Table of Contents

Securities registered or to be registered pursuant to Section 12(b) of the Act:

Title of Each Class	Name of Exchange on Which Registered
American depositary shares, each representing 25 ordinary shares* Ordinary shares, par value US\$0.0001 per share**	New York Stock Exchange

* Effective December 21, 2012, the ratio of ADSs to our ordinary shares was changed from one ADS representing five ordinary shares to one ADS representing 25 ordinary shares.

** Not for trading, but only in connection with the listing on New York Stock Exchange of the American depositary shares.

Securities registered or to be registered pursuant to Section 12(g) of the Act:

None

(Title of Class)

Securities for which there is a reporting obligation pursuant to Section 15(d) of the Act:

None

(Title of Class)

Indicate the number of outstanding shares of each of the issuer's classes of capital or common stock as of the close of the period covered by the annual report. 172,877,433 ordinary shares, par value US\$0.0001 per share, as of December 31, 2012.

Indicate by check mark if the registrant is a well-known seasoned issuer, as defined in Rule 405 of the Securities Act. Yes No

If this report is an annual or transition report, indicate by check mark if the registrant is not required to file reports pursuant to Section 13 or 15 (d) of the Securities Exchange Act of 1934. Yes No

Indicate by check mark whether the registrant: (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes No

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T (§232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files). Yes No

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, or a non-accelerated filer. See definition of accelerated filer and large accelerated filer in Rule 12b-2 of the Exchange Act. (Check one):

Edgar Filing: DAQO NEW ENERGY CORP. - Form 20-F

Large accelerated filer Accelerated filer Non-accelerated filer
Indicate by check mark which basis of accounting the registrant has used to prepare the financial statements included in this filing:

U.S. GAAP

International Financial Reporting
Standards as issued by the International
Accounting Standards Board

Other

If Other has been checked in response to the previous question, indicate by check mark which financial statement item the registrant has elected to follow. Item 17 Item 18

If this is an annual report, indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act). Yes No

(APPLICABLE ONLY TO ISSUERS INVOLVED IN BANKRUPTCY PROCEEDINGS DURING THE PAST FIVE YEARS)

Indicate by check mark whether the registrant has filed all documents and reports required to be filed by Sections 12, 13 or 15(d) of the Securities Exchange Act of 1934 subsequent to the distribution of securities under a plan confirmed by a court. Yes No

INTRODUCTION

Except where the context otherwise requires:

we, us, our company, our and Daqo Cayman refer to Daqo New Energy Corp., its subsidiaries and its consolidated variable interest entity,

ADSs refers to our American depositary shares, each of which represents 25 ordinary shares. On December 21, 2012, we effected a change of the ADS to ordinary share ratio from one ADS representing five ordinary shares to one ADS representing 25 ordinary shares. The ratio change has the same effect as a 1-for-5 reverse ADS split,

China or PRC refers to the People's Republic of China, excluding, for the purpose of this annual report only, Taiwan, Hong Kong and Macau,

shares or ordinary shares refers to our ordinary shares, par value \$0.0001 per share,

RMB or Renminbi refers to the legal currency of China; \$, dollars or U.S. dollars refers to the legal currency of the United States and Euro refers to the legal currency of the European Union.

Our financial statements are expressed in U.S. dollar, which is our reporting currency. Certain of our financial data in this annual report on Form 20-F are translated into U.S. dollars solely for the reader's convenience. Unless otherwise noted, all convenient translations from Renminbi to U.S. dollars in this annual report on Form 20-F were made at a rate of RMB6.2301 to US\$1.00, the exchange rate set forth in the H.10 statistical release of the Federal Reserve Board on December 31, 2012. We make no representation that any Renminbi or U.S. dollar amounts could have been, or could be, converted into U.S. dollars or Renminbi, as the case may be, at any particular rate, at the rate stated above, or at all.

FORWARD-LOOKING STATEMENTS

This annual report on Form 20-F contains forward-looking statements that reflect our current expectations and views of future events. These forward looking statements are made under the safe-harbor provisions of the U.S. Private Securities Litigation Reform Act of 1995. Known and unknown risks, uncertainties and other factors may cause our actual results, performance or achievements to be materially different from those expressed or implied by the forward-looking statements.

You can identify some of these forward-looking statements by words or phrases such as may, will, expect, anticipate, aim, estimate, intend, believe, is/are likely to or other similar expressions. We have based these forward-looking statements largely on our current expectations and projections about future events and financial trends that we believe may affect our financial condition, results of operations, business strategy and financial needs. These forward-looking statements include statements relating to:

our business and operating strategies;

our expansion and capital expenditure plans;

our operations and business prospects;

our financial condition and results of operations;

the industry regulatory environment as well as the industry outlook generally;

future developments in the polysilicon manufacturing and photovoltaic and semiconductor industries; and

government subsidies and economic incentives for solar energy application.

This annual report on Form 20-F also contains estimates, projections and statistical data related to the polysilicon markets and photovoltaic industry in several countries, including China. This market data speaks as of the date it was published and includes projections that are based on a number of assumptions and are not representations of fact. If any one or more of the assumptions underlying the market data proves to be incorrect, actual results may differ from the projections based on these assumptions. You should not place undue reliance on these forward-looking statements.

The forward-looking statements made in this annual report relate only to events or information as of the date on which the statements are made in this annual report. Except as required by U.S. federal securities law, we undertake no obligation to update or revise publicly any forward-looking statements, whether as a result of new information, future events or otherwise, after the date on which the statements are made or to reflect the occurrence of unanticipated events. You should read this annual report and the documents that we reference in this annual report and have filed as exhibits to this annual report, completely and with the understanding that our actual future results may be materially different from what we expect. Other sections of this annual report include additional factors which could adversely impact our business and financial performance. Moreover, we operate in an evolving environment. New risk factors emerge from time to time and it is not possible for our management to predict all risk factors, nor can we assess the impact of all factors on our business or the extent to which any factor, or combination of factors, may cause actual results to differ materially from those contained in any forward-looking statements. We qualify all of our forward-looking statements by these cautionary statements.

Table of Contents**ITEM 3. KEY INFORMATION****A. Selected Financial Data**

The following selected data from the consolidated statement of operations for our company for the three years ended December 31, 2010, 2011 and 2012 and the balance sheet data as of December 31, 2011 and 2012 have been derived from our audited consolidated financial statements included elsewhere in this annual report. Our selected data from the consolidated statement of operations for the two years ended December 31, 2008 and 2009 and our consolidated balance sheet data as of December 31, 2008, 2009 and 2010 have been derived from our audited consolidated financial statements, which are not included in this annual report. We have consolidated financial statements of Daqo New Material Co., Ltd., or Daqo New Material, since July 1, 2008, because under Financial Accounting Standards Board Accounting Standards Codification 810-10-15, Variable Interest Entities, we are deemed to be Daqo New Material's primary beneficiary for accounting purposes and Daqo New Material is considered a variable interest entity starting from July 1, 2008.

The selected consolidated financial data should be read in conjunction with, and are qualified in their entirety by reference to, our consolidated financial statements and related notes, and Item 5. Operating and Financial Review and Prospects included elsewhere in this annual report. Our consolidated financial statements are prepared and presented in accordance with U.S. GAAP. Our historical results are not necessarily indicative of results to be expected in any future period.

The following table also presents the selected data from the consolidated statements of operations for Daqo New Material (our predecessor business) for the period from January 1, 2008 to June 30, 2008 derived from Daqo New Material's audited financial statements, which are not included in this annual report. Our predecessor business's financial statements are prepared and presented in accordance with U.S. GAAP.

	Predecessor Business		Daqo Cayman

D. Risk Factors

Risks Relating to Our Business

Our ability to return to growth and profitability depend on the demand for photovoltaic products and the development of photovoltaic technologies, among other things.

The solar industry is at a relatively early stage of development, and the extent of acceptance of photovoltaic products is uncertain. The photovoltaic industry does not have data as far back as the semiconductor industry or other more established industries, for which trends can be assessed more reliably from data gathered over a longer period of time. Demand for photovoltaic products may not develop or may develop to a lesser extent than we anticipate. Many factors may affect the viability of widespread adoption of photovoltaic technology and demand for photovoltaic products, including:

decreases in government subsidies and incentives to support the development of the photovoltaic industry;

the international trade conflicts and the consequential imposed tariffs for solar photovoltaic products;

relative cost-effectiveness, performance and reliability of photovoltaic products compared to conventional and other renewable energy sources and products;

success of other alternative energy sources, such as wind power, hydroelectric power and biofuel;

fluctuations in economic and market conditions that affect the viability of conventional and other renewable energy sources, such as increases or decreases in the prices of oil and other fossil fuels;

the ability of photovoltaic product manufacturers to finance their business operations, expansions and other capital expenditures;

capital expenditures by end users of photovoltaic products, which tend to decrease when the economy slows down; and

deregulation or other regulatory actions affecting the electric power industry and the broader energy industry.

In the event that demand for solar products does not expand as we expect or photovoltaic technologies do not develop in a manner that increases the demand for polysilicon, ASPs may continue to fall and our future growth and profitability will be materially and adversely affected.

Global supply for polysilicon has exceeded and may continue to exceed demand, which could cause polysilicon prices to continue to decline and materially and adversely affect our profitability.

Our polysilicon sales prices are affected by a variety of factors, including global supply and demand conditions. Over the years, many polysilicon manufacturers have significantly increased their capacity to meet customer demand and continue to expand capacities in order to achieve economies of scale. However, the slow and uneven economic recovery from the global financial crisis as well as the significant decrease in global petroleum prices since their peak in mid-2008 have reduced or delayed the general demand for photovoltaic products. If the demand continues to decline or if our customers delay their orders, we may not be able to sell our polysilicon at desirable prices, or at all. In late 2008 and 2009, newly available polysilicon supply and slowed global photovoltaic market growth resulted in an excess supply of polysilicon, which led to a significant decline in polysilicon prices. The global photovoltaic demand recovered substantially from the second half of 2010 through the first half of 2011. Nevertheless, market price for polysilicon experienced another significant decline since the second half of 2011 due to excess supply and decreasing demand. In 2012, the market price for polysilicon continued to decline. As a result of the polysilicon supply and demand fluctuation, we reduced the selling price of our polysilicon and thus experienced continued decrease in revenues derived from

polysilicon in 2012. If we experience further decline in demand in the future or we are unable to lower our costs in line with the average selling price decline, our operating margins will continue to be reduced and our financial condition and results of operations may be further materially and adversely affected.

Table of Contents

The reduction in or elimination of government subsidies and economic incentives for solar energy applications could cause demand for our products and our revenues to decline.

When upfront system costs are factored into cost per kilowatt hour, the current cost of solar power substantially exceeds the cost of traditional forms of energy in many locations. As a result, national and local governmental authorities in many countries, including China, have provided subsidies and economic incentives in the form of feed-in tariffs, rebates, tax credits and other incentives to distributors, system integrators and manufacturers of photovoltaic products to promote the use of solar energy and to reduce dependency on other forms of energy. We believe that the near-term growth of the market for solar energy applications depends in large part on the availability and size of government subsidies and economic incentives. The reduction or elimination of government subsidies and economic incentives may hinder the growth of this market or result in increased price competition for solar energy products, which could cause our revenues to decline. These government subsidies and economic incentives could be reduced or eliminated altogether. For example, in 2010, Spain announced its plan to cut the subsidized electricity prices paid to new photovoltaic solar power plants by up to 45%, which significantly reduced installations of new solar energy projects in the country. In 2010, Germany introduced an approximately 24% to 26% solar feed-in tariffs reduction for rooftop systems and 20% to 25% reduction for ground-based systems. In early 2012, Germany further reduced its feed-in tariffs by 15% to up to 24.43 Euro cents per kilowatt hour for rooftop systems and up to 18.76 Euro cents per kilowatt hour for ground-based systems. In April 2012, Italian officials revealed the details of its latest renewable energy law. Amongst the proposals expected to become effective with the new law are cuts to Italy's feed-in tariff, an annual installation cap, and a requirement to put all installations over 5MW through a competitive bidding process. In 2013, the German government still plans to cut the expansion of solar power after Germany added 7,500 megawatts and 7,600 megawatts of capacity in 2011 and 2012, respectively, to bring its total to 32,600 MW, which is nearly as much as the rest of the world combined. The German government wants to see the FIT cut by up to 30 percent in a one-off move, after a series of annual cuts of about 15 percent in recent years. Such actions may result in a significant fall in the demand for photovoltaic products. In addition, government financial support of photovoltaic products has been, and may continue to be, challenged on constitutional grounds and found unlawful in certain countries. The escalation of the European sovereign debt crisis since 2011 and the slowdown of the Chinese economy in 2012 may continue to exert downward pressure on the amount of government subsidies for solar energy applications in these two regions. Reductions in, or elimination of, government subsidies and economic incentives for solar energy applications before the photovoltaic industry reaches the economies of scale necessary for solar power to become cost-effective in a non-subsidized market place could result in decreased demand for solar generation products and, as a result, for polysilicon, which could cause our revenues to decline.

Our limited operating history may not serve as an adequate basis to judge our future prospects and results of operations.

We have a limited operating history. We commenced polysilicon manufacturing in 2008. Several of our senior management and key employees have worked together at our company for only a relatively short period of time, and a number of our senior officers were recently promoted to their posts in October 2012. Our future success will depend on our ability to expand our manufacturing capacity significantly beyond its current level and further expand our customer base. To address these risks, we must, among other things, continue to respond to competition and volatile market developments, attract, retain and motivate qualified personnel, implement and successfully execute expansion plans and improve our technologies. We cannot assure you that we will be successful in addressing such risks.

Although we were profitable in 2010 and 2011, we experienced significant decrease in revenue and incurred substantial net loss in 2012. Our limited operating history makes the prediction of future results of operations difficult, and therefore, it is unclear if we could regain positive revenue growth or become profitable again in the future. Our business model, technology and ability to achieve satisfactory manufacturing yields for polysilicon at higher volumes are unproven. Compared to companies with a long and well-established operating history and companies operating in less volatile sectors, our results of operations are more susceptible to the impact of adverse operating environment and supply and demand risks.

Table of Contents

Our revenues and results of operations have fluctuated and are likely to fluctuate in the future.

Fluctuations of our revenues and results of operations may occur on a quarterly and on an annual basis and may be due to a number of factors, many of which are beyond our control. These factors include, among others, fluctuation in the global average selling prices of photovoltaic products, fluctuation in the volume of our products shipped, changes in end-user demand for the photovoltaic products manufactured and sold by us or our customers, the gain or loss of significant customers, the availability of governmental subsidies or financial support and changes in our electricity, natural gas, raw material or labor costs. For example, our net loss may worsen in the upcoming quarters if one or more of these factors become unfavorable to our business. Furthermore, wafers traditionally had lower profit margins than polysilicon, and we may need to price aggressively to gain market share or remain competitive in this business, which may further reduce our net margins and cause our financial results to fluctuate from time to time.

Therefore, you should consider our future prospects in light of the risks and uncertainties experienced by early stage companies in a rapidly evolving and increasingly competitive market in China.

We experienced a significant decrease in our revenues and incurred a substantial net loss in 2012.

As a result of the slump in the global demand for and sales price of polysilicon, we experienced a significant decrease in our revenues for our continuing operations in 2012 and suffered a large net loss for the year. Compared with our revenues from continuing operations in 2011, our revenues from continuing operations in 2012 decreased by 62.6%, and we incurred a net loss of \$115.6 million. While the global demand and sales price of polysilicon have been recovering in the first quarter of 2013 from their historical lows in 2012, we cannot predict when we will be able to regain a positive net income. If we cannot obtain positive revenue growth and regain profitability in the near future, our status as a going concern will be jeopardized.

We are facing significant working capital pressure in the current challenging market environment. Our major shareholders have committed to provide financial support to us to meet our working capital requirements and obligations as they come due. If the market continues to deteriorate and we are not able to obtain adequate financial support from our major shareholders or from other sources, we will face the risk of not being able to continue as a going concern.

The current challenging solar photovoltaic market situation results in low prices through the whole value chain, which caused our polysilicon and wafer businesses to experience significant financial losses. As of December 31, 2012, we had a working capital deficit (being our total consolidated current liabilities less our total consolidated current assets) of \$163.8 million. If the market continues to be weak, we will continue to face significant pressure on our working capital. In addition, we committed significant capital expenditures on the equipment improvement projects in Wanzhou, Chongqing.

Nevertheless, our major shareholders with sufficient capital and liquidity agreed to provide the necessary financial support to us, as may be required, through Daqo Group Co., Ltd., or Daqo Group, an affiliated company of ours. In addition, we had committed and available bank standby credit facilities of \$36.9 million, as of December 31, 2012. In sum, our continuation as a going concern is dependent upon continued financial support from our shareholders and our ability to continue to obtain other sources of financing.

Our consolidated financial statements do not reflect any adjustments relating to recoverability and classification of recorded assets or the amounts and classification of liabilities or any other adjustments that might be necessary should we be unable to continue as a going concern. Our inability to continue as a going concern would materially and adversely affect our financial condition, results of operations and business prospects.

We need a significant amount of cash to fund our future capital expenditure requirements and working capital needs; if we cannot obtain additional sources of liquidity when needed, our growth prospects and future profitability may be materially and adversely affected.

We need a significant amount of cash to fund our operations. In particular, we will need substantial additional funding to finance our technology improvement projects and potential expansion for polysilicon, to meet our working capital requirements, and to repay any short-term or long-term bank borrowings when due. We will also need cash resources to fund our research and development activities in order to remain competitive on cost and technology. We also need to contribute registered capital to our Chongqing and Xinjiang facilities in the amount of \$26.4 million and \$61.6 million respectively.

Table of Contents

In the past, we relied in part on long-term bank borrowings and advance payments from customers to finance our working capital requirements. However, we expect that we may not be able to obtain a substantial amount of, or any, advance payments from customers in the future as the photovoltaic markets become increasingly competitive. Recently, payment collection in the solar photovoltaic industry has become increasingly challenging. Any delay or failure in collecting amounts owed from customers will adversely affect the Company's cash flow situation. In addition, future acquisitions, expansions, market changes or other developments may cause us to require additional financing. We expect to incur additional debt in the future. Our ability to obtain external financing in the future is subject to a number of uncertainties, including:

our future financial condition, results of operations and cash flows;

general market conditions for financing activities by companies in our industry;

economic, political and other conditions in China and elsewhere; and

development and duration of the current global economic slowdown.

If we are unable to obtain funding in a timely manner or on commercially acceptable terms, or at all, our growth prospects and ability to return to profitability may be materially and adversely affected.

We may not be successful in our efforts to continue to manufacture polysilicon in a cost-effective manner.

The technology used to manufacture polysilicon is complex, requires costly equipment and is continuously being modified in an effort to improve yields and product performance. We may face significant challenges relating to polysilicon production in the future. Microscopic impurities such as dust and other contaminants, difficulties in the manufacturing process, disruptions in the supply of utilities or defects in the key materials or tools used to manufacture polysilicon could interrupt manufacturing, reduce yields or cause a portion of the polysilicon to be rejected by our customers, which would materially and adversely affect our profitability.

Our effective capacity and ability to produce high volumes of polysilicon depend on the cycle time for each batch of polysilicon. We may encounter problems in our manufacturing process or facilities as a result of, among other things, production failures, construction delays, human error, equipment malfunction or process contamination, all of which could seriously harm our operations. We may experience production delays if any modifications we make in the manufacturing process to shorten production cycles are unsuccessful. Moreover, failure to achieve acceptable manufacturing levels may make our polysilicon costs uncompetitive, which could materially and adversely affect our business, financial condition and results of operations.

Further development in alternative polysilicon production technologies or other changes in the photovoltaic industry could render our production process too costly or obsolete, which could reduce our market share and cause our sales and profits to decline.

Although the vast majority of the polysilicon produced in the world utilizes the chemical vapor deposition process, or the modified Siemens process, several alternative production processes have been developed that may have significantly lower production costs. Compared with other polysilicon production processes, a disadvantage of the modified Siemens process is the large amount of electricity required. For example, MEMC and REC currently operate or are constructing facilities that use the fluidized bed reactor method for producing polysilicon. Tokuyama has developed a polysilicon technology called the vapor-to-liquid deposition process. Other polysilicon manufacturers are establishing facilities using upgraded metallurgical grade silicon process to produce solar-grade polysilicon. Moreover, some polysilicon manufacturers who are using modified Siemens process have adopted newer technologies such as Hydrochlorination, which could enable them to produce polysilicon in a more cost effective way comparing to the traditional modified Siemens process.

Table of Contents

Further developments in competing polysilicon production technologies may result in lower manufacturing costs or higher product performance than those achieved from the modified Siemens process, including the one we employ. We will need to invest significant financial resources in research and development to expand our market position, keep pace with technological advances in polysilicon production and effectively compete in the future. Failure to further refine our technology could make our production process too costly or obsolete, which could reduce our margins and market share, cause our revenues to decline and materially and adversely affect our results of operations.

Alternative technologies in cell manufacturing may reduce the demand for polysilicon.

The vast majority of silicon-based photovoltaic cell manufacturers use chunk or granular polysilicon. However, alternative technologies have been commercialized. One such technology, thin-film cell production, uses little to no silicon in the production of solar cells. Thin-film solar cells are currently less costly to produce than silicon-based solar cells. Significant expansion of thin-film solar cell production has been announced which may put pressure on the entire value chain of silicon-based solar cell production. This expansion may in turn restrict the market for silicon-based solar cells, which would reduce the demand for our polysilicon. If the demand for polysilicon is adversely affected by increased demand for, and improvements to, alternative technologies, our revenues and results of operations could be materially and adversely affected.

Our future success depends substantially on our ability to significantly expand our polysilicon production capacity and output, which exposes us to a number of risks and uncertainties.

Our future success depends on our ability to significantly increase both polysilicon production capacity and output. If we fail to do so, we may not be able to benefit from economies of scale to reduce our costs per kilogram of polysilicon, to meet our obligations under supply agreements, to maintain our competitive position or to improve our profitability. Our ability to establish additional production capacity and increase output is subject to significant risks and uncertainties, including:

the need to raise significant additional funds to purchase additional production equipment or to build additional manufacturing facilities, which we may not be able to obtain on commercially viable terms or at all;

cost overruns and delays as a result of a number of factors, many of which are beyond our control, such as increases in the price of electricity or problems with equipment delivery;

delays or denial of required approvals by relevant government authorities;

failure to obtain production inputs in sufficient quantities or at acceptable cost;

significant diversion of management's attention and other resources; and

failure to execute our expansion plan effectively.

Our future commercial production in Xinjiang, China may not be successful.

We finished construction of our Phase 2 polysilicon facilities in Shihezi, Xinjiang Uyghur Autonomous Region in September 2012 and have successfully reached our targets in terms of capacity and cost structure by the end of March 2013. Although the Xinjiang location provides many strategic advantages, including lower electricity costs, we face a number of uncertainties in relation with our future commercial production in Xinjiang.

There are many risks associated with our future production in Xinjiang, any of which could cause significant disruption to production, including:

extremely cold temperatures;

lack of workers in Xinjiang experienced with polysilicon manufacturing;

Table of Contents

difficulties in timely transporting products to our customers, most of whom are located in other areas of China that are a significant distance from Xinjiang; and

political or social unrest.

One or more of these factors could harm our Xinjiang operations and consequently, could adversely affect our overall operating results.

We operate in an increasingly competitive market, and we may not be able to compete successfully with competitors who have greater resources than us.

The photovoltaic market is expected to become increasingly competitive. Our competitors include international polysilicon and wafer manufacturers, such as Hemlock, Wacker, OCI, REC, MEMC, Green Energy Technology and Sino-American Silicon and Chinese domestic polysilicon and wafer manufacturers, such as GCL-Poly, China Silicon Corporation, Sichuan Xinguang Silicon Science and Technology, LDK Solar, ReneSola, JinkoSolar and Comtec Solar Systems. In addition, many solar cell and module manufacturers, including some of our existing and potential customers, have established or have announced the intention of establishing polysilicon production or affiliate relationships with manufacturers of polysilicon. We compete with these in-house capabilities, which could limit our ability to expand our sales or even reduce our sales to our existing customers. Many of our competitors have substantially greater financial, technical, manufacturing and other resources than we do. Our competitors' greater size and longer operating history provide them with a competitive advantage with respect to manufacturing costs because of their economies of scale and their ability to purchase raw materials at lower prices. Our competitors may have stronger relationships or may enter into exclusive relationships with some of our key customers. As a result, they may be able to respond more quickly to changing customer demands or to devote greater resources to the development, promotion and sales of polysilicon than we can. Failure to adapt to changing market conditions and to compete successfully with existing or new competitors may materially and adversely affect our financial condition and results of operations.

We depend on a limited number of customers and sales contracts for a significant portion of our revenues, and the loss of any customer or cancellation of any contract may cause significant fluctuations or declines in our revenues.

In 2010, 2011 and 2012, our top three customers in aggregate accounted for approximately 35.1%, 35.2% and 40.9% of our total revenues, respectively. We anticipate that our dependence on a limited number of customers will continue for the foreseeable future. Consequently, any one of the following events may cause material fluctuations or declines in our revenues:

reduction, delay or cancellation of orders from one or more of our significant customers;

loss of one or more of our significant customers and failure to identify additional or replacement customers; and

failure of any of our significant customers to make timely payment for our products.

If we are unable to manage our growth effectively, our business and financial results may be adversely affected.

We experienced a period of rapid growth and expansion, despite the significant set-back in 2012, that has placed, and continues to place, significant strain on our management and resources. To accommodate our growth, we anticipate that we will need to implement a variety of new and upgraded operational and financial systems, procedures and controls, including the improvement of our accounting and other internal management systems, all of which require substantial management efforts. We also will need to continue to expand, train, manage and motivate our workforce and manage our customer relationships. All of these endeavors will require substantial management efforts and skills and require significant additional expenditures. We cannot assure you that we will be able to manage our growth effectively, and any failure to do so may have a material adverse effect on our business and financial results. Moreover, even if we do expand our polysilicon manufacturing capacity and our wafer business as planned, we may be unable to generate sufficient customer demand for our photovoltaic products to support our increased production levels or successfully integrate our polysilicon and wafer manufacturing businesses to achieve operational efficiency, which could adversely affect our business and results of operations.

Table of Contents

Polysilicon production is energy-intensive, and if our energy costs rise or if our electricity and other utility supplies are disrupted, our results of operations will be materially and adversely affected.

The polysilicon production process, particularly the modified Siemens process that we use, is highly dependent on a constant supply of electricity and other utilities, such as steam, natural gas and water, to maintain the optimal conditions for polysilicon production. If electricity or other utility supplies are not maintained at the desired level, we may experience significant delays in the production of polysilicon. In the past, there were shortages in electricity supply in various regions across China, especially during peak seasons, such as in the summer. In addition, the uncommon cold weather in China in the winter of 2010 resulted in a surging natural gas demand, which in turn caused severe gas shortage in many regions, including Chongqing, where one of our polysilicon manufacturing sites is located. The local governmental authorities in the worst-hit areas took measures to reduce or restrict the amount of natural gas supplied to non-residential users. We primarily use natural gas for our in-house steam production and steam is critical for our manufacturing process. Although the natural gas shortage did not directly affect our operations, if the shortage becomes more severe in the future, our natural gas supply may be reduced or suspended, which would significantly disrupt our manufacturing process. In addition to shortages, we are subject to potential risks of interruptions in energy supply due to power outage, equipment failure, weather conditions or other causes which could force us to cease production for a prolonged period of time. In the event that electricity or other utility supplies to our manufacturing facilities are disrupted, our business, results of operations and financial condition could be materially and adversely affected. Even if we have access to sufficient sources of electricity and other utilities, any significant increase in the costs of utilities could adversely affect our profitability, as we consume substantial amounts of electricity and other utilities in our manufacturing process. If electricity and other utility costs were to rise, our results of operations could be materially and adversely affected.

The full implementation of the closed loop system by other polysilicon manufacturers has diminished and may continue to diminish our competitive advantages provided by this system.

We have implemented the modified Siemens process in a completely closed loop system. Compared to the open loop system, the closed loop system uses raw materials more efficiently, requires less electricity and produces less pollution. Although the closed loop system has lower manufacturing costs than the open loop system, manufacturing facilities based on the open loop system can be built within a shorter period time with less initial capital investment for equipment. Most of polysilicon manufacturing facilities in China were traditionally built based on the open loop system. However, as the polysilicon market may face downward pricing pressure from time to time, we believe that an increasing number of China-based manufacturers are converting their open loop system to the closed loop system and some of them have completed such conversion. The full implementation of the closed loop system by other polysilicon manufacturers has diminished and may continue to diminish our competitive advantages provided by this system.

Our current indebtedness could adversely affect our business, financial condition and results of operations.

As of December 31, 2012, we had outstanding borrowings of \$307.8 million with a weighted average floating interest rate of 6.92%, and we expect to incur additional debt in the future. We borrowed the majority of these bank loans from Bank of China and China Construction Bank with guarantees from Daqo Group, an affiliated company of ours. We cannot assure you that we will be able to renew these borrowings when they become due or to obtain other loans or credits from other banks or other lenders on terms satisfactory to us or at all to satisfy the substantial capital expenditure requirements associated with our capacity expansion, whether on our own or with the continuing support from Daqo Group. In addition, the indebtedness could have an adverse effect on our future operations, including, among other things: (1) reducing the availability of our cash flow to fund our working capital, capital expenditures or other general corporate purposes as a result of interest or principal payments; (2) subjecting us to the risk of interest rate increases on our indebtedness which bears floating interest rates; and (3) placing us at a competitive disadvantage compared to our competitors that have less debt or are otherwise less leveraged. Any of these factors could have a material and adverse effect on our business, financial condition and results of operations.

Table of Contents***We face risks and uncertainties expanding our business through alliances, joint ventures or acquisitions.***

In 2011, we formed alliances with JNE Solar Inc., a party unrelated to us prior to this transaction, in Hamilton, Ontario, through our wholly owned subsidiary, Daqo New Energy Holdings (Canada) Ltd., to build and operate a solar module production facility in Hamilton, Ontario, Canada. Due to negative developments in the solar photovoltaic market, we discontinued this project and terminated the joint venture in April 2012 without incurring any loss to us. We may in the future, if presented with appropriate opportunities, acquire or invest in technologies, businesses or assets that are strategically important to our business or form alliances with key players in the photovoltaic industry to further expand our business. Such acquisitions and investments could expose us to potential risks, including risks associated with the assimilation of new operations, technologies and personnel, unforeseen or hidden liabilities, the inability to generate sufficient revenues to offset the costs and expenses of acquisitions, and potential loss of, or harm to, our relationships with employees, customers and suppliers as a result of integration of new businesses. Investments in new businesses may also divert our cash flow from servicing our debts and making necessary capital expenditures. In addition, we may incur impairment losses on our acquisitions and investments in equity securities. The diversion of our management's attention and any difficulties encountered with respect to the acquisitions, investments or alliances or in the process of integration could have an adverse effect on our ability to manage our business. Furthermore, our experience in the polysilicon manufacturing industry may not be as relevant or applicable in downstream markets. We may also face intense competition from companies with greater experience or established presence in the targeted downstream markets or competition from our industry peers with similar expansion plans. Any failure to integrate any acquired businesses or joint ventures into our operations successfully and any material liabilities or potential liabilities of any acquired businesses or joint ventures that are not identified by us during our due diligence process for such acquisitions or investments could materially and adversely affect our business and financial condition.

If we are unable to operate effectively or natural disasters or operational disruptions occur, our business, results of operations and financial condition could be adversely affected.

Production of polysilicon requires the use of volatile materials and chemical reactions sensitive to temperature and pressure and requires the use of external controls to maintain safety. For example, in the production of polysilicon, we use trichlorosilane, or TCS, which is a highly combustible substance if brought into contact with moisture in the air and is therefore potentially destructive and extremely dangerous if mishandled or used in uncontrolled circumstances. The occurrence of a catastrophic event involving TCS as a result of a natural disaster or human error at one of our polysilicon production facilities could threaten, disrupt or destroy a significant portion or all of our polysilicon production capacity at such facility for a significant period of time. Additionally, the smooth operation of our polysilicon production facilities depends significantly on our ability to maintain temperatures and pressure at appropriate levels, the supply of steam at a consistent pressure level, the availability of adequate electricity and our ability to control the application of such electricity. Accordingly, mistakes in operating our equipment or an interruption in the supply of electricity or steam at our production facilities could result in the production of substandard polysilicon or substantial shortfalls in production and could reduce our production capacity for a significant period of time. In addition, we voluntarily shut down our manufacturing facilities from time to time on an as-needed basis for maintenance and quality check purposes. For example, we temporarily shut down our Phase 1 facilities in April 2010 for periodic maintenance, in December 2010 for periodic maintenance and capacity enhancement, and in December 2011 for periodic maintenance. From October 2012 to the date of the annual report, our polysilicon facilities in Wanzhou have been shut down for periodic maintenance, as well as equipment upgrades and technology improvements. These abovementioned shutdowns have reduced and may further reduce the volume and increase the cost of polysilicon we produce. In addition, we may need to use hazardous equipment for our wafer manufacturing process. Such equipment requires skills and experience for safe operation. We could experience events such as equipment failures, explosions or fires due to employee errors, equipment malfunctions, accidents, and interruptions in electricity or water cooling supplies, natural disasters or other causes. In addition, such events could cause damage to properties, personal injuries or even deaths. As a result, we may in the future experience production curtailments or shutdowns or periods of reduced production. The occurrence of any such events or disruptions could result in loss of revenues and could also damage our reputation, any of which could have a material adverse effect on our business, operating results and financial condition.

Table of Contents

Existing regulations and changes to these regulations may present technical, regulatory, economic and trade barriers to the purchase and use of photovoltaic products, which may significantly reduce demand for our products.

Photovoltaic products are subject to national and local regulations relating to building codes, safety, environmental protection, utility interconnection and metering and other aspects of the electric utility industry. In a number of countries, including China, these regulations are being modified and may continue to be modified. The purchases of, or further investment in the research and development of, alternative energy sources, including photovoltaic technology, could be deterred by unfavorable regulations, which could result in a significant reduction in the potential demand for our products. For example, without a regulatory mandated exception for solar power systems, electric utility companies are often charged interconnection or standby fees for putting distributed power generation on the electric utility grid. These fees could increase the cost to end users of using the photovoltaic products and make them less desirable. In addition, trade authorities in foreign countries may apply trade sanctions against photovoltaic product imports from China, if the foreign trade authorities determine that the export sales from China are in violation of fair trade practices. Such trade sanctions can result in significant additional duties, which will adversely affect our photovoltaic product demand and thereby harming our business, prospects, results of operations and financial condition.

We obtain certain production equipment from a limited number of suppliers, and if such equipment is not delivered on time, is damaged in shipment or is otherwise unavailable, our ability to deliver polysilicon on time will suffer, which in turn could result in cancellation of orders and loss of revenues.

Our operations and expansion plans depend on our ability to obtain a sufficient amount of equipment that meets our specifications on a timely basis. Some of our equipment used in polysilicon and wafer production is not readily available from alternative vendors and would be difficult to repair or replace if it were to become damaged or cease working. If any of these suppliers were to experience financial difficulties or go out of business, or if there were any damage to or a breakdown of our production equipment, our business would incur losses. In addition, a supplier's failure to supply our ordered equipment in a timely manner, with adequate quality and on terms acceptable to us, could delay the capacity expansion of our manufacturing facilities and otherwise disrupt our production schedule or increase our costs of production. We have experienced significant delays in the delivery of our key equipment in the past. Failure to obtain equipment meeting our specifications could have a material adverse effect on our business, financial condition and results of operations. Furthermore, demand for polysilicon and wafer production equipment may result in significant increases in prices of such equipment or shortages in related components for our intended expansion. Any unexpected price increases could materially and adversely affect our financial condition and results of operations.

We have sourced and will continue to source some of our production equipment from Chinese manufacturers, and we cannot assure you that the China-sourced equipment will perform at the same level as our imported equipment or will meet our quality requirements.

We have purchased key equipment from Chinese and international suppliers. Compared to major international suppliers, our China-based suppliers generally have shorter operating histories and less experience in providing equipment for the polysilicon industry. We cannot assure you that the locally made equipment will perform at similar levels of quality and reliability as our imported equipment. In the event the China-sourced equipment does not perform as well as the imported equipment or does not perform at all, we may encounter disruption in our manufacture or deterioration of product quality, which in turn could materially and adversely affect our business, financial condition and results of operations.

Product defects could result in increased costs, decreased sales, and damage to our customer relationships and our reputation.

Our photovoltaic products may contain defects that are not detected until after it is shipped or processed by our customers. In the event our products are returned to us due to product defects, we would be required to replace the defective products promptly. If we deliver products with defects, or if there is a perception that our products are of substandard quality, we may incur substantially increased costs associated with termination of contracts and replacement of shipped products, and our credibility, market reputation and relationship with customers will be harmed and sales of our products may be materially and adversely affected.

Table of Contents

Substantially all of our production, storage, administrative, and research and development facilities are located in either Chongqing or Xinjiang, China. Any damage or disruption at these facilities would have a material adverse effect on our financial condition and results of operations.

Substantially all of our production, storage, administrative, and research and development facilities are currently located in either Chongqing or Xinjiang, China. Natural disasters, such as fire, floods, typhoons, earthquakes, snow storms, or other unanticipated catastrophic events, including power interruption, telecommunications failures, equipment failures, explosions, break-ins, terrorist acts or war, could significantly disrupt our ability to manufacture our products and operate our business. If any of our production facilities or material equipment were to experience any significant damage or downtime, we would not be able to meet our production targets and our business would incur losses. Any damage or disruption at these facilities would have a material adverse effect on our business, financial condition and results of operations.

We rely on third party intellectual property for certain key aspects of our operations, which subjects us to the payment of license fees and potential disruption or delays in the production of our products.

While we continue to develop and pursue patent protection for our own technologies, we expect to continue to rely on third party license arrangements for certain key aspects of our operations. For instance, we license from third party hydrochlorination process technology for our polysilicon production. See Item 4. Information on the Company B. Business Overview Intellectual Property for details of the contractual arrangements. The fees associated with such licenses could adversely affect our financial condition and operating results. If for any reason we are unable to license necessary technology on acceptable terms or at all, it may become necessary for us to develop alternative technology internally, which could be costly and delay or disrupt our production and therefore have a material adverse effect on our business and operating results.

Failure to protect our intellectual property rights may undermine our competitive position, and litigation to protect our intellectual property rights may be costly.

We rely primarily on trade secrets and other contractual restrictions to protect our intellectual property. Contractual arrangements, such as the confidentiality and non-competition agreements and terms between us and our research and development personnel, afford only limited protection and the actions we may take to protect our trade secrets and other intellectual property may not be adequate. In addition, we currently hold 16 patents and have 16 pending patent applications in China covering various aspects of the polysilicon and wafer manufacturing processes. However, we cannot assure you that our patent applications will be eventually issued with sufficiently broad coverage to protect our technology and products. Failure to protect our intellectual property and proprietary rights may undermine our competitive position. Third parties may infringe or misappropriate our proprietary technologies or other intellectual property and proprietary rights and use them to compete against us, which could have a material adverse effect on our business, financial condition or operating results.

Policing unauthorized use of proprietary technology can be difficult and expensive. In particular, the laws and enforcement procedures of China and certain other countries are uncertain or do not protect intellectual property rights to the same extent as the laws and enforcement procedures of the United States do. See Risks Relating to Doing Business in China Uncertainties in the interpretation and enforcement of Chinese laws and regulations could limit the legal protection available to you and us. We may need to resort to court proceedings to enforce our intellectual property rights in the future. Litigation relating to our intellectual property might result in substantial costs and diversion of resources and management attention away from our business. An adverse determination in any such litigation will impair our intellectual property and proprietary rights and may harm our business, prospects and reputation.

We may be exposed to infringement or misappropriation claims by third parties, which, if determined adversely to us, could cause us to pay significant damage awards.

Although we are currently strengthening our research and development capability, to date, substantially all of the intellectual property used in our production process was developed by third parties. Our success will be jeopardized if we cannot use and develop our technology and know-how without infringing the intellectual property rights of third parties. The validity and scope of claims relating to photovoltaic technology patents involve complex scientific, legal and factual questions and analysis and, therefore, may be highly uncertain. We may be subject to litigation involving claims of patent infringement or violation of other intellectual property rights of third parties. The defense and prosecution of intellectual property suits, patent opposition proceedings, and related legal and administrative proceedings can be both costly and time-consuming and may significantly divert the efforts and resources of our technical and management personnel. An adverse determination in any such litigation or proceedings to which we may become a party could subject us to significant liability to third parties, require us to seek licenses from third parties, to pay ongoing royalties, or to redesign our manufacturing process or our products or subject us to injunctions prohibiting the manufacture and sale of our products or the use of our technologies. Protracted litigation could also result in our customers or potential customers deferring or limiting their purchase or use of our products until resolution of such litigation.

Table of Contents

We may not be able to continue to receive the same level of support from Daqo Group, which may have a material adverse effect on our business and results of operations.

Since our inception, we have substantially benefited from financial support from Daqo Group, one of the largest electrical equipment manufacturers in China. As of December 31, 2012, we had outstanding payables to and amount due from Daqo Group and its subsidiaries in the amount of \$23.7 million and \$6.6 million, respectively. In addition, Daqo Group has granted us a permanent and royalty-free license to use the Daqo brand, which is a well-recognized brand in the electrical industry in China. We have benefited from the strong brand recognition of Daqo in our business development efforts, as evidenced by our ability to secure major customers based in China within a short period after we commenced commercial production of polysilicon. Daqo Group has agreed in writing not to engage in the business of manufacturing, marketing or distributing polysilicon or any other solar power products anywhere in the world or compete in any manner with our businesses without our consent for an indefinite term. Daqo Group has committed to provide any necessary financial support to us, as may be required, evidenced by a signed letter of support. However, we cannot assure you that we will continue to receive the same level of support, or any support at all, from Daqo Group in the future. If Daqo Group ceases to support us, our business, results of operations and prospects may be materially and adversely affected. In addition, any negative publicity associated with Daqo Group will likely have an adverse impact on our reputation, which could materially and adversely affect our business. In the event of any disagreements with Daqo Group, we may have to resort to legal proceedings in China to enforce our rights, which could be costly, time consuming and involve uncertain outcome.

Our business depends substantially on the continuing efforts of our executive officers and key employees, and our business may be severely disrupted if we lose their services.

Our future success depends substantially on the continued services of our executive officers and key employees, especially Mr. Guangfu Xu, our chairman, and Dr. Gongda Yao, our chief executive officer. If one or more of our executive officers or key employees were unable or unwilling to continue in their present positions, we might not be able to replace them easily, in a timely manner, or at all. Our business may be severely disrupted, our financial conditions and results of operations may be materially and adversely affected and we may incur additional expenses to recruit, train and retain personnel. If any of our executive officers or key employees join a competitor or form a competing company, we may lose customers, suppliers, know-how and key professionals and staff members. Each of our executive officers and key employees has entered into an employment agreement with us, which contains non-competition provisions. However, if any dispute arises between our executive officers and us, these agreements may not be enforceable in China, where these executive officers reside, in light of uncertainties with China's legal system. See Risks Relating to Doing Business in China Uncertainties in the interpretation and enforcement of Chinese laws and regulations could limit the legal protection available to you and us.

Certain of our principal shareholders have substantial influence over our company and their interests may not be aligned with the interests of our other shareholders.

As of the date of this annual report, Messrs. Guangfu Xu, Xiang Xu and Dafeng Shi, our directors that are affiliated with Daqo Group, beneficially own an aggregate of 35.5% of our outstanding share capital. As a result of their high level of shareholding, these shareholders have substantial influence over our business, including decisions regarding mergers, consolidations and the sale of all or substantially all of our assets, election of directors and other significant corporate actions. These shareholders may take actions that are not in the best interest of us or our other shareholders. This concentration of ownership may discourage, delay or prevent a change in control of our company, which could deprive our other shareholders of an opportunity to receive a premium for their shares as part of a sale of our company and might reduce the price of our ADSs. These actions may be taken even if they are opposed by our other shareholders. These shareholders' interests as beneficial owners of Daqo Group and Daqo New Material may not always be aligned with their interests as our shareholders. Should any conflict of interest arise, these shareholders may take actions not in the best interest of us and our other shareholders.

Table of Contents

If we are unable to attract, train and retain qualified personnel, our business may be materially and adversely affected.

Our future success depends, to a significant extent, on our ability to attract, train and retain qualified personnel, particularly technical personnel with expertise in the photovoltaic industry. Since our industry is characterized by high demand and intense competition for talent, there can be no assurance that we will be able to attract or retain qualified technical staff or other highly skilled employees that we will need to achieve our strategic objectives. As we have a limited operating history and are in a stage of rapid growth, despite recent set-backs, our ability to train and integrate new employees into our operations may not meet the growing demands of our business. If we are unable to attract and retain qualified personnel, our business may be materially and adversely affected.

Compliance with environmental regulations can be expensive, and non-compliance with these regulations may result in adverse publicity and potentially significant monetary damages and fines.

As our manufacturing processes generate waste water and gas and other industrial wastes, we are required to comply with all applicable regulations regarding protection of the environment. We are in compliance with present environmental protection requirements and have all the necessary environmental permits to conduct our business in all material respects. However, if more stringent regulations are adopted in the future, the cost of compliance with these new regulations could be substantial. If we fail to comply with present or future environmental regulations, we may be required to pay substantial fines, suspend production or cease operations, which in turn would have a material adverse effect on our financial condition and results of operations.

The discontinuation of any of the preferential tax treatments or the financial incentives and grants currently available to us in China could adversely affect our overall results of operations.

Various Chinese governmental authorities have provided tax incentives to our subsidiaries in China. These incentives include income tax exemption or reduced enterprise income tax rates. For example, under the PRC Enterprise Income Tax Law, or the EIT Law, the statutory enterprise income tax rate is 25%. However, our Chinese subsidiary Chongqing Daqo New Energy Co., Ltd., or Chongqing Daqo, as a Chongqing Municipality High and New Technology Enterprise, is entitled to a preferential enterprise income tax rate of 15%. The status is valid until November 2015 and can be renewed for additional three-year terms upon Chongqing Daqo's application and the government's approval. If there are significant changes in the business operations, manufacturing technologies or other criteria that cause the enterprise to no longer meet the criteria as a high and new technology enterprise, such status will be terminated from the year of such change. We cannot assure you that Chongqing Daqo will continue to qualify as a high and new technology enterprise in future periods. In addition, Chongqing Daqo has received various financial incentives and grants from the local government since its inception. For example, it received government grants in the amount of \$11.0 million and \$9.2 million in 2011 and 2012, respectively. Any increase in the enterprise income tax rate applicable to our Chinese subsidiaries or discontinuation or reduction of any of the preferential tax treatments or financial incentives currently enjoyed by our subsidiaries in China could adversely affect our business, operating results and financial condition.

The dividends we receive from our Chinese subsidiaries and our global income may be subject to Chinese tax under the EIT Law, which would have a material adverse effect on our results of operations; our foreign ADS holders will be subject to a Chinese withholding tax upon the dividends payable by us, if we are classified as a Chinese resident enterprise.

Under the Chinese enterprise income tax laws and regulations, dividends, interests, rent, royalties and gains on transfers of property payable by a foreign-invested enterprise in China to its foreign investor who is a non-resident enterprise will be subject to a 10% withholding tax, unless such non-resident enterprise's jurisdiction of incorporation has a tax treaty with China that provides for a reduced rate of withholding tax and such non-resident enterprise is the beneficial owner of the dividends, interests, rent, royalties and gain on transfers of property. The Cayman Islands, where Daqo Cayman is incorporated, does not have such a tax treaty with China.

Table of Contents

Under the EIT Law, an enterprise established outside China with its de facto management body within China is considered a resident enterprise in China and will be subject to the Chinese enterprise income tax at the rate of 25% on its worldwide income. In April 2009, the Chinese State Administration of Taxation issued a new circular to clarify criteria for determining the resident enterprise status of foreign companies which are controlled by enterprises incorporated in China. Pursuant to the circular, to determine whether a company formed outside of mainland China and controlled by an enterprise incorporated in China should be treated as a Chinese resident enterprise, the tax authority will review factors such as the routine operation of the organizational body that effectively manages the enterprise's production and business operations, locations of personnel holding decision-making power, location of finance and accounting functions and properties of the enterprise, and whether more than half of the directors or senior management personnel residing in China. Substantially all of our management members are based in China. However, it remains unclear how PRC tax authority will treat an overseas company controlled by PRC natural persons rather than PRC enterprises like our case. If the Chinese tax authorities subsequently determine that Daqo Cayman should be classified as a resident enterprise, then our worldwide income will be subject to Chinese income tax, which may have a material adverse effect on our financial condition and results of operations. Notwithstanding the foregoing provision, the EIT Law also provides that, if a resident enterprise directly invests in another resident enterprise, the dividends received by the investing resident enterprise from the invested enterprise are exempted from income tax, subject to certain conditions. Therefore, if Daqo Cayman is classified as resident enterprise under the EIT Law, the dividends received from our Chinese subsidiaries may be exempted from withholding tax.

Moreover, under the EIT Law, foreign ADS holders will be subject to a 10% withholding tax upon dividends payable by us if Daqo Cayman is classified as resident enterprise under the EIT Law. Any such tax may reduce the returns on your investment in our ADSs.

We rely on a lease agreement with Daqo New Material for material property, plant and equipment necessary for our production, and if Daqo New Material fails to perform, or terminates the lease agreement for any reason, our business could be disrupted.

Chongqing Daqo leases certain property, plant and equipment from Daqo New Material for its polysilicon production under a lease agreement effective from July 1, 2008, which was subsequently amended. When the initial term expires on December 31, 2013, Chongqing Daqo has an option to renew the lease agreement on the same conditions for additional terms. If Daqo New Material fails to perform or terminates the lease agreement for any reason, including, for example, due to its breach of the agreement or the unavailability of any required governmental approvals, or if it refuses to extend or renew the lease agreement when the agreement expires, and we cannot find an immediately available alternative source for leasing similar property, plant and equipment, then our ability to carry on our operations will be impaired. If Daqo New Material fails to perform its obligations, we may need to initiate legal procedures in courts to enforce the agreement. Such procedures can be lengthy and the result may not be favorable to us.

We have limited insurance coverage. In particular, we do not have any product liability insurance or business interruption insurance.

As the insurance industry in China is still in an early stage of development, the product liability insurance and business interruption insurance available in China offer limited coverage compared to that offered in many other countries. We do not have any product liability insurance or business interruption insurance. Any business disruption or natural disaster could result in substantial costs and a diversion of resources, which would have a material adverse effect on our business and results of operations.

As with other photovoltaic product manufacturers, we are exposed to risks associated with product liability claims if the use of our photovoltaic products results in injury. Since our polysilicon products are made into electricity generating devices, it is possible that users could be injured or killed by devices that use our products as a result of product malfunctions, defects, improper installation or other causes. We only began commercial shipment of our photovoltaic products in July 2008 and, because of our limited operating history, we cannot predict whether product liability claims will be brought against us in the future or the effect of any resulting negative publicity on our business. The successful assertion of product liability claims against us could result in potentially significant monetary damages and require us to make significant payments.

Table of Contents

We have granted, and may continue to grant, stock options and other share-based compensation in the future, which may materially impact our future results of operations.

We adopted our 2009 share incentive plan, or the Option Plan, in August 2009 that permits the grant of stock options, restricted shares and restricted share units to employees, directors and consultants of our company. Under the Option Plan, we may issue options to purchase up to 15,000,000 ordinary shares. As of the date of this annual report, options to purchase 8,990,000 ordinary shares have been granted under this plan. In addition, we modified the exercise prices for certain outstanding options in January 2012 and April 2013 in order to provide additional incentives to our employees and directors pursuant to an express authorization under our share incentive plan allowing our board of directors to approve a downward adjustment of the option exercise prices without shareholders' approval. As a result of these option grants, option re-pricings and potential future grants under the plan, we have incurred, and will incur in future periods, significant share-based compensation expenses. We account for compensation costs for all stock options using a fair-value based method and recognize expenses in our consolidated statement of income in accordance with the relevant rules in accordance with U.S. GAAP, which may have a material adverse effect on our net income. Moreover, the additional expenses associated with share-based compensation may reduce the attractiveness of such incentive plan to us. However, if we limit the scope of our share incentive plan, we may not be able to attract or retain key personnel who are expected to be compensated by incentive shares or options.

Risks Relating to Doing Business in China

Changes in China's economic, political or social conditions or government policies could have a material adverse effect on our business and operations.

Substantially all of our assets are located in and substantially all of our revenues are currently sourced from China. Accordingly, our business, financial condition, results of operations and prospects may be influenced to a significant degree by political, economic and social conditions in China generally and by continued economic growth in China as a whole.

The Chinese economy differs from the economies of most developed countries in many respects, including the level of government involvement, level of development, growth rate, control of foreign exchange and allocation of resources. Although the Chinese government has implemented measures since the late 1970s emphasizing the utilization of market forces for economic reform, the reduction of state ownership of productive assets and the establishment of improved corporate governance in business enterprises, a substantial portion of productive assets in China is still owned by the Chinese government. In addition, the Chinese government continues to play a significant role in regulating industry development by imposing industrial policies. The Chinese government also exercises significant control over the Chinese economic growth through the allocation of resources, controlling payment of foreign currency-denominated obligations, setting monetary policy and providing preferential treatment to particular industries or companies.

While the Chinese economy has experienced a significant growth over the past decades, growth has been uneven, both geographically and among various sectors of the economy. The Chinese government has implemented various measures to encourage economic growth and guide the allocation of resources. Some of these measures benefit the overall Chinese economy, but may also have a negative effect on us. For example, our operating results and financial condition may be adversely affected by government control over capital investments or changes in tax regulations that are applicable to us, and by government policies or guidance aimed at curtailing the perceived over-capacity of certain industry sectors, such as steel, concrete, polysilicon and wind power equipment. See Item 4. Information on the Company B. Business Overview Regulation Renewable Energy Law and Other Government Directives. The Chinese government has implemented certain measures, including interest rate increases, to control the pace of economic growth. These measures may cause decreased economic activity in China, which could in turn reduce the demand for our services and materially and adversely affect our operating results and financial condition.

A severe and prolonged global economic recession and the corresponding slowdown in the Chinese economy may adversely affect our business, results of operations and financial condition.

The global financial markets experienced significant disruptions in 2008 and the United States, Europe and other economies went into recession. The recovery from the lows of 2008 and 2009 was uneven and is facing new challenges, including the escalation of the European sovereign debt crisis since 2011 and the slowdown of the Chinese economy in 2012. It is unclear whether the European sovereign debt crisis will be contained and whether the Chinese economy will resume its high growth rate. There is considerable uncertainty over the long-term effects of the expansionary monetary and fiscal policies that have been adopted by the central banks and financial authorities of some of the world's leading economies, including China's. There have also been concerns over unrest in the Middle East and Africa, which have resulted in volatility in oil and other markets, and over the possibility of a war involving Iran. There have also been concerns about the economic effect of the earthquake, tsunami and nuclear crisis in Japan and tensions in the relationship between China and Japan. Economic conditions in China are sensitive to global economic conditions. Any prolonged slowdown in the global or Chinese economy may have a negative impact on our business, results of operations and financial condition, and continued turbulence in the international markets may adversely affect our ability to access the capital

markets to meet liquidity needs.

Table of Contents

Since we derive substantially all of our revenues from customers in China, any prolonged slowdown in the Chinese economy may have a negative impact on our business, results of operations and financial condition in a number of ways. For example, our customers may reduce or delay spending with us, while we may have difficulty expanding our customer base fast enough, or at all, to offset the impact of decreased spending by our existing customers. In addition, to the extent we offer credit to any customer and such customer experiences financial difficulties due to the economic slowdown, we could have difficulty collecting payment from such customer.

Uncertainties in the interpretation and enforcement of Chinese laws and regulations could limit the legal protection available to you and us.

The Chinese legal system is a civil law system based on written statutes. Unlike common law systems, it is a system in which legal decisions have limited value as precedents. In the late 1970s, the Chinese government began to promulgate a comprehensive system of laws and regulations governing economic matters in general. The overall effect of legislation over the past three decades has significantly increased the protections afforded to various forms of foreign or private-sector investment in China. Our Chinese operating subsidiary, Chongqing Daqo, is a foreign-invested enterprise and is subject to laws and regulations applicable to foreign-invested enterprises as well as various Chinese laws and regulations generally applicable to companies in China. Our business is also subject to various industry policy, safety and environmental laws and regulations that affect our operations and production facility expansion plans, including those related to investment, project construction, building, zoning, fire prevention and work safety. These laws and regulations are still evolving, and their interpretation and enforcement involve uncertainties. In addition, due to the inconsistent nature of regulatory enforcements in China, local Chinese governmental authorities have significant discretion in interpreting and implementing rules and regulations, and there is no assurance that the central government authorities will always agree with the interpretations and implementations of the local governmental authorities. Currently, all governmental approvals relating to our operations and production capacity expansion plans have been issued by the relevant competent local government authorities. However, if a central government agency requires us to obtain its approval and if we fail to obtain such approval in a timely manner, or at all, we may be subject to the imposition of fines against us, or the suspension or cessation of our production capacity expansion plans. In addition, under the measures jointly issued by the National Development and Reform Commission, or NDRC, and nine other governmental agencies in September 2009, we will need to seek pre-approval from NDRC if we plan to further expand our production capacity beyond Phase 2. As the detailed guidelines for approval criteria or timeline under these measures have yet to be promulgated, we cannot assure you that we will obtain the required NDRC approval in time or at all if we plan to further expand our production capacity beyond Phase 2. See Item 4. Information on the Company B. Business Overview Regulation Renewable Energy Law and Other Government Directives. It may be more difficult to evaluate the outcome of any regulatory or legal proceedings and the level of legal protection we enjoy than in more developed legal systems. These uncertainties may impede our ability to continue our operations or planned capacity expansions, which, as a result, could materially and adversely affect our business and operations.

Chinese regulations relating to offshore investment activities by Chinese residents may increase the administrative burden we face and may subject our Chinese resident beneficial owners or employees to personal liabilities, limit our subsidiaries' ability to increase its registered capital or distribute profits to us, limit our ability to inject capital into our Chinese subsidiaries, or may otherwise expose us to liability under Chinese law.

SAFE has promulgated regulations that require Chinese residents and Chinese corporate entities to register with local branches of SAFE in connection with their direct or indirect offshore investment activities. These regulations may apply to our shareholders who are Chinese residents and may apply to any offshore acquisitions that we make in the future.

Table of Contents

In October 2005, SAFE issued a regulation entitled Circular on Issues Concerning Foreign Exchange Regulation of Corporate Financing and Roundtrip Investments by Chinese Residents through Offshore Special Purpose Companies, or SAFE Circular No. 75. SAFE Circular No. 75 requires Chinese residents to register with the local SAFE branch before establishing or controlling any company outside of China for the purpose of capital financing with assets or equities of Chinese companies, referred to in the notice as an offshore special purpose company. In addition, any Chinese resident who is a direct or indirect shareholder of an offshore company is required to update his registration with the relevant SAFE branches, with respect to that offshore company, any material change involving increase or decrease of capital, transfer or swap of shares, merger, division, equity or debt investment or creation of any security interest. Moreover, the Chinese subsidiaries of that offshore company are required to coordinate and supervise the filing of SAFE registrations by the offshore company's shareholders who are Chinese residents in a timely manner. If a Chinese shareholder with a direct or indirect stake in an offshore parent company fails to make the required SAFE registration, the Chinese subsidiaries of such offshore parent company may be prohibited from making distributions of profit to the offshore parent and from paying the offshore parent proceeds from any reduction in capital, share transfer or liquidation in respect of the Chinese subsidiaries, and the offshore parent company may also be prohibited from injecting additional capital into its Chinese subsidiaries. Furthermore, failure to comply with the various SAFE registration requirements described above may result in liability for the Chinese shareholders and the Chinese subsidiaries under Chinese law for foreign exchange registration evasion.

We have, up to the present, completed the SAFE Circular No. 75 registration for all current beneficial shareholders of our company who are Chinese residents. However, we may not be fully informed of the identities of the beneficial owners of our company in the future and we cannot assure you that all of our Chinese resident beneficial owners will comply with the SAFE regulations. The failure of our beneficial owners who are Chinese residents to make any required registrations may subject us to fines and legal sanctions, and prevent us from being able to make distributions or pay dividends, as a result of which our business operations and our ability to distribute profits to you could be materially and adversely affected.

Participants of our share incentive plan who are PRC individuals are required to register with SAFE, and the failure to so comply could subject us and such participants to penalties.

In February 2012, the SAFE promulgated the Notice on the Administration of Foreign Exchange Matters for Domestic Individuals Participating in the Stock Incentive Plans of Overseas Listed Companies, or the Stock Option Notice. According to the Stock Option Notice, a PRC domestic qualified agent or the PRC subsidiary of such overseas listed company must file an application with the SAFE or its local counterpart on behalf of PRC resident individuals who participate in stock incentive plans of overseas publicly-listed companies to obtain approval for an annual allowance with respect to the purchase of foreign exchange in connection with the stock holding or share option exercises. Our company is an overseas publicly-listed company, and therefore, we and participants of our share incentive plan who are PRC individuals are subject to these regulations.

We are in the progress of submitting an application with the SAFE or its local counterpart to register our share incentive plan. If our application is unsuccessful or our option plan participants who are PRC individuals fail to work with us to complete the registration, we or such persons may be subject to fines and legal sanctions. Any failure to comply with such regulations may subject us and the relevant participants of our share incentive to fines and legal sanctions and prevent us from being able to grant share incentive to our personnel, as a result of which our business operations may be adversely affected.

Table of Contents***Chinese regulation of direct investment and loans by offshore holding companies to Chinese entities may delay or limit us from making additional capital contributions or loans to our Chinese subsidiaries.***

Any capital contributions or loans that we, as an offshore entity, make to our Chinese subsidiaries, are subject to Chinese regulations. For example, for each of our Chinese subsidiary, the aggregate amount of our loans to the Chinese subsidiary cannot exceed the difference between the amount of its total investment and its registered capital as approved by the foreign investment regulatory authorities under relevant Chinese laws, and the loans must be registered with the local branch of the SAFE. For each foreign invested enterprise, such as Chongqing Daqo, when the Chinese foreign investment regulatory authorities approve the establishment of such foreign invested enterprise, the authorities approve the amounts of such enterprise's registered capital, which represent the investors' capital commitment in equity, and the amounts of its total investment, which represent the sum of its registered capital plus the amounts of its permitted loans. After the establishment of the foreign invested enterprise, the investors can seek regulatory approval to increase its registered capital and the total investment amounts, and upon approval, there will be increases in both amounts. There is a specific statutory guideline relating to the ratio of a foreign invested enterprise's registered capital amount over total investment amount, and all foreign investment regulatory authorities in China must follow the ratio guideline when exercising their approval authority. However, there is no uniform statutory guideline applicable to all regulatory authorities regarding whether to approve the establishment of a new foreign invested enterprise or to approve any increase in the registered capital and total investment of an existing foreign invested enterprise. In practice, authorities consider factors such as overall governmental policies relating to the specific industry and demands in a particular industry and the approval usually takes one to three months depending on the locations of the foreign invested enterprises. The approved total investment amounts of Chongqing Daqo and Xinjiang Daqo New Energy Co., Ltd., or Xinjiang Daqo, are \$286.0 million and \$298.0 million, respectively. The registered capital of Chongqing Daqo is \$96.0 million, of which \$69.6 million was contributed by Daqo Cayman as the sole investor. The registered capital of Xinjiang Daqo is \$100.0 million, of which \$38.4 million was contributed by Daqo Cayman as the sole investor. As a result, the maximum permissible amounts that Chongqing Daqo and Xinjiang Daqo may borrow from Daqo Cayman are \$190.0 million and \$198.0 million, respectively. We may not make loans to Chongqing Daqo or Xinjiang Daqo in excess of the maximum amounts permissible unless we obtain government approval to increase their total investment amounts. In addition, any increases of our capital contributions to our Chinese subsidiaries beyond the previously authorized amount must be approved by the MOFCOM and the NDRC or their respective local counterparts. We cannot assure you that we will be able to obtain these approvals on a timely basis, or at all. If we fail to obtain such approvals, our ability to make equity contributions or provide loans to our Chinese subsidiaries or to fund their operations may be negatively affected, which could adversely affect our Chinese subsidiaries' liquidity and their ability to fund their working capital and expansion projects and meet their obligations and commitments.

We rely principally on dividends and other distributions on equity paid by our wholly owned operating subsidiaries to fund any cash and financing requirements we may have, and any limitation on the ability of our operating subsidiaries to pay dividends to us could have a material adverse effect on our ability to borrow money or pay dividends.

As a holding company, we rely principally on dividends and other distributions on equity paid by our Chinese subsidiaries for our cash requirements, including funds necessary to service any debt we may incur. If our Chinese subsidiaries incur debt on their own behalf in the future, the instruments governing the debt may restrict their ability to pay dividends or make other distributions to us. Furthermore, relevant Chinese laws and regulations permit payments of dividends by Chinese subsidiaries only out of their retained earnings, if any, determined in accordance with Chinese accounting standards and regulations. Under Chinese laws and regulations, each of our Chinese subsidiaries is required to set aside a portion of its net income each year to fund a statutory surplus reserve until such reserve reaches 50% of its registered capital. This reserve is not distributable as dividends. As a result, our Chinese subsidiaries are restricted in their ability to transfer a portion of their net assets to us in the form of dividends, loans or advances. Limitation on the ability of our Chinese subsidiaries to pay dividends to us could materially and adversely limit our ability to borrow money outside of China or pay dividends to holders of our ADSs. Also see Risks Relating to Our Business. The dividends we receive from our Chinese subsidiaries and our global income may be subject to Chinese tax under the EIT Law, which would have a material adverse effect on our results of operations; our foreign ADS holders will be subject to a Chinese withholding tax upon the dividends payable by us, if we are classified as a Chinese resident enterprise.

Fluctuations in exchange rates could result in foreign currency exchange losses.

The conversion of RMB into foreign currencies, including U.S. dollars, is based on rates set by the People's Bank of China. The PRC government allowed the RMB to appreciate by more than 20% against the U.S. dollar between July 2005 and July 2008. Between July 2008 and June 2010, this appreciation halted and the exchange rate between the RMB and the U.S. dollar remained within a narrow band. Since June 2010, the PRC government has allowed the RMB to appreciate slowly against the U.S. dollar again, though there have been periods when the U.S. dollar has appreciated against the Renminbi as well. It is difficult to predict how market forces or PRC or U.S. government policy may impact the exchange rate between the RMB and the U.S. dollar in the future. There remains significant international pressure on the Chinese government to adopt a substantial liberalization of its currency policy, which could result in a further and more significant appreciation in the value of the Renminbi against the U.S. dollar. Significant revaluation of the Renminbi may have a material adverse effect on your investment. In addition, appreciation of the Renminbi against the U.S. dollar would increase our production costs. Conversely, if we decide to convert our

Edgar Filing: DAQO NEW ENERGY CORP. - Form 20-F

Renminbi into U.S. dollars for the purpose of making payments for dividends on our ordinary shares or ADSs or for other business purposes, appreciation of the U.S. dollar against the Renminbi would have a negative effect on the U.S. dollar amount available to us.

Table of Contents***Failure to maintain effective internal control over financial reporting could have a material and adverse effect on the trading price of our ADSs.***

We are subject to the reporting obligations under the U.S. securities laws. In connection with the audit of our internal control over financial reporting as of and for the year ended December 31, 2011, we and our independent registered public accounting firm identified three material weaknesses including (i) our lack of accounting resources and expertise necessary to comply with U.S. GAAP and the Securities and Exchange Commission financial reporting and disclosure requirements, (ii) our lack of sufficient resources to perform thorough reviews of consolidated financial statements and related footnote disclosures during the period-end financial reporting and disclosure process, and (iii) our lack of sufficient processes, documentation and approval of related party transactions with affiliates. In 2012, we have made enhancements to our internal controls over financial reporting. See Part II Item 5. Controls and Procedures Remediation and Changes in Internal Control Over Financial Reporting. Based on these actions taken and our testing and evaluation of the effectiveness of our internal controls, we have concluded the material weaknesses no longer existed as of December 31, 2012.

However, although our management concluded that we maintained effective internal control over financial reporting as of December 31, 2012, we cannot assure you that we will maintain effective internal control over financial reporting on an ongoing basis. If we fail to maintain effective internal control over financial reporting, we will not be able to conclude and our independent registered public accounting firm will not be able to report (if it is required to report) that we have effective internal control over financial reporting in accordance with the Sarbanes-Oxley Act of 2002 in our future annual report on Form 20-F covering the fiscal year in which this failure occurs. Effective internal control over financial reporting is necessary for us to produce reliable financial reports. Any failure to maintain effective internal control over financial reporting could result in the loss of investor confidence in the reliability of our financial statements, which in turn could have a material and adverse effect on the trading price of our ADSs. Furthermore, we may need to incur additional costs and use additional management and other resources as our business and operations further expand or in an effort to remediate any significant control deficiencies that may be identified in the future.

We may be adversely affected by the outcome of the administrative proceedings brought by the SEC against five accounting firms in China.

Recently, the SEC commenced administrative proceedings under Rule 102(e) of its Rules of Practice and also under the Sarbanes-Oxley Act of 2002 against the Chinese affiliates of the big four accounting firms, including our auditors, and also against BDO China Dahua. The Rule 102(e) proceedings initiated by the SEC relate to these firms' failure to produce documents, including audit workpapers, to the request of the SEC pursuant to Section 106 of the Sarbanes-Oxley Act of 2002, as the auditors located in the PRC are not in a position lawfully to produce documents directly to the SEC because of restrictions under PRC law and specific directives issued by the China Securities Regulatory Commission. As the administrative proceedings are ongoing, it is impossible to determine their outcome or the consequences thereof to us. The issues raised by the proceedings are not specific to our auditors, or to us, but affect equally all audit firms based in China and all China-based businesses with securities listed in the United States. However, if the administrative judge were to find in favor of the SEC under the proceeding and depending upon the remedies sought by the SEC, these audit firms could be barred from practicing before the SEC. As a result, listed companies in the United States with major PRC operations may find it difficult or impossible to retain auditors in respect of their operations in the PRC, which may result in their delisting. Moreover, any negative news about the proceedings against these audit firms may erode investor confidence in China-based, United States listed companies and the market price of our ADSs may be adversely affected.

Our auditor, like other independent registered public accounting firms operating in China, is not permitted to be subject to inspection by Public Company Accounting Oversight Board, and consequently, investors may be deprived of the benefits of such inspection.

The independent registered public accounting firm that issues the audit reports included in this annual report, as an auditor of companies that are traded publicly in the United States and a firm registered with the Public Company Accounting Oversight Board (United States), or PCAOB, is required by the laws of the United States to undergo regular inspections by the PCAOB to assess its compliance with the laws of the United States and with applicable professional standards. Because our auditor is located in China, a jurisdiction where the PCAOB is currently unable to conduct inspections without the approval of the PRC authorities, our auditor, like other independent registered public accounting firms operating in China, is currently not inspected by the PCAOB.

Table of Contents

Inspections of other firms that the PCAOB has conducted outside of China have identified deficiencies in those firms' audit procedures and quality control procedures, and such deficiencies may be addressed as part of the inspection process to improve future audit quality. The inability of the PCAOB to conduct inspections of independent registered public accounting firms operating in China makes it more difficult to evaluate the effectiveness of our auditor's audit procedures or quality control procedures, and to the extent that such inspections might have facilitated improvements in our auditor's audit procedures and quality control procedures, investors may be deprived of such benefits.

Restrictions on currency exchange under Chinese laws may limit our ability to convert cash derived from our operating activities into foreign currencies and may materially and adversely affect the value of your investment.

Substantially all of our revenues and operating expenses are denominated in Renminbi. Under the relevant foreign exchange restrictions in China, conversion of the Renminbi is permitted, without the need for SAFE approval, for current account transactions, which includes dividends, trade, and service-related foreign exchange transactions. Conversion of the Renminbi for capital account transactions, which includes foreign direct investment and loans, is still subject to significant limitations and requires approvals from and registration with SAFE and other Chinese regulatory authorities. We cannot assure you that SAFE or other Chinese governmental authorities will not further limit, or eliminate, our ability to purchase foreign currencies in the future. Any existing and future restrictions on currency exchange in China may limit our ability to convert cash derived from our operating activities into foreign currencies to fund expenditures denominated in foreign currencies. If the foreign exchange restrictions in China prevent us from obtaining U.S. dollars or other foreign currencies as required, we may not be able to pay dividends in U.S. dollars or other foreign currencies to our shareholders, including holders of our ADSs. Furthermore, foreign exchange control in respect of the capital account transactions could affect our Chinese subsidiaries' ability to obtain foreign exchange or conversion into RMB through debt or equity financing, including by means of loans or capital contributions from us.

We face risks related to health epidemics and other outbreaks.

Our business could be adversely affected by the effects of swine flu, avian flu, Severe Acute Respiratory Syndrome, or SARS or other epidemics or outbreaks. China reported a number of cases of SARS in April 2004. In 2006, 2007 and 2008, there were reports on the occurrences of avian flu in various parts of China, including a few confirmed human cases and deaths. In April 2009, an outbreak of swine flu occurred in Mexico and the United States and human cases of swine flu were discovered in China and Hong Kong. In April 2013, there were reports on the occurrences of avian flu in various parts of China, including a number of confirmed human cases and deaths. Any prolonged occurrence or recurrence of swine flu, avian flu, SARS or other adverse public health developments in China or any of the major markets in which we do business may have a material adverse effect on our business and operations. These could include our ability to deliver our products within or outside of China, as well as temporary closure of our manufacturing facilities, or our customers' facilities, leading to delayed or cancelled orders. Any severe travel or shipment restrictions and closures would severely disrupt our operations and adversely affect our business and results of operations.

Risks Relating to Our ADSs

The trading prices of our ADSs have been and may continue to be volatile, which could result in substantial losses to investors.

The closing trading prices of our ADSs ranged from \$3.70 to \$20.05 in 2012, as retroactively adjusted to reflect the ADS to ordinary share ratio change that took effect on December 21, 2012, and are likely to remain volatile in the future and could fluctuate widely due to factors beyond our control. This may happen because of broad market and industry factors, like the performance and fluctuation of the market prices of other companies with business operations located mainly in China that have listed their securities in the United States. A number of China-based companies, including many solar energy companies, have listed their securities on U.S. stock exchanges. The securities of some of these companies have experienced significant volatility, including price declines in connection with their initial public offerings. The trading performances of these Chinese companies' securities after their offerings may affect the attitudes of investors toward Chinese companies listed in the United States in general and consequently may impact the trading performance of our ADSs, regardless of our actual operating performance.

Table of Contents

In addition to market and industry factors, the price and trading volume for our ADSs may be highly volatile for factors specific to our own operations, including the following:

variations in our revenues, earnings and cash flow;

announcements of our new investments, acquisitions, strategic partnerships, or joint ventures;

announcements of new products and expansions by us or our competitors;

announcements of sale of existing business segments;

fluctuations in market prices of or demand for our products;

changes in financial estimates by securities analysts;

changes in the ratio of ADS vs. common shares

additions or departures of key personnel; and

potential litigation or regulatory investigations.

Any of these factors may result in large and sudden changes in the volume and price at which our ADSs will trade. We cannot assure you that these factors will not occur in the future.

The sale or availability for sale of substantial amounts of our ADSs could adversely affect their market price.

Sales of substantial amounts of our ADSs in the public market or the perception that these sales could occur, could adversely affect the market price of our ADSs and could materially impair our ability to raise capital through equity offerings in the future. Our ADSs are freely tradable without restriction or further registration under the U.S. Securities Act of 1933, as amended, or the Securities Act, subject to the restrictions in Rule 144 and Rule 701 under the Securities Act. In addition, market sales of securities held by our significant shareholders or any other shareholder or the availability of these securities for future sale may adversely affect the market price of our ADSs.

Our Third Amended and Restated Memorandum and Articles of Association contain anti-takeover provisions that could have a material adverse effect on the rights of holders of our ordinary shares and ADSs.

Our Third Amended and Restated Memorandum and Articles of Association contain provisions to limit the ability of others to acquire control of our company or cause us to engage in change-of-control transactions. These provisions could have the effect of depriving our shareholders of an opportunity to sell their shares at a premium over prevailing market prices by discouraging third parties from seeking to obtain control of our company in a tender offer or similar transaction.

You may face difficulties in protecting your interests, and your ability to protect your rights through U.S. courts may be limited, because we are incorporated under Cayman Islands law.

Edgar Filing: DAQO NEW ENERGY CORP. - Form 20-F

We are an exempted company incorporated under the laws of the Cayman Islands. Our corporate affairs are governed by our memorandum and articles of association, as amended from time to time, the Companies Law of the Cayman Islands (2012 Revision) and the common law of the Cayman Islands. The rights of shareholders to take actions against the directors, actions by minority shareholders and the fiduciary responsibilities of our directors to us under Cayman Islands law are to a large extent governed by the common law of the Cayman Islands. The common law of the Cayman Islands is derived in part from comparatively limited judicial precedent in the Cayman Islands as well as from the common law of England, the decisions of whose courts are of persuasive authority, but are not binding, on a court in the Cayman Islands. The rights of our shareholders and the fiduciary responsibilities of our directors under Cayman Islands law are not as clearly established as they would be under statutes or judicial precedent in some jurisdictions in the United States. In particular, the Cayman Islands has a less developed body of securities laws than the United States. Some U.S. states, such as Delaware, have more fully developed and judicially interpreted bodies of corporate law than the Cayman Islands. In addition, Cayman Islands companies may not have standing to initiate a shareholder derivative action in a federal court of the United States.

The Cayman Islands courts are also unlikely:

to recognize or enforce against us judgments of courts of the United States based on certain civil liability provisions of U.S. securities laws; and

to impose liabilities against us, in original actions brought in the Cayman Islands, based on certain civil liability provisions of U.S. securities laws that are penal in nature.

Table of Contents

There is no statutory recognition in the Cayman Islands of judgments obtained in the United States, although the courts of the Cayman Islands will in certain circumstances recognize and enforce a non-penal judgment of a foreign court of competent jurisdiction without retrial on the merits.

As a result of all of the above, public shareholders may have more difficulty in protecting their interests in the face of actions taken by management, members of the board of directors or controlling shareholders than they would as public shareholders of a company incorporated in the United States.

Certain judgments obtained against us by our shareholders may not be enforceable.

We are a Cayman Islands company and all of our assets are located outside of the United States. Substantially all of our current operations are conducted in the China. In addition, a majority of our current directors and officers are nationals and residents of countries other than the United States. Substantially all of the assets of these persons are located outside the United States. As a result, it may be difficult or impossible for you to bring an action against us or against these individuals in the United States in the event that you believe that your rights have been infringed under the United States federal securities laws or otherwise. Even if you are successful in bringing an action of this kind, the laws of the Cayman Islands and of China may render you unable to enforce a judgment against our assets or the assets of our directors and officers.

The voting rights of holders of ADSs are limited by the terms of the deposit agreement, and you may not be able to exercise your right to vote your ordinary shares.

As a holder of our ADSs, you will only be able to exercise the voting rights with respect to the underlying ordinary shares in accordance with the provisions of the deposit agreement. Under the deposit agreement, you must vote by giving voting instructions to the depository. Upon receipt of your voting instructions, the depository will vote the underlying ordinary shares in accordance with these instructions. You will not be able to directly exercise your right to vote with respect to the underlying shares unless you withdraw the shares. Under our Third Amended and Restated Memorandum and Articles of Association, the minimum notice period required for convening a general meeting is seven days. When a general meeting is convened, you may not receive sufficient advance notice to withdraw the shares underlying your ADSs to allow you to vote with respect to any specific matter. If we ask for your instructions, the depository will notify you of the upcoming vote and will arrange to deliver our voting materials to you. We cannot assure you that you will receive the voting materials in time to ensure that you can instruct the depository to vote your shares. In addition, the depository and its agents are not responsible for failing to carry out voting instructions or for their manner of carrying out your voting instructions. This means that you may not be able to exercise your right to vote and you may have no legal remedy if the shares underlying your ADSs are not voted as you requested.

The depository for our ADSs will give us a discretionary proxy to vote our ordinary shares underlying your ADSs if you do not vote at shareholders meetings, except in limited circumstances, which could adversely affect your interests.

Under the deposit agreement for the ADSs, if you do not vote, the depository will give us a discretionary proxy to vote our ordinary shares underlying your ADSs at shareholders meetings unless:

we have failed to timely provide the depository with notice of meeting and related voting materials;

we have instructed the depository that we do not wish a discretionary proxy to be given;

we have informed the depository that there is substantial opposition as to a matter to be voted on at the meeting;

a matter to be voted on at the meeting would have a material adverse impact on shareholders; or

the voting at the meeting is to be made by a show of hands.

Edgar Filing: DAQO NEW ENERGY CORP. - Form 20-F

The effect of this discretionary proxy is that if you do not vote at shareholders' meetings, you cannot prevent our ordinary shares underlying your ADSs from being voted, except under the circumstances described above. This may make it more difficult for shareholders to influence the management of our company. Holders of our ordinary shares are not subject to this discretionary proxy.

Table of Contents

You may not receive dividends or other distributions on our ordinary shares and you may not receive any value for them, if it is illegal or impractical to make them available to you.

The depositary of our ADSs has agreed to pay to you the cash dividends or other distributions it or the custodian receives on ordinary shares underlying our ADSs, after deducting its fees and expenses. You will receive these distributions in proportion to the number of ordinary shares your ADSs represent. However, the depositary is not responsible if it decides that it is unlawful or impractical to make a distribution available to any holders of ADSs. For example, it would be unlawful to make a distribution to a holder of ADSs if it consists of securities that require registration under the Securities Act but that are not properly registered or distributed under an applicable exemption from registration. The depositary may also determine that it is not feasible to distribute certain property through the mail. Additionally, the value of certain distributions may be less than the cost of mailing them. In these cases, the depositary may determine not to distribute such property. We have no obligation to register under U.S. securities laws any ADSs, ordinary shares, rights or other securities received through such distributions. We also have no obligation to take any other action to permit the distribution of ADSs, ordinary shares, rights or anything else to holders of ADSs. This means that you may not receive distributions we make on our ordinary shares or any value for them if it is illegal or impractical for us to make them available to you. These restrictions may cause a material decline in the value of our ADSs.

You may not be able to participate in rights offerings and may experience dilution of your holdings.

We may, from time to time, distribute rights to our shareholders, including rights to acquire securities. Under the deposit agreement, the depositary will not distribute rights to holders of ADSs unless the distribution and sale of rights and the securities to which these rights relate are either exempt from registration under the Securities Act with respect to all holders of ADSs, or are registered under the provisions of the Securities Act. The depositary may, but is not required to, attempt to sell these undistributed rights to third parties, and may allow the rights to lapse. We may be unable to establish an exemption from registration under the Securities Act, and we are under no obligation to file a registration statement with respect to these rights or underlying securities or to endeavor to have a registration statement declared effective. Accordingly, holders of ADSs may be unable to participate in our rights offerings and may experience dilution of their holdings as a result.

You may be subject to limitations on transfer of your ADSs.

Your ADSs are transferable on the books of the depositary. However, the depositary may close its books at any time or from time to time when it deems expedient in connection with the performance of its duties. The depositary may close its books from time to time for a number of reasons, including in connection with corporate events such as a rights offering, during which time the depositary needs to maintain an exact number of ADS holders on its books for a specified period. The depositary may also close its books in emergencies, and on weekends and public holidays. The depositary may refuse to deliver, transfer or register transfers of our ADSs generally when our share register or the books of the depositary are closed, or at any time if we or the depositary thinks it is advisable to do so because of any requirement of law or of any government or governmental body, or under any provision of the deposit agreement, or for any other reason.

The Company may be classified as a passive foreign investment company or PFIC, for U.S. federal income tax purposes, which could subject U.S. investors in our ADSs or ordinary shares to adverse tax consequences.

A non-United States corporation, such as our company, will be classified as a passive foreign investment company (or a PFIC), for United States federal income tax purposes, for any taxable year if either (i) 75% or more of its gross income consists of certain types of passive income or (ii) 50% or more of the value of its assets (determined on the basis of a quarterly average) produce or are held for the production of passive income. We do not believe that we were a PFIC, for United States federal income tax purposes, for the taxable year ended December 31, 2012. Although we do not currently expect that our assets or activities will change in a manner that would cause us to become a PFIC for our current taxable year or the foreseeable future, there can be no assurance our business plans will not change in a manner that will affect our PFIC status. In addition, because the value of our assets for purposes of the PFIC test will generally be determined by reference to the market price of our ADSs and ordinary shares, fluctuations in the market price of our ADSs and ordinary shares may increase the risk of us becoming a PFIC. Because there are uncertainties in the application of the relevant rules and PFIC status is a fact-intensive determination made on an annual basis, no assurance can be given that we are not or will not become classified as a PFIC.

Table of Contents

If we were to be classified as a PFIC in any taxable year, a U.S. Holder (as defined in Item 10. Additional Information E. Taxation Material United States Federal Income Tax Considerations) would be subject to special rules generally intended to reduce or eliminate any benefits from the deferral of United States federal income tax that a U.S. Holder could derive from investing in a non-United States corporation that does not distribute all of its earnings on a current basis. Further, if we are classified as a PFIC for any year during which a U.S. Holder holds our ADSs or ordinary shares, we generally will continue to be treated as a PFIC for all succeeding years during which such U.S. Holder holds our ADSs or ordinary shares. See Item 10. Additional Information E. Taxation Material United States Federal Income Tax Considerations Passive Foreign Investment Company Considerations.

ITEM 4. INFORMATION ON THE COMPANY

A. History and Development of the Company

Our company was incorporated in Cayman Islands as Mega Stand International Limited in November 2007. We changed our corporate name to Daqo New Energy Corp. in August 2009.

In 2008, we established Chongqing Daqo as our wholly owned operating subsidiary in China. Through Chongqing Daqo, we focus primarily on the manufacture and sale of polysilicon and have expanded into the wafer manufacturing. In addition to Chongqing Daqo, we established Nanjing Daqo New Energy Co., Ltd., or Nanjing Daqo, in 2007 in China, through which we conducted our module manufacturing business. In 2009, we established our wholly owned subsidiary Daqo Solar Energy North America, or Daqo North America, in California to promote our products in North America. In 2011, we established a wholly owned subsidiary, Daqo New Energy Holdings (Canada) Ltd., or Daqo Canada, to expand our operations in Canada. In 2011, to expand our polysilicon manufacture capacities, we established another wholly owned subsidiary in China named Xinjiang Daqo New Energy Co., Ltd.

Daqo Group established Daqo New Material in 2006 in China. Although all of Daqo Group's equity interest holders also beneficially own shares of Daqo Cayman, Daqo Group does not have any shareholding in our company. As of the date of this annual report, holders of equity interests in Daqo Group in aggregate beneficially own 57.84% of the outstanding ordinary shares of our company. Daqo New Material's activities included acquiring land use rights and constructing certain production infrastructure prior to the incorporation of our company and Chongqing Daqo. Subsequent to the establishment of Chongqing Daqo, in July 2008, Chongqing Daqo entered into a lease agreement with Daqo New Material, which was amended and restated in August 2009 with retrospective effect from January 1, 2009, to rent Daqo New Material's land, production infrastructure, machinery and equipment for its polysilicon production of Phase 1a. Under the amended and restated lease agreement, the lease period is from January 1, 2009 to December 31, 2013, with a monthly lease payment at a fixed amount. One month before the expiry of the lease period, Chongqing Daqo has the option to renew the lease on the same terms and conditions for an additional five-year period. Furthermore, the amended and restated lease agreement provides that Chongqing Daqo has the option to purchase, or to designate any person to purchase, the leased assets at the then fair value at any time during the lease period or within one year following the lease period, if permitted by the PRC laws and regulations. Under current PRC laws and regulations, Chongqing Daqo needs to obtain governmental approval in China to proceed with the purchase, and given the application requirements we do not think it is currently practical for us to obtain such approval. If Daqo New Material desires to transfer the ownership of the leased assets to a third party, Chongqing Daqo has the right of first refusal to acquire the leased assets under the same conditions, and if the leased assets are transferred to a third party, the lease agreement will remain effective and enforceable against the new owner until its expiry. Under Financial Accounting Standards Board Accounting Standards Codification 810-10-15, Variable Interest Entities, we are deemed to be Daqo New Material's primary beneficiary for accounting purposes and Daqo New Material as a variable interest entity has been consolidated starting from July 1, 2008. Therefore, we have consolidated the financial results of Daqo New Material into our financial statements since July 1, 2008. As of December 31, 2012, Daqo Group's equity interest in Daqo New Material amounted to \$138.8 million, which was consolidated and reflected as a noncontrolling interest in the balance sheet of our company pursuant to U.S. GAAP. Even though we do not directly or indirectly hold any equity interests in Daqo New Material, under U.S. GAAP, Daqo New Material has been deemed to be our predecessor business from November 16, 2006 through June 30, 2008.

Table of Contents

Under a non-competition agreement with us, Daqo Group has agreed not to engage in the business of manufacturing, marketing or distributing polysilicon or any other solar power products anywhere in the world or compete in any manner with our businesses without our consent for an indefinite term. Such related party transactions are subject to our audit committee's review and approval. Under the non-competition agreement, we, through Daqo Cayman and Chongqing Daqo, are entitled to seek temporary restraining orders, injunctions or other equitable relief, in addition to monetary remedies specified in the agreement, if Daqo Group breaches its non-competition obligations. With the approval of our audit committee, we gave our consent to Daqo Group to enter the photovoltaic cell manufacturing business in China. Daqo Group incorporated the wholly owned subsidiary, Zhenjiang Daqo Solar Co., Ltd., or Zhenjiang Daqo, which started commercial production of photovoltaic cell in 2011.

On October 7, 2010, we listed our ADSs, each representing five ordinary shares of Daqo New Energy Corp., on the New York Stock Exchange under the symbol "DQ" in connection with an initial public offering. We issued a total of 9,200,000 ADSs at \$9.50 per ADS in connection with our initial public offering.

In February 2011, we incorporated a wholly owned subsidiary, Xinjiang Daqo, in Shihezi Economic Development Area in Xinjiang Autonomous Region, China, to build our Phase 2 polysilicon production facilities. We finished construction of our Phase 2 polysilicon facilities in September 2012 and have started pilot production at these facilities.

In April 2011, we incorporated a wholly owned subsidiary, Daqo Canada, to expand our operations in North America. Through Daqo Canada, we set up a joint venture with JNE Solar Inc., a party unrelated to us prior to this transaction, in Hamilton, Ontario. This joint venture was terminated in April 2012. Currently, Daqo Canada does not have any material operation, assets or liabilities.

In September 2012, we sold 100% equity interests of our module business to Daqo Group for a consideration of \$9.9 million. On December 21, 2012, we effected a change of the ADS to ordinary share ratio from one ADS representing five ordinary shares to one ADS representing 25 ordinary shares. The ratio change has the same effect as a 1-for-5 reverse ADS split.

Our principal executive offices are located at 666 Longdu Avenue, Wanzhou, Chongqing 404000, PRC, and our telephone number at that location is (86-23) 6486-6666. Our registered office in the Cayman Islands is located at the offices of International Corporation Services Ltd., P.O. Box 472, 2nd Floor Harbor Place, Grand Cayman KY1-1106, Cayman Islands. Our agent for service of process in the United States is Law Debenture Corporate Services Inc.

See Item 5. Operating and Financial Review and Prospects B. Liquidity and Capital Resources Capital Expenditures for a discussion of our capital expenditures.

B. Business Overview

Photovoltaics is one of the proven and most rapidly growing renewable energy sources in the world. Energy from the sun is converted into electricity primarily through the photovoltaic effect and, to a lesser extent, through concentrated solar thermal technologies.

Table of Contents

We are a leading polysilicon manufacturer based in China. We have expanded to the downstream photovoltaic manufacturing businesses to establish facilities for wafer manufacturing. Our current wafer manufacturing annual capacity is 125MW. The following diagram illustrates the value chain for the manufacture of crystalline-silicon based photovoltaic products:

We manufacture and sell high-quality polysilicon to photovoltaic product manufacturers, who further process our polysilicon into ingots, wafers, cells and modules for solar solutions. We improve our production efficiency and increase our output through technological improvements, adoption of process innovation and refinement as well as equipment enhancement. As a result of these initiatives, we plan to increase our annual production capacity to 9,300 MT of polysilicon by the end of 2013 from 4,300 MT in 2012 by fully ramping-up commercial production at our Phase 2 production line in Xinjiang and improving our production efficiency. The actual production volume may exceed the production capacity due to operational improvements we may implement at our facilities in response to market conditions.

Our current operations are based in Chongqing and Xinjiang, which are in the western area of China. The cost of doing business in western China is generally lower than the coastal areas in China. Because of our strategic location, we experience advantages in electricity, raw material and labor costs over our competitors that are based in developed countries or in the coastal areas of China. We utilize the chemical vapor deposition process, or the modified Siemens process, to produce polysilicon, and have fully implemented the closed loop system to produce high-quality polysilicon cost-effectively. Compared to the open loop system that many of our China-based competitors use, our closed loop system uses raw materials more efficiently, requires less electricity and causes less pollution.

In September 2012, we finished construction of our Phase 2 polysilicon facilities in Shihezi, Xinjiang Uyghur Autonomous Region. We started pilot production in September 2012 and have successfully reached our targets for both capacity and cost structure by the end of March 2013.

We impose rigorous quality control standards at various stages of our manufacturing process. We systematically test raw materials from our suppliers and test our inputs at each stage of our manufacturing process to ensure that they meet all technical specifications. With our strict quality control measures in our manufacturing and facility construction processes, we are able to produce high-quality polysilicon consistently at our Phase 1 and Phase 2 facilities. In 2012, approximately 97.4% of our polysilicon met the solar grade quality standard, approximately 94.9% of our polysilicon met the highest specification of the solar grade quality standard, and approximately 89.1% of our polysilicon met the electronic grade quality standard in China.

We achieved substantial growth since we commenced commercial production of polysilicon in July 2008, though we experienced a significant downturn in terms of revenue and net income in 2012. We produced 3,771 MT, 4,524 MT and 3,349 MT⁽¹⁾ of polysilicon and sold 3,650, 3,947 MT and 3,262 MT⁽²⁾ in 2010, 2011 and 2012, respectively. We generated revenues from continuing operations of \$252.8 million, \$232.2 million and \$86.9 million in 2010, 2011 and 2012, respectively. We achieved net income attributable to Daqo New Energy Corp. shareholders of \$68.6 million and \$33.3 million in 2010 and 2011, respectively. We incurred a net loss attributable to Daqo New Energy Corp. shareholders of \$111.9 million in 2012.

We currently sell polysilicon to China-based photovoltaic product manufacturers. The majority of our sales, are made under framework contracts, with the prices to be determined at the time when specific sales orders are made. As of December 31, 2012, our major photovoltaic product customers included operating entities of Yingli Green Energy, Solargiga, and Jiangxi Sornid.

We commenced commercial production of wafers using our own polysilicon in July 2011. As of December 31, 2012, our annual wafer production capacity is 125MW. In addition to our wafer sales, since the second quarter of 2012, we started to provide multi-crystalline ingot and block manufacturing outsourcing services to our customers. In May 2010, we commenced commercial production of modules. We sold all of our module facilities in September 2012 to focus on our core business of polysilicon and wafer productions. The operation of our downstream photovoltaic product manufacturing business involves risks and uncertainties, such as higher cost, lack of experience, financing, construction and operational uncertainties, potential competition and regulatory risks. See Item 3. Key Information D. Risk Factors Risks Relating to Our Business for details.

Note:

- (1) Excluding 617 MT polysilicon produced in Xinjiang facilities during the pilot production period.
- (2) Excluding 323 MT polysilicon sold from Xinjiang facilities during the pilot production period.

Table of Contents**Quarterly sales volume table for polysilicon and wafer in 2012.**

Sales Volume	First Quarter	Second Quarter	Third Quarter	Fourth Quarter	FY 2012
Polysilicon (MT)	964	1,028	1,001	269 ⁽¹⁾	3,262 ⁽¹⁾
Wafer (MW)	23.4	11.2	3.1	4.8	42.5
Wafer OEM (MW)			2.8		2.8
Ingot and Block-OEM (MW)		209	150	36.5	395.5

Notes:

(1) Excluding 323 MT polysilicon sold from Xinjiang facilities during the pilot production period.

Our Products

We manufacture and sell high-purity polysilicon to photovoltaic product manufacturers, who further process the polysilicon into ingots, wafers, cells and modules for solar power solutions. We offer ready-to-use polysilicon, packaged to meet crucible stacking, pulling, and solidification needs. In addition, we also offer high-quality wafers through our downstream photovoltaic product manufacturing business.

In 2010, we sold a small amount of wafers through tolling arrangements with third party wafer manufacturers, pursuant to which we supplied polysilicon to them in exchange for wafers. We commenced commercial production of multi-crystalline wafers in July 2011 at our Phase 1a wafer production facilities, which have a current production capacity of 125MW. To meet the currently prevailing market demands, we focus on producing multi-crystalline wafers with dimension of 156 millimeters x 156 millimeters and thickness of 200 microns.

Manufacturing Process***Polysilicon******Modified Siemens Process***

Three main technologies are used in polysilicon production: the Siemens process, the fluidized bed reactor process and the newly developed upgraded metallurgical grade silicon process. In addition to the three main technologies, Tokuyama has developed a manufacturing polysilicon technology called the vapor-to-liquid deposition process. The Siemens process is an existing and well proven process technology predominantly used in high purity silicon feedstock production in the solar industry. The other three new technologies, the fluidized bed reactor process, the upgrading metallurgical grade silicon process and the vapor-to-liquid deposition, have the potential for lower cost production but are relatively new and less proven.

We use the modified Siemens process to produce polysilicon. We have been licensed by Poly Engineering S.r.l, or Poly Engineering, an industry recognized polysilicon production technology consulting firm based in Europe, with the exclusive rights in China, Taiwan, Hong Kong and Macau to utilize a modified Siemens process to produce polysilicon in our facilities. We further developed our manufacturing process by applying the modified Siemens process licensed from Poly Engineering.

Table of Contents

The modified Siemens process includes three distinct steps: (1) TCS production; (2) distillation; and (3) deposition. In addition, we recover and recycle exhaust gas throughout the process in our closed loop manufacturing system. The diagram below describes our general manufacturing process:

TCS production. The first step of the manufacturing process is to produce TCS from two widely available industrial raw materials: MG-Si and liquid chlorine. We generate TCS in-house through our integrated manufacturing process. TCS production includes two steps: hydrogen chloride synthesis, or HCl synthesis, and TCS synthesis. At the HCl synthesis step, liquid chlorine from a chlorine tank is vaporized to chlorine gas and sent to the HCl synthesis furnace, where it reacts with hydrogen to generate HCl. At the TCS synthesis step that follows, MG-Si powder is then sent to a TCS furnace and reacted with HCl gas. The temperature in the TCS synthesis furnace is maintained at 280–320°C to facilitate the TCS reaction.

Distillation. Distillation is a method of separating mixtures based on differences in their boiling points. Raw TCS is purified through distillation to produce high purity TCS feedstock. The difference in boiling points of TCS and impurities such as boron, phosphorous, and metal halides allow for purification of TCS. It is critical to remove these impurities in this process to eliminate the possible causes of low performance in solar cells. In the distillation process, all by-product chemicals from vent gases are separated and further purified before being sent back to our production areas.

Deposition. The purified TCS from the distillation process is vaporized, mixed with hydrogen gas, and then fed into the deposition reactor. The mixed gas passes over heated silicon slim rods inside the deposition reactor. In the reactor, multiple pair slim rods are heated up to approximately 1,100°C and high purity silicon is deposited on the rods surface. The constant feeding of TCS and hydrogen gas allows for continuous silicon deposition until 150–200mm in diameter is achieved. At this point the deposition cycle is completed and the ultra pure silicon is harvested.

Closed loop manufacturing system

We have implemented the modified Siemens process in a completely closed loop system. The closed loop system is an advanced polysilicon manufacturing process widely used by leading international polysilicon manufacturers. Compared to the open loop system, the closed loop system uses raw materials more efficiently, requires less electricity and produces less pollution. Manufacturing polysilicon generates an exhaust gas primarily consisting of hydrogen, HCl, and chlorosilanes. Using the vent gas recovery system, which combines condensers, distillation towers, adsorption beds and compressors, we are able to separate the exhaust stream from our manufacturing process into individual components that can be reused after further purification. For instance, a by-product of the deposition step is TET, which is a toxic chemical. Through a separate hydrogenation process, we convert TET to TCS, so that we eliminate the costs related to TET disposal and reduce operational risks of TET treatment. Mixed chlorosilanes are recovered as a liquid stream suitable for separation where we can directly reuse TCS. Anhydrous HCl is recovered with high purity, suitable for use in TCS production. Recovered hydrogen typically contains contaminants of fewer than 10 parts per million and is recycled to the deposition reactors. Recycling significantly reduces costs related to waste disposal and the amount of raw materials we need to purchase for production.

Table of Contents

Although the closed loop system has lower manufacturing costs than the open loop system, manufacturing facilities based on the open loop system can be built within a shorter period time with less initial capital investment for equipment. Most of polysilicon manufacturing facilities in China were traditionally built based on the open loop system. However, as the polysilicon market may face downward pricing pressure from time to time, we believe that an increasing number of China-based manufacturers are converting their open loop system to the closed loop system and some of them have completed such conversion. The full implementation of the closed loop system by other polysilicon manufacturers has diminished our competitive advantages provided by this system. Nevertheless, in August, 2011, Chongqing Daqo entered into a Technology License and Transfer Agreement with GTAT Corporation, a Delaware company, under which, GTAT granted us a license to use its Hydrochlorination TCS Production Technology and Chlorosilane Recovery/Waste Neutralization Technology, which will help expand our manufacturing capacity and significantly reduce electricity consumption to reduce our production cost to reach a more competitive level.

To achieve high efficiency in our manufacturing process, we have also installed a distribution control system and a thermal energy recycling mechanism. The distribution control system enables tight quality control, reduces process related variations, and improves productivity. Our thermal energy recycling system allocates heat generated from our deposition reactors and hydrogenation reactors to many other production areas, such as distillation facilities for TCS purification and our refrigeration station to support a large number of condensers.

Wafers

We conducted our wafer business through tolling arrangements with third party wafer manufacturers in 2009 and 2010. In July 2011, we commenced commercial production of multi-crystalline silicon wafers at our Phase 1a wafer production facilities, which have a current production capacity of 125 MW. Our in-house wafer production is cost competitive due to relatively lower cost of power and labor and our access to high quality polysilicon feedstock and the integration of our polysilicon and wafer productions at facilities adjacent to each other. We believe that our in-house wafer production will help lower our costs and improve quality consistency compared to outsourcing to third party wafer manufacturers through tolling arrangements.

The manufacturing process of wafers typically consists of two major steps: ingot preparation and wafering. Multi-crystalline ingots are prepared by directional solidification in a casting furnace. Silicon ingots will then be shaped to the required sizes and sliced to wafers by wire saws.

Manufacturing Capacity

The following table sets forth our major installed approximate annual production capacity objectives as of the dates indicated and includes the expected date of initial commercial operation and fully ramped-up production of each expansion phase:

	Approximate Annual Production Capacity	Construction Period		Commercial Production Commencement	Fully Ramped-up Production
Polysilicon:					
Phase 1a facilities ⁽¹⁾	1,500MT	June 2007	May 2008	July 2008	March 2009
Phase 1b facilities ⁽¹⁾	1,800MT	May 2008	May 2009	December 2009	January 2010
Capacity enhancement of Phase 1 facilities ⁽¹⁾	1,000MT	December 2010		December 2010	December 2010
Phase 2 facilities ⁽²⁾	5,000MT	Second Quarter 2011		First Quarter	First Quarter
		September 2012		2013	2013
Wafer: ⁽¹⁾					
Phase 1a facilities	125MW	July 2010	February 2011	July 2011	November 2011
Phase 1b facilities	125MW	February 2011	September 2011	Pending ⁽⁴⁾	Pending ⁽⁴⁾

Table of Contents

Notes:

- (1) The facilities are located in Chongqing.
- (2) The facilities are located in Xinjiang.
- (3) All equipment has been purchased. The current plan is to commence production when the wafer market improves. It usually takes 1 to 2 months to complete the installation and related testing.

Our annual polysilicon production capacity was at 4,300 MT in 2012. We expect to further ramp up our production capacity to 9,300 MT by the end of 2013.

Our capacity expansion plan is preliminary and subject to risks and uncertainties that may be out of our control. See Item 3. Key Information D. Risk Factors Risks Relating to Our Business Our future success depends substantially on our ability to significantly expand our polysilicon production capacity and output, which exposes us to a number of risks and uncertainties and Item 3. Key Information D. Risk Factors Risks Relating to Our Business If we are unable to manage our expansion effectively, our business and financial results may be adversely affected.

Materials and Inputs Used in Production

Polysilicon

Raw materials required for our polysilicon manufacturing process primarily include metallurgical grade silicon, which is silicon of 95% to 99% purity, and liquid chlorine, two widely available industrial raw materials used in our in-house production of TCS, electricity and other utilities, and other significant inputs for production, such as argon gas, caustic soda and graphite parts.

The costs of electricity are significant in the production of polysilicon. The electricity costs in Chongqing are much lower than those in coastal areas in China and those in developed countries due to Chongqing's abundant hydroelectric resources. The costs of electricity in Xinjiang are even around 50% lower than that in Chongqing due to Xinjiang's abundant coal resources. We also use other utilities, such as steam, water and natural gas, for our manufacturing process. Steam supply is important to the production of polysilicon. We use both a local supplier and our in-house capabilities to produce steam.

Wafers

Wafer manufacturing uses solar grade polysilicon as the primary raw material and consumables such as crucibles, wires and slurry. Our high quality polysilicon is a crucial factor that will enable us to provide high quality silicon wafers to customers. We intend to utilize our in-house solar grade polysilicon for high efficiency wafer production.

Equipment

The major polysilicon production equipment includes hydroelectrolysis devices, hydrochlorination synthesis furnaces, TCS synthesis furnaces, distillation towers, polysilicon deposition reactors, hydrogenation reactors, exhaust gas recovery units and distribution control systems. The major wafer production equipment includes crystal growing furnaces, crucible coating machines, squarers, wire saws, wet benches and testing tools.

We have close relationships with several of the world's leading equipment manufacturers and work closely with selected equipment manufacturers to develop and build our production lines. In addition, we developed technical specifications for the design of our power supply systems and reactors and have engaged manufacturers to construct the equipment in accordance with our specifications. Our engineers work closely with our equipment suppliers to design our production facilities. Furthermore, to lower costs, we have purchased and will continue to purchase equipment that can be appropriately designed and manufactured by China-based suppliers. Our technical team is responsible for overseeing the installation of our manufacturing lines to optimize the interaction between the various individual components of the entire production process. They work together with our equipment suppliers' technical teams on site at the time of installation.

Table of Contents

Quality Assurance

We apply our quality control system at each stage of our manufacturing process, from raw materials procurement to production and delivery, in order to ensure a consistent quality of our products. We systematically inspect raw materials from our suppliers, such as MG-Si, liquid chlorine and various consumables for our polysilicon business and photovoltaic cells for our module business. We also test our inputs in each stage of our production process to ensure the inputs meet all technical specifications.

We sample each lot of polysilicon harvested from the deposition reactors and keep the samples for product quality tracking purpose. We also set up a product tracking system to trace back all shipped products to the samples we keep and to our database, which contains detailed information of each shipment. We received the ISO 9001:2000 certification for our quality assurance system for production of polysilicon, which we believe demonstrates our technological capabilities and inspires customer confidence. In addition, in 2009, Chongqing Science and Technology Commission issued a three-year certificate to recognize our polysilicon as a high and new technology product.

For our wafer production, we inspect all critical incoming materials, such as feedstock silicon, crucible, slurry and wire to ensure they meet our wafer production requirement. Through manufacturing process, technical parameters such as minority lifetime, resistivity, geometry dimension, surface appearance will be checked at various point of workstation as part of in-process quality control. As final product, each wafer is sent to an automatic inspection machine to be inspected against our product technical specifications.

In order to facilitate our production of photovoltaic products and ensure the quality of the finished product, we conduct analysis for raw materials, in-process products and finished products and monitor the environmental impact and safety throughout the production process.

Customers and Sales

We currently sell polysilicon and wafers to China-based photovoltaic product manufacturers. Our polysilicon and wafer customers are mainly China-based photovoltaic companies. Our major customers include operating entities of Yingli Green Energy, Solargiga and Jiangxi Sornid. We sell a substantial portion of our photovoltaic products to a limited number of customers. Our top three customers in aggregate accounted for 35.1%, 35.2% and 40.9% of our total revenues in 2010, 2011 and 2012, respectively.

The majority of our polysilicon sales are made under framework contracts. The framework contracts typically provide binding terms for the sales volumes of our polysilicon. The pricing terms are typically agreed upon between us and our customers based on the prevailing market prices when specific sales orders are made. We currently sell all of our wafer product on a spot pricing basis.

We have established nationwide marketing capability through our sales team in China. Each member of our sales team is dedicated to a particular region. Our sales team attends domestic and international industrial conferences and trade fairs and organizes advertising and public relations events. Our sales and marketing team works closely with both our research and development team and our production team to coordinate our ongoing supply and demand planning.

Research and Development

We believe that the continual development of our technology will be vital to maintaining our long-term competitiveness. We have one of the leading research and development teams among polysilicon manufacturers in China. Our research and development team consists of 60 experienced researchers and engineers. Our senior management team spearheads our research and development efforts and sets strategic directions for the advancement of our products and production processes, focusing on efforts to improve product quality, reduce manufacturing costs and broaden our product markets. In 2012, we completed 29 research and technology or process improvement projects to enhance our polysilicon and wafer manufacturing processes, and filed 7 patents to State Intellectual Property Office of PRC.

Table of Contents

Intellectual Property

Our intellectual property is an essential element of our business. We rely on patents, copyrights, trademarks, trade secrets and other intellectual property laws, as well as non-competition and confidentiality agreements with our employees, business partners and others, to protect our intellectual property rights.

As of the date of this annual report, we hold 16 patents and have additional 16 pending patent applications covering different aspects of the polysilicon manufacturing process. We also rely heavily on a combination of proprietary process engineering, trade secrets and employee contractual protections to establish and protect our intellectual property, as we believe that many crucial elements of our production processes involve proprietary know-how, technology or data that are not covered by patents or patent applications, including technical processes, equipment designs, algorithms and procedures. We have taken security measures to protect these elements. All of our research and development personnel have entered into confidentiality and proprietary information agreements with us. These agreements address intellectual property protection issues and require our employees to assign to us all of the inventions, designs and technologies that they develop when primarily utilizing our resources or when performing their duties during their employment.

While we continue to develop and pursue patent protection for our own technologies, we expect to continue implementing third party license arrangements on certain key aspects of our operation. Pursuant to a technology license and engineering service agreement between Chongqing Daqo and Poly Engineering dated June 15, 2008, as amended in June 2010, Poly Engineering granted a license to Chongqing Daqo with the rights to utilize certain know-how related to a modified Siemens process to produce polysilicon in Chongqing Daqo's facilities. The license is perpetual and irrevocable. Chongqing Daqo and Poly Engineering also entered into a technical services contract dated June 30, 2008, pursuant to which Poly Engineering agreed to provide certain technical supports to Chongqing Daqo. For the risks associated with our reliance on certain third-party technologies, see Item 3. Key Information D. Risk Factors Risks Relating to Our Business We rely on third party intellectual property for certain key aspects of our operation, which subjects us to the payment of license fees and potential disruption or delays in the production of our products. In August, 2011, Chongqing Daqo entered into a Technology License and Transfer Agreement with GTAT Corporation, a Delaware company, under which, GTAT granted us a license to use its Hydrochlorination TCS Production Technology and Chlorosilane Recovery/Waste Neutralization Technology for our current polysilicon production and future polysilicon production expansions.

Most of our equipment supply contracts with international suppliers include an indemnification provision under which the supplier undertakes to indemnify us against actions, claims, demands, costs, charges, and expenses arising from or incurred by reason of any infringement or alleged infringement of patent, copyright, trade mark or trade name by the use of the equipment provided by the supplier. However, it is unclear whether we will be entitled to such indemnification in the event that we use the equipment supplied by such supplier in conjunction with other equipment not supplied by such supplier. In addition, many of our equipment supply contracts with China-based suppliers do not provide any intellectual property indemnification provisions. See Item 3. Key Information D. Risk Factors Risks Relating to Our Business We may be exposed to infringement or misappropriation claims by third parties, which, if determined adversely to us, could cause us to pay significant damage awards.

Competition

We face competition in China and in the international market in which we have sales.

The photovoltaic market is dominated by a few major manufacturers with a large number of small manufacturers competing for the remaining small portion of the market. We face competition mainly from top manufacturers who have succeeded in establishing a strong brand name with solar companies. For our polysilicon and wafer businesses, our major international competitors include Hemlock, Wacker, OCI, REC, MEMC, M.Setek, Green Energy Technology, and Sino-American Silicon, and our China-based competitors include GCL-Poly, Tebian Silicon, China Silicon Corporation, Sichuan Xinguang Silicon Science and Technology, LDK Solar, ReneSola, JinkoSolar and Comtec Solar Systems. In addition, many solar cell and module manufacturers have or have announced the intention of establishing polysilicon production or affiliate relationships with manufacturers of polysilicon, including some of our customers and potential customers. We compete with these in-house capabilities, which could limit our ability to expand our sales. Furthermore, the demand for our polysilicon may be adversely affected by alternative technologies in cell manufacturing. The vast majority of silicon-based photovoltaic cell manufacturers currently use chunk or granular polysilicon. However, alternative technologies are being developed in cell manufacturing. For example, one such technology, thin-film cell production, uses little to no silicon in the production of solar cells. We believe that the solar cells made using thin-film technologies tend to have lower energy conversion efficiency than silicon-based solar cells, even though the cost to manufacture thin-film solar cells is lower than that to manufacture silicon-based cells. Based on our management's industry knowledge, we do not believe that the energy conversion efficiency rates of thin-film cells are likely to reach those of silicon-based cells in the near future. However, if it does happen, thin-film solar cell development and production may expand significantly, which may restrict the market for silicon-based solar cells and decrease the demand for our polysilicon.

Table of Contents

We believe that the key competitive factors in the market for photovoltaic products include:

product quality;

price and cost competitiveness;

manufacturing technologies and efficiency;

manufacturing reliability;

economies of scale; and

reputation.

We believe we differentiate ourselves from our competitors and capture market share in the polysilicon markets through our product quality, price and cost competitiveness, and manufacturing technologies and efficiency.

Regulation

This section sets forth a summary of the most significant regulations or requirements that affect our business activities in China.

Renewable Energy Law and Other Government Directives

China enacted the Renewable Energy Law in February 2005 and amended the law in December 2009. The amended Renewable Energy Law sets forth the national policy to encourage and support the development and use of solar and other renewable energy and its use for on-grid generation. The law also sets forth the national policy to encourage the installation and use of solar technologies in water-heating systems, heating and cooling systems, power generation systems and other energy utilization systems. In addition, the law provides financial incentives, such as national funding, preferential loans and tax preferences for the development of renewable energy projects.

In January 2006, the National Development and Reform Commission issued two implementing rules relating to the Renewable Energy Law that, among other things, provide general policies regarding the pricing of on-grid power generated by solar and other renewable energy.

In May 2006, the Ministry of Finance issued measures providing that the Chinese government shall provide certain government subsidies and financial incentives to support the development of the renewable energy industry, including the solar energy industry.

In August 2006, the Ministry of Construction and the Ministry of Finance also issued guidelines which sought to expand the use of solar energy in residential buildings.

Table of Contents

In July 2009, the Ministry of Finance, the Ministry of Science and Technology and the National Energy Bureau jointly issued measures that provide for government subsidies to support the photovoltaic industry.

In September 2009, the NDRC and nine other governmental agencies jointly issued measures aimed at curtailing the perceived over-capacity in certain industry sectors, such as steel, concrete, polysilicon and wind power equipment. Pending the promulgation of more specific regulations, the measures require new projects after the date of the new measures in any of the deemed over-capacity industries to obtain approval from NDRC. The measures also provide that the Chinese government shall support polysilicon manufacturers with large manufacturing capacities and advanced technologies. As a result, any entity which plans to establish a polysilicon manufacturing facility or to expand its current manufacturing facility in China after the measures were issued must seek pre-approval from NDRC. On January 24, 2011, NDRC issued detailed regulations for the approval of new polysilicon construction projects. These new criteria include the following:

- a. Capital requirement: the company's own capital must be no less than 30% of the new polysilicon plant investment;
- b. Production scale: solar polysilicon plants must have an annual capacity greater than 3,000 MT; and
- c. Other criteria: other criteria apply to the size of the land used, electricity consumption, and recycling rates.

Environmental and Safety Regulations

We use, generate and discharge toxic, volatile or otherwise hazardous chemicals and wastes in our research and development and manufacturing activities. China enacted the Environmental Protection Law effective December 1989. In addition to the Environmental Protection Law, we are subject to a variety of specific laws and regulations in China related to the storage, use and disposal of hazardous materials, including laws and regulations governing water pollution, air pollution, solid waste pollution, noise pollution, hazardous chemicals, pollutant discharge fees and environmental impact appraisals. We are also subject to laws and regulations governing worker safety, work safety permits and occupational disease prevention. Our operation is subject to regulation and periodic monitoring by local environmental protection and work safety authorities.

Foreign Currency Exchange

Foreign currency exchange in China is primarily governed by two sets of regulations issued in 1996.

Under the Foreign Exchange Administration Rules, the Renminbi is freely convertible for routine current account items, including distribution of dividends, payment of interest, and trade and service-related foreign exchange transactions. However, conversion of Renminbi for most capital account items, such as direct investment, overseas loan, securities investment and repatriation of investment, is still subject to the approval of SAFE.

Under the Regulations of Settlement, Sale and Payment of Foreign Exchange, foreign invested enterprises may only buy, sell and remit foreign currencies at authorized banks and must comply with certain procedural requirements, such as providing valid commercial documents and, in the case of capital account item transactions, obtaining approval from the SAFE. Foreign invested enterprises are also subject to limitations on capital investments outside of China, which include requirements to obtain approvals from the Ministry of Commerce, the National Development and Reform Commission and SAFE.

SAFE Circular No. 75

SAFE Circular No. 75, which became effective as of November 1, 2005, requires Chinese residents, including both legal persons and natural persons, to register with their local SAFE branch before establishing or acquiring control of any company outside of China with assets or equity interests in Chinese companies for the purpose of capital financing. Such a company outside of China is referred to as an offshore special purpose company. Chinese residents must also file amendments to their registrations if their offshore companies experience capital variation, such as changes in share capital, share transfers, mergers and acquisitions, long-term equity or debt investments or creation of any security interest over any assets located in China or any other material change in share capital. Failure to comply with the registration procedures may result in restrictions being imposed on the foreign exchange activities of the relevant Chinese entity. See Item 3. Key Information D. Risk Factors Risks Relating to Doing Business in China Chinese regulations relating to offshore investment activities by Chinese residents may increase the administrative burden we face and may subject our Chinese resident beneficial owners or employees to personal liabilities, limit our subsidiaries' ability to increase its registered capital or distribute profits to us, limit our ability to inject capital into our Chinese subsidiaries, or may otherwise expose us to liability under Chinese law.

Table of Contents

Regulations on Employee Stock Options Plans

In February 2012, the SAFE promulgated the Notice on the Administration of Foreign Exchange Matters for Domestic Individuals Participating in the Stock Incentive Plans of Overseas Listed Companies, or the Stock Option Notice. According to the Stock Option Notice, a PRC domestic qualified agent or the PRC subsidiary of such overseas listed company must file an application with the SAFE or its local counterpart on behalf of PRC resident individuals who participate in stock incentive plans of overseas publicly-listed companies to obtain approval for an annual allowance with respect to the purchase of foreign exchange in connection with the stock holding or share option exercises. Our company is an overseas publicly-listed company, and therefore, we and participants of our share incentive plan who are PRC individuals are subject to these regulations. As the Stock Option Notice is still relatively new, it is unclear how it will be interpreted and implemented by the relevant government authorities. We plan to submit an application with the SAFE or its local counterpart to register our share incentive plan.

C. Organizational Structure

The following diagram illustrates our corporate structure, including our principal subsidiaries and variable interest entity, as of the date of this annual report.

Notes:

- (1) Individual owners of Daqo Group beneficially hold equity interests in Daqo Cayman through 9 personal holding companies incorporated in the British Virgin Islands. See Principal Shareholders.
- (2) Indicates the respective shareholding percentage of the shareholders in Daqo Cayman.
- (3) Indicates jurisdiction of incorporation.

Table of Contents

- (4) Indicates companies within the listing group.
- (5) Represents a variable interest entity.

D. Property, Plants and Equipment

We are headquartered in Wanzhou, Chongqing, China, where we own several buildings with an aggregate of approximately 82,239 square meters of office and manufacturing space as of December 31, 2012. We have been granted land use rights to approximately 512,240 square meters of land on which our plants or offices are situated, and such land use rights are usually valid for a period of fifty years starting from the date of grant from the local government. Our Phase 2 production facilities in Xinjiang have an aggregate of approximately 92,340 square meters of office and manufacturing space as of December 31, 2012. In addition, we lease approximately 3980 square meters of office space in Shanghai.

In September 2012, we sold 100% equity interests of Nanjing Daqo to Daqo Group for a consideration of \$9.9 million in order to concentrate on our core businesses of polysilicon and wafer productions.

We believe that our existing facilities, together with our facilities under construction, are adequate for our current and foreseeable requirements.

See Item 5. Operating and Financial Review and Prospects B. Liquidity and Capital Resources Capital Expenditures for a discussion of our capital expenditures.

Environmental and Safety Matters

Our manufacturing processes generate noise, waste water, gaseous wastes and other industrial wastes. We believe we are in compliance with all present national and local environmental protection requirements in all material respects and have all the necessary environmental permits to conduct our business in China. We process all our waste water and waste gas through various treatments so that they meet the respective national discharge standard. In addition, most of our solid waste can be reused and does not contain poisonous materials. We have established a pollution control system and installed various types of anti-pollution equipment in our facilities to reduce, treat, and where feasible, recycle the wastes generated in our manufacturing process.

We are required to undergo the acceptance inspections of environmental protection and work safety and obtain approval with relevant governmental authorities before our manufacturing lines commence full production. Our production facilities are subject to various pollution control regulations with respect to noise and air pollution and the disposal of waste and other hazardous materials. We have obtained a pollutant discharge permit, a work safety permit for storage and use of hazardous chemicals and permit for the registration of use of atmospheric pressure containers for the pressure containers we have installed.

Insurance

We maintain various insurance policies to safeguard against risks and unexpected events. We purchased property insurance and project construction insurance policies covering our inventory, equipment, vehicles, facilities, buildings and buildings under construction. These insurance policies cover losses due to fire, explosion and a wide range of human accidents. We also provide social security insurance including pension insurance, unemployment insurance, work related injury insurance and medical insurance for our employees. We do not maintain business interruption insurance or general third-party liability insurance. We also do not have product liability insurance or key-man life insurance. See Item 3. Key Information D. Risk Factors Risks Relating to Our Business we have limited insurance coverage. In particular, we do not have any product liability insurance or business interruption insurance. We consider our insurance coverage to be in line with that of other manufacturing companies of similar size in China.

ITEM 4a. UNRESOLVED STAFF COMMENTS

None.

Table of Contents

ITEM 5. OPERATING AND FINANCIAL REVIEW AND PROSPECTS

You should read the following discussion and analysis of our financial condition and results of operations in conjunction with the historical consolidated financial statements of our company for the years ended December 31, 2010, 2011 and 2012 and related notes included elsewhere in this annual report on Form 20-F. This discussion contains forward-looking statements that involve risks, uncertainties and assumptions. Our actual results and the timing of selected events could differ materially from those anticipated in these forward-looking statements as a result of various factors, including those set forth under **Risk Factors** and elsewhere in this annual report.

A. Operating Results

Overview

We are a leading polysilicon manufacturer based in China with an annual production capacity of 9,300 MT as of the date of this annual report. We believe we are one of the largest polysilicon manufacturers in China. We have expanded to the downstream photovoltaic manufacturing business to establish facilities for wafer manufacturing. Our current wafer manufacturing annual capacity is 125MW. We plan to gradually increase the utilization rate of our wafer facilities and increase the capacity to 250 MW in 2013. We had 100MW module production facilities in Nanjing, all of which we sold to Daqo Group in September 2012.

We strive to improve our polysilicon production efficiency and to increase our output through technological improvements, adoption of process innovation and refinement, as well as equipment enhancement. As a result of these initiatives, we produced 4,524 MT polysilicon in 2011. In 2012, our polysilicon output was 3,349 MT⁽¹⁾, which was less than 2011 due to annual maintenance and technology improvement in our Wanzhou facilities and less than normal output in our Xinjiang facilities during the pilot production period in the fourth quarter of 2012. We plan to increase our annual production capacity to 9,300 MT by the end of 2013 as we fully ramp up the production capacity of our Phase 2 production line and improve our production efficiency.

We currently sell polysilicon to China-based photovoltaic product manufacturers. The majority of our sales are made under framework contracts, with the prices to be determined at the time when specific sales orders are made. As of December 31, 2012, our major photovoltaic product customers included operating entities of Yingli Green Energy, Solargiga and Jiangxi Sornid.

We have expanded to the downstream photovoltaic manufacturing business to establish facilities for wafer manufacturing. Our Phase 1a wafer manufacturing facilities in Chongqing commenced commercial production with 125MW capacity in July 2011. We plan to gradually increase the utilization rate of our wafer facilities and increase the capacity to 250 MW in 2013.

We achieved substantial growth since we commenced commercial production of polysilicon in July 2008, though we experienced a significant downturn in terms of revenue and net income in 2012. We produced 3,771 MT, 4,524 MT and 3,349 MT⁽¹⁾ of polysilicon and sold 3,650, 3,947 MT and 3,262 MT⁽²⁾ in 2010, 2011 and 2012, respectively. We generated revenues from continuing operations of \$252.8 million, \$232.2 million and \$86.9 million in 2010, 2011 and 2012, respectively. We achieved net income attributable to Daqo New Energy Corp. shareholders of \$68.6 million and \$33.3 million in 2010 and 2011, respectively. We incurred a net loss attributable to Daqo New Energy Corp. shareholders of \$111.9 million in 2012.

Note:

- (1) Excluding 617 MT polysilicon produced in Xinjiang facilities during the pilot production period.
- (2) Excluding 323 MT polysilicon sold from Xinjiang facilities during the pilot production period.

Table of Contents

Key Factors Affecting Our Results of Operations

The following are key factors that affect our financial condition and results of operations and are important for understanding our business:

demand for photovoltaic products, including government incentives to promote the usage of solar energy;

product prices;

our product mix;

our production capacity and utilization; and

our production costs.

Demand for photovoltaic products

Our business and revenue growth are, in part, dependent on the demand for photovoltaic products. The photovoltaic industry remains at a relatively early stage of development and it is uncertain whether solar energy will be widely adopted. Although demand for photovoltaic products has grown significantly over the past decade, the global economic slowdown and turmoil in the global financial markets especially the European sovereign debt crisis that unfolded in 2010 and continued through 2012, coupled with rapid declines in petroleum and natural gas prices, have made solar energy less cost competitive and less attractive as an alternative source of energy.

Demand for photovoltaic products is driven, in part, by government incentives that make the economic cost of solar power competitive with the cost of traditional and other forms of energy. We believe that the near-term growth of the market for solar energy applications depends in large part on the availability and size of government subsidies and economic incentives. Reduction in or elimination of government subsidies and economic incentives may hinder the growth of this market or result in lower sales prices for solar energy products, which could cause our revenues to decline.

Product prices

The sales prices of our photovoltaic products are volatile and cannot always be predicted with certainty. Our sales prices declined from mid-2008 to the middle of 2010 due to industry-wide excess supply but stabilized in the third quarter of 2010 and increased marginally in the fourth quarter of 2010 due to end market demand. In 2011 our sales prices declined rapidly in the fourth quarter primarily due to excess supply in the market. The decline in sales prices continued throughout 2012, and sales price recovered slightly in the first quarter of 2013. The decline in the polysilicon market price resulted in an approximately 7% decrease in our average selling price of polysilicon from 2010 to 2011 and a further 59.3% decrease from 2011 to 2012. Our gross margin from continuing operations decreased from 42.8% in 2010 to 37.6% in 2011 and further decreased to negative 43.1% in 2012. Although the polysilicon market price appeared to have stabilized in the latter part of 2012 and early 2013, we may continue to face downward price pressure as the global sales prices for photovoltaic products continue to fluctuate over time. We expect that our future financial results will also be affected by prices of our wafers.

Product mix

The proportion of our revenues that are generated from the sales of other photovoltaic products, also referred to as product mix, affect our revenues and profitability. In addition to the revenues generated from sales of polysilicon, we also generated revenues from other products. In 2010, we generated revenues from sales of modules and wafers. We processed wafers through tolling arrangements with third party wafer manufacturers. In 2011, we generated revenues from sales of wafers and modules we produced in our facilities. In 2012, we generated revenue from sales of modules for the first three quarters of the year before we sold 100% equity interests of Nanjing Daqo, and we generated revenue from sales of wafers produced in our facilities. For the year ended December 31, 2012, the revenues we generated from the sales of polysilicon and wafer accounts for 84.6% and 15.4% of our total revenues from continuing operations, respectively. The revenue generated by the

discontinued module business were included in the line item of net loss from discontinued operations.

Our production capacity and utilization

In the near future, we plan to continue to focus on our core businesses to further improve our operation efficiency, cost structure and products quality by expanding our capacity, adopting new technologies and optimizing the manufacturing processes. For our polysilicon business, we ramped up production at the Phase 1b facilities to their full annual capacity of 1,800 MT in 2010. We expanded the aggregate capacity of our Phase 1a and Phase 1b facilities to 4,300 MT through a capital enhancement project in 2011. We reached our current total annual production capacity of 9,300 MT at the end of the first quarter of 2013 as we fully ramped up the production capacity of our Phase 2 facilities in Xinjiang and as we continued to improve our production efficiency. For our wafer business, the Phase 1a wafer manufacturing facilities in Chongqing commenced commercial production in July 2011 and reached the current capacity of 125 MW in November 2011. We plan to gradually increase the utilization rate of our wafer facilities and increase the capacity to 250 MW in 2013.

Table of Contents

Our production costs

Our polysilicon production costs consist primarily of the costs of electricity and other utilities, raw materials, labor and depreciation. Daqo Chongqing uses electricity generated from the hydropower station in Chongqing which generates electricity mostly during times of high precipitation, primarily in the second and third quarters of each year. As a result, the electricity costs of Daqo Chongqing are generally lower in the second and third quarters and higher in the first and fourth quarters. As electricity is the largest component of our polysilicon production costs, we anticipate our production costs in Chongqing to fluctuate from quarter to quarter correlating with the different seasonal electricity rates that the local power grid charges. In our Phase 2 facilities in Xinjiang, because of the abundant coal resources in Xinjiang, the electricity rate has historically been consistent throughout the year and much lower than that in Chongqing. Accordingly, we do not anticipate our polysilicon production costs in Xinjiang will be impacted by seasonal fluctuation in a manner consistent with the facility in Chongqing. Our wafer production costs consist primarily of the costs of polysilicon, other raw materials, labor and depreciation. We plan to implement additional measures to reduce our production costs through technology, process and equipment improvement. Effective cost-reduction measures will have a direct impact on our financial condition and results of operations. If we fail to continue to reduce our production costs, our profitability and competitiveness will be adversely affected.

Components of Results of Operations

Revenues

In 2010, we generated substantially all of our revenues from the sale of polysilicon. In 2010, the revenues generated from sales of polysilicon and wafers accounted for 86.2% and 13.8% of our total revenues, respectively. In 2011, the revenues generated from sales of polysilicon and wafers accounted for 94.3% and 5.7% of our total revenues, respectively. In 2012, the revenues we generated from the sales of polysilicon and wafer accounts for 84.6% and 15.4% of our total revenues from continuing operations, respectively. We plan to continue to focus on our current businesses to further improve the operation efficiency, cost structure and products quality.

We commenced polysilicon production in 2008. We produced 3,771 MT, 4,524 MT and 3,349 MT⁽¹⁾ of polysilicon and sold 3,650 MT, 3,947 MT and 3,262 MT⁽²⁾ of polysilicon in 2010, 2011 and 2012, respectively. We used approximately 20.5 MT and 54.9 MT of polysilicon to process cells through our tolling arrangements in 2010 and 2011, respectively. We didn't have such business arrangements in 2012. Our polysilicon selling prices are directly affected by global supply and demand conditions. Due to the global oversupply of polysilicon since late 2008 and the resulting pricing pressure, the average selling price of our polysilicon decreased by 7% in 2011 as compared to that in 2010 and further decreased by 59.3% in 2012 as compared to that in 2011. The decrease of the polysilicon market price in turn adversely affected our revenues in 2010, 2011 and 2012.

We generated revenues of \$252.8 million, \$232.2 million and \$86.9⁽²⁾ million from continuing operations in 2010, 2011 and 2012, respectively. We achieved net income attributable to our shareholders of \$68.6 million and \$33.3 million in 2010 and 2011, respectively. We incurred net loss attributable to our shareholders of \$111.9 million in 2012. Our revenues from continuing operations in 2010 include \$217.9 million generated from sales of polysilicon, \$34.9 million from sales of wafers. In 2011, our revenues from continuing operations include \$218.9 million generated from sales of polysilicon and \$13.2 million generated from sales of wafers. In 2012, our revenues from continuing operations include \$73.5 million generated from sales of polysilicon, \$10.6 million generated from sales of wafers and \$2.8 million from ingot and block manufacturing outsourcing services.

We have entered into framework agreements with some of our customers. These contracts typically contain binding terms related to the sales volumes of our photovoltaic products during the contract period. The pricing terms are typically agreed upon between us and our customers based on the prevailing market prices when specific sales orders are placed. Such pricing determination method has caused, and is expected to continue to cause, fluctuations in our revenues and results of operations. In 2010, our top three customers, Yingli Green Energy, Solargiga and Solarfun, accounted for approximately 13.9%, 12.5% and 8.7% of our total revenues, respectively, and the three customers in aggregate accounted for approximately 35.1% of our total revenues. During 2011, our top three customers, Tianwei New Energy, Hanwha SolarOne and Yingli Green Energy, accounted for approximately 13.0%, 11.2% and 11.0% of our total revenues, respectively, and the three customers in aggregate accounted for approximately 35.2% of our total revenues. In 2012, our top three customers, Yingli Green Energy, Solargiga and Jiangxi Sornid, accounted for approximately 25.0%, 8.6% and 7.3% of our total revenues, respectively, and the three customers in aggregate accounted for approximately 40.9% of our total revenues.

Table of Contents

Notes:

- (1) Excluding 617 MT polysilicon produced in Xinjiang facilities during the pilot production period.
- (2) Excluding 323 MT polysilicon sold from Xinjiang facilities during the pilot production period.

Cost of revenues

Our cost of revenues primarily consists of:

depreciation of property, plant and equipment;

electricity and other utilities, such as steam, water and natural gas;

raw materials, including metallurgical grade silicon, liquid chlorine, nitrogen, calcium oxide and hydrogen;

direct labor, including salaries and benefits for personnel directly involved in production activities; and

processing fees paid to wafer and cell manufacturers pursuant to tolling arrangements.

Due to our capacity expansion, depreciation in absolute terms has increased significantly. This trend will continue if we further expand our polysilicon production capacity or conduct technology improvement. We also expect that our total cost of revenues will increase as we increase our sales volume.

Operating expenses/income

Our operating expenses include selling, general and administrative expenses and research and development expenses, which are partially offset by other operating income as described below.

Selling, general and administrative expenses

Our selling, general and administrative expenses consist primarily of salaries and benefits for our administrative, finance and sales personnel, packaging and shipping costs, sales-related travel and entertainment expenses, other travel and corporate expenses, depreciation of equipment used for administrative purposes and professional expenses. All costs in connection with start-up activities, including costs incurred prior to commencement of production and corporate formation costs of Daqo Cayman, were expensed as incurred. We expect that the amount of our selling, general and administrative expenses will increase as we expand our polysilicon production capacity, increase our sales efforts, hire additional personnel, and incur professional expenses to support our operations as a listed company in the United States.

Table of Contents

Research and development expenses

Our research and development expenses consist primarily of costs of raw materials used in research and development activities, salaries and employee benefits for research and development personnel, and equipment costs relating to the design, development, testing and enhancement of our production process. We expect our research and development expenses to increase significantly in the future as we continue to hire additional research and development personnel and focus on improvement of process technologies for our products, and expand our polysilicon manufacturing business. In the fourth quarter of 2012, the Company incurred additional research and development expenses for our Xinjiang Phase 2 polysilicon facilities to achieve the targets for product quality, capacity and cost during the pilot production period, which are not expected to recur.

Other operating income

Our other operating income reflects government subsidies that we receive from time to time, including financial incentives from Chongqing and Xinjiang local government. We record government subsidies as other operating income when we receive them. The amount and timing of subsidies cannot be predicted with certainty.

Fixed asset impairment loss

We recognized \$34.7 million and \$42.8 million impairment loss for the long-lived assets of our wafer facilities in 2011 and 2012 respectively. The impairment loss of long-lived assets of our wafer facilities reflects the impact of year-on-year market challenges that have had an adverse effect on the profit-generating ability of these assets.

Interest income and expense

Our interest income represents interest on our cash balances. Our interest expenses relate primarily to our short-term and long-term borrowings from banks, less capitalized interest expenses to the extent they relate to our capital expenditures.

Taxation

Cayman Islands tax

We are an exempted company incorporated in the Cayman Islands and are not subject to tax in this jurisdiction.

PRC tax

Our Chinese subsidiaries are foreign invested enterprises in China. Under the EIT Law, the Chinese enterprise income tax rate is 25%. However, qualified enterprises located in central or western China may enjoy preferential tax rate under a series of national policies adopted to encourage investment in central and western China.

Under the EIT Law, an enterprise established outside of China with its de facto management bodies within China may be considered a resident enterprise for Chinese tax purposes and be subject to the enterprise income tax at the rate of 25% on its global income. The implementation rules of the EIT Law provide that the term de facto management bodies refers to management bodies which have material management and control over all aspects of the business, including production, operations, personnel, finance, and assets. It is unclear whether Chinese tax authorities would determine that, notwithstanding our status as the Cayman Islands holding company of our operating business in China, we should be classified as a resident enterprise. Currently, substantially all of our income is already China-source income subject to Chinese taxes. However, a portion of the net proceeds received from our initial public offering were deposited into interest bearing bank accounts.

Chongqing Daqo, our wholly owned Chinese subsidiary and a foreign-invested enterprise established in the central and western region in China, is entitled to a preferential income tax rate of 15% from the date of its establishment to December 31, 2010. Chongqing Daqo is qualified as a Chongqing Municipality High and New Technology Enterprise, which entitles it a preferential income tax rate of 15%. Chongqing Daqo received its first qualification in November 2009 for a three-year period. The status was renewed in November 2012 for addition three years till November 2015 and the status can be reapplied for additional three-year terms upon Chongqing Daqo's application and the government's approval. Xinjiang Daqo is in the process of applying for High and New Technology Enterprise status, which entitles it to enjoy the preferential income tax rate of 15%.

Table of Contents

Daqo New Material, our consolidated variable interest entity and a domestic Chinese enterprise, is subject to an income tax rate of 25%.

Under the EIT Law and implementation regulations issued by the State Council of China, dividends, interests, rent, royalties and gains on transfers of property payable by a foreign-invested enterprise in China to its foreign investor who is a non-resident enterprise will be subject to a 10% withholding tax, unless such non-resident enterprise's jurisdiction of incorporation has a tax treaty with China that provides for a reduced rate of withholding tax and such non-resident enterprise is the beneficial owner of the dividends, interests, rent, royalties and gains on transfers of property. The Cayman Islands, where Daqo Cayman is incorporated, does not have such a tax treaty with China. However, we intend to reinvest all of Chongqing Daqo's undistributed earnings into our capacity expansion and/or technology improvement and do not plan to distribute any of the earnings as dividends in the foreseeable future and, accordingly, we have not set aside provision for Chinese dividend withholding tax. If we do distribute these earnings in the form of dividends, we will be subject to the withholding tax at a rate of 10%.

Pursuant to the Interim Regulations on Value Added Tax and their implementation rules, all entities and individuals that are engaged in the sale of goods, the provision of repairs and replacement services or the importation of goods in China are generally required to pay value-added tax, or VAT, at a rate of 17% of the gross sales proceeds received, less any deductible VAT already paid or borne by the taxpayer. Furthermore, when exporting goods, the exporter is entitled to VAT refund, which amount will be a portion of or all of the VAT that it has already paid or borne. For our sale of polysilicon products to China-based purchasers, we are subject to the 17% VAT without any VAT refunds for such sales.

Critical Accounting Policies

We prepare our consolidated financial statements in accordance with U.S. GAAP, which requires us to make judgments, estimates and assumptions that affect (1) the reported amounts of assets and liabilities, (2) disclosure of contingent assets and liabilities at the end of each reporting period, and (3) the reported amounts of revenues and expenses during each reporting period. We continually evaluate these estimates and assumptions based on historical experience, knowledge and assessment of current business and other conditions, and expectations regarding the future based on available information and reasonable assumptions, which together form a basis for making judgments about matters not readily apparent from other sources. Since the use of estimates is an integral component of the financial reporting process, actual results could differ from those estimates. Some of our accounting policies require higher degrees of judgment than others in their application. When reviewing our financial statements, you should consider (1) our selection of critical accounting policies, (2) the judgment and other uncertainties affecting the application of such policies, and (3) the sensitivity of reported results to changes in conditions and assumptions. We consider the policies discussed below to be critical to an understanding of our financial statements as their application places the most significant demands on the judgment of our management.

Revenue recognition

We generate revenues primarily from the sale of polysilicon and wafer and recognize revenues when all of the following conditions are met: persuasive evidence of an arrangement exists, the sales price is fixed and determinable, delivery of the products has occurred, title and risk of loss have transferred to customers and collectability of receivable is reasonably assured. Our polysilicon sales agreements with our customers typically do not contain product warranties except for return and replacement of defective products within a period ranging from 3 to 30 days from delivery. In addition, our agreements do not contain post-shipment obligations or any other return or credit provisions.

Table of Contents

A majority of our sales contracts provide that title and risk of loss related to the products are transferred to our customers upon receipt. We may extend credit terms to our customers after assessing a number of factors to determine their credit worthiness.

Allowance for doubtful accounts

We conduct credit reviews for customers to whom we extend credit terms. We estimate the amount of accounts receivable that may not be collected based on the aging of our accounts receivable and specific evidence relating to the financial condition of our customers that may affect their ability to pay their balances.

Impairment of long-lived assets

We evaluate our long-lived assets and finite-lived intangible assets for impairment whenever events or changes in circumstances indicate that the carrying amount of an asset group may not be recoverable. Factors that we consider in deciding when to perform an impairment review include, but are not limited to significant under-performance of a business or product line in relation to expectations, significant negative industry or economic trends, and significant changes or planned changes in the use of the assets. An impairment analysis is performed at the lowest level of identifiable independent cash flows for an asset or asset group. We make subjective judgments in determining the independent cash flows that can be related to a specific asset group based on the asset usage model and manufacturing capabilities. We measure the recoverability of assets that will continue to be used in the operations by comparing the carrying value of the asset group to the estimate of the related total future undiscounted cash flows. If an asset group's carrying value is not recoverable through the related undiscounted cash flows, the impairment loss is measured by comparing the difference between the asset group's carrying value and its fair value. We determine the fair value of an asset or asset group utilizing estimated future discounted cash flows and incorporate assumptions that it believes marketplace participants would utilize. The impairment charges for the years ended December 31, 2010, 2011 and 2012 were \$nil, \$38,512,376 (among which \$3,844,799 was included in loss from discontinued operations) and \$42,754,481, respectively. The impairment loss incurred in fiscal year 2012 was related to the impairment of long-lived assets of the wafer business, and was triggered primarily by the significant decrease in average selling prices for wafers that was experienced in 2012.

Valuation of Deferred Tax Assets

We periodically evaluate the likelihood of the realization of deferred tax assets, and reduce the carrying amount of these deferred tax assets by a valuation allowance to the extent we believe a portion will not be realized. We consider many factors when assessing the likelihood of future realization of our deferred tax assets, including our recent cumulative earnings experience by taxing jurisdiction, expectations of future taxable income, the carry-forward periods available to us for tax reporting purposes, and other relevant factors. Deferred income taxes are recognized for (1) temporary differences between the tax basis of assets and liabilities and their reported amounts in the financial statements, or (2) net operating loss carry forwards and credits by applying enacted statutory tax rates applicable to future years. Deferred tax assets are reduced by a valuation allowance when, in the opinion of management, it is more likely than not that some portion or all of the deferred tax assets will not be realized. Current income taxes are provided for in accordance with the laws of the relevant taxing authorities. The components of the deferred tax assets and liabilities are individually classified as current and non-current based on the characteristics of the underlying assets and liabilities, or the expected timing of their use when they do not relate to a specific asset or liability. A valuation allowance of \$37.7 million was established for the year ended December 31, 2012.

Valuation of inventories

Our inventories are stated at the lower of cost or net realizable value. The valuation of inventory involves our management's determination of the value of excess and slow moving inventory, which is based upon assumptions of future demands and market conditions. If actual market conditions are less favorable than those projected by management, inventory write-downs may be required. We routinely evaluate quantities and value of our inventories in light of current market conditions and market trends, and record write-downs against the cost of inventories for a decline in net realizable value. Inventory write-down charges establish a new cost basis for inventory. In estimating obsolescence, we utilize our backlog information and project future demand. Market conditions are subject to change and actual consumption of inventories could differ from forecasted demand. Furthermore, the price of polysilicon is subject to fluctuations based on global supply and demand. If actual market conditions are less favorable or other factors arise that are significantly different than those anticipated by our management, additional inventory write-downs or increases in obsolescence reserves may be required. Our management continually monitors the spot price of polysilicon to ensure that inventory is recorded at the lower of cost or net realizable value.

Table of Contents

Share-based compensation expenses

On October 31, 2009, we granted options to purchase a total of 5,350,000 ordinary shares to our officers, directors, employees and consultants pursuant to our 2009 share incentive plan. The original exercise price of all of the options was \$1.38 per share, which was re-priced to \$0.25 per share on April 3, 2013 with the approval of our board of directors. Twenty-five percent of the ordinary shares subject to the options will vest one year following the grant date, and the remaining seventy-five percent of the ordinary shares subject to the option will vest in 36 equal monthly installments over the next three years. We did not grant any options or other equity incentives to any officer, director, employee or consultant before October 2009.

On October 6, 2010, we granted options to acquire 120,000 ordinary shares to independent directors pursuant to the Option Plan. Thirty percent (30%) of the ordinary shares subject to the Option Plan will vest one year following the grant date, thirty percent (30%) of the ordinary shares subject to the Option Plan will vest on the second year anniversary of the grant date, and the remaining forty percent (40%) of the ordinary shares subject to the Option Plan will vest on the third year anniversary of the grant date. These options were granted in anticipation of services to be provided during the respective service periods. The original exercise price of these options was \$1.90 per share which was re-priced to \$0.25 per share on April 3, 2013.

On December 3, 2010, we granted options to acquire 2,190,000 ordinary shares to certain officers, directors and employees pursuant to the Option Plan. The ordinary shares subject to the Option Plan will vest in four equal annual installments, with the first installment vesting one year following the grant date. These options were granted in anticipation of services to be provided during the respective service periods. The original exercise price of these options was \$2.35 per share which was re-priced to \$0.25 per share on April 3, 2013.

On January 9, 2012, we granted options to acquire 1,190,000 ordinary shares to certain independent directors, officers and employees pursuant to the Option Plan. For the independent directors, thirty percent (30%) of the ordinary shares subject to the Option Plan will vest one year following the grant date, thirty percent (30%) of the ordinary shares subject to the Option Plan will vest on the second year anniversary of the grant date, and the remaining forty percent (40%) of the ordinary shares subject to the Option Plan will vest on the third year anniversary of the grant date. For the officers and employees, twenty-five percent (25%) of the ordinary shares subject to the options will vest one year following the grant date, and the remaining seventy-five percent (75%) of the ordinary shares subject to the option will vest in 36 equal monthly installments over the next three years. These options were granted in anticipation of services to be provided during the respective service periods. The original exercise price was \$0.42 per share, which was re-priced to \$0.25 per share on April 3, 2013.

On April 3, 2013, we granted options to acquire 140,000 ordinary shares to a certain independent director pursuant to the Option Plan. The exercise price is \$0.25 per share. Thirty percent (30%) of the ordinary shares subject to the Option Plan will vest as of 24 December 2013, another thirty percent (30%) will vest as of 24 December 2014, and the remaining forty percent (40%) will vest as of 24 December 2015. These options were granted in anticipation of services to be provided during the respective service periods. The exercise price is \$0.25 per share.

As of the end of 2012, a total number of 1,670,500 options have been forfeited due to grantees' departure from the company.

We recognize share-based compensation in the statement of operations based on the fair value of equity awards on the date of the grant, with compensation expense recognized over the period in which the grantee is required to provide service to us in exchange for the equity award. We have made an estimate of expected forfeiture and is recognizing compensation costs only for those equity awards to vest. The share-based compensation expenses have been classified as either selling, general and administrative expenses or research and development expenses, depending on the job functions of the grantees.

Table of Contents

With respect to options granted on October 6, 2010 and December 3, 2010, we estimated the fair value of share options granted using the Binomial option pricing model with the assistance of the independent appraiser, which requires the input of highly subjective assumptions, including the expected life of the share options, estimated forfeitures and the price volatility of the underlying shares. The assumptions used in calculating the fair value of share options represent management's best estimates. As a result, if factors change and we use different assumptions, our share-based compensation expense could be materially different in the future. In addition, we estimate our expected forfeiture rate and recognize the expense only for those shares expected to vest. These estimates are based on past employee-retention rates. We will prospectively revise our estimated forfeiture rates based on actual history. Our compensation expense may change based on changes to our actual forfeitures of these share options.

With respect to options granted on January 9, 2012, we estimated the fair value of share options granted using the Binomial option pricing model with the assistance of the independent appraiser, which requires the input of highly subjective assumptions, including the expected life of the share options, estimated forfeitures and the price volatility of the underlying shares. The assumptions used in calculating the fair value of share options represent management's best estimates. As a result, if factors change and we use different assumptions, our share-based compensation expense could be materially different in the future. In addition, we estimate our expected forfeiture rate and recognize the expense only for those shares expected to vest. These estimates are based on past employee-retention rates. We will prospectively revise our estimated forfeiture rates based on actual history. Our compensation expense may change based on changes to our actual forfeitures of these share options.

Table of Contents**Results of Operations**

The following table sets forth a summary of our consolidated statements of operations for the periods. Our historical results presented below are not necessarily indicative of the results that may be expected for any future period.

	Year Ended December 31,		
	2010	2011	2012
Revenues			
Polysilicon	\$ 217,921,352	\$ 218,915,487	\$ 73,450,807
Other products	34,893,475	13,254,092	13,407,594
Total revenues	252,814,827	232,169,579	86,858,401
Cost of revenues	(144,651,384)	(144,946,025)	(124,290,384)
Gross profit (loss)	108,163,443	87,223,554	(37,431,983)
Operating expenses/income:			
Selling, general and administrative expenses	(15,228,994)	(13,088,538)	(12,930,198)
Research and development expenses	(1,385,611)	(744,322)	(4,130,533)
Other operating income	4,084,696	12,029,030	8,729,301
Long-lived asset impairment		(34,667,577)	(42,754,481)
Total operating expenses	(12,529,909)	(36,471,407)	(51,085,911)
Income (loss) from operations	95,633,534	50,752,147	(88,517,894)
Interest expense	(9,849,732)	(9,258,296)	(15,408,023)
Exchange gain (loss)	(579,189)	148,676	(55,800)
Interest income	539,398	1,846,956	990,117
Income (loss) before income taxes	85,744,011	43,489,483	(102,991,600)
Income tax expense	(13,256,751)	(2,717,561)	(10,253,587)
Net income (loss) from continuing operations	72,487,260	40,771,922	(113,245,187)
Total income (loss) from discontinued operation	(3,339,527)	(5,857,810)	(2,392,228)
Net income	69,147,733	34,914,112	(115,637,415)
Net income (loss) attributable to noncontrolling interest	576,476	1,590,160	(3,708,474)
Net income (loss) attributable to Daqo New Energy Corp. s shareholders	\$ 68,571,257	\$ 33,323,952	\$ (111,928,941)

Year ended December 31, 2012 Compared to Year ended December 31, 2011 for continuing operations

Total revenues. Our total revenues decreased by 62.6% from \$232.2 million in 2011 to \$86.9 million in 2012. The decrease in total revenues was primarily attributable to precipitous fall of the sales price of our polysilicon throughout 2012. The revenues derived from wafer sales increased from \$13.3 million in 2011 to \$13.4 million in 2012, which was primarily due to higher shipment offset by lower average selling price. The revenue derived from polysilicon decreased significantly from \$218.9 million in 2011 to \$73.5 million in 2012, which was due to the combined effect of a volume decrease from 3,947 MT in 2011 to 3,262 MT in 2012 exacerbated by a 54.5% decrease in polysilicon average selling price during 2012.

Cost of revenues. Our cost of revenues decreased by 14.2 % from \$144.9 million in 2011 to \$124.3 million in 2012. The decrease in costs of revenues was primarily attributable to a decrease of \$20.1 million in costs of revenues for polysilicon offset by a slight increase of \$0.6 million in costs of revenues for wafers. The costs of revenues for polysilicon was primarily due to significant production volume shrinkage in 2012 as compared to 2011.

Edgar Filing: DAQO NEW ENERGY CORP. - Form 20-F

Gross profit (loss). Our gross profit decreased by 142.9% from \$87.2 million in 2011 to negative \$37.4 million in 2012. Our gross margin decreased from 37.6% in 2011 to negative 43.1% in 2012. The decrease in profit margin was primarily due to the lower average selling price of polysilicon and wafers.

Selling, general and administrative expenses. Our selling, general and administrative expenses were \$12.9 million in 2012 compared to \$13.1 million in 2011. The decrease was primarily due to the Company's effort on cost reduction.

Research and development expenses. Our research and development expenses increased from \$0.7 million to \$4.1 million, and increased as a percentage of total revenues from 0.3% in 2011 to 4.7% in 2012. The Company incurred additional research and development expenses for our Xinjiang Phase II polysilicon facilities to achieve the targets for quality, capacity and cost during the pilot production period, which are not expected to recur.

Table of Contents

Fixed asset impairment loss. We recognized a \$42.8 million impairment loss for the long-lived assets of our wafer business in 2012. The impairment loss of long-lived assets of wafer was to reflect the less than expected profit-generating ability of the assets. In 2011, the Company recognized an impairment loss for the long-lived assets of its wafer facilities of \$34.7 million.

Other operating income. Other operating income decreased from \$12.0 million in 2011 to \$8.7 million in 2012, which mainly consisted of unrestricted cash incentives that we received from local government authorities, which fluctuates from period to period at the discretion of the government.

Interest expense and income. Our net interest expenses increased from \$7.4 million in 2011 to \$14.4 million in 2012. The increase from 2011 was primarily due to the increase of the Company's loan balance related to Xinjiang project.

Income tax expense. Our income tax expenses were \$10.3 million, compared to \$2.7 million for 2011. In consideration of the uncertainty in the solar market, the Company determined it was more-likely-than-not that our deferred tax assets would not be utilized before they expire. Thus a valuation allowance of \$37.7 million for deferred tax asset was recorded for the year ended December 31, 2012.

Net income (loss) attributable to our shareholders. As a result of the factors described above, we had net loss attributable to our shareholders of \$111.9 million for 2012, compared to net income of \$33.3 million for 2011.

Year ended December 31, 2011 Compared to Year ended December 31, 2010 for continuing operations

Total revenues. Our total revenues decreased by 8.2% from \$252.8 million in 2010 to \$232.2 million in 2011. The revenues derived from wafer sales decreased from \$34.9 million in 2010 to \$13.3 million in 2011, which was primarily due to the lower average selling price. The revenue derived from polysilicon increased slightly from \$217.9 million to \$218.9 million in 2012, which was due to the combined effect of a volume increase from 3,650 MT in 2010 to 3,947 MT in 2011 offset by a 7% decrease in polysilicon average selling price during 2011.

Cost of revenues. Our cost of revenues increased by 0.1% from \$144.7 million in 2010 to \$144.9 million in 2011. The increase in costs of revenues was primarily attributable to an increase of \$10.3 million in costs of revenues for polysilicon which was primarily due to larger production volume in 2011 as compared to 2010.

Gross profit. Our gross profit decreased by 19.4% from \$108.2 million in 2010 to \$87.2 million in 2011. Our gross margin decreased from 42.8% in 2010 to 37.6% in 2011. The decrease in profit margin was primarily due to the lower average selling price of polysilicon and higher shipment volume combined with the impact of non-cash inventory write-down in 2011.

Selling, general and administrative expenses. Our selling, general and administrative expenses were \$13.1 million in 2011 compared to \$15.2 million in 2010.

Research and development expenses. Our research and development expenses decreased by 46.3% from \$1.4 million to \$0.7 million, and decreased as a percentage of total revenues from 0.6% in 2010 to 0.3% in 2011. The decrease in our research and development expenses was due primarily to less research and development projects incurred in 2011 due to the maturation of our polysilicon production technology.

Fixed asset impairment loss. We recognized a \$34.7 million impairment loss for the long-lived assets of our wafer business in 2011. The impairment loss of long-lived assets of wafer was to reflect the assets' lower than expected profit-generating ability due to a sharp decline in the spot market price of wafer.

Other operating income. Other operating income increased significantly from \$4.1 million to \$12.0 million, which mainly consisted of unrestricted cash incentives that we received from local government authorities, fluctuates from period to period at the discretion of the government.

Interest expense and income. Our net interest expenses decreased from \$9.3 million in 2010 to \$7.4 million in 2011. The decrease from 2010 was primarily due to \$1.3 million increase in interest income due to the time deposits in 2011 and \$0.6 million decrease in interest expenses due to the higher interest capitalization in 2011.

Income tax expense. Our income tax expenses were \$2.7 million, compared to \$13.3 million for 2010. The decrease was primarily due to the lower income before tax in 2011 and the decreased effective tax rate mainly due to the effect of a different income tax rate being applied to the reversal of temporary difference.

Table of Contents

Net income attributable to our shareholders. As a result of the factors described above, we had net income attributable to our shareholders of \$33.3 million for 2011, compared to net income of \$68.6 million for 2010.

Recent Accounting Pronouncements

In July 2012, the FASB issued ASU 2012-02, Impairment of Indefinite-Lived Intangible Assets, an authoritative pronouncement related to testing indefinite-lived intangible assets, other than goodwill, for impairment. Under the guidance, an entity testing an indefinite-lived intangible asset for impairment has the option of performing a qualitative assessment before calculating the fair value of the asset. If the entity determines, on the basis of qualitative factors, that the fair value of the indefinite-lived intangible asset is not more likely than not (i.e., a likelihood of more than 50 percent) impaired, the entity would not need to calculate the fair value of the asset. The guidance does not revise the requirement to test indefinite-lived intangible assets annually for impairment. In addition, the guidance does not amend the requirement to test these assets for impairment between annual tests if there is a change in events or circumstances; however, it does revise the examples of events and circumstances that an entity should consider in interim periods. The guidance was effective for annual and interim impairment tests performed for fiscal years beginning after September 15, 2012. Early adoption is permitted. The adoption of this guidance did not have a significant effect on our consolidated financial statements.

In February 2013, the FASB issued ASU 2013-02, an authoritative pronouncement related to reporting of amounts reclassified out of accumulated other comprehensive income. Under the guidance, an entity is required to report the effect of significant reclassifications out of accumulated other comprehensive income on the respective line items in net income if the amount being reclassified is required under US GAAP to be reclassified in its entirety to net income. For other amounts that are not required under US GAAP to be reclassified in their entirety to net income in the same reporting period, an entity is required to cross-reference other disclosures required under US GAAP that provide additional detail about those amounts. The amendments are effective prospectively for reporting periods beginning after December 15, 2012. Early adoption is permitted. We have early adopted this pronouncement.

In March 2013, the FASB issued ASU 2013-05, an authoritative pronouncement related to parent's accounting for the cumulative translation adjustment upon derecognition of certain subsidiaries or groups of assets within a foreign entity or of an investment in a foreign entity. Under the guidance, the cumulative translation adjustment should be released into net income when a reporting entity (parent) ceases to have a controlling financial interest in a subsidiary or group of assets that is a nonprofit activity or a business within a foreign entity. A pro rata portion of the cumulative translation adjustment should be released into net income upon a partial sale of an equity method investment which is a foreign entity. The amendments are effective prospectively for reporting periods beginning after December 15, 2013. Early adoption is permitted. We have early adopted this pronouncement.

Inflation

In recent years, inflation in China has not materially impacted our results of operations. According to the National Bureau of Statistics of China, the year-over-year percent changes in the consumer price index for December 2010, 2011 and 2012 were increases of 4.6%, 4.1% and 2.5%, respectively. Although we have not been materially affected by inflation in the past, we may be affected if China experiences higher rates of inflation in the future.

B. Liquidity and Capital Resources

Liquidity

As of December 31, 2012, although we had a net loss for the year, we believe that our cash, cash equivalents, the financial support from our related party, Daqo Group, cash flows from operating activities, and continued support from financial institutions located in the PRC, in the form of renewed and additional short-term loan facilities (including trade financing), will be sufficient to meet our working capital, capital expenditure and repayment of bank borrowings needs that will arise in 2013 and beyond. We intend to continue to carefully execute our operating plans and manage credit and market risk. However, if our financial results or operating plans change from our current assumptions, our liquidity could be negatively impacted.

The following significant developments in 2012 have impacted our liquidity or are expected to impact our liquidity:

Edgar Filing: DAQO NEW ENERGY CORP. - Form 20-F

The solar industry is being negatively impacted by a number of factors including excess capacity, reduction of government incentives in key solar markets, higher import tariffs and the European debt crisis. These factors have contributed to declining average selling prices for our products. The average selling price (ASP) of polysilicon has fallen from nearly \$60 per kilogram (kg) in 2010 to almost \$23 per kg in 2012.

For the year ended December 31, 2012, we incurred an operating loss of \$88.5 million.

During the year ended December 31, 2012, we experienced negative cash flow from operations of \$10.3 million, primarily as a result of the net loss incurred by us.

Table of Contents

As of December 31, 2012, our current liabilities exceed our current assets by \$163.8 million. While we had cash and cash equivalents of \$6.7 million, it had short-term bank borrowings of \$51.3 million all due within one year and the current portion of long-term debt amounting to \$69.0 million, which is restricted to purchase of fixed assets and not expected to be renewed.

As noted above, financial support from Daqo Group, cash generated from operations and short-term financing is our primary source of operating liquidity and we believe that cash flows from operations combined with our existing cash and cash equivalents, and facilities currently available, and those expected to be renewed will be sufficient to satisfy our obligations when they fall due.

The following plans and actions are being taken to effectively manage our liquidity:

On April 12, 2013, we obtained an irrevocable, legally enforceable letter of financial support from our shareholders, who have committed to provide sufficient financial support to us to ensure we have the funds required to satisfy our obligations as they come due in the normal course, through Daqo Group. Further, the support letter provides that Daqo Group will not require us to pay intercompany debts, if any, provided under the letter of support or the amount owed to the Daqo Group and subsidiaries of Daqo Group, Daqo Solar and Xinjiang Daqo Investment as of March 31, 2013, before January 1, 2014.

We have taken or are in the process of taking a number of cost reduction initiatives. For example, we have constructed our phase 2 production facilities in Xinjiang and began commercial production in January 2013. The cash cost to produce polysilicon at the Xinjiang facilities is estimated to be significantly lower than that of our current facilities. Further, we are in the process of implementing the hydrochlorination project at our facilities in Chongqing, which is expected to significantly reduce the cash cost of producing polysilicon, although not to the extent of the facilities in Xinjiang.

While there can be no assurance that we will be able to refinance our short-term bank borrowings as they become due, historically, we have renewed or rolled over all of our short-term bank loans upon the maturity date of the loans and has assumed we will continue to be able to do so. From January 1, 2013 to April 22, 2013, we obtained short-term bank borrowings of \$22.4 million and obtained a bank acceptance note credit facility of \$4.8 million.

We have performed a review of our cash flow forecast for the twelve months ending December 31, 2013. We believe that our operating cash flow will improve significantly in 2013 and that our operating cash flow will be positive. While management believes the forecast is based on reasonable assumptions, significant assumptions of this forecast include: we are assuming that there will be gradual increases in ASP throughout the year 2013 and will realize significant cost savings as a result of the low electricity cost in Xinjiang and certain technology improvement projects in Chongqing. The preliminary results for the first quarter of 2013 shows an increase in the ASP for the three-month period ended March 31, 2013. This trend is consistent with our expectation.

Based on the abovementioned factors, management believes that adequate sources of liquidity will exist to fund our working capital and capital expenditures requirements, and to meet our short term debt obligations, other liabilities and commitments as they become due.

Cash Flows and Working Capital

Polysilicon production requires intensive capital investment. Due to our relatively short operating history, our financing is primarily through advances from customers and financing from Daqo Group, in addition to cash flow from sales of polysilicon, bank borrowings, and the proceeds of our initial public offering in October 2010. Furthermore, a substantial portion of our outstanding indebtedness is guaranteed by Daqo Group. In the future, we may rely upon Daqo Group to provide additional guarantees for our indebtedness or direct assistance if our cash on hand and cash flow from our operations are insufficient for our future capital needs. The following table sets forth a summary of our cash flows for the periods indicated:

Year Ended December 31,		
2010	2011	2012
(in thousands)		

Edgar Filing: DAQO NEW ENERGY CORP. - Form 20-F

Net cash provided by (used in) operating activities	\$ 125,623	\$ 44,858	\$ (10,307)
Net cash used in investing activities	(49,818)	(274,139)	(102,922)
Net cash provided by financing activities	45,556	112,781	27,144
Effect of exchange rate changes	860	5,561	67
Net increase (decrease) in cash and cash equivalents	122,221	(110,939)	(86,018)
Cash and cash equivalents at the beginning of the year	81,414	203,636	92,697
Cash and cash equivalents at the end of the year	\$ 203,635	\$ 92,697	6,679
Supplemental disclosure of cash flow information:			
Interest paid	\$ 5,240	\$ 10,991	\$ 15,555
Income taxes paid	625	18,861	8,053
Net cash outflow on the disposition			2,656
Supplemental schedule of non-cash investing activities:			
Purchases of property, plant and equipment included in accounts payable	\$ 16,701	\$ 41,302	\$ 46,595

Table of Contents

As of December 31, 2012, we had \$10.6 million in restricted cash and \$6.7 million in cash and cash equivalents. Approximately \$2.5 million, \$0.2 million and \$8.9 million of our restricted cash and cash and cash equivalents were held by Chongqing Daqo, Daqo New Material and Xinjiang Daqo, respectively, in RMB. Restricted cash was primarily comprised of cash that we placed in our bank accounts as guarantee deposits for the banks' issuance of short-term letters of credit and notes in support of our purchases of property, plant and equipment. Cash and cash equivalents consisted of cash on hand and demand deposits, which were unrestricted as to withdrawal and use and had maturities of three months or less.

As of December 31, 2012, we had a working capital deficit (being our total consolidated current liabilities less our total consolidated current assets) of \$163.8 million. We had cash, cash equivalents and restricted cash of \$17.3 million and short-term and long-term liabilities of \$120.3 million and \$187.5 million, respectively, as of December 31, 2012. As of December 31, 2012, we have total capital commitment of \$20.5 million. These factors initially raised substantial doubt as to our ability to continue as a going concern.

In response to these circumstances, our major shareholders, which have sufficient capital and liquidity available, provided a legally binding commitment to us to provide the necessary financial support to us through Daqo Group, an affiliated company, if necessary. In addition, as of December 31, 2012, we have \$36.9 million of unused committed and available bank standby credit facilities. In March and April 2013, we obtained two one-year bank facilities, which include \$22.4 million (RMB 140 million) bank loan facility and \$4.8 million (RMB 60 million) facility for bank accepted notes. In summary, our continuation as a going concern is dependent upon continued financial support from our major shareholders, our ability to continue to obtain other sources of financing and our operating cash flow in 2013. See Item 3. Key Information D. Risk Factors Risks Relating to Doing Business in China We are facing significant working capital pressure in the current challenging market environment. Our major shareholders have committed to provide financial support to us to meet our working capital requirements and obligations as they come due. If the market continues to deteriorate and we are not able to obtain adequate financial support from our major shareholders or from other sources, we may face the risk of not being able to continue as a going concern.

Operating Activities

Net cash used in operating activities for the year ended December 31, 2012 was negative \$6.8 million, primarily resulting from \$92.1 million of cash we received from the sale of our products, our payments for raw materials and utilities of \$69.2 million, taxes paid of \$10.8 million, and employee salaries and welfare payment of \$19.5 million.

Net cash provided by operating activities for the year ended December 31, 2011 was \$44.9 million, primarily resulting from \$239.5 million of cash we received from the sale of our products, our payments for raw materials and utilities of \$119.1 million, taxes paid of \$39.0 million, and employee salaries and welfare payment of \$18.7 million.

Net cash provided by operating activities for the year ended December 31, 2010 was \$125.6 million, primarily resulting from \$281.6 million of cash we received from the sale of polysilicon, our payments for raw materials and utilities of \$109.3 million, taxes paid of \$19.6 million, and employee salaries and welfare payment of \$5.2 million.

Investing Activities

Net cash used in investing activities for the year ended December 31, 2012 was \$106.7 million. Net cash used in investing activities for the year ended December 31, 2012 primarily resulted from payments for the purchase of property, plant and equipment in a total amount of \$109.5 million combined with the increase of restricted cash of \$0.08 million that we placed in our bank accounts, the notes in support of our purchases of property, plant and equipment, and a \$2.7 million net proceeds from disposal of our module business.

Net cash used in investing activities for the year ended December 31, 2011 was \$274.1 million. Net cash was primarily the result of payments for the purchase of property, plant and equipment in a total amount of \$252.7 million combined with decrease in restricted cash of \$11.5 million that we placed in our bank accounts as guarantee deposits for the banks' issuance of short term letters of credit and notes in support of our purchases of property, plant and equipment and a \$9.9 million net interest free loan we extended to a related party in 2011.

Net cash used in investing activities for the year ended December 31, 2010 was \$49.8 million. Net cash was primarily the result of payments for the purchase of property, plant and equipment in a total amount of \$57.6 million offset by a decrease in restricted cash of \$8.7 million that we placed in our bank accounts as guarantee deposits for the banks' issuance of short term letters of credit and notes in support of our purchases of property, plant and equipment.

Financing Activities

Edgar Filing: DAQO NEW ENERGY CORP. - Form 20-F

Net cash provided by financing activities for the year ended December 31, 2012 was \$27.1 million, primarily resulting from the proceeds received from the bank borrowings and other borrowings in the amount of \$129.5 million offset by the repayment of bank borrowing in the amount of \$103.6 million.

Table of Contents

Net cash provided by financing activities for the year ended December 31, 2011 was \$112.8 million, primarily resulting from the proceeds received from the bank borrowings in the amount of \$186.6 million offset by the repayment of bank and other borrowings in the amount of \$73.8 million.

Net cash used in financing activities for the year ended December 31, 2010 was \$45.5 million, primarily resulting from the proceeds of our initial public offering, bank borrowings and borrowings from a third party in the amount of \$79.5 million, \$10.6 million, and \$3.8 million respectively, offset by the repayment of bank borrowing and other borrowing in the amount of \$48.5 million.

Capital Expenditures

We made capital expenditures of \$252.7 million and \$105.7 million for the construction of our polysilicon, wafer and module production facilities and purchase of polysilicon, wafer and module production equipments in 2011 and 2012, respectively. Our capital expenditures will increase in the future. We expect that we will require approximately \$25.8 million for capital expenditures in 2013 which will be used primarily for technical improvements and equipment enhancements for our Phase 1 polysilicon facilities in Wanzhou. We intend to use cash generated from operating activities and take other actions to obtain alternative sources of financing, such as obtaining loan facilities from financial institutions or entering into capital lease arrangements to meet our capital expenditure requirements. For additional information, see also

Liquidity and Capital Resources and Item 4. Information on the Company B. Business Overview Manufacturing Capacity in this annual report. Holding Company Structure

C. Research and Development, Patents and Licenses, Etc.

See Item 4. Information on the Company B. Business Overview Research and Development. See Item 4. Information on the Company B. Business Overview Intellectual Property.

D. Trend Information

We successfully completed the construction of our Phase 2 facilities in Xinjiang in September 2012 and ramped up the production at our Phase 2 facilities in Xinjiang by the end of March 2013. Other than as disclosed elsewhere in this annual report, we are not aware of any trends, uncertainties, demands, commitments or events since the beginning of our fiscal year 2012 that are reasonably likely to have a material effect on our net revenues, income from operations, profitability, liquidity or capital resources, or that would cause the disclosed financial information to be not necessarily indicative of future operating results or financial condition.

E. Off Balance Sheet Commitments and Arrangements

We have not entered into any financial guarantees or other commitments to guarantee the payment obligations of third parties. Furthermore, we do not have any retained or contingent interest in assets transferred to an unconsolidated entity that serves as credit, liquidity or market risk support to such entity. We do not have any variable interest in any unconsolidated entity that provides financing, liquidity, market risk or credit support to us or that engages in leasing, hedging or research and development services with us.

F. Tabular Disclosure of Contractual Obligations

The following table sets forth our contractual obligations and commercial commitments as of December 31, 2012:

	Payments due by Period			
	Less than 1 Year	1-3 Years	3-5 Years	More Than 5 Years
Total				
	(in thousands)			

Contractual obligations:

Edgar Filing: DAQO NEW ENERGY CORP. - Form 20-F

Long-term debt ⁽¹⁾⁽²⁾	\$ 256,527	\$ 69,006	\$ 131,353	\$ 56,168	\$
Other long-term liabilities reflected on our balance sheet ⁽³⁾	1,126		1,126		
Capital commitments ⁽⁴⁾	20,497	20,497			
Operating lease obligations ⁽⁵⁾	209	162	47		
Total obligations	\$ 278,359	\$ 89,665	\$ 132,526	\$ 56,168	\$

Notes:

- (1) Includes floating rate interest payments. Our floating rate debts are all RMB-denominated and the interest rates will be adjusted annually by the lenders based on the updated benchmark interest rates published by the People's Bank of China. Our weighted average floating interest rate as of December 31, 2012 was 6.92%, which was used for the calculation of the total amount of our long-term debts.
- (2) As of December 31, 2012, long-term bank loans in the amount of \$187.5 million were guaranteed by Daqo Group.

Table of Contents

- (3) Includes long-term payables for purchase of property, plant and equipment and advance from customers.
- (4) Represents commitments relating to our purchase of property, plant and equipment for our production capacity expansion, including payment commitments to our project contractors.
- (5) Represents Chongqing Daqo's obligation under the lease agreement for use of its Shanghai office until April 2014.

G. Safe Harbor

This annual report on Form 20-F contains forward-looking statements. These statements are made under the safe harbor provisions of Section 21E of the Securities Exchange Act of 1934, as amended. These forward-looking statements can be identified by terminology such as will, expects, anticipates, future, intends, plans, believes, estimates, may, intend, it is possible, subject to and similar statements. The sections titled Item 3. Key Information D. Risk Factors, Item 4. Information on the Company, and Item 5. Operating and Financial Review and Prospects, as well as our strategic and operational plans, contain forward-looking statements. We may also make written or oral forward-looking statements in our filings with the Securities and Exchange Commission, in our annual report to shareholders, in press releases and other written materials and in oral statements made by our officers, directors or employees to third parties. Statements that are not historical facts, including statements about our beliefs and expectations, are forward-looking statements and are subject to change, and such change may be material and may have a material adverse effect on our financial condition and results of operations for one or more prior periods. Forward-looking statements involve inherent risks and uncertainties. A number of important factors could cause actual results to differ materially from those contained, either expressly or impliedly, in any forward-looking statement in this annual report on Form 20-F, including but not limited to the following: the demand for photovoltaic products and the development of photovoltaic technologies; global supply and demand for polysilicon; alternative technologies in cell manufacturing; our ability to significantly expand our polysilicon production capacity and output; and the reduction in or elimination of government subsidies and economic incentives for solar energy applications. All information provided in this annual report on Form 20-F and in the exhibits is as of the date of this annual report on Form 20-F, and we do not undertake any obligation to update any such information, except as required under applicable law.

ITEM 6. DIRECTORS, SENIOR MANAGEMENT AND EMPLOYEES**A. Directors and Executive Officers**

The following table sets forth information regarding our directors and executive officers as of the date of this annual report.

Name	Age	Position/ Title
Guangfu Xu	70	Chairman of the board of directors
Xiang Xu	42	Director
Dafeng Shi	41	Director
Gongda Yao	54	Director and chief executive officer
Fumin Zhuo	60	Independent Director
Rongling Chen	70	Independent Director
Minsong Liang	44	Independent Director
Shuming Zhao	60	Independent Director
Arthur Wong	53	Independent Director
Bing Sun	41	Chief financial officer
Tracy Tianqun Zhou	51	Chief marketing officer
Guoping Zhu	41	Chief technology officer

Mr. Guangfu Xu is the chairman of our board of directors. Mr. Xu is principally responsible for formulating our strategic development objectives. Mr. Xu has been the chairman and general manager of Daqo Group since January 1984 and currently holds directorship positions with 27 subsidiaries and affiliated entities of Daqo Group. Mr. Xu joined Xinba General Company, the predecessor entity of Daqo Group, in 1966 and has been instrumental in building Daqo Group from a small township and village enterprise to a leading manufacturer of electrical systems in China. Mr. Xu is a member of the Ninth People's Congress of Jiangsu Province and the vice chairman of the Standing Committee of the Ninth Yangzhong City People's Congress. Mr. Xu was named a *National Township and Village Entrepreneur* by the Ministry of Agriculture of China in 2001 and 2002. Mr. Xu graduated from secondary school in 1960.

Mr. Xiang Xu is one of our directors. Mr. Xu is also the vice chairman of the board and president of Daqo Group and currently holds directorship positions with 25 subsidiaries of Daqo Group. Mr. Xu served as the general manager of Jiangsu Changjiang Electric Co., Ltd., a subsidiary of

Edgar Filing: DAQO NEW ENERGY CORP. - Form 20-F

Daqo Group, from January 2000 through May 2006. Mr. Xu received his EMBA degree from Nanjing University in 2004. Mr. Xiang Xu is the son of Mr. Guangfu Xu.

Table of Contents

Mr. Dafeng Shi is one of our directors. Mr. Shi was serving as a director of the Company since its initial public offering until October 2011. Mr. Shi has been the vice president for finance of Daqo Group since January 2006 and currently holds directorship positions with four subsidiaries and affiliated entities of Daqo Group. Prior to joining Daqo Group, Mr. Shi served as the vice president of Yangzhong Tianyuan Accounting Firm from 2000 to 2001. Mr. Shi received his bachelor's degree in economic management from the Correspondence Institute of the Central Party School in 1997 and his associate degree in accounting from Nanjing University of Finance & Economics in 1992. Mr. Shi received his master degree of professional accountancy from The Chinese University of Hong Kong. Mr. Shi is a Certified Public Accountant in China.

Dr. Gongda Yao is one of our directors and chief executive officer. Dr. Yao has served as our director and chief executive officer since August 2009. Dr. Yao has extensive experience in the electronic development and manufacturing industry. Prior to joining our company, Dr. Yao served as the vice president and China general manager for Applied Materials from October 2006 to July 2008. Dr. Yao was also the vice president and general manager of the Integrated Metal Business Unit of Novellus Systems from October 2005 to October 2006, and vice president of operations at Ciwest Semiconductor Company from April 2005 to October 2005. Before that, Dr. Yao worked for Applied Materials at various management positions for 11 years. Dr. Yao received his Ph.D. in materials science & engineering from the State University of New York at Stony Brook in 1992, his master's degree in materials science from Tongji University and the Chinese Academy of Science in 1984 and his bachelor's degree in theoretical physics from Shanghai University of Science and Technology in 1982. Dr. Yao holds more than 10 U.S. patents and has authored or co-authored more than 40 technical articles and papers.

Mr. Fumin Zhuo is one of our independent directors. Mr. Zhuo has served as our director since November 2009. Mr. Zhuo has also served as independent directors to SRE Group Ltd., a company listed on the Hong Kong Stock Exchange and China Enterprise Company Limited, a company listed on the Shanghai Stock Exchange. Mr. Zhuo has also served as non-executive directors to Besunyen Holdings Company Limited, a company listed on the Hong Kong Stock Exchange and Grandhope Biotech Co., Ltd. a company listed on the Shanghai Stock Exchange. Mr. Zhuo has over two decades experience in investment and corporate management. Mr. Zhuo is currently a managing partner of Granite Global Ventures III L.L.C., a general partner of SIG Capital Limited and Chairman of Venture Star Investment (HK) Limited. Prior to joining SIG Capital Limited in July 2005, Mr. Zhuo served as the chairman and chief executive officer of Vertex China Investment Company, a company concentrating in investments in the Greater China region since July 2002. From 1995 to July 2002, Mr. Zhuo was the chief executive officer of Shanghai Industrial Holding Ltd. and the chairman of SIIC Medical Science & Technology (Group). Prior to that starting in 1987, Mr. Zhuo served as chief assistant officer of the Shanghai Economic System Reform Committee. Mr. Zhuo has extensive experience in venture capital fund formation, mergers and acquisitions, and investment management. Mr. Zhuo received his master's degree in economics from Fudan University and his bachelor's degree in enterprise management from Shanghai Jiaotong University's Electrical Engineering School.

Mr. Rongling Chen is one of our independent directors. Mr. Chen has served as our director since October 2010. Mr. Chen has served as an independent director to Tianjin Zhonghuan Semiconductor Co., Ltd., a company listed on Shenzhen Stock Exchange. Between 2010 and 2012 Mr. Chen was a vice president of Applied Materials and chief administration officer of Applied Materials China. Mr. Chen was an executive advisor of IMEC, a leading advanced semiconductor R&D center based in Belgium, and also a senior advisor and chairman of China advisory board to SEMI, a global industry association serving the manufacturing supply chains for the microelectronic, display and photovoltaic industries. Mr. Chen started working for Applied Materials in 1984, and has served in various senior positions, including vice president, chairman of Applied Materials China and head of China marketing and corporate affairs, before retiring in 2012. Mr. Chen received his bachelor's degree in semiconductor devices and materials from Zhe Jiang University.

Dr. Minsong Liang is one of our independent directors. Dr. Liang has served as our director since October 2011. Dr. Liang is currently a co-managing partner of CLA Partners, a boutique investment banking firm in China. Dr. Liang serves as an independent director to Qingdao Eastsoft Communication Technology Co. Ltd., a company listed on Shenzhen Stock Exchange and to Yunnan International Trust & Investment Co., Ltd., a financial services company in China. Prior to joining CLA Partners, Dr. Liang has held various management positions at China Securities Regulatory Commission and State-owned Assets Management Commission of Yunnan Province. Dr. Liang received his Ph.D. in economics from the University of Michigan at Ann Arbor and J.D. from New York University School of Law. He received his bachelor's degree in economics from Beijing University.

Mr. Shuming Zhao is one of our independent directors. Mr. Zhao has served as our director since October 2011. Mr. Zhao is dean of the Nanjing University School of Business. In addition, Mr. Zhao is an adjunct professor at the University of Southern California Marshall School of Business, Claremont Graduate University, Macau University of Science and Technology and Nanjing University of Post and Telecommunications. Mr. Zhao serves as independent directors to Jiangsu Little Swan Ltd. in China and MFC Industrial Ltd., a NYSE-listed Canadian company. Mr. Zhao received his bachelor's degree in English language from Nanjing University and a master's degree in education and a Ph.D. in management, both from Claremont Graduate University.

Table of Contents

Mr. Arthur Wong is one of our independent directors. Mr. Wong has served as our director since December 2012. Mr. Arthur Wong is the Chief Financial Officer of Beijing Radio Cultural Transmission Company Limited. He also currently serves as an independent director for VisionChina Media Inc. and China Automotive Systems, Inc., both listed on the NASDAQ, and Besunyen Holdings Company Limited, a company listed on the Hong Kong Stock Exchange. From 2008 to 2012, Mr. Wong served as Chief Financial Officer for Asia New-Energy, Nobao Renewable Energy and GreenTree Inns Hotel Management Group sequentially. From 1982 to 2008, Mr. Wong worked for Deloitte Touche Tohmatsu, in Hong Kong, San Jose and Beijing over various periods of time, most recently as a partner in the Beijing office. Mr. Wong received a bachelor's degree in applied economics from the University of San Francisco and a higher diploma of accountancy from Hong Kong Polytechnic University. He is a member of the American Institute of Certified Public Accountants and the Hong Kong Institute of Certified Public Accountants.

Mr. Bing Sun is our chief financial officer. Mr. Sun joined us, as our chief financial officer in February 2012, from Shunda Holdings Co, a solar photovoltaic company based in China, where he was the Chief Financial Officer since June 2008. Prior to Shunda Holdings, Mr. Sun was financial controller at BCD Semiconductor, a leading analog integrated device manufacturer in China from April 2007 to June 2008. Mr. Sun's earlier experiences include serving as audit manager at Deloitte Touche Tohmatsu and compliance manager at The Brinks Company. Mr. Sun holds MBA degree with concentration in accounting from Virginia Commonwealth University and he is a U.S. Certified Public Accountant.

Dr. Tracy Tianqun Zhou is our chief marketing officer. Dr. Zhou has served as our chief marketing officer since October 2012. Dr. Zhou served as our chief technology officer between January 2009 and October 2012. Prior to joining us in January 2009, Dr. Zhou served as a product manager at Silicon Quest International in Santa Clara, California from January 2008. From 2004 to 2008, Dr. Zhou was the senior field applications engineer at MEMC Electronics Materials, Inc. in San Jose, California. Before that, Dr. Zhou was the silicon business unit manager at West Coast Quart from 2001 to 2004, operations director at Unisil Corp from 1998 to 2001 and senior process engineer at Mitsubishi Silicon America (now Sumco) from 1994 to 1998. Dr. Zhou received her Ph.D. in materials science and engineering from North Carolina State University in 1993 and a master's degree from the Shanghai Institute of Ceramics in 1986. Dr. Zhou received her bachelor's degree in chemistry from the University of Science and Technology of China in 1982.

Mr. Guoping Zhu is our chief technology officer. Mr. Zhu has served as our chief technology officer since October 2012. Mr. Zhu joined our company in August 2006 and was previously the deputy general manager of Xinjiang Daqo. Prior to his tenure in Xinjiang, Mr. Zhu served as a technologist and deputy general manager at Chongqing Daqo Group. Mr. Zhu has over 18 years of experience in chemical, materials, and electric industries. He holds a bachelor's degree from Tianjin University of Science and Technology.

Composition of Board of Directors

Our board of directors consists of nine directors. A director is not required to hold any shares in our company by way of qualification. A director may vote with respect to any contract or transaction in which he or she is materially interested provided the nature of the interest is disclosed prior to its consideration. Subject to our Third Amended and Restated Memorandum and Articles of Association, the directors may exercise all the powers of our company to borrow money, mortgage his or her undertaking, property and uncalled capital, and issue debentures or other securities whether outright or as security for any debt, liability or obligation of our company or of any third party. We have a majority independent board and fully independent audit committee, compensation committee and nominating and corporate governance committee, and are in full compliance with applicable SEC and NYSE rules regarding the board and committee composition.

B. Compensation

In 2012, our aggregate payments of cash to directors or executive officers was approximately \$0.6 million. In 2012, our directors and executive officers received options under our share incentive plan. See [Share Incentive Plan](#).

Table of Contents

Share Incentive Plan

In August 2009, we adopted the 2009 share incentive plan to attract and retain the best available personnel, provide additional incentives to employees, directors and consultants, and promote the success of our business. Our board of directors has authorized the issuance of up to 15,000,000 ordinary shares upon the exercise of awards granted under the Option Plan. As of the date of this annual report, options to purchase a total of 8,990,000 of our ordinary shares have been granted and 6,951,979 are outstanding.

The following paragraphs summarize the terms of the Option Plan.

Plan Administration. Our board of directors, or a committee designated by our board or directors, will administer the plan. The committee or the full board of directors, as appropriate, will determine the provisions and terms and conditions of each option grant.

Award Agreement. Options and stock purchase rights granted under our plan are evidenced by a stock option agreement or a stock purchase right agreement, as applicable, that sets forth the terms, conditions and limitations for each grant. In addition, the stock option agreement and the stock purchase right agreement also provide that securities granted are subject to the lock-up restrictions, if any, imposed by us or the underwriters for our initial public offering in connection therewith.

Exercise Price. The exercise price subject to an option shall be determined by the plan administrator and set forth in the award agreement. The exercise price may be amended or adjusted in the absolute discretion of the plan administrator, the determination of which shall be final, binding and conclusive. To the extent not prohibited by applicable laws or any exchange rule, a downward adjustment of the exercise prices of options shall be effective without the approval of the shareholders or the approval of the affected participants.

Eligibility. We may grant awards to our employees, directors and consultants or those of any of our related entities, which include our subsidiaries or any entities in which we hold a substantial ownership interest.

Table of Contents

Term of the Options. The term of each option grant shall be stated in the stock option agreement, provided that the term shall not exceed 10 years from the date of the grant.

Vesting Schedule. In general, the plan administrator determines, or the stock option agreement specifies, the vesting schedule.

Transfer Restrictions. Options to purchase our ordinary shares may not be transferred in any manner by the optionee other than by will or the laws of succession and may be exercised during the lifetime of the optionee only by the optionee.

Termination of the Plan. Unless terminated earlier, the plan will terminate automatically in 2019. Our board of directors has the authority to amend or terminate the plan subject to shareholder approval to the extent necessary to comply with applicable law. However, no such action may (i) impair the rights of any optionee unless agreed by the optionee and the plan administrator or (ii) affect the plan administrator's ability to exercise the powers granted to it under our plan.

The following table summarizes, as of the date of this annual report, the options granted to our senior executive officers, directors and to other individuals as a group, without giving effect to the options that were exercised or terminated, if any.

Name	Ordinary Shares Underlying Options Awarded	Exercise Price (\$/Share)	Date of Grant	Date of Expiration

C. Board Practices
Code of Business Conduct and Ethics

Edgar Filing: DAQO NEW ENERGY CORP. - Form 20-F

Our code of business conduct and ethics provides that our directors and officers are expected to avoid any action, position or interest that conflicts with the interests of our company or gives the appearance of a conflict. Directors and officers have an obligation under our code of business conduct and ethics to advance our company's interests when the opportunity to do so arises.

Table of Contents

Duties of Directors

Under Cayman Islands law, our directors have a fiduciary duty to act honestly, in good faith and with a view to our best interests. Our directors also have a duty to exercise the skill they actually possess and such care and diligence that a reasonably prudent person would exercise in comparable circumstances. In fulfilling their duty of care to us, our directors must ensure compliance with our memorandum and articles of association, as amended and restated from time to time. A shareholder has the right to seek damages if a duty owed by our directors is breached.

The functions and powers of our board of directors include, among other things:

convening shareholders annual general meetings and reporting its work to shareholders at such meetings;

declaring dividends and distributions;

appointing officers and determining the term of office of officers;

subject to our Third Amended and Restated Memorandum and Articles of Association, exercising the borrowing powers of our company and mortgaging the property of our company; and

approving the transfer of shares of our company, including the registering of such shares in our share register.

Terms of Directors and Executive Officers

Our officers are elected by and serve at the discretion of the board of directors. Our directors are not subject to a term of office and hold office until such time as they are removed from office in accordance with our Third Amended and Restated Memorandum and Articles of Association. A director will be removed from office automatically if, among other things, the director (1) becomes bankrupt or makes any arrangement or composition with his creditors; or (2) dies or becomes of unsound mind.

Committees of the Board of Directors

Audit Committee

Our audit committee consists of Mr. Arthur Wong, Mr. Rongling Chen and Dr. Minsong Liang, and is chaired by Mr. Wong. All of our audit committee members satisfy the independence requirements of Section 303A of the Corporate Governance Rules of the New York Stock Exchange and meet the independence standards under Rule 10A-3 under the Securities Exchange Act of 1934, as amended. We have determined that Mr. Wong qualifies as an audit committee financial expert. The audit committee oversees our accounting and financial reporting processes and the audits of the financial statements of our company. The audit committee is responsible for, among other things:

selecting our independent auditors and pre-approving all auditing and non-auditing services permitted to be performed by our independent auditors;

reviewing with our independent auditors any audit problems or difficulties and management's response to such audit problems or difficulties;

reviewing and approving all proposed related party transactions, as defined in Item 404 of Regulation S-K under the Securities Act;

discussing the annual audited financial statements with management and our independent auditors;

Table of Contents

reviewing major issues as to the adequacy of our internal controls and any special audit steps adopted in light of material control deficiencies;

annually reviewing and reassessing the adequacy of our audit committee charter;

such other matters that are specifically delegated to our audit committee by our board of directors from time to time;

meeting separately and periodically with management and our internal and independent auditors; and

reporting regularly to the full board of directors.

In 2012, our audit committee held meetings or passed resolutions by unanimous written consent five times.

Compensation Committee

Our compensation committee consists of Mr. Fumin Zhuo, Mr. Arthur Wong and Mr. Rongling Chen, and is chaired by Mr. Zhuo. All of our compensation committee members satisfy the independence requirements of Section 303A of the Corporate Governance Rules of the New York Stock Exchange. Our compensation committee assists the board in reviewing and approving the compensation structure of our directors and executive officers, including all forms of compensation to be provided to our directors and executive officers. Members of the compensation committee are not prohibited from direct involvement in determining their own compensation. Our chief executive officer may not be present at any committee meeting during which his compensation is deliberated. The compensation committee is responsible for, among other things:

approving and overseeing the compensation package for our executive officers;

reviewing and making recommendations to the board with respect to the compensation of our directors;

reviewing and approving corporate goals and objectives relevant to the compensation of our chief executive officer, evaluating the performance of our chief executive officer in light of those goals and objectives, and setting the compensation level of our chief executive officer based on this evaluation; and

reviewing periodically and making recommendations to the board regarding any long-term incentive compensation or equity plans, programs or similar arrangements, annual bonuses, employee pension and welfare benefit plans.

In 2012, our compensation committee had not hold meetings or pass resolutions. In March 2013, our compensation committee passed resolutions regarding adjustments to directors' compensation and modification of option programs of certain directors.

Corporate Governance and Nominating Committee

Our corporate governance and nominating committee consists of Mr. Shuming Zhao, Mr. Arthur Wong and Mr. Rongling Chen, and is chaired by Mr. Zhao. All of our corporate governance and nominating committee members satisfy the independence requirements of Section 303A of the Corporate Governance Rules of the New York Stock Exchange. The corporate governance and nominating committee assists the board of directors in identifying individuals qualified to become our directors and in determining the composition of the board and its committees. The corporate governance and nominating committee is responsible for, among other things:

Edgar Filing: DAQO NEW ENERGY CORP. - Form 20-F

identifying and recommending to the board nominees for election or re-election to the board, or for appointment to fill any vacancy;

reviewing annually with the board the current composition of the board in light of the characteristics of independence, age, skills, experience and availability of service to us;

Table of Contents

identifying and recommending to the board the directors to serve as members of the board's committees;

advising the board periodically with respect to significant developments in the law and practice of corporate governance as well as our compliance with applicable laws and regulations, and making recommendations to the board on all matters of corporate governance and on any corrective action to be taken; and

monitoring compliance with our code of business conduct and ethics, including reviewing the adequacy and effectiveness of our procedures to ensure proper compliance.

In 2012, our corporate governance and nominating committee had not held meetings or passed resolutions by unanimous written consent.

Interested Transactions

A director may vote in respect of any contract or transaction in which he or she is interested, provided that the nature of the interest of any directors in such contract or transaction is disclosed by him or her at or prior to its consideration and any vote on that matter.

Remuneration and Borrowing

The directors may determine remuneration to be paid to the directors. The compensation committee will assist the directors in reviewing and approving the compensation structure for the directors. Subject to our Third Amended and Restated Memorandum and Articles of Association, the directors may exercise all the powers of our company to borrow money and to mortgage or charge its undertaking, property and uncalled capital, and to issue debentures or other securities whether outright or as security for any debt obligations of our company or of any third party.

Qualification

There is no shareholding qualification for directors.

Employment Agreements

We have entered into an employment agreement with each of our executive officers. The terms of the employment agreements are substantially similar for each executive officer, except as noted below. We may terminate an executive officer's employment for cause, at any time, without notice or remuneration, for certain acts of the officer including, but not limited to, a serious criminal act, willful misconduct to our detriment or a failure to perform agreed duties. We may terminate employment at any time without cause upon advance written notice to the executive. The executive may resign at any time if such resignation is approved by the board or an alternative arrangement with respect to the employment is agreed by the board.

Each executive officer has agreed to hold, both during and after the termination of his or her employment agreement, in strict confidence and not to use, except as required in the performance of his or her duties in connection with the employment or as compelled by law, any of our or our customers' confidential information or trade secrets. Each executive officer also agrees to comply with all material applicable laws and regulations related to his or her responsibilities at our company as well as all material written corporate and business policies and procedures of our company.

Each executive officer has agreed to be bound by non-competition restrictions during the term of his or her employment and for two years following the termination of such employment agreement. Specifically, each executive officer has agreed not to (1) assume employment with or provide services as a director for any of our competitors who operate in a restricted area; (2) solicit or seek any business orders from our customers; or (3) seek directly or indirectly, to solicit the services of any of our employees.

Table of Contents**D. Employees**

As of December 31, 2012, we employed 1,545 employees, including 960 in manufacturing, 188 in equipment maintenance, 102 in quality assurance, 20 in purchasing, 60 in research and development, 5 in sales and marketing and 166 in general and administrative. In addition, we engaged independent contractors and temporary personnel from time to time. All of these employees and independent contractors are located at our facilities in Wanzhou and Xinjiang, China. As of December 31, 2012, we employed approximately 44 temporary personnel through third-party contractors.

As required by regulations in China, we participate in various employee social security plans that are administered by municipal and provincial governments, including housing, pension, medical insurance and unemployment insurance. We are required under Chinese law to make contributions to the employee benefit plans at specified percentages of the salaries, bonuses and certain allowance of our employees, up to a maximum amount specified by the local government from time to time.

We typically enter into a standard confidentiality and employment agreement with our research and development personnel. These contracts involve a covenant that prohibits them from engaging in any activities that compete with our business within certain agreed period after the termination of their employment with us, and during such non-competition period.

We believe we maintain a good working relationship with our employees, and we have not experienced any labor disputes or any difficulty in recruiting staff for our operations.

E. Share Ownership

The following table sets forth information with respect to the beneficial ownership of our ordinary shares, as of the date of this annual report, by:

each of our directors and executive officers; and

each person known to us to own beneficially more than 5.0% of our ordinary shares.

The calculations in the table below are based on 172,877,433 ordinary shares outstanding as of the date of this annual report.

Beneficial ownership is determined in accordance with the rules and regulations of the SEC. In computing the number of shares beneficially owned by a person and the percentage ownership of that person, we have included shares that the person has the right to acquire within 60 days of the date of this annual report, including through the exercise of any option, warrant or other right or the conversion of any other security. These shares, however, are not included in the computation of the percentage ownership of any other person.

Table of Contents

As of April 23, 2013, 172,877,433 of our ordinary shares were issued and outstanding. To our knowledge, 43,163,330 ordinary shares, representing approximately 25.0% of our total outstanding shares, were held by one record holder in the United States, which was JPMorgan Chase Bank, N.A., the depository of our ADS program. The number of beneficial owners of our ADSs in the United States is likely to be much larger than the number of record holders of our ordinary shares in the United States. None of our directors or executive officers that are shareholders or principal shareholders has different voting rights from other shareholders. We are not aware of any arrangement that may, at a subsequent date, result in a change of control of our company.

ITEM 7. MAJOR SHAREHOLDERS AND RELATED PARTY TRANSACTIONS**A. Major Shareholders**

Please refer to Item 6. Directors, Senior Management and Employees E. Share Ownership.

B. Related Party Transactions**Transactions and balance with Daqo Group and its subsidiaries**

Any transactions we entered into with Daqo Group or its subsidiaries are treated as related party transactions, as summarized below:

Bank financing transactions involving Daqo Group

On October 8, 2007, Daqo New Material entered into a seven-year long term bank borrowing agreement with China Construction Bank. Such borrowing is restricted to the purchase of fixed assets and has a maximum borrowing amount \$63.4 million (RMB400 million), bearing standard five-year long term interest rate issued by People's Bank of China. The borrowing is guaranteed by Daqo Group. As of December 31, 2012, Daqo New Material had drawn down \$63.4 million (RMB400 million), repaid \$41.7 million (RMB260 million) and had no facility available for future draw down. There are no financial covenants associated with the facility.

On January 21, 2009, Chongqing Daqo entered into a six-year long term facility agreement with China Construction Bank. Such borrowing is restricted to the purchase of fixed assets and has a maximum borrowing amount \$63.4 million (RMB400 million), bearing standard five-year long term interest rate issued by People's Bank of China. The borrowing is guaranteed by Daqo Group. As of December 31, 2012, Chongqing Daqo had drawn down \$63.4 million (RMB400 million), repaid \$45.3 million (RMB282 million) and had no facility available for future draw down. There are no financial covenants associated with the facility.

On September 28, 2011, Chongqing Daqo entered into a four-year credit facility agreement with Huaxia Bank with maximum amount of \$63.4 million (RMB400 million). Chongqing Daqo drew down \$60.2 million (RMB380 million), including: \$20.6 million (RMB130 million) with fixed interest rate of 6.65%, which is designated for working capital and \$39.6 million (RMB250 million) with fixed interest rate of 6.9% which is restricted to the purchase of fixed assets. Chongqing Daqo used the remaining facility of \$3.2 million (RMB20 million) through use of bank acceptance notes. Chongqing Daqo repaid \$6.5 million in 2012 and had no facility available for future draw down as of December 31, 2012. This credit facility is guaranteed by Daqo Group and also collateralized by Chongqing Daqo's land use right and property, plant and equipment, which has a book value of \$8.4 million (RMB 52 million). The facility contains a covenant which requires the Company to maintain a certain debt to asset ratio, which Chongqing Daqo was in compliance with as of December 31, 2012.

On September 30, 2011, Xinjiang Daqo entered into a six-year bank borrowing agreement with Bank of China. Such borrowing is restricted to the purchase of fixed assets and has a maximum borrowing amount of \$155.4 million (RMB980 million) and bears interest at standard five-year long term interest rate issued by People's Bank of China plus 5%. The borrowing contains a debt to asset ratio financial covenant, which Xinjiang Daqo was in compliance with as of December 31, 2012. The borrowing is guaranteed by Daqo Group, Daqo New Material, two affiliated companies under Daqo Group and Mr. Guangfu Xu. As of December 31, 2012, Xinjiang Daqo had drawn down \$120 million (RMB750 million) and had \$36 million (RMB230 million) facility available for future draw down. The loan was in compliance with the covenants as of December 31, 2012.

On October 26, 2011, Chongqing Daqo entered into a four-year credit facility agreement with Chongqing Rural Commercial Bank. Such borrowing is restricted to the purchase of fixed assets and has a maximum borrowing amount \$38.9 million (RMB 245.5 million) and bears interest at three to five-year long term interest rate issued by People's Bank of China plus 10%. The borrowing is guaranteed by Daqo Group,

Edgar Filing: DAQO NEW ENERGY CORP. - Form 20-F

Mr. Guangfu Xu and Mr. Xiang Xu. As of December 31, 2012, Chongqing Daqo had drawn down \$38.9 million (RMB 245.5 million) and repaid \$9.1 million (RMB 60 million). There are no financial covenants associated with the facility.

Table of Contents

The weighted average interest rate as of December 31, 2011 and 2012 for the Group long-term bank borrowings was 6.93% and 6.89%, respectively.

Daqo Group or its subsidiaries provided guarantees for each of the aforementioned bank financing transactions. As of December 31, 2010, 2011 and 2012, the aggregate balance of these bank borrowings was in the U.S. dollar equivalent amount of \$154.6 million, \$277.5 million and \$307.8 million, respectively.

Transactions with Daqo Group and its subsidiaries

In 2012, the Company sold 100% entity interest in Nanjing Daqo to Daqo Group for a consideration of \$9.9 million and received \$4.8 million as of December 31, 2012. Furthermore, the Company purchased fixed assets totaling \$7.8 million from Daqo Group and had prepaid \$1.3 million as of December 31, 2012.

In 2012, the Company sold polysilicon and wafers in the amounts of \$0.6 million and \$2.2 million, respectively, to Zhenjiang Daqo.

In 2012, the Company entered into a polysilicon sales contract with Daqo Solar and has received \$13.5 million in advanced payment as of December 31, 2012. The Company also entered into a polysilicon sales contract with Xinjiang Daqo Investment for \$8.0 million and has received \$2.4 million in advanced payment as of December 31, 2012.

In August 2012, the Company entered into a one-year loan agreement with Nanjing Daqo for \$1.6 million (RMB10 million). The interest rate is fixed at 6%. Furthermore, the Company sold \$0.1 million of cells to Nanjing Daqo.

In 2012, the Company purchased equipment and raw material from other subsidiaries of Daqo Group at the costs of \$0.2 million and less than \$0.01 million, respectively.

As of December 31, 2010, 2011 and 2012, the Company had an outstanding payable to Daqo Group and its subsidiaries in the amount of \$0.4 million, \$3.2 million and \$23.7 million, respectively, for technical consulting and engineering services, general and administrative expenses and the purchase of property, plant and equipment.

ITEM 8. FINANCIAL INFORMATION

A. Consolidated Statements and Other Financial Information

See Item 18. Financial Statements.

Legal Proceedings

We are currently not a party to any material legal or administrative proceedings and we are not aware of any material legal or administrative proceedings threatened against us. We may from time to time be subject to various legal or administrative proceedings arising in the ordinary course of business.

Dividend Policy

We have not declared or paid any dividends on our ordinary shares or ADSs. We have no present plan to declare and pay any dividends on our shares or ADSs in the near future. We currently intend to retain our available funds and any future earnings to operate and expand our business.

We are a holding company incorporated in the Cayman Islands. We rely on dividends from our subsidiaries in China for our cash needs. Current PRC regulations restrict the ability of our subsidiaries to pay dividends to us. See Item 3. Key Information D. Risk Factors Risks Relating to Doing Business in China We rely principally on dividends and other distributions on equity paid by our wholly owned operating subsidiaries to fund any cash and financing requirements we may have, and any limitation on the ability of our operating subsidiaries to pay dividends to us could have a material adverse effect on our ability to borrow money or pay dividends.

Subject to our Third Amended and Restated Memorandum and Articles of Association and the applicable laws, our board of directors has complete discretion as to whether to recommend a distribution of dividends to shareholders, and any distribution is further subject to the approval of our shareholders. Even if our board of directors decides to recommend dividends, the form, frequency and amount will depend upon our future operations and earnings, capital requirements and surplus, general financial condition, contractual restrictions and other factors that our board of directors may deem relevant. If we pay dividends, we will pay our ADS holders to the same extent as holders of our ordinary shares, subject to the terms of the deposit agreement, including the fees and expenses payable thereunder. Cash dividends on our ADSs and ordinary shares, if any, will be paid in U.S. dollars.

B. Significant Changes

Except as disclosed elsewhere in this annual report, we have not experienced any significant changes since the date of our audited consolidated financial statements included in this annual report.

ITEM 9. THE OFFER AND LISTING

A. Offering and Listing Details

See C. Markets.

Table of Contents**B. Plan of Distribution**

Not applicable.

C. Markets

Our ADSs, each representing 25 ordinary shares, have been listed on the New York Stock Exchange since October 7, 2010 and trade under the symbol DQ. Prior to December 21, 2012, each of our ADS represented five ordinary shares. We effected a change of the ADS to ordinary share ratio on December 21, 2012 from one ADS representing five ordinary shares to one ADS representing 25 ordinary shares. The ratio change has the same effect as a 1-for-5 reverse ADS split. The following table provides the high and low trading prices for our ADSs on the New York Stock Exchange for the periods indicated. For ease of comparison, the ADS prices before December 21, 2012 have been retroactively adjusted to reflect the ADS to ordinary share ratio change that took effect on December 21, 2012.

	Trading Price	
	High	Low
Annual High and Low		
Fiscal Year 2010 (from October 7, 2010)	77.15	48.50

B. Memorandum and Articles of Association

We are a Cayman Islands company and our affairs are governed by our memorandum and articles of association, as amended from time to time, and the Companies Law (2012 Revision) of the Cayman Islands, which is referred to as the Companies Law below. The following are summaries of material provisions of our Third Amended and Restated Memorandum and articles of association in effect as of the date of this annual report insofar as they relate to the material terms of our ordinary shares.

Registered Office

Our registered office in the Cayman Islands is located at the offices of International Corporation Services Ltd., P.O. Box 472, 2nd Floor Harbor Place, Grand Cayman KY1-1106, Cayman Islands. Our agent for service of process in the United States is Law Debenture Corporate Services Inc.

Board of Directors

We are managed by a board of directors which shall consist of no less than five members. Our board of directors currently consists of nine members. An appointment of a director may be in terms that the director shall automatically retire at the next or a subsequent annual general meeting.

Meetings of the board of directors may be convened at any time deemed necessary by any members of the board of directors in accordance with our Third Amended and Restated Memorandum and Articles of Association.

A meeting of the board of directors shall be competent to make lawful and binding decisions if a quorum is present. Under our Third Amended and Restated Memorandum and Articles of Association, the quorum necessary for the transaction of the business of our board of directors may be fixed by the board of directors and unless so fixed shall be a majority of the directors then in office. At any meeting of the directors, each director, be it by his presence or by his alternate, is entitled to one vote.

Questions arising at a meeting of the board of directors are required to be decided by simple majority votes of the members of the board of directors present or represented at the meeting. In the case of a tie vote, the resolution shall fail. Our board of directors may also pass resolutions without a meeting by unanimous written consent.

See also Item 6. Directors, Senior Management and Employees C. Board Practices Duties of Directors and Terms of Directors and Executive Officers.

Ordinary Shares

General

All of our outstanding ordinary shares are fully paid and non-assessable. Certificates representing the ordinary shares are issued in registered form. Our shareholders who are non-residents of the Cayman Islands may freely hold and vote their shares.

Dividend Rights

The holders of our ordinary shares are entitled to such dividends as may be declared by our board of directors subject to the Companies Law.

Voting Rights

Each ordinary share is entitled to one vote on all matters upon which the ordinary shares are entitled to vote. Voting at any meeting of shareholders is by show of hands unless a poll is demanded. A poll may be demanded by the chairman of our board of directors or any other shareholder holding at least ten percent of the shares given a right to vote at the meeting, present in person or by proxy.

Table of Contents

A quorum required for a meeting of shareholders consists of at least shareholders holding not less than an aggregate of one-third of all voting share capital of our company in issue present in person or by proxy and entitled to vote. Shareholders' meetings may be held annually and may be convened by our board of directors on its own initiative or upon a request to the directors by shareholders holding in aggregate not less than one third of our share capital as at that date carries the right of voting at general meeting of our company. Advance notice of at least seven days is required for the convening of our annual general meeting and other shareholders meetings.

An ordinary resolution to be passed by the shareholders requires the affirmative vote of a simple majority of the votes attaching to the ordinary shares cast in a general meeting, while a special resolution requires the affirmative vote of no less than two-thirds of the votes cast attaching to the ordinary shares. A special resolution is required for important matters such as a change of name. Holders of the ordinary shares may effect certain changes by ordinary resolution, including alter the amount of our authorized share capital, consolidate and divide all or any of our share capital into shares of larger amount than our existing share capital, and cancel any shares.

Transfer of Shares

Subject to the restrictions of our Third Amended and Restated Memorandum and Articles of Association, as applicable, any of our shareholders may transfer all or any of his or her ordinary shares by an instrument of transfer in the usual or common form or any other form approved by our board.

Our board of directors may, in its absolute discretion, decline to register any transfer of any ordinary share which is not fully paid up or on which we have a lien. Our directors may also decline to register any transfer of any ordinary share unless (a) the instrument of transfer is lodged with us, accompanied by the certificate for the ordinary shares to which it relates and such other evidence as our board of directors may reasonably require to show the right of the transferor to make the transfer; (b) the shares conceded are free of any lien in favor of us; or (c) a fee of such maximum sum as the New York Stock Exchange may determine to be payable, or such lesser sum as our board of directors may from time to time require, is paid to us in respect thereof.

If our directors refuse to register a transfer, they shall, within two months after the date on which the instrument of transfer was lodged, send to each of the transferor and the transferee notice of such refusal. The registration of transfers may, on 14 days' notice being given by advertisement in such one or more newspapers or by electronic means, be suspended and the register closed at such times and for such periods as our board of directors may from time to time determine, provided, however, that the registration of transfers shall not be suspended nor the register closed for more than 30 days.

Liquidation

On a return of capital on winding up or otherwise (other than on conversion, redemption or purchase of shares), assets available for distribution among the holders of ordinary shares shall be distributed among the holders of the ordinary shares on a pro rata basis. If our assets available for distribution are insufficient to repay all of the paid-up capital, the assets will be distributed so that the losses are borne by our shareholders proportionately.

Redemption of Shares

Subject to the provisions of the Companies Law, we may issue shares on terms that are subject to redemption, at our option or at the option of the holders, on such terms and in such manner as may be determined by special resolution.

Variations of Rights of Shares

All or any of the special rights attached to any class of shares may, subject to the provisions of the Companies Law, be varied either with the written consent of the holders of three-fourths of the issued shares of that class or with the sanction of a special resolution passed at a general meeting of the holders of the shares of that class.

Table of Contents

Inspection of Books and Records

Holders of our ordinary shares will have no general right under Cayman Islands law to inspect or obtain copies of our list of shareholders or our corporate records. However, we will provide our shareholders with annual audited financial statements. See H. Documents on Display.

Limitations on the Right to Own Shares

There are no limitations on the right to own our shares.

Disclosure of Shareholder Ownership

There are no provisions in our amended and restated memorandum and articles of association governing the ownership threshold above which shareholder ownership must be disclosed.

Demand Registration Rights and Form F-3 Registration Rights

When we are eligible for registration on Form F-3, holders of at least 10% of our outstanding registrable securities have the right to request that we file registration statements under Form F-3 covering the offer and sale of their securities.

We, however, are not obligated to effect a demand registration or a Form F-3 registration if, among other things, (1) we notify the requesting holder of the registrable securities of our intention to make a public offering within 180 days, (2) the dollar amount of securities to be sold is of an aggregate price to the public of less than \$5,000,000, or (3) we provide the requesting holders a certificate signed by our chief executive officer stating that in the good faith judgment of the board of directors the filing of such a registration statement will be materially detrimental to us and our shareholders. In the case of (3), we cannot exercise the deferral right more than once in any 12-month period.

C. Material Contracts

We have not entered into any material contracts other than in the ordinary course of business and other than those described in Item 4. Information on the Company B. Business Overview or elsewhere in this annual report.

D. Exchange Controls

See Item 4. Information on the Company B. Business Overview Regulation Foreign Currency Exchange.

E. Taxation

The following discussion of the material Cayman Islands, PRC and United States federal tax consequences of an investment in the ordinary shares or ADSs is based upon laws and relevant interpretations thereof in effect as of the date of this annual report, all of which are subject to change. This discussion does not deal with all possible tax consequences relating to an investment in the shares or ADSs, such as the tax consequences under U.S. state, local and other tax laws.

Cayman Islands Taxation

The Cayman Islands currently levies no taxes on individuals or corporations based upon profits, income, gains or appreciation and there is no taxation in the nature of inheritance tax or estate duty. There are no other taxes likely to be material to us levied by the Government of the Cayman Islands except for stamp duties which may be applicable on instruments executed in, or brought within the jurisdiction of the Cayman Islands. The Cayman Islands is not party to any double tax treaties. There are no exchange control regulations or currency restrictions in the Cayman Islands.

Table of Contents

Chinese Taxation

Under the PRC tax laws effective prior to January 1, 2008, dividends paid to foreign investors by foreign-invested enterprises, such as dividends paid to us by our PRC subsidiaries, were exempt from PRC withholding tax. Under the PRC Enterprise Income Tax Law and its implementation rules effective on January 1, 2008, all domestic and foreign-invested companies in China are subject to a uniform enterprise income tax at the rate of 25% and dividends from a PRC subsidiary to its foreign parent company are subject to a withholding tax at the rate of 10%, unless such foreign parent company's jurisdiction of incorporation has a tax treaty with China that provides for a reduced rate of withholding tax, or the tax is otherwise exempted or reduced pursuant to the PRC tax laws.

Under the EIT Law, enterprises organized under the laws of jurisdictions outside China with their de facto management bodies located within China are considered PRC resident enterprises and therefore be subject to PRC enterprise income tax at the rate of 25% on their worldwide income. Under the implementation rules of the EIT Law, de facto management bodies is defined as the bodies that have material and overall management and control over the business operations, personnel and human resources, finances and treasury, and acquisition and disposition of properties and other assets of an enterprise. In addition, a recent circular issued by the State Administration of Taxation on April 22, 2009 provides that a foreign enterprise controlled by a PRC company or a PRC company group will be classified as a resident enterprise with its de facto management bodies located within China if the following requirements are satisfied: (i) the senior management and core management departments in charge of its daily operations function mainly in the PRC; (ii) its financial and human resources decisions are subject to determination or approval by persons or bodies in the PRC; (iii) its major assets, accounting books, company seals, and minutes and files of its board and shareholders meetings are located or kept in the PRC; and (iv) more than half of the enterprise's directors or senior management with voting rights reside in the PRC. However, it remains unclear how PRC tax authority will treat an overseas company controlled by PRC natural persons rather than PRC enterprises like Daqo Cayman. The criteria set forth above do not apply to Daqo Cayman directly because Daqo Cayman is currently beneficially owned by Chinese individuals and is not a foreign enterprise controlled by a PRC company or a PRC company group. In addition, if new rules and interpretations are issued in the future specifying the criteria for determining whether a foreign entity beneficially owned by individual Chinese citizens is a resident enterprise under the EIT Law, we cannot assure you that Daqo Cayman will not be deemed a PRC resident enterprise.

If Daqo Cayman is classified as resident enterprise under the EIT Law, ADS holders who are not Chinese residents will be subject to a 10% withholding tax upon dividends payable by Daqo Cayman. However, the EIT law and regulations also provide that, if a resident enterprise directly invests in another resident enterprise, the dividends received by the investing resident enterprise from the invested resident enterprise are exempted from income tax, subject to certain conditions. Therefore, if Daqo Cayman is classified as resident enterprise under the EIT Law, the dividends received from our Chinese subsidiaries will be exempted from withholding tax.

Material United States Federal Income Tax Considerations

The following is a discussion of the material United States federal income tax considerations relating to the acquisition, ownership, and disposition of our ADSs or ordinary shares by U.S. Holders (as defined below) that will hold ADSs or ordinary shares as capital assets (generally, property held for investment) under the United States Internal Revenue Code of 1986, as amended (the Code). This discussion is based upon existing U.S. federal income tax law as in effect on the date of this annual report, which is subject to differing interpretations or change, possibly with retroactive effect. This discussion does not address all aspects of United States federal income taxation that may be important to particular investors in light of their individual investment circumstances, including investors subject to special tax rules (for example, financial institutions, insurance companies, broker-dealers, partnerships and their partners, and tax-exempt organizations (including private foundations)), holders who are not U.S. Holders, holders who own (directly, indirectly, or constructively) 10% or more of our voting stock, investors that will hold their ADSs or ordinary shares as part of a straddle, hedge, conversion, constructive sale, or other integrated transaction for United States federal income tax purposes, investors that are traders in securities that have elected the mark-to-market method of accounting, or investors that have a functional currency other than the United States dollar, all of whom may be subject to tax rules that differ significantly from those discussed below. In addition, this discussion does not address any non-United States, state, or local tax considerations. Each U.S. Holder is urged to consult its tax advisor regarding the United States federal, state, local, and non-United States income and other tax considerations of an investment in ADSs or ordinary shares.

Table of Contents

General

For purposes of this discussion, a U.S. Holder is a beneficial owner of our ADSs or ordinary shares that is, for United States federal income tax purposes, (i) an individual who is a citizen or resident of the United States, (ii) a corporation, or other entity taxable as a corporation for United States federal income tax purposes, created in, or organized under the law of the United States or any state thereof or the District of Columbia, (iii) an estate the income of which is includible in gross income for United States federal income tax purposes regardless of its source, or (iv) a trust (A) the administration of which is subject to the primary supervision of a United States court and which has one or more United States persons who have the authority to control all substantial decisions of the trust or (B) that has otherwise validly elected to be treated as a United States person under the Code.

If a partnership is a beneficial owner of our ADSs or ordinary shares, the tax treatment of a partner in the partnership will generally depend upon the status of the partner and the activities of the partnership. Partnerships and partners of a partnership holding our ADSs or ordinary shares are urged to consult their tax advisors regarding an investment in our ADSs or ordinary shares.

For United States federal income tax purposes, a U.S. Holder of ADSs will be treated as the beneficial owner of the underlying shares represented by the ADSs. Accordingly, deposits or withdrawals of ordinary shares for ADSs will not be subject to United States federal income tax.

Passive Foreign Investment Company Considerations

A non-United States corporation, such as our company, will be classified as a passive foreign investment company (or a PFIC), for United States federal income tax purposes for any taxable year, if either (i) 75% or more of its gross income for such year consists of certain types of passive income or (ii) 50% or more of the value of its assets (determined on the basis of a quarterly average) produce or are held for the production of passive income. For this purpose, cash and assets readily convertible into cash are categorized as passive assets and the company's unbooked intangibles are generally taken into account for determining the value of its assets. We will be treated as owning our proportionate share of the assets and earning our proportionate share of the income of any other corporation in which we own, directly or indirectly, more than 25% (by value) of the stock.

We do not believe that we were a PFIC, for United States federal income tax purposes, for the taxable year ended 2012. Although we do not currently expect that our assets or activities will change in a manner that would cause us to become a PFIC for our current taxable year or the foreseeable future, there can be no assurance our business plans will not change in a manner that will affect our PFIC status. In addition, because the value of our assets for purposes of the PFIC test will generally be determined by reference to the market price of our ADSs and ordinary shares, fluctuations in the market price of our ADSs and ordinary shares may increase the risk of us becoming a PFIC. Because there are uncertainties in the application of the relevant rules and PFIC status is a fact-intensive determination made on an annual basis, no assurance can be given that we are not or will not become classified as a PFIC.

The discussion below under Dividends and Sale or Other Disposition of Shares is written on the basis that we will not be classified as a PFIC for United States federal income tax purposes. The United States federal income tax rules that apply if we are classified as a PFIC for the current taxable year or subsequent taxable years are generally discussed below under Passive Foreign Investment Company Rules.

Dividends

Any cash distributions (including the amount of any taxes withheld) paid on ADSs or ordinary shares out of our earnings and profits, as determined under United States federal income tax principles, will generally be includible in the gross income of a U.S. Holder as dividend income. Because we do not intend to determine our earnings and profits on the basis of United States federal income tax principles, any distribution paid will generally be reported as a dividend for United States federal income tax purposes. A non-corporate recipient will be subject to tax at the lower capital gain tax rate applicable to qualified dividend income, provided that certain conditions are satisfied, including that (1) the ADSs or ordinary shares, as applicable, are readily tradable on an established securities market in the United States, or, in the event that the Company is deemed to be a PRC resident enterprise under the PRC Enterprise Income Tax Law, the Company is eligible for the benefits of the United States-PRC treaty, (2) we are neither a passive foreign investment company nor treated as such with respect to you (as discussed below) for the taxable year in which the dividend was paid and the preceding taxable year, and (3) certain holding period requirements are met. United States Treasury guidance indicates that ordinary shares, or ADSs representing such shares, are considered for the purpose of clause (1) above to be readily tradable on an established securities market in the United States if they are listed on the New York Stock Exchange, as are our ADSs (but not our ordinary shares). There can be no assurance that our ADSs will be considered readily tradable on an established securities market in the United States in later years. Since we do not expect that our ordinary shares will be listed on an established securities market in the United States, it is unclear whether the dividends that we pay on our ordinary shares that are not backed by ADSs currently meet

the conditions required for the reduced tax rate. Dividends received on the ADSs or ordinary shares are not expected to be eligible for the dividends received deduction allowed to corporations.

Table of Contents

Dividends will generally be treated as income from foreign sources for United States foreign tax credit purposes. A U.S. Holder may be eligible, subject to a number of complex limitations, to claim a foreign tax credit in respect of any foreign withholding taxes imposed on dividends received on ADSs or ordinary shares. A U.S. Holder who does not elect to claim a foreign tax credit for foreign tax withheld may instead claim a deduction for United States federal income tax purposes, in respect of such withholdings, but only for a year in which such holder elects to do so for all creditable foreign income taxes. The rules governing the foreign tax credits are complex. Accordingly, each U.S. Holder is advised to consult with its tax advisor regarding the availability of a foreign tax credit under its particular circumstances.

Sale or Other Disposition of ADSs or Ordinary Shares

A U.S. Holder will generally recognize capital gain or loss upon the sale or other disposition of ADSs or ordinary shares in an amount equal to the difference between the amount realized upon the disposition and the holder's adjusted tax basis in such ADSs or ordinary shares. Any capital gain or loss will be long-term if the ADSs or ordinary shares have been held for more than one year and will generally be United States source gain or loss for United States foreign tax credit purposes. The deductibility of a capital loss may be subject to limitations. U.S. Holders are urged to consult with their tax advisors regarding the tax consequences if a foreign withholding tax is imposed on a disposition of our ADSs or ordinary shares, including the availability of a foreign tax credit under their particular circumstances.

Passive Foreign Investment Company

If we are classified as a PFIC for any taxable year during which a U.S. Holder holds our ADSs or ordinary shares, and unless the U.S. Holder makes a mark-to-market election (as described below), the U.S. Holder will generally be subject to special tax rules that have a penalizing effect, regardless of whether we remain a PFIC, on (i) any excess distribution that we make to the U.S. Holder (which generally means any distribution paid during a taxable year to a U.S. Holder that is greater than 125 percent of the average annual distributions paid in the three preceding taxable years or, if shorter, the U.S. Holder's holding period for the ADSs or ordinary shares and (ii) any gain realized on the sale or other disposition, including a pledge, of ADSs or ordinary shares. Under these PFIC rules:

such excess distribution or gain will be allocated ratably over the U.S. Holder's holding period for the ADSs or ordinary shares;

such amount allocated to the current taxable year, and any taxable years in the U.S. Holder's holding period prior to the first taxable year in which we were a PFIC (a pre-PFIC year), will be taxable as ordinary income;

such amount allocated to each prior taxable year, other than a pre-PFIC year, will be subject to tax at the highest tax rate in effect applicable to the U.S. Holder for each such year; and

an interest charge generally applicable to underpayments of tax will be imposed on the tax attributable to each prior taxable year, other than a pre-PFIC year.

Table of Contents

A U.S. Holder of marketable stock (as defined below) in a PFIC may make a mark-to-market election for such stock to elect out of the tax treatment discussed above. If a U.S. Holder makes a mark-to-market election for the ADSs (but not our ordinary shares), such holder will include in income for each year that we are treated as a PFIC with respect to such holder an amount equal to the excess, if any, of the fair market value of the ADSs or ordinary shares as of the close of your taxable year over the holder's adjusted basis in such ADSs or ordinary shares. A U.S. Holder will be allowed a deduction for the excess, if any, of the adjusted basis of the ADSs or ordinary shares over their fair market value as of the close of the taxable year. However, deductions will be allowable only to the extent of any net mark-to-market gains on the ADSs or ordinary shares included in a U.S. Holder's income for prior taxable years. Amounts included in a U.S. Holder's income under a mark-to-market election, as well as gain on the actual sale or other disposition of the ADSs or ordinary shares, will be treated as ordinary income. Ordinary loss treatment will also apply to the deductible portion of any mark-to-market loss on the ADSs or ordinary shares, as well as to any loss realized on the actual sale or disposition of the ADSs or ordinary shares, to the extent that the amount of such loss does not exceed the net mark-to-market gains previously included for such ADSs or ordinary shares. A U.S. Holder's basis in the ADSs or ordinary shares will be adjusted to reflect any such income or loss amounts. If a U.S. Holder makes a valid mark-to-market election, the tax rules that apply to distributions by corporations which are not PFICs would apply to distributions by us, except that the lower capital gains rate applicable to qualified dividend income (discussed above under Dividends) would not apply.

The mark-to-market election is available only for marketable stock, which is stock that is traded in other than de minimis quantities on at least 15 days during each calendar quarter (regularly traded) on a qualified exchange or other market, as defined in applicable United States Treasury regulations. Our ADSs are listed on the New York Stock Exchange, which is a qualified exchange or market for these purposes. Consequently, if the ADSs continue to be listed on the New York Stock Exchange and are regularly traded, and a U.S. Holder holds ADSs, we expect that the mark-to-market election would be available to such U.S. Holder were we to be or become a PFIC. Because a mark-to-market election cannot be made for equity interests in any lower-tier PFICs that we own, a U.S. Holder may continue to be subject to the PFIC rules with respect to its indirect interest in any investments held by us that are treated as an equity interest in a PFIC for United States federal income tax purposes. In the case of a U.S. Holder who has held ADSs or ordinary shares during any taxable year in respect of which we were classified as a PFIC and continues to hold such ADSs or ordinary shares (or any portion thereof) and has not previously determined to make a mark-to-market election, and who is now considering making a mark-to-market election, special tax rules may apply relating to purging the PFIC taint of such ADSs or ordinary shares.

We do not intend to prepare or provide the information that would enable a U.S. Holder to make a qualified electing fund election (QEF Election), which, if available, would result in tax treatment different from the general tax treatment for PFICs described above. Accordingly, each U.S. Holder should assume that the QEF Election will not be available.

If a U.S. Holder holds ADSs or ordinary shares in any year in which we are treated as a PFIC with respect to such U.S. Holder, the U.S. Holder may be required to file United States Internal Revenue Service Form 8621 and such other form as is required by the United States Treasury Department. U.S. Holders are urged to consult their tax advisors regarding the application of the PFIC rules to their investment in ADSs or ordinary shares.

Information Reporting and Backup Withholding

U.S. Holders may be subject to information reporting to the Internal Revenue Service with respect to dividends on and proceeds from the sale or other disposition of our ADSs or ordinary shares. Dividend payments with respect to our ADS or ordinary shares and proceeds from the sale or other disposition of our ADSs or common shares are not generally subject to United States backup withholding (provided that certain certification requirements are satisfied). Each U.S. Holder is advised to consult its tax advisor regarding the application of the United States information reporting and backup withholding rules to its particular circumstances.

Individuals who are U.S. Holders, and who hold specified foreign financial assets, including stock of a non-U.S. corporation that is not held in an account maintained by a U.S. financial institution, whose aggregate value exceeds \$50,000 during the tax year, may be required to attach to their tax return for the year certain specified information. An individual who fails to timely furnish the required information may be subject to a penalty. Each U.S. Holder who is an individual is advised to consult its tax advisor regarding its reporting obligations under this legislation.

H. Documents on Display

We are subject to the periodic reporting and other informational requirements of the Securities Exchange Act of 1934 or the Exchange Act. Under the Exchange Act, we are required to file reports and other information with the SEC. Specifically, we are required to file annually a Form 20-F (1) within six months after the end of each fiscal year, which is December 31, for fiscal years ending before December 15, 2011; and (2) within four months after the end of each fiscal year for fiscal years ending on or after December 15, 2011. The SEC maintains a website at www.sec.gov that contains reports, proxy and information statements, and other information regarding registrants that make electronic filings with the SEC using its EDGAR system. Copies of reports and other information, when filed, may also be inspected without charge and may be obtained at prescribed rates at the public reference facilities maintained by the SEC at 100 F Street, N.E., Room 1580, Washington, D.C. 20549. The public may obtain information regarding the Washington, D.C. Public Reference Room by calling the SEC at 1-800-SEC-0330. As a foreign private issuer, we are exempt from the rules under the Exchange Act prescribing the furnishing and content of quarterly reports and proxy statements, and officers, directors and principal shareholders are exempt from the reporting and short-swing profit recovery provisions contained in Section 16 of the Exchange Act.

We will furnish JPMorgan Chase Bank, N.A., the depository of our ADSs, with our annual reports, which will include a review of operations and annual audited consolidated financial statements prepared in conformity with U.S. GAAP, and all notices of shareholders' meetings and other reports and communications that are made generally available to our shareholders. The depository will make such notices, reports and communications available to holders of ADSs and, upon our request, will mail to all record holders of ADSs the information contained in any notice of a shareholders' meeting received by the depository from us.

I. Subsidiary Information

For a listing of our subsidiaries, see Item 4. Information on the Company C. Organizational Structure.

ITEM 11. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK***Interest Rate Risk***

Our exposure to interest rate risk primarily relates to interest expense incurred on our short-term and long-term borrowings and interest income generated by excess cash which is mostly held in interest-bearing bank deposits. We have not used any derivative financial instruments to manage our interest rate risk exposure. As of December 31, 2012, we had outstanding short-term bank borrowings of \$49.7 million with a fixed interest rate of 7.0% and outstanding long-term bank borrowings of \$256.5 million bearing floating rates which are subject to adjustment every 12 months based upon the PRC government's standard interest rate. The weighted average interest rate as of December 31, 2012 for the long-term bank borrowings was 6.89%. We are currently not engaged in any interest rate hedging activities.

Foreign Exchange Risk

Substantially all of our revenues and most of our expenses are denominated in RMB. Our exposure to foreign exchange risk primarily relates to (1) the Euro or U.S. dollar income or that we may generate in the future for sale of our photovoltaic products in the international market, (2) the U.S. dollar proceeds of a small portion of our initial public offering in October 2010, most or substantially all of which we expect to convert into RMB over time for the uses discussed under Item 14. Material Modifications to the Rights of Security Holders Use of Proceeds and (3) the U.S. dollar and Euro denominated equipment purchase prices that we need to pay from time to time. We believe the impact of foreign currency risk is not material and we have not used any forward contracts, currency borrowings or derivative instruments to hedge our exposure to foreign currency exchange risk. Although in general our exposure to foreign exchange risks should be limited, the value of your investment in our ADSs

Edgar Filing: DAQO NEW ENERGY CORP. - Form 20-F

will be affected by the foreign exchange rate between U.S. dollars and RMB because the value of our business is effectively denominated in RMB, while we use the U.S. dollar as our functional and reporting currency and the ADSs will be traded in U.S. dollars. The value of the RMB against the U.S. dollar and other currencies is affected by, among other things, changes in China's political and economic conditions and China's foreign exchange policies.

Table of Contents

To the extent that we need to convert U.S. dollars into RMB for our operations, acquisitions or other uses within China, appreciation of the RMB against the U.S. dollar would have an adverse effect on the RMB amount we receive from the conversion. To the extent that we seek to convert RMB into U.S. dollars, depreciation of the RMB against the U.S. dollar would have an adverse effect on the U.S. dollar amount we receive from the conversion. As of December 31, 2012, we had RMB-denominated cash, cash equivalents and short-term investments of RMB72.2 million and U.S. dollar-denominated cash, cash equivalents and short-term investments of \$5.7 million. Assuming we had converted the U.S. dollar-denominated cash, cash equivalents and short-term investments of \$5.7 million into RMB at the exchange rate of \$1.00 for RMB 6.2301 as of December 31, 2012, this cash, cash equivalents and short-term investments would have been RMB35.5 million. Assuming a 10% appreciation of the RMB against the U.S. dollar, this cash, cash equivalents and short-term investments would have decreased to RMB32.0 million.

ITEM 12. DESCRIPTION OF SECURITIES OTHER THAN EQUITY SECURITIES

A. Debt Securities

Not applicable.

B. Warrants and Rights

Not applicable.

C. Other Securities

Not applicable.

D. American Depositary Shares

Fees and Charges Our ADS Holders May Have to Pay

As an ADS holder, you will be required to pay the following service fees to the depository bank:

The depository may charge each person to whom ADSs are issued, including, without limitation, issuances against deposits of shares, issuances in respect of share distributions, rights and other distributions, issuances pursuant to a stock dividend or stock split declared by us or issuances pursuant to a merger, exchange of securities or any other transaction or event affecting the ADSs or deposited securities, and each person surrendering ADSs for withdrawal of deposited securities or whose ADSs are cancelled or reduced for any other reason, \$5.00 for each 100 ADSs (or any portion thereof) issued, delivered, reduced, cancelled or surrendered, as the case may be. The depository may sell (by public or private sale) sufficient securities and property received in respect of a share distribution, rights and/or other distribution prior to such deposit to pay such charge.

The following additional charges shall be incurred by the ADS holders, by any party depositing or withdrawing shares or by any party surrendering ADSs or to whom ADSs are issued (including, without limitation, issuance pursuant to a stock dividend or stock split declared by us or an exchange of stock regarding the ADSs or the deposited securities or a distribution of ADSs), whichever is applicable:

a fee of \$1.50 per ADR or ADRs for transfers of certificated or direct registration ADRs;

a fee of up to \$0.05 per ADS for any cash distribution made pursuant to the deposit agreement;

Edgar Filing: DAQO NEW ENERGY CORP. - Form 20-F

a fee of up to \$0.05 per ADS per calendar year (or portion thereof) for services performed by the depositary in administering the ADRs (which fee may be charged on a periodic basis during each calendar year and shall be assessed against holders of ADRs as of the record date or record dates set by the depositary during each calendar year and shall be payable in the manner described in the next succeeding provision);

Table of Contents

reimbursement of such fees, charges and expenses as are incurred by the depositary and/or any of the depositary's agents (including, without limitation, the custodian and expenses incurred on behalf of holders in connection with compliance with foreign exchange control regulations or any law or regulation relating to foreign investment) in connection with the servicing of the shares, the delivery of deposited securities or otherwise in connection with the depositary's or its custodian's compliance with applicable law, rule or regulation (which charge shall be assessed on a proportionate basis against holders as of the record date or dates set by the depositary and shall be payable at the sole discretion of the depositary by billing such holders or by deducting such charge from one or more cash dividends or other cash distributions);

a fee for the distribution of securities (or the sale of securities in connection with a distribution), such fee being in an amount equal to the fee for the execution and delivery of ADSs which would have been charged as a result of the deposit of such securities (treating all such securities as if they were shares) but which securities or the net cash proceeds from the sale thereof are instead distributed by the depositary to those holders entitled thereto;

stock transfer or other taxes and other governmental charges;

cable, telex and facsimile transmission and delivery charges incurred at your request in connection with the deposit or delivery of shares;

transfer or registration fees for the registration of transfer of deposited securities on any applicable register in connection with the deposit or withdrawal of deposited securities; and

expenses of the depositary in connection with the conversion of foreign currency into U.S. dollars.

ADR holders must pay any tax or other governmental charge payable by the custodian or the depositary on any ADS or ADR, deposited security or distribution. If an ADR holder owes any tax or other governmental charge, the depositary may (i) deduct the amount thereof from any cash distributions, or (ii) sell deposited securities (by public or private sale) and deduct the amount owing from the net proceeds of such sale. In either case the ADR holder remains liable for any shortfall. Additionally, if any tax or governmental charge is unpaid, the depositary may also refuse to effect any registration, registration of transfer, split-up or combination of deposited securities or withdrawal of deposited securities until such payment is made. If any tax or governmental charge is required to be withheld on any cash distribution, the depositary may deduct the amount required to be withheld from any cash distribution or, in the case of a non-cash distribution, sell the distributed property or securities (by public or private sale) to pay such taxes and distribute any remaining net proceeds to the ADR holders entitled thereto.

We will pay all other charges and expenses of the depositary and any agent of the depositary (except the custodian) pursuant to agreements from time to time between us and the depositary. The depositary collects its fees for issuance and cancellation of ADSs directly from investors depositing shares or surrendering ADSs for the purpose of withdrawal or from intermediaries acting for them. The depositary collects fees for making distributions to investors by deducting those fees from the amounts distributed or by selling a portion of distributable property to pay the fees. The depositary may collect its annual fee for depositary services by deduction from cash distributions, or by directly billing investors, or by charging the book-entry system accounts of participants acting for them. The depositary may generally refuse to provide services to any holder until the fees and expenses owing by such holder for those services or otherwise are paid. The charges described above may be amended from time to time by agreement between us and the depositary.

Fees and Other Payments Made by the Depositary to Us

The depositary bank may reimburse us for certain expenses incurred by us in respect of the ADR program established pursuant to the deposit agreement, by making available a set amount or a portion of the depositary fees charged in respect of the ADR program or otherwise, upon such terms and conditions as we and the depositary bank may agree from time to time. For the year ended December 31, 2012, we have received US\$496,132.84 from the depositary as reimbursement for our expenses incurred in connection with the establishment and maintenance of the ADS program. In December 2012, the Company instructed the depositary bank to change the ratio of shares of the Company by each ADS from five shares to twenty five shares per ADS. In accordance with the agreement between the Company and the depositary bank, the latter ceased any reimbursement and waives, and charged Termination/Revision Fees of \$1 million to the Company.

ITEM 13. DEFAULTS, DIVIDEND ARREARAGES AND DELINQUENCIES

Not applicable.

ITEM 14. MATERIAL MODIFICATIONS TO THE RIGHTS OF SECURITY HOLDERS AND USE OF PROCEEDS

None.

ITEM 15. CONTROLS AND PROCEDURES

Disclosure Controls and Procedures

We maintain disclosure controls and procedures designed to provide reasonable assurance that information required to be disclosed in reports filed under the Exchange Act is recorded, processed, summarized and reported within the specified time periods and accumulated and communicated to our management, including our chief executive officer and chief financial officer, as appropriate to allow timely decisions regarding required disclosure. Our management, with the participation of our chief executive officer and chief financial officer, evaluated the effectiveness of our disclosure controls and procedures, as defined in Rules 13a-15(e) or 15d-15(e) promulgated under the Exchange Act, at December 31, 2012. Based on that evaluation, our chief executive officer and chief financial officer concluded that, as of that date, our disclosure controls and procedures required by Rules 13a-15(b) or 15d-15(b) were effective as of December 31, 2012.

Management's Report On Internal Control Over Financial Reporting

Our management is responsible for establishing and maintaining adequate internal control over financial reporting, as such term is defined in Rules 13a-15(f) and 15d-15(f) under the Exchange Act of 1934. Our internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of consolidated financial statements in accordance with U.S. GAAP. Because of its inherent limitations, a system of internal control over financial reporting may not prevent or detect misstatements. Projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies and procedures may deteriorate.

Our management conducted an assessment of the effectiveness of our internal control over financial reporting as of December 31, 2012. In making this assessment, it used the criteria established within the Internal Control Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO). Based on this assessment, our management has concluded that, as of December 31, 2012, our internal control over financial reporting was effective.

Table of Contents

Remediation and Changes in Internal Control Over Financial Reporting

At December 31, 2011, we identified the following control deficiencies that constituted material weaknesses. A material weakness is a deficiency, or combination of deficiencies, in internal control over financial reporting such that there is a reasonable possibility that a material misstatement of our annual or interim consolidated financial statements will not be prevented or detected on a timely basis.

We lacked the accounting resources and expertise necessary to comply with U.S. GAAP and the SEC financial reporting and disclosure requirements.

We lacked sufficient resources to perform thorough reviews of consolidated financial statements and related footnote disclosures during the period-end financial reporting and disclosure process.

We lacked sufficient processes, documentation and approval of related party transactions with affiliates.

In the fiscal year ended December 31, 2012 we have made the following enhancements to our internal controls over financial reporting:

1. Hired a CFO in the first quarter of 2012, who is a U.S. Certified Public Accountant, and has significant experience working with SEC registrants and their application of SEC financial reporting and disclosure requirements;
2. Developed and implemented enhanced accounting policies under U.S. GAAP, which also includes an appropriate definition of related parties and defines the responsibilities for monitoring, authorizing and disclosing related party transactions;
3. Conducted periodical internal training regarding the Company's updated accounting policies and other U.S. GAAP specific topics to the entire financial reporting team;
4. Developed, implemented and operated more detailed period end closing procedures and performed more robust reviews of consolidated financial statements and related footnote disclosures;
5. Developed, implemented and operated monitoring procedures that include the CFO's review of complex accounting issues, complex accounting transactions, and the completeness and accuracy of disclosures. In addition, for complex accounting issues we have consulted with 3rd party accounting experts;
6. Developed, implemented, and operated procedures to ensure that all proposed significant related party transactions are identified, reviewed and receive pre-approval by the Audit Committee.

Based upon these actions taken and our testing and evaluation of the effectiveness of our internal controls, we have concluded the material weaknesses no longer existed as of December 31, 2012. We are committed to monitoring the effectiveness of these measures and making any changes that are necessary and appropriate in the future.

Other than as previously discussed, there have not been any other changes in our internal control over financial reporting in the year ended December 31, 2012, which have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

Table of Contents**ITEM 16A. AUDIT COMMITTEE FINANCIAL EXPERT**

Our board of directors has determined that Mr. Arthur Wong, an independent director (under the standards set forth in Section 303A of the Corporate Governance Rules of the New York Stock Exchange and Rule 10A-3 under the Exchange Act), and the chairman of our audit committee, is our audit committee financial expert.

ITEM 16B. CODE OF ETHICS

Our board of directors has adopted a code of ethics that applies to our directors, officers, employees and agents, including certain provisions that specifically apply to our chief executive officer, chief financial officer, chief marketing officer, chief operating officer, chief technology officer, vice presidents and any other persons who perform similar functions for us. We have posted a copy of our code of business conduct and ethics on our website at <http://ir.dqsolar.com>.

ITEM 16C. PRINCIPAL ACCOUNTANT FEES AND SERVICES

The following table sets forth the aggregate fees by categories specified below in connection with certain professional services rendered by Deloitte Touche Tohmatsu Certified Public Accountants LLP, our independent registered public accounting firm, for the periods indicated. We did not pay any other fees to our independent registered public accounting firm during the periods indicated below.

	For the Year Ended December 31,		
	2010	2011	2012
	(in US\$ thousands)		
Audit fees ⁽¹⁾	1,954	900	700
Tax fees ⁽²⁾			8

(1) Audit fees means the aggregate fees billed for professional services rendered by our independent registered public accounting firm for the audit of our annual financial statements and the review of our comparative interim financial statements.

(2) Tax fees represents the aggregated fees billed for professional services rendered by our independent registered public accounting firm for tax compliance, tax advice, and tax planning.

The policy of our audit committee is to pre-approve all audit and non-audit services provided by Deloitte Touche Tohmatsu Certified Public Accountants LLP, including audit services, audit-related services, tax services and other services as described above, other than those for de minimis services which are approved by the audit committee prior to the completion of the audit.

ITEM 16D. EXEMPTIONS FROM THE LISTING STANDARDS FOR AUDIT COMMITTEES

Not applicable.

ITEM 16E. PURCHASES OF EQUITY SECURITIES BY THE ISSUER AND AFFILIATED PURCHASERS

On July 9, 2012, our board of directors authorized a share repurchase program, whereby our company may repurchase of up to US\$5 million of our ordinary shares or ADSs during the period from July 9, 2012 through December 31, 2012. The share repurchase program was publicly announced on July 9, 2012. The following table sets forth some additional information about our repurchases made under this program as of the date of this annual report.

Table of Contents

	Total Number of ADSs Purchased	Average Price Paid per ADS (US\$)	Total Number of ADSs Purchased as Part of Publicly Announced Plans or Programs	Maximum Dollar Value of ADSs that May Yet be Purchased Under the Plans or Programs (US\$)
Month #1 (July 9, 2012 August 8, 2012)		\$		\$
Month #2 (August 9, 2012 September 8, 2012)	22,152	\$ 4.64	22,152	\$ 4,897,159
Month #3 (September 9, 2012 October 8, 2012)	40,204	\$ 4.27	62,356	\$ 4,725,402
Month #4 (October 9, 2012 November 8, 2012)	30,597	\$ 4.23	92,953	\$ 4,596,081
Month #5 (November 9, 2012 December 8, 2012)	13,997	\$ 4.12	106,950	\$ 4,538,437
Month #6 (December 9, 2012 December 31, 2012)	6,517	\$ 6.99	113,467	\$ 4,492,880
Total	113,467	\$ 4.47	113,467	\$ 4,492,880

ITEM 16F. CHANGE IN REGISTRANT'S CERTIFYING ACCOUNTANT

Not applicable.

ITEM 16G. CORPORATE GOVERNANCE

Certain corporate governance practices in the Cayman Islands, which is our home country, differ significantly from the New York Stock Exchange corporate governance listing standards. For example, neither the Companies Law of the Cayman Islands nor our memorandum and articles of association requires a majority of our directors to be independent and we could include non-independent directors as members of our compensation committee and nominating committee, and our independent directors would not necessarily hold regularly scheduled meetings at which only independent directors are present. Currently, we do not plan to rely on home country practice with respect to our corporate governance. However, if we choose to follow home country practice in the future, our shareholders may be afforded less protection than they otherwise would under the New York Stock Exchange corporate governance listing standards applicable to U.S. domestic issuers.

ITEM 16H. MINE SAFETY DISCLOSURE

Not applicable.

PART III**ITEM 17. FINANCIAL STATEMENTS**

We have elected to provide financial statements pursuant to Item 18. Financial Statements.

Table of Contents**ITEM 18. FINANCIAL STATEMENTS**

The consolidated financial statements of Daqo New Energy Corp. are included at the end of this annual report.

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

TO THE BOARD OF DIRECTORS AND SHAREHOLDERS OF

DAQO NEW ENERGY CORP.:

We have audited the accompanying consolidated balance sheets of Daqo New Energy Corp. and its subsidiaries and variable interest entity (the Company) as of December 31, 2011, and 2012, and the related consolidated statements of operations, comprehensive income (loss), changes in equity, and cash flows for each of the three years in the period ended December 31, 2012 and the related financial statement schedule included in Schedule I. These financial statements and financial statement schedule are the responsibility of the Company's management. Our responsibility is to express an opinion on the financial statements and financial statement schedule based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. The Company is not required to have, nor were we engaged to perform, an audit of its internal control over financial reporting. Our audits included consideration of internal control over financial reporting as a basis for designing audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Company's internal control over financial reporting. Accordingly, we express no such opinion. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements, assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, such consolidated financial statements present fairly, in all material respects, the financial position of Daqo New Energy Corp. and its subsidiaries and variable interest entity as of December 31, 2011, and 2012, and the results of their operations and their cash flows for each of the three years in the period ended December 31, 2012, in conformity with accounting principles generally accepted in the United States of America. Also, in our opinion, such financial statement schedule, when considered in relation to the basic consolidated financial statements taken as a whole, presents fairly in all material respects the information set forth therein.

DAQO NEW ENERGY CORP.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

FOR THE YEARS ENDED DECEMBER 31, 2010, 2011 AND 2012

(In U.S. dollars, except share data)

1. ORGANIZATION AND PRINCIPAL ACTIVITIES

The consolidated financial statements include the financial statements of Daqo New Energy Corp. (the Company), its wholly owned subsidiaries, Chongqing Daqo New Energy Co., Ltd. (Chongqing Daqo), Nanjing Daqo New Energy Co., Ltd. (Nanjing Daqo), Xinjiang Daqo New Energy Co., Ltd (Xinjiang Daqo), Daqo Solar Energy North America (Daqo America) and Daqo New Energy Holdings (Canada) Ltd. (Daqo Canada) (which was liquidated on 2012) and its consolidated variable interest entity (VIE) Daqo New Material Co., Ltd. (Daqo New Material) (collectively, the Group).

The Company was incorporated on November 22, 2007 in the Cayman Islands. Chongqing Daqo, Nanjing Daqo and Xinjiang Daqo were incorporated by the Company on January 14, 2008, December 20, 2007 and February 22, 2011, respectively, in the Peoples Republic of China (PRC). Daqo America was incorporated by the Company in January 2009, in California, USA. Daqo Canada was incorporated by the Company in April 2011, in Hamilton, Ontario, Canada.

Daqo New Material and the Company were under common control by Daqo New Material's ultimate shareholders prior to the issuance of Series A Convertible Redeemable Preferred Shares. Daqo New Material was established by Daqo Group Co., Ltd. (Daqo Group), an affiliate of the Company, on November 16, 2006 for the primary purpose of developing a photovoltaic business. Daqo New Material's activities included acquiring land use rights and constructing certain polysilicon production infrastructure, including buildings and production machinery and equipment. Chongqing Daqo acquired additional machinery and equipment that are used in connection with Daqo New Material's land and production infrastructure.

Subsequent to its establishment, Chongqing Daqo entered into a lease agreement with Daqo New Material to rent all of Daqo New Material's land, production infrastructure and machinery and equipment for the Group's polysilicon production. The lease period is from July 1, 2008 to December 31, 2013, with monthly lease payments that have been renegotiated periodically and are eliminated in consolidation. The lease agreement also provided that if Daqo New Material transferred the ownership of the leased assets to any third party, the lease agreement would remain effective and enforceable against the new owner. One month before the expiry of the lease period, Chongqing Daqo has the option to renew the lease on the same terms and conditions for an additional five-year periods. Furthermore, Chongqing Daqo has the option to purchase, or to designate any person to purchase, the leased assets at the then fair value at any time during the lease period or within one year following the lease period, if permitted by the PRC laws and regulations. If Daqo New Material desires to transfer the ownership of the leased assets to a third party, Chongqing Daqo has the right of first refusal to acquire the leased assets under the same conditions. If the leased assets are transferred to a third party, the lease agreement will remain effective and enforceable against the new owner.

Because the aggregate value of the monthly rental payments that Chongqing Daqo is contractually obligated to make to Daqo New Material represents the majority of the value of Daqo New Material's assets, Chongqing Daqo has the majority of investment risk in Daqo New Material. Further, the Group has concluded that the arrangement results in Chongqing Daqo providing an implicit guarantee to protect Daqo Group from absorbing losses incurred by Daqo New Energy, thus Daqo New Material is considered to be a variable interest entity of Chongqing Daqo. Furthermore, the operating activities of Daqo New Material are most closely associated with Chongqing Daqo and the management of Chongqing Daqo also acts as the management of Daqo New Material. Based on these factors, Chongqing Daqo has the power to control Daqo New Material and is considered the primary beneficiary of Daqo New Material. As a result, Daqo New Material's financial results are consolidated into the Group's consolidated financial statements since July 1, 2008. Daqo New Material has been deemed to be the Chongqing Daqo's predecessor business from November 16, 2006 (inception) through June 30, 2008. The assets and liabilities of Daqo New Material are consolidated at historical cost given they were held by an entity under common control and common ownership. Daqo Group's total equity interests in Daqo New Material are presented as a noncontrolling interest.

In the periods presented, the Company manufactured and sold polysilicon and wafers through Chongqing Daqo and Xinjiang Daqo, and sold modules through Nanjing Daqo before September 28, 2012 when Nanjing Daqo was sold to Daqo Group. Daqo America was set up as a marketing office to promote the Group's products in North America.

DAQO NEW ENERGY CORP.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

FOR THE YEARS ENDED DECEMBER 31, 2010, 2011 AND 2012

(In U.S. dollars, except share data)

2. SUMMARY OF PRINCIPAL ACCOUNTING POLICIES

(a) Basis of presentation

The consolidated financial statements of the Group have been prepared in accordance with U.S. GAAP.

The accompanying consolidated financial statements have been prepared assuming that the Company will continue as a going concern, which contemplates the realization of assets and the satisfaction of liabilities in the normal course of business. The realization of assets and the satisfaction of liabilities in the normal course of business are dependent on, among other things, the Company's ability to generate cash flows from operations, and the Company's ability to arrange adequate financing arrangements, including the renewal or rollover of its bank borrowings, to support its working capital requirements.

The following factors raise substantial doubt about the Company's ability to continue as a going concern for the foreseeable future.

The solar industry is being negatively impacted by a number of factors including excess capacity, reduction of government incentives in key solar markets, higher import tariffs and the European debt crisis. These factors have contributed to declining average selling prices for our products. The average selling price (ASP) of polysilicon has fallen from nearly \$60 per kilogram (kg) in 2010 to almost \$23 per kg in 2012.

For the year ended December 31, 2012, the Company incurred an operating loss of \$88,517,894.

During the year December 31, 2012, the Company experienced negative cash flow from operations of \$10,307,234, primarily as a result of the net loss incurred by the Company.

As of December 31, 2012, the Company's current liabilities exceed its current assets by \$163,799,978. While the Company had cash and cash equivalents of \$6,679,024, it had short-term bank borrowings of \$51,273,360 all due within one year and the current portion of long-term debt amounting of \$69,006,400, which is restricted to purchase fixed assets and not expected to be renewed.

These factors are mitigated by the following actions and plans:

On April 12, 2013, the Company obtained an irrevocable, legally enforceable letter of financial support from the Company's shareholders, who have committed to provide sufficient financial support to the Company to ensure the Company has the funds required to satisfy its obligations as they come due in the normal course, through Daqo Group. Further, the support letter provides that Daqo Group will not require the Company to pay intercompany debts, if any, provided under the letter of support or the amount owed to the Daqo Group and subsidiaries of Daqo Group, Daqo Solar and Xinjiang Daqo Investment as of March 31, 2013, before January 1, 2014.

Edgar Filing: DAQO NEW ENERGY CORP. - Form 20-F

The Company has taken or is in the process of taking a number of cost reduction initiatives. For example, the Company has constructed its phase II production facilities in Xinjiang and began commercial production since January 2013. The cash cost to produce polysilicon at the Xinjiang facilities is estimated to be significantly lower than that of the Company's current facilities. Further, the Company is in the process of implementing the hydrochlorination project at its facilities in Chongqing, which is expected to significantly reduce the cash cost of producing polysilicon, although not to the extent of the facilities in Xinjiang.

While there can be no assurance that the Company will be able to refinance its short-term bank borrowings as they become due, historically, the Company has renewed or rolled over all of its short-term bank loans upon the maturity date of the loans and has assumed it will continue to be able to do so. From January 1, 2013 to April 22, 2013, the Company obtained short-term bank borrowings of \$22.4 million and obtained a bank acceptance note credit facility of \$4.8 million.

The Company has performed a review of its cash flow forecast for the twelve months ending December 31, 2013. The Company believes that its operating cash flow will improve significantly in 2013 and that its operating cash flow will be positive. While management believes the forecast is based on reasonable assumptions, significant assumptions of this forecast include: the Company is assuming that there will be gradual increases in ASP throughout the year 2013 and will realize significant cost savings as a result of the low electricity cost in Xinjiang and certain technology improvement projects in Chongqing. The preliminary results for the first quarter of 2013 shows an increase in the ASP during the period ended March 31, 2013. This trend is consistent with the Company's expectation.

F-11

Table of Contents**DAQO NEW ENERGY CORP.****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)****FOR THE YEARS ENDED DECEMBER 31, 2010, 2011 AND 2012****(In U.S. dollars, except share data)**

Based on the above factors, management believes that adequate sources of liquidity will exist to fund the Company's working capital and capital expenditures requirements, and to meet its short term debt obligations, other liabilities and commitments as they become due.

(b) Basis of consolidation

The consolidated financial statements include the financial statements of the Group. All intercompany transactions and balances have been eliminated on consolidation.

(c) Use of estimates

The preparation of consolidated financial statements in accordance with U.S. GAAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities as of the date of the consolidated financial statements and the amounts of revenues and expenses during the reporting period. Actual results could differ from these estimates. The company bases its estimates on historical experience and various other factors believed to be reasonable under the circumstances, the results of which form the basis for making judgments about the carrying value of assets and liabilities that are not readily apparent from other sources. Management has made significant estimates in a variety of areas, including but not limited to allowance for doubtful accounts, inventories valuation, useful lives and residual values of long-lived assets, impairment for long lived assets, consolidation of variable interest entity, valuation allowances for deferred tax assets, interest capitalization, warranty accrual and certain assumption used in the computation of share-based compensation and related forfeiture rates.

(d) Concentration of credit risk

Financial instruments that potentially expose the Group to concentrations of credit risk consist primarily of cash and cash equivalents and accounts receivables.

The Group places its cash and cash equivalents in various financial institutions in the PRC. The Group believes that no significant credit risk exists as these banks are principally government-owned financial institutions with high credit ratings.

Accounts receivable represent those receivables derived in the ordinary course of business. The Group conducts credit evaluations of customers to whom credit terms are extended. The Group establishes an allowance for doubtful accounts mainly based on aging of the receivables and other factors surrounding the credit risk of specific customers. The allowance for doubtful accounts is \$1,202,940 and \$1,592,467 as of December 31, 2011 and 2012, respectively, based on the aging of the receivables and the Company's assessment of the customers' credit risk.

The following customers accounted for 10% or more of accounts receivable:

Accounts receivable	December 31,	
	2011	2012
Customer A	\$ 2,655,592	\$ 12,529,889
Customer C	\$ 2,549,318	\$ 3,568,910
Customer H	\$ 5,947,325	\$
Customer D	\$ 2,823,130	\$ 1,842,310

Sales of polysilicon to the Group's largest customers whose sales constitute over 10% of revenue accounted for approximately 26%, 46% and 24% of revenues for the years ended December 31, 2010, 2011 and 2012, respectively. The Group was substantially dependent upon the

Edgar Filing: DAQO NEW ENERGY CORP. - Form 20-F

continued participation of these customers in order to maintain its total revenues. Significantly reducing the Group's dependence on these customers is likely to take time and there can be no guarantee that the Group will succeed in reducing that dependence.

Furthermore, all of the Company's long-term loans are guaranteed by Daqo Group, our related party, who has also committed to provide financial support to meet the Company's short term debt obligations, other liabilities and commitments as they become due (see Note 2(a)). The Company's access to credit is significantly reliant on Daqo Group's ability and willingness to continue to provide sufficient financial support.

F-12

Table of Contents

DAQO NEW ENERGY CORP.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

FOR THE YEARS ENDED DECEMBER 31, 2010, 2011 AND 2012

(In U.S. dollars, except share data)

(e) Cash and cash equivalents

Cash and cash equivalents consist of cash on hand and demand deposits, which are unrestricted as to withdrawal and use, and which have maturities of three months or less when purchased.

(f) Restricted cash

Restricted cash amounted to \$11,600,321 and \$10,649,745 as of December 31, 2011 and 2012, respectively, and are deposited in bank accounts as deposits for short-term letters of credit and notes issued by several banks for purchases of raw materials, plant and equipment. These deposits carry fixed interest rates and will be released when the related letters of credit or notes are settled by the Group. The Group considers the restricted cash balances as equivalent to an investment whose return of principal requires the satisfaction of conditions (i.e., settlement of letters of credit or notes) rather than a withdrawal demand. Therefore, deposits and withdrawals of principal balances in restricted cash accounts represent the creation or return of investment and, accordingly, the Group has presented such deposits and withdrawals as investing activities in the consolidated statements of cash flows.

(g) Inventories

Inventories are stated at lower of cost or market. Costs are determined using weighted average costs. Costs comprise direct materials, direct labor and overhead costs incurred in bringing the inventories to their present location and condition. The Group writes down the cost of excess inventories to the estimated market value based on historical and forecasted demand. Estimated market value is measured as the estimated selling price of each class of inventory in the ordinary course of business less estimated costs of completion and disposal. The charges to inventory for the years ended December 31, 2010, 2011 and 2012 was \$nil, \$14,252,701 and \$ 14,821,620, respectively.

The Group has outsourced portions of its manufacturing process, including cutting ingots into wafers, and converting wafers into solar cells, to various third-party manufacturers. These outsourcing arrangements may or may not include transfer of title of the raw material inventory (ingots, wafers or cells) to the third-party manufacturers.

For those outsourcing arrangements in which title does not transfer, the Group maintains the inventory in the balance sheet as raw materials inventory while it is in physical possession of the third-party manufacturers. Upon receipt of the processed inventory from the third-party manufacturers, it is reclassified to work-in-progress inventory with the processing fee capitalized as cost of inventory.

For those outsourcing arrangements in which title (including risk of loss) does transfer to the third-party manufacturer, the Group is contractually obligated to repurchase the processed inventory. To accomplish this, it enters into raw material sales agreements and processed inventory purchase agreements simultaneously with the third-party manufacturer. In such instances, where they are, in substance tolling arrangements, the Group retains the inventory in the consolidated balance sheets while it is in the physical possession of the third-party manufacturer. The cash received from the third-party manufacturer is recorded as a current liability on the balance sheet rather than revenue or deferred revenue. Upon receipt of the processed inventory, it is reclassified from raw materials to work-in-progress inventory and the processing fee paid to the third-party manufacturer is added to inventory cost. Cash payments for outsourcing arrangements which require prepayment for repurchase of the processed inventory are classified as current assets on the balance sheet. If there is no legal right of offset established by these arrangements, the associated assets and liabilities are presented separately on the balance sheet until the processed inventory is returned to the Group.

Table of Contents**DAQO NEW ENERGY CORP.****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)****FOR THE YEARS ENDED DECEMBER 31, 2010, 2011 AND 2012****(In U.S. dollars, except share data)*****(h) Property, plant and equipment***

Property, plant and equipment are recorded at cost less accumulated depreciation. Depreciation is recognized on a straight-line basis over the following estimated useful lives:

Buildings and plant	20 years
Machinery and equipment	10 years
Furniture, fixtures and equipment	3-5 years
Motor vehicles	6 years

Costs incurred on construction are capitalized and transferred to property, plant and equipment upon completion, at which time depreciation commences.

Interest expense incurred for construction of property, plant, and equipment is capitalized as part of the cost of such assets. Interest expense capitalized for the years ended December 31, 2010, 2011 and 2012 was \$233,640, \$3,429,496 and \$7,245,747, respectively.

(i) Prepaid land use rights

All land in the PRC is owned by the PRC government. The PRC government, according to PRC law, may sell the land use rights for a specified period of time. The Group's land use rights in the PRC are stated at cost less recognized lease expenses. Lease expense is recognized over the term of the agreement on a straight-line basis. The Group recorded lease expenses of \$150,853, \$166,355 and \$958,558, for the years ended December 31, 2010, 2011 and 2012, respectively.

(j) Impairment of long-lived assets

The Group evaluates its long-lived assets for impairment whenever events or changes in circumstances indicate that the carrying amount of an asset group may not be recoverable. Factors that the Group considers in deciding when to perform an impairment review include, but are not limited to significant under-performance of a business or product line in relation to expectations, significant negative industry or economic trends, and significant changes or planned changes in the use of the assets. An impairment analysis is performed at the lowest level of identifiable independent cash flows for an asset or asset group. The Group makes subjective judgments in determining the independent cash flows that can be related to a specific asset group based on the asset usage model and manufacturing capabilities. The Group measures the recoverability of assets that will continue to be used in the operations by comparing the carrying value of the asset group to the estimate of the related total future undiscounted cash flows. If an asset group's carrying value is not recoverable through the related undiscounted cash flows, the impairment loss is measured by comparing the difference between the asset group's carrying value and its fair value. The Group determines the fair value of an asset or asset group utilizing estimated future discounted cash flows and incorporates assumptions that it believes marketplace participants would utilize. The impairment charges for the years ended December 31, 2010, 2011 and 2012 were \$nil, \$38,512,376 (among which \$3,844,799 was included in loss from discontinued operations) and \$42,754,481, respectively. The impairment loss incurred in fiscal year 2012 was related to the impairment of long-lived assets of the wafer business, and was triggered primarily by the significant decrease in average selling prices for wafers that was experienced in 2012.

(k) Revenue recognition**Product sales**

Edgar Filing: DAQO NEW ENERGY CORP. - Form 20-F

The Group recognizes revenue when persuasive evidence of an arrangement exists, the sales price is fixed or determinable, delivery of the product has occurred, title and risk of loss have transferred to the customers and collectability of the receivable is reasonably assured. The majority of the sales contracts transfer title and risk of loss to customers upon receipt. Sales agreements for polysilicon typically do not contain product warranties except for return and replacement of defective products within a period generally ranging from 3 to 30 days from delivery. Sales agreements for polysilicon typically do not contain post-shipment obligations or other return or credit provisions. The Group may extend credit terms after assessing a number of factors to determine the customers' credit worthiness.

F-14

Table of Contents

DAQO NEW ENERGY CORP.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

FOR THE YEARS ENDED DECEMBER 31, 2010, 2011 AND 2012

(In U.S. dollars, except share data)

The Group sold approximately \$24,764,173, \$36,916,531 and \$19,862,424 in photovoltaic wafers and cells in 2010, 2011 and 2012, respectively.

Customers frequently pay for products prior to the delivery of the products. Advance payments are recorded as advances from customers.

Service revenue

The Company also provides OEM services to customers and recognizes revenue when there is persuasive evidence of an arrangement, the service has been rendered, the sales price is fixed or determinable and collectability is reasonably assured.

(l) Cost of revenues

Cost of revenues consists of production related costs including costs of silicon raw materials, electricity and other utilities, consumables, direct labor, overhead costs, depreciation of property, plant and equipment, and manufacturing waste treatment processing fees.

(m) Shipping and handling

Costs to ship products to customers are recorded as selling expenses in the consolidated statements of operations. Costs to ship products to customers were \$1,030,695, \$1,215,110 and \$1,033,808 respectively for the years ended December 31, 2010, 2011 and 2012.

(n) Research and development expenses

Research and development expenses include materials and utilities consumed in research and development activities, payroll and related costs and depreciation of property and equipment associated with the research and development activities, which are expensed when incurred. In the year ended December 31, 2012, the Company incurred additional research and development expenses for its Xinjiang Phase II polysilicon facilities to achieve the targets for quality, capacity and cost during the pilot production period.

(o) Government subsidies

The Group receives unrestricted cash subsidies from local government agencies. The government agencies use their discretion to determine the amount of the subsidies with reference to land use right fees, value-added tax and income taxes paid, bank loan interest expenses paid or electricity consumed by the Group, however, these subsidies do not represent tax refunds or reimbursements of expenditures. The subsidies are unrestricted as to use and can be utilized by the Group in any manner it deems appropriate. The Group has utilized, and expects to continue to utilize, these subsidies to fund general operating expenses. The Group records unrestricted cash government subsidies as other operating income in the consolidated statements of operations. Unrestricted cash government subsidies received for the years ended December 31, 2010, 2011 and 2012 were \$3,382,819, \$11,484,768 and \$9,250,296, respectively. Government grants related to assets are recorded as long term liabilities and are recognized as an offset to depreciation expense on a straight-line basis over the useful life of the associated asset. The Company received government grants related to assets of \$nil, \$25,895,226 and \$1,383,487 during the years ended December 31, 2010, 2011 and 2012, respectively, and recognized \$nil, \$42,047 and \$764,528 as an offset to depreciation expense for the years ended December 31, 2010, 2011 and 2012, respectively. The Company had deferred government grants related to assets of \$nil, \$25,853,179 and \$26,472,137 as of December 31, 2010, 2011 and 2012, respectively.

(p) Income taxes

Edgar Filing: DAQO NEW ENERGY CORP. - Form 20-F

Deferred income taxes are recognized for temporary differences between the tax bases of assets and liabilities and their reported amount in the consolidated financial statements, net operating loss carry-forwards and credits by applying enacted tax rates applicable to future years. Deferred tax assets are reduced by a valuation allowance when, in the opinion of management, it is more likely than not that some portion or all of the deferred tax assets will not be realized. Current income taxes are provided in accordance with the laws of the relevant taxing authorities. Deferred tax assets and liabilities are measured using enacted rates expected to apply to taxable income in which temporary differences are expected to be realized or settled. The effect on deferred tax assets and liabilities of changes in tax rates is recognized in the statement of operations in the period of the enactment of the change. The components of the deferred tax assets and liabilities are individually classified as current and non-current based on the characteristics of the underlying assets and liabilities, or the expected timing of their use when they do not relate to a specific asset or liability.

F-15

Table of Contents**DAQO NEW ENERGY CORP.****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)****FOR THE YEARS ENDED DECEMBER 31, 2010, 2011 AND 2012****(In U.S. dollars, except share data)*****(q) Share-based compensation***

The Group recognizes share-based compensation in the statement of operations based on the fair value of equity awards on the date of the grant, with compensation expense recognized over the period in which the grantee is required to provide service to the Group in exchange for the equity award. The Group has made an estimate of expected forfeiture and is recognizing compensation costs only for those equity awards expected to vest. The share-based compensation expenses have been categorized as either selling, general and administrative expenses, research and development expenses and cost of sales, depending on the job functions of the grantees. For the years ended December 31, 2010, 2011 and 2012, the Group recognized share-based compensation expense of \$1,614,755, \$2,206,025 and \$2,249,834 respectively, which was classified as follows:

	Year ended December 31,		
	2010	2011	2012
Selling, general and administrative expenses	\$ 1,513,137	\$ 2,068,115	\$ 2,018,817
Research and development expenses	96,827	75,508	175,242
Cost of sales	4,791	62,402	55,775
Total	\$ 1,614,755	\$ 2,206,025	\$ 2,249,834

(s) Earnings (loss) per share

Basic earnings (loss) per ordinary share are computed by dividing the net income (loss) attributable to ordinary shares by the weighted average number of ordinary shares outstanding during the year using the two-class method. Under the two-class method, net income (loss) is allocated between ordinary shares and other participating securities based on their participating rights. Upon the consummation of the Company's initial public offering on October 6, 2010, each Series A convertible redeemable preferred shares was automatically converted into ordinary shares. The two-class method of computing earnings per share ceased to apply on the conversion date.

Table of Contents

DAQO NEW ENERGY CORP.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

FOR THE YEARS ENDED DECEMBER 31, 2010, 2011 AND 2012

(In U.S. dollars, except share data)

Diluted earnings per share is calculated by dividing net income attributable to ordinary shareholders as adjusted for the effect of dilutive ordinary equivalent shares, if any, by the weighted average number of ordinary shares and dilutive ordinary share equivalents outstanding during the year. Diluted earnings per share is computed using the more dilutive of (a) the two-class method or (b) the if-converted method. Ordinary share equivalents consist of the ordinary shares issuable upon the conversion of the Series A convertible redeemable preferred shares (using the if-converted method) and ordinary shares issuable upon the exercise of outstanding share options (using the treasury stock method). For the years ended December 31, 2010, 2011 and 2012, the ordinary shares issuable upon the exercise of outstanding share options of 92,456, nil and nil shares are included in the calculation of dilutive earnings per share.

(t) Foreign currency translation

The reporting currency of the Group is the United States dollar (U.S. dollar). The functional currency of the Company is the U.S. dollar. Monetary assets and liabilities denominated in other currencies other than the U.S. dollar are translated into U.S. dollar at the rates of exchange in effect at the balance sheet dates. Transactions dominated in currencies other than the U.S. dollar during the year are converted into U.S. dollar at the applicable rates of exchange prevailing when the transactions occur. Transaction gains and losses are recorded in the statements of operations.

The financial records of the Company's PRC subsidiaries and VIE are maintained in Chinese Renminbi (RMB), which is their functional currency. Assets and liabilities are translated at the exchange rates at the balance sheet date. Equity accounts are translated at historical exchange rates. Revenues, expenses, gains and losses are translated at average rate of exchange prevailing during the periods presented. Translation adjustments are reported as cumulative translation adjustments and are shown as a separate component of other comprehensive income in the statement of changes in equity and comprehensive income.

The RMB is not a freely convertible currency. The State Administration for Foreign Exchange of People's Republic of China, under the authority of the People's Bank of China, controls the conversion of RMB into foreign currencies. The value of the RMB is subject to changes in central government policies and to international economic and political developments affecting supply and demand in the China foreign exchange trading system market. The Group's aggregate amount of cash and cash equivalents and restricted cash denominated in RMB amounted to \$84,853,361 and \$11,589,702 as of December 31, 2011 and 2012, respectively.

(u) Comprehensive income

Our financial statements include the Consolidated Statements of Comprehensive Income as required by new accounting guidance, which we retrospectively adopted during 2012. As of December 31, 2011 and 2012, Accumulated Other Comprehensive Income was comprised entirely of foreign currency translation adjustments.

Table of Contents

DAQO NEW ENERGY CORP.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

FOR THE YEARS ENDED DECEMBER 31, 2010, 2011 AND 2012

(In U.S. dollars, except share data)

(v) Fair value of financial instruments

The Company estimates fair value of financial assets and liabilities as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date (also referred to as an exit price). The fair value measurement guidance establishes a hierarchy for inputs used in measuring fair value that gives the highest priority to observable inputs and the lowest priority to unobservable inputs. Valuation techniques used to measure fair value shall maximize the use of observable inputs.

Level 1 Valuation techniques in which all significant inputs are unadjusted quoted prices from active markets for assets or liabilities that are identical to the assets or liabilities being measured.

Level 2 Valuation techniques in which significant inputs include quoted prices from active markets for assets or liabilities that are similar to the assets or liabilities being measured and/or quoted prices for assets or liabilities that are identical or similar to the assets or liabilities being measured from markets that are not active. Also, model-derived valuations in which all significant inputs and significant value drivers are observable in active markets are Level 2 valuation techniques.

Level 3 Valuation techniques in which one or more significant inputs or significant value drivers are unobservable. Unobservable inputs are valuation technique inputs that reflect the Group's own assumptions about the assumptions that market participants would use to price an asset or liability.

When available, the Group measures the fair value of financial instruments based on quoted market prices in active markets, valuation techniques that use observable market-based inputs or unobservable inputs that are corroborated by market data. Pricing information the Group obtains from third parties is internally validated for reasonableness prior to use in the consolidated financial statements. When observable market prices are not readily available, the Group generally estimates fair value using valuation techniques that rely on alternate market data or inputs that are generally less readily observable from objective sources and are estimated based on pertinent information available at the time of the applicable reporting periods. In certain cases, fair values are not subject to precise quantification or verification and may fluctuate as economic and market factors vary and the Group's evaluation of those factors changes. Although the Group uses its best judgment in estimating the fair value of these financial instruments, there are inherent limitations in any estimation technique. In these cases, a minor change in an assumption could result in a significant change in its estimate of fair value, thereby increasing or decreasing the amounts of the Group's consolidated assets, liabilities, shareholders' equity and net income or loss.

The Group's financial instruments include cash and cash equivalents, restricted cash, accounts receivable, advances to suppliers, other current assets, amount due from related parties, accounts payable, advances from customers, other current liabilities, payables for purchase of property, plant and equipment, amounts due to related parties and short-term and long-term borrowings. The carrying amounts of these short-term financial instruments approximate their fair values due to the short-term maturity of these instruments.

The fair value of the Company's non-current portion of payables for purchase of property, plant and equipment and long-term bank borrowings as of December 31, 2012 is estimated by discounted future cash flow technique using an interest rate corresponding to debt with similar maturities and risks on the measurement date.

Table of Contents

DAQO NEW ENERGY CORP.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

FOR THE YEARS ENDED DECEMBER 31, 2010, 2011 AND 2012

(In U.S. dollars, except share data)

(w) Variable Interest Entity

A VIE is an entity in which equity investors generally do not have the characteristics of a controlling financial interest or there is not sufficient equity at risk for the entity to finance its activities without additional subordinated financial support. A VIE is consolidated by its primary beneficiary if the equity investors in the entity do not have the characteristics of a controlling financial interest or do not have sufficient equity at risk for the entity to finance its activities without additional subordinated financial support from other parties.

(x) Noncontrolling interest

The noncontrolling interest represents Daqo Group's equity interest in the VIE. The Group classified the ownership interest in the consolidated entity held by a party other than the Company to noncontrolling interest in the consolidated financial statements. It also reported the consolidated net income at amounts that include the amounts attributable to both the parent and the noncontrolling interest on the face of the consolidated statements of operations and comprehensive income.

(y) Recent accounting pronouncements

In July 2012, the FASB issued ASU 2012-02, Impairment of Indefinite-Lived Intangible Assets, an authoritative pronouncement related to testing indefinite-lived intangible assets, other than goodwill, for impairment. Under the guidance, an entity testing an indefinite-lived intangible asset for impairment has the option of performing a qualitative assessment before calculating the fair value of the asset. If the entity determines, on the basis of qualitative factors, that the fair value of the indefinite-lived intangible asset is not more likely than not (i.e., a likelihood of more than 50 percent) impaired, the entity would not need to calculate the fair value of the asset. The guidance does not revise the requirement to test indefinite-lived intangible assets annually for impairment. In addition, the guidance does not amend the requirement to test these assets for impairment between annual tests if there is a change in events or circumstances; however, it does revise the examples of events and circumstances that an entity should consider in interim periods. The guidance was effective for annual and interim impairment tests performed for fiscal years beginning after September 15, 2012. Early adoption is permitted. The adoption of this guidance is not expected to have any effect on the Company's consolidated financial statements.

In February 2013, the FASB issued ASU 2013-02, an authoritative pronouncement related to reporting of amounts reclassified out of accumulated other comprehensive income. Under the guidance, an entity is required to report the effect of significant reclassifications out of accumulated other comprehensive income on the respective line items in net income if the amount being reclassified is required under US GAAP to be reclassified in its entirety to net income. For other amounts that are not required under US GAAP to be reclassified in their entirety to net income in the same reporting period, an entity is required to cross-reference other disclosures required under US GAAP that provide additional detail about those amounts. The amendments are effective prospectively for reporting periods beginning after December 15, 2012. Early adoption is permitted. The Company has early adopted this pronouncement.

In March 2013, the FASB issued ASU 2013-05, an authoritative pronouncement related to parent's accounting for the cumulative translation adjustment upon derecognition of certain subsidiaries or groups of assets within a foreign entity or of an investment in a foreign entity. Under the guidance, the cumulative translation adjustment should be released into net income when a reporting entity (parent) ceases to have a controlling financial interest in a subsidiary or group of assets that is a nonprofit activity or a business within a foreign entity. A pro rata portion of the cumulative translation adjustment should be released into net income upon a partial sale of an equity method investment which is a foreign entity. The amendments are effective prospectively for reporting periods beginning after December 15, 2013. Early adoption is permitted. The Company has early adopted this pronouncement.

Table of Contents**DAQO NEW ENERGY CORP.****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)****FOR THE YEARS ENDED DECEMBER 31, 2010, 2011 AND 2012****(In U.S. dollars, except share data)****3. DISPOSAL OF NANJING DAQO**

On September 28, 2012, in order to focus on the Company's core competency and enhance operating efficiency, the Company sold 100% equity interests on Nanjing Daqo to our affiliate, Daqo Group, after the Group failed to identify a third party investor from its public bidding procedure undertaken through the Nanjing Property Right Trading Center for a total consideration of RMB62 million (US\$9.9 million). The consideration was determined with reference to the valuation result as of March 31, 2012 performed by an independent third party valuer, less the operating loss of Nanjing Daqo incurred during the period from April 1, 2012 to September 28, 2012. The loss from discontinued operation of \$2,392,228 was calculated based on the aggregation of the loss incurred by Nanjing Daqo during the period from January 1, 2012 to September 28, 2012 of \$3,491,527 and the gain on disposition of \$1,099,299 which was the difference between: a) total consideration of \$9.9 million and the aggregate of b): (1) Nanjing Daqo's net assets of \$9.9 million and (2) the reclassification of foreign currency translation gain from other comprehensive income of \$1,099,299. There were no remaining assets or liabilities associated with discontinued operations in the consolidated balance sheet as of December 31, 2012. As of December 31, 2012, \$4.8 million was received.

The discontinued operations were retrospectively reflected for all the prior years presented in the consolidated statements of operations. The operating results reported as discontinued operations for the years ended December 31, 2010, 2011 and 2012, are summarized as follows:

	Year ended December 31,		
	2010	2011	2012
Revenues	\$ 13,983,833	\$ 29,082,384	\$ 6,454,830
Operating costs and expenses	(17,742,976)	(36,943,483)	(9,946,357)
Loss from discontinued operations before income taxes	(3,759,143)	(7,861,099)	(3,491,527)
Income tax benefit	419,616	2,003,289	
Loss from discontinued operations	\$ (3,339,527)	\$ (5,857,810)	\$ (3,491,527)

4. ALLOWANCES FOR DOUBTFUL RECEIVABLES

Allowances for doubtful receivables are totally from allowances for accounts receivable. The Company made provision for doubtful receivables in the aggregate amount of \$nil, \$1,202,940 and \$359,733 during the year ended December 31, 2010, 2011 and 2012, respectively.

Analysis of allowances for accounts receivable is as follows:

	Year ended December 31,		
	2010	2011	2012
Beginning of the year	\$	\$	\$ 1,202,940
Allowances made during the year		1,202,940	359,733
Foreign exchange effect			29,794
Closing balance	\$	\$ 1,202,940	\$ 1,592,467

(In U.S. dollars, except share data)

5. PREPAID EXPENSE AND OTHER CURRENT ASSETS

Prepaid expense and other current assets consist of the following:

	December 31,	
	2011	2012
Spare parts	\$ 3,166,462	\$ 3,975,860
Prepaid Value added tax (VAT)	5,399,839	18,705,984
VAT Refundable	1,002,186	
Prepaid insurance fee	1,121,769	471,721
Others	461,886	780,402
Total	\$ 11,152,142	\$ 23,933,967

6. INVENTORIES

Inventories consist of the following:

	December 31,	
	2011	2012
Raw materials	\$ 2,405,734	\$ 976,374
Work-in-process	4,598,613	5,759,153
Finished goods	17,171,762	8,399,995
Total	\$ 24,176,109	\$ 15,135,522

Inventory write-down was \$nil, \$14,252,701 and \$14,821,620 for the years ended December 31, 2010, 2011 and 2012, respectively.

7. PROPERTY, PLANT AND EQUIPMENT, NET

Property, plant and equipment, net, consist of the following:

	December 31,	
	2011	2012
Cost		
Buildings and plant	\$ 222,690,125	\$ 437,805,571
Machinery and equipment	261,834,469	344,782,948
Furniture, fixtures and equipment	4,119,045	9,233,575

Edgar Filing: DAQO NEW ENERGY CORP. - Form 20-F

Motor vehicles	591,714	519,923
Less: Accumulated depreciation	(96,375,060)	(133,746,851)
Property, plant and equipment, net	\$ 392,860,293	\$ 658,595,166
Construction in process	243,614,398	19,300,108
Total	\$ 636,474,691	\$ 677,895,274

Depreciation expense was \$30,751,063, \$35,479,645 and \$37,371,791 for the years ended December 31, 2010, 2011 and 2012, respectively.

Due to the challenging solar market conditions, the Company recognized an impairment of long-lived assets of \$38,512,376 and \$42,754,481 for its wafer and solar module business during the years ended December 31, 2011 and 2012, respectively. The impairment of long-lived assets was to reflect the market challenges that have an adverse effect on the expected profit-generating ability of wafer and module business.

(In U.S. dollars, except share data)

8. BORROWINGS

The Group's bank borrowings consisted of the following:

	December 31,	
	2011	2012
Short-term bank borrowings	\$ 52,334,370	\$ 49,748,800
Long-term bank borrowings, current portion	59,470,875	69,006,400
Other short-term borrowing		1,524,560
Total borrowings, current	111,805,245	120,279,760
Long-term bank borrowings, non-current portion	165,646,211	187,520,880
Total	\$ 277,451,456	\$ 307,800,640

Short-term borrowings

The Group's short-term bank borrowing consisted of the following:

	December 31,	
	2011	2012
Short-term borrowing guaranteed by Daqo Group	\$ 9,515,340	\$ 1,604,800
Short-term borrowing guaranteed by Daqo Group and Mr. Guangfu Xu and Mr. Xiang Xu	42,819,030	48,144,000
Total	\$ 52,334,370	\$ 49,748,800

The Company has short-term bank facilities of \$17,444,790 and \$nil with various banks available as of December 31, 2011 and 2012, respectively.

The interest rate on the short-term bank borrowing was 6.6% and 7.00% as of December 31, 2011 and 2012. The other short term borrowing was discounted bank notes which had recourse to the Company.

Long-term borrowings

The major bank borrows are as follows:

On October 8, 2007, Daqo New Material entered into a seven-year long term bank borrowing agreement with China Construction Bank. Such borrowing is restricted to the purchase of fixed assets and has a maximum borrowing amount \$63.4 million (RMB400 million), bearing standard five-year long term interest rate issued by People's Bank of China. The borrowing is guaranteed by Daqo Group. As of December 31, 2012, Daqo

Edgar Filing: DAQO NEW ENERGY CORP. - Form 20-F

New Material had drawn down \$63.4 million (RMB400 million), repaid \$41.7 million (RMB260 million) and had no facility available for future draw down. There are no financial covenants associated with the facility.

On January 21, 2009, Chongqing Daqo entered into a six-year long term facility agreement with China Construction Bank. Such borrowing is restricted to the purchase of fixed assets and has a maximum borrowing amount \$63.4 million (RMB400 million), bearing standard five-year long term interest rate issued by People's Bank of China. The borrowing is guaranteed by Daqo Group. As of December 31, 2012, Chongqing Daqo had drawn down \$63.4 million (RMB400 million), repaid \$45.3 million (RMB282 million) and had no facility available for future draw down. There are no financial covenants associated with the facility.

On September 28, 2011, Chongqing Daqo entered into a four-year credit facility agreement with Huaxia Bank with maximum amount of \$63.4 million (RMB400 million). Chongqing Daqo drew down \$60.2 million (RMB380 million), including: \$20.6 million (RMB130 million) with fixed interest rate of 6.65%, which is designated for working capital and \$39.6 million (RMB250 million) with fixed interest rate of 6.9% which is restricted to the purchase of fixed assets. Chongqing Daqo used the remaining facility of \$3.2 million (RMB20 million) through use of bank acceptance notes. Chongqing Daqo repaid \$6.5 million in 2012 and had no facility available for future draw down as of December 31, 2012. This credit facility is guaranteed by Daqo Group and also collateralized by Chongqing Daqo's land use right and property, plant and equipment, which has a book value of \$8.4 million (RMB52 million). The facility contains a covenant which requires the Company to maintain a certain debt to asset ratio, which Chongqing Daqo was in compliance with as of December 31, 2012.

Table of Contents**DAQO NEW ENERGY CORP.****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)****FOR THE YEARS ENDED DECEMBER 31, 2010, 2011 AND 2012****(In U.S. dollars, except share data)**

On September 30, 2011, Xinjiang Daqo entered into a six-year bank borrowing agreement with Bank of China. Such borrowing is restricted to the purchase of fixed assets and has a maximum borrowing amount of \$155.4 million (RMB980 million) and bears interest at standard five-year long term interest rate issued by People's Bank of China plus 5%. The borrowing contains a debt to asset ratio financial covenant, which Xinjiang Daqo was in compliance with as of December 31, 2012. The borrowing is guaranteed by Daqo Group, Daqo New Material, two affiliated companies under Daqo Group and Mr. Guangfu Xu. As of December 31, 2012, Xinjiang Daqo had drawn down \$120 million (RMB750 million) and had \$36 million (RMB230 million) facility available for future draw down. The loan was in compliance with the covenants as of December 31, 2012.

On October 26, 2011, Chongqing Daqo entered into a four-year credit facility agreement with Chongqing Rural Commercial Bank. Such borrowing is restricted to the purchase of fixed assets and has a maximum borrowing amount \$38.9 million (RMB 245.5 million) and bears interest at three to five-year long term interest rate issued by People's Bank of China plus 10%. The borrowing is guaranteed by Daqo Group, Mr Guangfu Xu and Mr Xiang Xu. As of December 31, 2012, Chongqing Daqo had drawn down \$38.9 million (RMB 245.5 million) and repaid \$9.1 million (RMB 60 million). There are no financial covenants associated with the facility.

The weighted average interest rate as of December 31, 2011 and 2012 for the Group's long-term bank borrowings was 6.93% and 6.90%, respectively.

The principal maturities of these long-term bank borrowings as of December 31, 2012 are as follows:

December 31,	Amount
2013	\$ 69,006,400
2014	60,629,344
2015	70,723,536
2016	56,168,000
Total	\$ 256,527,280

9. ACCRUED EXPENSES AND OTHER CURRENT LIABILITIES

Accrued expenses and other current liabilities consist of the following:

	December 31,	
	2011	2012
Accrued payroll and welfare	\$ 3,822,426	\$ 2,526,701
Accrued professional fees	928,957	700,000
Guarantee Deposit	131,473	62,507
Other tax payable	1,196,931	1,830,815
Interest payable	530,502	612,968
Government subsidy	757,310	882,640
Others	1,796,923	1,001,824

Total	\$ 9,164,522	\$ 7,617,455
--------------	---------------------	---------------------

Table of Contents**DAQO NEW ENERGY CORP.****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)****FOR THE YEARS ENDED DECEMBER 31, 2010, 2011 AND 2012****(In U.S. dollars, except share data)****10. ADVANCES FROM CUSTOMERS**

Advances from customers represent prepayments from customers and are recognized as revenue in accordance with the Group's revenue recognition policy.

Advances from customers consist of the following and is analyzed as long and short portion respectively:

	December 31,	
	2011	2012
Customer C	\$ 16,119,606	\$ 15,532,572
Customer I		6,852,496
Customer F	7,364,873	3,462,084
Customer B	7,026,172	
Customer A	2,211,201	
Customer E	2,156,858	1,532,632
Others	3,689,634	2,016,454
Total	\$ 38,568,344	\$ 29,396,238
Less: Current portion of Advance from customers	\$ 26,060,543	\$ 29,396,238
Long term advance from customers	\$ 12,507,801	\$

Table of Contents**DAQO NEW ENERGY CORP.****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)****FOR THE YEARS ENDED DECEMBER 31, 2010, 2011 AND 2012****(In U.S. dollars, except share data)****11. FAIR VALUE MEASUREMENTS**

The following table presents the financial instruments for which fair value does not approximate carrying value as of December 31, 2011 and 2012:

	As of December 31, 2011		As of December 31, 2012	
	Carrying Value	Fair Value	Carrying Value	Fair Value
Long-term bank borrowing	\$ 165,646,211	\$ 151,251,136	\$ 187,520,880	\$ 166,148,388
Payables for purchase of property, plant and equipment	4,157,836	3,701,431	\$ 1,126,255	\$ 1,014,716

Nonrecurring Fair Value Measurements

The following table displays assets and liabilities that were measured at fair value on a non-recurring basis after initial recognition; the Company did not have any assets or liabilities measured at fair value on a non-recurring basis for the years ended December 31, 2010 and 2011.

Description	Total	Year ended December 31, 2012			Total Losses
		Quoted Prices in Active Markets for Identical Assets (Level 1)	Significant Other Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)	
Long-lived assets held and used	\$ 10,532,637	\$	\$	\$ 10,532,637	\$ 42,754,481

In 2012, long-lived assets held and used with a carrying amount of \$53.3 million were written down to their fair value of \$10.5 million, resulting in an impairment charge of \$42.8 million. The fair value is estimated using a discounted cash flow model under the income approach. The discounted cash flow method involves forecasting the future cash flows and then discounting them back to a present value at an appropriate discount rate. The discount rate is estimated based on a weighted average cost of capital method, which measures a Company's cost of debt and equity financing weighted by the percentage of debt and equity in a Company's target capital structure as determined through reference to the identified guideline companies. The cost of equity was derived from the CAPM and the cost of debt was benchmarked to the People's Bank of China's long term borrowing rate in China.

12. MAINLAND CHINA CONTRIBUTION PLAN AND PROFIT APPROPRIATION**(a) China Contribution Plan**

Full time employees of the Group in the PRC participate in a government-mandated, multi-employer, defined contribution plan pursuant to which certain pension benefits, medical care, unemployment insurance, employee housing fund and other welfare benefits are provided to employees. PRC labor regulations require the Group to accrue for these benefits based on a certain percentage of the employees' salaries. Contributions to defined contribution plans are expensed as incurred. During three years ended December 31, 2010, 2011 and 2012, the Group

recognized \$1,117,187, \$2,189,273 and \$3,325,383 respectively.

(b) Statutory Reserves

Foreign invested enterprises in PRC are required under PRC laws to provide for certain statutory reserves, such as a general reserve, an enterprise expansion fund and a staff welfare and bonus fund. These entities are required to allocate at least 10% of their after tax profits as reported in their PRC statutory financial statements to the general reserve and have the right to discontinue allocations to the general reserve if the balance of such reserve have reached 50% of their registered capital. These statutory reserves are not available for distribution to the owners (except in liquidation) and may not be transferred in the form of loans, advances or cash dividends. As of December 31, 2011 and 2012, \$16,803,191 and \$16,803,191 was respectively appropriated from the retained earnings of Chongqing Daqo. As a result of these PRC laws and regulations, the Company's PRC subsidiaries are restricted in their abilities to transfer the registered capital and statutory reserves to the Company in the form of dividends, loans or advances and the restricted portion amounted to \$140,003,191 and \$124,814,365 as of December 31, 2011 and 2012, respectively.

(In U.S. dollars, except share data)

13. INCOME TAXES

Cayman Islands Tax

The Company is incorporated in the Cayman Islands and is not subject to tax in this jurisdiction.

PRC Tax

The Company's subsidiaries are registered in the PRC as foreign invested enterprises. Under the Laws of the People's Republic of China on Enterprise Income Tax (the EIT Law) which are effective January 1, 2008, the statutory enterprise income tax rate is 25%.

Chongqing Daqo is a foreign invested enterprise located in Chongqing. In accordance with a PRC tax regulation which encourages investment in China's southwest region, Chongqing Daqo is entitled to a preferential tax rate of 15% from its establishment through 2012. On November 19, 2012, Chongqing Daqo obtained a High and New Technology Enterprise (HTNE) certificate for a valid period of 3 years till 2014. In 2012, Chongqing Daqo was entitled to a preferential tax rate of 15% for the year ended December 31, 2012 because of its HTNE status.

Daqo New Material is a domestic enterprise registered in Chongqing and is subject to an income tax rate of 25% for each of the three years ended December 31, 2012.

Nanjing Daqo is a foreign-invested enterprise established on December 20, 2007 located in Nanjing. The company started to carry out its operation from July, 2011, and was disposed on September 28, 2012. It is subject to an income tax rate of 25% for each of the three years ended December 31, 2012.

Xinjiang Daqo is a foreign-invested enterprise established on February, 2012 located in Shihezi Economic Development Area in Xinjiang Autonomous Region. The fixed assets of this entity are still under construction and the entity will be subject to an income tax rate of 25% for the year ended December 31, 2012.

United States

Daqo America is subject to United States income tax at a combined federal and state tax rate of 40% in 2010, 2011 and 2012.

Under the current EIT Law and implementation regulations issued by the PRC State Council, an income tax rate of 10% is applicable to interest and dividends payable to investors that are non-resident enterprises, which do not have an establishment or place of business in the PRC, or which have such establishment or place of business but the relevant income is not effectively connected with the establishment or place of business, to the extent such interest or dividends have their sources within the PRC. The Company certified that the undistributed earnings of the Group's PRC subsidiaries of \$63.2 million as of December 31, 2012 will be permanently reinvested, therefore, no provision for PRC dividend withholding tax has been provided thereon.

Table of Contents**DAQO NEW ENERGY CORP.****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)****FOR THE YEARS ENDED DECEMBER 31, 2010, 2011 AND 2012****(In U.S. dollars, except share data)**

The Group made its assessment of the level of authority for each tax position (including the potential application of interests and penalties) based on the tax positions' technical merits, and measured the unrecognized benefits associated with the tax positions. The Group did not have any unrecognized tax benefits as of December 31, 2011 and 2012. The Group does not anticipate that unrecognized tax benefits will significantly increase or decrease within the next twelve months.

According to PRC Tax Administration and Collection Law, the statute of limitations is three years if the underpayment of taxes is due to computational errors made by the taxpayer or withholding agent. The statute of limitations will be extended five years under special circumstances, which are not clearly defined (but an underpayment of tax liability exceeding RMB0.1 million is specifically listed as a special circumstance). In the case of a related party transaction, the statute of limitations is ten years. There is no statute of limitations in the case of tax evasion. From inception to 2012, the Group's PRC subsidiaries are subject to examination of the PRC tax authorities. The Group classifies interest and penalties associated with taxes as income tax expense. Such charges were immaterial in the years ended December 31, 2010, 2011 and 2012.

Income tax expenses are recognized in the following accounts:

	Year ended December 31,		
	2010	2011	2012
Income tax expense from continuing operations	\$ 13,256,751	\$ 2,717,561	\$ 10,253,587
Income tax benefit from discontinued operations	(419,616)	(2,003,289)	
Total	\$ 12,837,135	\$ 714,272	\$ 10,253,587

Income tax expenses comprise:

	Year ended December 31,		
	2010	2011	2012
Current Tax Expenses (Benefit)	\$ 13,056,624	\$ 20,647,400	\$ (1,894,736)

Table of Contents**DAQO NEW ENERGY CORP.****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)****FOR THE YEARS ENDED DECEMBER 31, 2010, 2011 AND 2012****(In U.S. dollars, except share data)**

The Group uses the asset and liability method to record related deferred tax assets and liabilities. In assessing the reliability of deferred tax assets, the Group considers whether it is more likely than not that some portion or all of the deferred tax assets will not be realized. The ultimate realization of deferred tax assets is dependent upon the generation of future taxable income during the periods in which those temporary differences become deductible. Based on the level of projections for future taxable income over the periods in which the deferred tax assets are deductible, the Group believes it is not more likely than not that the Group will realize the benefits of these deductible differences of Chongqing Daqo and Daqo New Material as at December 31, 2012 and the Group believes that it is more likely than not that the Group will realize the benefits of these deductible differences of Xinjiang Daqo as at December 31, 2012. The amount of the deferred tax asset considered realizable, however, could be reduced in the near term if estimates of future taxable income during the carry-forward period are reduced. Xinjiang Daqo had net operating losses carried forward of approximately \$2,992,570, which will expire if not used before December 31, 2017.

The effective income tax rate of the Group is different from the expected PRC statutory rate as a result of the following items:

	Year ended December 31,		
	2010	2011	2012
PRC Enterprise Income Tax	25%	25%	25%
Preferential income tax rate of a subsidiary	(11)%	(12)%	(9)%
Effect of different reversal rate		(14)%	8%
Additional tax deductions	(1)%	%	%
Non-deductible expenses	3%	1%	%
Different tax rate in other jurisdictions		2	(1)%
Changes in valuation allowance			(35)%
Prior year adjustment			2%
Effective tax rate	16%	2%	(10)%

The aggregate amount and per share effect of the tax holiday are as follows:

	Year ended December 31,		
	2010	2011	2012
	\$	\$	\$
The aggregate dollar effect (in thousands)	8,689	4,388	
Per share effect-basic	0.06	0.02	
Per share effect-diluted	0.06	0.02	

14. SERIES A CONVERTIBLE REDEEMABLE PREFERRED SHARES

On November 11, 2009, the Company issued 29,714,103 shares of Series A convertible redeemable preferred shares (Preferred Shares) for cash proceeds of \$54.9 million, net of issuance cost of \$100,000, to new investors. Series A convertible redeemable preferred shares were negotiated with independent third party investors, and recorded at the fair values. The accretion to the redemption value was reflected as a reduction to net income to arrive at net income available to the ordinary shareholders in the accompanying consolidated statements of operations and amounted to \$3,300,000, \$nil and \$nil for the year ended December 31, 2010, 2011 and 2012, respectively. Upon the completion of the Company's initial public offering on October 7, 2010, all of the issued and outstanding Series A convertible redeemable preferred shares were automatically

converted into 29,714,103 ordinary shares without any price adjustment.

DAQO NEW ENERGY CORP.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

FOR THE YEARS ENDED DECEMBER 31, 2010, 2011 AND 2012

(In U.S. dollars, except share data)

Conversion

Each Preferred Shares is entitled to convert any or all of its preferred shares into fully paid and no assessable ordinary shares at the option of the holders or automatically upon a Qualified IPO or upon the request of a majority of holders of Preferred Shares. The conversion ratio is 1:1, subject to adjustments such as share splits and combinations, sale of shares below the conversion price and other dilutive events. Upon conversion, all declared and unpaid dividends on the Preferred Shares shall be paid in cash.

Each Preferred Share shall automatically be converted into ordinary shares at the then effective conversion price immediately prior to the closing of a firm commitment underwritten public offering pursuant to an effective registration statement under the Securities Act covering the offer and sale of ordinary shares to the public with gross cash proceeds to the Company in respect of all such ordinary shares so offered of at least \$80 million and reflects a pre-money market valuation (based on the price per share offered to the public in the offering) of the Company of at least \$275 million and results in such securities being listed on a Qualified Exchange (a Qualified IPO), or otherwise is approved by the Board, including the affirmative votes of both Series A Directors.

The Company has determined that there was no beneficial conversion feature (BCF) attributable to the Series A Shares as the effective conversion price was greater than the fair value of the ordinary shares on the commitment date.

Redemption

Upon the earliest of material breach of share purchase agreement or second anniversary of the original issue, the Company shall redeem any Preferred Shares designated by the holders thereof for redemption by paying in cash an amount equal to the sum of (i) 100% of the issuance price (ii) an amount equal to interest on the issuance price for the period between the issuance date and the redemption date at an interest rate of 8% per annum, compounded annually, and (iii) all declared but unpaid dividends thereon up until the date of redemption, in each case above proportionally adjusted for any share splits, share dividends, combinations, recapitalizations or similar transactions.

Voting

Each Preferred Share has voting rights equivalent to the number of ordinary shares to which it is convertible at the reporting date.

Dividends

The holders of outstanding Preferred Shares were entitled to receive, on an annual basis, preferential, non-cumulative dividends at the dividend rate of 8% of the Original Series A Issue Price, prior and in preference to any dividend on any Ordinary Shares; provided that such dividends shall be payable only when, as, and if declared by the Board.

Liquidation preference

In the event of any liquidation, dissolution or winding up of the Company, the holders of Preferred Shares then outstanding shall be entitled receive an amount equal to the then effective issuance price plus all dividends declared and unpaid (as adjusted). If assets are insufficient, then assets will be distributed among the holders of Preferred Shares in proportion to the full amounts to which they would otherwise be entitled. If assets remain, then remaining assets are distributed among the holders of outstanding Preferred Shares and ordinary shares based on the number of ordinary shares, on an as-if-converted basis.

The reconciliation of the Series A Convertible Redeemable Preferred Shares is as follows:

	Year Ended December 31, 2010
Mezzanine equity Series A convertible redeemable preferred shares beginning balance	\$ 55,602,740
Deemed dividend on Series A convertible redeemable preferred shares	3,300,000
Conversion into ordinary shares	(58,902,740)
 Mezzanine equity Series A convertible redeemable preferred shares ending balance	 \$

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

FOR THE YEARS ENDED DECEMBER 31, 2010, 2011 AND 2012

(In U.S. dollars, except share data)

15. SHARE BASED COMPENSATION

On August 5, 2009, the Company adopted the 2009 Share Incentive Plan (the "Option Plan") to attract and retain the best available personnel, provide additional incentives to employees, directors and consultants, and promote the success of the Company's business. As of December 31, 2009, share options to purchase of no more than 15,000,000 ordinary shares were authorized and 5,350,000 share options were granted under the Option Plan.

During the years ended December 31, 2010, 2011 and 2012, the Company granted 2,310,000, nil and 1,190,000 share options respectively to its officers, directors and employees, respectively.

On October 6, 2010, the Company granted options to acquire 120,000 ordinary shares to independent directors pursuant to the Option Plan. Thirty percent (30%) of the ordinary shares subject to the Option Plan will vest one year following the grant date, thirty percent (30%) of the option will be vest on the second year of the vesting commencement date, and the remaining forty percent (40%) of the ordinary shares subject to the option will vest in the third anniversary of the vesting commencement date. These options were granted in anticipation of services to be provided during the respective service periods. The exercise price is \$1.90.

On December 3, 2010, the Company granted options to acquire 2,190,000 ordinary shares to certain officers, directors and employees pursuant to the Option Plan. The ordinary shares subject to the Option Plan will vest in four equal annual installments, with the first installment vesting one year after grant date. These options were granted in anticipation of services to be provided during the respective service periods. The exercise price is \$2.35. As of December 31, 2012, 7,820,500 shares are available for future granting.

The Company adopted Binomial option pricing model to evaluate the fair value of the stock option with reference to the closing price of the Company as of the respective grant dates.

Table of Contents**DAQO NEW ENERGY CORP.****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)****FOR THE YEARS ENDED DECEMBER 31, 2010, 2011 AND 2012****(In U.S. dollars, except share data)**

The following assumptions were used in the Binomial option pricing model:

	Year Ended December 31, 2010				Post-vesting forfeiture rate
	Average risk-free rate of return	Exercise multiple	Volatility rate	Dividend yield	
Options granted					
October 6, 2010	3.5%	3 times	50.0%	0%	3%
December 3, 2010	3.5%	2.2~3 times	50.0%	0%	3~9%

The risk-free rate of return is based on the yield curve of China USD sovereign bond commensurate with the same maturity at the respective grant dates. The exercise multiple is estimated by reference to the proprietary research and empirical studies. The 50.0% expected volatility is based on the average of historical daily annualized share price volatility of 6 comparable companies over a normalized period that commensurate with the option life of 10 years excluding the volatile share price caused by financial crisis during September 1, 2008 to March 31, 2010. The post-vesting forfeiture rate is based on the historical data and management's best estimation.

On January 9, 2012, the Company modified the exercise price for a total number of 6,520,000 options granted in 2009 and 2010 to \$0.42, in order to provide appropriate incentives to the relevant employees and executive officers of the Company. The fair value of the options under revised terms for three batches granted on October 31, 2009, October 6, 2010 and December 3, 2010 was \$0.22, \$0.23 and \$0.23, respectively. The total incremental cost associated with the modification was \$638,700, of which \$284,123 was recognized immediately for the options vested prior to the date of the modification and the remaining share based compensation charges of \$354,577 will be recognized over a weighted-average period of 2.12 years.

On January 9, 2012, the Company granted options to acquire 300,000 ordinary shares to independent directors pursuant to the Option Plan. Thirty percent (30%) of the options will vest one year following the grant date, thirty percent (30%) of the options will vest on the second year of the vesting commencement date, and the remaining forty percent (40%) of the options will vest on the third anniversary of the vesting commencement date. At the same time, the Company granted options to acquire 890,000 ordinary shares to certain officers and employees pursuant to the Option Plan. Twenty-five percent (25%) of the options will vest one year following the grant date, and the remaining seventy-five percent (75%) of the options will vest in thirty-six equal installments over the next three years. These options were granted in anticipation of services to be provided during the respective service periods. The exercise price is \$0.42.

The Company utilized the Binomial option pricing model to evaluate the fair value of the stock option with reference to the closing price of the Company on January 9, 2012.

The following assumptions were used in the Binomial option pricing model:

	Year Ended December 31, 2012				Post-vesting forfeiture rate
	Average risk-free rate of return	Exercise multiple	Volatility rate	Dividend yield	
Options granted					
January 9, 2012	2.05%	2.2 ~ 3.0 times	58.7%	0%	3-9.5%

Table of Contents**DAQO NEW ENERGY CORP.****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)****FOR THE YEARS ENDED DECEMBER 31, 2010, 2011 AND 2012****(In U.S. dollars, except share data)**

A summary of the aggregate option activity and information regarding options outstanding as of December 31, 2012 is as follows:

	Number of Options	Weighted Average Exercise Price	Weighted Average Remaining Contract Life	Aggregate Intrinsic Value
Options outstanding on January 1, 2012 (after modification of exercise price)	6,805,000	\$ 0.42		
Granted	1,190,000	\$ 0.42		
Forfeited	(815,500)	\$ 0.42		
Options outstanding on December 31, 2012	7,179,500	\$ 0.42	7.4	\$
Options vested or expected to vest on December 31, 2012	5,765,425	\$ 0.42	7.4	\$
Options exercisable on December 31, 2012	4,337,417	\$ 0.42	7.0	\$

The share-based compensation charge related to the share options of approximately \$1,614,755, \$2,206,025 and \$2,249,834 was recognized by the Company for the years ended December 31, 2010, 2011 and 2012, respectively.

The weighted average grant date fair value of options granted during the year ended December 31, 2010, 2011 and 2012 was \$1.29, nil and \$0.23, respectively.

As of December 31, 2012, there was \$1,894,762 in total unrecognized compensation cost related to non-vested stock options, which is expected to be recognized over a weighted-average period of 1.34 years.

DAQO NEW ENERGY CORP.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

FOR THE YEARS ENDED DECEMBER 31, 2010, 2011 AND 2012

(In U.S. dollars, except share data)

Related party transactions with Daqo Group

In September, 2010, the Daqo Group converted \$79,884,026 due from Daqo New Material, into equity. This amount was recorded by the Company as a noncontrolling interest.

In 2011, the Group purchased auxiliary electricity transmission and system equipment totaling \$15.8 million from Daqo Group. Daqo Group and its subsidiaries are mainly engaged in High-Low-voltage Electrical System, Components, Environmental Protection, and High-speed Railway Equipment.

In 2011, the Company received an interest free loan of \$3,095,120 from Daqo Group, which was fully repaid during the year.

In 2012, the Company sold 100% entity interest in Nanjing Daqo to Daqo Group for a consideration of \$9,888,742 and \$5,110,085 was owed by Daqo Group as of December 31, 2012. Besides, the Company purchased fixed assets totaling \$7,849,533 from Daqo Group and had \$5,359,008 due to Daqo Group as of December 31, 2012. Furthermore, \$1,330,044 was prepaid to purchase fixed assets separately as of December 31, 2012.

Related party transactions with Zhenjiang Daqo

In 2011, the Company sold \$6,958,317 wafers, and purchased cells of \$3,314,115, and paid processing fees of \$1,209,769 to Zhenjiang Daqo for tolling arrangements of cells.

In 2012, the Company sold \$ 2,179,723 wafers, \$619,705 polysilicon to Zhenjiang Daqo.

Related party transactions with Daqo Solar

In July 2010, the Company entered into an equipment purchase contract with Daqo Group to assign Daqo Solar to import \$32.8 million of equipment on behalf of the Company. During the years ended December 31, 2010 and 2011, equipment of \$12.9 million and \$20.6 million has been received by the Group, respectively. As of December 31, 2011, the contract has been fully executed.

In 2011, the Company received loans of \$72,199,600 from Daqo Solar, which were fully repaid during the year and accrued interest of \$1,552,126. As of December 31, 2011, the Company provided an interest free loan of \$9,898,458 to Daqo Solar.

In 2012, the Company entered into a polysilicon sales contract with Daqo Solar, and \$13,497,973 payment in advance was received as of December 31, 2012.

Related party transactions with Xinjiang Daqo Investment

In 2012, the Company entered into a polysilicon sales contract with Xinjiang Daqo Investment, and \$2,354,620 payment in advance was received as of December 31, 2012.

Related party transactions with Nanjing Daqo

In August 2012, the Company entered into a one-year loan agreement with Nanjing Daqo, of \$1,584,820 (RMB10 million). The interest rate is fixed at 6%. Besides, the Company also sold \$80,126 cells to Nanjing Daqo.

Related party transactions with other subsidiaries of Daqo Group

In 2010, the Group purchased auxiliary electricity transmission and system equipment of \$1.0 million from other Daqo Group subsidiaries. In 2011, the Group purchased auxiliary electricity transmission and system equipment of \$2.0 million from Daqo Group subsidiaries. The Group also sold modules of \$427,302 to, purchased raw materials of \$300,574 from and paid service fees of \$71,426 to other subsidiaries of Daqo Group.

In 2012, the Company purchased equipment and raw material from other subsidiaries of Daqo Group at the cost of \$ 202,556 and \$ 5,282, respectively.

Table of Contents**DAQO NEW ENERGY CORP.****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)****FOR THE YEARS ENDED DECEMBER 31, 2010, 2011 AND 2012****(In U.S. dollars, except share data)****17. EARNINGS PER SHARE**

The calculation of earnings per share is as follows:

	Year ended December 31,		
	2010	2011	2012
Net income (loss) attributable to Daqo New Energy Corp.	\$ 65,271,257	\$ 33,323,952	\$ (111,928,941)
Numerator used in basic and diluted earnings per share:			
Net income (loss) attributable to Daqo New Energy Corp. ordinary shareholders basic	\$ 54,691,886	\$ 33,323,952	\$ (111,928,941)
Net income (loss) attributable to preferred shareholders for participating rights to dividends basic	\$ 10,579,371	\$	\$
Net income (loss) attributable to Daqo New Energy Corp. ordinary shareholders diluted	\$ 65,271,257	\$ 33,323,952	\$ (111,928,941)
Denominator used in basic and diluted earnings per share:			
Weighted average number of ordinary shares outstanding used in computing earnings per share basic	117,839,487	175,714,103	175,067,343
Weighted average ordinary shares as if converted by Series A convertible redeemable preferred shares basic	22,794,380		
Share options	92,456		
Weighted average number of ordinary shares outstanding used in computing earnings per share diluted	140,726,323	175,714,103	175,067,343
NET INCOME (LOSS) ATTRIBUTABLE TO DAQO NEW ENERGY CORP. PER ORDINARY SHARE Basic	\$ 0.46	\$ 0.19	\$ (0.64)
NET INCOME (LOSS) ATTRIBUTABLE TO DAQO NEW ENERGY CORP. PER ORDINARY SHARE Diluted	\$ 0.46	\$ 0.19	\$ (0.64)

Outstanding 2,295,000, 6,805,000 and 7,179,500 employee options were excluded from the computation of diluted earnings per share as their effects would have been anti-dilutive for the year ended December 31, 2010, 2011 and 2012, respectively.

Table of Contents**DAQO NEW ENERGY CORP.****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)****FOR THE YEARS ENDED DECEMBER 31, 2010, 2011 AND 2012****(In U.S. dollars, except share data)****18. COMMITMENTS***Capital commitments*

As of December 31, 2012, commitments outstanding for the purchase of property, plant and equipment approximated \$20,497,143.

Lease commitments

The Group has operating lease commitments principally for its office in Shanghai. The lease expense was \$32,136, \$612,856 and \$580,724 for the year ended December 31, 2010, 2011 and 2012, respectively.

Future minimum lease payments are as follows:

Year ending December 31	
2013	\$ 161,742
2014	47,542
Total	\$ 209,284

19. VARIABLE INTEREST ENTITY

The equity interests in Daqo New Material, the VIE, are funded by Daqo Group. Daqo New Material was structured to acquire land use rights and to erect certain facilities for the future use of the Group.

The lease agreement with the VIE is structured such that Chongqing Daqo protect Daqo Group from potential losses from Daqo New Material. As a result of this agreement, Chongqing Daqo is the primary beneficiary of Daqo New Material. Lease income and expenses and associated receivables and payables are eliminated upon consolidation as intercompany transactions. Net income of the VIE is reflected as an adjustment to noncontrolling interest. The Company relies on the lease agreements with Daqo New Material for material property, plant and equipment necessary for production. If Daqo New Material fails to perform or terminates the lease agreement for any reason, including, for example, due to its breach of the agreement or the unavailability of any required governmental approvals, or if it refuses to extend or renew the lease agreement when the agreement expires, and the Company cannot find an immediately available alternative source for leasing similar property, plant and equipment, then the Company's ability to carry on the operations will be impaired. If Daqo New Material fails to perform its obligations, the Company may need to initiate legal procedures to enforce the agreement.

The VIE is principally engaged in leasing all its assets for use in the Group's operations. Significant assets, liabilities, revenues, operating costs and expenses and net income of the VIE are as follows:

	Year ended December 31,	
	2011	2012
Cash	\$ 1,006,246	\$ 189,312

Edgar Filing: DAQO NEW ENERGY CORP. - Form 20-F

The Group's chief operating decision maker has been identified as the chief executive officer, who reviews consolidated results when making decisions about allocating resources and assessing performance of the Group. Following the further expansion of module business and entering into the wafer business in 2011, the Group operated and viewed its performance in three segments. However, on September 28, 2012, the module business was disposed (see Note 4). Therefore, only two segments in 2012 and the segment information in prior years were restated to be consistent with the current year reportable segments. The following tables summarized the Company's revenue and cost generated from different revenue streams. Substantially all of its revenues are derived in the PRC. The Group's long-lived assets and operations are substantially all located in the PRC.

The following table summarized the Group's revenue by segment:

Year ended December 31, 2010	Polysilicon	Wafer	Elimination	Total
Revenue - External	\$ 217,921,352	\$ 34,893,475	\$	\$ 252,814,827

DAQO NEW ENERGY CORP.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

FOR THE YEARS ENDED DECEMBER 31, 2010, 2011 AND 2012

(In U.S. dollars, except share data)

21. SUBSEQUENT EVENTS

(a) On March 20, 2013, the Company obtained a one-year bank facility from China Everbright Bank, which includes \$11.2 million (RMB 70 million) bank loan facility and \$4.8 million (RMB 30 million) facility for bank accepted notes. The Company withdrawn the facilities on the same day. The bank borrowing is restricted to the purchase of raw materials only and the interest rate is fixed at 6.6%. The bank borrowing is guaranteed by Daqo Group and Mr Guangfu Xu.

(b) On April 3, 2013, the Company modified the exercise price for a total number of 6,920,625 options granted in prior years to \$0.25, in order to provide appropriate incentives to the relevant employees and executive officers of the Company. The Company is assessing the financial impact of the modification of the exercise price.

(c) On April 3, 2013, the Company granted options to acquire 140,000 ordinary shares to independent directors pursuant to the Option Plan. Thirty percent (30%) of the options will vest as of December 24, 2013, thirty percent (30%) of the options will vest as of December 24, 2014, and the remaining forty percent (40%) of the options will vest as of December 24, 2015. These options were granted in anticipation of services to be provided during the respective service periods. The exercise price is \$0.25.

(d) On April 12, 2013, the Company obtained an irrevocable, legally enforceable letter of financial support from the Company's shareholders, who have committed to provide sufficient financial support to the Company to ensure the Company has the funds required to satisfy its obligations as they come due in the normal course, through Daqo Group. Further, the support letter provides that Daqo Group will not require the Company to pay intercompany debts, if any, provided under the letter of support or the amount owed to the Daqo Group and subsidiaries of Daqo Group, Daqo Solar and Xinjiang Daqo Investment as of March 31, 2013, before January 1, 2014.

(e) On April 17, 2013, the Company obtained a one-year bank facility of \$11.2 million (RMB 70 million) from China Construction Bank. The Company withdrew the facilities on the same day. The bank borrowing is for daily business operation purpose and the interest rate is fixed at 6.0%. The bank borrowing is guaranteed by Daqo Group.

FINANCIAL STATEMENT SCHEDULE I

DAQO NEW ENERGY CORP.

Notes to Schedule I

1. Schedule I has been provided pursuant to the requirements of Rule 12-04(a) and 5-04(c) of Regulation S-X, which require condensed financial information as to the financial position, changes in financial position and results of operations of a parent company as of the same dates and for the same periods for which audited consolidated financial statements have been presented when the restricted net assets of consolidated subsidiaries exceed 25 percent of consolidated net assets as of the end of the most recently completed fiscal year.
2. The condensed financial information of Daqo New Energy Corp has been prepared using the same accounting policies as set out in the accompanying consolidated financial statements except that the equity method has been used to account for investments in its subsidiaries.
3. Certain information and footnote disclosures normally included in financial statements prepared in accordance with U.S. GAAP have been condensed or omitted. The footnote disclosures contain supplemental information relating to the operations of the Company and, as such, these statements should be read in conjunction with the notes to the Consolidated Financial Statements of the Company.
4. As of December 31, 2012, there were no material contingencies, significant provisions of long-term obligations, mandatory dividend or redemption requirements of redeemable stocks or guarantees of the Company, except for those which have been separately disclosed in the Consolidated Financial Statement, if any.
