SIX MONTHS ENDED 30 JUNE 2007 COMPARED WITH SIX MONTHS ENDED JUNE 2006

Total Revenues

For the six months ended 30 June 2007, gross written premiums and policy fees were RMB63,753 million, as compared with RMB54,580 million for the corresponding period in 2006, representing an increase of 16.8%. The increase was mainly attributable to the growth in individual life insurance business.

For the six months ended 30 June 2007, the Group's net investment income was RMB24,071 million, as compared with RMB11,341 million for the corresponding period in 2006, representing an increase of 112.2%. Such increase was mainly attributable to the growth in total investment assets, equity weightings adjustments made to optimize the investment portfolio and the generally favourable performance of the A Share market in China during the first half of 2007.

For the six months ended 30 June 2007, net realised gains on financial assets were RMB2,262 million (six months ended 30 June 2006: net realised gains on financial assets RMB497 million). Net fair value gains on assets at fair value through income (held-for-trading) were RMB10,842 million (six months ended 30 June 2006: net fair value gains at fair value through income (held-for-trading) were RMB5,758 million). Such result was mainly attributable to the generally favorable performance of the A Share market in China during the first half of 2007.

Benefits, claims and expenses

For the six months ended 30 June 2007, the Group's total benefits, claims and expenses were RMB76,918 million, as compared with RMB61,355 million for the corresponding period in 2006, which were increased by 25.4%. The increase was mainly attributable to the growth of our insurance business, payment arising from maturity of some products and increase of dividend payments to policyholders.

For the six months ended 30 June 2007, our consolidated cost ratio was 15.3%, which represents a stable result as compared with the corresponding period in 2006.

Income tax

For the six months ended 30 June 2007, the Group's income tax expenses were RMB1,420 million (in the corresponding period of 2006: RMB2,299 million). The effective tax rate of the Group reduced from 20.3% in the first half of 2006 to 5.7% in the first half of 2007. The decline was mainly attributable to a reduction of the enterprise income tax rate applicable to the Group from 33% to 25%

with effect from 1 January 2008. Regarding the deferred tax assets or liabilities that were recognised on the date of promulgation of the new income tax law and expected to be settled after 1 January 2008, the Group made an adjustment to their book value using the applicable tax rate of 25%, resulting in a substantial reversal of deferred tax liabilities and a reduction of income tax expenses for the six months ended 30 June 2007.

optimization of the structure of insurance business, reduction of enterprise income tax rate, and strengthened cost management.

Liquidity and Capital Resources

Sources of Liquidity

The Company's principal cash inflows come from insurance premiums, deposits, proceeds from sales and maturity of financial assets, investment income and financing. The primary risks over liquidity with respect to these cash inflows are the risk of early withdrawals by contract holders and policyholders, the risks of default by debtors, as well as volatilities in interest rate and capital market and other risks. The Company will closely monitor and manage these risks.

Additional sources of liquidity to meet unexpected cash outflows are available from cash and our investment assets. As at 30 June 2007, investment in equity securities had a fair value of RMB128,049 million (RMB95,493 million as at 31 December 2006).

Uses of Liquidity

The Company's principal cash outflows primarily relate to the benefits and claims associated with our various life insurance, annuity and accident and health insurance products, dividend and interest payments on our insurance policies and annuity contracts, operating expenses, income taxes and dividends that may be declared and payable to the Company's shareholders.

The Company believes that its sources of liquidity are sufficient to meet its current cash requirements.
