**REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM**

To the Administrative Benefits Committee

of Dominion Resources, Inc. and the Participants

of the Dominion Salaried Savings Plan

Richmond, Virginia

We have audited the accompanying statements of net assets available for benefits of the Dominion Salaried Savings Plan (the "Plan") as of December 31, 2012 and 2011, and the related statement of changes in net assets available for benefits for the year ended December 31, 2012. These financial statements are the responsibility of the Plan's management. Our responsibility is to express an opinion on these financial statements based on our audits.

We conducted our audits in accordance with standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. The Plan is not required to have, nor were we engaged to perform, an audit of its internal control over financial reporting. Our audits included consideration of internal control over financial reporting as a basis for designing audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Plan's internal control over financial reporting. Accordingly, we express no such opinion. An audit also includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements, assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, such financial statements present fairly, in all material respects, the net assets available for benefits of the Plan as of December 31, 2012 and 2011, and the changes in net assets available for benefits for the year ended December 31, 2012, in conformity with accounting principles generally accepted in the United States of America.

Our audits were conducted for the purpose of forming an opinion on the basic financial statements taken as a whole. The supplemental schedules of (1) assets (held at end of year) as of December 31, 2012, and (2) reportable transactions for the year ended December 31, 2012, are presented for the purpose of additional analysis and are not a required part of the basic financial statements, but are supplementary information required by the Department of Labor's Rules and Regulations for Reporting and Disclosure under the Employee Retirement Income Security Act of 1974. These schedules are the responsibility of the Plan's management. Such schedules have been subjected to the auditing procedures applied in our audit of the basic 2012 financial statements and, in our opinion, are fairly stated in all material respects when considered in relation to the basic financial statements taken as a whole.

**DOMINION SALARIED SAVINGS PLAN**

**NOTES TO FINANCIAL STATEMENTS**

**AS OF DECEMBER 31, 2012 AND 2011, AND FOR THE YEAR ENDED DECEMBER 31, 2012**

**1. DESCRIPTION OF PLAN**

The following description of the Dominion Salaried Savings Plan (the Plan) provides only general information. Participants should refer to the Plan document for a more complete description of the Plan's provisions.

- a. **General** The Plan is a defined contribution plan covering all salaried employees and certain hourly employees of Dominion Resources, Inc. and its subsidiaries (the Participating Companies) (see Note 1.d.) who are 18 years of age or older, regular full-time or part-time employees and are scheduled to work at least 1,000 hours per year. Dominion Resources, Inc. (Dominion or the Company) is the designated Plan sponsor. The Plan administrator is Dominion Resources Services, Inc., a subsidiary of Dominion. The Bank of New York Mellon (BNY Mellon) served as the trustee of the Plan through December 31, 2012. Effective January 1, 2013, Northern Trust succeeded BNY Mellon as the trustee of the Plan. The Plan is subject to the provisions of the Employee Retirement Income Security Act of 1974, as amended (ERISA).
- b. **Contributions** Participants may contribute not less than 2% and not more than 50% of their eligible earnings, all of which may be on a tax-deferred basis, or up to 20% on an after-tax basis. Highly compensated employees may contribute not less than 2% and not more than 35% of their eligible earnings, of which up to 15% may be on a tax-deferred basis and up to 20% on an after-tax basis. Employee contributions are subject to certain Internal Revenue Code (IRC) limitations. Depending on a participant's hire date, years of service, and the percentage of tax-deferred and after-tax contributions, Participating Companies contribute a matching amount from 1% up to 7% of the participant's eligible earnings depending upon plan entry date.
- c. **Participant Accounts** Individual accounts are maintained for each Plan participant. Each participant's account includes the effect of the participant's contributions and withdrawals, as applicable, and allocations of the Participating Companies' contributions, Plan earnings or losses, and administrative expenses. Allocations are based on participant earnings or account balances, as defined. The benefit to which a participant is entitled is the benefit that can be provided from the vested portion of the participant's account.

Individual participant accounts invested in the Dominion Stock Fund, the Common/Collective Trust Funds and the separately managed accounts within the Master Trust are maintained on a unit value basis. Participants do not have beneficial ownership in specific underlying securities or other assets in the various funds, but have an interest therein represented by units valued as of the last business day of the period. The various funds earn dividends and interest, which are automatically reinvested within the funds. Generally, contributions to and withdrawal payments from each fund are converted to units by dividing the amounts of such transactions by the unit values as last determined, and the participants' accounts are charged or credited with the number of units properly attributable to each participant.

**Table of Contents**

- d. **Participants** Any subsidiary of Dominion may adopt the Plan for the benefit of its qualified salaried and certain hourly employees subject to approval of the Dominion Board of Directors.
  
- e. **Vesting** Participants become immediately vested in their own contributions and the earnings on these amounts. Participants generally become vested in the Participating Companies' matching contributions and related earnings after three years of service.
  
- f. **Forfeited Accounts** At December 31, 2012 and 2011, forfeited nonvested accounts totaled \$215,943 and \$326,402, respectively. During the year ended December 31, 2012, \$481,814 of forfeited nonvested accounts was used to reduce employer contributions.
  
- g. **Investment Options**

*Participant Contributions* Upon enrollment in the Plan, a participant may direct his or her contributions in any option in 1% increments totaling to 100%. Changes in investment options may be made at any time and participant investment election changes become effective with the subsequent pay period. However, if the participant has not made investment directions at the time the contribution is made, the participant contributions will be automatically invested in the Target Retirement Trust corresponding with the participant's age (assuming retirement at age 65). The Plan provides for employee contributions to be invested in the following:

Dominion Stock Fund<sup>(1)</sup>

**Table of Contents**

- (4) The Common/Collective Trusts do not have any unfunded commitments, and do not have any applicable liquidation periods or defined terms/periods to be held. The Plan may generally sell assets from the Trusts to satisfy participant payment obligations (assets are redeemable daily) and may transfer assets from the Trusts to other investment options based on participant elections (overnight liquidity is generally available).
- (5) The Fund attempts to replicate the S&P 500 Index by investing in the stocks that make up the S&P 500 Index, holding each stock in approximately the same proportion as its weighting within the Index.
- (6) The Fund seeks to approximate the risk/return objectives of the Dow Jones U.S. Completion Total Stock Market Index, an Index designed to represent all U.S. Equity issues with readily available prices, excluding the components of the S&P 500 Index.
- (7) The Trust is designed for investors with an intermediate-term investment horizon (at least three to five years) who are seeking a high level of current income. Normal investment mix includes 5% short-term reserves, 65% bonds and 30% stocks.
- (8) These Trusts are designed for investors seeking to retire between 2013 and 2032 and to provide for a reasonable level of income and long-term growth of capital and income. Normal investment mix: 2015 Trust II 44% bonds and 56% stock; 2020 Trust II 35% bonds and 65% stocks; 2025 Trust II 28% bonds and 72% stocks; and 2030 Trust II 20% bonds and 80% stocks.
- (9) These Trusts are designed for investors seeking to retire between 2033 and 2057, and who seek long-term growth of capital and income. Normal investment mix: 2035 Trust II 13% bonds and 87% stocks; and 2040 Trust II, 2045 Trust II, 2050 Trust II and 2055 Trust II 10% bonds and 90% stocks.
- (10) The Fund invests in a diverse group of strong, undervalued companies which the investment manager believes exhibit growing earnings based primarily in Europe and the Pacific Basin, ranging from small firms to large corporations.

*Employer Contributions* Effective January 1, 2008, Participating Companies' matching contributions are deposited in accordance with the participant's investment directions, or the Target Retirement Trust corresponding with the participant's age (assuming retirement at age 65) if the participant has not made investment directions at the time the contribution is made.

- h. ***Participant Loans*** Participants are eligible to secure loans against their plan account with a maximum repayment period of 5 years. The minimum loan amount is \$1,000 and the maximum loan amount is the lesser of:

50% of the vested account balance, or

\$50,000 (reduced by the maximum outstanding loan balance during the prior 12 months)

The loans are interest-bearing at the prime rate of interest plus 1%. The rate is determined at the beginning of each month if a change has occurred in the prime rate. However, the rate is fixed at the inception of the loan for the life of the loan.

Participants make principal and interest payments to the Plan through payroll deductions. Any defaults in loans result in a reclassification of the remaining loan balances as taxable distributions to the participants.

- i. ***Payment of Benefits*** On termination of service, a participant may elect to receive either a lump sum amount equal to the value of the participant's vested interest in his or her account, or defer the payment to a future time no later than the year in which the participant attains age 70 1/2. If the participant retires from the Company, he or she may elect to receive installment payments. There were no amounts payable to participants at December 31, 2012 or 2011.
- j. ***Flexible Dividend Options*** Participants are given the choice of (1) receiving cash dividends paid on vested shares held in their Dominion Stock Fund or (2) reinvesting the dividends in the Dominion Stock Fund.
- k. ***Plan Changes*** In May 2012, the Large Cap Value Fund's underlying assets were transferred to the Master Trust. See Note 5 for further information on the Master Trust.

**2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES**

- a. ***Basis of Accounting*** The accompanying financial statements have been prepared in accordance with accounting principles generally accepted in the United States of America (GAAP).
- b. ***Use of Estimates*** The preparation of financial statements in conformity with GAAP requires Plan management to make estimates and assumptions that affect the reported amounts of net assets available for benefits, and changes therein. Actual results could differ from those estimates.
- c. ***Risks and Uncertainties*** The Plan utilizes various investment instruments, including the Dominion Stock Fund, common/collective trusts and investment contracts. Investment securities, in general, are exposed to various risks, such as interest rate, credit and overall market volatility.
- d. ***Valuation of Investments*** The Plan's investments are stated at fair value. See Note 6 for further information on fair value measurements. Investment contracts held by a defined contribution plan are required to be reported at fair value; however, contract value is the relevant measurement attribute for that portion of the net assets available for benefits that is attributable to fully benefit-responsive investment contracts. Contract value is the amount Plan participants would receive if they were to initiate permitted transactions under the terms of the Plan. The Plan's interest in the Master Trust includes a separately managed Stable Value Fund that is considered to be fully benefit-responsive. The Plan interest in the Master Trust is included at fair value in participant-directed investments in the statement of net assets available for benefits and an additional line item is presented representing the adjustment from fair value to contract value. The statement of changes in net assets available for benefits is prepared using the contract value basis. See Note 5 for further information.
- e. ***Notes Receivable from Participants*** Notes receivable from participants are measured at their unpaid principal balance plus any accrued but unpaid interest. Delinquent participant loans are recorded as distributions based on the terms of the Plan document.
- f. ***Investment Income*** Purchases and sales of securities are recorded on a trade-date basis. Interest income is recorded on the accrual basis. Dividend income is recognized on the ex-dividend date.

Realized gains and losses on the sale of investments are determined using the average cost method.

Net investment income from common/collective trust fund holdings includes dividend income and realized and unrealized appreciation (depreciation).

Management fees and operating expenses charged to the Plan for investments in common/collective trust funds and mutual funds are deducted from income earned on a daily basis and are not separately reflected. Consequently, management fees and operating expenses are reflected as a reduction of investment return for such investments.

- g. ***Administrative Expenses*** As permitted by law, the reasonable administrative costs of the Plan are paid from the Plan's Trust. Dominion pays any administrative costs that are not charged to the Plan.
- h. ***Payment of Benefits*** Distributions from the Plan are recorded when a participant's valid withdrawal request is processed by the recordkeeper.

**Table of Contents**

- i. **Transfers** In addition to the Plan, Dominion also sponsors several other savings plans for employees of Dominion and certain of its subsidiaries which do not participate in this Plan. If participants change employment among Dominion and its covered subsidiaries during the year, their account balances are transferred into the corresponding plan. For the year ended December 31, 2012, the Plan transferred \$65,175 and \$3,388,399 of participants' assets to and from other plans, respectively.
- j. **Excess Contributions Payable** The Plan is required to return to Plan participants any contributions received during the Plan year in excess of the IRC limits.

**3. INVESTMENTS**

The Plan's investments that represented 5% or more of the Plan's net assets available for benefits as of December 31, 2012 and 2011 are as follows:

	2012	2011

**5. PLAN INTEREST IN MASTER TRUST**

The Plan's investments in the Stable Value Fund, the Large Cap Value Fund, the Large Cap Growth Fund, the Small Cap Value Fund, the Small Cap Growth Fund and the Real Estate Fund are held in a Master Trust separate account that was established for the investment of assets for the Plan and other employee benefit plans of Dominion and its subsidiaries. In May 2012, the Large Cap Value Fund's underlying assets were transferred to the Master Trust. BNY Mellon held the assets of the Master Trust as of December 31, 2012.

**Stable Value Fund** As of December 31, 2012 and 2011, the Plan's interest in the net assets of the Fund was approximately 76% and 75%, respectively. Investment income and administrative expenses relating to the Fund are allocated to the individual plans based upon average monthly balances invested by each plan. The Fund invests primarily in cash equivalents and two types of synthetic GICs described below, which are stated at fair value and then adjusted to contract value. The fair value of synthetic GICs is based on the fair value of the underlying investments as determined by the issuer of the synthetic GICs based on quoted market prices and a fair value estimate of the wrapper contract. Fair market value of the wrapper is estimated by BNY Mellon, the Fund's investment manager, using an internal model. Contract value represents contributions made to the fund, plus earnings, less participant withdrawals and administrative expenses.

**Table of Contents**

- (1) *Fixed Maturity Synthetic Guaranteed Investment Contracts* General fixed maturity synthetic GICs consist of an asset or collection of assets that are owned by the Fund and a benefit-responsive, book value wrap contract purchased for its portfolio. The wrap contract provides book value accounting for the asset, so that book value, benefit-responsive payments will be made for participant directed withdrawals. The crediting rate of the contract is set at the start of the contract and typically resets every quarter. Generally, fixed maturity synthetic GICs are held to maturity. The crediting rate aims at converging the book value of the contract and the market value of the underlying portfolio over the duration of the contract and therefore will be affected by movements in interest rates and/or changes in the market value of the underlying portfolio. The initial crediting rate is established based on the market interest rates at the time the initial asset is purchased and the contract will have an interest crediting rate not less than 0%.

Variable synthetic GICs consist of an asset or collection of assets that are managed by a bank or insurance company and are held in a bankruptcy remote vehicle for the benefit of the Fund. The contract is benefit-responsive and provides next day liquidity at book value. The crediting rate on this product resets every quarter based on the then current market index rates and an investment spread. The investment spread is established at time of issuance and is guaranteed by the issuer for the life of the investment.

- (2) *Constant Duration Synthetic Guaranteed Investment Contracts* Constant duration synthetic GICs consist of a portfolio of securities owned by the Fund and a benefit-responsive, book value wrap contract purchased for its portfolio. The wrap contract amortizes gains and losses of the underlying securities over the portfolio duration, so that book value, benefit-responsive payments will be made for participant directed withdrawals. The crediting rate on a constant duration synthetic GIC resets every quarter based on the book value of the contract, the market yield of the underlying assets, the market value of the underlying assets and the average duration of the underlying assets. The crediting rate aims at converging the book value of the contract and the market value of the underlying portfolio over the duration of the contract and therefore will be affected by movements in interest rates and/or changes in the market value of the underlying portfolio. The initial crediting rate is established based on the market interest rates at the time the underlying portfolio is first put together and the contract will have an interest crediting rate of not less than 0%.

Certain Plan-initiated events, such as plan termination, bankruptcy and mergers, may limit the ability of the Plan to transact at contract value. In general, issuers may terminate the contracts and settle at other than contract value if the qualification status of the Plan changes, there is a breach of material obligations under the contract and misrepresentation by the contract holder, or the underlying portfolio fails to conform to the pre-established investment guidelines. The Plan Sponsor does not believe that any events that may limit the ability of the Plan to transact at contract value are probable.

**6. FAIR VALUE MEASUREMENTS**

Fair value is defined as the price that would be received to sell an asset or paid to transfer a liability (exit price) in an orderly transaction between market participants at the measurement date. Fair values are based on assumptions that market participants would use when pricing an asset or liability, including assumptions about risk and the risks inherent in valuation techniques and the inputs to valuations. Fair value measurements assume that the transaction occurs in the principal market for the asset or liability (the market with the most volume and activity for the asset or liability from the perspective of the reporting entity), or in the absence of a principal market, the most advantageous market for the asset or liability (the market in which the reporting entity would be able to maximize the amount received or minimize the amount paid). The Plan applies fair value measurements to the Plan's investments in accordance with the requirements described above.

***Inputs and Assumptions***

The Plan maximizes the use of observable inputs and minimizes the use of unobservable inputs when measuring the fair value of its investments. Fair value is based on actively-quoted market prices, if available. In the absence of actively-quoted market prices, the Plan seeks price information from external sources, including broker quotes. When evaluating pricing information provided by brokers, the Plan considers whether the broker is willing and able to trade at the quoted price, if the broker quotes are based on an active market or an inactive market and the extent to which brokers are utilizing a particular model if pricing is not readily available. If pricing information from external sources is not available, or if the Plan believes that observable pricing is not indicative of fair value, judgment is required to develop the estimates of fair value. In those cases, the Plan must estimate prices based on available historical and near-term future price information and certain statistical methods that reflect market assumptions.

## **Table of Contents**

The inputs and assumptions used in measuring fair value for investments include the following:

Quoted securities prices and indices

Securities trading information including volume and restrictions

Maturity

Interest rates

Credit quality

The Plan regularly evaluates and validates the inputs used to estimate fair value by a number of methods, including review and verification of models, as well as various market price verification procedures such as the use of multiple broker quotes to support the market price of the various investments in which the Plan transacts.

The Plan's investments are stated at fair value. Mutual funds are valued at quoted market prices, which represent the value of shares held by the Plan at year-end. Investment in the Dominion Stock Fund is stated at fair value, which has been determined by the custodian and based on the fair value of the underlying investments within the fund. The Dominion Stock Fund is a unitized fund specific to the Plan and other employee benefit plans of Dominion and its subsidiaries, and is made up of Dominion common stock and a money market fund. Common/Collective Trust Funds are stated at fair value as determined by the issuer of the Common/Collective Trust Funds based on the fair value of the underlying investments.

### ***Levels***

The Plan utilizes the following fair value hierarchy, which prioritizes the inputs to valuation techniques used to measure fair value into three broad levels:

- a. *Level 1* Quoted prices (unadjusted) in active markets for identical assets that the Plan has the ability to access at the measurement date.
- b. *Level 2* Inputs other than quoted prices included within Level 1 that are either directly or indirectly observable for the asset, including quoted prices for similar assets in active markets, quoted prices for identical or similar assets in inactive markets, inputs other than quoted prices that are observable for the asset, and inputs that are derived from observable market data by correlation or other means.
- c. *Level 3* Unobservable inputs for the asset, including situations where there is little, if any, market activity for the asset.

The fair value hierarchy gives the highest priority to quoted prices in active markets (Level 1) and the lowest priority to unobservable data (Level 3). In some cases, the inputs used to measure fair value might fall in different levels of the fair value hierarchy. In these cases, the lowest level input that is significant to a fair value measurement in its entirety determines the applicable level in the fair value hierarchy. Assessing the significance of a particular input to the fair value measurement in its entirety requires judgment, considering factors specific to the asset.

The wrapper contracts related to GICs in the Stable Value fund, held in the Master Trust, represent a Level 3 fair value measurement due to the use of significant unobservable inputs, including the models used to measure their fair value. The Level 3 amounts are not material, therefore additional Level 3 disclosures are not included in this report.

## Edgar Filing: DOMINION RESOURCES INC /VA/ - Form 11-K

The Plan recognizes transfers among Level 1, Level 2 and Level 3 based on fair values as of the first day of the month in which the transfer occurs. Transfers out of Level 3 represent assets that were previously classified as Level 3 for which the inputs became observable for classification in either Level 1 or Level 2.

**Table of Contents*****Recurring Fair Value Measurements***

Fair value measurements are separately disclosed by level within the fair value hierarchy with a separate reconciliation of fair value measurements categorized as Level 3.
