#### NOTE E Debt

#### Revolving Credit Facility

The Company has an asset based loan agreement with two domestic financial institutions to provide a revolving credit facility, mortgage and term note financing. In March 2005, the Company amended the facility to consolidate the Company's term notes and increase the amount of borrowing capacity to \$27 million through February 2006 and \$29 million thereafter under the revolving facility using the same formula for eligible accounts receivable and inventory that previously existed for the Company. The revolving facility was also extended to July 2008. These loans are collateralized by substantially all of the Company's assets. The agreement also prohibits the Company from incurring certain additional indebtedness, limits certain investments, advances or loans, restricts substantial asset sales and capital expenditures and prohibits the payment of dividends, except for dividends due on the Company's Series A and C preferred stock. The loan agreement contains a subjective acceleration clause and lockbox arrangement; therefore, the borrowing under this agreement is classified as a current liability.

On April 26, 2007, the loan agreement was amended to make certain financial covenants from February 28, 2007 through July 2008 less restrictive and to increase the ability of the Company to borrow against eligible inventory of raw material and finished goods of the Company and certain subsidiaries. Using the newly agreed inventory advance rates, this amendment increased the Company s availability for future borrowings under its revolving loan facility by approximately \$2.0 million.

At May 31, 2007 the rate was Libor (5.32%) plus 2.25% and the Company had borrowed approximately \$20.1 million and had \$5.5 million available for future borrowings under the revolving loan facility net of approximately \$0.4 million in outstanding letters of credit.

#### International Credit Facilities

The Company s Australian subsidiary has a payment facility that allows it to borrow against a certain percentage of inventory and accounts receivable. In March 2007, this facility was amended to make the maximum permitted borrowing approximately \$1.7 million of which \$1.2 million was outstanding at May 31, 2007. The facility is considered a demand note and carries an interest rate of the Australian Commercial Bill Rate (6.46%) plus 1.25%.

In connection with the purchase of the assets of Vitrex Ltd., The Company s United Kingdom subsidiary entered into two financing arrangements with HSBC Bank in the United Kingdom. The first financing arrangement allows for borrowing up to £1.0 million (approximately U.S. \$2.0 million) based on the advancement of up to 80% of the value of accounts receivable. In addition, the subsidiary may borrow up to £0.4 million (approximately U.S. \$0.8 million) against the value of the inventory. Both of these facilities are collateralized by substantially all of the assets of the subsidiary (approximately \$7.4 million) as well as a parent company guaranty. On May 31, 2007, \$2.1 million was borrowed under these facilities. Both are considered short-term demand notes and have an interest rate of Libor (4.50%) plus 2.00%.

#### Term Loan Facilities

As discussed previously, in March 2005, the Company amended its domestic term loan agreements by consolidating the then existing two term facilities into one three year term facility. In addition, the Company received approximately \$3.0 million of additional term financing under the amendment. The amendment provides for repayment of this facility at a rate of approximately \$0.2 million per month at an interest rate of Libor plus 2.13% to Libor plus 2.63% through April 2008. The amendment also formally released the Company s Chairman and Chief Executive Officer of his guaranty of one of the term loans. In June 2006, the loan agreements were amended to increase the interest rate to Libor plus 2.13% to Libor plus 2.88%. The balance on this term note was \$1.8 million at May 31, 2007.

As discussed previously, in March 2007, the Company s Australian subsidiary amended its payment facility by consolidating the then existing three term facilities into one three year term facility. The subsidiary received approximately \$1.2 million of additional financing under the amendment. The loan requires quarterly payments of AUD 0.2 million (US \$0.1 million) for the first four installments and AUD 0.1 million (US \$0.1 million) thereafter with a final balloon payment. The balance of this term note was US \$1.7 million at May 31, 2007. The term loan is collateralized by substantially all of the assets of the subsidiary (approximately \$11.8 million) as well as a parent company guaranty.

#### NOTE F Stock Based Compensation

The Company grants stock options for a fixed number of shares to employees and directors with an exercise price of not less than 85% of the fair market value of the shares at the date of grant. Option term, vesting and exercise periods vary, except that the term of an option may not exceed 10 years. As of the current date, however, no options have been issued at a discount to market price.

The Company also grants stock appreciation rights for a fixed number of shares to various members of management. These rights vest three years after the grant date. The exercise price of the stock appreciation rights is equal to the fair market value of the shares at the date of grant.
