RYANAIR PROFITS RISE BY 18% TO RECORD EUR237M.
TRAFFIC GROWTH OF 29%, NET MARGIN OF 25%

Ryanair, Europe's No. 1 low fares airline, today (Monday, 7th November 2005) announced record half year profits of EUR237m. Traffic grew by 29% to 18.0m passengers, yields increased by 3% and as a result total revenues rose by 33% to EUR946.2m. Unit costs increased by 8% (excluding fuel they fell by 7%) as fuel costs rose by 108% to EUR236.9m. As a result of these significantly higher fuel

Edgar Filing: RYANAIR HOLDINGS PLC - Form 6-K

costs, Ryanair's adjusted after tax margin for the half year fell by 3 points to 25% as adjusted net profit increased by 18% to EUR237m.

Summary Table of Results (IFRS) - in Euro

Half Year Ended	Sept 30, 2004	Sept 30, 2005	% Increase
Passengers	14.0m	18.0m	29%
Revenue	EUR710.3m	EUR946.2m	33%
Profit after Tax (note 1)	EUR201.2m	EUR237.0m	18%
Basic EPS (Euro Cents) (notel)	26.49	31.00	17%

Note 1: Adjusted profit after tax and EPS during the half year ended 30 September 2005 excludes a receipt, net of tax, of EUR5.2m arising from the settlement of an insurance claim for the scribbling of 6 Boeing 737-200 aircraft.

Announcing these results Ryanair's Chief Executive, Michael O'Leary, said:

"These record traffic and profits reflect the continued successful roll-out of Ryanair's lowest fare model despite difficult trading conditions characterised by record high fuel prices and intense competition. It also demonstrates the robustness of the Ryanair model, which delivers significant profits and passenger growth even during turbulent periods while many competitors are losing money.

"As anticipated, yields were 3% higher than last year despite a 29% increase in seat capacity. These slightly higher yields reflect the multiple fuel surcharges imposed by European flag carriers, which have continued to widen the gap between their high fares and Ryanair's lowest fares. We have again reaffirmed our commitment not to impose fuel surcharges on our passengers and reaped the benefits of this strategy in terms of significant traffic growth and slightly higher yields during the half year. Ancillary revenues grew by 40% significantly faster than the growth in passenger volumes and this year we expect that they will continue to outpace passenger growth.

"Unit costs increased by 8% primarily due to higher fuel costs. Excluding fuel all other unit costs were reduced by 7% thanks to the addition of more lower cost and efficient Boeing 737-800's, new lower cost airport and base agreements and continuing tight control over all other cost lines. We continue to focus aggressively on costs and anticipate that the cost reductions achieved will continue to partially offset the significantly higher oil prices.

"Our fuel costs rose by 108% to EUR237m as we were unhedged for almost the entire half year. For the remainder of this fiscal year, to March 2006, we are 90% hedged at rates equivalent to \$49 per barrel. We are unhedged thereafter but continue to closely monitor forward prices with a view to hedging our requirements for summer of 2006. However, we expect that fuel prices will continue at these higher levels for some time.

"Our new routes and bases have performed well over the summer with Luton and Liverpool performing strongly whilst yields at Shannon continue to be lower than expected. We recently commenced operations at Pisa, our 13th European base, in October with 10 routes, and announced our 14th base at Nottingham - East Midlands which will open in March 2006 with two based aircraft and a total of 15 routes. We achieved a significant milestone during August by carrying more passengers on our shorthaul European network than British Airways did on their entire worldwide network in one month.

Edgar Filing: RYANAIR HOLDINGS PLC - Form 6-K

"During the half year, we exercised 14 Boeing 737-800 options for delivery in 2007, at which date we plan to sell on 5 older Boeing 737-800's delivered in 1999. This is a continuation of our strategy of operating the youngest fleet in Europe with the lowest unit operating costs and delivering the best on time performance. At our recent investor day conference Management highlighted that we plan to double passenger volumes and profits by 2012 and believe that we are still now in the early stages of low fare development in Europe. The exercise of these net 9 options is part of our strategy to continue to increase seat capacity to satisfy the growing demand for Ryanair's low fares.

"We continue to fight the levy of unjust taxes on our passengers and we welcome the recent announcement by the UK government that it would not impose a GBP1 tax on air tickets. This GBP1 tax was proposed by the CAA to cover their own failure to ensure that scheduled airlines had adequate financial resources to fly to and from the UK. We also oppose the GBP4bn BAA farce at Stansted Airport where the BAA airport monopoly propose to build facilities that the users at the airport unanimously oppose, as they are extravagant and over specified. The objective of this inflated proposal is to ensure that the BAA airport monopoly can claim a higher return on this GBP4bn of capital expenditure rather than the GBP400m to GBP600m, which more accurately reflects the cost of the facilities that the user airlines actually want them to build.

"In Ireland the recent decision by the Commission for Aviation Regulation to allow Dublin Airport to increase airport charges by 23% from January next to pay for a proposed 2nd terminal, 5 years before it is built and without any consultation with the airline users (despite previous government assurances) is beyond belief. We now have the bizarre situation that an over specified future airport development is being funded by increasing charges now even though not a sod has been turned on the facility, and there is no plan for it to be turned for quite some time.

"We continue to remain cautious in our outlook for the remainder of the fiscal year. We anticipate that the fare differentials between Ryanair and the flag carriers will be partially eroded as the fuel surchargers are forced to lower their underlying fares to compete with Ryanair's lower prices. We expect to achieve significant increases in passenger's volumes but also anticipate that yields in Q3 will be broadly in line with last year and Q4 yields will fall by a range of -5% to -10%, as previously guided. Our full year net profit guidance is unchanged. This winter we expect that there will be continued intense competition and there will be fewer low fare carriers in the market as higher fuel prices force more carriers out of the industry. Ryanair's combination of the lowest fare in every market, our lowest cost base and industry leading customer service will enable us to grow across Europe to the benefit of our passengers, our people and our shareholders".

ENDS.

Certain of the information included in this release is forward looking and is subject to important risks and uncertainties that could cause actual results to differ materially. It is not reasonably possible to itemise all of the many factors and specific events that could affect the outlook and results of an airline operating in the European economy. Among the factors that are subject to change and could significantly impact Ryanair's expected results are the airline

Edgar Filing: RYANAIR HOLDINGS PLC - Form 6-K

pricing environment, fuel costs, competition from new and existing carriers, market prices for the replacement aircraft, costs associated with environmental, safety and security measures, actions of the Irish, U.K., European Union ("EU") and other governments and their respective regulatory agencies, fluctuations in currency exchange rates and interest rates, airport access and charges, labour relations, the economic environment of the airline industry, the general economic environment in Ireland, the UK and Continental Europe, the general willingness of passengers to travel and other economics, social and political factors.

Ryanair is Europe's largest low fares airline with 15 bases and 266 low fare routes across 21 countries. By the end of March 2006 Ryanair will operate an entire fleet of 107 new Boeing 737-800 aircraft with firm orders for a further 127 new aircraft (net of planned disposals), which will be delivered over the next 7 years. Ryanair currently employs a team of 3,000 people and expects to carry approximately 35 million scheduled passengers in the current year.

Ryanair Holdings plc Management Discussion and Analysis of Results

Introduction

For the purposes of the MD&A all figures and comments are by reference to the adjusted income statement excluding exceptional items referred to below. Exceptional items for the half year ended September 30, 2005 consist of a receipt of EUR5.2m (net of tax) arising from the settlement of an insurance claim for the scribbling of 6 Boeing 737-200 aircraft.

Profit after tax increased by 20% to EUR242.2m during the six months compared to last year. The adjusted profit for the half year, excluding exceptional items, increased by 18% to EUR237.0m.

The results for the period and comparative year have been prepared in accordance with International Financial Reporting Standard ("IFRS") accounting policies expected to be adopted in the annual financial statements for the year ended 31 March 2006, and a detailed explanation of the financial impact of the adoption of these policies was set out in a separate document issued with the quarterly financial results for the period to 30 June 2005.

Edgar Filing: RYANAIR HOLDINGS PLC - Form 6-K

Summary Half year ended Sept 30, 2005

Profit after tax increased by 18% to EUR237.0m, compared to EUR201.2m in the previous half year ended September 30, 2004. These results were achieved by strong growth in passenger volumes and continued tight cost control, excluding fuel, which was significantly higher than in previous periods. Total operating revenues increased by 33% to EUR946.2m, which is greater than the 29% growth in passenger volumes, as average fares rose by 3% and ancillary revenues grew by 40% to EUR129.4m. Total revenue per passenger as a result increased by 3% whilst Passenger Load Factor decreased by 1 point to 86% during the period.

Total operating expenses increased by 40% to EUR664.0m, due to the increased level of activity, and the increased costs, primarily fuel, route charges and airport & handling costs associated with the growth of the airline. Fuel, which represents 36% of total operating costs compared to 24% last year, increased by 108% to EUR236.9m due to substantial increases in the US\$ cost per gallon, partially offset by the strengthening of the Euro to US\$ exchange rate. Unit costs excluding fuel declined by 7% as all other cost items increased at a slower rate than the growth in passenger volumes. Due to the significantly higher fuel costs operating margins declined by 3 points to 30%, whilst operating profit increased by 20% to EUR282.1m.

Profit before tax has increased by 19%, less than the growth in operating profit due to the higher net interest charges arising from the increased level of debt, partially offset by foreign exchange gains which arose from the translation of foreign currency bank balances to Euro at the half year end exchange rates. Net Margins declined by 3 points to 25% for the reasons outlined above.

Adjusted basic earnings per share has risen by 17% to 31.00 cent for the period.

Balance Sheet

The strong growth in profitability continues to positively impact the balance sheet with Total Cash increasing by EUR200.6m to EUR1,806.3m despite funding an additional EUR78.5m in capital expenditure from internal resources. The company took delivery of one 737-800 aircraft and funded additional aircraft deposits during the period. Total debt declined during the period as repayments exceeded debt drawdowns by EUR43.3m. Shareholders' Funds at Sept 30, 2005 have increased by EUR183.9m to EUR1,918.4m, compared to March 31, 2005 reflecting the EUR242.2m increase in profitability during the period offset by a reduction of EUR69.2m resulting from changes in the accounting treatment for derivative financial instruments, pensions and stock options following the adoption of IFRS.

Detailed Discussion and Analysis Half year ended Sept 30, 2005

Profit after tax, increased by 18% to EUR237.0m due to a 3% increase in average fares, strong growth in ancillary revenues, and tight cost control which was offset by fuel costs increasing by 108% to EUR236.9m during the period. Operating margins, declined by 3% due to higher fuel costs whilst operating profit increased by 20% to EUR282.1m compared to half year ended Sept 30, 2004.

Total operating revenues increased by 33% to EUR946.2m due to the combination of a 29% increase in passengers carried, an improvement in average fares and strong growth in ancillary revenues.

Scheduled passenger revenues increased by 32% to EUR816.8m due to a 3% improvement in average fares, increased passenger volumes on existing routes, the successful launch of new routes and new bases at Shannon, Liverpool and Luton. The strengthening of the euro against sterling during the period negatively impacted fares by 1%. As expected Load factor also declined by 1 point to 86% during the period.

Edgar Filing: RYANAIR HOLDINGS PLC - Form 6-K

Ancillary revenues continue to perform strongly with revenues growing by 40% to EUR129.4m in the period. This performance reflects the strong growth in on board sales, non-flight scheduled revenues, and other ancillary products. Ancillary revenues continue to grow at a faster rate than passenger volumes and now account for 14% of total revenues compared to 13% last year.

Total operating expenses increased by 40% to EUR664.0m due to the increased level of activity, and the increased costs primarily fuel, aircraft rentals, route charges and airport and handling costs associated with the growth of the airline. Total operating costs were also adversely impacted by a 10% increase in the average sector length, whilst higher US\$ fuel prices were partly offset by the strength of the Euro exchange rate against the US dollar.

Staff costs have increased by 21% to EUR83.6m. This increase primarily reflects a 14% increase in average employee numbers to 2,987 and the impact of pay increases of 3% granted during the period. Pilots, who earn higher than the average salary, accounted for 44% of the increase in employment during the period.

Depreciation and amortisation increased by 18% to EUR53.0m. There are an additional eight 'owned' 737-800 aircraft in the fleet this year compared to last year. The resultant higher depreciation charge was offset by a combination of lower amortisation due to the retirement of 737-200 aircraft and the positive impact of a new engine maintenance deal on the cost of amortisation of 737-800 aircraft. The strengthening of the euro to US\$ also had a positive impact on the depreciation and amortisation charge.

Fuel costs rose by 108% to EUR236.9m due to a 32% increase in the number of hours flown, a significant increase in the average US\$ cost per gallon of fuel partially offset by the positive impact of the strengthening of the Euro to the US dollar during the period.

Maintenance costs increased by EUR0.2m to EUR25.1m reflecting an increase in the size of the fleet operated, and an increase in the number of hours flown offset by maintenance savings due to improved reliability arising from the higher proportion of 737-800 operated and the return of 6 leased 737-300's to ILFC.

Marketing and distribution costs decreased by EUR2.0m to EUR8.7m due to the reduction in the level of marketing activity and related expenditure compared to the previous year.

Aircraft rental costs increased by 28% to EUR20.7m reflecting an additional 7 aircraft on lease during the period partially offset by the savings arising from the return of 6 737-300 aircraft to ILFC.

Route charges increased by 24% to EUR83.9m due to an increase in the number sectors flown, an increase in the average sector length, offset by a reduction in enroute charges in certain EU countries and the benefit of a stronger euro to sterling exchange rate.

Airport and handling charges increased by 22% to EUR110.0m, which is lower than the growth in passenger volumes and reflects the impact of increased costs at certain existing airports offset by lower costs at new airports and bases, and the positive impact of the strength of the euro exchange rate against sterling during the period.

Other expenses increased by 14% to EUR42.0m, which is less than the growth in ancillary revenues due to improved margins on some new and existing products, and cost reductions achieved on certain indirect costs.

Edgar Filing: RYANAIR HOLDINGS PLC - Form 6-K

Operating margins have declined by 3 points to 30% for the period due to the reasons outlined above which has resulted in operating profits increasing by 20% to EUR282.1m.

Interest receivable has increased by EUR5.0m to EUR17.8m due to the combined impact of a higher cash balance and increases in average deposit rates during the period.

Interest payable increased by EUR10.9m due to the drawdown of debt to part fund the purchase of new aircraft during the period.

The Company's Balance Sheet continues to strengthen due to the strong growth in profits during the period. The Company generated cash from operating activities of EUR311.5m. which part funded capital expenditure during the period with the balance reflected in Total Cash of EUR1,806.3m. Capital expenditure of EUR78.5m primarily comprised of the delivery of an aircraft and further advance payments for future aircraft deliveries. Long term Debt, net of repayments decreased by EUR43.3m during the period.

Shareholders' Funds at September 30, 2005 have increased by EUR183.9m to EUR1,918.4m, compared to March 31, 2005 reflecting the EUR242.2m increase in profitability during the period offset by a reduction of EUR69.2m resulting from changes in the accounting treatment for derivative financial instruments, pensions and stock options following the adoption of IFRS.

Detailed Discussion and Analysis Quarter Ended September 30, 2005

Profit after tax, increased by 16% to EUR172.5m due to a 3% increase in average fares and strong ancillary revenue growth, which was offset by fuel costs which increased by 105% to EUR127.0m reflecting the higher US\$ cost per gallon. Operating margins, as a result, fell by 5 points to 37%, which in turn resulted in operating profit increasing by 18% to EUR202.2m compared to the previous quarter.

Total operating revenues increased by 32% to EUR541.5m whilst passenger volumes increased by 28% to 9.5m. Total revenue per passenger increased by 3% in the quarter due to a combination of higher average fares, strong ancillary revenue growth but was partially offset by the weakening of Sterling exchange rate against the Euro.

Scheduled passenger revenues increased by 31% to EUR470.5m due to a combination of increased passenger volumes on existing routes, the successful launch of new bases at Luton, Liverpool and Shannon and a 3% increase in average fares, partially offset by the weakening of Sterling exchange rate against the Euro. Ancillary revenues increased 36% to EUR71.0m, a faster growth rate than passenger volumes, reflecting a strong performance in non-flight scheduled revenues, on-board sales and other ancillary products. Ancillary revenues continue to grow at a faster rate than passenger volumes and remain at 13% of total revenues compared to the same period last year.

Total operating expenses increased by 41% to EUR339.3m due to the increased level of activity, and the increased costs primarily fuel, aircraft rentals, route charges and airport and handling costs associated with the growth of the airline. Total operating costs were also adversely impacted by an increase in the average sector length, whilst higher US\$ fuel prices were partially offset by the strength of the Euro exchange rate against the US\$.

Staff costs have increased by 18% to EUR41.5m primarily due to a 14% increase in average employee numbers to 2,876 and the impact of pay increases of 3% compared to the previous quarter ended September 30, 2004.

Depreciation and amortisation increased by 22% to EUR26.1m. A higher depreciation charge due to an increase in the size of the 'owned' fleet from 66

Edgar Filing: RYANAIR HOLDINGS PLC - Form 6-K

to 74, offset by a lower amortisation charge due to the retirement of 737-200 aircraft and the positive impact of a new engine maintenance deal on the cost of amortisation of 737-800 aircraft. The strengthening of the Euro to US\$ also had a positive impact on the depreciation and amortisation charge relating to new aircraft deliveries.

Fuel costs rose by 105% to EUR127.0m due to an increase in the number of sectors flown, an 8% increase in sector length, and a significantly higher average US\$ cost per gallon of fuel partially offset by the positive impact of the strengthening of the Euro to the US\$ during the period.

Maintenance costs increased by 4% to EUR11.2m reflecting the improved reliability arising from the higher proportion of 737-800 operated and a lower level of maintenance costs incurred due to the return of six 737-300's and the positive impact of the strengthening of the Euro exchange rate, partially offset by an increase in the number of leased 737-800 aircraft from 10 to 17.

Marketing and distribution costs decreased by 3% to EUR3.4m due to the reduction in the level of marketing activity and related expenditure compared to the previous year.

Aircraft rental costs increased by 31% to EUR10.7m reflecting an additional 7 aircraft on lease during the quarter offset by the savings arising from the return of 6 737-300's to ILFC.

Route charges increased by 23% to EUR42.6m due to an increase in the number of sectors flown and an increase of 8% in the average sector length, offset by a reduction in enroute charges in certain EU countries.

Airport and handling charges increased by 20% to EUR55.5m, which was slower than the growth in passenger volumes and reflects the impact of increased costs at certain existing airports offset by lower costs and new airports and bases, and the strengthening of the Euro exchange rate against Sterling.

Other expenses increased by 17% to EUR21.5m, which is lower than the growth in ancillary revenues due to improved margins on some existing products, and cost reductions achieved on indirect costs.

Operating margins have declined by 5 points to 37% due to the reasons outlined above whilst operating profits have increased by 18% to EUR202.2m during the quarter.

Interest receivable has increased by EUR2.4m to EUR9.2m for the quarter due to the combined impact of higher levels of cash and cash equivalents and increases in average deposit rates earned in the quarter compared to last year.

Interest payable increased by EUR5.1m to EUR18.4m due to the drawdown of debt to part fund the purchase of new aircraft.

Foreign exchange losses have decreased during the quarter to EUR0.5m due to the positive impact of changes in the Sterling exchange rate against the Euro compared to last year.

Edgar Filing: RYANAIR HOLDINGS PLC - Form 6-K

1. Accounting Policies

This period's financial information has been prepared on the basis of the recognition and measurement requirements of International Financial Reporting Standards ("IFRS") in issue that either are adopted by the EU and effective (or available for early adoption) at 31 March 2006 or are expected to be adopted and effective (or available for early adoption) at 31 March 2006, the Group's first annual reporting date at which it is required to use accounting standards adopted by the EU. Based on these recognition and measurement requirements, management has made assumptions about the accounting policies expected to be applied, when the first annual financial statements are prepared in accordance with accounting standards adopted by the EU for the financial year ending 31 March 2006. These preliminary accounting policies are set out in the document titled "Explanation of the financial impact following adoption of IFRS" published in August 2005 with the first quarter financial results.

2. Approval of the Preliminary Announcement

The Audit Committee approved the consolidated financial statements for the half year ended Sept 30, 2005 on November 4th, 2005.

3. Generally Accepted Accounting Policies

The Management Discussion and Analysis of Results for the half year ended Sept 30, 2005 and the comparative period are based on the results reported under the group's preliminary IFRS accounting policies, as adjusted for certain exceptional items.

4. Ancillary Products and Services

In order to more accurately reflect the structure of certain ancillary contracts and to provide more meaningful information to users the Group has taken the opportunity to reclassify certain ancillary revenues and costs (primarily car hire and travel insurance). This has resulted in a reduction in revenues of EUR19.9 million with a corresponding reduction in costs in the period ended 30 September 2005 (30 September 2004: EUR10.8 million). This has resulted in an increase in net margin of 0.5% to 25.1% in the period ended 30 September 2005 (30 September 2004 0.4% to 28.3%). Going forward the Group intends to report ancillary revenues and costs on a basis consistent with the treatment described herein."

Independent review report to Ryanair Holdings plc for the six months ended 30 September 2005

Introduction

We have been instructed by the company to review the consolidated balance sheet of Ryanair Holdings plc at 30 September 2005 and the related consolidated statements of income, changes in shareholders' funds - equity and cash flows for the six month period then ended and the related notes as set out on pages 1 to 7. We have read the other information contained in the interim report and considered whether it contains any apparent misstatements or material inconsistencies with the financial information.

Directors' responsibilities

The interim report, including the financial information contained therein, is the responsibility of, and has been approved by, the directors. The directors are responsible for preparing the interim report in accordance with the Listing Rules of the Irish Stock Exchange which require that the accounting policies and presentation applied to the interim figures should be consistent with those

Edgar Filing: RYANAIR HOLDINGS PLC - Form 6-K

applied in preparing the preceding annual accounts except where there are any changes, and the reasons for them, are disclosed. As explained in note 3 to the document published by Ryanair on 2nd August 2005, entitled "Explanation of the Financial Impact Following the Adoption of International Financial Reporting Standards", EU law requires that the next annual consolidated financial statements of the company are prepared in accordance with accounting standards adopted for use in the European Union further to IAS Regulation (EC 1606/2002).

Therefore this interim financial information has been prepared on the basis of the recognition and measurement requirements of IFRS's in issue that either are adopted by the EU and effective (or available for early adoption) at 31 March 2006 or are expected to be adopted and effective (or available for early adoption) at 31 March 2006.

Review work performed

We conducted our review in accordance with guidance contained in Bulletin 1999/4 "Review of Interim Financial Information" issued by the Auditing Practices Board for use in Ireland and the United Kingdom. A review consists principally of making enquiries of group management and applying analytical procedures to the financial information and underlying financial data and, based thereon, assessing whether the accounting policies and presentation have been consistently applied unless otherwise disclosed. A review excludes audit procedures such as tests of controls and verification of assets, liabilities and transactions. It is substantially less in scope than an audit performed in accordance with Auditing Standards and therefore provides a lower level of assurance than an audit. Accordingly we do not express an audit opinion on the financial information.

Emphasis of matter

Without qualifying our review conclusion, we draw attention to note 3 to the document published by Ryanair on 2nd August 2005, entitled "Explanation of the Financial Impact Following the Adoption of International Financial Reporting Standards", that explains why there is a possibility that the company's management may determine that changes to the accounting policies adopted in preparing the consolidated interim financial information are necessary when management prepares its first annual financial statements in accordance with accounting standards adopted by the EU as of 31 March 2006.

Review conclusion

On the basis of our review we are not aware of any material modifications that should be made to the financial information as presented for the six months ended 30 September 2005, which is stated to have been prepared in accordance with the basis of preparation note set out in note 3 to the "Explanation of the Financial Impact Following the Adoption of International Financial Reporting Standards". This describes how the recognition and measurement requirements of accounting standards expected to be adopted by the EU for use at the next annual reporting date have been applied, including the assumptions management has made about the standards and interpretations expected to be effective, and the policies expected to be adopted, when management prepares its first annual financial statements in accordance with accounting standards adopted by the EU as of 31 March 2006.
