CAUTIONARY STATEMENT REGARDING FORWARD-LOOKING STATEMENTS

This Prospectus contains certain information that may constitute forward-looking information and forward-looking statements within the meaning of applicable Canadian securities laws and the United States Private Securities Litigation Reform Act of 1995, respectively. Forward-looking statements are necessarily based on a number of estimates and assumptions that are inherently subject to significant business, economic and competitive uncertainties and contingencies. All statements other than statements which are reporting results as well as statements of historical fact set forth or incorporated herein by reference, are forward-looking statements that may involve a number of known and unknown risks, uncertainties and other factors; many of which are beyond the Corporation's ability to control or predict. Forward-looking statements include, without limitation, statements regarding strategic plans, future production, sales targets (including market share evolution in regard to niobium), cost estimates and anticipated financial results; potential mineralization and evaluation and evolution of mineral reserves and resources (including, but not limited to potential for further increases at the Rosebel, Essakane and Sadiola gold mines and at the Niobec niobium mine) and expected mine life; expected exploration results, future work programs, capital expenditures and objectives, evolution and economic performance of development projects including, but not limited to, the Westwood and Côté Gold projects and exploration budgets and targets; construction and production targets and timetables, as well as anticipated timing of grant of permits and governmental incentives; expected continuity of a favourable gold market; contractual commitments, royalty payments, litigation matters and measures of mitigating financial and operational risks; anticipated liabilities regarding site closure and employee benefits; continuous availability of required manpower; possible exercise of outstanding warrants; the integration or expansion of operations, technologies and personnel of acquired operations and properties and, more generally, continuous access to capital markets; and the Corporation's global outlook and that of each of its mines. These statements relate to analysis and other information that are based on forecasts of future results, estimates of amounts not yet determinable and assumptions of management. Known and unknown factors could cause actual results to differ materially from those projected in the forward-looking statements.

Statements concerning actual mineral reserves and mineral resources estimates are also deemed to constitute forward-looking statements to the extent that they involve estimates of the mineralization that will be encountered if the relevant project or property is developed, and in the case of mineral reserves, such statements reflect the conclusion based on certain assumptions that the mineral deposit can be economically exploited.

Forward-looking statements, which involve assumptions and describe the Corporation's future plans, strategies and expectations, are generally identifiable by use of the words may, will, should, continue, expect, anticipate, estimate, believe, intend, plan or project or words or other variations on these words or comparable terminology. There can be no assurance that such statements will prove to be accurate and actual results and future events could differ materially from those anticipated in such statements. The following are some, but not all, of the important factors that could cause actual results or outcomes to differ materially from those discussed in the forward-looking statements: hazards normally encountered in the mining business including unusual or unexpected geological formations, rock bursts, cave-ins, floods and other conditions; delays and repair costs resulting from equipment failure; changes to and differing interpretations of mining tax regimes in foreign jurisdictions; the market prices of gold, niobium and other minerals; past unprecedented events in global financial markets; past or future market events and conditions and the deterioration of general economic indicators; the ability of the Corporation to replace reserves depleted by production; over/underestimation of reserve and resource calculations; fluctuations in exchange rates of currencies; failure to obtain financing as and when required to fund exploration and development; default under the Corporation's credit facility or senior unsecured notes due to a violation of covenants therein; failure to obtain financing to meet capital expenditure plans; risks associated with being a multinational company; differences between the assumption of fair value estimates with respect to the carrying amount of mineral interests (including goodwill) and actual fair values; inherent risks related to the use of derivative instruments; accuracy of mineral reserve and mineral resource estimates; uncertainties in the validity of mining interests and ability to acquire new properties and retain skilled and experienced employees; various risks and hazards beyond

the Corporation's control, many of which are not economically insurable; risks and hazards inherent to the mining industry, most of which are beyond the Corporation's control; market prices and availability of commodities used by the Corporation in its operations; lack of infrastructure and other risks related to the geographical areas in which the Corporation carries out its operations; labour disruptions and other disruptions caused by mining accidents which may involve personal injury to or death of employees or contractors; health risks associated with the mining work force where the Corporation has operations, including Africa, Canada and Suriname; disruptions created by surrounding communities; need to comply with the extensive laws and regulations governing the environment, health and safety of the Corporation's mining and processing operations and exploration activities; risks normally associated with any conduct of business in foreign countries including varying degrees of political and economic risk, which may include the possibility for political unrest and foreign military intervention; ability to obtain the required licenses and permits from various governmental authorities in order to exploit the Corporation's properties; risks and expenses related to reclamation costs and related liabilities; continuously evolving legislation, such as the mining legislation where the Corporation has operations, including French Guiana, Burkina Faso and Canada, which may have unknown and negative impact on operations; risks normally associated with the conduct of joint ventures; inability to control standards of non-controlled assets; risk and unknown costs of litigation; undetected failures in internal controls over financial reporting; risks related to making acquisitions, including the integration of operations; risks related to the construction, development and start-up of the Westwood and Côté Gold project and potential further expansion activities at the Niobec niobium mine and the Essakane, Sadiola and Rosebel gold mines; the training of workers and the resettlement of local communities in connection with any proposed expansion of the Essakane Gold Mine; dependence on key personnel; and other related matters.

Although the Corporation has attempted to identify important factors that could cause actual results to differ materially from expectations, intentions, estimates or forecasts, there may be other factors that could cause results to differ from what is anticipated, estimated or intended. Those factors are described or referred to below, under the heading "Risk Factors" in this Prospectus, and under the heading "Risk Factors" in the annual information form (the "Annual Information Form") of the Corporation dated March 25, 2013 for the year ended December 31, 2012 and under the heading "Risks and Uncertainties" in the management's discussion and analysis of financial position and results of operation of the Corporation for the year ended December 31, 2012, both of which are incorporated herein by reference and are available on SEDAR at www.sedar.com. Past events in global financial and credit markets have resulted in high market and commodity price volatility and uncertainty in credit markets. These on-going events could impact forward-looking statements contained in this Prospectus and in the documents incorporated by reference in an unpredictable and possibly detrimental manner. Accordingly, readers should not place undue reliance on forward-looking statements. Forward-looking statements made in a document incorporated by reference in this Prospectus are made as at the date of the original document and have not been updated by the Corporation except as expressly provided for in this Prospectus. Except as required under applicable securities legislation, the Corporation undertakes no obligation to publicly update or revise forward-looking statements, whether as a result of new information, future events or otherwise.

CAUTIONARY NOTE TO U.S. INVESTORS REGARDING MINERAL REPORTING STANDARDS

The disclosure in this Prospectus and documents incorporated herein by reference has been, and the disclosure in any Prospectus Supplement will be, prepared in accordance with the requirements of Canadian securities laws, which differ from the requirements of United States securities laws. Disclosure, including scientific or technical information, has been made in accordance with Canadian National Instrument 43-101 *Standards of Disclosure for Mineral Projects* (NI 43-101). NI 43-101 is a rule developed by the Canadian Securities Administrators that establishes standards for all public disclosure an issuer makes of scientific and technical information concerning mineral projects. As a result, information contained in this Prospectus and documents incorporated herein by reference, and any Prospectus Supplement, containing descriptions of the Corporation's mineral properties or estimates of mineral reserves or resources is not

comparable to similar information disclosed by U.S. companies in reports filed with the SEC. For example, the terms measured mineral resources, indicated mineral resources, inferred mineral resources, proven mineral reserves and probable mineral reserves are used in this Prospectus and documents incorporated herein by reference to comply with the reporting standards in Canada. While those terms are recognized and required by Canadian regulations, the SEC does not recognize them. Under the rules and regulations of the SEC set forth in Industry Guide 7, a U.S. company may only disclose estimates of proven and probable mineral reserves, and may not disclose estimates of any classification of mineral resources. In addition, the definitions of proven and probable mineral reserves used in NI 43-101 differ from the definitions in the SEC Industry Guide 7. Under United States standards, mineralization may not be classified as a reserve unless the determination has been made that the mineralization could be economically and legally produced or extracted at the time the reserve determination is made. Investors are cautioned not to assume that all or any part of the mineral deposits in these categories will ever be converted into mineral reserves. Any estimate of mineral reserves or resources has a great amount of uncertainty as to its existence, and great uncertainty as to its economic and legal feasibility with estimates of mineral resources having a greater degree of uncertainty. It cannot be assumed that all or any part of measured mineral resources, indicated mineral resources or inferred mineral resources will ever be upgraded to a mineral reserve or mined. Further, in accordance with Canadian rules, estimates of inferred mineral resources cannot form the basis of feasibility or other economic studies. Investors are cautioned not to assume that any part of the reported measured mineral resources, indicated mineral resources, or inferred mineral resources in this Prospectus or the documents incorporated herein by reference is economically or legally mineable and will ever be classified as a reserve. Disclosure of contained ounces is permitted disclosure under Canadian regulations; however, the SEC normally only permits issuers to report mineralization that does not constitute reserves as in place tonnage and grade without reference to unit measures.

FINANCIAL INFORMATION

The financial statements of the Corporation incorporated herein by reference and in any Prospectus Supplement are reported in United States dollars and have been prepared in accordance with International Financial Reporting Standards as issued by the International Accounting Standards Board.

DESCRIPTION OF EXISTING INDEBTEDNESS

Credit Facilities

The Corporation entered into an amended and restated credit agreement (2012 Amended Credit Facility) on February 22, 2012 with a syndicate of financial institutions (collectively the Lenders) led by certain Canadian chartered banks, which amends and restates the credit agreement entered into on April 15, 2008 providing for a revolving facility of \$140 million that was subsequently amended and restated on March 24, 2010 to increase the revolving facility to \$350 million. The 2012 Amended Credit Facility provides for an unsecured revolving bank credit facility of up to \$500 million U.S. dollar or Canadian dollar equivalents. The purpose of the 2012 Amended Credit Facility remains to finance general corporate requirements of the Corporation and permitted acquisitions. The 2012 Amended Credit Facility matures and all indebtedness thereunder is due and payable on February 22, 2016. The Corporation, with the consent of the Lenders representing greater than 66²/₃% of the aggregate commitments under the 2012 Amended Credit Facility, has the option to extend the term of the facility. The Corporation must replace or cancel the commitments of any of the Lenders who do not consent to such an extension.

Advances under the 2012 Amended Credit Facility are available in U.S. dollars and Canadian dollars and bear interest at rates calculated with respect to certain financial ratios of the Corporation and vary in accordance with borrowing rates in Canada and the United States. The Lenders are each paid a standby fee on the undrawn portion of the 2012 Amended Credit Facility, which fee also depends on certain financial ratios of the Corporation. Payment and performance of the Corporation's obligations under the facility continue to be guaranteed by certain of the subsidiaries of the Corporation (collectively with the Corporation, the Obligors). Generally, previous security including pledges by the Obligors of all of their equity interests in each of the other Obligors (other than the Corporation) and a pledge by the Obligors of their bank accounts, investment accounts, bullion accounts and certain debt obligations have been eliminated. The 2012 Amended Credit Facility includes certain covenants relating to the operations and activities of the Obligors including, among others, restrictions with respect to indebtedness, distributions, entering into derivative transactions, disposition of material assets,

mergers and acquisitions as well as covenants to maintain certain financial ratios and a tangible net worth of not less than the aggregate of \$2,250 million plus 50% of the Corporation's consolidated net income for the fiscal year ending December 31, 2011 and each subsequent fiscal year (excluding any period in which net income is a loss), plus 50% of the proceeds of equity issuances or contributions after December 31, 2011. The 2012 Amended Credit Facility also includes typical events of default, including any change of control of the Corporation.

On February 22, 2012, the Corporation entered into an amended and restated credit agreement (2012 Letter of Credit Facility) with a Canadian chartered bank (the LC Lender) amending and restating its previous \$50 million facility with a revolving facility of \$75 million. The purpose of the 2012 Letter of Credit Facility is to provide letters of credit as security in respect of obligations the Corporation may have for certain of its asset retirement obligations. The 2012 Letter of Credit Facility matures and all indebtedness thereunder is due and payable on April 22, 2013, with a provision to extend the maturity date by one year. The 2012 Letter of Credit Facility was extended until April 22, 2014. The Corporation must replace or cancel the commitments of the lender if it does not consent to such an extension.

Interest is payable in arrears in equal semi-annual installments on April 1 and October 1 of each year commencing in 2013. The Notes are guaranteed by certain of the Corporation's subsidiaries.

Except as noted below, the Notes are not redeemable, in whole or part, by the Corporation until October 1, 2016. On and after October 1, 2016, the Corporation may redeem the Notes, in whole or in part, at the relevant redemption price (expressed as a percentage of the principal amount of the Notes) and accrued and unpaid interest on the Notes up to the redemption date. Prior to October 1, 2015 using the cash proceeds from an equity offering the Corporation may redeem up to 35% of the original aggregate principal amount of the Notes at a redemption price equal to 106.750% of the aggregate principal amount thereof, plus accrued and unpaid interest up to the redemption date.

EARNINGS COVERAGE RATIOS

The following consolidated earnings coverage ratios have been calculated for the year ended December 31, 2012 and the twelve months ended March 31, 2013 and give effect to all long-term financial liabilities of the Corporation and the repayment, redemption or retirement thereof since such dates. The earnings coverage ratios set forth below do not purport to be indicative of earnings coverage ratios for any future periods. The earnings coverage ratios and the interest requirements do not give effect to the issuance of any Debt Securities, First Preference Shares or Second Preference Shares that may be issued pursuant to any Prospectus Supplement since the aggregate principal amounts and the terms of such Debt Securities, First Preference Shares or Second Preference Shares are not presently known.

	Year Ended December 31, 2012	Twelve Months Ended March 31, 2013
Interest requirements	\$ 18.5 million	\$ 23.8 million

Earnings coverage	31.8	19.7

If the Corporation offers any Debt Securities having a term to maturity in excess of one year or any First Preference Shares or Second Preference Shares under a Prospectus Supplement, the Prospectus Supplement will include earnings coverage ratios giving effect to the issuance of such Debt Securities, First Preference Shares or Second Preference Shares, as applicable.

USE OF PROCEEDS

Unless otherwise specified in a Prospectus Supplement, the net proceeds from the sale of Securities for cash will be used for general corporate purposes, including funding ongoing operation and/or capital requirements, reducing the level of indebtedness outstanding from time to time, discretionary capital programs and potential future acquisitions. Each Prospectus Supplement will contain specific information, if any, concerning the use of proceeds from that sale of Securities.

All expenses relating to an offering of Securities and any compensation paid to underwriters, dealers or agents, as the case may be, will be paid out of the Corporation's funds, unless otherwise stated in the applicable Prospectus Supplement.

PLAN OF DISTRIBUTION

The Corporation may sell the Securities, separately or together, to or through underwriters or dealers purchasing as principals for public offering and sale by them, and also may sell Securities to one or more other purchasers directly or through agents. Each Prospectus Supplement will set forth the terms of the offering, including the name or names of any underwriters or agents, the purchase price or prices of the Securities and the proceeds to the Corporation from the sale of the Securities. A Prospectus Supplement may provide that the Securities sold thereunder will be flow-through securities. In addition, Securities may be offered and issued in consideration for the acquisition (an Acquisition) of other businesses, assets or securities by the Corporation or a subsidiary of the Corporation. The consideration for any such Acquisition may consist of any of the Securities separately, a combination of Securities or any combination of, among other things, Securities, cash and assumption of liabilities.

The Securities may be sold from time to time in one or more transactions at a fixed price or prices which may be changed or at market prices prevailing at the time of sale, at prices related to such prevailing market prices or at negotiated prices, including sales in transactions that are deemed to be at-the-market distributions as defined in National Instrument 44,102 *Shelf Distributions*, including sales made directly on the TSX, NYSE or other existing trading markets for the Securities. The prices at which the Securities may be offered may vary as between purchasers and during the period of distribution. If, in connection with the offering of Securities at a fixed price or prices, the underwriters have made a *bona fide* effort to sell all of the Securities at the initial offering price fixed in the applicable Prospectus Supplement, the public offering price may be decreased and thereafter further changed, from time to time, to an amount not greater than the initial public offering price fixed in such Prospectus Supplement, in which case the compensation realized by the underwriters will be decreased by the amount that the aggregate price paid by purchasers for the Securities is less than the gross proceeds paid by the underwriters to the Corporation.

Underwriters, dealers and agents who participate in the distribution of the Securities may be entitled under agreements to be entered into with the Corporation to indemnification by the Corporation against certain liabilities, including liabilities under the U.S. Securities Act of 1933 and Canadian securities legislation, or to contribution with respect to payments which such underwriters, dealers or agents may be required to make in respect thereof. Such underwriters, dealers and agents may be customers of, engage in transactions with, or perform services for, the Corporation in the ordinary course of business.

In connection with any offering of Securities, except as otherwise set out in a Prospectus Supplement relating to a particular offering of Securities or other than an at-the-market distribution, the underwriters may over-allot or effect transactions intended to maintain or stabilize the market price of the Securities offered at a level above that which might otherwise prevail in the open market. Such transactions, if commenced, may be discontinued at any time. No underwriter or dealer involved in an at-the-market distribution, as defined under applicable Canadian securities legislation, no affiliate of such an underwriter or dealer and no person or company acting jointly or in concert with such an underwriter or dealer will over-allot Securities in connection with such distribution or effect any other transactions that are intended to stabilize or maintain the market price of the Securities.

In connection with an Acquisition, Securities may be offered and issued at a deemed price or deemed prices determined either when the terms of the Acquisition are tentatively or finally agreed to, when the Acquisition is completed, when the Corporation issues the Securities or during some other negotiated period.
