PART I

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

The enclosed financial statements are unaudited with the exception of the Balance Sheet for December 31, 2002. The unaudited interim financial statements reflect all adjustments which are, in the opinion of management, necessary to a fair statement of the results for the interim periods presented. All such adjustments are of a normal recurring nature.

Management believes that the Company's revenues will be sufficient to meet its existing needs and the needs for its anticipated future operations. Long-term trends will depend upon the ability of management to continue to find new production to replace the depletion of the Company's present minerals as well as increasing the Company's income from timber and agriculture. Management does not presently anticipate that the Company will incur material additional liabilities in its future operations. The Company participates in no off-balance sheet entities.

The Company earned \$333,348 net income in the third quarter ended September 30, 2003, up 67.8% from the second quarter of 2003 and up 58.4% from the third quarter of 2002. This was due to increased oil and gas income from royalties and also leases. Oil and gas revenues for the first nine months of 2003 were up 50.5% over the same period in 2002 due to greater production and to higher prices. Timber income was down from 2002, however, a timber contract has been let for cuttings on one company tract and timber income should be higher in the fourth quarter.

The Company has applied for listing on the American Stock Exchange. All of the increase in general and administrative expenses is due to the application fee for listing. The Board of Directors adopted a policy of paying 7¢ per quarter per share in dividends as long as financially prudent.
