Cautionary Note on Forward-Looking Statements

For purposes of this Quarterly Report, the terms Oracle, we, us and our refer to Oracle Corporation and its consolidated subsidiaries. This Quarterly Report on Form 10-Q contains statements that are not historical in nature, are predictive in nature, or that depend upon or refer to future events or conditions or contain forward-looking statements within the meaning of Section 21 of the Securities Exchange Act of 1934, as amended, and the Private Securities Litigation Reform Act of 1995. These include, among other things, statements regarding:

our expectation to continue to acquire companies, products, services and technologies;

our expectation that our software business total revenues and our profits generally will continue to increase;

our belief that software license updates and product support revenues and margins will grow;

our international operations providing a significant portion of our total revenues and expenses;

our expectation to continue to make investments in research and development and related product opportunities, including those related to improve existing hardware products and services or develop new hardware products and services;

our expectation to grow our consulting revenues;

the sufficiency of our sources of funding;

our belief that we have adequately provided for any reasonably foreseeable outcomes related to our tax audits and that any settlement will not have a material adverse effect on our consolidated financial position or results of operations;

our expectation that the amount of the earn-out related to the acquisition of Pillar Data Systems, Inc. or its potential impact will not be material to our results of operations or financial position;

our expectation of incurring the majority of the remaining expenses pursuant to the Sun Restructuring Plan through the remainder of fiscal 2012;

as well as other statements regarding our future operations, financial condition and prospects, and business strategies. Forward-looking statements may be preceded by, followed by or include the words expects, anticipates, intends, plans, believes, seeks, estimates, will, to and similar expressions. We claim the protection of the safe harbor for forward-looking statements contained in the Private Securities Litigation Reform Act of 1995 for all forward-looking statements. We have based these forward-looking statements on our current expectations and projections about future events. These forward-looking statements are subject to risks, uncertainties and assumptions about our business that could affect our future results and could cause those results or other outcomes to differ materially from those expressed or implied in the forward-looking statements. Factors that might cause or contribute to such differences include, but are not limited to, those discussed in Risk Factors included in documents we file from time to time with the U.S. Securities and Exchange Commission (SEC), including our Annual Report on Form 10-K for our fiscal year ended May 31, 2011 and our other Quarterly Reports on Form 10-Q to be filed by us in our fiscal year 2012, which runs from June 1, 2011 to May 31, 2012.

Edgar Filing: ORACLE CORP - Form 10-Q

We have no obligation to publicly update or revise any forward-looking statements, whether as a result of new information, future events or risks, except to the extent required by applicable securities laws. If we do update one or more forward-looking statements, no inference should be drawn that we will make additional updates with respect to those or other forward-looking statements. New information, future events or risks could cause the forward-looking events we discuss in this Quarterly Report not to occur. You should not place undue reliance on these forward-looking statements, which reflect our opinions only as of the date of this Quarterly Report.

Table of Contents**ORACLE CORPORATION****NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS****August 31, 2011****(Unaudited)****1. BASIS OF PRESENTATION AND RECENT ACCOUNTING PRONOUNCEMENTS****Basis of Presentation**

We have prepared the condensed consolidated financial statements included herein, without audit, pursuant to the rules and regulations of the U.S. Securities and Exchange Commission (SEC). Certain information and footnote disclosures normally included in financial statements prepared in accordance with U.S. generally accepted accounting principles have been condensed or omitted pursuant to such rules and regulations. However, we believe that the disclosures herein are adequate to ensure the information presented is not misleading. These unaudited condensed consolidated financial statements should be read in conjunction with the audited financial statements and the notes thereto included in our Annual Report on Form 10-K for the fiscal year ended May 31, 2011.

We believe that all necessary adjustments, which consisted only of normal recurring items, have been included in the accompanying financial statements to present fairly the results of the interim periods. The results of operations for the interim periods presented are not necessarily indicative of the operating results to be expected for any subsequent interim period or for our fiscal year ending May 31, 2012.

There have been no significant changes in new accounting pronouncements or to our significant accounting policies that were disclosed in our Annual Report on Form 10-K for the fiscal year ended May 31, 2011 that have had a significant impact on our consolidated financial statements or notes thereto.

Certain prior year balances have been reclassified to conform to the current year's presentation. Such reclassifications did not affect total revenues, operating income or net income.

Acquisition Related and Other Expenses

Acquisition related and other expenses consist of personnel related costs for transitional and certain other employees, stock-based compensation expenses, integration related professional services, certain business combination adjustments including adjustments after the measurement period has ended and changes in fair value of contingent consideration payable (further discussed in Note 2 below), and certain other operating expenses, net. Stock-based compensation included in acquisition related and other expenses resulted from unvested options and restricted stock-based awards assumed from acquisitions whereby vesting was accelerated upon termination of the employees pursuant to the original terms of those options and restricted stock-based awards.

(in millions)	Three Months Ended August 31,	
	2011	2010
Transitional and other employee related costs	\$ 11	\$ 49
Stock-based compensation	1	1
Professional fees and other, net		31

(Unaudited)

losses related to all of our investments and net unrealized gains and losses related to the small portion of our investment portfolio that we classify as trading.

(in millions)	Three Months Ended August 31,	
	2011	2010
Interest income	\$ 57	\$ 34
Foreign currency gains (losses), net	(29)	49
Noncontrolling interests in income	(28)	(26)
Other income (losses), net	(20)	17
Total non-operating income (expense), net	\$ (20)	\$ 74

Comprehensive Income

Comprehensive income consists of the following, net of income tax effects: net income, net foreign currency translation gains and losses, net unrealized gains and losses related to defined benefit plans and net unrealized gains and losses on marketable debt and equity securities that we classify as available-for-sale. The following table sets forth the calculation of comprehensive income:

(in millions)	Three Months Ended August 31,	
	2011	2010
Net income	\$ 1,840	\$ 1,352
Foreign currency translation gains, net	52	150
Unrealized gains on defined benefit plans, net	1	2
Unrealized losses on marketable securities, net	(3)	
Comprehensive income	\$ 1,890	\$ 1,504

Sales of Financing Receivables

We offer certain of our customers the option to acquire our products and services offerings through separate long-term payment contracts. We generally sell these contracts that we have financed on a non-recourse basis to financial institutions within 90 days of the contracts' dates of execution. We record the transfers of amounts due from customers to financial institutions as sales of financing receivables because we are considered to have surrendered control of these financing receivables. During the three months ended August 31, 2011, \$779 million of financing receivables were sold to financial institutions.

Recent Accounting Pronouncements

Testing Goodwill for Impairment: In September 2011, the Financial Accounting Standards Board (FASB) issued Accounting Standards Update No. 2011-08, *Intangibles - Goodwill and Other (Topic 350) Testing Goodwill for Impairment* (ASU 2011-08), to allow entities to use a

Edgar Filing: ORACLE CORP - Form 10-Q

qualitative approach to test goodwill for impairment. ASU 2011-08 permits an entity to first perform a qualitative assessment to determine whether it is more likely than not that the fair value of a reporting unit is less than its carrying value. If it is concluded that this is the case, it is necessary to perform the currently prescribed two-step goodwill impairment test. Otherwise, the two-step goodwill impairment test is not required. ASU 2011-08 is effective for us in fiscal 2013 and earlier adoption is permitted. We are currently evaluating the impact of our pending adoption of ASU 2011-08 on our consolidated financial statements.

Table of Contents**ORACLE CORPORATION****NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Continued)****August 31, 2011****(Unaudited)**

Presentation of Comprehensive Income: In June 2011, the FASB issued Accounting Standards Update No. 2011-05, *Comprehensive Income (Topic 220) Presentation of Comprehensive Income* (ASU 2011-05), to require an entity to present the total of comprehensive income, the components of net income, and the components of other comprehensive income either in a single continuous statement of comprehensive income or in two separate but consecutive statements. ASU 2011-05 eliminates the option to present the components of other comprehensive income as part of the statement of equity. ASU 2011-05 is effective for us in our first quarter of fiscal 2013 and should be applied retrospectively. We are currently evaluating the impact of our pending adoption of ASU 2011-05 on our consolidated financial statements.

Amendments to Achieve Common Fair Value Measurement and Disclosure Requirements: In May 2011, the FASB issued Accounting Standards Update No. 2011-04, *Amendments to Achieve Common Fair Value Measurement and Disclosure Requirements in U.S. GAAP and International Financial Reporting Standards (Topic 820) Fair Value Measurement* (ASU 2011-04), to provide a consistent definition of fair value and ensure that the fair value measurement and disclosure requirements are similar between U.S. Generally Accepted Accounting Principles (GAAP) and International Financial Reporting Standards. ASU 2011-04 changes certain fair value measurement principles and enhances the disclosure requirements particularly for Level 3 fair value measurements (as defined in Note 3 below). ASU 2011-04 is effective for us in our fourth quarter of fiscal 2012 and should be applied prospectively. We are currently evaluating the impact of our pending adoption of ASU 2011-04 on our consolidated financial statements.

2. ACQUISITIONS**Fiscal 2012 Acquisitions*****Acquisition of Pillar Data Systems, Inc.***

On July 18, 2011, we acquired Pillar Data Systems, Inc. (Pillar Data), a provider of enterprise storage systems solutions. Prior to the acquisition, Pillar Data was directly and indirectly majority-owned and controlled by Lawrence J. Ellison, our Chief Executive Officer, director and largest stockholder. Pursuant to the agreement and plan of merger dated as of June 29, 2011 (Merger Agreement), we acquired all of the issued and outstanding equity interests of Pillar Data from the stockholders, including Mr. Ellison and his affiliates, and the holders of stock options of Pillar Data, in exchange for rights to receive contingent cash consideration (Earn-Out), if any, pursuant to an Earn-Out calculation (described more fully below) and subject to certain conditions. An affiliate of Mr. Ellison's has a preference right to receive the first approximately \$565 million of the Earn-Out, if any. Mr. Ellison and his affiliates also have rights to 55% of any amount of the Earn-Out that exceeds \$565 million.

The Earn-Out will be calculated with respect to a three-year period commencing with our second quarter of fiscal 2012 and concluding with our first quarter of fiscal 2015 (Earn-Out Period). The Earn-Out will be an amount (if positive) calculated based on the product of (i) the difference between (x) future revenues generated from the sale of certain Pillar Data products during Oracle's last four full fiscal quarters during the Earn-Out Period minus (y) certain losses associated with certain Pillar Data products incurred over the entire Earn-Out Period, multiplied by (ii) three. Our obligation to pay the Earn-Out will be subject to reduction as a result of our right to set-off the amount of any indemnification claims we may have under the Merger Agreement. We do not expect the amount of the Earn-Out or its potential impact will be material to our results of operations or financial position.

We have included the financial results of Pillar Data in our consolidated financial statements from the date of acquisition. The estimated fair value of the liability for contingent consideration, representing the preliminary purchase price payable for our acquisition of Pillar Data, was approximately \$346 million and was included in other non-current liabilities in our consolidated balance sheet. This preliminary purchase price payable may differ from the amount that is ultimately payable via the Earn-Out calculation (described above) with any changes in the liability recorded as acquisition related and other in our consolidated statement of operations until the liability is settled. We have preliminarily recorded \$142 million of identifiable intangible assets and \$10

Table of Contents

ORACLE CORPORATION

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Continued)

August 31, 2011

(Unaudited)

million of net tangible liabilities, based on their estimated fair values, and \$214 million of residual goodwill. The fair value of the liability was estimated using a discounted cash flow technique with significant inputs that are not observable in the market and thus represents a Level 3 fair value measurement as defined in the FASB's Accounting Standards Codification (ASC) 820, *Fair Value Measurements and Disclosures*. The significant inputs in the Level 3 measurement not supported by market activity included our probability assessments of expected future cash flows related to our acquisition of Pillar Data during the Earn-Out Period, appropriately discounted considering the uncertainties associated with the obligation, and calculated in accordance with the terms of the Merger Agreement. Subsequent to the date of acquisition, the estimated fair value of the Earn-Out liability increased to \$353 million as of August 31, 2011 primarily as a result of the passage of time and the corresponding impact of discounting.

Other Fiscal 2012 Acquisitions

During the first quarter of fiscal 2012, we acquired certain other companies and purchased certain technology and development assets to expand our products and services offerings. These acquisitions were not significant individually or in the aggregate. We have included the financial results of these companies in our consolidated results from their respective acquisition dates.

The preliminary estimates of fair value for the assets acquired and liabilities assumed for acquisitions completed during the first quarter of fiscal 2012 were based upon preliminary calculations and valuations and our estimates and assumptions for each of these acquisitions are subject to change as we obtain additional information for our estimates during the respective measurement periods (up to one year from the acquisition date). The primary areas of those preliminary estimates that are not yet finalized related to certain tangible assets and liabilities acquired, identifiable intangible assets, certain legal matters, and income and non-income based taxes.

We have also agreed to acquire certain companies for amounts that are not material to our business. We expect to close such acquisitions within the next twelve months.

Fiscal 2011 Acquisitions

On January 5, 2011, we completed our acquisition of Art Technology Group, Inc. (ATG), a provider of eCommerce software and related on demand commerce optimization applications. We have included the financial results of ATG in our consolidated financial statements from the date of acquisition. The total preliminary purchase price for ATG was approximately \$1.0 billion, which consisted of approximately \$990 million in cash and \$16 million for the fair value of stock options and restricted stock-based awards assumed. We have preliminarily recorded \$404 million of identifiable intangible assets and \$50 million of net tangible assets, based on their estimated fair values, and \$552 million of residual goodwill.

On August 11, 2010, we completed our acquisition of Phase Forward Incorporated (Phase Forward), a provider of applications for life sciences companies and healthcare providers. We have included the financial results of Phase Forward in our consolidated financial statements from the date of acquisition. The total purchase price for Phase Forward was approximately \$736 million, which consisted of approximately \$735 million in cash and \$1 million for the fair value of restricted stock-based awards assumed. We recorded \$370 million of identifiable intangible assets, \$20 million of in-process research and development and \$17 million of net tangible assets, based on their estimated fair values, and \$329 million of residual goodwill.

During fiscal 2011, we acquired certain other companies and purchased certain technology and development assets to expand our products and services offerings. These acquisitions were not significant individually or in the aggregate. We have included the financial results of these companies in our consolidated results from their respective acquisition dates.

Table of Contents**ORACLE CORPORATION****NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Continued)****August 31, 2011****(Unaudited)**

The estimates of fair values for the assets acquired and liabilities assumed for certain acquisitions completed during fiscal 2011 were based upon preliminary calculations and valuations and our estimates and assumptions for each of these acquisitions are subject to change as we obtain additional information for our estimates during the respective measurement periods (up to one year from the acquisition date). The primary areas of those estimates that are not yet finalized related to certain tangible assets and liabilities acquired, identifiable intangible assets, certain legal matters, and income and non-income based taxes.

Unaudited Pro Forma Financial Information

The unaudited pro forma financial information in the table below summarizes the combined results of operations for Oracle, Pillar Data, ATG, Phase Forward and certain other companies that we acquired since the beginning of fiscal 2011 (which were considered significant for the purposes of unaudited pro forma financial information disclosure) as though the companies were combined as of the beginning of fiscal 2011. The pro forma financial information for all periods presented also includes the business combination accounting effects resulting from these acquisitions including our amortization charges from acquired intangible assets (certain of which are preliminary), stock-based compensation charges for unvested stock options and restricted stock-based awards assumed, if any, and the related tax effects as though the aforementioned companies were combined as of the beginning of fiscal 2011. The pro forma financial information as presented below is for informational purposes only and is not indicative of the results of operations that would have been achieved if the acquisitions had taken place at the beginning of fiscal 2011.

The unaudited pro forma financial information for the three months ended August 31, 2011 combined the historical results of Oracle for the three months ended August 31, 2011, the historical results of Pillar Data for the three months ended June 30, 2011 (adjusted due to differences in reporting periods and considering the date we acquired Pillar Data), the historical results of certain other companies that we acquired since the beginning of fiscal 2011 based upon their respective previous reporting periods and the dates these companies were acquired by us, and the effects of the pro forma adjustments listed above.

The unaudited pro forma financial information for the three months ended August 31, 2010 combined the historical results of Oracle for the three months ended August 31, 2010, the historical results of Pillar Data for the three months ended September 30, 2010 (due to differences in reporting periods), the historical results of ATG for the three months ended September 30, 2010 (due to differences in reporting periods), the historical results of Phase Forward for the three months ended June 30, 2010 (adjusted due to differences in reporting periods and considering the date we acquired Phase Forward), the historical results of certain other companies that we acquired since the beginning of fiscal 2011 based upon their respective previous reporting periods and the dates these companies were acquired by us, and the effects of the pro forma adjustments listed above.

(in millions, except per share data)	Three Months Ended August 31,	
	2011	2010
Total revenues	\$ 8,385	\$ 7,617
Net income	\$ 1,831	\$ 1,324
Basic earnings per share	\$ 0.36	\$ 0.26
Diluted earnings per share	\$ 0.36	\$ 0.26

3. FAIR VALUE MEASUREMENTS

We perform fair value measurements in accordance with the guidance provided by ASC 820. ASC 820 defines fair value as the price that would be received from selling an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date.

When determining the fair value measurements

Table of Contents**ORACLE CORPORATION****NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Continued)****August 31, 2011****(Unaudited)**

for assets and liabilities required to be recorded at their fair values, we consider the principal or most advantageous market in which we would transact and consider assumptions that market participants would use when pricing the assets or liabilities, such as inherent risk, transfer restrictions, and risk of nonperformance.

ASC 820 establishes a fair value hierarchy that requires an entity to maximize the use of observable inputs and minimize the use of unobservable inputs when measuring fair value. An asset's or liability's categorization within the fair value hierarchy is based upon the lowest level of input that is significant to the fair value measurement. ASC 820 establishes three levels of inputs that may be used to measure fair value:

Level 1: quoted prices in active markets for identical assets or liabilities;

Level 2: inputs other than Level 1 that are observable, either directly or indirectly, such as quoted prices in active markets for similar assets or liabilities, quoted prices for identical or similar assets or liabilities in markets that are not active, or other inputs that are observable or can be corroborated by observable market data for substantially the full term of the assets or liabilities; or

Level 3: unobservable inputs that are supported by little or no market activity and that are significant to the fair values of the assets or liabilities.

Assets and Liabilities Measured at Fair Value on a Recurring Basis

Our assets and liabilities measured at fair value on a recurring basis, excluding accrued interest components, consisted of the following (Level 1, 2 and 3 inputs are defined above):

(in millions)	August 31, 2011				May 31, 2011		
	Fair Value Measurements Using Input Types			Total	Fair Value Measurements Using Input Types		Total
	Level 1	Level 2	Level 3		Level 1	Level 2	
Assets:							
Money market funds	\$ 65	\$	\$	\$ 65	\$ 3,362	\$	\$ 3,362
U.S. Treasury, U.S. government and U.S. government agency debt securities	1,415			1,415	1,150		1,150
Commercial paper debt securities		16,863		16,863		11,884	11,884
Corporate debt securities and other	101	1,879		1,980	106	1,885	1,991
Derivative financial instruments		86		86		69	69
Total assets	\$ 1,581	\$ 18,828	\$	\$ 20,409	\$ 4,618	\$ 13,838	\$ 18,456
Liabilities:							
Contingent consideration	\$	\$	\$ 353	\$ 353	\$	\$	\$
Total liabilities	\$	\$	\$ 353	\$ 353	\$	\$	\$

Edgar Filing: ORACLE CORP - Form 10-Q

Our valuation techniques used to measure the fair values of our money market funds, U.S. Treasury, U.S. government and U.S. government agency debt securities and certain other marketable securities that were classified as Level 1 in the table above were derived from quoted market prices as substantially all of these instruments have maturity dates, if any, within one year from our date of purchase and active markets for these instruments exist. Our valuation techniques used to measure the fair values of Level 2 instruments listed in the table above, generally all of which mature within one year and the counterparties to which have high credit ratings, were derived from the following: non-binding market consensus prices that are corroborated by observable market data, quoted market prices for similar instruments, or pricing models, such as discounted cash flow techniques, with all significant inputs derived from or corroborated by observable market data including LIBOR-based yield curves, among others. Our valuation techniques and Level 3 inputs used to estimate the fair value of contingent consideration payable in connection with our acquisition of Pillar Data are described in Note 2.

Our cash and cash equivalents, marketable securities and derivative financial instruments are recognized and measured at fair value in our condensed consolidated financial statements. Based on the trading prices of our \$14.8 billion and \$15.9 billion of borrowings, which consisted of senior notes that were outstanding at August 31, 2011 and senior notes

Table of Contents**ORACLE CORPORATION****NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Continued)****August 31, 2011****(Unaudited)**

and short-term borrowings that were outstanding as of May 31, 2011, respectively, and the interest rates we could obtain for other borrowings with similar terms at those dates, the estimated fair values of our borrowings at August 31, 2011 and May 31, 2011 were \$16.9 billion and \$17.4 billion, respectively.

4. INVENTORIES

Inventories consisted of the following:

(in millions)	\$000,000 August 31, 2011	\$000,000 May 31, 2011
Raw materials	\$ 73	\$ 94
Work-in-process	27	17
Finished goods	159	192
Total	\$ 259	\$ 303

5. INTANGIBLE ASSETS AND GOODWILL

The changes in intangible assets for fiscal 2012 and the net book value of intangible assets at August 31, 2011 and May 31, 2011 were as follows:

(Dollars in millions)	Intangible Assets, Gross		Accumulated Amortization			Intangible Assets, Net		Weighted Average Useful Life	
	May 31, 2011	Additions	August 31, 2011	May 31, 2011	Expense	August 31, 2011	May 31, 2011		
Software support agreements and related relationships	\$ 5,177	\$ 28	\$ 5,205	\$ (2,745)	\$ (144)	\$ (2,889)	\$ 2,432	\$ 2,316	9 years
Hardware systems support agreements and related relationships	760	8	768	(147)	(29)	(176)	613	592	7 years
Developed technology	6,034	68	6,102	(3,728)	(234)	(3,962)	2,306	2,140	5 years
Core technology	2,295	253	2,548	(1,272)	(80)	(1,352)	1,023	1,196	6 years
Customer relationships	2,063	28	2,091	(926)	(89)	(1,015)	1,137	1,076	7 years
Trademarks	528	9	537	(229)	(16)	(245)	299	292	7 years
Total intangible assets subject to amortization	16,857	394	17,251	(9,047)	(592)	(9,639)	7,810	7,612	
In-process research and development	50		50				50	50	N.A.
Total intangible assets, net	\$ 16,907	\$ 394	\$ 17,301	\$ (9,047)	\$ (592)	\$ (9,639)	\$ 7,860	\$ 7,662	

Edgar Filing: ORACLE CORP - Form 10-Q

Total amortization expense related to our intangible assets was \$592 million and \$603 million for the three months ended August 31, 2011 and 2010, respectively. As of August 31, 2011, estimated future amortization expenses related to intangible assets were as follows (in millions):

Remainder of Fiscal 2012	\$ 1,737
Fiscal 2013	1,967
Fiscal 2014	1,619
Fiscal 2015	1,220
Fiscal 2016	717
Fiscal 2017	176
Thereafter	176
Total intangible assets subject to amortization	7,612
In-process research and development	50
Total intangible assets, net	\$ 7,662

Table of Contents**ORACLE CORPORATION****NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Continued)****August 31, 2011****(Unaudited)**

The changes in the carrying amounts of goodwill, which is generally not deductible for tax purposes, for our operating segments for the three months ended August 31, 2011 were as follows:

(in millions)	New Software Licenses	Software License Updates and Product Support	Hardware Systems Support	Other ⁽²⁾	Total
Balances as of May 31, 2011	\$ 6,785	\$ 12,052	\$ 1,009	\$ 1,707	\$ 21,553
Goodwill from acquisitions	56	46	183	31	316
Goodwill adjustments ⁽¹⁾	(31)	(6)		(1)	(38)
Balances as of August 31, 2011	\$ 6,810	\$ 12,092	\$ 1,192	\$ 1,737	\$ 21,831

(1) Pursuant to our business combinations accounting policy, we record goodwill adjustments for the effect on goodwill of changes to net assets acquired during the measurement period (up to one year from the date of an acquisition). Goodwill adjustments were not significant to our previously reported operating results or financial position.

(2) Represents goodwill allocated to our other operating segments.

6. NOTES PAYABLE AND OTHER BORROWINGS**Senior Notes**

In accordance with our obligations under a registration rights agreement entered into in connection with the original issuance of our \$3.25 billion of fixed rate senior notes consisting of \$1.0 billion of 3.875% notes due July 2020 (2020 Notes) and \$2.25 billion of 5.375% notes due July 2040 (2040 Notes, and together with the 2020 Notes, the Original Senior Notes) in July 2010, we are in the process of completing a registered offer to exchange the Original Senior Notes for new freely tradable notes having terms substantially identical to the Original Senior Notes.

Revolving Credit Agreements

On May 27, 2011, we entered into two revolving credit agreements with BNP Paribas, as initial lender and administrative agent, and BNP Paribas Securities Corp., as sole lead arranger and sole bookrunner (the 2011 Credit Agreements), and borrowed \$1.15 billion pursuant to these agreements. As of June 30, 2011, we repaid the \$1.15 billion and the 2011 Credit Agreements expired pursuant to their terms.

There have been no other significant changes in our notes payable or other borrowing arrangements that were disclosed in our Annual Report on Form 10-K for the fiscal year ended May 31, 2011.

7. RESTRUCTURING ACTIVITIES

Sun Restructuring Plan

During the third quarter of fiscal 2010, our management approved, committed to and initiated a plan to restructure our operations due to our acquisition of Sun Microsystems, Inc. (Sun) (the Sun Restructuring Plan) in order to improve the cost efficiencies in our merged operations. Our management subsequently amended the Sun Restructuring Plan to reflect additional actions that we expect to take to improve the cost efficiencies in our merged operations. The total estimated restructuring costs associated with the Sun Restructuring Plan are \$1.0 billion consisting primarily of employee severance expenses, abandoned facilities obligations and contract termination costs. The restructuring costs will be recorded to the restructuring expense line item within our consolidated statements of operations as they are recognized. We recorded \$80 million of restructuring expenses in connection with the Sun Restructuring Plan in the first quarter of fiscal 2012, and we expect to incur the majority of the approximately \$170 million of remaining expenses pursuant to the Sun Restructuring Plan

Table of Contents**ORACLE CORPORATION****NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Continued)****August 31, 2011****(Unaudited)**

through the remainder of fiscal 2012. Any changes to the estimates of executing the Sun Restructuring Plan will be reflected in our future results of operations.

Summary of All Plans

(in millions)	Three Months Ended August 31, 2011					Accrued August 31, 2011 ⁽²⁾	Total Costs Accrued to Date	Total Expected Program Costs
	Accrued May 31, 2011 ⁽²⁾	Initial Costs ⁽³⁾	Adj. to Cost ⁽⁴⁾	Cash Payments	Others ⁽⁵⁾			
Sun Restructuring Plan⁽¹⁾								
New software licenses	\$ 14	\$ 16	\$	\$ (15)	\$	\$ 15	\$ 85	\$ 108
Software license updates and product support	19	6	(1)	(11)	1	14	62	89
Hardware systems business	10	5	5	(9)		11	121	140
Services	9	9		(9)		9	65	74
General and administrative and other	100	44	(4)	(37)	1	104	528	620
Total Sun Restructuring	\$ 152	\$ 80	\$	\$ (81)	\$ 2	\$ 153	\$ 861	\$ 1,031
Total other restructuring plans ⁽⁶⁾	\$ 297	\$ 10	\$ 4	\$ (35)	\$ 3	\$ 279		
Total restructuring plans⁽⁷⁾	\$ 449	\$ 90	\$ 4	\$ (116)	\$ 5	\$ 432		

(1) Restructuring costs recorded for individual line items presented related to employee severance costs except for general and administrative and other which included \$6 million recorded during the first three months of fiscal 2012 for facilities related restructuring and contract termination costs.

(2) The balances at August 31, 2011 and May 31, 2011 included \$239 million and \$244 million, respectively, recorded in other current liabilities and \$193 million and \$205 million, respectively, recorded in other non-current liabilities.

(3) Costs recorded for the respective restructuring plans during the current period presented.

(4) All plan adjustments are changes in estimates whereby all increases and decreases in costs are generally recorded to operating expenses in the period of adjustments.

(5) Represents foreign currency translation and other adjustments.

Edgar Filing: ORACLE CORP - Form 10-Q

- (6) Other restructuring plans presented in the table above included condensed information for other Oracle-based plans and other plans associated with certain of our acquisitions whereby we continued to make cash outlays to settle obligations under these plans during the periods presented but for which the current impact to our consolidated statements of operations was not significant.
- (7) Restructuring plans included in this footnote represent those plans that management has deemed the most significant.

Table of Contents**ORACLE CORPORATION****NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Continued)****August 31, 2011****(Unaudited)****8. DEFERRED REVENUES**

Deferred revenues consisted of the following:

(in millions)	August 31, 2011	May 31, 2011
Software license updates and product support	\$ 6,494	\$ 5,386
Hardware systems support	729	687
Services	410	438
New software licenses	263	263
Hardware systems products	29	28
Deferred revenues, current	7,925	6,802
Deferred revenues, non-current (in other non-current liabilities)	311	316
Total deferred revenues	\$ 8,236	\$ 7,118

Deferred software license updates and product support revenues and deferred hardware systems support revenues represent customer payments made in advance for support contracts that are typically billed on a per annum basis in advance with corresponding revenues being recognized ratably over the support periods. Deferred services revenues include prepayments for our services business and revenue for these services is recognized as the services are performed. Deferred new software license revenues typically result from undelivered products or specified enhancements, customer specific acceptance provisions, time based arrangements and software license transactions that cannot be segmented from undelivered consulting or other services. Deferred hardware systems products revenues typically result from sales to customers, including channel partners and resellers, where revenue recognition criteria have not been met and transactions that cannot be segmented from undelivered consulting or other services.

In connection with our acquisitions, we have estimated the fair values of the software license updates and product support obligations and hardware systems support obligations assumed from our acquired companies. We have estimated the fair values of the support obligations assumed using a cost build-up approach. The cost build-up approach determines fair value by estimating the costs relating to fulfilling the obligations plus a normal profit margin. The sum of the costs and operating profit approximates, in theory, the amount that we would be required to pay a third party to assume the acquired support obligations. Substantially all of the fair value adjustments recorded for support obligations assumed reduce the software license updates and product support and hardware systems support deferred revenue balances that we record as liabilities and also reduce the resulting revenues that we recognize over the support contract term of the acquired contracts during the post-combination periods.

9. DERIVATIVE FINANCIAL INSTRUMENTS**Interest Rate Swap Agreements**

In September 2009, we entered into interest rate swap agreements that have the economic effect of modifying the fixed interest obligations associated with our 3.75% senior notes due July 2014 (2014 Notes) so that the interest payable on these notes effectively became variable based on LIBOR. The critical terms of the interest rate swap agreements and the 2014 Notes match, including the notional amounts and maturity dates. Accordingly, we have designated these swap agreements as qualifying hedging instruments and are accounting for them as fair value hedges

Edgar Filing: ORACLE CORP - Form 10-Q

pursuant to ASC 815, *Derivatives and Hedging*. These transactions are characterized as fair value hedges for financial accounting purposes because they protect us against changes in the fair value of our fixed rate borrowings due to benchmark interest rate movements. The changes in fair values of these interest rate swap agreements are recognized as interest expense in our consolidated statements of operations with the corresponding amounts included in other assets or other non-current liabilities in our consolidated balance sheets.

Table of Contents

ORACLE CORPORATION

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Continued)

August 31, 2011

(Unaudited)

The amount of net gain (loss) attributable to the risk being hedged is recognized as interest expense in our consolidated statements of operations with the corresponding amount included in notes payable and other non-current borrowings. The periodic interest settlements, which occur at the same interval as the 2014 Notes, are recorded as interest expense. As of August 31, 2011 and May 31, 2011, the fair values of these interest rate swap agreements recorded as other assets in our consolidated balance sheets were \$86 million and \$69 million, respectively.

We do not use any interest rate swap agreements for trading purposes.

Foreign Currency Forward Contracts Not Designated as Hedges

We transact business in various foreign currencies and have established a program that primarily utilizes foreign currency forward contracts to offset the risks associated with the effects of certain foreign currency exposures. Under this program, our strategy is to enter into foreign currency forward contracts so that increases or decreases in our foreign currency exposures are offset by gains or losses on the foreign currency forward contracts in order to mitigate the risks and volatility associated with our foreign currency transactions. We may suspend this program from time to time. Our foreign currency exposures typically arise from intercompany sublicense fees, intercompany loans and other intercompany transactions that are expected to be cash settled in the near term. Our foreign currency forward contracts are generally short-term in duration. Our ultimate realized gain or loss with respect to currency fluctuations will generally depend on the size and type of cross-currency exposures that we enter into, the currency exchange rates associated with these exposures and changes in those rates, the net realized and unrealized gains or losses on foreign currency forward contracts to offset these exposures and other factors.

We neither use these foreign currency forward contracts for trading purposes nor do we designate these forward contracts as hedging instruments pursuant to ASC 815. Accordingly, we record the fair values of these contracts as of the end of our reporting period to our consolidated balance sheet with changes in fair values recorded to our consolidated statement of operations. The balance sheet classification for the fair values of these forward contracts is prepaid expenses and other current assets for unrealized gains and other current liabilities for unrealized losses. The statement of operations classification for changes in fair values of these forward contracts is non-operating income (expense), net, for both realized and unrealized gains and losses.

As of August 31, 2011 and May 31, 2011, the notional amounts of the forward contracts we held to purchase U.S. Dollars in exchange for other major international currencies were each \$2.5 billion, and the notional amounts of forward contracts we held to sell U.S. Dollars in exchange for other major international currencies were \$1.0 billion and \$1.6 billion, respectively. The fair values of our outstanding foreign currency forward contracts were nominal at August 31, 2011 and May 31, 2011.

Included in our non-operating income (expense), net were \$17 million of net losses related to these forward contracts for the three months ended August 31, 2011 (none for the three months ended August 31, 2010).

10. STOCKHOLDERS EQUITY

Stock Repurchases

Our Board of Directors has approved a program for us to repurchase shares of our common stock. On October 20, 2008, we announced that our Board of Directors approved the expansion of our repurchase program by \$8.0 billion and as of August 31, 2011, approximately \$3.3 billion was available for share repurchases pursuant to our stock repurchase program. We repurchased 27.5 million shares for \$823 million during the three months ended August 31, 2011 (including 1.7 million shares for \$47 million that were repurchased but not settled) and 10.9 million shares for \$249 million during the three months ended August 31, 2010 under the applicable repurchase programs.

Table of Contents**ORACLE CORPORATION****NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Continued)****August 31, 2011****(Unaudited)**

Our stock repurchase authorization does not have an expiration date and the pace of our repurchase activity will depend on factors such as our working capital needs, our cash requirements for acquisitions and dividend payments, our debt repayment obligations or repurchase of our debt, our stock price, and economic and market conditions. Our stock repurchases may be effected from time to time through open market purchases or pursuant to a Rule 10b5-1 plan. Our stock repurchase program may be accelerated, suspended, delayed or discontinued at any time.

Dividends on Common Stock

In the first quarter of fiscal 2012, our Board of Directors declared a cash dividend of \$0.06 per share of our outstanding common stock, which we paid during the same period.

In September 2011, our Board of Directors declared a quarterly cash dividend of \$0.06 per share of our outstanding common stock payable on November 2, 2011 to stockholders of record as of the close of business on October 12, 2011. Future declarations of dividends and the establishment of future record and payment dates are subject to the final determination of our Board of Directors.

Stock-Based Compensation Expense and Valuation of Stock Options

Stock-based compensation is included in the following operating expense line items in our condensed consolidated statements of operations:

(in millions)	Three Months Ended August 31,	
	2011	2010
Sales and marketing	\$ 26	\$ 23
Software license updates and product support	4	5
Hardware systems products	1	1
Hardware systems support	1	1
Services	4	4
Research and development	71	59
General and administrative	40	36
Acquisition related and other	1	1
Total stock-based compensation	\$ 148	\$ 130

We estimate the fair value of our share-based payments using the Black-Scholes-Merton option-pricing model, which was developed for use in estimating the fair value of stock options. Option valuation models, including the Black-Scholes-Merton option-pricing model, require the input of assumptions, including stock price volatility. Changes in the input assumptions can materially affect the fair value estimates and ultimately how much we recognize as stock-based compensation expense. The fair values of our stock options were estimated at the date of grant or date of acquisition for options assumed in a business combination. The weighted average input assumptions used and resulting fair values were as follows for the three months ended August 31, 2011 and 2010:

**Three Months Ended
August 31,**

Edgar Filing: ORACLE CORP - Form 10-Q

	2011	2010
Expected life (in years)	5.2	5.2
Risk-free interest rate	1.7%	1.8%
Volatility	30%	33%
Dividend yield	0.7%	0.9%
Weighted-average fair value per share	\$ 8.78	\$ 6.34

Table of Contents

ORACLE CORPORATION

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Continued)

August 31, 2011

(Unaudited)

The expected life input is based on historical exercise patterns and post-vesting termination behavior, the risk-free interest rate input is based on United States Treasury instruments, the annualized dividend yield input is based on the per share dividend declared by our Board of Directors and the volatility input is calculated based on the implied volatility of our longest-term, traded options.

11. INCOME TAXES

The effective tax rate for the periods presented is the result of the mix of income earned in various tax jurisdictions that apply a broad range of income tax rates. Our provision for income taxes differs from the tax computed at the U.S. federal statutory income tax rate due primarily to earnings considered as indefinitely reinvested in foreign operations, state taxes, the U.S. research and development tax credit, and the U.S. domestic production activity deduction. Our effective tax rate was 25.6% and 24.7% for the three months ended August 31, 2011 and 2010, respectively.

Our net deferred tax assets were \$2.3 billion and \$2.1 billion as of August 31, 2011 and May 31, 2011, respectively. We believe it is more likely than not that the net deferred tax assets will be realized in the foreseeable future. Realization of our net deferred tax assets is dependent upon our generation of sufficient taxable income in future years in appropriate tax jurisdictions to obtain benefit from the reversal of temporary differences, net operating loss carryforwards, and tax credit carryforwards. The amount of net deferred tax assets considered realizable is subject to adjustment in future periods if estimates of future taxable income change.

Domestically, U.S. federal and state taxing authorities are currently examining income tax returns of Oracle and various acquired entities for years through fiscal 2010. Our U.S. federal and, with some exceptions, our state income tax returns have been examined for all years prior to fiscal 2000, and we are no longer subject to audit for those periods.

Internationally, tax authorities for numerous non-U.S. jurisdictions are also examining returns affecting unrecognized tax benefits. With some exceptions, we are generally no longer subject to tax examinations in non-U.S. jurisdictions for years prior to fiscal 1998.

We believe that we have adequately provided for any reasonably foreseeable outcomes related to our tax audits and that any settlement will not have a material adverse effect on our consolidated financial position or results of operations. However, there can be no assurances as to the possible outcomes.

12. SEGMENT INFORMATION

ASC 280, *Segment Reporting*, establishes standards for reporting information about operating segments. Operating segments are defined as components of an enterprise about which separate financial information is available that is evaluated regularly by the chief operating decision maker, or decision making group, in deciding how to allocate resources and in assessing performance. Our chief operating decision maker is our Chief Executive Officer. We are organized geographically and by line of business. While our Chief Executive Officer evaluates results in a number of different ways, the line of business management structure is the primary basis for which the allocation of resources and financial results are assessed. We have three businesses—software, hardware systems and services—which are further divided into certain operating segments. Our software business is comprised of two operating segments: (1) new software licenses and (2) software license updates and product support. Our hardware systems business is comprised of two operating segments: (1) hardware systems products and (2) hardware systems support. All other operating segments are combined under our services business.

The new software licenses line of business is engaged in the licensing of database and middleware software, as well as our applications software. Database and middleware software generally includes database management software, application server software, Service-Oriented

Architecture and business process management software,

Table of Contents

ORACLE CORPORATION

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Continued)

August 31, 2011

(Unaudited)

data integration software, business intelligence software, identity and access management software, content management software, portals and user interaction software, and development tools. Our database and middleware software product offerings also include Java, which is a global software development platform used in a wide range of computers, networks and devices. Applications software generally provides enterprise information that enables companies to manage their business cycles and provides intelligence and includes enterprise resource planning software, customer relationship management software, enterprise performance management software, supply chain management software, business intelligence applications software, enterprise portfolio project management software, web commerce software and industry-specific applications software.

The software license updates and product support line of business provides customers with rights to unspecified software product upgrades and maintenance releases, internet access to technical content, as well as internet and telephone access to technical support personnel during the support period.

The hardware systems products line of business consists primarily of computer server and storage product offerings and hardware-related software, including the Oracle Solaris Operating System. Most of our computer servers are based on our SPARC family of microprocessors and on microprocessors from Intel Corporation. Our servers range from high performance computing servers to cost efficient, entry-level servers, and run with Oracle Solaris, Oracle Linux and certain other operating systems environments. Our storage products are designed to securely manage, protect, archive and restore customers' data assets and consist of tape, disk and networking solutions for open systems and mainframe server environments. Customers that purchase our hardware systems products may also elect to purchase our hardware systems support offerings. Our hardware systems support line of business offers customers contracts that provide software updates for the software components that are essential to the functionality of our hardware systems and storage products and may also include product repairs, maintenance services, and technical support services.

Our services business is comprised of the remainder of our operating segments and offers consulting services, certain of our Oracle Cloud Services offerings, Advanced Customer Services and education services. Our consulting line of business primarily provides services to customers in business and information technology strategy alignment, enterprise architecture planning and design, initial product implementation and integration, and ongoing product enhancements and upgrades. Oracle Cloud Services are designed to provide comprehensive software and hardware management and maintenance services for customers hosted at our Oracle data center facilities, select partner data centers or physically on-site at customer facilities. Advanced Customer Services provide support services, both on-site and remote, to customers to enable increased performance and higher availability of their products and services. Education services provide training to customers, partners and employees as a part of our mission to further the adoption and usage of our software and hardware products by our customers and create opportunities to grow our product revenues.

We do not track our assets by operating segments. Consequently, it is not practical to show assets by operating segment.

Table of Contents**ORACLE CORPORATION****NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Continued)****August 31, 2011****(Unaudited)**

The following table presents summary results for each of our three businesses and for the operating segments of our software and hardware systems businesses:

(in millions)	Three Months Ended August 31,	
	2011	2010
New software licenses:		
Revenues ⁽¹⁾	\$ 1,493	\$ 1,282
Sales and distribution expenses	1,144	892
Margin⁽²⁾	\$ 349	\$ 390
Software license updates and product support:		
Revenues ⁽¹⁾	\$ 4,035	\$ 3,475
Software license update and product support expenses	274	273
Margin⁽²⁾	\$ 3,761	\$ 3,202
Total software business:		
Revenues ⁽¹⁾	\$ 5,528	\$ 4,757
Expenses	1,418	1,165
Margin⁽²⁾	\$ 4,110	\$ 3,592
Hardware systems products:		
Revenues	\$ 1,029	\$ 1,079
Hardware systems products expenses	473	554
Sales and distribution expenses	266	230
Margin⁽²⁾	\$ 290	\$ 295
Hardware systems support:		
Revenues ⁽¹⁾	\$ 656	\$ 680
Hardware systems support expenses	272	292
Margin⁽²⁾	\$ 384	\$ 388
Total hardware systems business:		
Revenues ⁽¹⁾	\$ 1,685	\$ 1,759
Expenses	1,011	1,076
Margin⁽²⁾	\$ 674	\$ 683
Total services business:		
Revenues ⁽¹⁾	\$ 1,185	\$ 1,072
Services expenses	914	852
Margin⁽²⁾	\$ 271	\$ 220
Totals:		

Edgar Filing: ORACLE CORP - Form 10-Q

Revenues ⁽¹⁾	\$ 8,398	\$ 7,588
Expenses	3,343	3,093
Margin ⁽²⁾	\$ 5,055	\$ 4,495

(1) Operating segment revenues generally differ from the external reporting classifications due to certain software license products that are classified as service revenues for management reporting purposes. Software license updates and product support revenues for

Table of Contents**ORACLE CORPORATION****NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Continued)****August 31, 2011****(Unaudited)**

management reporting included \$13 million and \$25 million of revenues that we did not recognize in the accompanying condensed consolidated statements of operations for the three months ended August 31, 2011 and 2010, respectively. In addition, we did not recognize hardware systems support revenues related to hardware systems support contracts that would have otherwise been recorded by certain acquired companies, in the amount of \$11 million and \$61 million for the three months ended August 31, 2011 and 2010, respectively. See Note 8 for an explanation of these adjustments and the table below for a reconciliation of total operating segment revenues to total revenues.

- (2) The margins reported reflect only the direct controllable costs of each line of business and do not include allocations of product development, information technology, marketing and partner programs, and corporate and general and administrative expenses. Additionally, the margins do not reflect amortization of intangible assets, acquisition related and other expenses, restructuring expenses, or stock-based compensation.

The following table reconciles total operating segment revenues to total revenues, as well as total operating segment margin to income before provision for income taxes:

(in millions)	Three Months Ended	
	August 31,	
	2011	2010
Total revenues for operating segments	\$ 8,398	\$ 7,588
Software license updates and product support revenues ⁽¹⁾	(13)	(25)
Hardware systems support revenues ⁽¹⁾	(11)	(61)
Total revenues	\$ 8,374	\$ 7,502
Total margin for operating segments	\$ 5,055	\$ 4,495
Software license updates and product support revenues ⁽¹⁾	(13)	(25)
Hardware systems support revenues ⁽¹⁾	(11)	(61)
Product development and information technology expenses	(1,076)	(1,159)
Marketing and partner program expenses	(132)	(134)
Corporate and general and administrative expenses	(268)	(233)
Amortization of intangible assets	(592)	(603)
Acquisition related and other	(19)	(83)
Restructuring	(101)	(129)
Stock-based compensation	(147)	(129)
Interest expense	(192)	(196)
Non-operating income (expense), net	(33)	52
Income before provision for income taxes	\$ 2,471	\$ 1,795

- (1) Software license updates and product support revenues for management reporting include \$13 million and \$25 million of revenues that we did not recognize in the accompanying condensed consolidated statements of operations for the three months ended August 31, 2011 and 2010, respectively. In addition, we did not recognize hardware systems support revenues related to hardware systems support contracts that would have otherwise been recorded by certain acquired companies as independent entities, in the amounts of \$11 million and \$61 million for the three months ended August 31, 2011 and 2010, respectively. See Note 8 for an explanation of these adjustments and this table for a reconciliation of total operating segment revenues to total revenues.

Table of Contents**ORACLE CORPORATION****NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Continued)****August 31, 2011****(Unaudited)****13. EARNINGS PER SHARE**

Basic earnings per share is computed by dividing net income for the period by the weighted average number of common shares outstanding during the period. Diluted earnings per share is computed by dividing net income for the period by the weighted average number of common shares outstanding during the period, plus the dilutive effect of outstanding stock options, restricted stock-based awards and shares issuable under the employee stock purchase plan using the treasury stock method. The following table sets forth the computation of basic and diluted earnings per share:

(in millions, except per share data)	Three Months Ended August 31,	
	2011	2010
Net income	\$ 1,840	\$ 1,352
Weighted average common shares outstanding	5,062	5,026
Dilutive effect of employee stock plans	88	57
Diluted weighted average common shares outstanding	5,150	5,083
Basic earnings per share	\$ 0.36	\$ 0.27
Diluted earnings per share	\$ 0.36	\$ 0.27
Shares subject to anti-dilutive stock options and restricted stock-based awards excluded from calculation ⁽¹⁾	85	159

⁽¹⁾ These weighted shares relate to anti-dilutive stock options and restricted stock-based awards as calculated using the treasury stock method (described above) and could be dilutive in the future.

14. LEGAL PROCEEDINGS**SAP Intellectual Property Litigation**

On March 22, 2007, Oracle Corporation, Oracle USA, Inc. and Oracle International Corporation (collectively, Oracle) filed a complaint in the United States District Court for the Northern District of California against SAP AG, its wholly owned subsidiary, SAP America, Inc., and its wholly owned subsidiary, TomorrowNow, Inc., (the SAP Subsidiary, and collectively, the SAP Defendants) alleging that SAP unlawfully accessed Oracle's Customer Connection support website and improperly took and used Oracle's intellectual property, including software code and knowledge management solutions. The claims alleged in the final operative complaint, Oracle's Fourth Amended Complaint, filed on August 18, 2009 include infringement of the federal Copyright Act, breach of contract, violations of the Federal Computer Fraud and Abuse Act and the California Computer Data Access and Fraud Act, civil conspiracy, trespass, violation of the California Unfair Business Practices Act, and intentional and negligent interference with prospective economic advantage. The SAP Defendants filed an Answer on August 26, 2009.

Following the close of discovery and motion practice, on September 13, 2010, the court approved a stipulation by the parties whereby the SAP Subsidiary stipulated to all liability on all claims, and SAP AG and SAP America, Inc. stipulated to vicarious liability on the copyright claims against the SAP Subsidiary, and the SAP defendants retained all defenses related to damages.

Edgar Filing: ORACLE CORP - Form 10-Q

Trial commenced November 1, 2010. On November 2, 2010, the court approved a stipulation by the parties, pursuant to which SAP AG and SAP America, Inc. stipulated to liability for its own contributory infringement of 120 of Oracle's copyrights. Following trial on the sole issue of the amount of damages the SAP Defendants should pay to Oracle for the admitted infringement, the jury awarded Oracle the sum of \$1.3 billion. The court entered judgment for that amount and for pre-judgment interest on February 3, 2011. The amount has not been received and has not been recorded as a benefit to our results of operations.

Table of Contents

ORACLE CORPORATION

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Continued)

August 31, 2011

(Unaudited)

On February 23, 2011, the SAP Defendants filed a motion for judgment as a matter of law and for new trial, and on September 1, 2011, the court granted the SAP Defendants' motion. The court vacated the \$1.3 billion award and held that the maximum amount of damages sustainable by the proof presented at trial is \$272 million. The court further held that Oracle may accept a remittitur of \$272 million or, alternatively, the court will order a new trial as to the amount of actual damages in the form of lost profits and infringer's profits.

On September 12, 2011, Oracle filed a motion seeking permission to bring an immediate appeal of the trial court's September 1, 2011 order. Oracle also filed a motion to stay all further proceedings pending the court's ruling on the motion to file an appeal and pending any subsequent appellate proceedings. In response, on September 16, 2011, the court issued another order clarifying the September 1, 2011 order and inviting Oracle to file a revised motion for certification. The court also denied Oracle's motion to stay proceedings pending appeal as premature but granted Oracle an extension of time to accept or reject the remittitur presented in the court's September 1, 2011 order. On September 23, 2011, Oracle filed its revised motion for certification.

On September 8, 2011, the SAP Subsidiary was charged by the U.S. Attorney for the Northern District of California with criminal copyright infringement and unauthorized access to a protected computer with intent to defraud. On September 14, 2011, the SAP Subsidiary pled guilty as charged. Under the plea agreement reached with the U.S. Attorney's office, the SAP Subsidiary is required to pay a fine of \$20 million to the United States, to pay restitution to Oracle in an amount to be determined through the pending civil action, and to remain on probation for a term of three years.

Derivative Litigation and Related Action

On August 2, 2010, a stockholder derivative lawsuit was filed in the United States District Court for the Northern District of California. On August 19, 2010, a similar stockholder derivative lawsuit was filed in the Superior Court of the State of California, County of San Mateo. The derivative suits were brought by alleged stockholders of Oracle, purportedly on our behalf, against some of our current officers and directors, and one officer and director who has since left the company. Citing the claims in a qui tam action (discussed below), plaintiffs allege that Oracle improperly overcharged the United States government by failing to provide discounts required under its contract with the General Services Administration (GSA), and that Oracle made false statements to the United States government. Plaintiffs alleged that the officer and director defendants are responsible for this alleged conduct and have exposed Oracle to reputational damage, potential monetary damages, and costs relating to the investigation, defense, and remediation of the underlying claims. Plaintiffs bring claims for breach of fiduciary duty, abuse of control, and unjust enrichment. Thereafter, the two cases were consolidated, and on February 10, 2011, plaintiffs filed a consolidated complaint. On March 31, 2011, Oracle filed a motion to dismiss the consolidated complaint, and the individual defendants brought a separate motion to dismiss. Plaintiffs filed a consolidated opposition to these motions on April 28, 2011, and defendants filed a consolidated reply on May 19, 2011. The court heard oral arguments on these motions on June 2, 2011, but has not yet ruled on these motions. As discussed below, Oracle believes that the claims in the qui tam action are meritless, and that there are additional defenses to plaintiffs' bringing this action on Oracle's behalf.

On September 8, 2011, another stockholder derivative lawsuit was filed in the United States District Court for the Northern District of California. Like the consolidated derivative actions discussed above, the derivative suit filed on September 8, 2011, also was brought by an alleged stockholder of Oracle, purportedly on our behalf, against some of our current officers and directors. Citing the claims in a qui tam action (discussed below), plaintiff alleges that Oracle improperly overcharged the United States government by failing to provide discounts required under its contract with the General Services Administration (GSA), and that Oracle made false statements to the United States government. Plaintiff alleged that the officer and director defendants are responsible for this alleged conduct and have exposed Oracle to reputational damage, potential monetary damages, and costs relating to the investigation, defense, and remediation of the underlying claims. Plaintiff is pursuing claims for breach of

Table of Contents

ORACLE CORPORATION

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Continued)

August 31, 2011

(Unaudited)

fiduciary duty, waste of corporate assets, and unjust enrichment. Plaintiff is seeking compensatory and other damages, injunctive relief, imposition of a constructive trust, restitution, an award of attorneys' fees and costs, and other relief. As discussed below, Oracle believes that the claims in the qui tam action are meritless and that there are additional defenses to plaintiff's bringing this action on Oracle's behalf.

On September 12, 2011, two alleged stockholders of Oracle filed a Verified Petition for Writ of Mandate for Inspection of Corporate Books and Records in the Superior Court of the State of California, County of San Mateo. The petition names as respondents Oracle and two of the company's officers. Citing the claims in a qui tam action (discussed below), the alleged stockholders claim that they are investigating alleged corporate mismanagement and alleged improper and fraudulent practices relating to the pricing of Oracle's products supplied to the United States government. The alleged stockholders request that the court issue a writ of mandate compelling the inspection of certain of the company's accounting books and records and minutes of meetings of the stockholders, the Board of Directors, and the committees of the Board, related to those allegations. The petition further seeks recovery of expenses of the requested audit and investigation to be paid by Oracle and award attorneys' fees and associated costs. As discussed in the paragraph below, Oracle believes that the claims in the qui tam action are meritless. In addition, Oracle believes that there are additional defenses to the petition.

On June 16, 2009, the United States Department of Justice notified us that a qui tam action had been filed against Oracle in the United States District Court for the Eastern District of Virginia and that the government was conducting an investigation of the allegations in the sealed complaint. On July 29, 2010, the United States government filed a Complaint in Intervention in that action, alleging that Oracle made false and fraudulent statements to the GSA in 1997-98 regarding Oracle's commercial pricing practices, discounts provided to Oracle's commercial customers, and discounts provided to government purchasers. The government alleges that Oracle also improperly manipulated commercial sales to avoid the discounting restrictions imposed by the GSA contract, reiterated and confirmed in 2001 false statements allegedly made during the 1997-98 contract negotiations, and breached a duty to inform the government about discounts offered to commercial customers. The Complaint in Intervention alleges False Claims Act violations and claims for breach of contract, fraud in the inducement, constructive fraud, fraud by omission, payment by mistake, and unjust enrichment. The Complaint in Intervention seeks statutory penalties and damages, including treble damages. Oracle filed a motion to dismiss the complaint and on November 3, 2010, the court granted the motion in part and denied it in part. The court dismissed the government's claims to the extent they arose before May 29, 2001, and ordered the government to file a new complaint. This First Amended Complaint was filed on November 16, 2010, and makes allegations similar to those in the original complaint. Oracle filed a motion to dismiss the First Amended Complaint, which was denied. Oracle answered the First Amended Complaint on February 1, 2011. The parties are engaged in settlement negotiations, and as a result, the discovery and trial schedules have been suspended. We cannot currently estimate a reasonably possible range of loss for this action. We believe that we have meritorious defenses against this action, and if we are unable to reach a settlement, we will continue to vigorously defend against this action.

Other Litigation

We are party to various other legal proceedings and claims, either asserted or unasserted, which arise in the ordinary course of business, including proceedings and claims that relate to acquisitions we have completed or to companies we have acquired or are attempting to acquire. While the outcome of these matters cannot be predicted with certainty, we do not believe that the outcome of any of these claims will have a materially adverse effect on our consolidated financial position, results of operations or cash flows.

Table of Contents

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

We begin Management's Discussion and Analysis of Financial Condition and Results of Operations with an overview of our key operating business segments and significant trends. This overview is followed by a summary of our critical accounting policies and estimates that we believe are important to understanding the assumptions and judgments incorporated in our reported financial results. We then provide a more detailed analysis of our results of operations and financial condition.

Business Overview

We are the world's largest enterprise software company and a leading provider of computer hardware products and services. We develop, manufacture, market, distribute and service database and middleware software; applications software; and hardware systems, consisting primarily of computer server and storage products. Our products are built on industry standards and are engineered to work together or independently within existing customer information technology (IT) environments. We offer customers secure, reliable, and scalable integrated software and hardware solutions that are designed to improve business efficiencies and more easily adapt to an organization's unique needs, at a lower total cost of ownership. We seek to be an industry leader in each of the specific product categories in which we compete and to expand into new and emerging markets.

We are organized into three businesses—software, hardware systems and services—which are further divided into certain operating segments. We believe our internal growth and continued innovation with respect to our software, hardware and services businesses are the foundation of our long-term strategic plans. An important element of our continued innovation and product strategy is to focus the engineering of our hardware and software products to make them work together more effectively and deliver improved computing performance, reliability and security to our customers. Our Oracle Exadata Database Machine and Oracle Exalogic Elastic Cloud products exemplify this strategy and are currently two of our most important products. Both products combine certain of our hardware and software offerings to provide an engineered system that increases computing performance relative to our competitors' products, creating time savings and operational cost advantages for our customers.

Our businesses provide the products and services necessary to run a wide range of customer IT environments, including cloud computing environments. Cloud computing environments provide on demand access to a shared pool of computing resources in a self-service, dynamically scalable manner, delivering advantages in speed and efficiency. Cloud computing has evolved from technologies and services that Oracle has provided for many years, including clustering, server virtualization, Service-Oriented Architecture (SOA) shared services and large-scale management automation. Our cloud computing strategy is broad and comprehensive to provide customers with choice and a pragmatic roadmap for implementing or maintaining private clouds, which are generally exclusive to a single organization, public clouds, which are generally shared by multiple organizations and managed by a third party service provider, or integration between clouds.

We also believe that an active acquisition program is an important element of our corporate strategy as it strengthens our competitive position, enhances the products and services that we can offer to customers, expands our customer base, provides greater scale to accelerate innovation, grows our revenues and earnings, and increases stockholder value. In recent years, we have invested billions of dollars to acquire a number of companies, products, services and technologies that add to, are complementary to, or have otherwise enhanced our existing offerings. We expect to continue to acquire companies, products, services and technologies in furtherance of our corporate strategy.

Each of our businesses and operating segments has unique characteristics and faces different opportunities and challenges. Although we report our actual results in U.S. Dollars, we conduct a significant number of transactions in currencies other than U.S. Dollars. Therefore, we present constant currency information to provide a framework for assessing how our underlying businesses performed excluding the effect of foreign currency rate fluctuations. An overview of our three businesses and related operating segments follows.

Table of Contents

Software Business

Our software business, which represented 68% of our total revenues on a trailing 4-quarter basis, is comprised of two operating segments: (1) new software licenses and (2) software license updates and product support. On a constant currency basis, we expect that our software business total revenues generally will continue to increase due to continued demand for our software products and software license updates and product support offerings, including the high percentage of customers that renew their software license updates and product support contracts, and due to our acquisitions, which should allow us to grow our profits and continue to make investments in research and development.

New Software Licenses: We license our database and middleware as well as our applications software to businesses of many sizes, government agencies, educational institutions and resellers. The growth in new software license revenues that we report is affected by the strength of general economic and business conditions, governmental budgetary constraints, the competitive position of our software products, our acquisitions and foreign currency fluctuations. The substantial majority of our new software license business is also characterized by long sales cycles. The timing of a few large software license transactions can substantially affect our quarterly new software license revenues. Since our new software license revenues in a particular quarter can be difficult to predict as a result of the timing of a few large software license transactions, we believe that analysis of new software license revenues on a trailing 4-quarter period provides additional visibility into the underlying performance of our new software license business. New software license revenues represented 26% of our total revenues on a trailing 4-quarter basis. Our new software license segment's margins have historically trended upward over the course of the four quarters within a particular fiscal year due to the historical upward trend of our new software license revenues over those quarterly periods and because the majority of our costs for this segment are predominantly fixed in the short-term. However, our new software license segment's margins have been and will continue to be affected by the amortization of intangible assets associated with companies and technologies that we have acquired.

Software License Updates and Product Support: Customers that purchase software license updates and product support are granted rights to unspecified product upgrades and maintenance releases issued during the support period, as well as technical support assistance. Substantially all of our customers renew their software license updates and product support contracts annually. The growth of software license updates and product support revenues is primarily influenced by three factors: (1) the percentage of our support contract customer base that renews its support contracts, (2) the amount of new support contracts sold in connection with the sale of new software licenses, and (3) the amount of support contracts assumed from companies we have acquired.

Software license updates and product support revenues, which represented 42% of our total revenues on a trailing 4-quarter basis, is our highest margin business unit. Our software support margins over the trailing 4-quarters were 86% and accounted for 70% of our total margins over the same period. Our software license update and product support margins have been affected by fair value adjustments relating to software support obligations assumed in business combinations (described further below) and by amortization of intangible assets. However, over the longer term, we believe that software license updates and product support revenues and margins will grow for the following reasons:

substantially all of our customers, including customers from acquired companies, renew their support contracts when eligible for renewal;

substantially all of our customers purchase software license updates and product support contracts when they buy new software licenses, resulting in a further increase in our support contract base. Even if new software license revenues growth was flat, software license updates and product support revenues would continue to grow in comparison to the corresponding prior year periods assuming renewal and cancellation rates and foreign currency rates remained relatively constant since substantially all new software license transactions result in the sale of software license updates and product support contracts, which add to our support contract base; and

our acquisitions have increased our support contract base, as well as the portfolio of products available to be licensed and supported.

Table of Contents

We recorded adjustments to reduce support obligations assumed in business combinations to their estimated fair values at the acquisition dates. As a result, as required by business combination accounting rules, we did not recognize software license updates and product support revenues related to support contracts that would have been otherwise recorded by the acquired businesses as independent entities in the amount of \$13 million and \$25 million for the three months ended August 31, 2011 and 2010, respectively. To the extent underlying support contracts are renewed with us following an acquisition, we will recognize the revenues for the full value of the support contracts over the support periods, the majority of which are one year.

Hardware Systems Business

Our hardware systems business consists of two operating segments: (1) hardware systems products and (2) hardware systems support. Our hardware business represented 19% of our total revenues on a trailing 4-quarter basis. We expect our hardware business to have lower operating margins as a percentage of revenues than our software business due to the incremental costs we incur to produce and distribute these products and to provide support services, including direct materials and labor costs. We expect to make investments in research and development to improve existing hardware products and services and to develop new hardware products and services.

Hardware Systems Products: Our hardware systems products consist primarily of computer server and storage product offerings and hardware-related software, including our Oracle Solaris operating system. Our hardware systems component products are designed to be open, or to work in customer environments that may include other Oracle or non-Oracle hardware or software components. We have also engineered our hardware systems products to create performance and operational cost advantages for customers when our hardware and software products are combined as engineered systems, as with Oracle Exadata and Oracle Exalogic Elastic Cloud.

We offer a wide range of server systems using our SPARC microprocessor. Our SPARC servers are differentiated by their reliability, security, scalability and customer environments that they target (general purpose or specialized systems). Our midsize and large servers are designed to offer greater performance and lower total cost of ownership than mainframe systems for business critical applications and for customers having more computationally intensive needs. Our SPARC servers run the Oracle Solaris operating system and are designed for the most demanding mission critical enterprise environments at any scale.

We also offer a wide range of x86 servers. These x86 servers are primarily based on microprocessor platforms from Intel Corporation and are also compatible with Oracle Solaris, Oracle Linux, Microsoft Windows and other operating systems.

Our storage products are designed to securely manage, protect, archive and restore customers' mission critical data assets and consist of tape, disk, hardware-related software including file systems software, back-up and archive software and storage management software, and networking for mainframe and open systems environments.

The majority of our hardware systems products are sold through indirect channels, including independent distributors and value added resellers.

To produce our hardware products, we rely on both our internal manufacturing operations as well as third party manufacturing partners. Our internal manufacturing operations consist primarily of final assembly, test and quality control of enterprise and data center servers and storage systems. For all other manufacturing, we rely on third party manufacturing partners. We distribute most of our hardware products either from our facilities or partner facilities. We are continuing to focus on reducing costs by simplifying our manufacturing processes through increased standardization of components across product types and a build-to-order manufacturing process in which products are built only after customers have placed firm orders. In addition, we are focusing on identifying hardware systems support processes that are intended to proactively identify and solve quality issues and to increase the amount of new hardware systems support contracts sold in connection with the sales of new hardware products.

Our hardware systems products revenues, cost of hardware systems products and operating margins that we report are affected by the strength of general economic and business conditions, governmental budgetary

Table of Contents

constraints, the competitive position of our hardware systems products, and our acquisitions and foreign currency fluctuations. In addition, our operating margins for our hardware systems products segment have been and will be affected by the amortization of intangible assets.

We have limited experience in predicting our quarterly hardware systems products revenues. The timing of customer orders and delays in our ability to timely manufacture or deliver a few large transactions could substantially affect the amount of hardware systems products revenues, expenses and operating margins that we report.

Hardware Systems Support: Customers that purchase our hardware systems products may also elect to purchase our hardware systems support offerings. Our hardware systems support offerings provide customers with software updates for the software components that are essential to the functionality of our server and storage products, such as Oracle Solaris, and can include product repairs, maintenance services, and technical support services. Typically, our hardware systems support contract arrangements are invoiced to the customer at the beginning of the support period and are one year in duration. The growth of our hardware systems support revenues is influenced by a number of factors, including the volume of purchases of hardware products, the mix of hardware products purchased, and the percentage of our hardware systems support contract customer base that renews its support contracts. All of these factors are heavily influenced by our customers' decisions to either maintain or upgrade their existing hardware systems infrastructure to newly developed technologies that are available.

Our hardware systems support margins have been and will be affected by fair value adjustments relating to hardware systems support obligations assumed and by the amortization of intangible assets. As required by business combination accounting rules, we recorded adjustments to reduce our hardware systems support revenues for contracts assumed from our acquisitions to their estimated fair values. These amounts would have been recorded as hardware systems support revenues by the acquired businesses as independent entities in the amounts of \$11 million and \$61 million for the first quarter of fiscal 2012 and 2011, respectively. To the extent underlying hardware systems support contracts are renewed with us following an acquisition, we will recognize the revenues for the full values of the hardware systems support contracts over the support periods.

Services Business

Our services business is comprised of the remainder of our operating segments and offers consulting services, certain of our Oracle Cloud Services offerings, Advanced Customer Services and education services. Our services business, which represented 13% of our total revenues on a trailing 4-quarter basis, has significantly lower margins than our software and hardware businesses. Our services revenues are impacted by certain of our acquisitions, general economic conditions, personnel reductions in our customers' IT departments, tighter controls over discretionary spending and the growth in our software and hardware systems products revenues.

Our consulting line of business primarily provides services to customers in business and IT strategy alignment, enterprise architecture planning and design, initial product implementation and integration, and ongoing product enhancements and upgrades. The amount of consulting revenues recognized tends to lag the amount of our software and hardware systems products revenues by several quarters since consulting services, if purchased, are typically segmentable from the products with which they relate and are performed after the customer's purchase of the products. Our services revenues as they relate to consulting services are dependent upon general economic conditions and the level of our product revenues, in particular the new software license sales of our application products. To the extent we are able to grow our products revenues, in particular our software application product revenues, we would also generally expect to be able to eventually grow our consulting revenues.

Oracle Cloud Services are designed to provide comprehensive software and hardware management and maintenance services for customers hosted at our Oracle data center facilities, select partner data centers or physically on-site at customer facilities. Advanced Customer Services provide support services, both onsite and remote, to Oracle customers to enable increased performance and higher availability of their products and services. We believe that these offerings provide our customers with increased business performance, reduced risk, a predictable cost and more flexibility and choice in terms of service in order to maximize the performance of their Oracle software and hardware products and services.

Table of Contents

Education services provide training to customers, partners and employees as a part of our mission to further the adoption and usage of our software and hardware products by our customers and create opportunities to grow our products revenues.

Acquisitions

An active acquisition program is another important element of our corporate strategy. In recent years, we have invested billions of dollars to acquire a number of complementary companies, products, services and technologies. We believe our acquisition program strengthens our competitive position, enhances the products and services that we can offer to customers, expands our customer base, provides greater scale to accelerate innovation, grows our revenues and earnings, and increases stockholder value. We expect to continue to acquire companies, products, services and technologies in furtherance of our corporate strategy. Note 2 of Notes to Condensed Consolidated Financial Statements included elsewhere in this Quarterly Report provides additional information related to our pending and recent acquisitions.

We believe we can fund our pending and future acquisitions with our internally available cash, cash equivalents and marketable securities, cash generated from operations, additional borrowings or from the issuance of additional securities. We estimate the financial impact of any potential acquisition with regard to earnings, operating margin, cash flow and return on invested capital targets before deciding to move forward with an acquisition.

Critical Accounting Policies and Estimates

Our consolidated financial statements are prepared in accordance with U.S. generally accepted accounting principles (GAAP) as set forth in the Financial Accounting Standards Board's (FASB) Accounting Standards Codification (Codification) and consider the various staff accounting bulletins and other applicable guidance issued by the SEC. GAAP, as set forth within the Codification, requires us to make certain estimates, judgments and assumptions. We believe that the estimates, judgments and assumptions upon which we rely are reasonable based upon information available to us at the time that these estimates, judgments and assumptions are made. These estimates, judgments and assumptions can affect the reported amounts of assets and liabilities as of the date of the financial statements as well as the reported amounts of revenues and expenses during the periods presented. To the extent there are material differences between these estimates, judgments or assumptions and actual results, our financial statements will be affected. The accounting policies that reflect our more significant estimates, judgments and assumptions and which we believe are the most critical to aid in fully understanding and evaluating our reported financial results include the following:

Revenue Recognition

Business Combinations

Goodwill and Intangible Assets Impairment Assessments

Accounting for Income Taxes

Legal and Other Contingencies

Stock-Based Compensation

Allowances for Doubtful Accounts

In many cases, the accounting treatment of a particular transaction is specifically dictated by GAAP and does not require management's judgment in its application. There are also areas in which management's judgment in selecting among available alternatives would not produce a materially different result. Our senior management has reviewed these critical accounting policies and related disclosures with the Finance and Audit Committee of the Board of Directors.

Edgar Filing: ORACLE CORP - Form 10-Q

In the first quarter of fiscal 2012, there were no significant changes to our critical accounting policies and estimates. Management's Discussion and Analysis of Financial Condition and Results of Operations contained in Part II, Item 7 of our Annual Report on Form 10-K for our fiscal year ended May 31, 2011 provides a more complete discussion of our critical accounting policies and estimates.

Table of Contents

Results of Operations

Impact of Acquisitions

The comparability of our operating results in the first quarter of fiscal 2012 compared to the first quarter of fiscal 2011 is impacted by our acquisitions, primarily Art Technology Group, Inc. (ATG) in the third quarter of fiscal 2011 and Phase Forward Incorporated (Phase Forward) during the first quarter of fiscal 2011.

In our discussion of changes in our results of operations from the first quarter of fiscal 2012 compared to the first quarter of fiscal 2011, we quantify the contribution of our acquired products (for acquisitions that were completed since the beginning of the first quarter of fiscal 2011) to the growth in new software license revenues and to the growth in software license updates and product support revenues. The incremental contributions of our acquisitions to our other businesses and operating segments' revenues and expenses are not provided as they either were not separately identifiable due to the integration of these operating segments into our existing operations and/or were insignificant to our results of operations during the periods presented.

We caution readers that, while pre- and post-acquisition comparisons, as well as the quantified amounts themselves may provide indications of general trends, the acquisition information that we provide has inherent limitations for the following reasons:

the quantifications cannot address the substantial effects attributable to changes in business strategies, including our sales force integration efforts. We believe that if our acquired companies had operated independently and sales forces had not been integrated, the relative mix of products sold would have been different; and

although substantially all of our customers, including customers from acquired companies, renew their software license updates and product support contracts when the contracts are eligible for renewal and we strive to renew hardware systems support contracts, the amounts shown as software license updates and product support deferred revenues and hardware systems support deferred revenues in our supplemental disclosure related to certain charges (presented below) are not necessarily indicative of revenue improvements we will achieve upon contract renewal to the extent customers do not renew.

Seasonality

Our quarterly revenues have historically been affected by a variety of seasonal factors, including the structure of our sales force incentive compensation plans, which are common in the technology industry. Our total revenues and operating margins are typically highest in our fourth fiscal quarter and lowest in our first fiscal quarter. The operating margins of our businesses are affected by seasonal factors in a similar manner as our revenues (in particular, our new software licenses and hardware systems products segments) as certain expenses within our cost structure are relatively fixed in the short term.

Constant Currency Presentation

Our international operations have provided and will continue to provide a significant portion of our total revenues and expenses. As a result, total revenues and expenses will continue to be affected by changes in the U.S. Dollar against major international currencies. In order to provide a framework for assessing how our underlying businesses performed excluding the effect of foreign currency fluctuations, we compare the percent change in the results from one period to another period in this Quarterly Report using constant currency disclosure. To present this information, current and comparative prior period results for entities reporting in currencies other than U.S. Dollars are converted into U.S. Dollars at constant exchange rates (i.e. the rates in effect on May 31, 2011, which was the last day of our prior fiscal year) rather than the actual exchange rates in effect during the respective periods. For example, if an entity reporting in Euros had revenues of 1.0 million Euros from products sold on August 31, 2011 and August 31, 2010, our financial statements would reflect reported revenues of \$1.45 million in the first quarter of fiscal 2012 (using 1.45 as the month-end average exchange rate for the period) and \$1.27 million in the first quarter of fiscal 2011 (using 1.27 as the month-end average exchange rate for the period). The constant currency presentation would translate the results for the first

Table of Contents

quarter of fiscal 2012 and 2011 using the May 31, 2011 exchange rate and indicate, in this example, no change in revenues during the period. In each of the tables below, we present the percent change based on actual, unrounded results in reported currency and in constant currency.

Total Revenues and Operating Expenses

(Dollars in millions)	Three Months Ended August 31,			2010
	2011	Actual	Constant	
Total Revenues by Geography:				
Americas	\$ 4,226	8%	7%	\$ 3,904
EMEA ⁽¹⁾	2,704	14%	2%	2,381
Asia Pacific ⁽²⁾	1,444	19%	7%	1,217
Total revenues	8,374	12%	5%	7,502
Total Operating Expenses	5,691	2%	-2%	5,585
Total Operating Margin	\$ 2,683	40%	26%	\$ 1,917
Total Operating Margin %	32%			26%
% Revenues by Geography:				
Americas	51%			52%
EMEA	32%			32%
Asia Pacific	17%			16%
Total Revenues by Business:				
Software	\$ 5,520	17%	11%	\$ 4,736
Hardware Systems	1,674	-1%	-8%	1,698
Services	1,180	10%	5%	1,068
Total revenues	\$ 8,374	12%	5%	\$ 7,502
% Revenues by Business:				
Software	66%			63%
Hardware Systems	20%			23%
Services	14%			14%

(1) Comprised of Europe, the Middle East and Africa

(2) Asia Pacific includes Japan

Excluding the effect of favorable foreign currency rate fluctuations of 7 percentage points, total revenues increased in the first quarter of fiscal 2012 due to an increase in our software business revenues resulting from growth in our new software license revenues and software license updates and product support revenues and due to an increase in our services business revenues. Excluding the effect of currency rate fluctuations, the Americas contributed 64%, EMEA contributed 14% and Asia Pacific contributed 22% to our total revenues growth.

Excluding the effect of unfavorable foreign currency rate fluctuations of 4 percentage points, the decrease in total operating expenses in the first quarter of fiscal 2012 was primarily due to a reduction of hardware systems products costs primarily associated with the related decrease in revenues, a decrease in research and development expenses and a decrease in acquisition related and other expenses. These constant currency operating expense decreases were partially offset by an increase in sales and marketing expenses.

On a constant currency basis, our operating margin and our operating margin as a percentage of revenues increased during the first quarter of fiscal 2012 primarily due to the growth in our software business operating margin and certain reductions in our operating expenses.

Table of Contents**Supplemental Disclosure Related to Certain Charges**

To supplement our consolidated financial information, we believe the following information is helpful to an overall understanding of our past financial performance and prospects for the future. You should review the introduction under **Impact of Acquisitions** (above) for a discussion of the inherent limitations in comparing pre- and post-acquisition information.

Our operating results include the following business combination accounting adjustments and expenses related to acquisitions, as well as certain other significant expense items:

(in millions)	Three Months Ended August 31,	
	2011	2010
Software license updates and product support deferred revenues ⁽¹⁾	\$ 13	\$ 25
Hardware systems support deferred revenues ⁽¹⁾	11	61
Amortization of intangible assets ⁽²⁾	592	603
Acquisition related and other ⁽³⁾⁽⁵⁾	19	83
Restructuring ⁽⁴⁾	101	129
Stock-based compensation ⁽⁵⁾	147	129
Income tax effects ⁽⁶⁾	(258)	(253)
	\$ 625	\$ 777

(1) In connection with our acquisitions, we have estimated the fair values of the software support and hardware systems support obligations assumed. Due to our application of business combination accounting rules, we did not recognize software license updates and product support revenues related to support contracts that would have otherwise been recorded by the acquired businesses as independent entities, in the amounts of \$13 million and \$25 million for the three months ended August 31, 2011 and 2010, respectively. In addition, we did not recognize hardware systems support revenues related to hardware systems support contracts that would have otherwise been recorded by the acquired businesses as independent entities in the amount of \$11 million and \$61 million for the three months ended August 31, 2011 and 2010, respectively.

Approximately \$19 million, \$9 million and \$2 million of estimated software license updates and product support revenues related to support contracts assumed will not be recognized during the remainder of fiscal 2012, fiscal 2013 and fiscal 2014, respectively, that would have otherwise been recognized by the acquired businesses as independent entities due to the application of these business combination accounting rules. In addition, approximately \$19 million and \$11 million of estimated hardware systems support revenues related to hardware systems support contracts assumed will not be recognized during the remainder of fiscal 2012 and fiscal 2013, respectively, that would have otherwise been recognized by the acquired businesses as independent entities. To the extent customers renew these support contracts, we expect to recognize revenues for the full contract value over the support renewal period.

(2) Represents the amortization of intangible assets substantially all of which were acquired in connection with our acquisitions. As of August 31, 2011, estimated future amortization expenses related to intangible assets were as follows (in millions):

Remainder of Fiscal 2012	\$ 1,737
Fiscal 2013	1,967
Fiscal 2014	1,619
Fiscal 2015	1,220
Fiscal 2016	717
Fiscal 2017	176
Thereafter	176
Total intangible assets subject to amortization	7,612
In-process research and development	50
Total intangible assets, net	\$ 7,662

Edgar Filing: ORACLE CORP - Form 10-Q

- (3) Acquisition related and other expenses primarily consist of personnel related costs for transitional and certain other employees, stock-based compensation expenses, integration related professional services, certain business combination adjustments including adjustments after the measurement period has ended and changes in fair value of contingent consideration payable (See Note 2 of Notes to Condensed Consolidated Financial Statements included elsewhere in this Quarterly Report), and certain other operating expenses, net.

- (4) The significant majority of restructuring expenses during the first quarter of fiscal 2012 relate to employee severance, facility exit costs and contract termination costs in connection with our Sun Restructuring Plan. Additional information regarding certain of our restructuring plans is provided in Note 7 of Notes to Condensed Consolidated Financial Statements included elsewhere in this Quarterly Report.

Table of Contents

(5) Stock-based compensation is included in the following operating expense line items of our condensed consolidated statements of operations (in millions):

	Three Months Ended August 31,	
	2011	2010
Sales and marketing	\$ 26	\$ 23
Software license updates and product support	4	5
Hardware systems products	1	1
Hardware systems support	1	1
Services	4	4
Research and development	71	59
General and administrative	40	36
Subtotal	147	129
Acquisition related and other	1	1
Total stock-based compensation	\$ 148	\$ 130

Stock-based compensation included in acquisition related and other expenses resulted from unvested stock options and restricted stock-based awards assumed from acquisitions whose vesting was accelerated upon termination of the employees pursuant to the terms of those stock options and restricted stock-based awards.

(6) The income tax effects presented were calculated as if the above described charges were not included in our results of operations for each of the respective periods presented. Income tax effects were calculated based on the applicable jurisdictional tax rates applied to the items within the table above and resulted in an effective tax rate of 26.5% for the first quarter of fiscal 2012 instead of 25.6%, which represented our effective tax rate as derived per our condensed consolidated statement of operations, primarily due to income tax effects related to our acquired tax exposures and the differences in jurisdictional tax rates and the related tax benefits attributable to our restructuring expenses. The income tax effects presented for the first quarter of fiscal 2011 were calculated based upon a tax rate of 24.7%, which was consistent with our effective tax rate as derived per our condensed consolidated statement of operations.

Software Business

Our software business consists of our new software licenses segment and software license updates and product support segment.

Table of Contents

New Software Licenses: New software license revenues represent fees earned from granting customers licenses to use our database and middleware as well as our application software products. We continue to place significant emphasis, both domestically and internationally, on direct sales through our own sales force. We also continue to market our products through indirect channels. Sales and marketing expenses are largely personnel related and include commissions earned by our sales force for the sale of our software products, and also include marketing program costs and amortization of intangible assets.

(Dollars in millions)	Three Months Ended August 31,			
	2011	Percent Change		2010
		Actual	Constant	
New Software License Revenues:				
Americas	\$ 727	10%	9%	\$ 658

Asia Pacific	22%			22%
Revenues by Product:				
Database and middleware	\$ 1,070	14%	8%	\$ 937
Applications	428	23%	19%	349
Total new software license revenues	\$ 1,498	17%	11%	\$ 1,286
% Revenues by Product:				
Database and middleware	71%			73%
Applications	29%			27%

⁽¹⁾ Excluding stock-based compensation

⁽²⁾ Included as a component of Amortization of Intangible Assets in our condensed consolidated statements of operations. Excluding the effect of favorable currency rate fluctuations of 6 percentage points, total new software license revenues increased by 11% in the first quarter of fiscal 2012 due to growth across all major regions and product types and incremental revenues from our acquisitions. On a constant currency basis, the Americas contributed 43%, EMEA contributed 38% and Asia Pacific contributed 19% to our new software license revenues growth during the first quarter of fiscal 2012.

In constant currency, database and middleware revenues and applications revenues increased by 8% and 19%, respectively, in the first quarter of fiscal 2012, and 15% and 21%, respectively, over the trailing 4-quarters, primarily due to improved customer demand for our products, our sales force's execution and incremental revenues from our acquisitions. In reported currency, our recent acquisitions contributed \$55 million to the growth in our applications revenues during the first quarter of fiscal 2012.

Table of Contents

Effective with this Quarterly Report and in our subsequent filings, we have elected to disclose the impacts of transactions of \$3 million or greater to our new software license revenues, rather than our historical threshold of \$0.5 million or greater, in order to provide what we believe is more meaningful information regarding our results of operations. In reported currency, new software license revenues earned from transactions of \$3 million or greater increased by 45% in the first quarter of fiscal 2012 and represented 21% of our new software license revenues in the first quarter of fiscal 2012 in comparison to 17% in the first quarter of fiscal 2011. As a transitional disclosure to be provided only as a part of this Quarterly Report, our new software license revenues earned from transactions of \$0.5 million or greater increased by 44% in the first quarter of fiscal 2012 and represented 49% of our new software license revenues in the first quarter of fiscal 2012 in comparison to 40% in our first quarter of fiscal 2011.

Excluding the effect of unfavorable currency rate fluctuations of 5 percentage points, total new software license expenses increased in the first quarter of fiscal 2012 primarily due to higher employee related expenses from increased headcount and an increase in certain legal costs.

Excluding the effect of currency rate fluctuations, total new software license margin and margin as a percentage of revenues decreased during the first quarter of fiscal 2012 primarily due to the aforementioned increase in our expenses.

Software License Updates and Product Support: Software license updates grant customers rights to unspecified software product upgrades and maintenance releases issued during the support period. Product support includes internet access to technical content as well as internet and telephone access to technical support personnel in our global support centers. Expenses associated with our software license updates and product support line of business include the cost of providing the support services, largely personnel related expenses, and the amortization of our intangible assets associated with software support contracts and customer relationships obtained from acquisitions.

(Dollars in millions)	Three Months Ended August 31,			
	2011	Percent Change		2010
		Actual	Constant	
Software License Updates and Product Support Revenues:				
Americas	\$ 2,124	13%	11%	\$ 1,884
EMEA	1,320	19%	8%	1,105
Asia Pacific	578	25%	13%	461

EMEA	33%			32%
Asia Pacific	14%			13%

(1) Excluding stock-based compensation

(2) Included as a component of Amortization of Intangible Assets in our condensed consolidated statements of operations

Table of Contents

Excluding the effect of favorable currency rate fluctuations of 7 percentage points, software license updates and product support revenues increased in the first quarter of fiscal 2012 as a result of new software licenses sold (with substantially all customers electing to purchase support contracts) during the trailing 4-quarter period, the renewal of substantially all of the customer base eligible for renewal in the current fiscal quarter and incremental revenues from recent acquisitions. Excluding the effect of currency rate fluctuations, the Americas contributed 58%, EMEA contributed 25% and Asia Pacific contributed 17% to the increase in software license updates and product support revenues.

In reported currency, software license updates and product support revenues in the first quarter of fiscal 2012 included incremental revenues of \$28 million from our recently acquired companies. As a result of our acquisitions, we recorded adjustments to reduce assumed support obligations to their estimated fair values at the acquisition dates. Due to our application of business combination accounting rules, software license updates and product support revenues related to support contracts in the amounts of \$13 million and \$25 million that would have been otherwise recorded by our acquired businesses as independent entities were not recognized in the first quarter of fiscal 2012 and fiscal 2011, respectively. Historically, substantially all of our customers, including customers from acquired companies, renew their software support contracts when such contracts are eligible for renewal. To the extent these underlying support contracts are renewed, we will recognize the revenues for the full value of these contracts over the support periods, the substantial majority of which are one year in duration.

Excluding the effect of unfavorable foreign currency rate fluctuations of 2 percentage points, total software license updates and product support expenses decreased primarily as a result of a reduction in bad debt expenses.

Excluding the effect of currency rate fluctuations, total software license updates and product support margin and margin as a percentage of revenues increased as our revenues increased while our expenses decreased.

Hardware Systems Business

Our hardware systems business consists of our hardware systems products segment and hardware systems support segment.

Table of Contents

Hardware Systems Products: Hardware systems products revenues are primarily generated from the sales of our computer server and storage products. We market and sell our hardware systems products through our direct sales force and indirect channels such as independent distributors and value added resellers. Operating expenses associated with our hardware systems products include the cost of hardware systems products, which consist of expenses for materials and labor used to produce these products by our internal manufacturing operations or by third party manufacturers, warranty expenses and the impact of periodic changes in inventory valuation, including the impact of inventory determined to be excess and obsolete. Operating expenses associated with our hardware systems products also include sales and marketing expenses, which are largely personnel related and include variable compensation earned by our sales force for the sales of our hardware products, and amortization of intangible assets.

(Dollars in millions)	Three Months Ended August 31,			
	2011	Actual	Constant	2010
Hardware Systems Products Revenues:				
Americas	\$ 475	-12%	-13%	\$ 543
EMEA	344	2%	-11%	338
Asia Pacific	210	6%	-5%	198
Total revenues	1,029	-5%	-11%	1,079
Expenses:				
Hardware systems products ⁽¹⁾	471	-15%	-19%	556
Sales and marketing ⁽¹⁾	278	14%	7%	245
Stock-based compensation	1	-59%	-59%	2
Amortization of intangible assets ⁽²⁾	105	3%	3%	101
Total expenses	855	-5%	-9%	904
Total Margin	\$ 174	0%	-18%	\$ 175
Total Margin %	17%			16%
% Revenues by Geography:				
Americas	46%			51%
EMEA	33%			31%
Asia Pacific	21%			18%

⁽¹⁾ Excluding stock-based compensation

⁽²⁾ Included as a component of Amortization of Intangible Assets in our condensed consolidated statements of operations. Excluding the effect of favorable currency rate fluctuations of 6 percentage points, hardware systems products revenues decreased in the first quarter of fiscal 2012 primarily due to a reduction in the volume of lower margin transactions. This decrease was partially offset by an increase in hardware revenues attributable to our engineered systems.

Excluding the effect of unfavorable currency rate fluctuations of 4 percentage points, total hardware systems products operating expenses declined due to a reduction in hardware systems products costs associated with lower margin transactions, partially offset by an increase in employee related expenses due to increased headcount.

Excluding the effect of currency rate fluctuations, total hardware systems products margin decreased slightly, while margin as a percentage of revenues increased primarily due to a decrease in hardware systems products costs.

Table of Contents

Hardware Systems Support: Our hardware systems support offerings provide customers with software updates for the software components that are essential to the functionality of our hardware systems and can include product repairs, maintenance services, and technical support services. Expenses associated with our hardware systems support operating segment include the cost of materials used to repair customer products, the cost of providing support services, largely personnel related expenses, and the amortization of our intangible assets associated with hardware systems support contracts and customer relationships obtained from our acquisitions.

(Dollars in millions)	Three Months Ended August 31,			2010
	2011	Actual	Constant	
Hardware Systems Support Revenues:				
Americas	\$ 298	18%	16%	\$ 252

% Revenues by Geography:				
Americas	46%			41%
EMEA	37%			42%
Asia Pacific	17%			17%

⁽¹⁾ Excluding stock-based compensation

⁽²⁾ Included as a component of Amortization of Intangible Assets in our condensed consolidated statements of operations. Excluding the impact of favorable currency rate fluctuations of 7 percentage points, hardware systems support revenues decreased modestly in the first quarter of fiscal 2012 primarily due to a decrease in EMEA revenues.

As a result of our acquisitions, we recorded adjustments to reduce assumed support obligations to their estimated fair values at the acquisition dates. Due to our application of business combination accounting rules, hardware systems support revenues related to hardware systems support contracts in the amount of \$11 million and \$61 million that would have been otherwise reported by our acquired businesses as independent entities were not recognized in the first quarter of fiscal 2012 and fiscal 2011, respectively. To the extent these underlying support contracts are renewed, we will recognize the revenues for the full value of these contracts over the future support periods.

Excluding the effect of unfavorable currency rate fluctuations of 5 percentage points, total hardware systems support expenses decreased due to the reduction of service delivery costs resulting from our integration initiatives associated with our acquisition of Sun Microsystems, Inc. (Sun), and were partially offset by increased employee related expenses due to increased headcount. Excluding the effect of currency rate fluctuations, total hardware systems support margin and margin as a percentage of total revenues increased primarily as a result of our expense reductions.

Table of Contents**Services**

Our services business consists of consulting, certain of our Oracle Cloud Services offerings, Advanced Customer Services and education services. Consulting revenues are earned by providing services to customers in the design, implementation, deployment and upgrade of our database and middleware software products as well as applications software products. Oracle Cloud Services managed services are designed to provide comprehensive software and hardware management and maintenance services for customers hosted at our Oracle data center facilities, select partner data centers or physically on-site at customer facilities. Advanced Customer Services provide support services, both on-site and remote, to customers to enable increased performance and higher availability of their products and services. Education revenues are earned by providing instructor-led, media-based and internet-based training in the use of our software and hardware products. The cost of providing our services is primarily personnel related expenses, technology infrastructure expenditures, facilities expenses and external contractor expenses.

(Dollars in millions)	Three Months Ended August 31,			
	2011	Actual	Constant	2010
Services Revenues:				
Americas	\$ 602	6%	5%	\$ 568

Total Margin	\$ 231	49%	41%	\$ 154
Total Margin %	20%			14%
% Revenues by Geography:				
Americas	51%			53%
EMEA	31%			31%
Asia Pacific	18%			16%

⁽¹⁾ Excluding stock-based compensation

⁽²⁾ Included as a component of Amortization of Intangible Assets in our condensed consolidated statements of operations. Excluding the effect of favorable currency rate fluctuations of 5 percentage points, the increase in our services revenues during the first quarter of fiscal 2012 was primarily due to increased consulting revenues and Oracle Cloud Services revenues. On a constant currency basis, the Americas contributed 51%, EMEA contributed 6% and Asia Pacific contributed 43% to our services revenues growth during the first quarter of fiscal 2012.

Excluding the impact of unfavorable currency rate fluctuations of 6 percentage points, our services expenses decreased modestly due to lower third-party contractor expenses associated with our Advanced Customer Services offerings and certain other expense reductions. These decreases were partially offset by higher employee related expenses in our consulting segment.

On a constant currency basis, both services margin and margin as a percentage of revenues increased during the first quarter of fiscal 2012 as our total services revenues increased while our total services expenses decreased.

Table of Contents

Research and Development Expenses: Research and development expenses consist primarily of personnel related expenditures. We intend to continue to invest significantly in our research and development efforts because, in our judgment, they are essential to maintaining our competitive position.

(Dollars in millions)	Three Months Ended August 31,

% of Total Revenues	13%			15%

⁽¹⁾ Excluding stock-based compensation

On a constant currency basis, total research and development expenses decreased during the first quarter of fiscal 2012 primarily due to a reduction in legal costs that were partially offset by an increase in employee related expenses from increased headcount.

General and Administrative Expenses: General and administrative expenses primarily consist of personnel related expenditures for information technology, finance, legal and human resources support functions.

(Dollars in millions)	Three Months Ended August 31,			
	2011	Percent Change		2010
		Actual	Constant	
General and administrative ⁽¹⁾	\$ 271	15%	10%	\$ 236
Stock-based compensation	40	9%	9%	36
Total expenses	\$ 311	14%	10%	\$ 272
% of Total Revenues	4%			4%

⁽¹⁾ Excluding stock-based compensation

On a constant currency basis, total general and administrative expenses increased during the first quarter of fiscal 2012 primarily due to an increase in professional fees.

Amortization of Intangible Assets:

(Dollars in millions)	Three Months Ended August 31,			
	2011	Percent Change		2010
		Actual	Constant	
Software support agreements and related relationships	\$ 144	2%	2%	\$ 141
Hardware systems support agreements and related relationships	29	0%	0%	29
Developed technology	234	-3%	-3%	240
Core technology	80	3%	3%	78
Customer relationships	89	-9%	-9%	98
Trademarks	16	-5%	-5%	17

Edgar Filing: ORACLE CORP - Form 10-Q

Total amortization of intangible assets	\$ 592	-2%	-2%	\$ 603
---	--------	-----	-----	--------

Amortization of intangible assets decreased in the first quarter of fiscal 2012 due to a reduction in expense associated with certain of our intangible assets that became fully amortized during the trailing four quarter period. These decreases were partially offset by additional amortization from intangible assets that we acquired since the beginning of fiscal 2011 including those from our acquisitions of Phase Forward during the first quarter of fiscal 2011 and ATG during the third quarter of fiscal 2011. See Note 5 of Notes to Condensed Consolidated Financial Statements for additional information regarding our intangible assets (including weighted average useful lives) and related amortization.

Table of Contents

Acquisition Related and Other Expenses: Acquisition related and other expenses consist of personnel related costs for transitional and certain other employees, stock-based compensation expenses, integration related professional services, certain business combination adjustments including adjustments after the measurement period has ended and changes in fair value of contingent consideration payable (See Note 2 of Notes to Condensed Consolidated Financial Statements included elsewhere in this Quarterly Report), and certain other operating expenses, net. Stock-based compensation expenses included in acquisition related and other expenses resulted from unvested stock options and restricted stock-based awards assumed from acquisitions whereby vesting was accelerated upon termination of the employees pursuant to the original terms of those stock options and restricted stock-based awards.

(Dollars in millions)	Three Months Ended August 31, Percent Change			
	2011	Actual	Constant	2010
Transitional and other employee related costs	\$ 11	-78%	-78%	\$ 49
Stock-based compensation	1	-56%	-56%	1
Professional fees and other, net		-100%	-100%	31
Business combination adjustments, net	7	314%	287%	2
Total acquisition related and other expenses	\$ 19	-77%	-78%	\$ 83

On a constant currency basis, the decrease in our acquisition related and other expenses in the first quarter of fiscal 2012 was primarily due to a reduction in transitional and other employee related costs and professional services expenses in comparison to those that were incurred in the prior year period primarily related to our acquisition of Sun.

Restructuring expenses: Restructuring expenses consist of employee severance costs and may also include charges for duplicate facilities and other contract termination costs to improve our cost structure prospectively. For additional information regarding our restructuring plans, see Note 7 of Notes to Condensed Consolidated Financial Statements included elsewhere in this Quarterly Report.

(Dollars in millions)	Three Months Ended August 31, Percent Change			
	2011	Actual	Constant	2010
Restructuring expenses	\$ 101	-21%	-28%	\$ 129

Restructuring expenses in the first quarter of fiscal 2012 primarily related to our Sun Restructuring Plan, which our management approved, committed to and initiated in order to better align our cost structure as a result of our acquisition of Sun. Restructuring expenses incurred in the first quarter of fiscal 2011 related to both the Sun Restructuring Plan and the Oracle Fiscal 2009 Restructuring Plan. The total estimated remaining restructuring costs associated with the Sun Restructuring Plan are approximately \$170 million and will be recorded to the restructuring expense line item within our consolidated statements of operations as the costs are incurred. Our estimated costs may be subject to change in future periods.

Interest Expense:

(Dollars in millions)	Three Months Ended August 31, Percent Change			
	2011	Actual	Constant	2010
Interest expense	\$ 192	-2%	-2%	\$ 196

Interest expense decreased in the first quarter of fiscal 2012 due to lower average borrowings as compared to the first fiscal quarter of 2011 primarily due to the maturity and repayment of \$2.25 billion of senior notes in January 2011.

Table of Contents

Non-Operating Income (Expense), net: Non-operating income (expense), net consists primarily of interest income, net foreign currency exchange gains (losses), the noncontrolling interests in the net profits of our majority-owned subsidiaries (Oracle Financial Services Software Limited and Oracle Japan), and net other income (losses) including net realized gains and losses related to all of our investments and net unrealized gains and losses related to the small portion of our investment portfolio that we classify as trading.

(Dollars in millions)	Three Months Ended August 31,			2010
	2011	Percent Change		
		Actual	Constant	
Interest income	\$ 57	65%	57%	\$ 34
Foreign currency gains (losses), net	(29)	-160%	-159%	49
Noncontrolling interests in income	(28)	-9%	-8%	(26)
Other income (losses), net	(20)	-221%	-215%	17
Total non-operating income (expense), net	\$ (20)	-127%	-126%	\$ 74

We recorded non-operating expense, net during the first quarter of fiscal 2012 in comparison to non-operating income, net in the first quarter of fiscal 2011 primarily as a result of net foreign currency transaction losses of \$29 million in comparison to net foreign currency transaction gains of \$49 million in the corresponding prior year period. Non-operating expense, net in the first quarter of fiscal 2012 was partially offset by an increase in interest income resulting from larger average cash, cash equivalents and marketable securities balances.

Provision for Income Taxes: Our effective tax rate in all periods is the result of the mix of income earned in various tax jurisdictions that apply a broad range of income tax rates. The provision for income taxes differs from the tax computed at the U.S. federal statutory income tax rate due primarily to earnings considered as indefinitely reinvested in foreign operations, state taxes, the U.S. research and development tax credit, and the U.S. domestic production activity deduction. Future effective tax rates could be adversely affected if earnings are lower than anticipated in countries where we have lower statutory rates, by unfavorable changes in tax laws and regulations or by adverse rulings in tax related litigation.

(Dollars in millions)	Three Months Ended August 31,			2010
	2011	Percent Change		
		Actual	Constant	
Provision for income taxes	\$ 631	43%	27%	\$ 443

Effective tax rate 25.6% 24.7%

Provision for income taxes increased during the first quarter of fiscal 2012 substantially due to higher income before provision for income taxes.

Liquidity and Capital Resources

(Dollars in millions)	August 31,	Change	May 31,
	2011		2011
Working capital	\$ 26,150	5%	\$ 24,982
Cash, cash equivalents and marketable securities	\$ 31,660	10%	\$ 28,848

Working capital: The increase in working capital as of August 31, 2011 in comparison to May 31, 2011 was primarily due to the favorable impact to our net current assets resulting from our net income during the first quarter of fiscal 2012, partially offset by cash used for acquisitions, repurchases of our common stock, and cash used to pay dividends to our stockholders. Our working capital may be impacted by some of the aforementioned factors in future periods, certain amounts and timing of which are variable.

Cash, cash equivalents and marketable securities: Cash and cash equivalents primarily consist of deposits held at major banks, money market funds, Tier-1 commercial paper, U.S. Treasury obligations, U.S. government agency and government sponsored enterprise obligations, and other securities with original maturities of 90 days or less. Marketable securities primarily consist of time deposits held at major banks, Tier-1 commercial paper,

Table of Contents

corporate notes, U.S. Treasury obligations, U.S. government agency and government sponsored enterprise obligations and certain other securities. The increase in cash, cash equivalents and marketable securities at August 31, 2011 in comparison to May 31, 2011 was due to an increase in our operating cash flows resulting primarily from the collection of our trade receivables generated by our higher fiscal 2011 fourth quarter sales volumes, cash received for software license updates and product support agreements and an increase in net income in the first quarter of fiscal 2012. The increase in cash, cash equivalents and marketable securities balances during the first quarter of fiscal 2012 was partially offset by our repayment of \$1.15 billion of short-term borrowings pursuant to our revolving credit facilities in June 2011, cash used for acquisitions, the repurchases of our common stock and the payment of cash dividends to our stockholders. Cash, cash equivalents and marketable securities included \$23.2 billion held by our foreign subsidiaries as of August 31, 2011. The amount of cash, cash equivalents and marketable securities that we report in U.S. Dollars for a significant portion of the cash held by these subsidiaries is subject to translation adjustments caused by changes in foreign currency exchange rates as of the end of each respective reporting period (the offset to which is recorded to accumulated other comprehensive income in our consolidated balance sheet). As the U.S. Dollar generally weakened against certain major international currencies as of the end of the first quarter of fiscal 2012, the amount of cash, cash equivalents and marketable securities that we reported in U.S. Dollars for these subsidiaries increased as of August 31, 2011 relative to what we would have reported using a constant currency rate as of May 31, 2011.

Days sales outstanding, which is calculated by dividing period end accounts receivable by average daily sales for the quarter, was 45 days at August 31, 2011 compared with 55 days at May 31, 2011. The days sales outstanding calculation excludes the adjustments that reduce our acquired software license updates and product support obligations and hardware systems support obligations to fair value. Our decline in days sales outstanding is primarily due to the collection, in our first quarter of fiscal 2012, of large software license and software support balances outstanding as of May 31, 2011.

(Dollars in millions)	Three Months Ended August 31,		
	2011	Change	2010
Cash provided by operating activities	\$ 5,421	42%	\$ 3,817
Cash used for investing activities	\$ (6,323)	61%	\$ (3,916)
Cash (used for) provided by financing activities	\$ (2,211)	213%	\$ 1,960

Cash flows from operating activities: Our largest source of operating cash flows is cash collections from our customers following the purchase and renewal of their software license updates and product support agreements. Payments from customers for these support agreements are generally received near the beginning of the contracts terms, which are generally one year in length. We also generate significant cash from new software license sales, sales of hardware systems products and hardware systems support arrangements and, to a lesser extent, services. Our primary uses of cash from operating activities are for personnel related expenditures, material and manufacturing costs related to the production of our hardware systems products, taxes and leased facilities.

Net cash provided by operating activities increased in the first quarter of fiscal 2012 primarily due to increased net income and the collection of fourth quarter fiscal 2011 trade receivables associated with higher sales volumes, a decrease in cash used to pay income tax related liabilities and other cash favorable working capital movements, partially offset by an increase in cash used to pay higher accrued compensation liabilities such as commissions and bonuses, in each case compared to the first quarter of fiscal 2011.

Cash flows from investing activities: The changes in cash flows from investing activities primarily relate to acquisitions and the timing of purchases, maturities and sales of our investments in marketable debt securities. We also use cash to invest in capital and other assets to support our growth.

Net cash used for investing activities increased in the first quarter of fiscal 2012 due to an increase in cash used to purchase marketable securities (net of proceeds received from sales and maturities), partially offset by a decrease in cash used for acquisitions, net of cash acquired.

Cash flows from financing activities: The changes in cash flows from financing activities primarily relate to borrowings and payments under debt facilities as well as stock repurchases, dividend payments and proceeds from stock option exercises.

Table of Contents

Net cash used for financing activities in the first quarter of fiscal 2012 increased in comparison to cash provided by financing activities in the first quarter of fiscal 2011 primarily due to our issuance of \$3.25 billion of long-term senior notes in the first quarter of fiscal 2011 (none in the first quarter of fiscal 2012), an increase in repayments of borrowings in the first quarter of fiscal 2012 (\$1.15 billion of short-term borrowings pursuant to our revolving credit facilities were repaid) in comparison to the prior year period (\$885 million of commercial paper notes were repaid) and an increase in our common stock repurchases.

Free cash flow: To supplement our statements of cash flows presented on a GAAP basis, we use non-GAAP measures of cash flows on a trailing 4-quarter basis to analyze cash flows generated from our operations. We believe free cash flow is also useful as one of the bases for comparing our performance with our competitors. The presentation of non-GAAP free cash flow is not meant to be considered in isolation or as an alternative to net income as an indicator of our performance, or as an alternative to cash flows from operating activities as a measure of liquidity. We calculate free cash flows as follows:

(Dollars in millions)	Trailing 4-Quarters Ended August 31,		
	2011	Change	2010
Cash provided by operating activities	\$ 12,818	46%	\$ 8,760
Capital expenditures ⁽¹⁾	(492)	68%	(293)
Free cash flow	\$ 12,326	46%	\$ 8,467
Net income	\$ 9,035		\$ 6,363
Free cash flow as a percent of net income	136%		133%

⁽¹⁾ Represents capital expenditures as reported in cash flows from investing activities in our condensed consolidated statements of cash flows presented in accordance with U.S. generally accepted accounting principles.

Long-Term Customer Financing: We offer certain of our customers the option to acquire our software products, hardware systems products and services offerings through separate long-term payment contracts. We generally sell these contracts that we have financed on a non-recourse basis to financial institutions within 90 days of the contracts' dates of execution. We record the transfers of amounts due from customers to financial institutions as sales of financial assets because we are considered to have surrendered control of these financial assets. We financed \$123 million and \$97 million, respectively, or approximately 8% of our new software license revenues in each of the first quarter of fiscal 2012 and 2011, and \$28 million and \$47 million, or approximately 3% and 4% of our hardware systems products revenues in the first quarter of fiscal 2012 and 2011, respectively.

Recent Financing Activities: On June 30, 2011, our revolving credit agreements with BNP Paribas, as initial lender and administrative agent, and BNP Paribas Securities Corp., as sole lead arranger and sole bookrunner (the 2011 Credit Agreements), to borrow \$1.15 billion were repaid in full and the 2011 Credit Agreements expired pursuant to their terms.

Contractual Obligations: The contractual obligations presented in the table below represent our estimates of future payments under fixed contractual obligations and commitments. Changes in our business needs, cancellation provisions, changing interest rates and other factors may result in actual payments differing from these estimates. We cannot provide certainty regarding the timing and amounts of payments. We have presented below a summary of the most significant assumptions used in preparing this information within the context of our consolidated financial position, results of operations and cash flows. The following is a summary of our contractual obligations as of August 31, 2011:

(Dollars in millions)	Total	Year Ending May 31,						
		2012	2013	2014	2015	2016	2017	Thereafter
Principal payments on long-term borrowings ⁽¹⁾	\$ 14,750	\$	\$ 1,250	\$	\$ 1,500	\$ 2,000	\$	\$ 10,000
Interest payments on long-term borrowings ⁽¹⁾	10,575	513	738	676	665	655	550	6,778
Operating leases ⁽²⁾	1,642	358	373	253	183	139	112	224
Purchase obligations and other ⁽³⁾	577	543	18	10	3	3		
Total contractual obligations	\$ 27,544	\$ 1,414	\$ 2,379	\$ 939	\$ 2,351	\$ 2,797	\$ 662	\$ 17,002

Table of Contents

(1) Our total borrowings consist of the following as of August 31, 2011 (dollars in millions):

	Amount
4.95% senior notes due April 2013	\$ 1,250
3.75% senior notes due July 2014, including fair value adjustment of \$86	1,586
5.25% senior notes due January 2016, net of discount of \$5	1,995
5.75% senior notes due April 2018, net of discount of \$1	2,499
5.00% senior notes due July 2019, net of discount of \$5	1,745
3.875% senior notes due July 2020, net of discount of \$2	998
6.50% senior notes due April 2038, net of discount of \$2	1,248
6.125% senior notes due July 2039, net of discount of \$7	1,243
5.375% senior notes due July 2040, net of discount of \$25	2,225
Total borrowings	\$ 14,789

We have entered into certain interest rate swap agreements related to our July 2014 senior notes that have the economic effect of modifying the fixed interest obligations associated with these senior notes so that the interest obligations effectively became variable with reference to a LIBOR-based index. Interest payments on the July 2014 senior notes presented in the contractual obligations table above have been estimated using an interest rate of 1.35%, which represented our effective interest rate as of August 31, 2011, after consideration of these fixed to variable interest rate swap agreements, and are subject to change in future periods. The changes in fair value of our debt associated with the interest rate risk that we are hedging pursuant to these agreements are reflected in the carrying value of our July 2014 senior notes in notes payable and other non-current borrowings in our condensed consolidated balance sheet and have been included in the above table of total borrowings.

- (2) Primarily represents leases of facilities and includes future minimum rent payments for facilities that we have vacated pursuant to our restructuring and merger integration activities. We have approximately \$301 million in facility obligations, net of estimated sublease income, in accrued restructuring for these locations in our condensed consolidated balance sheet at August 31, 2011.
- (3) Primarily represents amounts associated with agreements that are enforceable, legally binding and specify terms, including: fixed or minimum quantities to be purchased; fixed, minimum or variable price provisions; and the approximate timing of the payment. We utilize several external manufacturers to manufacture sub-assemblies for our products and to perform final assembly and testing of finished products. We also obtain individual components for our products from a variety of individual suppliers based on projected demand information. Such purchase commitments are based on our forecasted component and manufacturing requirements and typically provide for fulfillment within agreed upon lead-times and/or commercially standard lead-times for the particular part or product and have been included in the amount presented in the above contractual obligations table. Routine arrangements for other materials and goods that are not related to our external manufacturers and certain other suppliers and that are entered into in the ordinary course of business are not included in this amount as they are generally entered into in order to secure pricing or other negotiated terms and are difficult to quantify in a meaningful way.

As of August 31, 2011, we had \$3.9 billion of gross unrecognized tax benefits, including related interest and penalties, recorded on our condensed consolidated balance sheet and all such obligations have been excluded from the table above due to the uncertainty as to when they might be settled. We have reached certain settlement agreements with relevant taxing authorities to pay approximately \$141 million of these liabilities. Although it remains unclear as to when payments pursuant to these agreements will be made, some or all may be made during the remainder of fiscal 2012. We cannot make a reasonably reliable estimate of the period in which the remainder of our unrecognized tax benefits will be settled or released with the relevant tax authorities, although we believe it is reasonably possible that certain of these liabilities could be settled or released during the remainder of fiscal 2012.

We have agreed to acquire certain companies for amounts that are not material to our business and expect to close such acquisitions within the next twelve months. Separately, as described in Note 2 of Notes to Condensed Consolidated Financial Statements included elsewhere in this Quarterly Report, we have contingent consideration payable as a result of our recent acquisition of Pillar Data Systems, Inc.

We believe that our current cash, cash equivalents and marketable securities and cash generated from operations will be sufficient to meet our working capital, capital expenditures and contractual obligation requirements. In addition, we believe we could fund any future acquisitions, dividend payments and repurchases of common stock or debt with our internally available cash, cash equivalents and marketable securities, cash generated from operations, additional borrowings or from the issuance of additional securities.

Edgar Filing: ORACLE CORP - Form 10-Q

Off-Balance Sheet Arrangements: We do not have any off-balance sheet arrangements that have or are reasonably likely to have a current or future effect on our financial condition, changes in financial condition, revenues or expenses, results of operations, liquidity, capital expenditures or capital resources that are material to investors.

Table of Contents**Stock Options and Restricted Stock-Based Awards**

Our stock-based compensation program is a key component of the compensation package we provide to attract and retain certain of our talented employees and align their interests with the interests of existing stockholders. We historically have granted only stock options to our employees. The restricted stock-based awards included in the table presented below were assumed as a result of our acquisitions.

We recognize that options and restricted stock-based awards dilute existing stockholders and have sought to control the number of options and restricted stock-based awards granted while providing competitive compensation packages. Consistent with these dual goals, our cumulative potential dilution since June 1, 2008 has been a weighted average annualized rate of 1.4% per year. The potential dilution percentage is calculated as the average annualized new options or restricted stock-based awards granted and assumed, net of options and restricted stock-based awards forfeited by employees leaving the company, divided by the weighted average outstanding shares during the calculation period. This maximum potential dilution will only result if all options are exercised and restricted stock-based awards vest. Some of the outstanding options, which generally have a 10-year exercise period, have exercise prices higher than the current market price of our common stock. At August 31, 2011, 26% of our outstanding stock options had exercise prices in excess of the current market price. In recent years, our stock repurchase program has more than offset the dilutive effect of our stock-based compensation program; however, we may reduce the level of our stock repurchases in the future as we may use our available cash for acquisitions, to pay dividends, to repay or repurchase indebtedness or for other purposes. At August 31, 2011, the maximum potential dilution from all outstanding and unexercised stock option and restricted stock-based awards, regardless of when granted and regardless of whether vested or unvested and including options where the strike price is higher than the current market price, was 8.8%.

The Compensation Committee of the Board of Directors reviews and approves the organization-wide stock option grants to selected employees, all stock option grants to executive officers and any individual stock option grants in excess of 100,000 shares. A separate Plan Committee, which is an executive officer committee, approves individual stock option grants of up to 100,000 shares to non-executive officers and employees. Stock option and restricted stock-based award activity from June 1, 2008 through August 31, 2011 is summarized as follows (shares in millions):

Options and restricted stock-based awards outstanding at May 31, 2008	379
Options granted	354
Options and restricted stock-based awards assumed	33
Options exercised and restricted stock-based awards vested	(231)
Forfeitures, cancellations and other, net	(89)
Options and restricted stock-based awards outstanding at August 31, 2011	446
Weighted average annualized options and restricted stock-based awards granted and assumed, net of forfeitures	68
Weighted average annualized stock repurchases	(97)
Shares outstanding at August 31, 2011	5,051
Basic weighted average shares outstanding from June 1, 2008 through August 31, 2011	5,045
Options and restricted stock-based awards outstanding as a percent of shares outstanding at August 31, 2011	8.8%
In the money options and total restricted stock-based awards outstanding (based on the closing price of our common stock on the last trading day of our fiscal period presented) as a percent of shares outstanding at August 31, 2011	6.6%
Weighted average annualized options and restricted stock-based awards granted and assumed, net of forfeitures and before stock repurchases, as a percent of weighted average shares outstanding from June 1, 2008 through August 31, 2011	1.4%
Weighted average annualized options and restricted stock-based awards granted and assumed, net of forfeitures and after stock repurchases, as a percent of weighted average shares outstanding from June 1, 2008 through August 31, 2011	-0.6%

Table of Contents

Our Compensation Committee approves the annual organization-wide option grants to employees. These annual option grants are made during the ten business day period following the second trading day after the announcement of our fiscal fourth quarter earnings report. During the first quarter of fiscal 2012, we made our annual grant of stock options and certain other stock option grants and we assumed certain stock options totaling 103 million shares, which were partially offset by forfeitures of 2 million shares.

Recent Accounting Pronouncements

For information with respect to recent accounting pronouncements and the impact of these pronouncements on our consolidated financial statements, see Note 1 of Notes to Condensed Consolidated Financial Statements included elsewhere in this Quarterly Report.

Item 3. Quantitative and Qualitative Disclosures About Market Risk

During the first quarter of fiscal 2012, there were no significant changes to our quantitative and qualitative disclosures about market risk. Please refer to Part II, Item 7A. Quantitative and Qualitative Disclosures about Market Risk included in our Annual Report on Form 10-K for our fiscal year ended May 31, 2011 for a more complete discussion of the market risks we encounter.

Item 4. Controls and Procedures

Evaluation of Disclosure Controls and Procedures: Based on our management's evaluation (with the participation of our Chief Executive Officer and our Chief Financial Officer), as of the end of the period covered by this Quarterly Report, our Chief Executive Officer and our Chief Financial Officer have concluded that our disclosure controls and procedures (as defined in Rules 13a-15(e) and 15d-15(e) under the Securities Exchange Act of 1934, as amended (the Exchange Act)) were effective to provide reasonable assurance that the information required to be disclosed by us in our reports filed or submitted under the Exchange Act is recorded, processed, summarized and reported within the time periods specified in the SEC's rules and forms and is accumulated and communicated to our management (including our Chief Executive Officer and our Chief Financial Officer) as appropriate to allow timely decisions regarding required disclosure.

Changes in Internal Control over Financial Reporting: There were no changes in our internal control over financial reporting that occurred during our last fiscal quarter that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

Inherent Limitations on Effectiveness of Controls: Our management, including our Chief Executive Officer and Chief Financial Officer, believes that our disclosure controls and procedures and internal control over financial reporting are designed to provide reasonable assurance of achieving their objectives and are effective at the reasonable assurance level. However, our management does not expect that our disclosure controls and procedures or our internal control over financial reporting will prevent all errors and all fraud. A control system, no matter how well conceived and operated, can provide only reasonable, not absolute, assurance that the objectives of the control system are met. Further, the design of a control system must reflect the fact that there are resource constraints, and the benefits of controls must be considered relative to their costs. Because of the inherent limitations in all control systems, no evaluation of controls can provide absolute assurance that all control issues and instances of fraud, if any, have been detected. These inherent limitations include the realities that judgments in decision making can be faulty, and that breakdowns can occur because of a simple error or mistake. Additionally, controls can be circumvented by the individual acts of some persons, by collusion of two or more people or by management override of the controls. The design of any system of controls also is based in part upon certain assumptions about the likelihood of future events, and there can be no assurance that any design will succeed in achieving its stated goals under all potential future conditions; over time, controls may become inadequate because of changes in conditions, or the degree of compliance with policies or procedures may deteriorate. Because of the inherent limitations in a cost effective control system, misstatements due to error or fraud may occur and not be detected.

Table of Contents**PART II. OTHER INFORMATION****Item 1. Legal Proceedings**

The material set forth in Note 14 of Notes to Condensed Consolidated Financial Statements in Part I, Item 1 of this Quarterly Report on Form 10-Q is incorporated herein by reference.

Item 1A. Risk Factors

In addition to the other information set forth in this Quarterly Report, you should carefully consider the factors discussed in Part I, Item 1A. Risk Factors in our Annual Report on Form 10-K for our fiscal year ended May 31, 2011. The risks discussed in our Annual Report on Form 10-K could materially affect our business, financial condition and future results. The risks described in our Annual Report on Form 10-K are not the only risks facing us. Additional risks and uncertainties not currently known to us or that we currently deem to be insignificant also may materially and adversely affect our business, financial condition or operating results in the future.

Item 2. Unregistered Sales of Equity Securities and Use of Proceeds

Our Board of Directors has approved a program for us to repurchase shares of our common stock. On October 20, 2008, we announced that our Board of Directors had approved the expansion of our repurchase program by \$8.0 billion and as of August 31, 2011, approximately \$3.3 billion was available for share repurchases pursuant to our stock repurchase program.

Our stock repurchase authorization does not have an expiration date and the pace of our repurchase activity will depend on factors such as our working capital needs, our cash requirements for acquisitions and dividend payments, our debt repayment obligations or repurchases of our debt, our stock price, and economic and market conditions. Our stock repurchases may be effected from time to time through open market purchases or pursuant to a Rule 10b5-1 plan. Our stock repurchase program may be accelerated, suspended, delayed or discontinued at any time.

The following table summarizes the stock repurchase activity for the three months ended August 31, 2011 and the approximate dollar value of shares that may yet be purchased pursuant to our stock repurchase program:
