies and abilities will enable us to take advantage of many of these emerging trends, as well as to continue to participate in the “Current Force” legacy operations of our customers.

In recent years consolidation in the defense industry has affected competition. This consolidation has decreased the number but increased the relative size and resources of our competitors. We adapt to evolving market conditions by adjusting our business strategy. Our business strategy also anticipates increased competition in defense markets due to declining defense budgets in certain countries. As a result of recent worldwide financial developments, current indications are that overall defense spending may not increase in the next few years. However, we believe in our ability to compete on the basis of our systems development, technological expertise, combat-proven performance and policy of offering customers overall solutions to technological, operational and financial needs and at the same time enhancing the industrial capabilities in certain of our customers’ countries.

Our future success is dependent on our ability to meet our customers' expectations and anticipate emerging customer needs. We must continue to successfully perform on existing programs, as past performance is an important selection criteria for new competitive awards. We also must anticipate customer needs so as to be able to develop working prototypes in advance of program solicitations. Such working prototypes are becoming an increasingly standard part of our competitive environment. This requires us to anticipate future technological and operational trends in our marketplace and efficiently engage in relevant research and development efforts.

Summary of Operating Results

The following table sets forth our consolidated statements of operations for each of the three years ended December 31, 2010.

	Year ended December 31,					
	2010		2009		2008	
	\$	%	\$	%	\$	%
(in thousands of U.S. dollars except per share data)

2010 Compared to 2009

Revenues

Our sales are primarily to governmental entities and prime contractors under government defense programs. Accordingly, the level of our revenues is subject to governmental budgetary constraints.

The following table sets forth our revenue distribution by areas of operation:

	Year ended			
	December 31, 2010		December 31, 2009	
	\$ millions	%	\$ millions	%
Airborne systems	791.1	29.6	693.2	24.5
Land systems	363.2	13.6	449.7	15.9
C4ISR systems	1,019.1	38.2	1,168.8	41.3
Electro-optic systems	368.8	13.8	406.4	14.3
Other (mainly non-defense engineering and production services)	127.9	4.8	114.3	4.0
Total	2,670.1	100.0	2,832.4	100.0

52

Our consolidated revenues decreased by 5.7% from \$2,832.4 million in 2009 to \$2,670.1 in 2010.

The decrease in the Company's revenues was due mainly to decreases in sales in the land systems and the C4ISR systems areas of operations. The decrease in revenues in the land systems activities was mainly a result of a lower level of revenues in Europe, including a decrease in the level of revenues due to the winding-up of the M-60 project in Turkey, as well as a decrease in the revenues for the Bradley project in the United States. The decrease in the revenues for C4ISR systems was mainly in Europe, as a result of a decreased level of revenues in the Watchkeeper project.

The following table sets forth our distribution of revenues by geographical regions:

	Year ended			
	December 31, 2010		December 31, 2009	
	\$ millions	%	\$ millions	%
Israel	651.0	24.4	627.3	22.1
United States	844.0	31.6	813.4	28.7
Europe	541.7	20.3	728.2	25.7
Other Countries	633.4	23.7	663.5	23.5
Total	2,670.1	100.0	2,832.4	100.0

The changes in revenues by geographic distribution were influenced by a reduced level of revenues in Europe.

Cost of Revenues and Gross Profit

Cost of revenues in 2010 was \$1,872.3 million (with a gross profit margin of 29.9%), as compared to \$1,983 million (with a gross profit margin of 30%) in 2009.

The decrease in cost of goods sold was mainly a result of the decrease in revenues. The expenses include a write-off of inventories in the amount of approximately \$13 million related to the acquisitions of Soltam and ITL. As a result of the acquisitions, the amortization expense of intangible assets increased. The increased expenses were partly offset by improvements in other subsidiaries of the Company.

Cost of revenues also includes provisions for warranties and expected losses. The provisions for warranty increased by approximately \$38 million, of which \$19 million was related to subsidiaries acquired during the year, and the remainder of the increase was a result of the mix of programs with various warranty periods.

Our gross profit represents the aggregate results of our activities and projects and is based on the mix of programs in which we are engaged during the reported period. Gross profit for the year ended December 31, 2010 decreased by 6.0% to \$797.9 million (29.9% of revenues), as compared with gross profit of \$849.5 million (30.0% of revenues) in the year ended December 31, 2009. The decrease in the amount of gross profit in 2010 resulted primarily from the reduction in revenues.

Research and Development (R&D)

We continually invest in R&D in order to maintain and further advance our technologies, in accordance with our long-term plans, based on our estimate of future market needs. Our R&D costs, net of participation grants, include costs incurred for independent research and development and bid and proposal (B&P) efforts and are expensed as incurred.

Gross R&D expenses in 2010 totaled \$268.6 million (10.0% of revenues) as compared with \$245.8 million (8.7% of revenues) in 2009.

Net R&D expenses (after deduction of third party participation) in 2010 totaled \$234.1 million (8.8% of revenues), as compared to \$216.8 million (7.7% of revenues) in 2009.

The increased rate of R&D spending in 2010 was primarily a result of the accelerated development of programs related to technology and the adaptation of products, as well increased engineering activities to support marketing efforts worldwide.

Marketing and Selling Expenses

We are active in developing new markets and pursue at any given time various business opportunities according to our plans.

Marketing and selling expenses in 2010 were \$229.9 million (8.6% of revenues), as compared to \$251 million (8.9% of revenues) in 2009.

General and Administration (G&A) Expenses

G&A expenses in 2010 were \$131.2 million (4.9% of revenues), as compared to \$119.3 million (4.2% of revenues) in 2009.

The increase in G&A expenses in 2010 compared to 2009 was due to higher expenses related to acquisition activities as well as the expenses of the newly acquired subsidiaries.

Other operational income for the year ended December 31, 2010 amounted to \$4.8 million. The amount reflects a net gain of \$4.8 million in the second quarter of 2010, related to the revaluation of the previously held Azimuth shares at the acquisition date, due to its accounting treatment as a business combination achieved in stages.

Operating Income

Our operating income in 2010 was \$207.4 million (7.8% of revenues), as compared to \$262.5 million (9.3% of revenues) in 2009. The change in the amount of operating income was a result of lower revenues.

Financial Expense (Net)

Net financing expenses in 2010 were \$21.3 million, as compared to \$15.6 million in 2009.

The higher level of financial expenses in 2010 was mainly due to higher expenses related to the Series A Notes that the Company issued during the second quarter of 2010, as well as to the revaluation of the NIS against the U.S. dollar.

Other Income (Net)

Other income, net in 2010 was a \$13.3 million gain, as compared to a gain of \$0.4 in 2009. The higher level of other income in 2010 was mainly a result of income from the sale of Mediguide shares in the first quarter of 2010.

Taxes on Income

Our tax rate represents a weighted average of the tax rates to which our various entities are subject. The change in the effective tax rate is attributable mainly to the mix of the tax rates in the various tax jurisdictions in which our entities generating the taxable income operate.

Provision for taxes in 2010 was \$24.0 million (effective tax rate of 12.1%) as compared to a provision for taxes of \$38.1 million (effective tax rate of 15.4%) in 2009. Taxes on income in 2010 included an amount of approximately \$10 million related to the first recognition of deferred tax assets for prior years' losses in one of our subsidiaries. The change in the effective tax rate was also affected by the mix of the tax rates in the various jurisdictions in which the Company's entities generate taxable income. We continue to enjoy a lower effective Israeli tax rate and the benefits of an "Approved and Privileged Enterprise", which resulted in savings of \$20.5 million and \$31.7 million, respectively, in

2010 and 2009.

Company's Share in Earnings of Affiliated Entities

The entities, in which we hold 50% or less in shares or voting rights (affiliates), and are therefore not consolidated in our financial statements, operate in complementary areas to our core business activities, including electro-optics and airborne systems.

In 2010, we had income of \$19.3 million from our share in earnings of affiliates, the same amount as in 2009.

54

Net Income and Earnings Per Share (EPS)

Net income in 2010 was \$183.5 million (6.9% of revenues), as compared to net income of \$214.9 million (7.6% of revenues) in 2009. The decrease in net income was due mainly to lower revenue levels. Diluted EPS was \$4.25 in 2010, as compared to \$5.00 in 2009.

The number of shares used for computation of diluted EPS in the year ended December 31, 2010 was 43,217,000 shares, as compared to 42,983,000 shares in the year ended December 31, 2009.

2009 Compared to 2008

Revenues

The following table sets forth our revenue distribution by areas of operation:

	Year ended			
	December 31, 2009		December 31, 2008	
	\$ millions	%	\$ millions	%
Airborne systems	693.2	24.5	634.7	24.1
Land systems	449.7	15.9	699.5	26.5
C4ISR systems	1,168.8	41.3	844.5	32.0
Electro-optic systems	406.4	14.3	336.7	12.7
Other (mainly non-defense engineering and production services)	114.3	4.0	122.9	4.7
Total	2,832.4	100.0	2,638.3	100.0

Our consolidated revenues increased by 7.4%, from \$2,638.3 million in 2008 to \$2,832.4 million in 2009.

The changes in revenue distribution by areas of operation in 2009 as compared with 2008 were influenced mainly by decreased revenues of our land systems area of operations regarding short turn-around programs mainly for the U.S. government, as well as increased sales in C4ISR systems such as for the DAP program.

The following table sets forth our distribution of revenues by geographical regions:

	Year ended			
	December 31, 2009		December 31, 2008	
	\$ millions	%	\$ millions	%
Israel	627.3	22.1	474.4	18.0
United States	813.4	28.7	907.1	34.4
Europe	728.2	25.7	653.1	24.7
Other Countries	663.5	23.5	603.7	22.9
Total	2,832.4	100.0	2,638.3	100.0

The changes in revenues by geographic distribution were influenced by an increase in revenues in Israel related mainly to the DAP project and decreased revenue in short turn-around programs in our land area of operations mainly

in the United States.

Cost of Revenues and Gross Profit

Cost of revenues in 2009 was \$1,983.0 million (with a gross profit margin of 30%), as compared to \$1,870.8 million (with a gross profit margin of 29.1%) in 2008. The improved gross profit margin in 2009 was a result mainly of the mix of our programs, the Company's focus on improving operating efficiencies and the strengthening of the U.S. dollar against the NIS.

Cost of revenues also includes provisions for costs, including warranties and expected losses. The provision for losses in 2009 increased by approximately \$37 million, which constituted 1.3% of revenues, over 2008. The increase in the provision for losses on long-term contracts was due primarily to several fixed-priced projects in which the estimated cost exceeded expected revenues. The provisions for warranty increased by approximately \$34 million, as a result of the mix of programs with various warranty periods.

Research and Development (R&D)

Our R&D costs, net of participation grants, include costs incurred for independent research and development and bid and proposal (B&P) efforts and are expensed as incurred.

Gross R&D expenses in 2009 totaled \$245.8 million (8.7% of revenues), as compared with \$217.2 million (8.2% of revenues) in 2008.

Net R&D expenses (after deduction of third party participation) in 2009 totaled \$216.8 million (7.7% of revenues), as compared to \$185 million (7.0% of revenues) in 2008.

The increased rate of R&D spending in 2009 was primarily a result of accelerated development programs, related to technology and products in all areas of our operations, as well as increased engineering activities to support marketing efforts worldwide. This included increased requirements to develop new prototypes, development of improvements to existing demonstration equipment as well as the development of new demonstration equipment used for in-country demonstrations to potential customers.

Marketing and Selling Expenses

Marketing and selling expenses in 2009 were \$251 million (8.9% of revenues), as compared to \$198.3 million (7.5% of revenues) in 2008. The increase in 2009 was mainly due to enhanced marketing efforts in existing markets, such as the United States and Brazil, as well as development of markets relatively new to us such as Australia and certain European countries.

General and Administration (G&A) Expenses

G&A expenses in 2009 were \$119.3 million (4.2% of revenues), as compared to \$134.2 million (5.1% of revenues) in 2008.

The decrease in total dollar amount in G&A expenses in 2009 compared to 2008 was due in part to costs incurred in 2008 related to the settlement agreement relating to the lawsuit between IS&S and Kollsman. In general, the Company reduced its G&A expenses due to efficient management of expenses as well as the strengthening of the U.S. dollar against NIS in 2009 compared to 2008.

Operating Income

Our operating income in 2009 was \$262.5 million (9.3% of revenues), as compared to \$249 million (9.4% of revenues) in 2008. The change in the operating profit was a result of improved gross margins, which were partially offset by increased marketing and R&D expenses as described above.

Financial Expense (Net)

Net financing expenses in 2009 were \$15.6 million, as compared to \$36.8 million in 2008.

The net finance expenses in 2008 included the impact of the other-than-temporary decline in the value of our ARS in the amount of \$18.7 million (see "Liquidity and Capital Resources – Auction Rate Securities" below). Our net financing expense in 2009 was also positively impacted by lower interest rates in the market.

Other Income (Net)

Other income net in 2009 was a \$0.4 million gain, as compared to a gain of \$94.3 in 2008. The higher level of other income in 2008 was mainly as a result of the capital gain related to the sale of Mediguide shares.

Taxes on Income

Provision for taxes in 2009 was \$38.1 million (effective tax rate of 15.4%), as compared to a provision for taxes of \$54.4 million (effective tax rate of 17.7%) in 2008. The change in the effective tax rate is attributable mainly to lower tax rates applicable to our subsidiaries in Israel. We continued to enjoy a lower effective Israeli tax rate and the benefits of an “Approved and Privileged Enterprise”, which resulted in savings of \$31.7 million and \$44.0 million, respectively, in 2009 and 2008.

Company's Share in Earnings of Affiliated Entities

In 2009, we had income of \$19.3 million from our share in earnings of affiliates, as compared to \$14.4 million in 2008. The increase in 2009 was due to higher profits of some of our affiliated entities based upon increased revenues and improved operating efficiencies.

Net Income and Earnings Per Share (EPS)

Net income in 2009 was \$214.9 million (7.6% of revenues), as compared to reported net income of \$204.2 million (7.7% of revenues) in 2008. Diluted EPS was \$5.00 in 2009, as compared to \$4.78 in 2008. Net income in 2008 included \$74 million (\$1.73 diluted net earnings per share) from the sale of Mediguide shares.

The number of shares used for computation of diluted EPS in the year ended December 31, 2009 was 42,983,000 shares, as compared to 42,758,000 shares in the year ended December 31, 2008.

Conditions in Israel

For information on how our operating results may be affected by conditions in Israel see Item 3. Key Information – Risks Factors – Risks Related to Our Israeli Operations; and Item 4. Information on the Company – Conditions in Israel.

Liquidity and Capital Resources

In recent years, we have financed our operations primarily through cash generated from operations and from long-term bank loans and, in 2010, from the proceeds of the issuance of long-term notes. (See below "Israel Debt Offering.") Generally, we invest our excess cash in instruments that are highly liquid, investment grade securities. At December 31, 2010, we had \$221.7 million of cash and cash equivalents and short-term and long-term investments, as compared to \$293.2 million at December 31, 2009.

Israeli Debt Offering

In June 2010, Elbit Systems completed a public offering in Israel on the TASE of NIS 1.1 billion (approximately \$283 million) Series A Notes (the Series A Notes). The Series A Notes were offered and sold pursuant to a shelf prospectus filed in May 2010 with the Israeli Securities Authority and the TASE. The shelf prospectus allows us, during a period of 24 months following its publication, to raise capital from the public in Israel, from time to time, by issuing notes or warrants that are exercisable into notes subject to the terms of the shelf prospectus and to the publication of a supplemental shelf offering report describing the terms of the securities offered and the details of the specific offering. In May 2010, Midroog Ltd., an Israeli rating agency, announced that it assigned its "Aa1" rating (local scale) to unsecured notes to be issued by Elbit Systems, which include the Series A Notes.

We account for the outstanding principal amount of our Series A Notes as long-term liability, in accordance with ASC 470, "Debt", with current maturities classified as short-term liabilities. Debt issuance costs are capitalized and reported as deferred financing costs, which are amortized over the life of the Series A Notes using the effective interest rate method. As of December 31, 2010, the value of the Series A Notes was \$310 million, less \$33.6 million in current maturities and a fair value adjustment of \$4 million from cross-currency interest rate swaps.

The Series A Notes are payable in ten equal annual installments on June 30 of each of the years 2011 through 2020. The Series A Notes bear a fixed interest rate of 4.84% per annum, payable on June 30 and December 30 of each of the years 2010 through 2020 (the first interest payment was made on December 30, 2010, and the last interest payment will be made on June 30, 2020). Debt issuance costs were approximately \$2,529,000, of which \$2,163,000 was

allocated to the Series A Notes discount, and \$366,000 was allocated to deferred financing costs and are amortized as financial expense over the term of the Series A Notes due in 2020.

The Series A Notes (principal and interest) are in NIS and are not linked to any currency or index. The Series A Notes are unsecured, non-convertible and do not restrict our ability to issue additional notes of any class or distribute dividends in the future. There are no covenants on the Series A Notes.

The Series A Notes are listed for trading on the TASE. However, the Series A Notes are not registered under the U.S. Securities Act of 1933, as amended (the Securities Act), and may not be offered or sold in the United States or to U.S. Persons (as defined in Regulation "S" promulgated under the Securities Act) without registration under the Securities Act or an exemption from the registration requirements of the Securities Act.

We also entered into ten-year cross currency interest rate swap transactions in order to effectively hedge the effect of interest and exchange rate differences resulting from the NIS Series A Notes. Under the cross currency interest rate swaps, we will receive fixed NIS at a rate of 4.84% on NIS 1.1 billion and pay floating six-month USD LIBOR plus an average spread of 1.65% on \$287 million, which reflects the U.S. dollar value of the Series A Notes on the specific dates the transactions were entered. Both the debt and the swap instruments pay semi-annual coupons on June 30 and December 31. The purpose of these transactions was to convert the NIS fixed rate Series A Notes into USD LIBOR (6 months) floating rate obligations. As a result of these agreements, we are currently paying an effective interest rate of six-month LIBOR (0.45% at December 31, 2010) plus an average of 1.65% on the principal amount, as compared to the original 4.84% fixed rate. The above transactions qualify for fair value hedge accounting. (See also Item 11. Quantitative and Qualitative Disclosures about Market Risk.)

Cash Flows

Our operating cash flow is affected by the cumulative cash flow generated from our various projects in the reported periods. Project cash flows are affected by the timing of the receipt of advances and the collection of accounts receivable from customers, as well as the timing of payments made by us in connection with the performance of the project. The receipt of payments usually relates to specific events during the project, while expenses are ongoing. As a result, our cash flow may vary from one period to another. Our policy is to invest our cash surplus mainly in interest bearing deposits, in accordance with our projected needs.

In general, subsidiaries are able to freely transfer cash dividends, loans or advances to Elbit Systems, subject to tax considerations in their applicable jurisdiction and subject to management commitment not to distribute tax exempt earnings. Such tax considerations have not had in the past, and are not anticipated to have, a material impact on our ability to meet our obligations.

2010

Our net cash flow generated from operating activities in 2010 was approximately \$184.9 million, resulting mainly from net income and increases in trade and other payables, which were partially offset, mainly by an increase in short and long-term trade receivables and prepaid expenses, increase in inventories net and a decrease in advances received from customers, which was a result of lower advances received in new projects in 2010.

Net cash flow used in investment activities in 2010 was approximately \$254.4 million, which was used mainly to purchase property, plant and equipment, investments in short-term deposits and acquisitions of subsidiaries and business operations.

Net cash flow provided by financing activities in 2010 was approximately \$79.9 million, resulting mainly from the issuance of Series A Notes, part of which was used for repayment of long-term loans and payment of dividends to shareholders.

2009

Our net cash flow generated from operating activities in 2009 was approximately \$210 million, resulting mainly from net income, a decrease in inventories and increases in trade and other payables, which were partially offset, mainly by

an increase in short and long-term trade receivables and prepaid expenses and a decrease in advances received from customers, which was a result of lower advances received in new projects in 2008.

Net cash flow used in investment activities in 2009 was approximately \$197 million, which was used mainly to purchase property, plant and equipment, investments in short-term deposits and acquisitions of subsidiaries and business operations, which were partly offset by proceeds from sale of the shares of Mediguide.

Net cash flow used in financing activities in 2009 was approximately \$76 million, which was mainly for payment of dividends to shareholders and the purchase of the non-controlling interest in Kinetics, and was partly offset by a net increase in long-term bank loans that we received during the year.

2008

Our net cash flow generated from operating activities in 2008 was approximately \$209.4 million, resulting mainly from net income and increases in trade and other payables, which were partially offset, mainly by an increase in inventories.

Net cash flow used in investment activities in 2008 was approximately \$171.7 million, which was used mainly to purchase property, plant and equipment and make investments in short-term deposits, which were partly offset by proceeds from sale of the shares of Mediguide.

Net cash flow used in financing activities in 2008 was approximately \$195.9 million, which was mainly for repayment of long-term loans and payment of dividends to our shareholders.

Financial Resources

The financial resources available to us include profits, collection of accounts receivable, advances from customers and government of Israel and other third parties' programs such as the OCS and development grants. In addition, we have access to bank credit lines and financing in Israel and abroad based on our capital, assets and activities.

Elbit Systems and some subsidiaries are obligated to meet various financial covenants set forth in our respective loan and credit agreements. Such covenants include requirements such as for shareholders' equity, current ratio, operating profit margin, tangible net worth, EBITDA, interest coverage ratio and total leverage. As of December 31, 2010, each of the companies subject to financial covenants was in compliance with the applicable covenants.

On December 31, 2010, we had total borrowings from banks in the amount of \$316.7 million, including \$292 million in long-term loans, of which most of the loans mature in 2012, and \$962 million in guarantees issued on our behalf by banks, mainly in respect of advance payment and performance guarantees provided in the regular course of business. On December 31, 2010, we had a cash balance amounting to \$151 million. We also have the ability to raise funds on the capital market and through expansion of our credit lines. In 2010, we issued Series A Notes in the net amount of approximately \$283 million. (See above "Israeli Debt Offering.")

As of December 31, 2010, we had working capital of \$381.5 million and a current ratio of 1.3. We believe that our working capital and cash flow from operations will be sufficient to support our current requirements and financial covenants.

We believe that our current cash balances, cash generated from operations, lines of credit and financing arrangements will provide sufficient resources to meet our operational needs for at least the next fiscal year. However, our ability to borrow funds from the banking system may be impacted by the ongoing global financial and liquidity situation. See Item 3. Risk Factors – General Risk Related to Our Business and Market.

(For further information on the level, maturity and terms of our borrowings, see Item 18. Financial Statements – Notes 15 and 16.)

We believe our ability to access external capital resources should be sufficient to satisfy existing short-term and long-term commitments and plans, and also to provide adequate financial flexibility to take advantage of potential

strategic business opportunities should they arise within the next year.

Pensions and Other Post-Retirement Benefits

We account for pensions and other post-employment arrangements in accordance with ASC 715 “Compensation – Retirement Benefits”. Accounting for pensions and other post-retirement benefits involves judgment about uncertain events, including estimated retirement dates, salary levels at retirement, mortality rates, rates of return on plan assets, determination of discount rates for measuring plan obligations, healthcare cost trend rates and rates of utilization of healthcare services by retirees. These assumptions are based on the environment in each country. (For our pension and other post-retirement benefit assumptions at December 31, 2010 and 2009, see Item 18 – Financial Statements – Note 17.)

At December 31, 2010 our termination obligations were \$395 million, of which we had severance funds of \$302 million set aside to satisfy potential obligations.

Auction Rate Securities

As of December 31, 2010, we had approximately \$31.6 million (before cumulative impairment losses of \$28.6 million) of principal invested in ARS. (See above – “General Critical Accounting Policies and Estimates – Other-Than-Temporary Impairment of Debt Securities.”)

With the liquidity issues experienced in credit and capital markets globally, the ARS have experienced multiple failed auctions as the amount of securities submitted for sale has exceeded the amount of purchase orders.

The estimated market value of our ARS holdings at December 31, 2010 and 2009 was \$7.2 and \$7.5 million, respectively, resulting in \$0.2 million in unrealized gain in 2010 that was included in other comprehensive income and \$4.5 million in unrealized gain in 2009 that was included in other comprehensive income.

As a result of the failed auctions, in recent periods our ARS are illiquid until there is a successful auction for them. During 2008, as a result of our management’s intention to realize our ARS in the short-term, observable prices in non-active markets were obtained and an other-than-temporary loss was recorded. The ARS were classified as short-term marketable securities. During 2009, we decided to hold the ARS for a longer period, and as a result we re-classified them as long-term assets and evaluated them accordingly. (See Item 18. Financial Statements – Note 9.)

Material Commitments for Capital Expenditures

We believe that we have adequate sources of funds to meet our material commitments for capital expenditures for the fiscal year ending December 31, 2011 and the subsequent fiscal year. (See above “Financial Resources.”) We believe our anticipated capital expenditures (which include mainly the purchase of equipment, vehicles and buildings) as of December 31, 2010 were at a similar level to those as of December 31, 2009. We plan to pay for such anticipated expenditures using cash from operations. (See also Item 18. Financial Statements – Consolidated Statements of Cash Flows and Note 10.)

Impact of Inflation and Exchange Rates

Functional Currency

Our reporting currency is the U.S. dollar, which is also the functional currency for most of our consolidated operations. A majority of our sales are made outside of Israel in non-Israeli currency, mainly U.S. dollars, as well as a majority of our purchases of materials and components. A significant portion of our expenses, mainly labor costs, are in NIS. Some of our subsidiaries have functional currencies in Euro, GBP and other currencies. Transactions and balances originally denominated in U.S. dollars are presented in their original amounts. Transactions and balances in currencies other than the U.S. dollar are remeasured in U.S. dollars according to the principles set forth in ASC 830 “Foreign Currency Matters”. Exchange gains and losses arising from remeasurement are reflected in financial expenses, net, in the consolidated statements of income.

Market Risks and Variable Interest Rates

Market risks relating to our operations result mainly from changes in interest rates and exchange rates. We use derivative instruments to limit exposure to changes in exchange rates in certain cases. We also typically enter into forward contracts in connection with transactions where long-term contracts have been signed and that are

denominated in currencies other than U.S. dollars or NIS. We also enter from time to time into forward contracts and other hedging instruments related to NIS based on market conditions.

We use financial instruments and derivatives in order to limit our exposure to risks arising from changes in exchange rates. The use of such instruments does not expose us to additional exchange rate risks since the derivatives are held against an asset (for example, excess assets in Euros). Our policy in utilizing these financial instruments is to protect the dollar value of our cash and cash equivalent assets rather than to serve as a source of income.

In the context of our overall treasury policy specific objectives apply to the management of financial risks. These objectives are disclosed under the headings below “NIS/U.S. Dollar Exchange Rates”, “Inflation and Currency Exchange Rates” and “Foreign Currency Derivatives and Hedging”.

On December 31, 2010, our liquid assets were comprised of bank deposits, and short and long-term investments. Our deposits and investments are based on variable interest rates, and their value as of December 31, 2010 was therefore exposed to changes in interest rates. Should interest rates either increase or decrease, such change may affect our results of operations due to changes in the cost of the liabilities and the return on the assets that are based on variable rates. (With respect to our exposure to ARS, see above “Auction Rate Securities.” See also Item 11. Quantitative and Qualitative Disclosure of Market Risk.)

NIS/U.S. Dollar Exchange Rates

We attempt to manage our financial activities in order to reduce material financial losses in U.S. dollars resulting from the impact of inflation and exchange rate fluctuations on our non-U.S. dollar assets and liabilities. Our income and expenses in Israeli currency are translated into U.S. dollars at the prevailing exchange rates as of the date of the transaction. Consequently, we are affected by changes in the NIS/U.S. dollar exchange rates. On December 31, 2009 and 2010, we had exposure due to NIS denominated liabilities of approximately \$8 million and \$48 million, respectively, in excess of NIS denominated assets. These liabilities mostly represent provisions for wages and trade payables. We entered into other derivative instruments to limit our exposure to exchange rate fluctuations, related mainly to payroll expenses incurred in NIS. (See Item 11. Quantitative and Qualitative Disclosure of Market Risks.) The amount of our exposure to the changes in the NIS/U.S. dollar exchange rate may vary from time to time. (See Item 3. Key Information – Risk Factors – Risks Relating to Our Israeli Operations.)

Inflation and Currency Exchange Rates

The U.S. dollar cost of our operations in Israel is influenced by any increase in the rate of inflation in Israel that is not fully offset by the devaluation of the NIS in relation to the U.S. dollar. Unless inflation in Israel is offset by a devaluation of the NIS, such inflation may have a negative effect on the profitability of contracts where Elbit Systems or any of our Israeli subsidiaries receives payment in U.S. dollars, NIS linked to U.S. dollars or other foreign currencies, but incurs expenses in NIS linked to the CPI. Inflation in Israel and currency fluctuations may also have a negative effect on the profitability of fixed-price contracts where we receive payments in NIS.

In the past, our profitability was negatively affected when inflation in Israel (measured by the change in the CPI from the beginning to the end of the calendar year) exceeded the devaluation of the NIS against the U.S. dollar and at the same time we experienced corresponding increases in the U.S. dollar cost of our operations in Israel. For example, in 2008, the inflation rate was approximately 3.8% and the devaluation rate was approximately 1.1%. In 2009, the inflation rate was approximately 3.9% and the NIS strengthened against the U.S. dollar by approximately 0.7%. In 2010, the inflation rate was approximately 2.7% and the NIS strengthened against the U.S. dollar by approximately 6%. There can be no assurance that we will not be materially adversely affected in the future if inflation in Israel exceeds the devaluation of the NIS against the U.S. dollar or if the timing of such devaluation lags behind increases in inflation in Israel.

A devaluation of the NIS in relation to the U.S. dollar also has the effect of decreasing the dollar value of any of our assets that consist of NIS or accounts receivable denominated in NIS, unless such assets or accounts receivable are linked to the U.S. dollar. Such a devaluation also has the effect of reducing the U.S. dollar amount of any of our liabilities that are payable in NIS, unless such payables are linked to the U.S. dollar. On the other hand, any increase in the value of the NIS in relation to the U.S. dollar will have the effect of increasing the U.S. dollar value of any unlinked NIS assets as well as the U.S. dollar amount of any unlinked NIS liabilities and expenses.

Foreign Currency, Derivatives and Hedging

While our functional currency is the U.S. dollar, we also have some non-U.S. dollar or non-U.S. dollar linked exposure to currencies other than NIS. These are mainly non-U.S. dollar customer debts, payments to suppliers and subcontractors, obligations in other currencies, assets or undertakings. Some subcontractors are paid in local currency under prime contracts where we are paid in U.S. dollars. The exposure on these transactions has not been in amounts that are material to us. However, when we view it necessary, due to anticipated uncertainty in the applicable foreign exchange rates, we seek to minimize our foreign currency exposure by entering into hedging arrangements, obtaining periodic payments upon the completion of milestones, obtaining guarantees and security from customers and sharing currency risks with subcontractors.

Most of our future cash flows that will be denominated in currencies other than the NIS and the U.S. dollar were covered as of December 31, 2010 by forward contracts. On December 31, 2010, we had forward contracts for the sale and purchase of Euro, GBP and various other currencies. On December 31, 2010, we had forward contracts for the sale and purchase of such foreign currencies totaling approximately \$447 million (\$257 million in Euros, \$106 million in GBP and the balance of \$85 million in other currencies).

We also use forward exchange hedging contracts and options strategies in order to limit our exposure to exchange rate fluctuation associated with payroll expenses, mainly incurred in NIS. These include forward contracts with notional amount of \$114 million in NIS maturing in 2011. They also include a total of \$12 million in NIS – put and call options, with all of the options having maturities of 12 months or less. (See also Item 11. Quantitative and Qualitative Disclosure of Market Risks.) As of December 31, 2010, an unrealized net gain of approximately \$6.8 million was included in accumulated other comprehensive income. As of December 31, 2010, all of the forward contracts are expected to mature during the years 2011 – 2017.

Regarding the measures taken to reduce the foreign currency exchange rate impact on our Series A Notes see above “Liquidity and Capital Resources – Israeli Debt Offering.”

The table below presents the balance of the derivative instruments held in order to limit the exposure to exchange rate fluctuations as of December 31, 2010 and is presented in millions of U.S. dollar equivalent terms:

Forward	Notional Amount*	Unrealized Gain (Loss)
Buy US\$ and Sell:		
Euro	16,076	(0.9)
GBP	20,475	(0.5)
NIS	114,284	5.4
Other various currencies	30,412	(0.5)

Forward	Notional Amount*	Unrealized Gain (Loss)
Sell US\$ and Buy:		
Euro	240,830	3.6
GBP	85,980	4.2
NIS	--	--
Other various currencies	54,572	(0.3)

Options	Notional Amount*	Unrealized Gain (Loss)
Buy US\$ and Sell:		
options	6,000	0.2
Sell US\$ and Buy:		
NIS	6,000	(0.1)

* Notional amount information is based on the foreign exchange rate at year end.

Contractual Obligations

	Less than 1 year	1-3 years	4-5 years	More than 5 years
	(U.S. dollars in millions)			
1. Long-Term Debt Obligations	10	292	--	--
2. Series A Notes	34	61	61	153
3. Operating Lease Obligations*	35	41	16	8
4. Purchase Obligations*	721	308	17	8
5. Other Long-Term Liabilities Reflected on the Company's Balance Sheet under U.S. GAAP**	--	--	--	--
6. Other Long-Term Liabilities***				
Total	800	702	94	169

*For further description of the Purchase Obligations see above "Long-Term Arrangements and Commitments – Purchase Commitments" and See Item 18. Financial Statements – Note 20(H).

**The obligation amount does not include an amount of \$395 million of pension and employee termination liabilities. See Item 18. Financial Statements – Notes 2 (T) and 17. The obligation amount also does not include an amount of \$47 million of tax reserve related to uncertain tax positions. See Item 18. Financial Statements – Note 18.

*** See below "Off-Balance Sheet Transactions."

Off-Balance Sheet Transactions

Buy-Back

In connection with projects in certain countries, Elbit Systems and some of our subsidiaries have entered and may enter in the future into "buy-back" or "offset" agreements, required by a number of our customers as a condition to our obtaining orders for our products and services. These agreements are customary in our industry and are designed to facilitate economic flow back (buy-back) and/or technology transfer to businesses or government agencies in the applicable country.

These commitments may be satisfied by our placement of direct work or vendor orders for supplies and/or services, transfer of technology, investments or other forms of assistance in the applicable country. The buy-back rules and regulations, as well as the underlying contracts, may differ from one country to another. The ability to fulfill the buy-back obligations may depend, among other things, on the availability of local suppliers with sufficient capability to meet our requirements and which are competitive in cost, quality and schedule. In certain cases, our commitments may also be satisfied through transactions conducted by other parties.

We do not commit to buy-back agreements until orders for our products or services are definitive, but in some cases the orders for our products or services may become effective only after our corresponding buy-back commitments enter into effect. Buy-back programs generally extend at least over the relevant commercial contract period and may provide for penalties in the event we fail to perform in accordance with buy-back requirements. In some cases we provide guarantees in connection with the performance of our buy-back obligations.

Should we be unable to meet such obligations we may be subject to contractual penalties, and our chances of receiving additional business from the applicable customers could be reduced or, in certain cases, eliminated. (See Item 3. Risk Factors – General Risk Related to Our Business and Market.)

At December 31, 2010, we had outstanding buy-back obligations totaling approximately \$784 million that extend through 2020.

Non-GAAP Financial Data

The following non-GAAP financial data is presented to enable investors to have additional information on our business performance as well as a further basis for periodical comparisons and trends relating to our financial results. We believe such data provides useful information to investors by facilitating more meaningful comparisons of our financial results over time. Such non-GAAP information is used by our management to make strategic decisions, forecast future results and evaluate our current performance. However, investors are cautioned that, unlike financial measures prepared in accordance with GAAP, non-GAAP measures may not be comparable with the calculation of similar measures for other companies.

The non-GAAP financial data below includes reconciliation adjustments regarding non-GAAP gross profit, operating income, net income and diluted EPS. In arriving at non-GAAP presentations, companies generally factor out items such as those that have a non-recurring impact on the income statements, various non-cash items, significant effects of retroactive tax legislation and changes in accounting guidance and other items which, in management's judgment, are items that are considered to be outside the review of core operating results. In our non-GAAP presentation below, we made the following adjustments: (1) amortization of purchased intangible assets, (2) significant reorganization, restructuring and other related expenses, (3) impairment of investments, including impairment of ARS, (4) gain from changes in holdings, including revaluation of the previously held shares at the acquisition date when a business combination is achieved in stages (step-up) and (5) the income tax effects of the foregoing.

These non-GAAP measures are not based on any comprehensive set of accounting rules or principles. We believe that non-GAAP measures have limitations in that they do not reflect all of the amounts associated with our results of operations, as determined in accordance with GAAP, and that these measures should only be used to evaluate our results of operations in conjunction with the corresponding GAAP measures. Investors should consider non-GAAP financial measures in addition to, and not as replacements for or superior to, measures of financial performance prepared in accordance with GAAP.

Reconciliation of GAAP (Audited) to
Non-GAAP (Unaudited) Supplemental Financial Data
(U.S. dollars in millions)

	2010	2009	2008
GAAP gross profit	797.9	849.5	767.4
Adjustments:			
Amortization of intangible assets	25.0	22.2	28.9
Reorganization, restructuring and other related expenses(1)	12.8	-	-
Non-GAAP gross profit	835.7	871.7	796.3
Percent of revenues	31.3 %	30.8 %	30.2 %
GAAP operating income	207.4	262.5	249.0
Adjustments:			
Amortization of intangible assets	47.7	44.0	40.1
Reorganization, restructuring and other related expenses(1)	16.4	-	1.0
Impairment of investments(2)	1.3	1.4	-
Gain from changes in holdings(3)	(4.8)	-	-
Non-GAAP operating income	268.0	307.9	290.1
Percent of revenues	10.0 %	10.9 %	11.0 %
GAAP net income attributable to Elbit Systems' shareholders	183.5	214.9	204.2
Adjustments:			
Amortization of intangible assets	47.7	44.0	40.1
Reorganization, restructuring and other related expenses(1)	16.4	-	1.0
Impairment of investments(2)	1.3	1.4	29.2
Gain from changes in holdings(3)	(17.6)	(1.0)	(100.0)

Edgar Filing: ELBIT SYSTEMS LTD - Form 20-F

Related tax benefits	(8.9)	(9.0)	16.8
Non-GAAP net income attributable to Elbit Systems' shareholders	222.4	250.3	191.3
Percent of revenues	8.3 %	8.8 %	7.3 %
Non-GAAP diluted net EPS	5.1	5.8	4.5

- (1) Adjustment of reorganization, restructuring and other related expenses in 2010 were mainly due to write-off of inventories in the amount of approximately \$13 million related to the acquisitions of Soltam and ITL.
- (2) Adjustment of gain from changes in holdings in 2010 and 2009 were due to the impairment of ICI shares and in 2008 were due to impairment of ARS (\$18.7 million) and the impairment of Sandel shares (\$10.5 million).
- (3) Adjustment of gain from changes in holdings includes the income from the sale of Mediguide shares (\$100 million in 2008, \$1 million in 2009 and \$12.6 million in 2010) and a gain of \$4.8 million from a "step-up" in an investment in 2010.

Item 6. Directors, Senior Management and Employees.

Directors and Executive Officers

Board of Directors (Board)

Our directors as of February 28, 2011 are as follows:

Name	Age	Director Since
Michael Federmann (Chairman)	67	2000
Moshe Arad	76	2005
Avraham Asheri	73	2000
Rina Baum	65	2001
David Federmann	36	2007
Yigal Ne'eman	69	2004
Yehoshua Gleitman (External Director)	61	2010
Dov Ninveh	63	2000
Dalia Rabin (External Director)	60	2010

The term of office of each director, other than the External Directors, expires at the annual general shareholders meeting to be held during 2011. The term of office for Yehoshua Gleitman as an External Director expires in March 2013, and the term of office for Dalia Rabin as an External Director expires in November 2013.

Michael Federmann. Michael Federmann has served as chairman of the Board since 2000. He has held managerial positions in the Federmann Group since 1969, and since 2002 he has served as chairman and CEO of Federmann Enterprises Ltd. (FEL). Currently, he also serves as chairman of the board of directors of Dan Hotels Corp. Ltd. (Dan Hotels). Mr. Federmann is chairman of the board of governors of the Hebrew University of Jerusalem (the Hebrew University). He serves as the president of the Israel - Germany Chamber of Industry and Commerce. Mr. Federmann holds a bachelor's degree in economics and political science from the Hebrew University.

Moshe Arad. Moshe Arad served as vice president for external relations of the Hebrew University from 1994 to 2004. He currently serves as the chairman of the board of trustees of The Harry S. Truman Research Institute for the Advancement of Peace of The Hebrew University and is a director of Discount Investment Corporation Ltd. and the Israeli branch of the Mandel Foundation of Cleveland, Ohio. From 1994 to 1999, he was a member of the board of directors of Elbit Ltd. During 1992 and 1993, Mr. Arad served as director general of the Israel Ministry of Communications. From 1990 to 1992, he was a member of the Tel-Aviv law firm of Herzog, Fox, Ne'eman. Mr. Arad served as Israel's ambassador to the United States from 1987 to 1990 and as Israel's ambassador to Mexico from 1983 to 1987. Ambassador Arad holds a bachelor's degree in political science and international relations and an L.L.B. degree from the Hebrew University. Mr. Arad serves on the Audit Committee, the Financial Statements Review Committee and the Compensation Committee of the Board.

Avraham Asheri. Avraham Asheri has served as an economic advisor and a director of several companies since 1998. He currently serves on the boards of directors of Elron Electronic Industries Ltd., Discount Mortgage Bank Ltd., Koor Industries Ltd., Mikronet Ltd. and Radware Ltd. Mr. Asheri was president and chief executive officer of Israel Discount Bank from 1991 until 1998, and executive vice president and member of its management committee from 1983 until 1991. Prior to that, he served for 23 years at the Israel Ministry of Industry and Trade and at the Israel Ministry of Finance, including as director general of the Israel Ministry of Industry and Trade, managing director of

the Israel Investment Center and Trade Commissioner of Israel to the United States. Mr. Asheri holds a bachelor's degree in economics and political science from the Hebrew University. Mr. Asheri serves as chairman of the Audit Committee, chairman of the Compensation Committee and as a member of the Financial Statements Review Committee and the Corporate Governance and Nominating Committee of the Board. He is considered by the Board to have financial and accounting expertise under the Companies Law.

Rina Baum. Rina Baum is vice president for investments of FEL and since 1986 has served as director and general manager of Unico Investment Company Ltd. She serves as a director of Dan Hotels, Etanit Building Products Ltd. and Incotec Ltd., as well as in other managerial positions within the Federmann Group. She also serves as a director in Harel-PIA Mutual Funds Management Company Ltd. Mrs. Baum holds an L.L.B. degree from the Hebrew University.

David Federmann. David Federmann has served in various management capacities in FEL since 2000. He currently serves as chairman of the board of Freiburger Compound Materials GmbH (Freiberger) in Freiberg, Germany and as a member of the boards of directors of Dan Hotels and BGN Technologies (the technology transfer company of Ben-Gurion University). David Federmann is the son of Michael Federmann, chairman of the Board. Mr. Federmann holds a bachelor's degree in mathematics and philosophy from New York University.

Dr. Yehoshua Gleitman (External Director). Dr. Yehoshua (Shuki) Gleitman has served since 2001 as the managing partner of Platinum VC, a venture capital firm. He currently serves as chairman of the board of directors of Widemed Ltd. and of Capital Point Ltd. and is a director of Teuza – A Fairchild Technology Venture Ltd. From 2000 until 2005, he was the chief executive officer and a director of SFKT Ltd. From 1997 until 1999, Dr. Gleitman was the chief executive officer of Ampal-American Israel Corporation. Prior to that he served in various senior management positions in the Israeli Government and in Israeli industry, including as director general and chief scientist of the Israel Ministry of Industry and Trade, chairman of the U.S.-Israel Industrial R&D Foundation, joint chairman of the U.S.-Israel Science and Technology Commission, managing director of AIMS Ltd., vice president and general manager of Elop Electro-Optic Industries Ltd.'s (Elop) marine and aerial operations and head of the Laser Branch of the Israel Ministry of Defense. Dr. Gleitman serves as the honorary consul general of Singapore to Israel, is chairman of the executive board of Holon Institute of Technology and is a member of the executive board of Tel-Aviv University. Dr. Gleitman holds bachelors of science, master of science and PhD degrees in physical chemistry from the Hebrew University. Dr. Gleitman serves as chairman of the Financial Statements Review Committee, chairman of the Corporate Governance and Nominating Committee and as a member of the Audit Committee and the Compensation Committee of the Board. He is considered by the Board to have financial and accounting expertise under the Companies Law.

Yigal Ne'eman. Yigal Ne'eman has served as the general manager of the Academic College of Israel in Ramat Gan since 2010. From 1994 to 2010, he served as the chairman and president of the Israel College. From 1989 to 1993, he served as chairman and as a shareholder of several industrial, commercial and service companies. Mr. Ne'eman served as the president and CEO of Tadiran Ltd (Tadiran) from 1981 to 1989. During that period he also served as chairman of the board of directors of Elisra Electronic Systems Ltd. and of Elop. Prior to that he held a number of management positions in the control and finance departments of Tadiran. Mr. Ne'eman completed his accounting studies at the Hebrew University and is a Certified Public Accountant. Mr. Ne'eman serves as a member of the Audit Committee, the Financial Statements Review Committee and the Corporate Governance and Nominating Committee of the Board. He is considered by the Board to have financial and accounting expertise under the Companies Law.

Dov Ninveh. Dov Ninveh has served as chief financial officer and a manager in FEL since 1994. He serves as a director of Dan Hotels and Etanit Ltd. and as a member of the board of Freiberger. Mr. Ninveh served as a director of Elop from 1996 until 2000. From 1989 to 1994, he served as deputy general manager of Etanit Building Products Ltd. Mr. Ninveh holds a bachelor's degree in economics and management from the Israel Institute of Technology (the Technion).

Dalia Rabin (External Director). Dalia Rabin has served since 2002 as the chairperson of the Yitzhak Rabin Center, a national institute dedicated to ensuring that former Prime Minister and Minister of Defense Yitzhak Rabin's legacy continues to impact Israeli society through experiential educational programming, a national archive and a museum. Mrs. Rabin was a member of the Israeli Government from 1999 until 2002. She was elected to the Knesset as a member of the Center Party in 1999 and served as chairperson of the Ethics Committee. She also served on the Constitution, Law and Justice Committee; the Committee for the Advancement of the Status of Women; the State Control Committee; and the Committee for the Advancement of the Status of the Child. In 2001, Mrs. Rabin was appointed Deputy Minister of Defense. She resigned in 2002 to head the Rabin Center. Prior to her election to the Knesset, Mrs. Rabin served as the legal advisor of the professional associations of the General Federation of Labor (the Histadrut). She also served for 14 years in the Tel-Aviv District Attorney's Office in the Civil Division,

specializing in labor law. Mrs. Rabin holds an L.L.B. degree from Tel-Aviv University. Mrs. Rabin serves as a member of the Audit Committee, the Financial Statements Review Committee and the Corporate Governance and Nominating Committee of the Board.

Executive Officers

Our executive officers as of February 28, 2011 are as follows:

Name	Age	Position
Joseph Ackerman	61	President and Chief Executive Officer
Elad Aharonson	37	Executive Vice President and General Manager – UAS Division
David Block Temin	55	Executive Vice President, Chief Legal Officer and Chief Compliance Officer
Guy Brill	59	Executive Vice President and Co-General Manager – Technologies and Operations Division
Adi Dar	39	Executive Vice President and General Manager – Electro-Optics Elop Division
Itzhak Dvir	63	Executive Vice President and Chief Operating Officer
Jacob Gadot	63	Executive Vice President – International Marketing and Business Development
Ran Galli	62	Executive Vice President – Strategic and Security Initiatives
Joseph Gaspar	62	Executive Vice President and Chief Financial Officer
Zeev Gofer	58	Executive Vice President – Strategic and Business Development - North America
Dalia Gonen	59	Executive Vice President – Human Resources
Ran Hellerstein	60	Executive Vice President and Co-General Manager – Aerospace Division
Raanan Horowitz	50	President and Chief Executive Officer – Elbit Systems of America
Bezhael Machlis	47	Executive Vice President and General Manager – Land and C4I Division
Ilan Pacholder	56	Executive Vice President – Mergers and Acquisitions, Offset and Financing
Marco Rosenthal	63	Executive Vice President and Co-General Manager – Technologies and Operations Division
Haim Rousso	64	Executive Vice President – Engineering and Technology Excellence
Gideon Sheffer	62	Executive Vice President – Strategic Planning and Business Development – Israel
Yoram Shmuelly	50	Executive Vice President and Co-General Manager – Aerospace Division
Udi Vered	52	Executive Vice President – Service Solutions

Joseph Ackerman. Joseph Ackerman was appointed as President and Chief Executive Officer in 1996. From 1996 to 2004, he served as a member of our Board. From 1994 to 1996, he served as senior vice president and general manager of Elbit Ltd.'s defense systems division. Mr. Ackerman joined Elbit Ltd. in 1982 and held various management positions, including general manager – EFW, senior vice president – operations, vice president – operations and vice president – advanced battlefield systems. He serves as chairman or as a director on the boards of many of our affiliated companies. Mr. Ackerman holds a bachelor of science degree in aeronautical engineering from the Technion and was awarded an honorary doctorate by the Technion.

Elad Aharonson. Elad Aharonson was appointed as Executive Vice President and General Manager – UAS Division in January 2011, after serving as vice president – UAV systems since 2009. He joined Elbit Systems in 2004 and held various senior program management positions relating to UAS. Prior to that, Mr. Aharonson served as an officer in the IDF holding command positions in the Artillery Branch and in the Ground Forces' UAV unit. Mr. Aharonson holds an L.L.B. degree in law and a bachelor's degree in business administration from the Hebrew University.

David Block Temin. David Block Temin was appointed as Executive Vice President, Chief Legal Officer and Chief Compliance Officer in 2008, after serving as corporate vice president since 2000 and as general counsel since 1996. From 1987 to 1996 he was a legal advisor to Elbit Ltd. Prior to that, Mr. Block Temin was an attorney with law firms in New York City. Mr. Block Temin received a juris doctor degree as well as a master of arts degree in international relations from Stanford University and holds a bachelor of arts degree in political science from the University of Maryland. He is admitted to the Israeli and New York bars.

Guy Brill. Guy Brill was appointed as an Executive Vice President in 2008 and has served as Co-General Manager – Technologies and Operations Division since 2005. He became a corporate vice president in 2005. From 2001 until 2005, he served as corporate vice president – business synergy of Elbit Systems U.S. Corp., a U.S. subsidiary of the Company. Prior to that he held various management positions including Elbit Systems' chief operating officer, co-manager of the C3 and battlefield information systems strategic business unit, vice president for processes improvement and quality and vice president and division manager of the command and control systems division. Mr. Brill joined Elbit Ltd. in 1985. Prior to that, Mr. Brill served in the IDF in the R&D branch of the Ground Forces, and as an artillery officer, where he holds the rank of colonel (reserves). Mr. Brill holds a bachelor of science degree in electronic engineering from the Technion and a master of science of management degree from the Polytechnic University of New York. He is also a graduate of the Harvard University Business School's Advanced Management Program.

Adi Dar. Adi Dar was appointed as Executive Vice President and General Manager – Electro-Optics Elop Division in 2009. From 2006 until his current appointment he served as Elop's vice president for business development. Prior to that he served in a number of management positions in Elbit Systems, which he joined in 2002. From 1999 until 2002, he was vice president for business development and marketing at Elron Telesoft Ltd. Mr. Dar holds a bachelors degree in industrial engineering from the Technion and an MBA from Tel-Aviv University.

Itzhak Dvir. Itzhak Dvir was appointed as an Executive Vice President in 2008 and has served as Chief Operating Officer since 2004. From June to December 2010, he also served as general manager (acting) of the UAS Division. He was appointed as a corporate vice president in 2000. Mr. Dvir served as general manager – UAV, tactical and security systems from 2003 until 2004. From 2000 through 2002, he was general manager – C4I and battlefield systems. From 1996 until 2000, he was vice president and division manager – UAV and C3 division. Mr. Dvir joined Elbit Ltd. in 1989 and held various management positions, including vice president – UAV division, vice president – advance battlefield systems division and marketing director – battlefield systems division. Prior to that he served as a career officer in the IAF, retiring with the rank of colonel. Mr. Dvir holds a bachelor of science degree in aeronautical engineering from the Technion and a master of science degree in aeronautical engineering from the U.S. Air Force Institute of Technology at Wright Patterson Air Force Base.

Jacob Gadot. Jacob Gadot was appointed as Executive Vice President – International Marketing and Business Development in 2009. From 2008 until his current appointment he was executive vice president – mergers and acquisitions, after serving as corporate vice president – mergers and acquisitions since 2000. He also served as chief technology officer from 2001 until 2005. Mr. Gadot held the position of vice president – mergers and acquisitions from 1998 to 2000 and vice president – business development from 1996 to 1998. Mr. Gadot joined Elbit Ltd. in 1983 and held various management positions, including vice president – international marketing and head of the airborne division. Prior to that, he worked for Motorola Israel, after serving for ten years as an officer in the IAF. Mr. Gadot holds a bachelor of science degree in electrical engineering from the Technion.

Ran Galli. Ran Galli was appointed as Executive Vice President – Strategic and Security Initiatives in 2009. From 2008 until his current appointment he was executive vice president – strategic initiatives, after serving as corporate vice president – strategic initiatives since 2005. He served as corporate vice president – major campaigns from 2003 until 2005. From 1999 until 2003 he served as corporate vice president – business development and marketing. Mr. Galli

joined Elbit Systems in 1997 as vice president – business development. Prior to that, he served as corporate vice president – business development and marketing at Rafael, which he joined in 1990, after retiring from the IAF with the rank of colonel. In the IAF he served as head of research and development, following numerous aircraft program management positions. Mr. Galli holds bachelor and master of science degrees in aeronautical engineering from the Technion.

Joseph Gaspar. Joseph Gaspar was appointed as an Executive Vice President in 2008 and as Chief Financial Officer in 2001. He was appointed as a corporate vice president in 2000 and served as corporate vice president – strategy, technology and subsidiaries from 2000 until 2001. From 1996 until 2000, he held the position of corporate vice president, marketing and business development of Elop. Mr. Gaspar joined Elop in 1975 and held several management positions, including vice president and general manager of Elop's optronics product division and co-manager of an Elop subsidiary in the United States. Mr. Gaspar holds a bachelor of science degree from the Technion in electronic engineering with advanced studies in digital signal processing and communication.

Zeev Gofer. Zeev Gofer was appointed as Executive Vice President – Strategic and Business Development – North America in 2009. From 2008 until his current appointment he was executive vice president – business development and marketing, after serving as corporate vice president – business development and marketing since 2003. He previously served as corporate vice president and as co-general manager – aircraft and helicopter upgrades and systems from 2000 until 2003. From 1999 until 2000, he was vice president – aircraft upgrades and airborne systems division, having served as division manager since 1996. He joined Elbit Ltd. in 1982 and held various management positions, including director of the aircraft upgrade division, director of a major aircraft upgrade program, director of avionics system engineering and technical manager of the Lavi aircraft avionics program. Mr. Gofer holds bachelor and master of science degrees in electronic engineering from the Technion and a master of science of management degree from the Polytechnic University of New York.

Dalia Gonen. Dalia Gonen was appointed as Executive Vice President – Human Resources in 2008 after serving as vice president – human resources from 2000 until 2007. She became director of human resources in 1996. Ms. Gonen joined Elbit Ltd. in 1971 and held various positions in the human resources department. Ms. Gonen holds a bachelor of arts degree in sociology from Haifa University and a master of science of management degree from the Polytechnic University of New York.

Ran Hellerstein. Ran Hellerstein was appointed as Executive Vice President and Co-General Manager – Aerospace Division in 2008 after serving as corporate vice president and co-general manager – aircraft and helmet systems since 2003. Mr. Hellerstein served as corporate vice president and co-general manager – aircraft and helicopter upgrades and systems from 2000 until 2003. From 1996 until 2000, he served as vice president – development and engineering division, having served as division manager since 1993. Mr. Hellerstein joined Elbit Ltd. in 1978 and served in various management positions, including manager of the engineering division, department manager, technical manager and systems engineer. Mr. Hellerstein holds bachelor and master of science degrees in electrical engineering from the Technion.

Raanan Horowitz. Raanan Horowitz was appointed President and Chief Executive Officer of Elbit Systems of America in 2007. He served as executive vice president and general manager of EFW from 2001 until his current appointment. From 1991 until 2001, Mr. Horowitz held various management positions with EFW and other U.S. subsidiaries of the Company. From 1989 to 1991, he served as a senior program manager for Elbit Ltd. Mr. Horowitz serves on the board of governors of the Aerospace Industries Association and is a member of the national board of directors of the Leukemia and Lymphoma Society. Mr. Horowitz holds an MBA from the Seidman School of Business of Grand Valley State University in Allendale, Michigan. He also holds a master of science degree in electrical engineering and a bachelor of science degree in mechanical engineering from Tel-Aviv University.

Bezhael Machlis. Bezhael Machlis was appointed as Executive Vice President and General Manager – Land and C4I Division in 2008 after serving as corporate vice president and general manager – land systems and C4I since 2004. In 2003, he served as corporate vice president and general manager – ground, C4I and battlefield systems. From 2000 until 2002, he served as vice president – battlefield and information systems. Mr. Machlis joined Elbit Ltd. in 1991 and held various management positions in the battlefield and information systems area. Prior to that, he served as an artillery officer in the IDF, where he holds the rank of colonel (reserves). Mr. Machlis holds a bachelor of science

degree in mechanical engineering and a bachelor of arts degree in computer science from the Technion and an MBA from Tel-Aviv University.

Ilan Pacholder. Ilan Pacholder was appointed as Executive Vice President – Mergers and Acquisitions in 2009, in addition to his position as Executive Vice President – Offset and Financing to which he was appointed in 2008. During 2007, he served as vice president and chief financial officer of Tadiran Communications Ltd. Mr. Pacholder served as corporate secretary and vice president – finance and capital markets of Elbit Systems from 2003 until 2006. From 2001 until 2003, he served as vice president – finance. Mr. Pacholder joined Elbit Ltd. in 1994 and held various senior positions in the finance department. Prior to joining Elbit Ltd. he served as the chief financial officer for Sanyo Industries in New York. Before that Mr. Pacholder worked for Bank Leumi in New York for 10 years and held the position of vice president in the international and domestic lending departments. Mr. Pacholder holds a bachelor of arts degree in accounting and economics from Queens College in New York and an MBA in finance and investments from Adelphi University.

Marco Rosenthal. Marco Rosenthal was appointed as Executive Vice President and Co-General Manager – Technologies and Operations Division in 2008, after serving as corporate vice president and co-general manager – technologies and operations division since 2005. He served as corporate vice president – manufacturing and purchasing from 2001 until 2005, having served from 1999 to 2001 as vice president – operations and general manager of the Karmiel facility. From 1996 to 1999, he served as vice president – material. Mr. Rosenthal joined Elbit Ltd. in 1975 and held various management positions, including director of the sales department. Mr. Rosenthal holds a degree in technical engineering from the Technion and a degree in business management from Haifa University.

Haim Rousso. Haim Rousso was appointed as Executive Vice President – Engineering and Technology Excellence in 2009. Prior to that he served from 2008 as executive vice president and general manager – electro-optics Elop division after serving as corporate vice president and general manager of Elop since 2000. He held various management positions in Elop since 1972. He serves on the board of directors of Starling Advanced Communications Ltd. Mr. Rousso holds bachelor and master of science degrees in electrical engineering from the Technion.

Gideon Sheffer. Gideon Sheffer was appointed as Executive Vice President – Strategic Planning and Business Development – Israel in August 2009. From 2008 until his current position he served as executive vice president – strategic planning, after serving as corporate vice president – strategic planning since 2001. Prior to that he served as acting head of Israel's National Security Council and as national security advisor to former Prime Minister Ehud Barak. In 1998, he completed 32 years of service in the IDF, retiring with the rank of major general. From 1995 to 1998, he served on the general staff as head of the IDF's human resources branch. Before that, he served as deputy commander of the IAF. Mr. Sheffer held a number of command positions in the IAF after serving as a fighter aircraft and helicopter pilot. Mr. Sheffer holds a bachelor's degree in Israel studies from Bar Ilan University and is a graduate of the Harvard University Business School's Advanced Management Program.

Yoram Shmuely. Yoram Shmuely was appointed as Executive Vice President and Co-General Manager – Aerospace Division in 2008 after serving as corporate vice president and co-general manager – airborne and helmet systems since 2003. He served as corporate vice president and general manager – helmet mounted systems from 2000 until 2003. From 1998 until 2000, he was vice president – helmet mounted systems division. From its founding in 1996 until 1998, he served as president of VSI. Mr. Shmuely joined Elbit Ltd. in 1990 and served as director of Elbit Ltd.'s helmet mounted display business. He served as a fighter aircraft pilot in the IAF. Mr. Shmuely holds a bachelor of science degree in electronic engineering from the Technion.

Udi Vered. Yehuda (Udi) Vered was appointed Executive Vice President – Service Solutions in 2009. In addition he has served as vice president – marketing for the land and C4I division since February 2010. Prior to that, since 2004 he served as chief financial officer and vice president for contracts and sales of the land and C4I division. Mr. Vered joined Elbit Systems in 2003 as vice president for contracts and sales and chief financial officer – ground, C4I and battlefield systems. Before that, he served as an aircrew officer in the IAF, where he holds the rank of colonel (reserves). He serves on the board of directors of Chip PC Ltd. Mr. Vered holds a bachelor of arts degree in management and economics from Tel-Aviv University, an MBA from Ben Gurion University and is a graduate of the Harvard University Business School's Advanced Management Program.

Compensation of Directors and Officers

The following table sets forth the aggregate compensation paid to all of our directors and officers as a group for the fiscal year ended December 31, 2010:

	Salaries, Directors' Fees Commissions and Bonuses		Pension, Retirement and Similar Benefits
	(U.S. dollars in thousands)		
All directors (consisting of 11 persons)	\$ 342	(*)	\$ —
All officers (consisting of 20 persons)	\$ 10,455	(**)	\$ 1,207

(*) Elbit Systems' shareholders at the annual general shareholders meeting held in 2004 approved payment to directors thereafter in accordance with maximum regulatory rates payable to External Directors under Israeli law for companies similarly classified based on their shareholding equity. These rates were linked to the Israeli consumer price index and were so updated and paid by Elbit Systems through March 2008. At an extraordinary general shareholders meeting held in March 2008, our shareholders approved increasing compensation, effective April 1, 2008 (and thereafter so long as such approval has not been replaced or revoked by the shareholders) to our External Directors and to other directors meeting the director independence criteria of Nasdaq, each of whom has additional duties under applicable non-Israeli law. The increased compensation was consistent with amendments to Israeli law regarding compensation to External Directors who serve on the boards of "dual listed" companies, such as Elbit Systems. As a result, External Directors and other such "independent" directors are and will be entitled, so long as the above-mentioned resolution adopted in March 2008 is in effect, to an annual fee of NIS 110,329 (equal to approximately \$29,563) and a per meeting fee of 2,427 NIS (equal to approximately \$650), which reflect the fees levels previously approved at the 2008 Shareholders' Extraordinary General Meeting and linked to the Israeli consumer price index. The other directors are paid the following compensation: an annual fee of NIS 54,473 (equal to approximately \$14,596) and a per meeting fee of NIS 2,055 (equal to approximately \$550), which reflect the fees levels previously approved at the 2004 annual general shareholders meeting and linked to the Israeli consumer price index. We currently intend to maintain such compensation rates to such directors. Compensation payments to directors are made either directly to the director or to his or her employing company.

(**) We recorded an amount of approximately \$5.2 million in 2010 as compensation costs related to stock options granted to our Executive Officers under our 2007 Employee Stock Option Plan. (See below "Share Ownership – Elbit Systems' Stock Option Plans.")

Board Practices

Appointment of Directors

Our directors are elected by the shareholders at the annual general shareholders meeting. They hold office until the next annual general shareholders meeting, which is held at least once every calendar year but not more than 15 months after the previous general shareholders meeting. Between annual general shareholders meetings our Board may appoint new directors to fill vacancies; however, new External Directors must be elected at a general shareholders meeting as described under "External Directors" below. Our Articles of Association authorize a maximum of 17 and a minimum of five directors.

The Companies Law requires the board of directors of a public company, after considering the company's type and size and the scope and complexity of its activities, to determine the minimum number of directors on the board having financial and accounting expertise as defined in the Companies Law. Our Board has adopted a policy pursuant to

which it will include a minimum of two directors having financial and accounting expertise as defined under the Companies Law. Currently our Board has three directors who are considered by the Board to have financial and accounting expertise: Dr. Gleitman, Mr. Asheri and Mr. Ne'eman. In addition, the Companies Law provides that a person will not be elected and will not serve as a director in a public company if he or she does not have the required qualifications and the ability to dedicate an appropriate amount of time for the performance of his or her director position in the company, taking into consideration, among other factors, the special needs and size of the company. A general shareholders meeting of a company whose shares are publicly traded, at which the election of a director is to be considered, will not be held unless the nominee has declared to the company that he or she complies with the above-mentioned requirements, and the details of his or her applicable qualifications are provided. Each of our elected directors has declared to our Board that he or she complies with the required qualifications under the Companies Law for appointment as a member of our Board, detailing his or her applicable qualifications, and that he or she is capable of dedicating the appropriate amount of time for the performance of his or her role as a member of our Board.

The current External Directors on our Board were each appointed at a general meeting of shareholders, with their terms expiring as described under "External Directors" below. The other seven current directors were appointed at the annual general meeting of shareholders held in November 2010. There are no service contracts or similar arrangements with any director that provide for benefits upon termination of directorship.

Nasdaq's director independence and related rules applicable to boards of directors apply to Elbit Systems. Under these rules, our Board is required to meet the Nasdaq director independence criteria. Also applicable are certain other rules regarding independent directors serving on a director nomination committee and the manner for approving the compensation to Elbit Systems' Chief Executive Officer. Directors on our Board are recommended for appointment or election by the Board's Corporate Governance and Nominating Committee. (See below "Corporate Governance and Nominating Committee.")

Substitute Directors. The Articles of Association provide that any director may appoint another person to serve as a substitute director. A substitute director must be qualified under the Companies Law to serve as a substitute director. If his or her appointment is for more than one meeting it will be subject to the approval of the Board. Such person may not act as a substitute director for more than one director at the same time. In addition, a Board committee member may not substitute for another Board committee member in meetings of the applicable committee. The same rules, including compensation, will apply to a substitute director as to the director who appointed him or her, and the substitute director may participate in Board and Board committee meetings in the same manner as the appointing director (subject to any applicable independence criteria). Subject to the Companies Law, a director who has appointed a substitute director may revoke the appointment at any time. In addition, the office of a substitute director will be vacated at any time that the office of the director who appointed the substitute is vacated for any reason. Any appointment or revocation of the appointment of a substitute director will be made by notice in writing to the substitute director and Elbit Systems. The appointment or revocation, as the case may be, will become effective on the later of the date of receipt of the above notice or the date fixed in the notice.

External Directors

Under the Companies Law publicly held Israeli companies are required to appoint at least two "External Directors." Among other requirements, a person may serve as an External Director if that person (and each of that person's relatives, partners and employers, or any person to whom he or she directly or indirectly reports), or any entity controlled by that person, did not have, at any time during the two years preceding that person's appointment as an External Director, any affiliation with any of: (1) the applicable company, (2) the entities controlling the company, (3) the entities controlled by the company or (4) the entities controlled by the company's controlling shareholders. In addition, a person may serve as an External Director if and so long as: (1) no conflict of interest exists or may exist between his or her responsibilities as a member of the board of directors of the respective company and his or her other positions or business activities or (2) such position or business activities would not impair his or her ability to serve as a director.

In general, at least one External Director must have "financial and accounting expertise", and the other External Director(s) must have "professional competence" as described below. However, in companies such as Elbit Systems that are "dual listed" (for example traded on a stock exchange in both Israel and the U.S.) if one or more other directors who meet the independence criteria applicable to members of the audit committee under the foreign applicable law (including stock exchange rules) have been determined by the board of directors to have "financial and accounting expertise" then it is permissible for any or all of the External Directors to have only "professional competence" as described below. Under the relevant regulations of the Companies Law, a director has "financial and accounting expertise" if he or she, based on his or her education, experience and qualifications, is highly skilled in respect of, and understands, business and accounting matters and financial statements, in a manner that enables him or her to have an in-depth understanding of the company's financial statements and to stimulate discussion with respect to the manner in which the financial data is presented. The evaluation of the "financial and accounting expertise" of a director is to be made by the board of directors taking into account the parameters specified in the relevant regulations of the Companies Law. A director has "professional competence" if he or she (1) has an academic degree in either economics, business administration, accounting, law or public administration or an academic degree in an area relevant to the company's business, or (2) has at least five years experience in a senior position in the business management of any

corporate entity with a substantial scope of business, in a senior position in public service or in the field of the applicable company's business. The evaluation of the professional competence of a director is to be made by the board of directors.

According to Israeli law, External Directors serve for a three-year term following which they may stand for re-election to an additional term of three years. External Directors in companies such as Elbit Systems that are “dual listed” may stand for re-election to additional terms of up to three years each beyond the first two terms, subject to meeting the following conditions: (1) the audit committee and the board both determine that based upon the expertise and the unique contribution of the External Director to the work of the board and its committees, his or her re-election for an additional term is for the benefit of the company; (2) his or her re-election is approved at a general shareholders meeting by the special majority required for nomination of External Directors under the Companies Law; and (3) his or her terms of service as an External Director and the considerations of the audit committee and the board regarding his or her re-election were presented to the general meeting of shareholders prior to the vote on such approval. At a general meeting of shareholders held in March 2008, our shareholders approved an amendment to our Articles of Association, consistent with such amendment to Israeli law, allowing External Directors of the Company to be elected to more than two terms of service. Any committee of the Board must include at least one External Director, and all External Directors must be members of the Audit Committee.

Yehoshua Gleitman and Dalia Rabin currently serve as our Board’s External Directors. Dr. Gleitman’s term of office ends in March 2013, and the term of office of Dalia Rabin ends in November 2013. Yehoshua Gleitman was determined by the Board to have financial and accounting expertise under Israeli law, and Dalia Rabin was determined by the Board to have the applicable professional competence to serve as an External Director.

Audit Committee. Avraham Asheri (Chair), Moshe Arad, Yehoshua Gleitman, Yigal Ne’eman and Dalia Rabin are members of the Audit Committee. The Audit Committee operates in accordance with an Audit Committee Charter that provides the framework for its oversight functions consistent with Israeli and U.S. legal and regulatory requirements. All of the members of the Audit Committee meet the applicable requirements of the Companies Law and have been determined to be independent as defined by the applicable Nasdaq rules and those of the U.S. Securities Exchange Commission (SEC). The Audit Committee meets from time to time in executive sessions and also conducts annual assessments of the sufficiency of its Charter and of the Committee’s compliance with its obligations. (See Item 10. Additional Information – General Provisions of Israeli Law and Related Provisions – Internal Auditor and Audit Committee; Item 16A. Audit Committee – Financial Expert and Item 16D. Exemptions from Listing Standards for Audit Committees.)

Financial Statements Review Committee. Yehoshua Gleitman (Chair), Avraham Asheri, Moshe Arad, Yigal Ne’eman and Dalia Rabin are members of the Board’s Financial Statements Review Committee, which was established in March 2011. Pursuant to the Israeli Companies Regulations, a public company, such as Elbit Systems, is required to establish a committee of the board of directors for the examination of the financial statements. Commencing with the annual financial statements of 2010, financial reports of a public company may be brought for discussion and approval of the board only after such committee has discussed and formulated recommendations to the board in connection with: (1) the valuations and estimates used in connection with the financial statements; (2) the internal controls related to financial reporting; (3) the completeness and appropriateness of disclosure in the financial statements; (4) the accounting policy adopted and accounting treatment applied in the material matters of the company; and (5) valuations, including the assumptions and estimates underlying them, on which data in the financial statements is provided. The chairperson of the committee must be an External Director and the other members of the committee must be directors who meet certain independence requirements, and, among other criteria, must be able to read and understand financial statements, with at least one of the members having “financial and accounting expertise” (as defined above). Yehoshua Gleitman, Avraham Asheri and Yigal Ne’eman have been determined by the Board to have “financial and accounting expertise”.

Compensation Committee. Avraham Asheri (Chair), Moshe Arad and Yehoshua Gleitman are members of the Board’s Compensation Committee. The purpose of the Compensation Committee is to carry out on behalf of the Board the responsibilities of the Board relating to approval of compensation of the Company’s senior officers, however,

compensation terms of the Company's President must also be approved by the Board as a whole. All of the committee members have been determined to be independent as defined by the applicable Nasdaq rules and those of the SEC.

Corporate Governance and Nominating Committee. Yehoshua Gleitman (Chair), Avraham Asheri, Yigal Ne'eman and Dalia Rabin are members of the Board's Corporate Governance and Nominating Committee. This Committee operates in accordance with a Corporate Governance and Nominating Committee Charter that specifies its oversight functions consistent with Israeli and U.S. legal and regulatory requirements. The role of the Corporate Governance and Nominating Committee is to assist the Board in fulfilling its responsibilities with respect to the qualification of candidates to become Board members and to monitor compliance with corporate governance requirements applicable to Board members. All of the members of the Corporate Governance and Nominating Committee have been determined to be independent as defined by the applicable Nasdaq rules and those of the SEC. A nominee to our Board must have such experience in business or financial matters as would make such nominee an asset to the Board. In recommending director candidates, our Corporate Governance and Nominating Committee takes into consideration such factors as it deems appropriate based on our current needs. These factors may include: professional and personal ethics and integrity; business, professional and industry knowledge, sophistication and contacts; the ability to make informed and independent judgments on a wide range of issues; relevant skills and experience demonstrated through business, professional, charitable or civic affairs; and the candidate's ability to devote the required time and effort to serve on our Board. (See Item 16.G. Corporate Governance.)

Dalia Rabin	Dalia Rabin		

Employees

Number of Employees. Most of our employees are based in Israel, and we have a significant number of employees in the United States. The total number of employees worldwide and the number of employees in the U.S. at the end of 2010, 2009 and 2008 were as follows:

	Total Employees	U.S. Employees
2010	12,317	1,963
2009	11,238	1,806
2008	10,876	1,826

Employment Contracts. The majority of our Israeli employees have individual employment contracts. However, by law some employees receive rights under a number of general collective bargaining agreements and under Israeli employment laws. See Item 4. Information on the Company – Conditions in Israel – Israeli Labor Laws. We believe our overall relationship with our employees is satisfactory.

Collective Bargaining Agreements. In Israel, Elop, ESLC, Cyclone, Elisra, Tadiran Systems, Tadiran Spectralink and Soltam are each parties to collective bargaining agreements covering a portion of their employees. A total of approximately 2,485 employees in Israel are covered by such agreements that extend for various periods up to 2017. Approximately 210 of the employees at Elbit Systems of America's Forth Worth operations are covered by a collective bargaining agreement in effect until November 2011.

Share Ownership

Elbit Systems' Stock Option Plans

2007 Employee Stock Option Plan

In 2007, our shareholders approved the 2007 Option Plan (the Plan). The purpose of the Plan is to provide an incentive to applicable employees of Elbit Systems and certain of our subsidiaries, who are expected to contribute to the Company's future growth and success and to strengthen the alignment of the option recipients' interests with those of the Company and our shareholders.

The options were allocated, subject to the required approvals, in two tracks as follows: (i) Regular Options – up to an aggregate of 1,250,000 options exercisable into 1,250,000 of our ordinary shares in consideration for the exercise price, all or any portion of which may be granted as Incentive Stock Options (Regular Options) and (ii) Cashless Options – up to an aggregate of 1,250,000 options, which entitle the participant to exercise options for an amount reflecting only the benefit factor (Cashless Options). Each of the participants is granted an equal amount of Regular Options and Cashless Options. The exercise price for Israeli participants is the average closing price of our shares during 30 trading days preceding the options' grant date. The exercise price of options granted to a non-Israeli participant residing in the United States is the fair market value of the share on the day the options are granted. Generally, the options expire five years from the grant date.

According to the Plan, the options granted on a certain date (such grant date being the Commencement Date) will become vested and exercisable in accordance with the following vesting schedule:

- (1) 50% of the options will be vested and exercisable from the second anniversary of the Commencement Date;
- (2) An additional 25% of the options will be vested and exercisable from the third anniversary of the Commencement Date; and
- (3) The remaining 25% of the options will be vested and exercisable from the fourth anniversary of the Commencement Date.

Subject to the above-mentioned vesting periods, the options are exercisable during the five-year period after the Commencement Date.

Israeli participants are granted options under the Plan in accordance with the provisions of Section 102 of the Israeli Tax Ordinance related to the Capital Gains Tax Track.

During 2007, we granted to approximately 200 employees an aggregate total of 2,381,300 options under the Plan. The average exercise price of the options was \$33.27. During 2008, we granted an additional 135,800 options to 34 employees, at an average exercise price of \$56.15. During 2009, we granted an additional 58,500 options to 12 employees, at an average exercise price of \$50.33. During 2010, we granted an additional 28,000 options to seven employees at an average exercise price of \$52.31. The options are exercisable for five years from the Commencement Date. The compensation expenses related to the options granted in 2008, 2009 and 2010 were not material. As part of the overall grant in the first quarter of 2007, our President, Joseph Ackerman, was granted 95,000 options under the Plan at an exercise price of \$33.20 per share. No directors were granted options under the Plan, but officers other than Mr. Ackerman were granted under the Plan an aggregate of 706,980 options in 2007, at an average exercise price of \$33.34, an aggregate of 7,000 options in 2008, at an average exercise price of \$53.60, an aggregate of 15,000 options in 2009, at an average exercise price of \$48.10, and an aggregate of 5,000 options in 2010, at an average exercise price of \$53.88.

(For a full description of the Plan see the exhibit to the Proxy Statement filed with the SEC on Form 6-K on December 7, 2006. See also Item 18. Financial Statements – Note 18.)

Post Merger Plan

We adopted an employee stock option plan following the merger with Elop in 2000 (the Post Merger Plan). Under the Post Merger Plan, stock options for our ordinary shares were granted to officers and employees of Elbit Systems and wholly-owned subsidiaries. Under the Post Merger Plan, 5,000,000 options were authorized to be granted to approximately 800 key employees of Elbit Systems and wholly-owned subsidiaries.

Half of the options granted to any employee under the Post Merger Plan were exercisable into one of our ordinary shares per option in consideration for the employee's payment to us of the exercise price. The remaining options granted to any employee under the Post Merger Plan consisted of "phantom" options, which are similar to share appreciation rights. These options entitle the employee, on exercise of the phantom options, to receive shares in an amount corresponding to the value of the difference between the "deemed" option exercise price and the closing TASE trading price on the date before the option exercise date. For phantom options the employee pays only the par value of the shares actually received. The exercise price for options granted is 85% of the average price of Elbit Systems' shares on the TASE for the 60 trading days prior to the specific option grant. As of February 28, 2011, the only options remaining outstanding under the Post Merger Plan are options exercisable into 10,131 ordinary shares, based on the shares' February 28, 2011 closing price on TASE of \$51.07. The options expire upon the earlier of six years after the grant date or 90 days after the employee's termination of employment with Elbit Systems or its subsidiaries, as applicable.

Item 7. Major Shareholders and Related Party Transactions.

Major Shareholders

Percentages

We had, as of February 28, 2011, 42,763,037 ordinary shares outstanding.(1) The following table sets forth specific information as of February 28, 2011, to the best of our knowledge, concerning:

- beneficial ownership of more than 5% of our outstanding ordinary shares; and
- the number of ordinary shares beneficially owned by all of our officers and directors as a group.

Name of Beneficial Owner	Amount Owned	Percent of Ordinary Shares
Federmann Enterprises Ltd. 99 Hayarkon Street Tel-Aviv, Israel (2)	19,457,566	45.50 %
Heris Aktiengesellschaft c/o 99 Hayarkon Street Tel-Aviv, Israel	3,836,458 (3)	8.97 %
Migdal Insurance & Financial Holdings Ltd. 4 Efal Street Petach Tikva, Israel	2,205,655	5.15 %
All officers and directors as a group (29 persons)	171,799 (4)	0.40 %

(1)The total number of ordinary shares includes 23,021 ordinary shares held by one of our subsidiaries but excludes 385,900 ordinary shares held by us as treasury shares.

(2)Federmann Enterprises Ltd. (FEL) owns our ordinary shares directly and indirectly through Heris Aktiengesellschaft (Heris) which is controlled by FEL. FEL is controlled by Beit Federmann Ltd. (BFL). BFL is controlled by Beit Bella Ltd. (BBL) and Beit Yekutiel Ltd. (BYL). Michael Federmann is the controlling shareholder of BBL and BYL. He is also the chairman of Elbit Systems' Board and the chairman of the Board and the chief executive officer of FEL. Therefore, Mr. Federmann controls, directly and indirectly, the vote of ordinary shares owned by Heris and FEL.

As of February 28, 2011, 4,655,448 ordinary shares held by FEL were pledged to Bank Leumi Le-Israel BM to guarantee loans provided to FEL in connection with FEL's purchase in 2004 of our ordinary shares from Elron Electronics Industries Ltd. as well as to guarantee an increase of the loan provided to FEL according to an 2007 amendment to the loan agreement. In addition, 2,175,000 ordinary shares held by FEL were pledged in favor of Bank Hapoalim BM, in connection with FEL's purchase in 2006 from Koor Industries Ltd. of 2,350,000 of our ordinary

shares.

- (3) The amount of ordinary shares owned by Heris is included in the amount of shares held by FEL as set forth in footnote (2) above.
- (4) This amount does not include any ordinary shares that may be deemed to be beneficially owned by Michael Federmann as described in footnote (2) above. The amount includes 105,905 ordinary shares underlying options that are currently exercisable or that will become exercisable within 60 days of February 28, 2011. A portion of the underlying options are “phantom options” or “cashless” options that have been calculated based on our February 28, 2011 closing share price on the TASE of \$51.07.

Rights in Shares, Significant Changes in Shareholders and Controlling Shareholders

Our major shareholders have the same rights as other holders of our ordinary shares. (See also Item 10. Additional Information – Provisions Relating to Major Shareholders.)

The only changes in shareholdings by major shareholders in the last three years were those relating to FEL as follows:

	February 28, 2011		February 28, 2010		May 31, 2009		May 31, 2008	
	Shares Owned	% of Shares Owned	Shares Owned	% of Shares Owned	Shares Owned	% of Shares Owned	Shares Owned	% of Shares Owned
FEL	19,457,566(1)	45.50 %	19,342,625	45.49 %	19,342,625(2)	45.91 %	19,183,763(3)	45.57 %

(1) Reflects incidental purchases by FEL of shares in open market transactions during May 2010 – February 2011.

(2) Reflects incidental purchases by FEL of shares in open market transactions during May 2008 – February 2009.

(3) Reflects incidental purchases by FEL of shares in open market transactions during January – April 2008.

As of February 28, 2011, approximately 7.85% of our outstanding ordinary shares were held in the United States by approximately 164 shareholders of record registered on the books of our transfer agent.

We are not aware of any arrangement which may result in a change in control of the Company.

Related Party Transactions

Transactions with Affiliated Companies. In the ordinary course of business, some of our subsidiaries and affiliates engage in business activities with each other. The purchases among our related parties are made at prices and on terms equivalent to those used in transacting business with unrelated parties under similar conditions. The sales among our related parties in respect to government defense contracts are made on the basis of costs incurred. (See Item 10. Additional Information – General Provisions of Israeli Law and Related Provisions of Articles of Association – Approval of Certain Transactions.)

Transactions with Officers and Directors. Some members of our Board are also directors of FEL or companies controlled by FEL. Therefore, in the event of an issue or transaction between Elbit Systems and any of those companies, those individuals who are affiliated with both of the applicable companies will be excluded from any decisions concerning such issue or transaction. Transactions with officers, directors, key employees and affiliates may require authorization in accordance with the requirements of the Companies Law. (See below – Item 10. Additional Information – Approval of Certain Transactions. For information on the grant of options in Elbit Systems' shares to officers and directors, see Item 6. Directors, Senior Management and Employees – Share Ownership – Elbit Systems' Stock Option Plans.)

Item 8. Financial Information.

Consolidated Statements and Other Financial Information

See Item 18. Financial Statements.

Export Sales

Export sales constitute a significant portion of our sales. In 2010, export sales were approximately \$2.0 billion, constituting approximately 76% of our total sales. (For further information regarding the allocation of our revenues by

geographic region see Item 5. Operating and Financial Review and Prospects – 2010 Compared to 2009 – Revenues.)

Legal Proceedings

Pinpoint. In December 2009, a claim in the amount of approximately \$10 million was filed in the District Court – Central District of Israel by Pinpoint Advance Corporation (Pinpoint) and four of its founders against two of our Israeli subsidiaries, Elbit Systems Holdings (1997) Ltd. and Kinetics, as well as against one of our officers, Jacob Gadot. Pinpoint is a special purpose acquisition company that was in negotiations with us and other Kinetics' shareholders regarding the sale of shares in Kinetics during 2008. The transaction was not completed and negotiations were terminated. Pinpoint claims that the agreement was completed and thus entered into effect. Alternatively, Pinpoint claims that our decision not to complete the agreement was made in bad faith, and that under the circumstances Pinpoint and its founders are entitled to pecuniary compensation equal to their rights and entitlements under the alleged breached contract. We believe there is no merit to the allegations made in the claim and have responded accordingly to the Court. In March 2010, the Court requested the parties to attempt mediation, and a mediation process is ongoing.

Credit Suisse. In May 2009, Elbit Systems filed a claim in the U.S. District Court for the Southern District of Illinois against Credit Suisse Group (CSG). The complaint seeks to recover approximately \$16 million that Elbit Systems believes was fraudulently obtained by CSG and by its subsidiary Credit Suisse Securities (USA) from Tadiran Communications Ltd. (Tadiran Communications) in 2007 in connection with auction rate securities purchased by Tadiran Communications through CSG. In 2008, Tadiran Communication was merged into Elbit Systems, and Tadiran Communications' activities are currently performed as part of Elbit Systems' wholly-owned Israeli subsidiary, Elbit Systems Land and C4I Ltd. CSG filed a motion to dismiss the claim based on a release signed by Tadiran Communications in 2007. In December 2009, the case was moved to the Federal Southern District of New York. In July 2010, the Court ordered the parties to continue discovery regarding the release and ruled that the meaning and scope of the release will be decided in a hearing on summary judgment rather than on a motion to dismiss.

ImageSat

Between 2007 and January 2010, various claims were filed in the U.S. District Court for the Southern District of New York (the Federal SDNY) and the Supreme Court of the State of New York, County of New York (New York State Court) by certain minority security holders of ImageSat against ImageSat, IAI, Elbit Systems, Elop and certain current and former officers and directors of ImageSat. The former directors include, among others, Michael Federmann, Joseph Ackerman and Joseph Gaspar (currently Elbit Systems' Board Chairman, Chief Executive Officer and Chief Financial Officer, respectively), who at various times in the past served as Elop's nominee to ImageSat's board of directors. ImageSat's largest shareholder is IAI, holding approximately 46% of ImageSat's issued share capital. Elop holds approximately 14% (7% on a fully diluted basis) of ImageSat's issued share capital and is entitled to nominate one director to ImageSat's board. The claims contained various allegations that the defendants breached their fiduciary and/or contractual obligations to the detriment of the plaintiffs. The claims alleged various causes of action and damages aggregating hundreds of millions of dollars, not all of which were alleged against Elbit Systems, Elop and/or each of the individual defendants. As of February 28, 2011, all of the above-mentioned claims have been dismissed by the Federal SDNY and the New York State Court (and applicable appellate courts) on the grounds of forum non-conveniens, except for two remaining proceedings in the New York State Court by certain of the plaintiffs, claiming a breach of the Security Holders Agreement between various security holders of ImageSat, including Elop, based on an alleged failure to appoint independent directors to the ImageSat board of directors. Elbit Systems and Elop believe such claims are baseless and have filed corresponding responses to the Court.

In April 2010, Elbit Systems and Elop were served with an Application to Approve a Derivative Action (the Application) filed in the District Court of Petach Tikva, Israel, by certain minority shareholders of ImageSat. The Application names a number of respondents, including among others, ImageSat, IAI, Elop, Elbit Systems and several former directors of ImageSat, including, among others, Michael Federmann, Joseph Ackerman and Joseph Gaspar (Elbit Systems, Elop and the above-named former directors are referred to as the Elbit Defendants). The Application requests the Court to approve the filing of a derivative action on behalf of ImageSat for alleged breaches by some of the respondents of the applicants' rights as minority shareholders in ImageSat. The nature of the allegations is substantially similar to those previously made by the applicants in various claims referred to above made in federal and state courts in New York. In July 2010, the Elbit Defendants filed motions to dismiss the Application on various grounds relating both to Netherland Antilles and Israeli law. The Elbit Defendants believe that there is no merit to the allegations made against them in this claim. IAI has agreed to indemnify Elbit Systems, Elop and the directors nominated by Elop to ImageSat's board, for any losses arising out of any of the foregoing claims or legal proceedings, net of insurance proceeds received from ImageSat's insurance policies and any indemnification proceeds received from ImageSat.

Other Legal Proceedings. The Company is involved in other legal proceedings from time to time. Based on the advice of our legal counsel, management believes such current proceedings will not have a material adverse effect on our financial position or results of operations.

Dividend Distributions

We do not have a declared dividend policy. (Regarding declarations of dividends out of certain tax-exempt income see below Item 10. Additional Information – Taxation – Investment Law.) Our Articles of Association provide that the Board may approve dividend payments to shareholders out of surplus earnings as permitted by applicable law. To date we have consistently paid a quarterly dividend to our shareholders.

Our aggregate quarterly dividend payments for the last three full fiscal years were as follows:

2008	\$ 1.42 per share
2009	\$ 1.82 per share
2010	\$ 1.44 per share

Significant Changes

Other than those significant events described in this annual report, if any, there have not been any significant changes since December 31, 2010.

Item 9. The Offer and Listing.

Share Listings and Trading Prices

Our ordinary shares are listed on the TASE and are quoted on Nasdaq under the symbol “ESLT”.

The high and low sale prices for our ordinary shares for the five most recent fiscal years are:

	Nasdaq		TASE (1)	
	High	Low	High	Low
2006	\$34.03	\$23.00	\$33.60	\$22.96
2007	\$59.56	\$32.32	\$59.93	\$32.47
2008	\$63.40	\$36.25	\$62.64	\$36.06
2009	\$70.50	\$40.50	\$69.78	\$40.27
2010	\$66.65	\$46.80	\$65.69	\$46.70

The high and low quarterly sale prices for our ordinary shares for the two most recent full financial years and the next subsequent quarter are:

	Nasdaq		TASE (1)	
	High	Low	High	Low
2009				
First Quarter	\$49.94	\$40.50	\$43.56	\$40.27
Second Quarter	\$61.90	\$45.72	\$60.30	\$44.75
Third Quarter	\$70.50	\$57.82	\$69.78	\$62.66
Fourth Quarter	\$69.69	\$60.12	\$69.25	\$59.36
2010				
First Quarter	\$66.65	\$59.27	\$65.69	\$58.67

Edgar Filing: ELBIT SYSTEMS LTD - Form 20-F

Second Quarter	\$65.35	\$48.50	\$64.97	\$48.77
Third Quarter	\$55.31	\$49.35	\$54.83	\$48.33
Fourth Quarter	\$55.71	\$46.80	\$55.13	\$46.70
2011				
First Quarter (through February 28, 2011)	\$55.94	\$48.78	\$56.09	\$48.87

79

The monthly high and low sale prices of our ordinary shares for the most recent six months are:

	Nasdaq		TASE (1)	
	High	Low	High	Low
September 2010	\$53.18	\$50.38	\$52.82	\$50.91
October 2010	\$55.75	\$51.99	\$55.14	\$51.98
November 2010	\$53.20	\$46.80	\$53.58	\$46.70
December 2010	\$52.95	\$50.57	\$53.21	\$50.70
January 2011	\$55.95	\$48.78	\$56.15	\$49.72
February 2011	\$51.81	\$48.94	\$52.88	\$48.87

(1) The closing prices of our ordinary shares on the TASE have been translated into U.S. dollars using the daily representative rate of exchange of the NIS to the U.S. dollar as published by the Bank of Israel for the applicable day of the high/low amount in the specified period.

Item 10. Additional Information.

General Provisions of Israeli Law and Related Provisions of Articles of Association

Israeli Companies Registrar. We are registered with the Israeli Companies Registrar. The registration number issued to us by the Companies Registrar is 52-004302-7.

The Companies Law and Restated Articles of Association. The Companies Law is the basic corporation law governing Israeli publicly and privately held companies. The Companies Law mandates specific provisions be included in an Israeli company's articles of association, which are included in Elbit Systems Restated Articles of Association (the Articles of Association).

Purpose. Elbit Systems' purpose, as described in Article 3 of the Articles of Association, includes any objectives permitted by law.

Appointment and Removal of Directors. See Item 6. Directors, Senior Management and Employees – Board of Directors.

Internal Auditor and Audit Committee. Publicly held Israeli companies are required to appoint an internal auditor. The main role of the internal auditor is to examine whether the company's activities comply with the law, integrity and orderly business procedures. Publicly held companies are also required to establish an audit committee of the board of directors. The audit committee must consist of at least three directors qualified under the Companies Law, including all External Directors. Our Audit Committee and internal auditor operate in accordance with an audit committee charter that provides the framework for their functions, consistent with applicable Israeli and U.S. laws and regulations. (See Item 6. Directors, Senior Management and Employees – Board Practices – Audit Committee.)

Office Holders

The Companies Law specifies the duty of care and fiduciary duties that an “Office Holder” owes to a company. An Office Holder is defined as a director, general manager, chief business manager, deputy general manager, vice general manager, any other person who fulfills these functions without regard to that person’s title or other manager directly subordinate to the general manager. Each person listed above in Item 6. Directors - Senior Management and Employees - Directors and Executive Officers, is an Office Holder of Elbit Systems.

Under the Companies Law, an Office Holder’s fiduciary duty includes the general duty to act in good faith and for the benefit of the company, avoiding any conflict of interest between the Officer Holder’s position in the company and his or her personal affairs. The fiduciary duty also includes avoiding any competition with the company and avoiding exploiting any business opportunity of the company in order to receive personal advantage for the Office Holder or others. Also, the Office Holder is required to disclose to the company any information or documents relating to the company’s affairs that the Officer Holder has received due to his or her position as an Office Holder. Under the Companies Law voting agreements among directors are considered a breach of fiduciary duty. The duty of care requires an Office Holder to act in a way that a reasonable Office Holder would act in the same position and under similar circumstances. This includes the duty to utilize reasonable means to obtain information regarding the advisability of a given action submitted for his or her approval or performed by virtue of his or her position and all other relevant information. In addition, all compensation arrangements that are not extraordinary between a company and Office Holders who are not directors require, in accordance with the Company’s Articles of Association, approval of the Compensation Committee of our Board (with the exception of arrangements relating to the Company’s President, which require approval of the Board as a whole.) Compensation arrangements that are extraordinary between a company and Office Holders, and any compensation of directors require the approval of the audit committee and the board of directors. In some cases, compensation of directors may also require shareholder approval. (See below “Approval of Certain Transactions”). Elbit Systems’ directors are compensated at rates approved by a general meeting of shareholders. (See Item 6. Directors, Senior Management and Employees – Compensation of Directors and Officers.)

Approval of Certain Transactions

Approval Procedures. The Companies Law requires that certain transactions, actions and arrangements, mainly with related parties, be approved as provided for in the Companies Law and in a company's articles of association and in many cases by the audit committee and by the board of directors. Sometimes shareholder approval is also required.

Personal Interest and Extraordinary Transactions. The Companies Law requires that an Office Holder or a controlling shareholder (see "Provisions Relating to Major Shareholders" below) of a publicly traded company immediately disclose (and no later than the first board meeting the transaction is discussed) any "Personal Interest" that he or she may have and all related material information known to him or her, in connection with any existing or proposed transaction of the company. A director with a Personal Interest in any such matter that is brought for approval of the audit committee or board of directors may not be present at the meeting where the matter is being deliberated or approved and may not vote on the matter, unless a majority of the members of the audit committee or of the board of directors (as the case may be) have a Personal Interest in the approval of the relevant transaction. In the event that the majority of the members of the board of directors have a Personal Interest in the relevant transaction, the approval of the shareholders is also required. Personal Interest also includes any interest held by the Office Holder's spouse, siblings, parents, grandparents, descendants, spouse's descendants and the spouses of any of them. It also includes an interest by any entity in which the Office Holder or his or her relative is a 5% or greater shareholder, director or general manager or in which he or she has the right to appoint at least one director or the general manager. An "extraordinary transaction" is other than in the ordinary course of business, other than on market terms or is likely to have a material impact on the company's profitability, assets or liabilities.

Approval of Transactions

The Companies Law requires approval by the board of directors for transactions that are not extraordinary with an Office Holder or in which an Office Holder has a Personal Interest, unless the company's articles of association provide otherwise. (See above "Office Holders".)

The Companies Law requires approval by both the audit committee and the board of directors for the following transactions:

- (1) extraordinary transactions with an Office Holder or in which an Office Holder has a Personal Interest;
- (2) the grant of an exemption, insurance, undertaking to indemnify or indemnification under a permit to indemnify, to an Office Holder who is not a director;
- (3) material actions or arrangements that may otherwise be considered a breach of fiduciary duty of an Office Holder;
or
- (4) terms of service of directors, including the grant of indemnification, exemption or insurance and terms of employment of directors in other roles.

Except for certain specific exemptions under the Companies Law, matters referred to in (4) above also require shareholder approval, including, where applicable, a specified percentage of non-interested shareholders.

Except for certain specific exemptions under the Companies Law, extraordinary transactions with controlling shareholders or extraordinary transactions with another person in which the controlling shareholder has a Personal Interest, including a private offering in which the controlling shareholder has a Personal Interest, as well as terms of service of controlling shareholders or certain of their relatives who serve as employees or Office Holders of the

applicable company require approval by the audit committee, the board of directors and a general meeting of shareholders by a special majority as provided in the Companies Law. (See also “Provisions Relating to Major Shareholders” below.)

Exemption, Insurance and Indemnification of Directors and Officers

Exemption, Insurance and Indemnification under the Companies Law

Under the Companies Law, an Israeli company may not exempt an Office Holder from liability with respect to a breach of his or her duty of loyalty, but may exempt in advance an Office Holder from his or her liability to the company, in whole or in part, with respect to a breach of his or her duty of care, provided that a relevant provision is included in the company's articles of association. However, a company may not exempt in advance a director from his or her liability to the company with respect to a breach of duty of care in connection with a distribution made by the company.

The Companies Law permits a company to obtain an insurance policy covering liabilities of Office Holders resulting from a breach of the Office Holder's duty of care to the company or to another person, provided that a relevant provision is included in the company's articles of association. Insurance may also be obtained to cover liabilities from the breach of his or her fiduciary duty to the company, to the extent that the Office Holder acted in good faith and had reasonable cause to believe that the act would not prejudice the interests of the company. It may also cover monetary liabilities charged against an Office Holder while serving the company.

Under the Companies Law, a company may indemnify an Office Holder against any monetary liability incurred in his or her capacity as an Office Holder whether imposed on him or her in favor of another person pursuant to a judgment, a settlement or an arbitrator's award approved by a court. A company can also indemnify an Office Holder against reasonable litigation expenses, including attorneys' fees, incurred by him or her in his or her capacity as an Office Holder, in a proceeding instituted against him or her by the company, on its behalf or by a third party, or in connection with criminal proceedings in which the Office Holder was acquitted, or as a result of a conviction for a crime that does not require proof of criminal intent or in which an indictment was not brought against the Office Holder. These indemnifications are subject to the inclusion of relevant provisions in the company's articles of association.

Also under the Companies Law, provided that a relevant provision is included in the company's articles of association, a company may indemnify an Office Holder against reasonable litigation expenses, including attorneys' fees, incurred by him or her in his or her capacity as an Office Holder, in an investigation or proceeding by an authority authorized to conduct such investigation or proceeding in which no indictment was filed and no monetary payments in lieu of criminal proceedings were imposed against the Office Holder, or monetary payments in lieu of criminal proceedings were imposed on him or her provided that the alleged criminal offense does not require proof of criminal intent.

Under the Companies Law, a company may indemnify an Office Holder in respect of certain liabilities, either in advance of an event or following an event. If a company undertakes to indemnify an Office Holder in advance of an event, the indemnification, other than reasonable litigation expenses, must be limited to foreseeable events in light of the company's actual activities at the time the company undertook such indemnification and also limited to reasonable amounts or criteria under the circumstances, as determined by the board of directors, and the undertaking to indemnify will specify any such events, amounts or criteria.

A company may not indemnify an Office Holder or enter into an insurance contract that would provide coverage for any monetary liability incurred or exempt an Office Holder from liability to the company with respect to each of the following:

- (1) a breach of fiduciary duty, except indemnification or insurance that provides coverage for a breach of a fiduciary duty to the company while acting in good faith and having reasonable cause to assume that such act would not prejudice the interests of the company;

- (2) a willful breach of the duty of care or reckless disregard for the circumstances or to the consequences of a breach of the duty of care other than mere negligence;
- (3) an act done with the intent to unlawfully realize a personal gain; or
- (4) a fine or monetary penalty imposed upon such Office Holder.

Insurance and Indemnification of Directors and Officers under the Articles of Association

Elbit Systems' Articles of Association allow for directors and officers liability insurance, subject to the provisions of the Companies Law. This insurance may cover:

- (1) a breach of his or her duty of care to Elbit Systems or to another person;
- (2) a breach of his or her fiduciary duty to Elbit Systems, provided that the director or officer acted in good faith and had reasonable cause to assume that his or her act would not harm the interests of Elbit Systems; or
- (3) any other event for which insurance of a director or officer is permitted.

In addition, Elbit Systems' Articles of Association permit indemnification, subject to the provisions of the Companies Law, retroactively or in advance, of a director or officer against:

- (1) a monetary liability imposed on the director or officer or paid by him or her in favor of a third party under a judgment, including a judgment by way of compromise or a judgment of an arbitrator approved by a court; however, such undertaking will be limited to events which, in the Board's opinion, are foreseeable in light of the Elbit Systems' actual activities at the time of granting the obligation to indemnify, and to a sum or criteria as the Board deems reasonable under the circumstances, and the undertaking to indemnify will specify the aforementioned events and sum or criteria;
- (2) reasonable legal fees incurred by a director or officer in an investigation or proceeding conducted against him by an authority authorized to conduct such investigation or proceeding, provided that such investigation or proceeding (i) concludes without the filing of an indictment against the director or officer and without imposition of monetary payment in lieu of criminal proceedings, or (ii) concludes with imposing on the director or officer monetary payment in lieu of criminal proceedings, provided that the alleged criminal offense in question does not require proof of criminal intent;
- (3) reasonable expenses of the proceedings, including lawyers fees, expended by the director or officer or imposed on him or her by the court for:
 - (a) proceedings issued against him or her by or on Elbit Systems' behalf or by a third party;
 - (b) criminal proceedings from which the director or officer was acquitted; or
 - (c) criminal proceedings in which he or she was convicted but that do not require proof of criminal intent; or
- (4) any other liability or expense for which it is or may be permissible to indemnify a director or an officer.

The Articles of Association permit the grant of similar indemnification to any person acting on behalf or at the request of Elbit Systems as a director or officer of another company in which Elbit Systems is directly or indirectly a shareholder or has any other interest.

However, any indemnification so granted by Elbit Systems may not exceed 25% of Elbit Systems' consolidated equity as reflected in our last consolidated annual financial statements published prior to the payment of such indemnification.

Elbit Systems' Audit Committee, Board and shareholders approved the grant to members of our Board of indemnification letters reflecting the above conditions and limitations. Similar letters were also approved by the Audit Committee and the Board for grant to Office Holders of Elbit Systems who are not directors.

In August 2009, a general meeting of Elbit Systems' shareholders approved a framework resolution that allows Elbit Systems to purchase directors and officers (D&O) liability insurance that meets the framework resolution's terms. The framework resolution covers a five-year period beginning in August 2009, or until the close of our shareholders' annual general meeting to be held in 2014, whichever occurs later, and allows for an aggregate increase of insurance coverage of up to \$70 million (from the then current level of \$45 million) for any year covered by the policy. As of February 28, 2011, the D&O policy's limit of liability was up to \$65 million. The framework resolution also allows for an increase of up to a maximum aggregate of 125% of the then current annual premium (\$391,400). As of February 28, 2011, the annual premium was \$437,100. The Audit Committee and the Board must approve that any purchase of D&O insurance falls within the terms of the framework resolution.

Rights, Preferences and Restrictions of Shares

Elbit Systems currently has one type of share, this being ordinary shares. The share capital of Elbit Systems is NIS 80,000,000 divided into 80,000,000 ordinary shares of NIS 1 nominal (par) value each of which 42,763,037 ordinary shares were issued and outstanding as of February 28, 2011. All issued and outstanding ordinary shares are fully paid and non-assessable.

Each ordinary share entitles its owner to receive notices of, to attend and to cast one vote at, a general meeting of shareholders.

Our Articles of Association do not grant shareholders any rights to share in our profits other than through dividends. Subject to Israeli law, dividends may be declared by our Board and paid to the shareholders according to their respective rights. In the event that we go into liquidation, any surplus remaining after the payment of liabilities is distributed to the shareholders in proportion to the amount paid by each on account of the nominal value of the shares paid. No account is taken of any premiums paid in excess of the nominal value.

Our Board may make calls upon shareholders in respect of sums unpaid on their shares. Our Articles of Association contain no provisions which discriminate against any existing or future shareholder as a result of said shareholder holding a substantial number of shares.

A change of Elbit Systems' share capital, by way of increasing the share capital, creation of new shares, or cancellation of unissued registered shares (if there is no undertaking to allot such shares), requires a change to our Articles of Association and as such requires the vote of a special majority of the shareholders participating in a general meeting of shareholders (see "General Meetings of Shareholders" below.)

If at any time our share capital is divided into different classes of shares, we may change the rights of shareholders by way of a resolution at a general meeting of shareholders, subject to the consent of the shareholders of the class whose rights are being impaired by the proposed change or subject to the adoption of a resolution by a special majority of the general meeting of the shareholders of such class, all of which is subject to other terms if and as provided by the terms of issuance of a particular class of shares.

Our ordinary shares do not have pre-emptive rights.

General Meetings of Shareholders

An annual general meeting of our shareholders must be held once in each year and not later than 15 months after the preceding annual general meeting. The Board determines the location of the meeting. All shareholders are entitled to attend and vote in person or by proxy at annual general meetings. Notice of annual general meetings may be sent by us by personal delivery or by sending it by prepaid registered mail. Such notice may be sent by cablegram, telex, facsimile or other electronic means provided confirmation is made by registered mail as stated above. Such notice should be sent to shareholders at the address in our records. Any general meeting that is not an annual general meeting is called an extraordinary general meeting. All shareholders are entitled to attend and vote in person or by proxy at extraordinary general meetings.

In general, subject to the Companies Law, ordinary resolutions in a general meeting require approval of a majority of the votes cast at the general meeting, whether in person or by proxy. (For information as to the required majority for the approval of related party transactions, see "Provisions Relating to Major Shareholders" below.) However, under our Articles of Association, some resolutions require a special majority of at least 67% of all votes properly cast at a general meeting, without taking into account abstentions.

Our Board may convene an extraordinary general meeting when and as it sees fit. In addition the Board must, according to statute, convene an extraordinary general meeting if it receives a demand to do so from either (i) at least two directors, (ii) at least one quarter of the members of the Board or (iii) one or more shareholders who hold (A) an aggregate of at least 5% of our issued share capital and at least 1% of all voting rights, or (B) at least 5% of all voting rights, and in such case the extraordinary meeting must be held not more than 56 days from the submission date of such request to the Board and not later than 35 days from the applicable notice to shareholders described below. Any demand by a person or persons, as described in (i), (ii) and/or (iii) of this paragraph, who demands that an extraordinary general meeting be convened, must be made in writing and sent to our registered office.

Subject to the provisions of our Articles of Association, as well as applicable law and regulations, including applicable laws and regulations of any stock market on which our shares are listed, notice of an annual general meeting and of an extraordinary general meeting must be sent at least 21 days (and in some cases at least 35 days) in advance to all shareholders recorded in our shareholders registry. Such notice must include the place, date and hour of the meeting, the agenda for the meeting, the proposed resolutions and instructions for proxy voting.

The quorum required for a meeting of shareholders, except in the case of certain extraordinary meetings convened in special circumstances, consists of at least two shareholders present in person or by proxy or other voting instrument and holding or representing between them at least one-third of the voting power. The chairman of our Board presides at each of our shareholders' meetings. A meeting adjourned for lack of a quorum will be adjourned to the same day in the following week, at the same time and place, or to the day, time and place that the Board determines, with notice to the shareholders. At the reconvened meeting, if a quorum is not present within one-half hour from the time appointed for holding the adjourned meeting, the required quorum then is two shareholders, present in person or by proxy or other voting instrument, representing at least 10% of the voting power. Nasdaq Listing Rule 5620(c) provides that a company listed on the Nasdaq Global Select Market should have a quorum requirement for shareholder meetings of at least one-third of the company's outstanding common voting stock. As described above, our general quorum requirement is consistent with the Nasdaq Listing Rule. However, in the case of an adjourned meeting, our Articles of Association, consistent with what is permissible under the Companies Law, provide for a 10% quorum requirement.

Limitations on Non-Israeli Shareholders

No limitations exist or are imposed by Israeli law or our constituent documents with regard to the rights of non-Israeli shareholders or shareholders not resident in Israel to hold or exercise voting rights except for shareholders who are subjects of countries that are enemies of the State of Israel. (For a description of Israeli regulations relating to acquisitions of a controlling interest in Israeli defense companies see Item 4. Information on the Company – Governmental Regulation – Approval of Israeli Defense Acquisitions.)

Change of Control

Subject to certain exceptions, the Companies Law provides that a merger requires approval both by the board of directors and by the shareholders of each of the merging companies. In approving a merger, the board of directors must determine that there is no reasonable expectation that, as a result of the merger, the merged company will not be able to meet its obligations to its creditors. Creditors may seek a court order to enjoin or delay the merger if there is an expectation that the merged company will not be able to meet its obligations to its creditors. A court may also issue other instructions for the protection of the creditors' rights in connection with a merger.

Under the Companies Law, an acquisition of shares in a public company must be made by means of a tender offer to all shareholders if, as a result of the acquisition, the purchaser would hold 25% or more or 45% or more (as the case may be) of the company's voting rights. This rule does not apply if there is already another shareholder who holds 25% or more or 45% or more (as the case may be) of the company's voting rights, nor does it apply to a purchase of shares by way of a "private offering" in certain circumstances provided under the Companies Law. (For information regarding Israeli law applicable to acquisition of Israeli "Defense Entities" see Item 4. Information on the Company – Governmental Regulations – Approval of Israeli Defense Acquisitions.)

Provisions Relating to Major Shareholders

We are required by law to maintain a separate registry of shareholders that hold 5% or more of either our issued shares or voting rights.

Under the Companies Law, the disclosure requirements with respect to the disclosure of a Personal Interest that apply to an Office Holder also apply to a controlling shareholder of a public company. A controlling shareholder is a shareholder who has the ability to direct the activities of a company, including a shareholder that holds 25% or more of the voting rights if no other shareholder owns more than 50% of the voting rights in the company, but excluding a shareholder whose power derives solely from his or her position as a director of the company or any other position with the company. Except for certain specified exemptions, extraordinary transactions with a controlling shareholder or in which a controlling shareholder has a Personal Interest, including a private offering in which the controlling shareholder has a Personal Interest, and the engagement of a controlling shareholder or his or her relative as an Office Holder or employee, require the approval of the audit committee, the board of directors and the shareholders of the company, in that order. The shareholder approval must be by a majority vote, provided that either:

- such majority includes at least one-third of the total votes of shareholders who have no Personal Interest in the approval of the transaction and who are present and voting, in person, by proxy or by written ballot, at the meeting (abstentions not taken into account); or
- the total number of votes of shareholders mentioned above that are voted against the transaction do not represent more than 1% of the total voting rights in the company.

In addition, under the Companies Law, each shareholder has a duty to act in good faith in exercising his or her rights and fulfilling his or her obligations toward the company and other shareholders and to refrain from abusing his or her power in the company, such as in certain shareholder votes. In addition, specified shareholders have a duty of fairness toward the company. These shareholders include any controlling shareholder, any shareholder who knows that it possesses the power to determine the outcome of a shareholder vote and any shareholder who, pursuant to the provisions of the articles of association, has the power to appoint or to prevent the appointment of an Office Holder or any other power of the shareholder with respect to the company.

Borrowing Power

Our Articles of Association grant broad powers to the Board to have us borrow, repay borrowings, make guarantees and grant security interests in borrowings.

Material Contracts

In June 2010, Elbit Systems completed a public offering on the TASE of NIS 1.1 billion (approximately \$283 million) of Series A Notes. See Item 5. Operating and Financial Review and Prospects – Liquidity and Capital Resources – Israeli Debt Offering. Other than that, Elbit Systems has not entered into material contracts since March 1, 2008, other than in the ordinary course of business.

Exchange Controls and Other Limitations Affecting Security Holders

Non-residents of Israel may freely hold and trade our ordinary shares under general and specific permits issued under the Israeli Currency Control Law, 1978. Our Memorandum of Association and Articles of Association do not restrict the ownership of ordinary shares by non-residents of Israel. Neither the Memorandum of Association and Articles of Association nor Israeli law restrict the voting rights of non-residents.

Under the general permit given through the Israeli Currency Control Law, 1978, non-residents of Israel who buy our ordinary shares inside or outside of Israel with any foreign currency are able to receive a number of types of distributions in freely repatriable U.S. dollars or specified other currencies. These distributions include dividends, proceeds from the sale of shares and any amounts payable on the dissolution, liquidation or winding-up of Elbit

Systems.

In the last several years, the government of Israel liberalized its policies regarding exchange controls and investments in Israel and abroad.

Taxation

General

The following is a summary of some aspects of the current tax law applicable to companies in Israel, with special reference to its effect on Elbit Systems and our Israeli subsidiaries, and government programs from which Elbit Systems and some of our Israeli subsidiaries benefit.

86

The following also contains a discussion of specified Israeli and U.S. tax consequences to our shareholders. It also contains a discussion of the Israeli tax consequences to holders of our Series A Notes. See Item 5. Operating and Financial Review and Prospects – Liquidity and Capital Resources – Israeli Debt Offering. The Series A Notes are not registered for trading in the U.S. and may not be sold in the U.S. without registration or compliance with Regulation "S" under the Securities Act. Therefore, we have not included a discussion of U.S. tax consequences to holders of the Series A Notes. To the extent that the discussion is based on tax legislation that has not been subject to judicial or administrative interpretation, there can be no assurance that the views expressed in the discussion will be accepted by the tax authorities in question. The discussion is not intended, and should not be construed, as legal or professional tax advice and is not exhaustive of all possible tax considerations.

Effective Israeli Corporate Tax Rate. Elbit Systems' income tax liability in Israel is based on our unconsolidated earnings and such earnings of our Israeli-based subsidiaries. It is determined in NIS and not in U.S. dollars. Tax liability of non-Israeli subsidiaries is determined according to the law of their countries of residence. As a result, the tax provision in Elbit Systems' consolidated financial statements does not directly relate to income reported on these statements.

General Corporate Tax in Israel

In July 2009, the Knesset passed the Law for Economic Efficiency (Amended Legislation for Implementing the Economic Plan for 2009 and 2010) – 2009, which prescribes, among other provisions, an additional gradual reduction in the rates of the Israeli corporate tax and real capital gains tax starting in 2011 of the following tax rates: 2011 – 24%, 2012 – 23%, 2013 – 22%, 2014 – 21%, 2015 – 20% and 2016 and thereafter – 18%. Israeli companies were subject to 25% corporate income tax in 2010. Corporate income tax rates decreased to 24% in 2011 (according to Amendment 147 of the Israeli Tax Ordinance). Corporate tax rates applicable for 2008 and 2009 were 27% and 26% respectively.

Under the Israeli Tax Ordinance, 1961(the Ordinance) transfer pricing rules require that cross-border transactions between related parties be carried out implementing an arm's-length principle and reported and taxed accordingly.

In 2008, the Knesset passed an amendment to the Income Tax (Inflationary Adjustments) Law, 1985, which limits the scope of the law starting in 2008 and thereafter. Starting in 2008, the results for tax purposes are measured in nominal values, excluding certain adjustments for changes in the Consumer Price Index carried out in the period up to December 31, 2007. The amended law includes, among other provisions, the elimination of the inflationary additions and deductions and the addition of a deduction for depreciation starting in 2008.

Capital gains earned by Israeli companies are subject to the gradually-decreasing corporate income tax rates.

A portion of our Israeli operations have been granted "Approved Enterprise" and "Privileged Enterprise" status, as described under "Investment Law" below. These operations are subject to taxation at reduced rates applicable to those types of enterprises.

Industry Encouragement. Under the Law for the Encouragement of Industry (Taxes), 1969, a company qualifies as an "Industrial Company" if it is resident in Israel and at least 90% of its income in a given tax year, with some exceptions, comes from "Industrial Enterprises" owned by that company. An Industrial Enterprise is defined as an enterprise whose primary activity in a particular tax year is industrial manufacturing activity. We believe Elbit Systems qualifies as an Industrial Company. The principal benefits of this status are amortization of the cost of know-how and patents over an eight-year period, under certain interpretations, deduction of expenses incurred in connection with a public issuance of securities over a three-year period, accelerated depreciation for certain assets and an election under certain conditions to file a consolidated tax return with additional related Israeli Industrial Companies. Eligibility for the benefits under this law is not subject to receipt of prior approval from any governmental authority.

Investment Law

The Israeli Law for the Encouragement of Capital Investments, 1959 (the Investment Law) provides tax benefits to companies that make capital investments in eligible fixed assets. Under the Investment Law prior to an amendment in 2005, companies could apply to the Investment Center to be granted “Approved Enterprise” status for certain of their activities. Following the 2005 amendment, the Investment Law allows a company to claim a “Privileged Enterprise” status without the need to obtain approval from the Investment Center, or an “Approved Enterprise” status by applying to receive Investment Center grants. Each approval for an Approved Enterprise and each Privileged Enterprise program relates to a specific investment program.

The benefits granted to an Approved Enterprise and to a Privileged Enterprise under the Investment Law prior to the 2005 amendment and to a Privileged Enterprise after the amendment include:

- (1) Exemption from corporate tax for periods ranging between two – ten years depending on specific conditions; and
- (2) Reduced corporate tax rates for several years thereafter depending on certain conditions.

In order to maintain the benefits under the Investment Law and to obtain benefits for future programs, a company must make certain minimum investments in fixed assets and meet certain requirements to establish that it contributes to the country's economic growth and is a competitive factor for the Gross Domestic Product (a competitive enterprise).

With the exception of distribution upon complete liquidation, a distribution from income exempt under the Approved Enterprise programs benefits will subject the exempt income to corporate tax at the reduced corporate income tax rates pertaining to the Approved Enterprise programs. A distribution from income exempt under the Privileged Enterprise programs will subject the exempt income to tax at the reduced corporate income tax rates pertaining to the Privileged Enterprise programs upon distribution or complete liquidation. Distributed amounts will be subject to a 15% withholding tax.

Elbit Systems' Board and our Israeli subsidiaries' boards of directors have decided that their respective policy is not to declare dividends out of such tax-exempt income. Accordingly, no deferred income taxes have been provided on income attributable to these companies' Approved Enterprises and Privileged Enterprises, as such retained earnings are essentially permanent in duration.

As of December 31, 2010, Elbit Systems and some of our subsidiaries in Israel had active Approved Enterprise programs and Privileged Enterprise programs eligible for tax benefits. These programs will expire during the years 2011 to 2018.

In January 2011, the Knesset enacted a reform to the Investment Law, effective January 2011. According to the reform a flat rate tax would apply to companies eligible for the "Preferred Enterprise" status. In order to be eligible for Preferred Enterprise status, a company must meet minimum requirements to establish that it contributes to the country's economic growth and is a competitive factor for the Gross Domestic Product (a competitive enterprise). Certain activities such as mining, are excluded from the scope of a Preferred Enterprise, as are government-owned businesses.

Israeli companies which currently benefit from an Approved or Privileged Enterprise status and meet the criteria for qualification as a Preferred Enterprise can elect to apply the new Preferred Enterprise benefits by waiving their benefits under the Approved and Privileged Enterprise status.

Benefits granted to a Preferred Enterprise include reduced and gradually decreasing tax rates. In peripheral regions (Development Area A) the reduced tax rate will be 10% in 2011 and 2012, 7% in 2013 and 2014 and 6% starting from 2015. In other regions the tax rate will be 15% in 2011 and 2012, 12.5% in 2013 and 2014 and 12% starting from 2015. Preferred Enterprises in peripheral regions will be eligible for Investment Center grants, as well as the applicable reduced tax rates.

A distribution from a Preferred Enterprise out of the "Preferred Income" would be subject to 15% withholding tax for Israeli-resident individuals and non-Israeli residents (subject to applicable treaty rates). A distribution from a Preferred Enterprise out of the "Preferred Income" would be exempt from withholding tax for an Israeli-resident company. A company electing to waive its Privileged Enterprise or Approved Enterprise status through June 30, 2015 may

distribute “Approved Income” or “Privileged Income” subject to 15% withholding tax for Israeli resident individuals and non-Israeli residents (subject to applicable treaty rates) and exempt from withholding tax for an Israeli-resident company. Nonetheless, a distribution from income exempt under Privileged Enterprise and Approved Enterprise programs will subject the exempt income to tax at the reduced corporate income tax rates pertaining to the Privileged Enterprise and Approved Enterprise programs upon distribution, or complete liquidation in the case of a Privileged Enterprise’s exempt income.

Capital Gains to a Shareholder

Capital gains to Israeli residents. The tax rate on capital gains to a non-principal individual shareholder (those persons holding less than 10% of our ordinary shares), derived from sales of shares listed on a stock exchange, is 20% on the real capital gain accrued from January 1, 2003 and 25% to an individual principal shareholder. The real gain is based on the difference between the adjusted average value of the shares during the last three trading days before January 1, 2003 (or the adjusted original cost if it is higher than the adjusted average value) and the value of the shares at the date of sale. In the later case, the capital loss that might be set off is the difference between the adjusted average value and the value of the shares at the date of sale. Dealers in securities in Israel are taxed at regular tax rates applicable to business income. Companies resident in Israel are taxed at rates applicable to capital gains.

Capital gains to non-residents of Israel. Gains on the sale of ordinary shares traded on the TASE and on Nasdaq held by non-Israeli resident investors for tax purposes will generally be exempt from Israeli capital gains tax, subject to the provisions of the Israeli tax legislation. However, non-Israeli corporations will not be entitled to such exemption if an Israeli resident (i) has a controlling interest of 25% or more in such non-Israeli corporation, or (ii) is the beneficiary or is entitled to 25% or more of the revenues or profits of such non-Israeli corporation, whether directly or indirectly.

Capital Gains to a Holder of Series A Notes

Capital gains to Israeli residents. A capital gain for an individual derived from the sale of a debenture that is not linked to an index, such as our Series A Notes, will be taxable at a rate not to exceed 15%, or 20% in the case of a “non-principal” individual shareholder. Tax payers claiming a deduction of real interest expenses and linkage differences on debentures such as the Series A Notes will be taxed at a rate of 25% on their real capital gains. Dealers in securities in Israel are taxed at regular tax rates applicable to business income. Companies resident in Israel are taxed at rates applicable to capital gains.

Capital gains to non-residents of Israel. Gains on the sale of securities traded on the TASE, such as our Series A Notes, held by non-Israeli resident investors for tax purposes will generally be exempt from Israeli capital gains tax, subject to the provisions of the Israeli tax legislation. However, non-Israeli corporations will not be entitled to such exemption if an Israeli resident (i) has a controlling interest of 25% or more in such non-Israeli corporation, or (ii) is the beneficiary or is entitled to 25% or more of the revenues or profits of such non-Israeli corporation, whether directly or indirectly.

Taxation on Dividends Paid to a Shareholder

Income tax for individual Israeli residents. Residents of Israel are subject to income tax on distributions of dividends other than bonus shares (stock dividends). The paying company withholds at source income tax at the rate of 20%. Generally, dividends distributed from taxable income accrued during the period of benefit of an Approved Enterprise and Privileged Enterprise (see above “Investment Law”) are taxable at the rate of 15% if the dividend is distributed during the tax benefit period under the Investment Law or within 12 years after that period. (This limitation does not apply if the company qualifies as a foreign investors’ company according to the Investment Law.) These rates are the final tax on dividends.

Income tax for non-residents of Israel. Non-residents of Israel are subject to a graduated income tax on income from sources in Israel. On distributions of dividends other than bonus shares (stock dividends), the paying company withholds at the source income tax at the rate of 20%, unless a lower rate is applicable under a double taxation treaty. Accordingly, Elbit Systems withholds income tax at the source. Generally, dividends distributed from taxable income accrued during the period of benefit of an Approved Enterprise / Privileged Enterprise are taxable at the rate of 15% if the dividend is distributed during the tax benefit period under the Investment Law or within 12 years after the period.

(This limitation does not apply if the company qualifies as a foreign investors' company according to the Investment Law.) These rates are the final taxes in Israel on dividends for individual and corporate non-residents of Israel. Foreign residents who have Israeli derived income for which tax was withheld at the source are generally exempt from the duty to file tax returns in Israel for such income. This includes income from Israeli derived interest, dividends and royalties.

Taxation of Interest Income of Holders of Series A Notes

Income tax for Israeli residents. In general, an individual will be subject to tax at a rate not to exceed 20% on interest or discount fees originating from fully index-linked debentures, including debentures linked to a foreign currency. In such case, an Israeli resident individual will be tax exempt on the linkage differences derived from the debenture principal, under certain conditions. An individual will be taxable at a rate of 15% on interest or discount fees originating from debentures which are not linked to the index, whether in whole or in part, such as Series A Notes. These tax rates will not apply if any of the following conditions are met: (1) the interest represents income from a "business" or is recorded in the individual's books of account or is required to be so recorded, (2) the individual has claimed deduction of linkage differences and interest expenses on the debentures, (3) the individual is a non-principal individual shareholder or (4) the individual is employed by a corporation that paid the interest, is a supplier of goods or services to the corporation, or has other special relations with the corporation, unless the tax assessing officer is satisfied that the interest rate has been established in good faith and regardless of the existence of any such relations between the individual and the corporation. In these cases, the individual will be taxed at the marginal tax rate. The paying company will deduct tax at a rate of 15% on interest in respect of unlinked debentures, such as Series A Notes, and a rate of 20% in the case of linked debentures. A maximum tax rate will apply in the case of an individual who is a non-principal individual shareholder. The tax rate applicable to interest income (including linkage differences) or discount fees of an Israeli resident corporation is the corporate tax rate. The paying company will deduct tax at the corporate tax rate.

Income tax for foreign residents. Commencing January 1, 2009, interest, discount fees or linkage differences paid to a foreign resident on debentures listed on the TASE and issued by an Israeli resident corporation, such as Series A Notes, are typically exempt from Israeli tax, provided that the income is not produced by the foreign resident's permanent establishment in Israel. The tax exemption will not apply in the following circumstances: (1) the foreign resident is a non-principal individual shareholder in the issuing company, (2) the foreign resident is a relative, as defined in the Ordinance, of the issuing company, (3) the foreign resident is an employee, a supplier of goods or services or has special relations with respect to the issuing company (unless it is demonstrated that the interest rate or discount fees have been determined in good faith and regardless of the existence of any special relations) or (4) a foreign resident company held by Israeli residents. If the tax exemption does not apply as above, the tax rate applicable to interest income received by foreign residents (individuals and corporations) originating from securities will be established in accordance with the provisions of the Ordinance, or in accordance with the provisions of the relevant treaty for the avoidance of double taxation signed between the State of Israel and the foreign resident's country of residence. In such case, the paying company will deduct withholding tax according to the rates prescribed in the Ordinance as above, and this rate may be reduced subject to the relevant treaty for the avoidance of double taxation. As indicated above, the Series A Notes are not registered under the Securities Act and may not be offered or sold in the United States or to U.S. Persons (as defined in Regulation "S" under the Securities Act) without registration under the Securities Act or an exception from the registration requirements of the Securities Act.

Israeli Tax on United States Shareholders

Dividends paid by Elbit Systems to a shareholder resident in the United States are generally subject to withholding tax deducted at source in Israel. Israel and the United States are parties to a tax treaty. Under the treaty, the withholding tax rate on a dividend is normally 25% (following amendment 147 to the Ordinance the applicable withholding tax for dividends paid after January 1, 2006 is 20% of the dividend amount) or 15% in connection with an Approved Enterprise / Privileged Enterprise. (See above "Investment Law.")

A U.S. corporation would have a reduced withholding rate on dividends if it were to own 10% or more of Elbit Systems' voting shares under specified conditions. The reduced withholding tax rate on the dividend would be 12.5%. The U.S. corporation must own at least 10% of the voting shares during the portion of Elbit Systems' tax year before

the payment of the dividend and during the entire prior tax year. The reduced rate is also subject to two other conditions. First, not more than 25% of Elbit Systems' gross income for the prior tax year could consist of interest, other than interest received from banking, financing or similar businesses or from certain subsidiaries. Second, the dividend cannot be derived from income during any period for which Elbit Systems is entitled to the reduced tax rate applicable to an Approved Enterprise / Privileged Enterprise. In this case the withholding tax rate would be 15%.

Since Elbit Systems' ordinary shares are traded on the TASE and on Nasdaq, gains on the sale of ordinary shares held by non-Israeli resident investors for tax purposes will generally be exempt from Israeli capital gains tax, subject to the provisions of the Israeli tax legislation. Under the terms of the tax treaty, Israel may tax capital gains realized by shareholders resident in the United States on a sale of ordinary shares of Elbit Systems if certain conditions exist, however, such right is subject to the above exemption.

Subject to certain conditions and limitations, any Israeli tax withheld or paid with respect to dividends on ordinary shares will generally be eligible for credit against a U.S. shareholder's U.S. federal income tax liability at such U.S. shareholder's election. The U.S. Internal Revenue Code of 1986, as amended, (the Code) provides limitations on the amount of foreign tax credits that a U.S. shareholder may claim, including extensive separate computation rules under which foreign tax credits allowable with respect to specific categories of income cannot exceed the U.S. federal income taxes otherwise payable with respect to each such category of income. U.S. shareholders that do not elect to claim a foreign tax credit may instead claim a deduction for Israeli income tax withheld or paid, but only for a year in which these U.S. shareholders elect to do so for all foreign income taxes. Dividends with respect to the ordinary shares will generally be classified as foreign source "passive income" for the purpose of computing a U.S. shareholder's foreign tax credit limitations for U.S. foreign tax credit purposes. The rules relating to foreign tax credits are complex, and each U.S. holder of our ordinary shares should consult his or her tax advisor to determine whether and if he or she would be entitled to this credit.

This summary of Israeli taxation is based on existing treaties, laws, regulations and judicial and administrative interpretations. There can be no assurance that any of these may not be amended or repealed, possibly with retroactive effect, or that a tax authority may take a contrary position. Also, this summary does not address the tax consequences that may be applicable to specific persons based on their individual circumstances. It also does not address any local or other foreign tax consequences. A shareholder or holder of Series A Notes should consult his or her own tax advisor as to the specific tax consequences of purchasing, holding or transferring shares or Series A Notes of Elbit Systems.

United States Federal Income Tax Considerations

General

The following is a summary of material U.S. federal income tax considerations regarding the acquisition, ownership and disposition of Elbit Systems' ordinary shares by a "U.S. Shareholder," which, for these purposes, means a beneficial owner of an ordinary share who is, for U.S. federal income tax purposes:

- a citizen or individual resident of the United States for U.S. federal income tax purposes;
- a corporation (or an entity taxable as a corporation for U.S. federal income tax purposes) created or organized in or under the laws of the United States or any political subdivision thereof (including the District of Columbia);
- an estate whose income is subject to U.S. federal income taxation regardless of its source; or
- a trust if (A) a U.S. court is able to exercise primary supervision over the trust's administration and (B) one or more U.S. persons have the authority to control all of the trust's substantial decisions.

If a partnership or other entity treated as a partnership for U.S. federal income tax purposes holds ordinary shares of Elbit Systems, the tax treatment of a partner generally will depend upon the status of the partner and the activities of the partnership. A partner in a partnership that holds our ordinary shares is urged to consult its own tax advisor regarding the specific tax consequences of owning and disposing of our ordinary shares.

This summary is based on provisions of the Code, existing and proposed U.S. Treasury regulations, administrative pronouncements, rulings and judicial decisions in effect as of the date of this annual report. These authorities and their interpretation are subject to change, possibly with retroactive effect. In addition, this summary does not discuss all aspects of U.S. federal income taxation that may be applicable to investors in light of their particular circumstances or to investors who are subject to special treatment under U.S. federal income tax law, including U.S. expatriates, insurance companies, banks, regulated investment companies, securities broker-dealers, financial institutions, tax-exempt organizations, persons holding ordinary shares as part of a straddle, hedging or conversion transaction, persons subject to the alternative minimum tax, persons who acquired their Elbit Systems' ordinary shares pursuant to the exercise of employee stock options or otherwise as compensation, persons having a functional currency other than the U.S. dollar, persons owning (directly, indirectly or by attribution) 10% or more of our outstanding voting shares and persons not holding ordinary shares as capital assets.

Dividends

A U.S. Shareholder generally will be required to include in gross income, as ordinary dividends, the amount of any distributions paid on ordinary shares of Elbit Systems to the extent of Elbit Systems' earnings and profits out of current or accumulated earnings and profits, including the amount of any Israeli taxes withheld in respect of such dividend. Dividends paid by Elbit Systems do not qualify for the dividends-received deduction applicable in certain cases to U.S. corporations.

The amount of any distribution paid in NIS, including the amount of any Israeli withholding tax thereon, will be included in the gross income of a U.S. Shareholder of ordinary shares in an amount equal to the U.S. dollar value of the NIS calculated by reference to the spot rate of exchange in effect on the date the distribution is received by the U.S. Shareholder. If a U.S. Shareholder converts dividends paid in NIS into U.S. dollars on the day Elbit Systems distributes the dividends, the U.S. Shareholder generally should not be required to recognize foreign currency gain or loss with respect to such conversion. If the NIS received in the distribution are not converted into U.S. dollars on the date of receipt, any foreign currency gain or loss recognized upon a subsequent conversion or other disposition of the NIS will be treated as U.S. source ordinary income or loss. Special rules govern and special elections are available to accrual method taxpayers to determine the U.S. dollar amount that should be included in income in the case of taxes withheld in a foreign currency. Accrual basis taxpayers are urged to consult their own tax advisors regarding the requirements and the elections applicable in this regard.

Any dividends paid by us to a U.S. Shareholder on our ordinary shares will be treated as foreign source income and will be categorized as "passive income" or, in the case of certain U.S. Shareholders, "financial services income" for U.S. foreign tax credit purposes. Dividend income generally will constitute "passive category income" or, in the case of certain U.S. Shareholders, "general category income." Subject to the limitations in the Code, as modified by the applicable tax treaty, a U.S. Shareholder may elect to claim a foreign tax credit against its U.S. federal income tax liability for Israeli income tax withheld from dividends received in respect of ordinary shares. U.S. Shareholders who do not elect to claim the foreign tax credit may instead claim a deduction for Israeli income tax withheld, but only for a year in which the U.S. Shareholder elects to do so with respect to all foreign income taxes. A deduction does not reduce U.S. tax on a dollar-for-dollar basis as it does for a tax credit. The deduction, however, is not subject to the limitations applicable to foreign tax credits. The rules relating to the determination of the foreign tax credit are complex. Accordingly, if you are a U.S. Shareholder of ordinary shares, you should consult your own tax advisor to determine whether and to what extent you would be entitled to the credit.

Certain U.S. Shareholders (including individuals) are eligible for reduced U.S. federal income tax rates (at a maximum rate of 15%) in respect of "qualified dividend income" received in taxable years beginning before January 1, 2013. For this purpose, qualified dividend income generally includes dividends paid by a non-U.S. corporation if, among other things, the U.S. Shareholder meets certain minimum holding periods and the non-U.S. corporation satisfies certain requirements, including that either (i) the shares with respect to which the dividend has been paid are readily tradable on an established securities market in the United States, or (ii) the non-U.S. corporation is eligible for the benefits of a comprehensive U.S. income tax treaty (such as the U.S. Treaty), which provides for the exchange of information. We currently believe that dividends paid with respect to our ordinary shares should constitute qualified dividend income for U.S. federal income tax purposes. We anticipate that our dividends will be reported as qualified dividends on Forms 1099-DIV delivered to U.S. Shareholders. Each individual U.S. Shareholder of ordinary shares is urged to consult his or her own tax advisor regarding the availability to him of the reduced dividend tax rate in light of his or her own particular situation and regarding the computations of his or her foreign tax credit limitation with respect to any qualified dividend income paid by us, as applicable.

Sale, exchange or other disposition

Upon the sale, exchange or other disposition of ordinary shares, a U.S. Shareholder generally will recognize capital gain or loss equal to the difference between the U.S. dollar value of the amount realized on the sale, exchange or other disposition and the U.S. Shareholder's adjusted tax basis, determined in U.S. dollars, of the ordinary shares. Any gain or loss recognized upon the sale, exchange or other disposition of the ordinary shares will be treated as long-term capital gain or loss if, at the time of the sale, exchange or other disposition, the holding period of the ordinary shares exceeds one year. In the case of individual U.S. Shareholders, capital gains generally are subject to U.S. federal income tax at preferential rates if specified minimum holding periods are met. The deductibility of capital losses by a U.S. Shareholder is subject to significant limitations. U.S. Shareholders should consult their own tax advisors in this regard.

In general, gain or loss recognized by a U.S. Shareholder on the sale, exchange or other disposition of ordinary shares will be U.S. source income or loss for U.S. foreign tax credit purposes. Pursuant to the applicable tax treaty, however, gain from the sale or other disposition of ordinary shares by a holder who is a U.S. resident, for purposes of the applicable tax treaty, and who sells the ordinary shares within Israel, may be treated as foreign source income for U.S. foreign tax credit purposes.

U.S. Shareholders who hold ordinary shares through an Israeli stockbroker or other Israeli intermediary may be subject to an Israeli withholding tax on any capital gains recognized if the U.S. Shareholder does not obtain approval of an exemption from the Israeli Tax Authorities. U.S. Shareholders are advised that any Israeli tax paid under circumstances in which an exemption from such tax was available will not give rise to a deduction or credit for foreign taxes paid for U.S. federal income tax purposes. U.S. Shareholders are advised to consult their Israeli stockbroker or intermediary regarding the procedures for obtaining an exemption.

If a U.S. Shareholder receives NIS upon the sale of ordinary shares, that U.S. Shareholder may recognize ordinary income or loss as a result of currency fluctuations between the date of the sale of the ordinary shares and the date the sales proceeds are converted into U.S. dollars.

Passive Foreign Investment Company rules

A non-U.S. corporation will be classified as a Passive Foreign Investment Company (a PFIC) for any taxable year if at least 75% of its gross income consists of passive income (such as dividends, interest, rents, royalties (other than rents or royalties derived in the active conduct of a trade or business and received from an unrelated person) or gains on the disposition of certain minority interests), or at least 50% of the average value of its assets consists of assets that produce, or are held for the production of, passive income. We currently believe that we were not a PFIC for the year ended December 31, 2010. However, this conclusion is a factual determination that must be made at the close of each year and is based on, among other things, a valuation of our ordinary shares and assets, which will likely change from time to time. If we were characterized as a PFIC for any taxable year, a U.S. Shareholder would suffer adverse tax consequences. These consequences may include having gains realized on the disposition of ordinary shares treated as ordinary income rather than capital gains and being subject to punitive interest charges on certain dividends and on the proceeds of the sale or other disposition of the ordinary shares. Furthermore, dividends paid by a PFIC are not eligible to be treated as “qualified dividend income” (as discussed above).

The PFIC rules are complex. U.S. Shareholders should consult their own tax advisors regarding the potential application of the PFIC rules to the ownership of our ordinary shares.

Informational reporting and backup withholding

Dividend payments with respect to ordinary shares and proceeds from the sale, exchange or other disposition of ordinary shares may be subject to informational reporting to the Internal Revenue Service (the IRS) and possible U.S. backup withholding at a current rate of 28%. Backup withholding will not apply, however, to a holder who furnishes a correct taxpayer identification number or certificate of foreign status and makes any other required certification or who is otherwise exempt from backup withholding. U.S. persons who are required to establish their exempt status generally must provide IRS Form W-9 (Request for Taxpayer Identification Number and Certification). Non-U.S. Shareholders generally will not be subject to U.S. informational reporting or backup withholding. However, such holders may be required to provide certification of non-U.S. status (generally on IRS Form W-8BEN) in connection with payments received in the United States or through certain U.S.-related financial intermediaries.

Backup withholding is not an additional tax. Amounts withheld as backup withholding may be credited against a holder’s U.S. federal income tax liability, and a holder may obtain a refund of any excess amounts withheld by filing

the appropriate claim for refund with the IRS and furnishing any required information.

Holders of our ordinary shares should consult their own tax advisors concerning the specific U.S. federal, state and local tax consequences of the ownership and disposition of the ordinary shares in light of their particular situations as well as any consequences arising under the laws of any other taxing jurisdiction. In particular, U.S. Shareholders are urged to consult their own tax advisors concerning whether they will be eligible for benefits under the above-mentioned tax treaty.

Documents on Display

We are subject to the informational requirements of the Securities Exchange Act of 1934, as amended. In accordance with these requirements, we file reports and other information with the SEC. These materials, including this annual report and its exhibits, may be inspected and copied at the SEC's Public Reference Room (the Public Reference Room) at 100 F Street, N.E., Washington, D.C. 20549, and copies of the materials may be obtained from the Public Reference Room at prescribed rates. The public may obtain information on the operation of the Public Reference Room by calling the SEC in the United States at 1-800-SEC-0330.

Item 11. Quantitative and Qualitative Disclosures About Market Risk.

General

Market risks relating to our operations result primarily from changes in exchange rates and interest rates. Except when we view it necessary, we do not invest in derivative financial instruments or other market risk sensitive instruments. Other than our investment in ARS, we do not believe that we were exposed to any material market risk at December 31, 2010. (For more information on our ARS holdings see Item 5. Operating and Financial Review and Prospects – Critical Accounting Policies – Valuation of Securities – and Liquidity and Capital Resources – Auction Rate Securities.) In addition, in June 2010, we completed a public offering on the TASE of NIS 1.1 billion (approximately \$283 million) of Series A Notes that bear a fixed-rate of interest through 2020. See Item 5. Operating and Financial Review and Prospects – Liquidity and Capital Resources – Israeli Debt Offering.

Exchange Rate Risk Management

General

While our functional currency is the U.S. dollar, we also have some non-U.S. dollar or non-U.S. dollar linked currency exposures. These exposures are mainly derived from our revenues and expenses denominated in foreign currencies and non-U.S. dollar accounts receivable, payments to suppliers and subcontractors, obligations in other currencies and payroll related expenses incurred, mainly in NIS. Some subcontractors are paid in local currency under prime contracts where we are paid in U.S. dollars.

We take various measures to compensate for the effects of fluctuations in exchange rates. These measures include currency hedging transactions (in which we purchase foreign exchange contracts to reduce the volatility of cash flows primarily related to forecasted revenue denominated in certain foreign currencies) and attempts to maintain a balance between monetary assets and liabilities in our functional currencies. We also attempt to share currency risks with subcontractors on a "back-to-back" basis, by having the subcontractor assume a proportional amount of the exchange risk.

We use currency hedging contracts to limit exposure to changes in foreign currency exchange rates associated with revenue denominated in a foreign currency, primarily GBP and Euro. We also use currency hedging contracts to hedge against anticipated costs to be incurred in a foreign currency, primarily NIS, and to limit our exposure to exchange rate fluctuations related to payroll expenses incurred in NIS. The objective of the foreign exchange contracts

is to better ensure that the U.S. dollar-equivalent cash flows are not adversely affected by changes in U.S. dollar/foreign currency exchange rates. In accordance with ASC 815 “Derivatives and Hedging” (ASC 815), these contracts are designated as cash flow hedges. The gain on the effective portion of a cash flow hedge is initially reported as a component of accumulated other comprehensive income and subsequently reclassified into revenues when the hedged exposure affects revenues, or as financial expenses, if the hedged transaction becomes probable of not occurring. Any gain after a hedge is re-designated because the hedged transaction is no longer probable of occurring or related to an ineffective portion of a hedge is recognized immediately as financial expenses.

We also use forward exchange contracts and options strategies in order to limit the exposure to exchange rate fluctuation associated with payroll expenses mainly incurred in NIS. We elected not to follow the designation and documentation processes required to qualify these contracts or strategies for the hedge accounting method under ASC 815, and any gain or loss derived from such instruments is recognized immediately as financial expenses.

Anticipated Transactions

Our anticipated transactions denominated in foreign currencies, with respect to our entities whose functional currency is the U.S. dollar, include firmly committed sales and purchase contracts in Euro, GBP and NIS. Our firmly committed sales contracts maturing in 2011 include \$66 million in Euro, \$51 million in GBP and \$278 million in NIS. Our firmly committed sales contracts maturing in 2012 include \$53 million in Euro, \$13 million in GBP and \$170 million in NIS. Our firmly committed sales contracts maturing in 2013 include \$13 million in Euro, \$2 million in GBP and \$68 million in NIS. Our firmly committed purchase contracts maturing in 2011 include \$27 million in Euro, \$3 million in GBP and \$148 million in NIS. Our firmly committed purchase contracts maturing in 2012 include \$2 million in Euro, \$4 million in GBP and \$13 million in NIS. Our firmly committed sales and purchase contracts maturing in each of the years 2013, 2014 and 2015 are not material.

As of December 31, 2010, the total anticipated sales transactions for the five-year period ending December 31, 2015 were \$136 million, \$66 million and \$529 million for Euro, GBP and NIS, respectively. The total anticipated purchase transactions for the five-year period ending December 31, 2015 were \$37 million, \$10 million, and \$234 million for Euro, GBP and NIS, respectively.

The firmly committed sales and purchase contracts described above do not include those of our subsidiaries whose functional currency is not the U.S. dollar and whose exchange rate exposure was not material.

Forward Exchange Contracts Related to Our Anticipated Transactions. We enter into forward exchange hedging contracts in order to limit our exposure to exchange rate fluctuations for our firmly committed sales and purchase contracts described above. As of December 31, 2010, the principal notional amount of the related forward exchange contracts, net, maturing in 2011 was \$70 million in Euro (average exchange rate of 1.35) and \$66 million in GBP (average exchange rate of 1.64) and for those maturing in 2012, \$34 million in Euro (average exchange rate of 1.38) and \$13 million in GBP (average exchange rate of 1.87). The principal notional amounts of our related forward exchange contracts, net, maturing in each of the years 2013, 2014 and 2015 are not material. The total principal notional amounts of our forward exchange contracts, as of December 31, 2010 were \$128 million and \$81 million for Euro and GBP, respectively. (For fair value as of December 31, 2010, see above Item 5. Operating and Financial Review and Prospects – Impact of Inflation and Exchange Rates – Foreign Currency, Derivatives and Hedging.) We also enter into forward exchange hedging contracts to limit our exposure to exchange rate fluctuations related to payroll expenses incurred in NIS. These include forward contracts with principal notional amount of \$114 million in NIS (average exchange rate of 3.72) maturing in 2011. These also include a total of \$12 million in NIS – put and call options (one-half in put options with an average exchange rate of 3.6 and one-half in call options with an average exchange rate of 3.68). All of the options have maturities of 12 months or less.

Other Derivative Instruments. We also entered into derivative instruments to limit our exposure to exchange rate fluctuations related to loans incurred in GBP. These include forward contracts with principal amount of \$20 million (average exchange rate of 1.57) maturing in 2013. (For fair value as of December 31, 2010, see above Item 5. Operating and Financial Review and Prospects – Impact of Inflation and Exchange Rates – Foreign Currency, Derivatives and Hedging.)

Interest Rate Risk Management

On December 31, 2010, our liquid assets were comprised of cash and cash equivalents, bank deposits, and short and long-term loans. Our deposits are mainly in U.S. dollars, and our debt is mainly in bank loans in U.S. dollars at floating interest rates as well as the Series A Notes. (See above Item 5. Operating and Financial Review and Prospects – Israel Debt Offering.) The majority of our borrowings are usually linked to the relevant LIBOR plus a spread of 0.75% – 2.57%, and therefore are exposed to changes in interest rates. Should interest rates either increase or decrease, such change may affect our results of operations due to changes in the cost of the liabilities and the return on the assets that are based on variable rates. Most of our loans will mature within the next two to three years.

Item 12. Description of Securities Other than Equity Securities.

Not applicable.

Item 13. Defaults, Dividend Arrearages and Delinquencies.

Not applicable.

Item 14. Material Modifications to the Rights of Security Holders and Use of Proceeds.

Not applicable.

Item 15. Controls and Procedures.

Disclosure Controls and Procedures. We maintain disclosure controls and procedures designed to ensure that information required to be disclosed in our periodic filings with the SEC is recorded, processed, summarized and reported within the time periods specified in the SEC's rules and forms. These controls and procedures also provide that such information is accumulated and communicated to our management, including our Chief Executive Officer (CEO) and Chief Financial Officer (CFO), as appropriate, to allow timely decisions regarding required disclosure. In designing and evaluating the disclosure controls and procedures, management recognized that any controls and procedures, no matter how well designed and operated, can provide only reasonable assurance of achieving the desired control objectives. Also, management necessarily was required to use its judgment in evaluating the cost to benefit relationship of possible disclosure controls and procedures. As of December 31, 2010, we performed an evaluation of the effectiveness of the design and operation of our disclosure controls and procedures. The evaluation was performed with the participation of senior management of major business areas and key corporate functions, and under the supervision of the CEO and CFO. Based on the evaluation, our management, including the CEO and CFO, concluded that our disclosure controls and procedures were effective. There have been no significant changes in our internal controls or in other factors that could significantly affect internal controls after the date we completed the evaluation.

Management's Annual Report on Internal Control Over Financial Reporting

Our management is responsible for establishing and maintaining adequate internal control over financial reporting. Internal control over financial reporting is defined in Rules 13a-15(f) under the Securities Exchange Act of 1934, as amended, as a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles and includes those policies and procedures that: (1) pertain to the maintenance of records that in reasonable detail accurately and fairly reflect our transactions and dispositions of assets, (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that our receipts and expenditures are being made in accordance with authorizations of our management and directors and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use or disposition of our assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements including the possibility of human error and the circumvention or overriding of sound control procedures. Projections of any evaluation of effectiveness to future periods are subject to the risks that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Our management, including our CEO and CFO, assessed the effectiveness of our internal control over financial reporting as of December 31, 2010. In making this assessment, management used the criteria set forth by the Committee of Sponsoring Organizations of the Treadway Commission (COSO) in “Internal Control – Integrated Framework.” Based on this assessment, management believes that, as of December 31, 2010, our internal control over financial reporting is effective.

Our management’s assessment of and conclusion on the effectiveness of internal control over financial reporting did not include the internal controls of Azimuth, Soltam, Saymar, ITL Optronics, M7, Ares and Periscopio, which were acquired in 2010, and are included in our 2010 consolidated financial statements and constituted in the aggregate, as of December 31, 2010, \$193 million of total assets and \$53 million of revenues, for the year then ended. Our audit of internal control over financial reporting also did not include an evaluation of the internal control over financial reporting of the above-mentioned subsidiaries.

The effectiveness of our internal control over financial reporting as of December 31, 2010 has been audited by Kost Forer Gabbay & Kasierer, an independent registered public accounting firm in Israel and a member of Ernst & Young Global, as stated in their report included in Item 18. Financial Statements.

Changes in Internal Control over Financial Reporting. During the period covered by this annual report, there have not been any changes in our internal control over financial reporting (as such term is defined in Rules 13a-15(f) and 15d-15(f) under the Securities Exchange Act of 1934, as amended) that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

Item 16A. Audit Committee Financial Expert.

Avraham Asheri, Yehoshua Gleitman and Yigal Ne’eman, members of our Audit Committee, each meets the criteria of an “Audit Committee Financial Expert” under the applicable rules and regulations of the SEC, and each of their designations as an Audit Committee Financial Expert has been ratified by the Board. They are all “independent”, as that term is defined in the Nasdaq listing standards.

Item 16B. Code of Ethics.

We have adopted a code of business conduct and ethics that is applicable to all our directors, officers and employees including our principal executive, financial and accounting officers and persons performing similar functions. The code of ethics was approved by our Board and covers areas of professional and business conduct. It is intended to promote honest and ethical behavior, including fair dealing and the ethical handling of conflicts of interest. The code of ethics includes a “whistleblower” process to encourage reports of violations. Our code of ethics is posted on our website: www.elbitsystems.com.

Item 16C. Principal Accountant Fees and Services.

At the annual general shareholders meeting held in November 2010, our shareholders reappointed Kost Forer Gabbay & Kasierer (Kost), an independent registered public accounting firm and member of Ernst & Young Global (E&Y), to serve as our independent auditors. Kost and other E&Y affiliates billed the Company the following fees for professional services in each of the last two fiscal years:

	Year Ended December 31	
	2010	2009
	(U.S. dollars in thousands)	
Audit Fees	\$ 3,152	\$ 2,889
Tax Fees	\$ 424	\$ 489
Total	\$ 3,576	\$ 3,378

“Audit Fees” are the aggregate fees for the audit of our consolidated annual financial statements. This category also includes services generally provided by the independent auditor, such as consents and assistance with and review of documents filed with the SEC, as well as with documentation related to Sarbanes-Oxley Act implementation. It also

includes fees billed for accounting consultations regarding the accounting treatment of matters that occur in the regular course of business, implications of new accounting pronouncements and other accounting issues that occur from time to time.

“Tax Fees” are the aggregate fees billed for professional services rendered for tax compliance and tax advice, other than in connection with the audit. Tax compliance involves preparation of original and amended tax returns, tax planning and tax advice.

Kost and other E&Y affiliates did not bill the Company for services other than the Audit Fees and Tax Fees described above for fiscal year 2010 or fiscal year 2009.

Our Audit Committee has adopted a pre-approval policy for the engagement of our independent accountant to perform permitted audit and non-audit services. Under this policy, which is designed to assure that such engagements do not impair the independence of our auditors, the Audit Committee pre-approves annually a range of specific audit and non-audit services in the categories of Audit Service, Audit-Related Services, Tax Services and other services that may be performed by our independent accountants, and the maximum pre-approved fees that may be paid as compensation for each pre-approved service in those categories. The Audit Committee is notified periodically and before commencement of any work in these categories. Any proposed services exceeding the pre-approved fees or which includes other scope of work requires specific pre-approval by the Audit Committee. Accordingly, all of the above-mentioned independent audit fees were pre-approved by our Audit Committee.

Items 16D. Exemptions from the Listing Standards for Audit Committees.

Not applicable.

Items 16E. Purchases of Equity Securities by the Issuer and Affiliated Purchasers.

Reference is made to the disclosure relating to changes in shareholdings of major shareholders in Item 7 of this annual report on Form 20-F.

Items 16F. Changes in Registrant’s Certifying Accountant.

Not Applicable.

Items 16G. Corporate Governance.

Our corporate governance practices do not differ in any significant way from those followed by U.S. domestic companies listed on the Nasdaq, except with respect to shareholder meeting quorum requirements in the event of an adjourned meeting, where we follow home country practices. (See Item 10. Additional Information - General Meetings of Shareholders.)

Item 17. Financial Statements.

Not applicable.

Item 18. Financial Statements.

See Consolidated Financial Statements attached to this annual report on Form 20-F.

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

To the Shareholders and Board of Directors of
Elbit Systems Ltd.

We have audited the accompanying consolidated balance sheets of Elbit Systems Ltd. (“Elbit Systems”) and its subsidiaries as of December 31, 2010 and 2009, and the related consolidated statements of income, changes in shareholders’ equity and cash flows for each of the three years in the period ended December 31, 2010. Our audits also included the financial statement schedule listed in the index at item 19 of the Annual Report on Form 20-F. These consolidated financial statements and schedule are the responsibility of Elbit Systems’ management. Our responsibility is to express an opinion on these consolidated financial statements and schedule based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audits to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the consolidated financial statements referred to above present fairly, in all material respects, the consolidated financial position of Elbit Systems and its subsidiaries as of December 31, 2010 and 2009, and the consolidated results of their operations and their cash flows for each of the three years in the period ended December 31, 2010, in conformity with U.S generally accepted accounting principles. Also, in our opinion, the related financial statement schedule, when considered in relation to the basic financial statements taken as a whole, presents fairly in all material respects the information set forth therein.

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), Elbit Systems’ internal control over financial reporting as of December 31, 2010, based on criteria established in Internal Control-Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission, and our report dated March 14, 2011, expressed an unqualified opinion thereon.

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM
ON INTERNAL CONTROL OVER FINANCIAL REPORTING

To the Shareholders and Board of Directors of
Elbit Systems Ltd.

We have audited Elbit Systems Ltd.'s ("Elbit Systems") internal control over financial reporting as of December 31, 2010, based on criteria established in Internal Control-Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission (the "COSO criteria"). Elbit Systems' management is responsible for maintaining effective internal control over financial reporting and for its assessment of the effectiveness of internal control over financial reporting included in the Management's Report on Internal Control over Financial Reporting. Our responsibility is to express an opinion on Elbit Systems' internal control over financial reporting based on our audit.

We conducted our audit in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether effective internal control over financial reporting was maintained in all material respects. Our audit included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, testing and evaluating the design and operating effectiveness of internal control based on the assessed risk, and performing such other procedures as we considered necessary in the circumstances. We believe that our audit provides a reasonable basis for our opinion.

A company's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use or disposition of the company's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

As indicated in the accompanying Management's Report on Internal Control Over Financial Reporting, management's assessment of and conclusion on the effectiveness of internal control over financial reporting did not include the internal controls of Azimuth Technologies Ltd., Soltam Systems Ltd., Saymar Ltd., ITL Optronics Ltd., M7

Aerospace LP, Ares Aeroespacial e Defesa S.A. and Periscopio Equipamentos Optronicos S.A. (the "Acquired Entities"), which were acquired in 2010. These subsidiaries assets and revenues are included in Elbit Systems' 2010 consolidated financial statements and constituted \$193 million of total assets as of December 31, 2010 and \$53 million of revenues for the year then ended. Our audit of internal control over financial reporting of Elbit Systems also did not include an evaluation of the internal control over financial reporting of the Acquired Entities.

In our opinion, Elbit Systems maintained, in all material respects, effective internal control over financial reporting, as of December 31, 2010, based on the COSO criteria.

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), the consolidated balance sheets of Elbit Systems and its subsidiaries as of December 31, 2010 and 2009, and the related consolidated statements of income, changes in shareholders' equity and cash flows for each of the three years in the period ended December 31, 2010, and our report dated March 14, 2011, expressed an unqualified opinion thereon.

ELBIT SYSTEMS LTD. AND ITS SUBSIDIARIES

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

U. S. dollars (In thousands)

Note 1 -

GENERAL

A. Elbit Systems Ltd. ("Elbit Systems") is an Israeli corporation, 45.4% owned by the Federmann Group. Elbit Systems' shares are traded on the Nasdaq National Market in the United States ("Nasdaq") and on the Tel Aviv Stock Exchange ("TASE"). Elbit Systems and its subsidiaries (collectively the "Company") are engaged mainly in the field of defense electronics, homeland security and commercial aviation. Elbit Systems' principal wholly-owned subsidiaries are the Elbit Systems of America, LLC ("ESA") companies, Elbit Systems Electro-Optics Industries Elop Ltd. ("Elop") and Elbit Systems Land and C4I Ltd. ("ESLC"). Elbit Systems also owns 70% of Elisra Electronic Systems Ltd. ("Elisra"). See Note 27.

B. A majority of the Company's revenues are derived from direct or indirect sales to governments or to governmental agencies. As a result, a substantial portion of the Company's sales is subject to the special risks associated with sales to governments or to governmental agencies. These risks include, among others, the dependency on the resources allocated by governments to defense programs, changes in governmental priorities, changes in governmental registration, changes in governmental regulations and changes in governmental approvals regarding export licenses required for the Company's products and for its suppliers. As for major customers, refer to Note 22(C).

C. On June 9, 2010, the Company completed a public offering on the Tel-Aviv Stock Exchange of NIS 1.1 billion (approximately \$283,000) Series A Notes (the "Series A Notes"). The Series A Notes were offered and sold in 2010 pursuant to a shelf prospectus that the Company filed in May 2010 with the Israeli Securities Authority and the Tel-Aviv Stock Exchange. The shelf prospectus allows the Company to offer and sell debt in Israel, from time to time, subject to a supplemental shelf offering report describing the terms of the securities offered and the specific details of the offering. The Series A Notes were not and will not be registered under the U.S. Securities Act of 1933, as amended (the "Securities Act"), and may not be offered or sold in the United States or to U.S. Persons (as defined in Regulation "S" promulgated under the Securities Act) without registration under the Securities Act or an exemption from the registration requirements of the Securities Act. See Note 16.

D. During 2010, the Company completed the following acquisitions and investments:

(1) On May 11, 2010, the Company's subsidiary, Elbit Security Systems Ltd. ("Elsec"), completed the acquisition of the balance of shares (81%) in Azimuth Technologies Ltd. ("Azimuth"), an Israeli based company, pursuant to the merger agreement signed by Azimuth and Elsec in January 2010. In November 2008, the Company purchased 19% of Azimuth shares. The aggregate purchase price for the 81% balance of Azimuth's shares was approximately \$50,000, comprised of \$41,500 in cash, and the remeasurement of its previously held 19% equity interest in Azimuth at its acquisition date fair value, using the quoted share price of Azimuth on Tel-Aviv Stock Exchange, to \$8,500, and recognized gain of approximately \$4,756 net of acquisition related in the amount of approximately \$1,600, included in "Other income, net" as part of operating results. Azimuth and its wholly-owned U.K. subsidiary, specialize in the development of military systems that provide for improved target acquisition, fire coordination, navigation and orientation. The acquisition was accounted for using the purchase method as a business combination achieved in stages. The results of Azimuth were consolidated in the Company's financial statements commencing the date of acquisition. Revenues and earnings from the acquisition date through December 31, 2010, were immaterial to the consolidated results of the Company.

U. S. dollars (In thousands, except per share data)

Note 1 -GENERAL (Cont.)

(2) On October 14, 2010, the Company's subsidiaries Kinetics Ltd. ("Kinetics") and Elsec completed the acquisition of all the shares of Soltam Systems Ltd. ("Soltam"), Saymar Ltd. ("Saymar") and ITL Optronics Ltd. ("ITL"), that were held by Mikal Ltd. ("Mikal") and its subsidiaries. The Company's above-mentioned subsidiaries completed the acquisition of an 100% interest in Soltam and Saymar, and a 87.85% interest in ITL for a total consideration of approximately \$80,500, of which \$10,200 is contingent consideration on the occurrence of future events. Simultaneously with the completion of the acquisition, Kinetics sold its holding in Mikal (approximately 19%). See Note 6(B)(2)

On February 9, 2011, Elsec completed its cash tender offer for the balance of the ordinary shares of ITL, held by the public, in consideration of \$5,900 (See Note 27(A)).

Based on the preliminary purchase price allocation ("PPA") performed by an independent advisor, the PPA was attributed to the fair value of assets and liabilities assumed as follows:

	Fair value	Expected useful lives
Working capital, net	\$ (59,650)	
Long-term assets and investments	8,166	
Property, plant and equipment	50,750	
Long-term liabilities	(44,948)	
Technology	17,300	10 years
IPR&D	8,900	10 years
Customer relationships and backlog	11,400	5-10 years
Trade name	3,100	8 years
Licenses	1,020	7 years
Non-competition	700	4 years
Non-controlling interest	(4,592)	
Deferred taxes	(5,866)	
Goodwill	94,292	
	\$ 80,572	

(3) On December 1, 2010, the Company completed the acquisition of Ares Aeroespacial e Defesa S.A ("Ares") and Periscopio Equipamentos Optronicos S.A ("Periscopio") for a purchase price of approximately \$38,000. Ares and Periscopio are involved in the area of defense electronic systems and are located in Brazil. Revenues and earnings from the acquisition date through December 31, 2010, were immaterial to the consolidated results of the Company. The Company allocated the acquired assets and liabilities assumed based on a preliminary PPA performed by an independent advisor.

(4) On December 15, 2010, the Company's U.S. subsidiary ESA acquired all the shares of M7 Aerospace LP ("M7 Aerospace") for a purchase price of approximately \$85,000. M7 Aerospace is an integrated service company, offering a full suite of aviation services in the areas of Aerostructures Manufacturing, Government Logistics Support Services, Maintenance, Repair and Overhaul, Engineering Services, Aircraft Parts and Support, Supply

Chain Management and Purchasing.

Brand name	1,900	2 years
Goodwill	29,911	
	\$ 84,416	

E. During 2009, the Company completed the following acquisitions and investments:

- (1) On February 24, 2009, the Company's subsidiary ESLC acquired all of the shares of Shiron Satellite Communications (1996) Ltd. ("Shiron"), a private-owned Israeli company engaged in the broadband communication market, for a purchase price of approximately \$16,000. The results of Shiron were consolidated in the Company's financial statements commencing the date of acquisition.
- (2) On April 7, 2009, Elbit Systems completed the purchase of the additional shares of its previously 51%-owned subsidiary Kinetics Ltd. ("Kinetics"). Elbit Systems purchased the remaining 49% of the shares from Kinetics' non-controlling shareholders for a maximum total consideration of \$118,000, of which \$110,250 was paid in cash upon closing, and the remaining balance was subject to Kinetics' 2009 financial results. Based on Kinetics 2009 actual results, the final purchase price was set as \$110,250 and the additional amount will not be paid. As this was an equity transaction between the parent and Kinetics' non-controlling shareholders, the Company reduced its shareholders' equity for the excess costs over book value related to minority interest in Kinetics (which amounted to approximately \$43,000), as required in accordance with ASC 810, "Consolidation".
- (3) On June 15, 2009, the Company signed an agreement with Mikal Ltd. ("Mikal") and its shareholders. The transaction provided for two stages. In the initial stage, the Company loaned to Mikal \$18,000. On September 14, 2009, after receiving authorization from the Israeli Antitrust Authority, the loan was converted to ordinary shares. The Mikal group was engaged in the fields of artillery, armored fighting vehicles and optronics. See Note 1(D)(2).
- (4) On November 19, 2009, Elbit Systems completed the acquisition of the assets and business of BVR Systems (1998) Ltd. ("BVR") for a purchase price of approximately \$35,000. BVR was engaged in the development and production of training, simulation and debriefing systems for air, sea and ground forces.

Note 1 -GENERAL (Cont.)

F. On December 22, 2008, the Company's 41.3%-owned subsidiary (on a fully diluted basis), MediGuide Inc. ("Mediguide"), signed a definitive agreement with St. Jude Medical to sell to St. Jude Medical all of the outstanding shares of MediGuide for \$283,000 in cash and the assumption of net liabilities totaling approximately \$17,000. Under the transaction, St. Jude Medical paid \$138,000 of the purchase price in December 2008 and \$110,000 in November 2009, with the balance due in a payment of up to \$35,000 in April 2010.

As a result of the above, the Company included in its 2008 results a gain, before income taxes, of \$100,031. The gain was included in "Other Income, net". In 2009, the Company recorded an additional gain of \$1,105 resulting from the second payment deduction of the expected transaction expenses. In 2010, upon the payment of the Company's share in the contingent proceeds in March 2010, the Company recorded a gain before income taxes of approximately \$12,800. The gain from the sale included in other income, net (See Note 25).

Proceeds received by the Company amounted to \$50,254, \$50,878 and \$12,800 in 2008, 2009 and 2010, respectively.

ELBIT SYSTEMS LTD. AND ITS SUBSIDIARIES

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS (CONT.)

U. S. dollars (In thousands)

Note 2 - SIGNIFICANT ACCOUNTING POLICIES

The consolidated financial statements have been prepared in accordance with U.S. generally accepted accounting principles ("U.S. GAAP").

A. USE OF ESTIMATES

The preparation of financial statements in conformity with generally accepted accounting principles requires management to make estimates and assumptions that affect the amounts reported in the financial statements and accompanying notes. The most significant assumptions are employed in estimates used in determining values of intangible assets, sales and return accruals, legal contingencies, tax assets and tax liabilities, stock-based compensation costs, retirement and post-retirement benefits (including the actuarial assumptions), financial instruments with no observable market quotes, as well as in estimates used in applying the revenue recognition policy. Actual results may differ from estimated results.

B. ADOPTION OF NEW ACCOUNTING POLICIES

- (1) In July 2010, the Financial Accounting Standards Board ("FASB") issued Accounting Standards Update ("ASU") 2010-20, "Disclosures about the Credit Quality of Financing Receivables and the Allowance for Credit Losses", which is intended to provide financial statement users with greater transparency about an entity's allowance for credit losses and the credit quality of its financial receivables. ASU 2010-20 is effective for the Company from January 1, 2010. As the ASU specifically excludes short-term trade accounts receivable, the adoption of the standard did not have a significant impact on the Company's consolidated financial statements.
- (2) Effective January 1, 2010, the Company adopted the new guidance contained in ASC 810 for the consolidation of variable interest entities. This new guidance replaces the prior quantitative approach for identifying which enterprise should consolidate a variable interest entity, which was based on which enterprise was exposed to a majority of the risks and rewards, with a qualitative approach, based on which enterprise has both (1) the power to direct the economically significant activities of the entity and (2) the obligation to absorb losses of, or the right to receive benefits from, the entity that could potentially be significant to the variable interest entity. Determination about whether an enterprise should consolidate a variable interest entity is required to be evaluated continuously as changes to existing relationships or future transactions. The adoption of this standard did not have a material impact on our financial position or results of operations.

C. FUNCTIONAL CURRENCY

The Company's revenues are generated mainly in U.S. dollars. In addition, most of the Company's costs are incurred in U.S. dollars. The Company's management believes that the U.S. dollar is the primary currency of the economic environment in which the Company operates. Thus, the functional and reporting currency of the Company is the U.S. dollar.

Transactions and balances of the Company and certain subsidiaries, which are denominated in other currencies, have been remeasured into U.S. dollars in accordance with principles set forth in ASC 830, "Foreign Currency Matters". All exchange gains and losses from the remeasurement mentioned above are reflected in the statement of

income as financial expenses or income, as appropriate.

F - 15

ELBIT SYSTEMS LTD. AND ITS SUBSIDIARIES

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS (CONT.)

U. S. dollars (In thousands)

Note 2 - SIGNIFICANT ACCOUNTING POLICIES (Cont.)

C. FUNCTIONAL CURRENCY (Cont.)

For those foreign subsidiaries and investees whose functional currency has been determined to be other than the U.S. dollar, assets and liabilities are translated at year-end exchange rates, and statement of income items are translated at average exchange rates prevailing during the year. Resulting translation differences are recorded as a separate component of accumulated other comprehensive income in shareholders' equity.

D. PRINCIPLES OF CONSOLIDATION

The consolidated financial statements include the accounts of Elbit Systems and its wholly and majority-owned subsidiaries.

Intercompany transactions and balances, including profit from intercompany sales not yet realized outside the Company, have been eliminated upon consolidation.

On January 1, 2009, the Company adopted an amendment to ASC 810, "Consolidation", according to which a non-controlling interest in a subsidiary is an ownership interest in the consolidated entity that should be reported as a separate component of equity in the consolidated financial statements. As such, changes in the parent's ownership interest with no change of control are treated as equity transactions, rather than step acquisitions or dilution gains or losses. The amendment clarifies that losses of partially owned consolidated subsidiaries shall continue to be allocated to the non-controlling interests even when their investment was already reduced to zero.

The amendment applies prospectively, except for the presentation and disclosure requirements, which are applied retrospectively to all periods presented. As a result, upon adoption, the Company retroactively reclassified the "Minority Interests" balance previously included in a mezzanine section of the consolidated balance sheet to be presented in a new caption in total shareholders' equity, "Non-controlling Interest". The adoption also impacted certain captions previously used on the consolidated statement of income, largely identifying net income including the portion attributable to non-controlling interest and net income attributable to Elbit Systems Ltd.'s shareholders. This amendment required the Company to classify non-controlling interest as part of the consolidated net income (\$62,372 for the year ended December 31, 2008).

The net income amounts the Company has previously reported are now presented as "Net income attributable to Elbit Systems Ltd. shareholders", and, as required, earnings per share continue to reflect amounts attributable only to Elbit Systems Ltd. shareholders. Similarly, in the statements of changes in shareholders' equity, the Company distinguished between equity amounts attributable to Elbit Systems Ltd. shareholders and amounts attributable to the non-controlling interest. Additional disclosures required by this amendment are also included in Note 21, shareholders' equity.

ELBIT SYSTEMS LTD. AND ITS SUBSIDIARIES

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS (CONT.)

U. S. dollars (In thousands)

Note 2 - SIGNIFICANT ACCOUNTING POLICIES (Cont.)

E. BUSINESS COMBINATIONS

Effective January 1, 2009, the Company adopted the amended ASC 805, "Business Combinations". ASC 805 requires recognition of assets acquired, liabilities assumed, and non-controlling interest in the acquiree at the acquisition date, measured at their fair values as of that date. This ASC also requires the fair value of acquired in-process research and development ("IPR&D") to be recorded as intangibles with indefinite lives, contingent consideration to be recorded on the acquisition date, and restructuring and acquisition-related deal costs to be expensed as incurred. Any excess of the fair value of net assets acquired over purchase price and any subsequent changes in estimated contingencies are to be recorded in earnings. In addition, changes in valuation allowance related to acquired deferred tax assets and in acquired income tax position are to be recognized in earnings.

ASC 805 is applied prospectively for all business combinations occurring after January 1, 2009, except for changes in valuation allowance related to deferred tax assets and changes in acquired income tax position originating from business combinations that occurred prior to the effective date of this ASC, which are recognized in earnings following the adoption date.

F. CASH AND CASH EQUIVALENTS

Cash equivalents are short-term highly liquid investments that are readily convertible to cash with original maturities of three months or less, when purchased.

G. SHORT-TERM BANK DEPOSITS

Short-term bank deposits are deposits with original maturities of more than three months but less than one year. The short-term bank deposits are presented at their cost, which approximates fair value.

H. AVAILABLE-FOR-SALE MARKETABLE SECURITIES

The Company accounts for all its investments in debt securities and for investments in marketable equity securities of entities in which it does not have significant influence, in accordance with ASC 320, "Investments - Debt and Equity Securities". The Company classifies all debt securities and marketable equity securities as "available-for-sale". All of the Company's investments in available-for-sale securities are reported at fair value. Unrealized gains and losses are comprised of the difference between fair value and the cost of such securities and are recognized, net of tax, as accumulated other comprehensive income ("OCI") in shareholders' equity.

Prior to 2009, declines in fair value of available-for-sale debt and equity securities that were considered other-than-temporary, based on criteria described in SAB 59, "Accounting for Non-current Marketing Equitable Securities", were charged to earnings.

ELBIT SYSTEMS LTD. AND ITS SUBSIDIARIES

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS (CONT.)

U. S. dollars (In thousands)

Note 2 - SIGNIFICANT ACCOUNTING POLICIES (Cont.)

H. AVAILABLE-FOR-SALE MARKETABLE SECURITIES (Cont.)

In 2009, the Company adopted a new guidance that changed the impairment and presentation model for its available-for-sale debt securities. Under the amended impairment model, an other-than-temporary impairment (“OTTI”) loss is recognized in earnings if the entity has the intent to sell the debt security, or if it is more likely than not that it will be required to sell the debt security before recovery of its amortized cost basis. However, if an entity does not expect to sell a debt security, it will still need to evaluate expected cash flows to be received and determine if a credit loss exists. In the event of a credit loss, only the amount of impairment associated with the credit loss is recognized currently in earnings. Amounts relating to factors other than credit losses are recorded in other comprehensive income.

Upon the adoption of the above mentioned new guidance, the Company reclassified a non-credit related amount of \$7,086, net of tax of \$1,772, for OTTI losses recognized in earning prior to January 1, 2009, as a cumulative effect adjustment that increased retained earnings and decreased OCI at January 1, 2009. As of December 31, 2010, the Company evaluated debt securities classified as available for sale for OTTI and the existence of credit losses. The cumulative amounts related to the Company’s credit loss portion of the OTTI losses on debt securities held as of December 31, 2010, that the Company does not intend to sell and it is not more likely than not that the Company will be required to sell the security prior to recovery of the amortized cost basis is \$19,883.

I. INVENTORIES

Inventories are stated at the lower of cost or market value. Inventory write-offs are provided to cover risks arising from slow-moving items or technological obsolescence for which recoverability is not probable.

Cost is determined as follows:

- Raw materials using the average or FIFO cost method.
- Work in progress:
- Costs incurred on long-term contracts in progress include direct labor, material, subcontractors, other direct costs and an allocation of overheads, which represent recoverable costs incurred for production, allocable operating overhead cost and, where appropriate, research and development costs (see Note 2(W)).
- Labor overhead is generally included on a basis of updated hourly rates and is allocated to each project according to the amount of hours expended. Material overhead is generally allocated to each project based on the value of direct material that is charged to the project.

Advances from customers are allocated to the applicable contract inventories and are deducted from the inventory balance. Advances in excess of related inventories are classified as liabilities.

Pre-contract costs are generally expenses, but can be deferred and included in inventory, only when such costs can be directly associated with a specific anticipated contract and if their recoverability from the specific anticipated contract is probable according to the guidelines of ASC 605-35.

F - 18

ELBIT SYSTEMS LTD. AND ITS SUBSIDIARIES

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS (CONT.)

U. S. dollars (In thousands)

Note 2 - SIGNIFICANT ACCOUNTING POLICIES (Cont.)

J. INVESTMENT IN AFFILIATED COMPANIES, A PARTNERSHIP AND OTHER COMPANIES

Investments in affiliated companies and a partnership that are not controlled but over which the Company can exercise significant influence (generally, entities in which the Company holds approximately between 20% and 50% of the voting rights of the investee) are presented using the equity method of accounting. Profits on intercompany sales, not realized outside the Company, are eliminated. The Company discontinues applying the equity method when its investment (including advances and loans) is reduced to zero and the Company has not guaranteed obligations of the affiliate or otherwise committed to provide further financial support to the affiliate.

Investments in preferred shares, which are not in substance common stock, are recorded on a cost basis according to ASC 323-10-15-13, "Investments-Equity Method and Joint Ventures-In-substance Common Stock" and ASC 323-10-40-1, "Investment-Equity Method and Joint Ventures-Investee Capital Transactions."

A change in the Company's proportionate share of an investee's equity, resulting from issuance of common or in-substance common shares by the investee to third parties, is recorded as a gain or loss in the consolidated income statements in accordance with ASC 323-10-40-1, "Investment-Equity Method and Joint Ventures-Investee Capital Transactions."

Investments in non-marketable equity securities of entities in which the Company does not have control or the ability to exercise significant influence over their operation and financial policies, are recorded at cost (generally when the Company holds less than 20% of the voting rights).

Management evaluates investments in affiliated companies, partnerships and other non-marketable equity securities for evidence of other-than-temporary declines in value. Such evaluation is dependent on the specific facts and circumstances. Accordingly, in determining whether other-than-temporary declines exist, management evaluates indicators for other-than-temporary declines and evaluates financial information (e.g. budgets, business plans, financial statements, etc.). During 2009, an impairment loss of \$665 related to the investment in Chip PC was recognized (see Note 6(B)(5)). During 2008, an impairment loss of \$10,514 related to the investment in Sandel Avionics Inc. was recognized (See Note 6(C)(2)).

K. VARIABLE INTEREST ENTITIES

ASC 810-10, "Consolidation" provides a framework for identifying Variable Interest Entities ("VIEs") and determining when a company should include the assets, liabilities, non-controlling interests and results of activities of a VIE in its consolidated financial statements.

The Company's assessment of whether an entity is a VIE and the determination of the primary beneficiary is judgmental in nature and involves the use of significant estimates and assumptions. Those include, among others, forecasted cash flows, their respective probabilities and the economic value of certain preference rights. In addition, such assessment also involves estimates of whether a group entity can finance its current activities, until it reaches profitability, without additional subordinated financial support.

ELBIT SYSTEMS LTD. AND ITS SUBSIDIARIES

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS (CONT.)

U. S. dollars (In thousands)

Note 2 - SIGNIFICANT ACCOUNTING POLICIES (Cont.)

K. VARIABLE INTEREST ENTITIES (Cont.)

UAV Tactical Systems Ltd. ("U-TacS"), in the U.K. is considered to be a variable interest entity. As Elbit Systems is the primary beneficiary and has both the power to direct its activities and absorb the majority of its loss or right to majority of its earnings based upon holding the majority voting rights in U-TacS (51%), U-TacS is consolidated in the Company's financial statements.

In November 2010, the Company, through its wholly-owned subsidiary, Kinetics Ltd. ("Kinetics"), signed an agreement to invest in Pearls of Wisdom Advanced Technologies Ltd. ("Pearls of Wisdom"), an amount of up to \$18,000. The investment will be performed in several stages over several years and the Company's holdings in Pearls of Wisdom will increase gradually. The Company's initial ownership percentage is less than 50%

Pearls of Wisdom is considered to be a variable interest entity. The Company has determined that it is not the primary beneficiary as it lacks the powers to direct the activities of Pearls of Wisdom that most significantly impact the entity's economic performance.

L. LONG-TERM RECEIVABLES

Long-term trade and other receivables, with long-term payment terms, which are considered collectible, are recorded at their estimated present values (determined based on the market interest rates at the date of initial recognition).

M. LONG-TERM BANK DEPOSITS

Long-term bank deposits are deposits with maturities of more than one year. These deposits are presented at cost and earn interest at market rates. Accumulated interest to be received over the next year is recorded as a current asset. The deposits and accumulated interest approximate fair value.

N. PROPERTY, PLANT AND EQUIPMENT

Property, plant and equipment are stated at cost, net of accumulated depreciation and investment grants. For equipment produced for the Company's own use, cost includes materials, labor and overhead (including interest costs, when applicable) but not in excess of the fair value of the equipment.

Depreciation is calculated by the straight-line method over the estimated useful life of the assets at the following annual rates:

	%
Buildings and leasehold improvements (*)	2-33
Instruments, machinery and equipment	3-33
Office furniture and other	6-33
Motor vehicles	12-33 (Mainly 15%)

(*) Prepayments for operating lease and leasehold improvements are amortized generally over the term of the lease or the useful life of the assets, whichever is shorter.

F - 20

ELBIT SYSTEMS LTD. AND ITS SUBSIDIARIES

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS (CONT.)

U. S. dollars (In thousands)

Note 2 - SIGNIFICANT ACCOUNTING POLICIES (Cont.)

O. INVESTMENT GRANTS

As a governmental incentive for industrial companies in Israel, the "Investment Center", which is a branch of the Israel Ministry of Industry and Trade, permits industrial companies to submit a request to qualify as an "Approved Enterprise". An Approved Enterprise is entitled to certain benefits in respect of capital investments. The benefits may be in the form of reduced tax rates and of capital grants received as a percentage of the investments of the Approved Enterprise. The amount of a capital grant is determined as a percentage of the Approved Enterprise investment in property, plant and equipment. These capital grants are non-royalty bearing and are not conditioned on the results of operations. As the capital grants are a direct participation in the cost of the acquisition of property, plant and equipment, they are offset against the cost of property, plant and equipment.

P. OTHER INTANGIBLE ASSETS

Other identifiable intangible assets mainly consist of purchased technology, customer relations and trademarks. These intangible assets are stated at cost net of accumulated amortization and impairments, and are amortized over their useful life using the straight-line method, or the accelerated method, which ever better reflects the applicable expected utilization pattern.

Q. IMPAIRMENT OF LONG-LIVED ASSETS

The Company's long-lived assets and finite-lived intangible assets are reviewed for impairment in accordance with ASC 360-10-35 "Property, Plant and Equipment – Subsequent Measurement" whenever events or changes in circumstances indicate that the carrying amount of an asset may not be recoverable. Recoverability of assets (or assets group) to be held and used is measured by a comparison of the carrying amount of an asset to the future undiscounted cash flows expected to be generated by the asset. If an asset is determined to be impaired, the impairment to be recognized is measured by the amount by which the carrying amount of the asset exceeds its fair value. For each of the three years in the period ended December 31, 2010, no material impairment has been identified.

As required by ASC 820, "Fair Value Measurements", the Company applies assumptions that marketplace participants would consider in determining the fair value of long lived assets (or assets groups).

ELBIT SYSTEMS LTD. AND ITS SUBSIDIARIES

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS (CONT.)

U. S. dollars (In thousands)

Note 2 - SIGNIFICANT ACCOUNTING POLICIES (Cont.)

R.GOODWILL IMPAIRMENT

Goodwill is subject to an annual impairment test at the reporting unit level (or more frequently if impairment indicators arise).

The Company identified several reporting units based on the guidance of ASC 350, "Intangibles – Goodwill and Other".

ASC 350 prescribes a two-phase process for impairment testing of goodwill. The first phase screens for impairment, while the second phase (if necessary) measures impairment.

Goodwill impairment is deemed to exist if the net book value of a reporting unit exceeds its estimated fair value. In such case, the second phase is then performed, and the Company measures impairment by comparing the carrying amount of the reporting unit's goodwill to the implied fair value of that goodwill. An impairment loss is recognized in an amount equal to the excess. For each of the three years in the period ended December 31, 2010, no material impairment losses have been identified.

As required by ASC 820, "Fair Value Measurements", the Company applies assumptions that market place participants would consider in determining the fair value of each reporting unit.

S.SEVERANCE PAY

Elbit Systems' and its Israeli subsidiaries' obligations for severance pay are calculated pursuant to Israel's Severance Pay Law based on the most recent salary of the employees multiplied by the number of years of employment, as of the balance sheet date and are presented on an undiscounted basis (the "Shut Down Method"). Employees are entitled to one month's salary for each year of employment or a portion thereof. The obligation is provided by monthly deposits with insurance policies and by an accrual. The value of these policies is recorded as an asset on the Company's balance sheet. The deposited funds may be withdrawn only upon the fulfillment of the obligation, pursuant to the Severance Pay Law or labor agreements. The value of the deposited funds is based on the cash surrender value of these policies and includes profits (or losses) accumulated to balance sheet date.

Elbit Systems and its Israeli subsidiaries have entered into an agreement with some of their employees implementing Section 14 of the Severance Pay Law and the General Approval of the Labor Minister dated June 30, 1998, issued in accordance to the said Section 14, mandating that upon termination of such employees' employment, all the amounts accrued in their insurance policies shall be released to them. The severance pay liabilities and deposits covered by these plans are not reflected in the balance sheet as the severance pay risks have been irrevocably transferred to the severance funds.

Severance pay expenses for the years ended December 31, 2010, 2009 and 2008 amounted to approximately \$50,228, \$42,999 and \$51,567, respectively.

T. PENSION AND OTHER POSTRETIREMENT BENEFITS

The Company accounts for its obligations for pension, and other postretirement benefits, in accordance with ASC 715, "Compensation – Retirement Benefits" (See Note 17).

F - 22

ELBIT SYSTEMS LTD. AND ITS SUBSIDIARIES

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS (CONT.)

U. S. dollars (In thousands)

Note 2 - SIGNIFICANT ACCOUNTING POLICIES (Cont.)

U.REVENUE RECOGNITION

The Company generates revenues principally from long-term contracts involving the design, development, manufacture and integration of defense systems and products. In addition, to a minor extent, the Company provides support and services for such systems and products.

Revenues from long-term contracts are recognized primarily using ASC 605-35, "Construction-Type and Production-Type Contracts", according to which revenues are recognized on the percentage-of-completion basis.

Sales under long-term fixed-price contracts which provide for a substantial level of development efforts in relation to total contract efforts are recorded using the cost-to-cost method of accounting as the basis to measure progress toward completing the contract and recognizing revenues using the percentage of completion basis. According to this method, sales and profits are recorded based on the ratio of costs incurred to estimated total costs at completion. In certain circumstances, when measuring progress toward completion, the Company considers other factors, such as achievement of performance milestones.

Sales and anticipated profit under long-term fixed-price contracts which provide for a substantial level of production effort are recorded on a percentage-of-completion basis, using the units-of-delivery as the basis to measure progress toward completing the contract and recognizing revenues. In certain circumstances, which involve long-term fixed-price production type contracts for non-homogenous units or small quantities of units, or when the achievement of performance milestones provides a more reliable and objective measure of the extent of progress toward completion, revenue is recognized based on the achievement of performance milestones.

Sales and anticipated profit under long-term fixed-price contracts that involve both development and production efforts are recorded using the cost-to-cost method and units-of-delivery method as applicable to each phase of the contract, as the basis to measure progress toward completion. In addition, when measuring progress toward completion under the development portion of the contract, in certain circumstances, the Company considers other factors, such as achievement of performance milestones.

The percentage-of-completion method of accounting requires management to estimate the cost and gross profit margin for each individual contract. Estimated gross profit or loss from long-term contracts may change due to differences between actual performance and original estimated forecasts. Such changes in estimated gross profit are recorded in results of operations when they are reasonably determinable by management, on a cumulative catch-up basis. Anticipated losses on contracts are charged to earnings when determined to be probable.

Sales under cost-reimbursement-type contracts are recorded as costs are incurred. Applicable estimated profits are included in earnings in the proportion that incurred costs bear to total estimated costs.

Amounts representing contract change orders, claims or other items are included in sales only when they can be reliably estimated and realization is probable. Penalties and awards applicable to performance on contracts are considered in estimating sales and profit rates and are recorded when they are probable and there is sufficient information to assess anticipated contract performance.

ELBIT SYSTEMS LTD. AND ITS SUBSIDIARIES

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS (CONT.)

U. S. dollars (In thousands)

Note 2 - SIGNIFICANT ACCOUNTING POLICIES (Cont.)

U. REVENUE RECOGNITION (Cont.)

The Company believes that the use of the percentage-of-completion method is appropriate as the Company has the ability to make reasonably dependable estimates of the extent of progress towards completion, contract revenues and contract costs. In addition, contracts executed include provisions that clearly specify the enforceable rights regarding services to be provided and received by the parties to the contracts, the consideration to be exchanged and the manner and terms of settlement. In all cases, revenue is recognized when the Company expects to perform its contractual obligations, and its customers are expected to satisfy their obligations under the contract.

Management reviews periodically the estimates of progress towards completion and project costs. These estimates are determined based on engineering estimates and past experience, by personnel having the appropriate authority and expertise to make reasonable estimates of the related costs. Such engineering estimates are reviewed periodically for each specific contract by professional personnel from various disciplines within the organization. These estimates take into consideration the probability of achievement of certain milestones, as well as other factors that might impact the contract's completion and project cost.

A number of internal and external factors affect our cost estimates, including labor rates, estimated future prices of material, revised estimates of uncompleted work, efficiency variances, linkage to indices and exchange rates, customer specifications and testing requirement changes. If any of the above factors were to change, or if different assumptions were used in estimating progress cost and measuring progress towards completion, it is possible that materially different amounts would be reported in the Company's consolidated financial statements.

In certain circumstances, sales under short-term fixed-price production type contracts or sale of products are accounted for in accordance with SAB No. 104, "Revenue Recognition in Financial Statements" ("SAB 104"), and recognized when all the following criteria are met: persuasive evidence of an arrangement exists, delivery has occurred, the seller's price to the buyer is fixed or determinable, no further obligation exists and collectability is reasonably assured.

In cases where the contract involves the delivery of products and performance of services, or other obligations (See Note 20(B)), the Company follows the guidelines specified in ASC 605-25, "Multiple-Element Arrangements", in order to allocate the contract consideration between the identified different elements.

Service revenues include contracts primarily for the provision of supplies or services other than associated with design, development or production activities. It may be a stand-alone service contract or a service element, which was separated from the design, development or production contract according to the criteria established in ASC 605-25. Service contracts primarily include operation and maintenance contracts, outsourcing-type arrangements, return and repair contracts, training, installation services, etc. Revenue from services were less than 10% of consolidated revenues in each of the fiscal years 2008, 2009 and 2010.

As for research and development costs accounted for as contract costs refer to Note 2(W).

ELBIT SYSTEMS LTD. AND ITS SUBSIDIARIES

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS (CONT.)

U. S. dollars (In thousands)

Note 2 - SIGNIFICANT ACCOUNTING POLICIES (Cont.)

V. WARRANTY

The Company estimates the costs that may be incurred under its basic warranty. Such costs are: (1) estimated as part of the total contract's cost or (2) recorded as a liability at the time revenue for delivered products is recognized. The specific terms and conditions of those warranties vary depending upon the product sold and the country in which the Company does business. Factors that affect the Company's warranty cost include the number of delivered products, engineering estimates and anticipated rates of warranty claims. The Company periodically assesses the adequacy of its recorded warranty cost and adjusts the amount as necessary. Specific warranty reserves are recorded in the period defects or potential products failures are identified and recorded based on estimates made by management. The estimates are evaluated on a periodic basis.

Changes in the Company's provision for warranty, which is included in other payables and accrued expenses in the Balance Sheet, are as follows:

	2010	2009
Balance, at January 1	\$ 126,783	\$ 92,301
Warranties issued during the year	69,213	65,493
Warranties related to acquisitions	19,015	-
Reduction due to warranties forfeited or paid during the year	(50,233)	(31,011)
Balance, at December 31	\$ 164,778	\$ 126,783

W. RESEARCH AND DEVELOPMENT COSTS

Research and development costs, net of participation grants, include costs incurred for independent research and development and bid and proposal efforts and are expensed as incurred unless the costs are related to certain contractual arrangements which are recorded as part of cost of sales, over the period that revenue is recognized, consistent with the Company's revenue recognition accounting policy. The Company does not have significant stand-alone research and development arrangements performed for others.

The Company has certain research and development contractual arrangements that meet the requirements for best efforts research and development accounting. Accordingly, the amounts funded by the customer are recognized as an offset to its research and development expenses rather than as contract revenues.

Elbit Systems and certain Israeli subsidiaries receive grants (mainly royalty-bearing) from the Israeli Chief Scientist's Office ("OCS") and from other sources for the purpose of partially funding approved research and development projects. The grants are not to be repaid, but instead Elbit Systems and certain Israeli subsidiaries are obliged to pay royalties as a percentage of future sales if and when sales from the funded projects are generated. These grants are recognized as a deduction from research and development costs at the time the applicable entity is entitled to such grants on the basis of the research and development costs incurred. Since the payment of royalties is not probable when the grants are received, the Company records a liability in the amount of the estimated royalties for each individual contract, when the related revenues are recognized, as part of cost of revenues. For more information regarding OCS royalties' commitment, please see Note 20(A).

F - 25

ELBIT SYSTEMS LTD. AND ITS SUBSIDIARIES

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS (CONT.)

U. S. dollars (In thousands)

Note 2 - SIGNIFICANT ACCOUNTING POLICIES (Cont.)

X.INCOME TAXES

The Company accounts for income taxes and uncertain tax positions in accordance with ASC 740, "Income Taxes". This guidance prescribes the use of the liability method whereby deferred tax asset and liability account balances are determined based on differences between financial reporting and tax bases of assets and liabilities and are measured using the enacted tax rates and laws that will be in effect when the differences are expected to reverse. The Company provides a valuation allowance, if necessary, to reduce deferred tax assets to amounts that are more likely than not to be realized. As part of the determination of its tax liability, management exercises considerable judgment in evaluating tax positions taken by the Company in determining the income tax provision and establishes reserves for tax contingencies.

The Company records interest and penalties related to its unrecognized tax benefit or exposures in the financial statements as income tax expense.

Y.CONCENTRATION OF CREDIT RISKS

Financial instruments that potentially subject the Company to concentrations of credit risk consist principally of cash and cash equivalents, short and long-term deposits, marketable securities and trade receivables.

The majority of the Company's cash and cash equivalents and short and long-term deposits are invested with major banks mainly in Israel and the United States. Deposits in the U.S. may be in excess of insured limits and are not insured in other jurisdictions. Management believes that the financial institutions that hold the Company's investments have a high credit rating.

The Company's trade receivables are derived primarily from sales to large and stable customers and governments located mainly in Israel, the United States and Europe. The Company performs ongoing credit evaluations of its customers and has not experienced in recent years any unexpected material losses. An allowance for doubtful accounts is recognized with respect to those amounts that the Company has determined to be doubtful of collection.

The Company entered into foreign exchange forward contracts, cross currency interest rate swaps and option strategies (together "derivative instruments") intended to protect against the increase in value of forecasted non-dollar currency cash flows and interest as applicable. These derivative instruments are designed to effectively hedge the Company's non-dollar currency and interest rates exposures (See Note 2(Z)).

Z.DERIVATIVE FINANCIAL INSTRUMENTS

The Company accounts for derivatives and hedging based on ASC 815, "Derivatives and Hedging", which requires the Company to recognize all derivatives on the balance sheet at fair value. If a derivative meets the definition of a cash flow hedge and is so designated, changes in the fair value of the derivative will be recognized in other comprehensive income until the hedged item is recognized in earnings. The ineffective portion of a derivative's change in fair value is recognized in earnings. If a derivative does not meet the definition of a hedge, the changes

in the fair value are included in earnings in "Financial income (expenses), net", in each reporting period (See Note 24).

As part of its hedging strategy, the Company enters into forward exchange contracts in order to protect the Company from the risk that the eventual dollar cash flows from the sale and buy of products to international customers will be adversely affected by changes in exchange rates.

ELBIT SYSTEMS LTD. AND ITS SUBSIDIARIES

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS (CONT.)

U. S. dollars (In thousands)

Note 2 - SIGNIFICANT ACCOUNTING POLICIES (Cont.)

Z.DERIVATIVE FINANCIAL INSTRUMENTS (Cont.)

The Company also enters into forward exchange contracts and options strategies in order to limit the exposure to exchange rate fluctuation associated with payroll expenses mainly incurred in NIS. Such forward contracts on payroll expenses that were entered into in 2010 are designated as cash flow hedges. For such contracts entered into prior to 2010, the Company elected not to follow the designation and documentation processes required to qualify for the hedge accounting method, and any gain or loss derived from such instruments is recognized immediately as "Financial income (expenses), net."

In connection with the issuance of the NIS 1.1 billion Series A Notes at the Tel Aviv Stock Exchange in 2010 (See Note 16), the Company entered into a ten-year cross-currency interest rate swap transaction with a notional principal of NIS 1.1 billion to effectively hedge the effect of interest and exchange rate difference from NIS Series A Notes. The cross currency interest rate swap effectively converts the fixed interest rate of the debt to a floating interest rate. The terms of the swap agreement substantially match the terms of the debt. Under the terms of the swap agreement, the Company will receive interest payments semi-annually in NIS at an annual rate of 4.84% on the notional principal and will pay interest semi-annually in U.S. Dollars at an annual weighted rate of 1.65% over the six-month LIBOR on the notional principal. The swap agreements are designated as a fair value hedge. The gains and losses related to changes in the fair value of the interest rate swaps are included in interest expense and substantially offset changes in the fair value of the hedged portion of the underlying hedged Series A notes.

AA.STOCK-BASED COMPENSATION

The Company accounts for share-based arrangements under ASC 718, "Compensation – Stock Compensation", which requires all share-based payments, including grants of employee stock options, to be recognized in the income statement based on their fair values.

The fair value of employee stock options is estimated at the grant date using a lattice-based option valuation model with the following weighted average assumptions:

	2010	2009	2008
Divided yield	2.20%	2.31%	1.84%
Expected volatility	31.92%	39.37%	33.72%
Risk-free interest rate	1.56%	2.43%	2.79%
Expected life	4 years	4 years	4 years
Forfeiture rate	0.56%	0.56%	0.56%
Suboptimal factor	1.75	1.75	1.75

Because lattice-based option valuation models incorporate ranges of assumptions for inputs, the average of those ranges are disclosed. Expected volatilities are based on implied volatilities from traded options on Elbit Systems' stock, historical volatility of the stock and other factors. The Company uses historical data to estimate option exercise and employee termination within the valuation model. The expected term of options granted is derived from the

output of the option valuation model and represents the period of time that options granted are expected to be outstanding. The average of the range, given above, results from certain groups of employees exhibiting different behavior. The risk-free interest rate for periods within the contractual life of the option is based on the U.S. Treasury yield curve in effect at the time of grant for periods within the contractual life of the option. The dividend yield assumption is based on historical dividends.

ELBIT SYSTEMS LTD. AND ITS SUBSIDIARIES

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS (CONT.)

U. S. dollars (In thousands)

Note 2 - SIGNIFICANT ACCOUNTING POLICIES (Cont.)

AB. FAIR VALUE OF FINANCIAL INSTRUMENTS

The carrying amount of cash and cash equivalents, short-term bank deposits, trade receivables, short-term bank credit and loans and trade payables approximate their fair values due to the short-term maturities of such instruments.

The fair value of long-term loans is estimated by discounting the future cash flows using current interest rates for loans of similar terms and maturities. The carrying amount of the long-term loans approximates their fair value.

As of December 31, 2010, the fair value of the Series A Notes based on quoted market price of the Tel-Aviv Stock Exchange was approximately \$309,600.

The Company accounts for certain assets and liabilities at fair value under ASC 820, "Fair Value Measurements and Disclosures". Fair value is an exit price, representing the amount that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants. As such, fair value is a market-based measurement that should be determined based on assumptions that market participants would use in pricing an asset or a liability.

The hierarchy below lists three levels of fair value based on the extent to which inputs used in measuring fair value are observable in the market. The Company categorizes each of its fair value measurements in one of these three levels based on the lowest level input that is significant to the fair value measurement in its entirety.

The three levels of inputs that may be used to measure fair value are as follows:

Level 1 - Observable inputs that reflect quoted prices (unadjusted) for identical assets or liabilities in active markets;

Level 2 - Includes other inputs that are directly or indirectly observable in the marketplace, other than quoted prices included in Level 1, such as quoted prices for similar assets or liabilities in active markets, quoted prices for identical or similar assets or liabilities in markets with insufficient volume or infrequent transactions, or other inputs that are observable (model-derived valuations in which significant inputs are observable), or can be derived principally from or corroborated by observable market data; and

Level 3 - Unobservable inputs which are supported by little or no market activity.

The Company's cross-currency interest rate swaps are valued under an income approach using industry-standard models that consider various assumptions, including time value, volatility factors, current market and contractual prices for the underlying, and counterparty non-performance risk. Substantially all of these assumptions are observable in the marketplace throughout the full term of the instruments, can be derived from observable data or are supported by observable levels at which transactions are executed in the marketplace.

The Company measures its marketable equity securities, debt securities and foreign currency derivative instruments at fair value. Marketable equity securities and government debt securities are classified within Level 1. The Company's investments in Auction Rate Securities ("ARS") and Collateralized Debt Obligations ("CDOs") are classified within Level 3 because they are valued using valuation techniques with significant unobservable inputs. The Company's foreign currency derivative instruments are classified within Level 2 when the valuation inputs are based on quoted prices and market observable data of similar instruments and in Level 3 when valuation inputs are based on significant unobservable data.

ELBIT SYSTEMS LTD. AND ITS SUBSIDIARIES

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS (CONT.)

U. S. dollars (In thousands)

Note 2 - SIGNIFICANT ACCOUNTING POLICIES (Cont.)

AB. FAIR VALUE OF FINANCIAL INSTRUMENTS (Cont.)

Assets and liabilities measured at fair value on a recurring basis are summarized below:

Description of	Fair value measurement at December 31, 2010 using		
	Quoted Prices in Active Markets for Identical Assets (Level 1)	Significant Other Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)
Assets			
Debt securities:			
Government bonds	\$ 824	\$ -	\$ -
ARS and CDOs	-	-	7,179
Foreign currency option contracts	-	19,100	-
Cross currency interest rate swap	-	20,377	-
Liabilities			
Foreign currency derivative contracts	-	(8,219)	(51)
Total	\$ 824	\$ 31,258	\$ 7,128

For ARS and CDO debt securities, their fair value was determined using an independent third party valuator. The fair value was based on a trinomial discount model employing assumptions that market participants would use in their estimates of fair value. The assumptions included among others, the following: the underlying structure of the security, the financial standing of the issuer, stated maturities, estimates of the probability of the issue being called at par prior to final maturity, estimates of the probability of defaults and recoveries, auctions failure and successful auction or repurchase at par for each period, expected changes in interest rates paid on the securities, interest rates paid on similar instruments, and an estimated illiquidity discount due to extended redemption periods. Finally, the present value of the future principal and interest payments was discounted at rates considered to reflect current market conditions for each security.

ELBIT SYSTEMS LTD. AND ITS SUBSIDIARIES

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS (CONT.)

U. S. dollars (In thousands)

Note 2 - SIGNIFICANT ACCOUNTING POLICIES (Cont.)

AC.BASIC AND DILUTED NET EARNINGS PER SHARE

Basic earnings per share are computed based on the weighted average number of outstanding ordinary shares during each year. Diluted earnings per share are computed based on the weighted average number of outstanding ordinary shares during each year, plus dilutive potential ordinary shares considered outstanding during the year. Outstanding stock options are excluded from the calculation of the diluted earnings per ordinary share when their effect is anti-dilutive.

The weighted average number of shares related to outstanding anti-dilutive stock options excluded from the calculations of diluted net earnings per share was 23,041, 22,599 and 35,489 for the years 2010, 2009 and 2008, respectively.

AD.IMPACT OF RECENTLY ISSUED ACCOUNTING STANDARDS

In October 2009, the FASB issued an update to ASC 605-25, "Revenue Recognition – Multiple-Element Arrangements", that provides amendments to the criteria for separating consideration in multiple-deliverable arrangements to:

- (i) Provide updated guidance on whether multiple deliverables exist, how the deliverables in an arrangement should be separated and how the consideration should be allocated;
- (ii) Require an entity to allocate revenue in an arrangement using estimated selling prices ("ESP") of deliverables if a vendor does not have vendor-specific objective evidence of selling price ("VSOE") or third-party evidence of selling price ("TPE");
- (iii) Eliminate the use of the residual method and require an entity to allocate revenue using the relative selling price method; and
 - (iv) Require expanded disclosures of qualitative and quantitative information regarding application of the multiple-deliverable revenue arrangement guidance.

The Company will adopt the provisions prospectively to new or materially modified arrangements beginning January 1, 2011. The Company is currently evaluating the impact on its consolidated results of operations and financial condition. The Company estimates that the adoption of the ASC 605-25 update will not have a material effect on its results.

AE. RECLASSIFICATIONS

Certain financial statement data for prior years has been reclassified to conform to current year financial statement presentation.

ELBIT SYSTEMS LTD. AND ITS SUBSIDIARIES

	\$ 702,364	\$ 652,524
(*)Includes affiliated companies	\$ 19,308	\$ 18,207

Unbilled receivables on long-term contracts principally represent sales recorded under the percentage-of-completion method of accounting, when sales or revenues based on performance attainment, though appropriately recognized, cannot be billed yet under terms of the contract as of the balance sheet date. Accounts receivable related to claims are items that the Company believes are earned, but are subject to uncertainty concerning determination of their ultimate realization. Such amounts were not material as of the balance sheet date. Accounts receivables and unbilled receivables, other than those detailed under Note 7, are expected to be billed and collected during 2011.

As for long-term trade receivables – see Note 7.

Opgal (4)	13,000	9,809
Others	8,375	4,936
	\$ 84,371	\$ 85,014

- (1) Semi Conductor Devices (“SCD”) is an Israeli partnership, held 50% by the Company and 50% by Rafael Advanced Defense Systems Ltd. (“Rafael”). SCD is engaged in the development and production of various thermal detectors and laser diodes. SCD is jointly controlled and therefore is not consolidated in the Company’s financial statements.
- (2) Mikal is an Israeli company. During 2009 approximately 19% of its shares were acquired by the Company’s subsidiary Kinetics, for approximately \$18,000. The Company had significant influence in Mikal due to its representation on the Board of Directors and, as such, the investment was recorded according to the equity method of accounting. During October 2010, Kinetics sold its holdings in Mikal, as part of the consideration in the purchase of Mikal’s holdings in Soltam, Saymar and ITL (See Note 1(D)(2)).
- (3) Vision Systems International LLC (“VSI”) based in San Jose, is a California limited liability company that is held 50% by ESA and 50% by a subsidiary of Rockwell Collins Inc. VSI operates in the area of helmet mounted display systems for fixed-wing military aircraft. VSI is jointly controlled and therefore is not consolidated in the Company’s financial statements.
- (4) Opgal Optronics Industries Ltd. (“Opgal”) is an Israeli company owned 50.1% by the Company and 49.9% by a subsidiary of Rafael. Opgal focuses mainly on commercial applications of thermal imaging and electro-optic technologies. The Company jointly controls Opgal with Rafael, and therefore Opgal is not consolidated in the Company’s financial statements.

B. Investments in companies accounted for under the equity method (Cont.)

(5) Chip PC Ltd. ("Chip PC") is an Israeli company, of which approximately 19% (16.3% on a fully diluted basis) is held by the Company. Chip PC develops and manufactures "Post PC" solutions, focused on enabling server-based-computing technologies to replace traditional PCs and deploy and control large numbers of workstations. In July 2007, Chip PC completed an initial public offering ("IPO") on the Tel Aviv Stock Exchange ("TASE"). Following the offer, Chip PC became a publicly-traded company registered in Israel. The Company has significant influence in Chip PC due to its representatives on the Board of Directors and as such the investment is recorded according to the equity method of accounting. As of December 31, 2008, the Company identified impairment indicators in Chip PC and wrote-down the investment in Chip PC to its fair market value of \$665, recognizing an impairment loss of approximately \$800, included in equity in net earnings of affiliated companies. During 2009, the Company wrote-off the balance of its investment in Chip PC.

(6) Equity in net earnings of affiliated companies is as follows:

	Year ended December 31,		
	2010	2009	2008

(1) ImageSat International N.V. ("ISI"), held 14% (10% on a fully diluted basis) by the Company, is engaged in the operation of satellite photography formations and commercial delivery of satellite photography for civilian purposes. See also Note 20(C)(2).

(2) Sandel Avionics, Inc. ("Sandel") based in Vista, California, produces specialized integrated display systems and other products for the commercial aviation market. In 2006, ESA's subsidiary Kollsman, Inc. ("Kollsman") acquired Preferred B Shares of Sandel, which constituted a 20% interest in Sandel on a fully diluted and as converted basis. The investment in Sandel was accounted on a cost basis in accordance with ASC 323-10. During the fourth quarter of 2008, the fair value of Sandel decreased as a result of a decrease in Sandel's backlog and estimated future cash flows. During 2008, based on a valuation prepared by an independent appraiser, the Company recognized an other-than-temporary impairment loss of approximately \$10,514 pre-tax of its investment in Sandel, which was classified in "Other income, net" in the Consolidated Statement of Income. In March 2011, the investment in Sandel was realized for consideration of \$3,000.

Marketable equity securities	-	-	-	3,427	2,069	5,496
ARS and CDOs (*)	11,792	(4,613)	7,179	11,792	(4,413)	7,445
	\$ 11,792	\$ (4,613)	\$ 7,179	\$ 37,425	\$ (1,650)	\$ 35,841

As of December 31, 2010 and 2009, short-term available for sale and trading securities include \$824 and \$739 of government bonds accounted for as trading securities.

As of December 31, 2010 the available-for-sale debt securities are due after one year.

(*) ARS and CDOs held as a result of the acquisition of Tadiran Communication Ltd. ("Tadiran") during 2007 are private placement securities with long-term contractual maturities. The Company's investments in ARS represent interests in collateralized debt obligations supported by pools of residential and commercial mortgages or credit cards, insurance securitizations and other structured credits, including corporate bonds. ARS' interest rates are reset through a "dutch" auction each month. The monthly auctions historically have provided a liquid market for these securities. CDOs are collateralized debt obligations formed for the purpose of the proceeds in a portfolio of asset-backed securities and related synthetic securities. Some of the underlying collateral for the ARS and CDOs held by the Company consists of sub-prime mortgages.

With the liquidity issues experienced in global credit and capital markets, the ARS have experienced multiple failed auctions as the amount of securities submitted for sale has exceeded the amount of purchase orders. In addition, no payment on any class of the Company's holdings in CDOs is made until all accrued and unpaid interest of each class that has seniority and that remain outstanding had been paid in full.

In 2010, while the Company continued to earn interest on the ARS at the contractual rates, their estimated market value no longer approximated par value. In addition, some of the Company's CDOs currently have no or only limited market. As there was insufficient observable market information available to determine the fair value of most of the ARS and CDOs, their fair value was determined using an independent third party valuator (See note 2(AB)).

Note 11 - GOODWILL AND OTHER INTANGIBLE ASSETS, NET

A.Composition:

	Weighted average useful lives	December 31,	
		2010	2009
Identifiable intangible assets			
Original cost:			
Technology (1)	12	\$ 248,868	\$ 187,422
Customer relations (2)	6	200,336	171,011
Trade marks and other (3)	14	64,442	55,206
		513,646	413,639
Accumulated amortization:			
Technology		98,814	81,820
Customer relations		86,166	59,654
Trademarks and other		15,073	10,982
		200,053	152,456
Amortized cost		\$ 313,593	\$ 261,183

(1)The technology acquired consists of the major items as follows:

During 2010, the Company invested \$13,800 in aerospace technology related to the M7 acquisition (See Note 1(D)(4)) and \$28,200 in armored vehicles electro-optics technologies related to the acquisition of Soltam, ITL and Saymar (See Note 1(D)(2)). During 2009, the Company invested \$7,400 in technology related to simulation and debriefing systems and \$8,200 in technology for broadband communications (See Note 1(E)). An amount of \$70,300 was allocated to technology related to communication equipment and C4ISR, with connection with the acquisition of Tadiran's shares in 2005 through 2007.

(2)Includes mainly customer relations resulting from the acquisition of Tadiran (\$137,300) and FTL (\$9,000) in 2007. The Company performed its annual impairment test on goodwill and other intangibles and determined that an impairment of the ICI customer relationships intangible asset in the amount of \$1,392 existed as of December 31, 2009 (recorded in M&A expenses). The primary impairment was the result of significantly lower margins expected for the remaining acquired customers.

(3)Includes trademarks in the amount of \$8,000 acquired in the merger with Elop in 2000, and an amount of \$33,200 that was allocated to trademarks resulting mainly from the acquisition of Tadiran in 2005 – 2007.

B.Amortization expenses amounted to \$47,729, \$42,601 and \$40,140 for the years ended December 31, 2010, 2009 and 2008, respectively.

C.The estimated aggregate amortization expense for each of the five succeeding fiscal years :

Note 16 - SERIES A NOTES AND CONVERTIBLE DEBENTURES

	December 31, 2010
Series A Notes(1)	\$ 309,946
Convertible debentures (2)	2,993
Less –Current maturities	(33,574)
Carrying amount adjustments on Series A Notes (*)	(4,011)
Discount on Series A Notes	(1,997)
	\$ 273,357

(*)As a result of fair value hedge accounting, described below, and in Notes 2(Z) and 2(AB). The carrying value of the Series A Notes is adjusted for changes in the interest rates.

(1)In June 2010, the Company issued Series A Notes in the aggregate principle amount of NIS 1.1 billion (approximately \$283,000), payable in 10 equal annual installments on June 30 of each of the years 2011 through 2020. The Series A Notes bear a fixed interest rate of 4.84% per annum, payable on June 30 and December 30 of each of the years 2010 through 2020 (the first interest payment was made on December 30, 2010, and the last interest payment will be made on June 30, 2020). During 2010, the Company recorded \$4,395 as interest expenses. Debt issuance costs were approximately \$2,530, of which \$2,164 was allocated to the Series A Notes discount, and \$366 was allocated to deferred issuance costs and are amortized as financial expense over the term of the Series A Notes due in 2020. Amortization of discount and deferred financing costs amount to \$258, as of December 31, 2010.

The Series A Notes (principal and interest) are not linked to any currency or index. The Series A Notes are unsecured, non convertible and do not restrict the Company's ability to issue additional notes of any class or distribute dividends in the future. There are no covenants on the Series A Notes. The Series A Notes are listed for trading on the Tel-Aviv Stock Exchange.

On May 13, 2010, Midroog Ltd., an Israeli rating agency, announced that it assigned its "Aa1" rating (local scale) to unsecured notes to be issued by the Company, which include the Series A Notes.

The Company also entered into ten-year cross currency interest rate swap transactions in order to effectively hedge the effect of interest and exchange rate differences resulting from the NIS Series A Notes. Under the cross currency interest rate swaps, the Company will receive fixed NIS at a rate of 4.84% on NIS 1.1 billion and pay floating six-month USD LIBOR + an average spread of 1.65% on \$287,000, which reflects the U.S. dollar value of the Series A Notes on the specific dates the transactions were entered. Both the debt and the swap instruments will pay semi-annual coupons on June 30 and December 31. The purpose of these transactions was to convert the NIS fixed rate Series A Notes into USD LIBOR (6 months) floating rate obligations. As a result of these agreements, the Company is currently paying an effective interest rate of six-month LIBOR (0.45% at December 31, 2010) plus an average of 1.65% on the principal amount, as compared to the original 4.84% fixed rate. The above transactions qualify for fair value hedge accounting.

(2) Convertible debentures were issued by ITL in July 2005. The convertible debentures bear a fixed interest of 4% per annum. The debentures are paid annually and the last payment is in July 2011.

Note 17 - BENEFIT PLANS AND OBLIGATIONS FOR TERMINATION INDEMNITY

The Company's subsidiaries ESA, Telefunken and a European subsidiary sponsor benefit plans for their employees in the U.S., Germany and Belgium, respectively, as follows:

Defined Benefit Retirement Plan based on Employer's Contributions

- a)ESA has three defined benefit pension plans (the "Plans") which cover the employees of EFW and Kollsman. Monthly benefits are based on years of benefit service and annual compensation. Annual contributions to the Plans are determined using the unit credit actuarial cost method and are equal to or exceed the minimum required by law. Pension fund assets of the Plans are invested primarily in stock, bonds and cash through a financial institution, as the investment manager of the Plans' assets. Pension expense is allocated between cost of sales and general and administrative expenses, depending on the responsibilities of the employee. The measurement date for the EFW and Kollsman benefit obligation is December 31. In November 2008, ESA ratified a new union agreement, which resulted in a higher multiplier for benefit payments.

Participation in ESA's qualified defined benefit plans was frozen as of January 1, 2010 for non-represented employees. Current participants will continue to accrue benefits; however no new non-represented employees will be allowed to enter the plan.

- b)Telefunken Radio Communication Systems GmbH & Co. ("Telefunken"), a wholly-owned German subsidiary, has mainly one defined benefit pension plan (the "P3-plan") which covers all employees. The P3-plan provides for yearly cash balance credits equal to a percentage of a participant's compensation which accumulate together with the respective interest credits on the employee's cash balance accounts. In case of an insured event (retirement, death, disability) the benefits can be paid as a lump sum, in installments or as a life-long annuity. The P3-plan is an unfunded plan.

- c)A wholly-owned European subsidiary in Belgium has a defined benefit pension plan, which is divided into two categories:

1)

Edgar Filing: ELBIT SYSTEMS LTD - Form 20-F

Normal retirement benefit plan, with eligibility at age 65. The lump sum is based on employee contributions of 2% of the final pensionable salary up to certain breakpoint, plus 6% exceeding the breakpoint at a maximum of 5% of pensionable salary, and the employer contributions, with a maximum of 40 years. The vested benefit is equal to retirement benefit calculated with the pensionable salary and pensionable service observed at the date of leaving service.

2) Pre-retirement death benefit to employees.

The plan is funded and includes profit sharing.

(e) This category represents common stocks that are traded on major exchanges.

(f) This represents common stocks of companies domiciled outside of the U.S.; they can be represented by ordinary shares or ADRs.

(g) This category represents highly liquid diverse equity mutual funds of varying asset classes and styles.

In developing the overall expected long-term rate of return on assets assumption, ESA used a building block approach in which rates of return in excess of inflation were considered separately for equity securities, debt securities, real estate and all other assets. The excess returns were weighted by the representative target allocation and added along with an approximate rate of inflation to develop the overall expected long-term rate of return. It is the policy of ESA to meet the ERISA minimum contribution requirements for a Plan year. The minimum contribution requirements for the 2009 Plan year and the quarterly contributions requirements for the 2008 Plan year have been satisfied as of December 31, 2010. Benefit payments over the next five years are expected to be \$2,893 in 2011; \$3,459 in 2012; \$4,011 in 2013, \$4,540 in 2014 and \$5,120 in 2015.

Retiree Medical Plan

Effective January 1, 2003, ESA commenced offering retiree medical benefits to a limited number of retirees at EFW, in accordance with benefits agreed upon as part of union negotiations in 2002.

The measurement date for ESA benefit obligation is December 31. The following table sets forth the retiree medical plans' funded status and amounts recognized in the consolidated financial statements for the years ended December 31, 2010 and 2009:

	1% increase	1% decrease
Net periodic benefit cost	\$ 41	\$ 36
Benefit obligation	\$ 244	\$ 219

Defined Contribution Plan

The 401(k) savings plan ("401(k) plan") is a defined contribution retirement plan that covers all eligible ESA employees, as defined in section 401(k) of the U.S. Internal Revenue Code. Employees may elect to contribute a percentage of their annual gross compensation to the 401(k) plan. ESA may make discretionary matching contributions as determined by ESA. Total expense under the 401(k) plan amounted to \$3,896, \$3,577 and \$3,115 for the years ended December 31, 2010, 2009 and 2008, respectively. Expense for the deferred 401(k) plan is allocated between cost of sales and general and administrative expenses depending on the responsibilities of the related employees.

Note 17 - BENEFIT PLANS AND ACCRUED TERMINATION LIABILITY (Cont.)

Non-Qualified Defined Contribution Plan

In 2007, ESA implemented two new benefit plans for the executives of the organization. The non-qualified, defined contribution plan is structured under Section 409(A). The plan provides the employees at vice president level and above the opportunity to defer up to 100% of their salary and bonus or any amount below that to the 409(A) plan. ESA will provide a match of 50 cents on the dollar up to 10% of the employees' total salary and incentive based compensation. The contribution can be made into the 401(k) plan, the 409(A) plan or both plans. The intent was to provide comparable defined contribution plan benefits for the senior management across three ESA locations. The 409(A) plan funds are contributed to several life insurance policies. Participant contributions transferred into the plan totaled \$543 in 2010 and the total ESA contribution to the plan was \$111 for 2010. The cash surrender value of these life insurance policies at December 31, 2010 was \$3,626. The total liability related to the 409(A) plan was \$3,745 at December 31, 2010. As of December 31, 2010, no executive had vested in the ESA contribution to the plan.

The second plan implemented is a non-qualified, defined benefit plan for the top three executives of ESA. The plan provides a calculated, guaranteed payment in addition to their regular pension through the company upon retirement. The plan is funded with several life insurance policies. They are not segregated into a trust or otherwise effectively restricted. These policies are corporate owned assets that are subject to the claims of general creditors and cannot be considered as formal plan assets. The defined benefit plan put in place meets the ERISA definition of an unfunded deferred compensation plan maintained for the benefit of a select group of management or highly compensated employees. The plan assets of life insurance policies have a cash surrender of \$1,951 at December 31, 2010. Related liability for the pension payments is \$1,803 at December 31, 2010. As of December 31, 2010, all executives partially had vested in the plan.

Note 18 - TAXES ON INCOME

A. APPLICABLE TAX LAWS

(1) Israeli Corporate Income Tax Rates

Corporate tax rates in Israel were 27% in 2008, 26% in 2009 and 25% in 2010.

In July 2009, the Knesset passed the Law for Economic Efficiency (Amended Legislation for Implementing the Economic Plan for 2009 and 2010), 2009, which prescribes, among others, an additional gradual reduction in the rates of the Israeli corporate tax and real capital gains tax starting 2011 to the following tax rates: 2011 - 24%, 2012 - 23%, 2013 - 22%, 2014 - 21%, 2015 - 20%, 2016 and thereafter - 18%.

(2) Measurement of taxable income under Israel's Income Tax (Inflationary Adjustments) Law, 1985:

In February 2008, the Knesset passed an amendment to the Income Tax (Inflationary Adjustment) Law, 1985, which limits the scope of the law starting in 2008 and thereafter. Beginning in 2008, the results for tax purposes are measured in nominal values, excluding certain adjustments for changes in the Consumer Price Index carried out in the period up to December 31, 2007. The amended law includes, inter alia, the elimination of the inflationary additions

and deductions and the additional deduction for depreciation starting in 2008.

Note 18 - TAXES ON INCOME (Cont.)

A. APPLICABLE TAX LAWS (Cont.)

(3) Tax benefits under Israel's Law for the Encouragement of Industry (Taxes), 1969:

Elbit Systems and most of its subsidiaries in Israel are "Industrial Companies", as defined by the Law for the Encouragement of Industry (Taxes), 1969, and as such, these companies are entitled to certain tax benefits, mainly amortization of costs relating to know-how and patents over eight years, accelerated depreciation and the right to deduct public issuance expenses for tax purposes.

(4) Tax benefits under Israel's Law for the Encouragement of Capital Investments, 1969:

Elbit Systems and certain of its Israeli subsidiaries ("the companies") operations have been granted "Approved Enterprise" status under Israel's Law for the Encouragement of Capital Investments, 1959 (the "Law").

Accordingly, certain income of the companies derived from the "Approved Enterprise" programs is tax exempt for two-years and subject to reduced tax rates of 25% for a five-year to eight-year period or tax exempt for a ten-year period, commencing in the first year in which the companies had taxable income (limited to twelve years from commencement of production or fourteen years from the date of approval, whichever is earlier).

An Amendment to the law from 2005 defines the "Privileged Enterprise" status rather than the previous terminology of "Approved Enterprise" and limits the scope of enterprises which may qualify for "Privileged Enterprise" status by setting criteria such as that at least 25% of the Privileged Enterprise program's income be derived from export. Additionally, the 2005 Amendment enacted major changes in the manner in which tax benefits are awarded under the Law so that companies no longer require an Investment Center approval in order to qualify for tax benefits.

As a result of the 2005-Amendment, tax-exempt income generated under Elbit Systems and certain of its Israeli subsidiaries Privileged Enterprise programs will be subject to tax upon dividend distribution or complete liquidation.

The entitlement to the above benefits is subject to the companies' fulfilling the conditions specified in the Law, regulations promulgated thereunder and the letters of approval for the specific investments in "Approved Enterprises". In the event of failure to comply with these conditions, the benefits may be canceled and the companies may be required to refund the amount of the benefits, in whole or in part, including interest. (For liens – see Note 20(J)). As of December 31, 2010, the Company's management believes that the companies are meeting all conditions of the Law and letters of approval.

As of December 31, 2010, the tax benefits for the Company's Approved Enterprise and Privileged Enterprise existing programs will expire within the period of 2011 to 2018.

As of December 31, 2010, retained earnings of the Company included approximately \$481,481 in tax-exempt profits earned by the company's "Approved Enterprises" and "Privileged Enterprises". If the retained tax-exempt

income is distributed, with respect to the "Approved Enterprises" and the "Privileged Enterprises", it would be taxed at the corporate tax rate applicable to such profits as if the Company had not elected the alternative tax benefits track (currently - 25%), and an income tax liability would be incurred of approximately \$120,370 as of December 31, 2010.

ELBIT SYSTEMS LTD. AND ITS SUBSIDIARIES

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS (CONT.)

U. S. dollars (In thousands)

Note 18 - TAXES ON INCOME (Cont.)

A. APPLICABLE TAX LAWS (Cont.)

The company's boards of directors have decided that their policy is not to declare dividends out of such tax-exempt income. Accordingly, no deferred income taxes have been provided on exempt income attributable to the companies' "Approved Enterprises" and "Privileged Enterprise", as such retained earnings are essentially permanent in duration.

In Israel, income from sources other than the "Approved Enterprise" and "Privileged Enterprise" during the benefit period will be subject to tax at the regular corporate tax rate (See Note 18(A)(1)).

Since the companies are operating under more than one approval, and since part of their taxable income is not entitled to tax benefits under the Law and is taxed at the regular tax rates, the effective tax rate is the result of a weighted combination of the various applicable rates and tax exemptions, and the computation is made for income derived from each approval on the basis of formulas specified in the law and in the approvals.

In January 2011, the Knesset enacted a reform to the Law, effective January 2011. According to the reform a flat rate tax would apply to companies eligible for the "Preferred Enterprise" status. In order to be eligible for a Preferred Enterprise status, a company must meet minimum requirements to establish that it contributes to the country's economic growth and is a competitive factor for the Gross Domestic Product (a competitive enterprise).

Israeli companies which currently benefit from an Approved or Privileged Enterprise status and meet the criteria for qualification as a Preferred Enterprise can elect to apply the new Preferred Enterprise benefits by waiving their benefits under the Approved and Privileged Enterprise status.

Benefits granted to a Preferred Enterprise include reduced and gradually decreasing tax rates. In peripheral regions (Development Area A) the reduced tax rate will be 10% in 2011 and 2012, 7% in 2013 and 2014 and 6% starting from 2015. In other regions the tax rate will be 15% in 2011 and 2012, 12.5% in 2013 and 2014 and 12% starting from 2015. Preferred Enterprises in peripheral regions will be eligible for Investment Center grants, as well as the applicable reduced tax rates.

A distribution from a Preferred Enterprise out of the "Preferred Income" would be subject to 15% withholding tax for Israeli-resident individuals and non-Israeli residents (subject to applicable treaty rates). A distribution from a Preferred Enterprise out of the "Preferred Income" would be exempt from withholding tax for an Israeli-resident company. A company electing to waive its Privileged Enterprise or Approved Enterprise status through June 30, 2015 may distribute "Approved Income" or "Privileged Income" subject to 15% withholding tax for Israeli resident individuals and non-Israeli residents (subject to applicable treaty rates) and exempt from withholding tax for an Israeli-resident company. Nonetheless, a distribution from income exempt under Privileged Enterprise and Approved Enterprise programs will subject the exempt income to tax at the reduced corporate income tax rates pertaining to the Privileged Enterprise and Approved Enterprise programs upon distribution, or complete liquidation in the case of a Privileged Enterprise's exempt income.

Note 18 - TAXES ON INCOME (Cont.)

A. APPLICABLE TAX LAWS (Cont.)

The net effect of the 2011 amendment on the deferred tax balances of the Company will be recognized in the period of enactment of the amendment (first quarter of 2011). The Company estimates that the implementation of the 2011-amendment by the Israeli subsidiaries would not lead to a material net effect on the Company's 2011 results.

B. NON – ISRAELI SUBSIDIARIES

Non-Israeli subsidiaries are taxed based on tax laws in their countries of residence.

Note 18 - TAXES ON INCOME (Cont.)

E. UNCERTAIN TAX POSITIONS

A reconciliation of the beginning and ending amount of unrecognized tax benefits is as follows:

	2010	2009
Balance at the beginning of the year	\$ 33,348	\$ 27,754
Additions related to interest	1,801	3,093
Additions based on tax positions taken during a prior period	6,022	2,324
Reduction related to tax positions taken during a prior period	(4,252)	(3,498)
Reductions related to settlement of tax matters	(1,508)	(6,341)
Additions based on tax positions taken during the current period	6,862	10,332
Reduction related to a lapse of applicable statute of limitation	-	(316)
Additions related to acquisitions	4,344	-
Balance at the end of the year	\$ 46,617	\$ 33,348

At December 31, 2010 and 2009, the Company had a liability for unrecognized tax benefits of \$46,617 and \$33,348, respectively, including an accrual of \$4,588 and \$4,126 for the payment of related interest and penalties, respectively. The Company recognizes interest and penalties related to unrecognized tax benefits in the provision for income taxes.

During 2010, Elbit Systems and its subsidiaries were subject to examination by various tax authorities in jurisdictions such as Israel, the United States and Europe.

During 2010 and 2009, the Company settled certain income tax matters in Israel and the United States covering multiple years. As a result of the settlement of the tax matters, the Company recorded a reduction in "other income taxes liabilities" of \$1,508 and \$6,341, respectively, related to settlement of tax matters of which income of \$800 and \$2,985, respectively, were recorded in the statements of income in "taxes on income."

The Company operates in multiple jurisdictions throughout the world, and its tax returns are periodically audited or subject to review by both domestic and foreign authorities. As a result of ongoing examinations, tax proceedings in certain countries, additions to unrecognized tax benefits for positions taken and interest and penalties, if any, arising in 2010, it is not possible to estimate the potential net increase or decrease to the Company's unrecognized tax benefits during the next twelve months.

Note 18 - TAXES ON INCOME (Cont.)

G.As of December 31, 2010, Elbit Systems' Israeli subsidiaries have estimated total available carry forward tax losses of approximately \$136,886, and its non-Israeli subsidiaries have estimated available carry forward tax losses of approximately \$28,990. These losses of the Israeli subsidiaries can be offset against future taxable profits for an indefinite period. Deferred tax assets in respect of the above carry forward losses amount to approximately \$21,666 in respect of which a valuation allowance has been recorded in the amount of approximately \$160.

H.Reconciliation of the theoretical tax expense, assuming all income is taxed at the statutory rate applicable to income of the Company, and the actual tax expense as reported in the statements of operations, is as follows:

	Year ended December 31,		
	2010	2009	2008
Income before taxes as reported in the consolidated statements of income	\$ 199,361	\$ 247,330	\$ 306,480
Statutory tax rate	25 %	26 %	27 %
Theoretical tax expense	\$ 49,840	\$ 64,306	\$ 82,750
Tax benefit arising from reduced rate as an "Approved and Privileged Enterprise" and other tax benefits (*)	(20,528)	(31,712)	(44,002)
Tax adjustment in respect of different tax rates for foreign subsidiaries	5,382	5,663	331
Operating carry forward losses for which valuation allowance was provided	(8,066)	(1,506)	1,215
Increase in taxes resulting from non-deductible expenses	3,020	3,133	6,775
Difference in basis of measurement for financial reporting and tax return purposes	(3,370)	4,124	6,117
Taxes in respect of prior years (**)	(2,003)	(6,400)	1,879
Other differences, net	(238)	501	(698)
Actual tax expenses	\$ 24,037	\$ 38,109	\$ 54,367
Effective tax rate	12.06 %	15.4 %	17.7 %
(*) Net earnings per share – amounts of the benefit resulting from the Approved and Privileged Enterprises			
Basic	\$ 0.48	\$ 0.75	\$ 1.05
Diluted	\$ 0.47	\$ 0.74	\$ 1.03

(**) Taxes in respect of prior years:

The Company prepares its tax provisions in accordance with the rules and estimates that are applicable at the end of each year.

In 2008, the Company recorded a tax provision in an amount of \$1,900 mainly as a result of the finalization by the Israeli Tax Authorities of the tax assessment for some of the Company's subsidiaries, which increased the Company's tax liability for prior years. This adjustment was a result of the Tax Authorities' adoption of a change in its prior position with respect to its interpretation of the relevant rules.

During 2009, the Company reduced its tax liabilities in an amount of \$6,300, mainly as a result of the finalization by the Israeli Tax Authorities of tax assessment for some of the Company's subsidiaries in Israel.

Note 20 - COMMITMENTS AND CONTINGENT LIABILITIES

A. ROYALTY COMMITMENTS

Elbit Systems and certain Israeli subsidiaries partially finance their research and development expenditures under programs sponsored by the OCS for the support of research and development activities conducted in Israel. At the time the participations were received, successful development of the related projects was not assured.

In exchange for participation in the programs by the OCS, Elbit Systems and the subsidiaries agreed to pay 2% - 5% of total sales of products developed within the framework of these programs. The royalties will be paid up to a maximum amount equaling 100% to 150% of the grants provided by the OCS, linked to the dollar and for grants received after January 1, 1999, also bearing annual interest at a rate based on LIBOR. The obligation to pay these royalties is contingent on actual sales of the products, and in the absence of such sales payment of royalties is not required.

In some cases, the Government of Israel's participation (through the OCS) is subject to export sales or other conditions. The maximum amount of royalties is increased in the event of production outside of Israel.

Elbit Systems and certain of its subsidiaries may also be obligated to pay certain amounts to the Israeli Ministry of Defense and others on certain sales including sales resulting from the development of certain technologies.

Royalties' expenses amounted to \$3,012, \$5,317 and \$3,292 in 2010, 2009 and 2008, respectively.

Note 20 - COMMITMENTS AND CONTINGENT LIABILITIES (Cont.)

B.COMMITMENTS IN RESPECT OF LONG-TERM PROJECTS

In connection with projects in certain countries, Elbit Systems and some of its subsidiaries have entered and may enter in the future into "buy-back" or "offset" agreements, required by a number of the Company's customers for these projects as a condition to the Company obtaining orders for its products and services. These agreements are customary in the Company's industry and are designed to facilitate economic flow back (buy-back) and/or technology transfer to businesses or government agencies in the applicable country.

These commitments may be satisfied by the Company's placement of direct work or vendor orders for supplies and/or services, transfer of technology, investments or other forms of assistance in the applicable country. The buy-back rules and regulations, as well as the underlying contracts, may differ from one country to another. The ability to fulfill the buy-back obligations may depend, among other things, on the availability of local suppliers with sufficient capability to meet our requirements and which are competitive in cost, quality and schedule. In certain cases, the Company's commitments may also be satisfied through transactions conducted by other parties.

The Company does not commit to buy-back agreements until orders for its products or services are definitive, but in some cases the orders for the Company's products or services may become effective only after the Company's corresponding buy-back commitments are in effect. Buy-back programs generally extend at least over the relevant commercial contract period and may provide for penalties in the event the Company fails to perform in accordance with buy-back requirements. In some cases the Company provides guarantees in connection with the performance of its buy-back obligations.

Should the Company be unable to meet such obligations it may be subject to contractual penalties, and its chances of receiving additional business from the applicable customers could be reduced or, in certain cases, eliminated.

At December 31, 2010, the Company had outstanding buy-back obligations totaling approximately \$784,000 that extend through 2020.

C.LEGAL CLAIMS

- (1) Elbit Systems and its subsidiaries are involved in legal claims arising in the ordinary course of business, including claims by employees, consultants and others. The Company's management, based on the opinion of its legal counsel, believes that the financial impact for the settlement of such claims in excess of the accruals recorded in the financial statements will not have a material adverse effect on the financial position or results of operations of the Company.

ELBIT SYSTEMS LTD. AND ITS SUBSIDIARIES

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS (CONT.)

U. S. dollars (In thousands)

Note 20 - COMMITMENTS AND CONTINGENT LIABILITIES (Cont.)

C.LEGAL CLAIMS (Cont.)

(2) Between 2007 and January 2010, various claims were filed in the U.S. District Court for the Southern District of New York (the "Federal SDNY") and the Supreme Court of the State of New York, County of New York ("New York State Court") by certain minority security holders of ImageSat International N.V. ("ImageSat") against ImageSat, Israel Aerospace Industries Ltd. ("IAI"), Elbit Systems, Elbit Systems Electro-optics Elop Ltd. ("Elop") and certain current and former officers and directors of ImageSat. The former directors include, among others, Michael Federmann, Joseph Ackerman and Joseph Gaspar (currently Elbit Systems' Board Chairman, Chief Executive Officer and Chief Financial Officer, respectively), who at various times in the past served as Elop's nominee to ImageSat's board of directors. ImageSat's largest shareholder is IAI, holding approximately 46% of ImageSat's issued share capital. Elop holds approximately 14% (7% on a fully diluted basis) of ImageSat's issued share capital and is entitled to nominate one director to ImageSat's board. The claims contained various allegations that the defendants breached their fiduciary and/or contractual obligations to the detriment of the plaintiffs. The claim alleged various causes of action and damages aggregating hundreds of millions of dollars, not all of which were alleged against Elbit Systems, Elop and/or each of the individual defendants. As of March 8, 2011, all of the above-mentioned claims have been dismissed by the Federal SDNY and the New York State Court (and applicable appellate courts) on the grounds of forum non-conveniens, except for two remaining proceedings in the New York State Court by certain of the plaintiffs, claiming a breach of the Security Holders Agreement between various security holders of ImageSat, including Elop, based on an alleged failure to appoint independent directors to the ImageSat board of directors. Elbit Systems and Elop believe such claims are baseless and have filed corresponding responses to the Court.

In April 2010, Elbit Systems and Elop were served with an Application to Approve a Derivative Action (the Application) filed in the District Court of Petach Tikva, Israel, by certain minority shareholders of ImageSat. The Application names a number of respondents, including among others, ImageSat, IAI, Elop, Elbit Systems and several former directors of ImageSat, including, among others, Michael Federmann, Joseph Ackerman and Joseph Gaspar (Elbit Systems, Elop and the above-named former directors are referred to as the "Elbit Defendants"). The Application requests the Court to approve the filing of a derivative action on behalf of ImageSat for alleged breaches by some of the respondents of the applicants' rights as minority shareholders in ImageSat. The nature of the allegations is substantially similar to those previously made by the applicants in various claims referred to above made in federal and state courts in New York. In July 2010, the Elbit Defendants filed motions to dismiss the Application on various grounds relating both to Netherland Antilles and Israeli law. The Elbit Defendants believe that there is no merit to the allegations made against them in this claim. IAI has agreed to indemnify Elbit Systems, Elop and the directors nominated by Elop to ImageSat's board, for any losses arising out of any of the foregoing claims or legal proceedings, net of insurance proceeds received from ImageSat's insurance policies and any indemnification proceeds received from ImageSat.

Note 20 - COMMITMENTS AND CONTINGENT LIABILITIES (Cont.)

C.LEGAL CLAIMS (Cont.)

- (3) In December 2009, a claim in the amount of approximately \$10 million was filed in the District Court – Central District of Israel by Pinpoint Advance Corporation (“Pinpoint”) and four of its founders against two of our Israeli subsidiaries, Elbit Systems Holdings (1997) Ltd. and Kinetics Ltd. (“Kinetics”), as well as against one of the Company officers, Jacob Gadot. Pinpoint is a special purpose acquisition company that was in negotiations with the Company and other Kinetics’ shareholders regarding the sale of shares in Kinetics during 2008. The transaction was not completed and negotiations were terminated. Pinpoint claims that the agreement was completed and thus entered into effect. Alternatively, Pinpoint claims that our decision not to complete the agreement was made in bad faith, and that under the circumstances Pinpoint and its founders are entitled to pecuniary compensation equal to their rights and entitlements under the alleged breached contract. The Company believes there is no merit to the allegations made in the claim and has responded accordingly to the Court. In March 2010, the Court requested the parties to attempt mediation, and a mediation process is ongoing.
- (4) In May 2009, Elbit Systems filed a claim in the U.S. District Court for the Southern District of Illinois against Credit Suisse Group (“CSG”). The complaint seeks to recover approximately \$16 million that Elbit Systems believes was fraudulently obtained by CSG and by its subsidiary Credit Suisse Securities (USA) from Tadiran Communications Ltd. (“Tadiran Communications”) in 2007 in connection with auction rate securities purchased by Tadiran Communications through CSG. In 2008, Tadiran Communication was merged into Elbit Systems, and Tadiran Communications’ activities are currently performed as part of Elbit Systems wholly-owned Israeli subsidiary, Elbit Systems Land and C4I Ltd. CSG filed a motion to dismiss the claim based on a release signed by Tadiran Communications in 2007. In December 2009, the case was moved to the Federal Southern District of New York. In July 2010, the Court ordered the parties to continue discovery regarding the release and ruled that the meaning and scope of the release will be decided in a hearing on summary judgment rather than on a motion to dismiss.

D.LEASE COMMITMENTS

The future minimum lease commitments of the Company under various non-cancelable operating lease agreements in respect of premises, motor vehicles and office equipment as of December 31, 2010 are as follows:

2011	\$34,802
2012	25,487
2013	15,548
2014	10,892
2015	4,921
2016 and thereafter	8,218
	\$99,868

Lease expenses for the years ended December 31, 2010, 2009 and 2008 amounted to \$15,233, \$28,812 and \$33,355, respectively.

ELBIT SYSTEMS LTD. AND ITS SUBSIDIARIES

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS (CONT.)

U. S. dollars (In thousands)

Note 20 - COMMITMENTS AND CONTINGENT LIABILITIES (Cont.)

E. GUARANTEES

- (1) As of December 31, 2010, guarantees in the amount of approximately \$967,000 were issued by banks on behalf of Company's entities mainly in order to secure certain advances from customers and performance bonds.
- (2) Elbit Systems has provided, on a proportional basis to its ownership interest, guarantees for one of its 50% - owned foreign investees in respect of credit lines granted to it by banks amounting to \$2,200 as of December 31, 2010 (2009 - \$3,400). The guarantee will exist as long as the credit lines are in effect. Elbit Systems would be liable under the guarantee for any debt for which the investee would be in default under the terms of the credit line. The fair value of such guarantee as of December 31, 2010 is not material.

F. COVENANTS

In connection with bank credits and loans, including performance guarantees issued by banks and bank guarantees in order to secure certain advances from customers, the Company and certain subsidiaries are obligated to meet certain financial covenants. Such covenants include requirements for shareholders' equity, current ratio, operating profit margin, tangible net worth, EBITDA, interest coverage ratio and total leverage. As of December 31, 2010, Elbit Systems and its subsidiaries were in full compliance with all covenants.

G. CONTINGENT LIABILITIES AND GUARANTEES

As a result of cancellation of the export authorization in 2006 to a foreign country (hereinafter: "the Customer"), Elisra and one of its subsidiaries were forced to terminate four projects. Most of the activity in respect of the projects, the total volume of which amounts to approximately \$40,000 has already been executed and the deliveries have been made to the Customer. For those projects, Elisra and its subsidiary provided to the Customer advance and performance guarantees, issued by banks and financial institutions, in the total amount of approximately \$7,000 as of December 31, 2007.

On July 28, 2008, the subsidiary received an approval from the Customer for the completion of the subsidiary's obligations in two of the abovementioned projects, the total volume of which amounts to approximately \$16,400. On September 22, 2008, the subsidiary received confirmation from a financial institution, stating that the advance and performance guarantees issued by said institution, in the amount of \$6,700 are null and void.

As of December 31, 2009, there are two remaining projects, the total volume of which amounts to approximately \$23,000. Elisra provided the Customer advance and performance guarantees related to the abovementioned projects in the amount of approximately \$5,000.

Elisra's management, based on the opinion of legal counsel, believes that termination of the projects under such circumstances constitutes a termination by mutual agreement due to force majeure, which provides a mechanism for mutual settlement between the parties.

Elisra's management, based on the opinion of its legal counsel, believes that the financial impact of the termination of the two projects in excess of the accruals recorded in the financial statements will not have a material adverse effect on the financial position or results of operations of Elisra.

Note 20 - COMMITMENTS AND CONTINGENT LIABILITIES (Cont.)

H. CONTRACTUAL OBLIGATIONS

Substantially all of the Company's purchase commitments relate to obligations under purchase orders and subcontracts entered into by the Company. These purchase orders and subcontracts are typically in standard formats proposed by the Company, with the subcontracts and purchase orders also reflecting provisions from the Company's applicable prime contract that apply to flow down to subcontractors and vendors. The terms typically included in these purchase orders and subcontracts are consistent with Uniform Commercial Code provisions in the United States for sales of goods, as well as with specific terms called for by its customers in international contracts. These terms include the Company's right to terminate the purchase order or subcontract in the event of the vendor's or subcontractor's default, as well as the Company's right to terminate the order or subcontract for the Company's convenience (or if the Company's prime contractor has so terminated the prime contract). Such purchase orders and subcontracts typically are not subject to variable price provisions. As of December 31, 2010 and 2009, the purchase commitments were \$1,046,000 and \$876,000, respectively.

I. In order to secure bank loans and bank guarantees in the amount of \$967,000 as of December 31, 2010, certain Company entities recorded fixed liens on most of their machinery and equipment, mortgages on most of their real estate and floating charges on most of their assets.

J. A lien on the Company's Approved Enterprises has been registered in favor of the State of Israel (see Note 18(A)(4) above).

Note 21 - SHAREHOLDERS' EQUITY

A. SHARE CAPITAL

Ordinary shares confer upon their holders voting rights and the right to receive dividends.

B.2000 EMPLOYEE STOCK OPTION PLAN

In 2000, Elbit Systems adopted an employee stock option plan for Company employees comprising options to purchase up to 2,500,000 ordinary shares. The exercise price approximates the market price of the shares at the grant date. The plan included an additional 2,500,000 options issuable as "phantom" share options that grant the option holders a number of shares reflecting the benefit component of the options exercised, as calculated at the exercise date, in consideration for their par value only. The options vest over a period of one to four years from the date of grant and expire no later than six years from the date of grant or 90 days after the employee's termination of employment with Elbit Systems or its subsidiaries.

C.2007 STOCK OPTION PLAN

In January 2007, Elbit Systems' shareholders approved Elbit Systems' 2007 Option Plan (the "Plan"). The purpose of the Plan is to provide the benefits arising from ownership of share capital by Elbit Systems' and certain of its subsidiaries employees, who are expected to contribute to the Company's future growth and success. The options were allocated, subject to the required approvals, in two tracks as follows: (i) Regular Options - up to 1,250,000 options exercisable into 1,250,000 shares of Elbit Systems in consideration for the exercise price, all or any portion of which may be granted as Incentive Stock Options ("Regular Options") and (ii) Cashless Options - up to 1,250,000 options, which entitle the participant to exercise options for an amount reflecting only the benefit factor ("Cashless Options"). Each of the participants is granted an equal amount of Regular Options and Cashless Options. The exercise price for Israeli participants is the average closing price of Elbit Systems' share during 30 trading days preceding the options grant date. The exercise price of options granted to a non-Israeli participant residing in the United States is the fair market value of the share on the day the options were granted.

According to the Plan, the options granted on a certain date (the "Commencement Date") will become vested and exercisable in accordance with the following vesting schedule:

- (1) Fifty percent (50%) of the options will be vested and exercisable from the second anniversary of the Commencement Date;
- (2) An additional twenty-five percent (25%) of the options will be vested and exercisable from the third anniversary of the Commencement Date; and
- (3) The remaining twenty-five (25%) of the options will be vested and exercisable from the fourth anniversary of the Commencement Date.

The options expire no later than five years from the date of grant.

Elbit Systems granted options to Israeli participants in accordance with the provisions of Section 102 of the Israel Tax Ordinance related to the Capital Gains Tax Track.

As of December 31, 2010, 105,676 Options are available for future grant under the Plan (regular and cashless).

Note 21 - SHAREHOLDERS' EQUITY (Cont.)

D.A summary of Elbit Systems' share option activity under the plans is as follows:

	2010		2009		2008	
	Number of options	Weighted average exercise price	Number of options	Weighted average exercise price	Number of options	Weighted average exercise price
Outstanding – beginning of the year	1,858,250	\$ 35.24	2,454,851	\$ 33.96	2,386,826	\$ 32.51
Granted	28,000	52.23	58,500	50.33	135,800	56.15
Exercised	(223,019)	32.53	(619,451)	31.62	(22,675)	15.96
Forfeited	(27,926)	31.91	(35,650)	34.53	(45,100)	33.12
Outstanding – end of the year	1,635,305	35.96	1,858,250	35.24	2,454,851	33.96
Options exercisable at the end of the year	963,289	\$ 34.70	586,626	\$ 32.55	82,951	\$ 16.84

The aggregate intrinsic value represents the total intrinsic value (the difference between Elbit Systems' closing stock price on the last trading day of the fourth quarter of fiscal 2010 and the exercise price, multiplied by the number of in-the-money options) that would have been received by the option holders had all option holders exercised their options on December 31, 2010. This amount changes based on the fair market value of the Company's stock. Aggregate intrinsic value of outstanding options as of December 31, 2010 and 2009 amounted to \$24,811 and \$55,393, respectively. In addition, the total intrinsic value of options exercised for the year ended December 31, 2010 was \$4,147. As of December 31, 2010, there was \$1,641 of total unrecognized compensation cost related to share-based compensation arrangements granted under Elbit Systems' stock option plans. That cost is expected to be recognized over a weighted average period of two years.

As of December 31, 2010, 1,631,541 options were vested and expected to be vested at a weighted average exercise price of \$35.95 per share. The weighted average remaining contractual life of exercisable options as of December 31, 2010 is approximately one year and their aggregate intrinsic value is approximately \$24,761.

E. The options outstanding as of December 31, 2010, have been separated into ranges of exercise prices, as follows:

Exercise price	Options outstanding			Options exercisable	
	Number of options	Weighted average remaining contractual life (years)	Weighted average exercise price per share	Number of options	Weighted average exercise price per share
	14,500	0.91	\$ 19.36	14,500	\$ 19.36

\$14.76 -						
\$19.36						
\$33.10 -						
\$63.85	1,620,805	1.26	\$ 36.11	948,789	\$ 34.94

H. In December 2007, Elbit Systems U.S. Corp ("ESC"), a wholly-owned U.S. subsidiary of Elbit Systems, adopted a Stock Appreciation Rights Plan for Non-Employee Directors of Elbit Systems of America, LLC (the "SAR Plan"). ESC owns the shares of ESA. The purpose of the SAR Plan is to facilitate the retention of qualified and experienced persons to serve as "Non-Employee Directors" of ESA by providing them additional financial incentives. A "Non-Employee Director" is a director of ESA who is not an officer or employee of ESA, or any of its affiliated companies.
