Assurant, Inc.

Notes to Consolidated Financial Statements (unaudited)

Three and Six Months Ended June 30, 2013 and 2012

(In thousands, except number of shares and per share amounts)

1. Nature of Operations

Assurant, Inc. (the Company) is a holding company whose subsidiaries provide specialized insurance products and related services in North America and select worldwide markets.

The Company is traded on the New York Stock Exchange under the symbol AIZ.

Through its operating subsidiaries, the Company provides debt protection administration, credit-related insurance, warranties and service contracts, pre-funded funeral insurance, solar project insurance, lender-placed homeowners insurance, renters insurance and related products, manufactured housing homeowners insurance, individual health and small employer group health insurance, group dental insurance, group disability insurance and reinsurance, and group life insurance.

2. Basis of Presentation

The accompanying unaudited interim consolidated financial statements have been prepared in accordance with accounting principles generally accepted in the United States of America (GAAP) for interim financial information. Accordingly, these statements do not include all of the information and footnotes required by GAAP for complete financial statements.

The interim financial data as of June 30, 2013 and December 31, 2012 and for the three and six months ended June 30, 2013 and 2012 is unaudited; in the opinion of management, the interim data includes all adjustments, consisting only of normal recurring adjustments, necessary to a fair statement of the results for the interim periods. The unaudited interim consolidated financial statements include the accounts of the Company and all of its wholly owned subsidiaries. All inter-company transactions and balances are eliminated in consolidation. Certain prior period amounts have been reclassified to conform to the 2013 presentation.

Operating results for the three and six months ended June 30, 2013 are not necessarily indicative of the results that may be expected for the year ending December 31, 2013. The accompanying unaudited interim consolidated financial statements should be read in conjunction with the audited consolidated financial statements and related notes included in the Company's Annual Report on Form 10-K for the year ended December 31, 2012.

3. Recent Accounting Pronouncements

Recent Accounting Pronouncements Not Yet Adopted

In July 2013, the Financial Accounting Standards Board (FASB) issued new guidance on the presentation of an unrecognized tax benefit when a net operating loss carryforward, a similar tax loss, or a tax credit carryforward exists. The amendments in this guidance state that an unrecognized tax benefit, or a portion thereof, should be presented in the financial statements as a reduction to a deferred tax asset for a net operating loss carryforward, a similar tax loss, or a tax credit carryforward. An exception to this guidance would be where a net operating loss carryforward or similar tax loss or credit carryforward would not be available under the tax law to settle any additional income taxes that would result from the disallowance of a tax position, or the tax law does not require the entity to use, and the entity does not intend to use, the deferred tax asset for such purpose. In such a case, the unrecognized tax benefit should be presented in the financial statements as a liability and should not be combined with deferred tax assets. The guidance is effective for interim and annual periods beginning after December 15, 2013. The Company will be adopting this presentation as of the effective date and does not expect any net impact to the Company's financial position and results of operations.

Edgar Filing: ASSURANT INC - Form 10-Q

In July 2011, the FASB issued amendments to the other expenses guidance to address how health insurers should recognize and classify in their income statements fees mandated by the Affordable Care Act. The Affordable Care Act imposes an annual fee on health insurers for each calendar year beginning on or after January 1, 2014. The amendments specify that the liability for the fee should be estimated and recorded in full once the entity provides qualifying health insurance in the applicable calendar year in which the fee is payable with a corresponding deferred cost that is amortized to expense ratably over the calendar year during which it is payable. The guidance is effective for calendar years beginning after December 31, 2013, when the fee initially becomes effective. Therefore, the Company is required to adopt this guidance on January 1, 2014. The Company is currently evaluating the requirements of the amendments and the potential impact on the Company's financial position and results of operations.

Assurant, Inc.

Notes to Consolidated Financial Statements (unaudited)

Three and Six Months Ended June 30, 2013 and 2012

(In thousands, except number of shares and per share amounts)

Our states, municipalities and political subdivisions holdings are highly diversified across the United States and Puerto Rico, with no individual state's exposure (including both general obligation and revenue securities) exceeding 0.5% of the overall investment portfolio as of June 30, 2013 and December 31, 2012. At June 30, 2013 and December 31, 2012, the securities include general obligation and revenue bonds issued by states, cities, counties, school districts and similar issuers, including \$177,380 and \$168,705, respectively, of advance refunded or escrowed-to-maturity bonds (collectively referred to as pre-refunded bonds), which are bonds for which an irrevocable trust has been established to fund the remaining payments of principal and interest. As of June 30, 2013 and December 31, 2012, revenue bonds account for 52% of the holdings. Excluding pre-refunded revenue bonds, the activities supporting the income streams of the Company's revenue bonds are across a broad range of sectors, primarily highway, water, transit, airport and marina, higher education, specifically pledged tax revenues, and other miscellaneous sources such as bond banks, finance authorities and appropriations.

The Company's investments in foreign government fixed maturity securities are held mainly in countries and currencies where the Company has policyholder liabilities, which allow the assets and liabilities to be more appropriately matched. At June 30, 2013, approximately 70%, 15%, and 5% of the foreign government securities were held in the Canadian government/provincials and the governments of Brazil and Germany, respectively. At December 31, 2012, approximately 67%, 15%, and 6% of the foreign government securities were held in the Canadian government/provincials and the governments of Brazil and Germany, respectively. No other country represented more than 3% and 5% of our foreign government securities as of June 30, 2013 and December 31, 2012, respectively.

The Company has European investment exposure in its corporate fixed maturity and equity securities of \$1,056,754 with an unrealized gain of \$76,882 at June 30, 2013 and \$1,054,820 with an unrealized gain of \$122,420 at December 31, 2012. Approximately 27% and 28% of the corporate European exposure is held in the financial industry at June 30, 2013 and December 31, 2012, respectively. Our largest European country exposure represented approximately 5% of the fair value of our corporate securities as of June 30, 2013 and December 31, 2012. Approximately 5% of the fair value of the corporate European securities are pound and euro-denominated and are not hedged to U.S. dollars, but held to support those foreign-denominated liabilities. Our international investments are managed as part of our overall portfolio with the same approach to risk management and focus on diversification.

The cost or amortized cost and fair value of fixed maturity securities at June 30, 2013 by contractual maturity are shown below. Expected maturities may differ from contractual maturities because issuers of the securities may have the right to call or prepay obligations with or without call or prepayment penalties.

	Cost or Amortized Cost	Fair Value
Due in one year or less	\$ 610,888	\$ 618,581
Due after one year through five years	2,204,250	2,334,906
Due after five years through ten years	2,767,334	2,881,075

Other-Than-Temporary Impairments

The Company follows the OTTI guidance which requires entities to separate an OTTI of a debt security into two components when there are credit related losses associated with the impaired debt security for which the Company asserts that it does not have the intent to sell, and it is more likely than not that it will not be required to sell before recovery of its cost basis. Under the OTTI guidance, the amount of the OTTI related to a credit loss is recognized in earnings, and the amount of the OTTI related to other, non-credit, factors (e.g., interest rates, market conditions, etc.) is recorded as a component of other comprehensive income. In instances where no credit loss exists but the Company intends to sell the security or it is more likely than not that the Company will have to sell the debt security prior to the anticipated recovery, the decline in market value below amortized cost is recognized as an OTTI in earnings. In periods after the recognition of an OTTI on debt securities, the Company accounts for such securities as if they had been purchased on the measurement date of the OTTI at an amortized cost basis equal to the previous amortized cost basis less the OTTI recognized in earnings. For debt securities for which OTTI was recognized in earnings, the difference between the new amortized cost basis and the cash flows expected to be collected will be accreted or amortized into net investment income.

For the three and six months ended June 30, 2013, the Company recorded \$179 of OTTI, of which \$107 was related to credit losses and recorded as net OTTI losses recognized in earnings, with the remaining \$72 related to all other factors and recorded as an unrealized loss component of AOCI. For the six months ended June 30, 2012, the Company recorded \$1,936 of OTTI, of which \$1,839 was related to credit losses and recorded as net OTTI losses recognized in earnings, with the remaining \$97 related to all other factors and recorded as an unrealized loss component of AOCI. For the three months ended June 30, 2012, the Company did not incur any OTTI.

Reductions for credit loss impairments previously recognized on securities which matured, paid down, prepaid or were sold during the period	(1,083)	(3,744)
Balance, June 30	\$ 93,745	\$ 98,588

We regularly monitor our investment portfolio to ensure investments that may be other-than-temporarily impaired are identified in a timely fashion, properly valued, and charged against earnings in the proper period. The determination that a security has incurred an

Edgar Filing: ASSURANT INC - Form 10-Q

other-than-temporary decline in value requires the judgment of management. Assessment factors include, but are not limited to, the length of time and the extent to which the market value has been less than cost, the financial condition and rating of the issuer, whether any collateral is held, the intent and ability of the Company to retain the investment for a period of time sufficient to allow for recovery for equity securities and the intent to sell or whether it is more likely than not that the Company will be required to sell for fixed maturity securities. Inherently, there are risks and uncertainties involved in making these judgments. Changes in circumstances and critical assumptions such as a continued weak economy, a more pronounced economic downturn or unforeseen events which affect one or more companies, industry sectors, or countries could result in additional impairments in future periods for other-than-temporary declines in value. Any equity security whose price decline is deemed other-than-temporary is written down to its then current market value with the amount of the impairment reported as a realized loss in that period. The impairment of a fixed maturity security that the Company has the intent to sell or that it is more likely than not that the Company will be required to sell is deemed other-than-temporary and is written down to its market value at the balance sheet date with the amount of the impairment reported as a realized loss in that period. For all other-than-temporarily impaired fixed maturity securities that do not meet either of these two criteria, the Company is required to analyze its ability to recover the amortized cost of the security by calculating the net present value of projected future cash flows. For these other-than-temporarily impaired fixed maturity securities, the net amount recognized in earnings is equal to the difference between the amortized cost of the fixed maturity security and its net present value.

The Company considers different factors to determine the amount of projected future cash flows and discounting methods for corporate debt and residential and commercial mortgage-backed or asset-backed securities. For corporate debt securities, the split between the credit and non-credit losses is driven principally by assumptions regarding the amount and timing of projected future cash flows. The net present value is calculated by discounting the Company's best estimate of projected future cash flows at the effective

Table of Contents

Assurant, Inc.

Notes to Consolidated Financial Statements (unaudited)

Three and Six Months Ended June 30, 2013 and 2012

(In thousands, except number of shares and per share amounts)

interest rate implicit in the security at the date of acquisition. For residential and commercial mortgage-backed and asset-backed securities, cash flow estimates, including prepayment assumptions, are based on data from widely accepted third-party data sources or internal estimates. In addition to prepayment assumptions, cash flow estimates vary based on assumptions regarding the underlying collateral including default rates, recoveries and changes in value. The net present value is calculated by discounting the Company's best estimate of projected future cash flows at the effective interest rate implicit in the fixed maturity security prior to impairment at the balance sheet date. The discounted cash flows become the new amortized cost basis of the fixed maturity security.

In periods subsequent to the recognition of an OTTI, the Company generally accretes the discount (or amortizes the reduced premium) into net investment income, up to the non-discounted amount of projected future cash flows, resulting from the reduction in cost basis, based upon the amount and timing of the expected future cash flows over the estimated period of cash flows.

The investment category and duration of the Company's gross unrealized losses on fixed maturity securities and equity securities at June 30, 2013 and December 31, 2012 were as follows:

	Less than 12 Months		June 30, 2013 12 Months or More		Total	
	Fair Value	Unrealized Losses	Fair Value	Unrealized Losses	Fair Value	Unrealized Losses

Total gross unrealized losses represent less than 4% and 2% of the aggregate fair value of the related securities at June 30, 2013 and December 31, 2012, respectively. Approximately 94% and 41% of these gross unrealized losses have been in a continuous loss position for less than twelve months at June 30, 2013 and December 31, 2012, respectively. The total gross unrealized losses are comprised of 680 and 238 individual securities at June 30, 2013 and December 31, 2012, respectively. In accordance with its policy described above, the Company concluded that for these securities an adjustment to its results of operations for other-than-temporary impairments of the gross unrealized losses was not warranted at June 30, 2013 and December 31, 2012. These conclusions are based on a detailed analysis of the underlying credit and expected cash flows of each security. As of June 30, 2013, the gross unrealized losses that have been in a continuous loss position for twelve months or more were concentrated in the Company's corporate fixed maturity securities and in non-redeemable preferred stocks. Within the Company's corporate fixed maturity securities, the majority of the loss position relates to securities in the financial industry sector. The financial industry sector's gross unrealized losses of twelve months or more were \$713, or 41%, of the corporate fixed maturity total. The non-redeemable preferred stocks are perpetual preferred securities that have characteristics of both debt and equity securities. To evaluate these securities, we apply an impairment model similar to that used for our fixed maturity securities. As of June 30, 2013, the Company did not intend to sell these securities and it was not more likely than not that the Company would be required to sell them and no underlying cash flow issues were noted. Therefore, we did not recognize an OTTI on those perpetual preferred securities that had been in a continuous unrealized loss position for twelve months or more. As of June 30, 2013, the Company did not intend to sell the fixed maturity securities and it was not more likely than not that the Company would be required to sell the securities before the anticipated recovery of their amortized cost basis. The gross unrealized losses are primarily attributable to widening credit spreads associated with an underlying shift in overall credit risk premium.

The Company has entered into commercial mortgage loans, collateralized by the underlying real estate, on properties located throughout the U.S. and Canada. At June 30, 2013, approximately 37% of the outstanding principal balance of commercial mortgage loans was concentrated in the states of California, New York, and Utah. Although the Company has a diversified loan portfolio, an economic downturn could have an adverse impact on the ability of its debtors to repay their loans. The outstanding balance of commercial mortgage loans range in size from \$19 to

Edgar Filing: ASSURANT INC - Form 10-Q

\$15,759 at June 30, 2013 and from \$36 to \$15,939 at December 31, 2012.

Credit quality indicators for commercial mortgage loans are loan-to-value and debt-service coverage ratios. Loan-to-value and debt-service coverage ratios are measures commonly used to assess the credit quality of commercial mortgage loans. The loan-to-value ratio compares the principal amount of the loan to the fair value of the underlying property collateralizing the loan, and is commonly expressed as a percentage. The debt-service coverage ratio compares a property's net operating income to its debt-service payments and is commonly expressed as a ratio. The loan-to-value and debt-service coverage ratios are generally updated annually in the third quarter.

Table of Contents

Assurant, Inc.

Notes to Consolidated Financial Statements (unaudited)

Three and Six Months Ended June 30, 2013 and 2012

(In thousands, except number of shares and per share amounts)

The following summarizes our loan-to-value and average debt-service coverage ratios as of the dates indicated:

Loan-to-Value	Carrying Value	June 30, 2013 % of Gross Mortgage Loans	Debt-Service Coverage Ratio
70% and less	\$ 1,122,620	88.2%	1.93
71 80%	88,985	7.0%	1.35
81 95%	43,895	3.4%	1.00
Greater than 95%	17,665	1.4%	1.05
Gross commercial mortgage loans	1,273,165	100.0%	1.85
Less valuation allowance	(6,997)		
Net commercial mortgage loans	\$ 1,266,168		

Loan-to-Value	Carrying Value	December 31, 2012 % of Gross Mortgage Loans	Debt-Service Coverage Ratio
70% and less	\$ 1,141,564	86.6%	1.95
71 80%	103,152	7.8%	1.30
81 95%	57,413	4.3%	1.04
Greater than 95%	16,550	1.3%	1.02
Gross commercial mortgage loans	1,318,679	100.0%	1.85
Less valuation allowance	(6,997)		
Net commercial mortgage loans	\$ 1,311,682		

All commercial mortgage loans that are individually impaired have an established mortgage loan valuation allowance for losses. Changing economic conditions affect our valuation of commercial mortgage loans. Changing vacancies and rents are incorporated into the discounted cash flow analysis that we perform for monitored loans and may contribute to the establishment of (or an increase or decrease in) a commercial mortgage loan valuation allowance for losses. In addition, we continue to monitor the entire commercial mortgage loan portfolio to identify risk. Areas of emphasis are properties that have exposure to earthquakes, have deteriorating credits or have experienced a reduction in debt-service coverage ratio. Where warranted, we have established or increased a valuation allowance based upon this analysis.

Collateralized Transactions

The Company engages in transactions in which fixed maturity securities, primarily bonds issued by the U.S. government and government agencies and authorities, and U.S. corporations, are loaned to selected broker/dealers. Collateral, greater than or equal to 102% of the fair value of the securities lent, plus accrued interest, is received in the form of cash and cash equivalents held by a custodian bank for the benefit of the Company. The use of cash collateral received is unrestricted. The Company reinvests the cash collateral received, generally in investments of high credit quality that are designated as available-for-sale. The Company monitors the fair value of securities loaned and the collateral received, with additional collateral obtained, as necessary. The Company is subject to the risk of loss to the extent there is a loss on the re-investment of cash collateral.

As of June 30, 2013 and December 31, 2012, our collateral held under securities lending, of which its use is unrestricted, was \$96,014 and \$94,729, respectively, and is included in the consolidated balance sheets under the collateral held/pledged under securities agreements. Our liability to the borrower for collateral received was \$96,000 and \$94,714, respectively, and is included in the consolidated balance sheets under the obligation under securities agreements. The difference between the collateral held and obligations under securities lending is recorded as an unrealized gain and is included as part of AOCI. There was one security in an unrealized loss position as of June 30, 2013 and it has been in an unrealized loss position for less than 12 months. All securities were in an unrealized gain position as of December 31, 2012. The Company includes the available-for-sale investments purchased with the cash collateral in its evaluation of other-than-temporary impairments.

Table of Contents

Assurant, Inc.

Notes to Consolidated Financial Statements (unaudited)

Three and Six Months Ended June 30, 2013 and 2012

(In thousands, except number of shares and per share amounts)

Cash proceeds that the Company receives as collateral for the securities it lends and subsequent repayment of the cash are regarded by the Company as cash flows from financing activities, since the cash received is considered a borrowing. Since the Company reinvests the cash collateral generally in investments that are designated as available-for-sale, the reinvestment is presented as cash flows from investing activities.

5. Fair Value Disclosures

Fair Values, Inputs and Valuation Techniques for Financial Assets and Liabilities Disclosures

The fair value measurements and disclosures guidance defines fair value and establishes a framework for measuring fair value. Fair value is defined as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. In accordance with this guidance, the Company has categorized its recurring basis financial assets and liabilities into a three-level fair value hierarchy based on the priority of the inputs to the valuation technique.

The fair value hierarchy gives the highest priority to quoted prices in active markets for identical assets or liabilities (Level 1) and the lowest priority to unobservable inputs (Level 3). The inputs used to measure fair value may fall into different levels of the fair value hierarchy. In such cases, the level in the fair value hierarchy within which the fair value measurement in its entirety falls has been determined based on the lowest level input that is significant to the fair value measurement in its entirety. The Company's assessment of the significance of a particular input to the fair value measurement in its entirety requires judgment, and considers factors specific to the asset or liability.

The levels of the fair value hierarchy are described below:

Level 1 inputs utilize quoted prices (unadjusted) in active markets for identical assets or liabilities that the Company can access.

Level 2 inputs utilize other than quoted prices included in Level 1 that are observable for the asset, either directly or indirectly, for substantially the full term of the asset. Level 2 inputs include quoted prices for similar assets in active markets, quoted prices for identical or similar assets in markets that are not active and inputs other than quoted prices that are observable in the marketplace for the asset. The observable inputs are used in valuation models to calculate the fair value for the asset.

Level 3 inputs are unobservable but are significant to the fair value measurement for the asset, and include situations where there is little, if any, market activity for the asset. These inputs reflect management's own assumptions about the assumptions a market participant would use in pricing the asset.

A review of fair value hierarchy classifications is conducted on a quarterly basis. Changes in the observability of valuation inputs may result in a reclassification of levels for certain securities within the fair value hierarchy.

Notes to Consolidated Financial Statements (unaudited)

Three and Six Months Ended June 30, 2013 and 2012

(In thousands, except number of shares and per share amounts)

The following tables present the Company's fair value hierarchy for assets and liabilities measured at fair value on a recurring basis as of June 30, 2013 and December 31, 2012. The amounts presented below for Collateral held/pledged under securities agreements, Other investments, Cash equivalents, Other assets, Assets and Liabilities held in separate accounts and Other liabilities differ from the amounts presented in the consolidated balance sheets because only certain investments or certain assets and liabilities within these line items are measured at estimated fair value. Other investments are comprised of investments in the Assurant Investment Plan, American Security Insurance Company Investment Plan, Assurant Deferred Compensation Plan, a modified coinsurance arrangement and other derivatives. Other liabilities are comprised of investments in the Assurant Investment Plan and other derivatives. The fair value amount and the majority of the associated levels presented for Other investments and Assets held in separate accounts are received directly from third parties.

Notes to Consolidated Financial Statements (unaudited)

Three and Six Months Ended June 30, 2013 and 2012

(In thousands, except number of shares and per share amounts)

There were no transfers between Level 1 and Level 2 financial assets during either period. However, there were transfers between Level 2 and Level 3 financial assets during the period, which are reflected in the Transfers in and Transfers out columns below. Transfers between Level 2 and Level 3 most commonly occur when market observable inputs that were previously available become unavailable in the current period. The remaining unpriced securities are submitted to independent brokers who provide non-binding broker quotes or are priced by other qualified sources.

The following tables summarize the change in balance sheet carrying value associated with Level 3 financial assets and liabilities carried at fair value during the three and six months ended June 30, 2013 and 2012:

	Three Months Ended June 30, 2013							
	Balance, beginning of period	Total (losses) gains (realized/ unrealized) included in earnings (1)	Net unrealized (losses) gains included in other comprehensive income (2)	Purchases	Sales	Transfers in (3)	Transfers out (3)	Balance, end of period

(1) Included as part of net realized gains on investments in the consolidated statement of operations.

(2) Included as part of change in unrealized gains on securities in the consolidated statement of comprehensive income.

(3) Transfers are primarily attributable to changes in the availability of observable market information and re-evaluation of the observability of pricing inputs.

Three different valuation techniques can be used in determining fair value for financial assets and liabilities: the market, income or cost approaches. The three valuation techniques described in the fair value measurements and disclosures guidance are consistent with generally accepted valuation methodologies. The market approach valuation techniques use prices and other relevant information generated by market transactions involving identical or comparable assets or liabilities. When possible, quoted prices (unadjusted) in active markets are used as of the period-end date (such as for mutual funds and money market funds). Otherwise, valuation techniques consistent with the market approach including matrix pricing and comparables are used. Matrix pricing is a

Table of Contents

Assurant, Inc.

Notes to Consolidated Financial Statements (unaudited)

Three and Six Months Ended June 30, 2013 and 2012

(In thousands, except number of shares and per share amounts)

mathematical technique employed principally to value debt securities without relying exclusively on quoted prices for those securities but rather by relying on the securities' relationship to other benchmark quoted securities. Market approach valuation techniques often use market multiples derived from a set of comparables. Multiples might lie in ranges with a different multiple for each comparable. The selection of where within the range the appropriate multiple falls requires judgment, considering both qualitative and quantitative factors specific to the measurement.

Income approach valuation techniques convert future amounts, such as cash flows or earnings, to a single present amount, or a discounted amount. These techniques rely on current market expectations of future amounts as of the period-end date. Examples of income approach valuation techniques include present value techniques, option-pricing models, binomial or lattice models that incorporate present value techniques and the multi-period excess earnings method.

Cost approach valuation techniques are based upon the amount that would be required to replace the service capacity of an asset at the period-end date, or the current replacement cost. That is, from the perspective of a market participant (seller), the price that would be received for the asset is determined based on the cost to a market participant (buyer) to acquire or construct a substitute asset of comparable utility, adjusted for obsolescence.

While not all three approaches are applicable to all financial assets or liabilities, where appropriate, one or more valuation techniques may be used. For all the classes of financial assets and liabilities included in the above hierarchy, excluding the CPI Caps and certain privately placed corporate bonds, the market valuation technique is generally used. For certain privately placed corporate bonds and the CPI Caps, the income valuation technique is generally used. For the periods ended June 30, 2013 and December 31, 2012, the application of the valuation technique applied to the Company's classes of financial assets and liabilities has been consistent.

Level 1 Securities

The Company's investments and liabilities classified as Level 1 as of June 30, 2013 and December 31, 2012 consisted of mutual funds and money market funds, foreign government fixed maturities and common stocks that are publicly listed and/or actively traded in an established market.

Level 2 Securities

The Company's Level 2 securities are valued using various observable market inputs obtained from a pricing service. The pricing service prepares estimates of fair value measurements for our Level 2 securities using proprietary valuation models based on techniques such as matrix pricing which include observable market inputs. The fair value measurements and disclosures guidance defines observable market inputs as the assumptions market participants would use in pricing the asset or liability developed on market data obtained from sources independent of the Company. The extent of the use of each observable market input for a security depends on the type of security and the market conditions at the balance sheet date. Depending on the security, the priority of the use of observable market inputs may change as some observable market inputs may not be relevant or additional inputs may be necessary. The following observable market inputs (standard inputs), listed in the approximate order of priority, are utilized in the pricing evaluation of Level 2 securities: benchmark yields, reported trades, broker/dealer quotes, issuer spreads, two-sided markets, benchmark securities, bids, offers and reference data including market research data. Further details for level 2 investment types follow:

United States Government and government agencies and authorities: United States government and government agencies and authorities securities are priced by our pricing vendor utilizing standard inputs. Included in this category are U.S. Treasury securities which are priced using vendor trading platform data in addition to the standard inputs.

Edgar Filing: ASSURANT INC - Form 10-Q

State, municipalities and political subdivisions: State, municipalities and political subdivisions securities are priced by our pricing service utilizing material event notices and new issue data inputs in addition to the standard inputs.

Foreign governments: Foreign government securities are primarily fixed maturity securities denominated in Canadian dollars which are priced by our pricing service utilizing standard inputs. The pricing service also evaluates each security based on relevant market information including relevant credit information, perceived market movements and sector news.

Commercial mortgage-backed, residential mortgage-backed and asset-backed: Commercial mortgage-backed, residential mortgage-backed and asset-backed securities are priced by our pricing vendor utilizing monthly payment information and collateral performance information in addition to standard inputs. Additionally, commercial mortgage-backed securities and asset-backed securities utilize new issue data while residential mortgage-backed securities utilize vendor trading platform data.

Assurant, Inc.

Notes to Consolidated Financial Statements (unaudited)

Three and Six Months Ended June 30, 2013 and 2012

(In thousands, except number of shares and per share amounts)

Corporate: Corporate securities are priced by our pricing vendor utilizing standard inputs. Non-investment grade securities within this category are priced by our pricing vendor utilizing observations of equity and credit default swap curves related to the issuer in addition to standard inputs. Certain privately placed corporate bonds are priced by a non-pricing service source using a model with observable inputs including, but not limited to, the credit rating, credit spreads, sector add-ons, and issuer specific add-ons.

Non-redeemable preferred stocks: Non-redeemable preferred stocks are priced by our pricing vendor utilizing observations of equity and credit default swap curves related to the issuer in addition to standard inputs.

Short-term investments, collateral held/pledged under securities, other investments, cash equivalents, and assets/liabilities held in separate accounts: To price the fixed maturity securities in these categories, the pricing service utilizes the standard inputs.

Valuation models used by the pricing service can change period to period, depending on the appropriate observable inputs that are available at the balance sheet date to price a security. When market observable inputs are unavailable to the pricing service, the remaining unpriced securities are submitted to independent brokers who provide non-binding broker quotes or are priced by other qualified sources. If the Company cannot corroborate the non-binding broker quotes with Level 2 inputs, these securities are categorized as Level 3 securities.

Level 3 Securities

The Company's investments classified as Level 3 as of June 30, 2013 and December 31, 2012 consisted of fixed maturity securities and derivatives. All of the Level 3 fixed maturity and equity securities are priced using non-binding broker quotes which cannot be corroborated with Level 2 inputs. Of our total Level 3 fixed maturity and equity securities, \$92,702 and \$102,586 were priced by a pricing service using single broker quotes due to insufficient information to provide an evaluated price as of June 30, 2013 and December 31, 2012, respectively. The single broker quotes are provided by market makers or broker-dealers who are recognized as market participants in the markets in which they are providing the quotes. The remaining \$93,044 and \$100,220 were priced internally using independent and non-binding broker quotes as of June 30, 2013 and December 31, 2012, respectively. The inputs factoring into the broker quotes include trades in the actual bond being priced, trades of comparable bonds, quality of the issuer, optionality, structure and liquidity. Significant changes in interest rates, issuer credit, liquidity, and overall market conditions would result in a significantly lower or higher broker quote. The prices received from both the pricing service and internally are reviewed for reasonableness by management and if necessary, management works with the pricing service or broker to further understand how they developed their price. Further details on Level 3 derivative investment types follow:

Other investments and other liabilities: Swaptions are priced using a Black-Scholes pricing model incorporating third-party market data, including swap volatility data.

Other assets: Non-pricing service source prices the CPI Cap derivatives using a model with inputs including, but not limited to, the time to expiration, the notional amount, the strike price, the forward rate, implied volatility and the discount rate.

Management evaluates the following factors in order to determine whether the market for a financial asset is inactive. The factors include, but are not limited to:

There are few recent transactions,

Little information is released publicly,

The available prices vary significantly over time or among market participants,

The prices are stale (i.e., not current), and

The magnitude of the bid-ask spread.

Table of Contents

Assurant, Inc.

Notes to Consolidated Financial Statements (unaudited)

Three and Six Months Ended June 30, 2013 and 2012

(In thousands, except number of shares and per share amounts)

Illiquidity did not have a material impact in the fair value determination of the Company's financial assets.

The Company generally obtains one price for each financial asset. The Company performs a monthly analysis to assess if the evaluated prices represent a reasonable estimate of their fair value. This process involves quantitative and qualitative analysis and is overseen by investment and accounting professionals. Examples of procedures performed include, but are not limited to, initial and on-going review of pricing service methodologies, review of the prices received from the pricing service, review of pricing statistics and trends, and comparison of prices for certain securities with two different appropriate price sources for reasonableness. Following this analysis, the Company generally uses the best estimate of fair value based upon all available inputs. On infrequent occasions, a non-pricing service source may be more familiar with the market activity for a particular security than the pricing service. In these cases the price used is taken from the non-pricing service source. The pricing service provides information to indicate which securities were priced using market observable inputs so that the Company can properly categorize our financial assets in the fair value hierarchy.

Disclosures for Non-Financial Assets Measured at Fair Value on a Non-Recurring Basis

The Company also measures the fair value of certain assets on a non-recurring basis, generally on an annual basis, or when events or changes in circumstances indicate that the carrying amount of the assets may not be recoverable. These assets include commercial mortgage loans, goodwill and finite-lived intangible assets.

The Company utilizes both the income and market valuation approaches to measure the fair value of its reporting units when required. Under the income approach, the Company determined the fair value of the reporting units considering distributable earnings, which were estimated from operating plans. The resulting cash flows were then discounted using a market participant weighted average cost of capital estimated for the reporting units. After discounting the future discrete earnings to their present value, the Company estimated the terminal value attributable to the years beyond the discrete operating plan period. The discounted terminal value was then added to the aggregate discounted distributable earnings from the discrete operating plan period to estimate the fair value of the reporting units. Under the market approach, the Company derived the fair value of the reporting units based on various financial multiples, including but not limited to: price to tangible book value of equity, price to estimated 2013 earnings and price to estimated 2014 earnings, which were estimated based on publicly available data related to comparable guideline companies. In addition, financial multiples were also estimated from publicly available purchase price data for acquisitions of companies operating in the insurance industry. The estimated fair value of the reporting units was more heavily weighted towards the income approach because in the current economic environment the earnings capacity of a business is generally considered the most important factor in the valuation of a business enterprise. This fair value determination was categorized as Level 3 (unobservable) in the fair value hierarchy.

Fair Value of Financial Instruments Disclosures

The financial instruments guidance requires disclosure of fair value information about financial instruments, as defined therein, for which it is practicable to estimate such fair value. Therefore, it requires fair value disclosure for financial instruments that are not recognized or are not carried at fair value in the consolidated balance sheets. However, this guidance excludes certain financial instruments, including those related to insurance contracts and those accounted for under the equity method and joint ventures guidance (such as real estate joint ventures).

For the financial instruments included within the following financial assets and financial liabilities, the carrying value in the consolidated balance sheets equals or approximates fair value. Please refer to the *Fair Value Inputs and Valuation Techniques for Financial Assets and Liabilities Disclosures* section above for more information on the financial instruments included within the following financial assets and financial liabilities and the methods and assumptions used to estimate fair value:

Cash and cash equivalents

Fixed maturity securities

In estimating the fair value of the financial instruments that are not recognized or are not carried at fair value in the consolidated balance sheets, the Company used the following methods and assumptions:

Commercial mortgage loans: the fair values of mortgage loans are estimated using discounted cash flow models. The model inputs include mortgage amortization schedules and loan provisions, an internally developed credit spread based on the credit risk associated with the borrower and the U.S. Treasury spot curve. Mortgage loans with similar characteristics are aggregated for purposes of the calculations.

Policy loans: the carrying value of policy loans reported in the balance sheets approximates fair value.

Policy reserves under investment product: the fair values for the Company's policy reserves under investment products are determined using discounted cash flow analysis. Key inputs to the valuation include projections of policy cash flows, reserve run-off, market yields and risk margins.

Funds held under reinsurance: the carrying value reported approximates fair value due to the short maturity of the instruments.

Debt: the fair value of debt is based upon matrix pricing performed by the pricing service utilizing the standard inputs.

Edgar Filing: ASSURANT INC - Form 10-Q

Obligations under securities agreements: obligation under securities agreements is reported at the amount of cash received from the selected broker/dealers.

Three and Six Months Ended June 30, 2013 and 2012

(In thousands, except number of shares and per share amounts)

Only the fair value of the Company's policy reserves for investment-type contracts (those without significant mortality or morbidity risk) are reflected in the table above.

Reinsurance Recoverables Credit Disclosures

A key credit quality indicator for reinsurance is the A.M. Best financial strength ratings of the reinsurer. The A.M. Best ratings are an independent opinion of a reinsurer's ability to meet ongoing obligations to policyholders. The A.M. Best ratings for new reinsurance agreements where there is material credit exposure are reviewed at the time of execution. The A.M. Best ratings for existing reinsurance agreements are reviewed on a periodic basis, at least annually. The A.M. Best ratings have not changed significantly since December 31, 2012.

An allowance for doubtful accounts for reinsurance recoverables is recorded on the basis of periodic evaluations of balances due from reinsurers (net of collateral), reinsurer solvency, management's experience and current economic conditions. Information about the allowance for doubtful accounts for reinsurance recoverable as of June 30, 2013 is as follows:

Balance as of beginning-of-year	\$ 10,633
Provision	0
Other additions	186
Direct write-downs charged against the allowance	0
 Balance as of the end-of-period	 \$ 10,819

6. Debt

On March 28, 2013, the Company completed an issuance of two series of senior notes with an aggregate principal amount of \$700,000 (the 2013 Senior Notes). The Company received net proceeds of \$698,093 from this transaction, which represents the principal amount less the discount before offering expenses. The discount of \$1,907 is being amortized over the life of the 2013 Senior Notes and is included as part of interest expense on the consolidated statements of operations. The first series is \$350,000 in principal amount, bears interest at 2.50% per year and is payable in a single installment due March 15, 2018 and was issued at a 0.18% discount. The second series is \$350,000 in principal amount, bears interest at 4.00% per year and is payable in a single installment due March 15, 2023 and was issued at a 0.37% discount.

In February 2004, the Company issued two series of senior notes with an aggregate principal amount of \$975,000 (the 2004 Senior Notes). The Company received net proceeds of \$971,537 from this transaction, which represents the principal amount less the discount before offering expenses. The discount of \$3,463 is being amortized over the life of the 2004 Senior Notes and is included as part of interest expense on the consolidated statement of operations. The first series is \$500,000 in principal amount, bears interest at 5.63% per year and is payable in a single installment due February 15, 2014 and was issued at a 0.11% discount. The second series is \$475,000 in principal amount, bears interest at 6.75% per year and is payable in a single installment due February 15, 2034 and was issued at a 0.61% discount.

During the three months ended June 30, 2013, the Company repurchased \$23,720 of the 2004 Senior Notes through open market transactions. The \$774 difference between the reacquisition price and the net carrying amount of the extinguished debt was recorded as an extinguishment loss and is included in the consolidated statement of operations as part of interest expense.

Edgar Filing: ASSURANT INC - Form 10-Q

The interest expense incurred related to the 2004 Senior Notes was \$15,003 and \$15,074 for the three months ended June 30, 2013 and 2012, respectively, and \$30,081 and \$30,150 for the six months ended June 30, 2013 and 2012, respectively. There was \$22,070 and \$22,570 of accrued interest at June 30, 2013 and 2012, respectively. The Company made interest payments on the 2004 Senior Notes of \$30,094 on February 15, 2013 and 2012.

The interest expense incurred related to the 2013 Senior Notes was \$5,743 for both the three and six months ended June 30, 2013. There was \$5,688 of accrued interest at June 30, 2013. The Company has not made interest payments on the 2013 Senior Notes as of June 30, 2013. Interest on the 2013 Senior Notes is payable semi-annually on March 15 and September 15 of each year, beginning on September 15, 2013.

Credit Facility

The Company's commercial paper program requires the Company to maintain liquidity facilities either in an available amount equal to any outstanding notes from the commercial paper program or in an amount sufficient to maintain the ratings assigned to the notes issued from the commercial paper program. The Company's subsidiaries do not maintain commercial paper or other borrowing facilities at their level. This program is currently backed up by a \$350,000 senior revolving credit facility, of which \$344,439 was available at June 30, 2013, due to outstanding letters of credit.

On September 21, 2011, the Company entered into a four-year unsecured \$350,000 revolving credit agreement (2011 Credit Facility) with a syndicate of banks arranged by JP Morgan Chase Bank, N.A. and Bank of America, N.A. The 2011 Credit Facility provides for revolving loans and the issuance of multi-bank, syndicated letters of credit and/or letters of credit from a sole issuing bank in an aggregate amount of \$350,000 and is available until September 2015, provided the Company is in compliance with all covenants. The 2011 Credit Facility has a sublimit for letters of credit issued thereunder of \$50,000. The proceeds of these loans may be used for the Company's commercial paper program or for general corporate purposes. The Company may increase the total amount available under the 2011 Credit Facility to \$525,000 subject to certain conditions. No bank is obligated to provide commitments above their share of the \$350,000 facility.

The Company did not use the commercial paper program during the six months ended June 30, 2013 and 2012 and there were no amounts outstanding relating to the commercial paper program at June 30, 2013 and December 31, 2012. The Company made no borrowings using the 2011 Credit Facility and no loans are outstanding at June 30, 2013. The Company had \$5,561 of letters of credit outstanding under the 2011 Credit Facility as of June 30, 2013.

The 2011 Credit Facility contains restrictive covenants and requires that the Company maintain certain specified minimum ratios and thresholds. Among others, these covenants include maintaining a maximum debt to capitalization ratio and a minimum consolidated adjusted net worth. At June 30, 2013, the Company was in compliance with all covenants, minimum ratios and thresholds.

Three and Six Months Ended June 30, 2013 and 2012

(In thousands, except number of shares and per share amounts)

8. Stock Based Compensation**Long-Term Equity Incentive Plan**

In May 2008, the Company's shareholders approved the Assurant, Inc. Long-Term Equity Incentive Plan (ALTEIP), which authorized the granting of up to 3,400,000 new shares of the Company's common stock to employees, officers and non-employee directors. In May 2010, the Company's shareholders approved an amended and restated ALTEIP, increasing the number of shares of the Company's common stock authorized for issuance to 5,300,000 new shares. Under the ALTEIP, the Company may grant awards based on shares of its common stock, including stock options, stock appreciation rights (SARs), restricted stock (including performance shares), unrestricted stock, restricted stock units (RSUs), performance share units (PSUs) and dividend equivalents. All future share-based grants will be awarded under the ALTEIP.

The Compensation Committee of the Board of Directors (the Compensation Committee) awards PSUs and RSUs annually. RSUs and PSUs are promises to issue actual shares of common stock at the end of a vesting period or performance period. The RSUs granted to employees under the ALTEIP were based on salary grade and performance and vest one-third each year over a three-year period. RSUs granted to non-employee directors also vest one-third each year over a three-year period, however, issuance of vested shares is deferred until separation from Board service. RSUs receive dividend equivalents in cash during the restricted period and do not have voting rights during the restricted period. PSUs accrue dividend equivalents during the performance period based on a target payout, and will be paid in cash at the end of the performance period based on the actual number of shares issued. The fair value of RSUs is estimated using the fair market value of a share of the Company's common stock at the date of grant. The fair value of PSUs is estimated using the Monte Carlo simulation model and is described in further detail below.

For the PSU portion of an award, the number of shares a participant will receive upon vesting is contingent upon the Company's performance with respect to selected metrics, identified below, compared against a broad index of insurance companies and assigned a percentile ranking. These rankings are then averaged to determine the composite percentile ranking for the performance period. The payout levels can vary between 0% and 150% (maximum) of the target (100%) ALTEIP award amount based on the Company's level of performance against the selected metrics.

PSU Performance Goals. The Compensation Committee established book value per share (BVPS) growth excluding AOCI, revenue growth and total stockholder return as the three performance measures for PSU awards. BVPS growth is defined as the year-over-year growth of the Company's stockholders' equity excluding AOCI divided by the number of fully diluted total shares outstanding at the end of the period. Revenue growth is defined as the year-over-year change in total revenues as disclosed in the Company's annual statement of operations. Total stockholder return is defined as appreciation in Company stock plus dividend yield to stockholders. Payouts will be determined by measuring performance against the average performance of companies included in the A.M. Best Insurance Index, excluding those with revenues of less than \$1,000,000 or that are not in the health or insurance Global Industry Classification Standard codes.

Under the ALTEIP, the Company's Chief Executive Officer (CEO) is authorized by the Board of Directors to grant common stock, restricted stock and RSUs to employees other than the executive officers of the Company (as defined in Section 16 of the Securities Exchange Act of 1934, as amended (the Exchange Act)). The Board of Directors reviews and ratifies these grants quarterly. Restricted stock and RSUs granted under this program may have different vesting periods.

Restricted Stock Units

Edgar Filing: ASSURANT INC - Form 10-Q

RSUs granted to employees and to non-employee directors were 34,310 and 43,610 for the three months ended June 30, 2013 and 2012, respectively, and 466,218 and 500,891 for the six months ended June 30, 2013 and 2012, respectively. The compensation expense recorded related to RSUs was \$6,720 and \$5,319 for the three months ended June 30, 2013 and 2012, respectively, and \$12,271 and \$10,400 for the six months ended June 30, 2013 and 2012, respectively. The related total income tax benefit was \$2,357 and \$1,859 for the three months ended June 30, 2013 and 2012, respectively, and \$4,289 and \$3,639 for the six months ended June 30, 2013 and 2012, respectively. The weighted average grant date fair value for RSUs granted during the six months ended June 30, 2013 and 2012 was \$43.94 and \$41.47, respectively.

As of June 30, 2013, there was \$26,081 of unrecognized compensation cost related to outstanding RSUs. That cost is expected to be recognized over a weighted-average period of 1.37 years. The total fair value of RSUs vested during the three months ended June 30, 2013 and 2012 was \$2,170 and \$1,763, respectively, and \$19,842 and \$20,301 for the six months ended June 30, 2013 and 2012, respectively.

Table of Contents**Assurant, Inc.****Notes to Consolidated Financial Statements (unaudited)****Three and Six Months Ended June 30, 2013 and 2012****(In thousands, except number of shares and per share amounts)*****Performance Share Units***

No PSUs were granted to employees during the three months ended June 30, 2013 and 2012. PSUs granted to employees were 408,808 and 407,506 for the six months ended June 30, 2013 and 2012, respectively. The compensation expense recorded related to PSUs was \$6,907 and \$(267) for the three months ended June 30, 2013 and 2012, respectively, and \$8,850 and \$3,206 for the six months ended June 30, 2013 and 2012, respectively. During the three and six months ended June 30, 2013, portions of the compensation expense recorded in 2012 were reversed since the Company's level of actual performance as measured against pre-established performance goals had declined. The related total income tax benefit was \$2,425 and \$(88) for the three months ended June 30, 2013 and 2012, respectively. The related total income tax benefit was \$3,093 and \$1,130 for the six months ended June 30, 2013 and 2012, respectively. The weighted average grant date fair value for PSUs granted during the six months ended June 30, 2013 and 2012 was \$44.22 and \$41.68, respectively.

As of June 30, 2013, there was \$24,136 of unrecognized compensation cost related to outstanding PSUs. That cost is expected to be recognized over a weighted-average period of 1.46 years.

The fair value of PSUs with market conditions was estimated on the date of grant using a Monte Carlo simulation model, which utilizes multiple variables that determine the probability of satisfying the market condition stipulated in the award. Expected volatilities for awards issued during the six months ended June 30, 2013 and 2012 were based on the historical stock prices of the Company's stock and peer insurance group. The expected term for grants issued during the six months ended June 30, 2013 and 2012 was assumed to equal the average of the vesting period of the PSUs. The risk-free rate was based on the U.S. Treasury yield curve in effect at the time of grant.

Long-Term Incentive Plan

Prior to the approval of the ALTEIP, share based awards were granted under the 2004 Assurant Long-Term Incentive Plan (ALTIP), which authorized the granting of up to 10,000,000 new shares of the Company's common stock to employees and officers under the ALTIP, Business Value Rights Program (BVR) and CEO Equity Grants Program. Under the ALTIP, the Company was authorized to grant restricted stock and SARs. Since May 2008, no new grants have been made under this plan and the impact of these grants on the consolidated financial statements is immaterial for all periods presented.

Employee Stock Purchase Plan

Under the Employee Stock Purchase Plan (ESPP), the Company is authorized to issue up to 5,000,000 new shares to employees who are participants in the ESPP. Eligible employees can purchase shares at a 10% discount applied to the lower of the closing price of the common stock on the first or last day of the offering period.

In January 2013, the Company issued 107,535 shares at a discounted price of \$31.23 for the offering period of July 1, 2012 through December 31, 2012. In January 2012, the Company issued 103,243 shares at a discounted price of \$32.98 for the offering period of July 1, 2011 through December 31, 2011.

In July 2013, the Company issued 110,038 shares to employees at a discounted price of \$31.93 for the offering period of January 1, 2013 through June 30, 2013. In July 2012, the Company issued 110,699 shares to employees at a discounted price of \$31.36 for the offering period of January 1, 2012 through June 30, 2012.

Edgar Filing: ASSURANT INC - Form 10-Q

The compensation expense recorded related to the ESPP was \$249 and \$379 for the three months ended June 30, 2013 and 2012, respectively, and \$499 and \$757 for the six months ended June 30, 2013 and 2012, respectively.

The fair value of each award under the ESPP was estimated at the beginning of each offering period using the Black-Scholes option-pricing model. Expected volatilities are based on implied volatilities from traded options on the Company's stock and the historical volatility of the Company's stock. The risk-free rate for periods within the contractual life of the option is based on the U.S. Treasury yield curve in effect at the time of grant. The dividend yield is based on the current annualized dividend and share price as of the grant date.

SARs	85,461	127,300	80,625	142,637
PSUs	667,343	528,334	744,743	704,686
ESPP	105,249	109,277	105,249	109,277
Weighted average shares used in diluted earnings per share calculations	78,366,115	87,044,581	79,670,095	88,482,857
Earnings per common share - Basic				
Distributed earnings	\$ 0.25	\$ 0.21	\$ 0.46	\$ 0.39
Undistributed earnings	1.47	1.75	2.73	3.41
Net income	\$ 1.72	\$ 1.96	\$ 3.19	\$ 3.80
Earnings per common share - Diluted				
Distributed earnings	\$ 0.25	\$ 0.21	\$ 0.46	\$ 0.39
Undistributed earnings	1.45	1.73	2.69	3.37
Net income	\$ 1.70	\$ 1.94	\$ 3.15	\$ 3.76

Edgar Filing: ASSURANT INC - Form 10-Q

There were no anti-dilutive SARs or PSUs outstanding that were not included in the computation of diluted EPS under the treasury stock method during the three and six months ended June 30, 2013. Average PSUs totaling 178,424 and 252 for the three and six months ended June 30, 2012, respectively, were outstanding but were anti-dilutive and thus not included in the computation of diluted EPS under the treasury stock method.

(1) The Company's nonqualified plan is unfunded.

Our qualified pension benefits plan (the Plan) was under-funded by \$21,969 and \$107,666 (based on the fair value of Plan assets compared to the projected benefit obligation) at June 30, 2013 and December 31, 2012, respectively. This equates to a 97% and 87% funded status at June 30, 2013 and December 31, 2012, respectively. The change in under-funded projected benefit obligation status is mainly due to an increase in the discount rate used to determine the projected benefit obligation. During the first six months of 2013, \$25,000 in cash was contributed to the Plan. Additional cash, up to \$25,000, is expected to be contributed to the Plan over the remainder of 2013.

12. Segment Information

The Company has five reportable segments, which are defined based on the nature of the products and services offered: Assurant Solutions, Assurant Specialty Property, Assurant Health, Assurant Employee Benefits, and Corporate & Other. Assurant Solutions provides warranties and service contracts, pre-funded funeral insurance, debt protection administration, and credit-related insurance. Assurant Specialty Property provides lender-placed homeowners insurance, manufactured housing homeowners insurance and renters insurance and related products. Assurant Health provides individual health and small employer group health insurance. Assurant Employee Benefits primarily provides group dental insurance, group disability insurance, group life insurance and group vision and supplemental insurance. Corporate & Other includes activities of the holding company, financing and interest expenses, net realized gains (losses) on investments and interest income earned from short-term investments held. Corporate & Other also includes the amortization of deferred gains associated with the sales of Fortis Financial Group and Long-Term Care through reinsurance agreements.

The Company evaluates performance of the operating segments based on segment income (loss) after-tax excluding realized gains (losses) on investments. The Company determines reportable segments in a manner consistent with the way the Chief Operating Decision Maker makes operating decisions and assesses performance.

The following tables summarize selected financial information by segment:

(In thousands, except number of shares and per share amounts)

13. Commitments and Contingencies

In the normal course of business, letters of credit are issued primarily to support reinsurance arrangements in which the Company is the reinsurer. These letters of credit are supported by commitments under which the Company is required to indemnify the financial institution issuing the letter of credit if the letter of credit is drawn. The Company had \$5,561 and \$19,760 of letters of credit outstanding as of June 30, 2013 and December 31, 2012, respectively.

On March 21, 2013, the Company and two of its wholly owned subsidiaries in the Assurant Specialty Property segment, American Security Insurance Company (ASIC) and American Bankers Insurance Company of Florida (ABIC), reached an agreement with the New York Department of Financial Services (the NYDFS) regarding the Company's lender-placed insurance business in the State of New York. Under the terms of the agreement, and without admitting or denying any wrongdoing, ASIC made a \$14,000 settlement payment to the NYDFS. In addition, among other things, ASIC and ABIC agreed to modify certain business practices in accordance with requirements that apply to all New York-licensed lender-placed insurers of properties in the state, and filed our new lender-placed program and new rates in New York.

As previously disclosed, the Company is involved in a variety of litigation relating to its current and past business operations and may from time to time become involved in other such actions. In particular, the Company is a defendant in class actions in a number of jurisdictions regarding its lender-placed insurance programs. These cases allege a variety of claims under a number of legal theories. The plaintiffs seek premium refunds and other relief. The Company has accrued an estimated loss for this litigation.

The possible loss or range of loss resulting from such litigation, if any, in excess of the amounts accrued is inherently unpredictable and involves significant uncertainty. Consequently, no estimate can be made of any possible loss or range of loss in excess of the above-mentioned accrual.

Although the Company cannot predict the outcome of any action, it is possible that such outcome could have a material adverse effect on the Company's consolidated results of operations or cash flows for an individual reporting period. However, based on currently available information, management does not believe that any pending matter is likely to have a material adverse effect, individually or in the aggregate, on the Company's financial condition.

14. Income Tax

During the six months ended June 30, 2013, the Company increased its estimated amount of compensation expenses that are non-tax deductible under the Affordable Care Act. Due to this change in estimate, the Company recorded \$10,205 of income tax expense, which increased the consolidated effective tax rate by 245 basis points.

15. Catastrophe Bond Program

On April 27, 2010, certain of the Company's subsidiaries (the Subsidiaries) entered into two reinsurance agreements with Ibis Re Ltd., an independent special purpose reinsurance company domiciled in the Cayman Islands (Ibis Re), providing up to \$150,000 of reinsurance coverage for protection against losses over a three-year period from individual hurricane events in Hawaii and along the Gulf and Eastern Coasts of the United States. Ibis Re financed the property catastrophe reinsurance coverage by issuing catastrophe bonds in an aggregate amount of \$150,000 to unrelated investors (the Series 2010-1 Notes). The agreements expired in May 2013.

On January 30, 2012, the Subsidiaries entered into two reinsurance agreements with Ibis Re II Ltd. (Ibis Re II). Ibis Re II is an independent special purpose reinsurance company domiciled in the Cayman Islands. The Ibis Re II agreements provide up to \$130,000 of reinsurance

Edgar Filing: ASSURANT INC - Form 10-Q

coverage for protection against losses over a three-year period from individual hurricane events in Hawaii, Puerto Rico, and along the Gulf and Eastern Coasts of the United States. The agreements expire in February 2015. Ibis Re II financed the property catastrophe reinsurance coverage by issuing \$130,000 in catastrophe bonds to unrelated investors (the Series 2012-1 Notes).

On June 26, 2013, the Subsidiaries entered into three additional reinsurance agreements with Ibis Re II providing up to \$185,000 of reinsurance coverage for protection against losses over a three-year period from individual hurricane events in Hawaii, Puerto Rico, and along the Gulf and Eastern Coasts of the United States. The agreements expire in June 2016. Ibis Re II financed the property catastrophe reinsurance coverage by issuing \$185,000 in catastrophe bonds to unrelated investors (the Series 2013-1 Notes).

Table of Contents

Assurant, Inc.

Notes to Consolidated Financial Statements (unaudited)

Three and Six Months Ended June 30, 2013 and 2012

(In thousands, except number of shares and per share amounts)

The \$315,000 of coverage represents approximately 17% of the expected first event coverage (net of reimbursements of the Florida Hurricane Catastrophe Fund) purchased by the Company in excess of the Company's anticipated retention.

Under the terms of these reinsurance agreements, the Subsidiaries are obligated to pay annual reinsurance premiums to Ibis Re and Ibis Re II for the reinsurance coverage. The reinsurance agreements with Ibis Re and Ibis Re II utilize a dual trigger that is based upon an index that is created by applying predetermined percentages to insured industry losses in each state in the covered area as reported by an independent party and the Subsidiaries' covered losses incurred. Reinsurance contracts that have a separate, pre-identified variable (e.g., a loss-based index) are accounted for as reinsurance if certain conditions are met. In the case of the reinsurance agreements with Ibis Re and Ibis Re II, these conditions were met, thus the Company accounted for them as reinsurance in accordance with the guidance for reinsurance contracts.

Amounts payable to the Subsidiaries under the reinsurance agreements will be determined by the index-based losses, which are designed to approximate the Subsidiaries' actual losses from any covered event. The amount of actual losses and index losses from any covered event may differ. For each covered event, Ibis Re and Ibis Re II pay the Subsidiaries the lesser of the covered index-based losses or the Subsidiaries' actual losses. The principal amount of the catastrophe bonds will be reduced by any amounts paid to the Subsidiaries under the reinsurance agreements. The Subsidiaries have not incurred any losses subject to the reinsurance agreements since their inception.

As of June 30, 2013, the Company had not ceded any losses to Ibis Re or Ibis Re II.

As with any reinsurance agreement, there is credit risk associated with collecting amounts due from reinsurers. With regard to the Series 2012-1 Notes and Series 2013-1 Notes, the credit risk is mitigated by two or three reinsurance trust accounts for each Series, respectively. Each reinsurance trust account has been funded by Ibis Re II with money market funds that invest solely in direct government obligations backed by the U.S. government with maturities of no more than 13 months. The money market funds must have a principal stability rating of at least AAA by Standard & Poor's.

At the time the agreements were entered into with Ibis Re and Ibis Re II, the Company evaluated the applicability of the accounting guidance that addresses variable interest entities (VIEs). Entities which do not have sufficient equity at risk to allow the entity to finance its activities without additional financial support or in which the equity investors, as a group, do not have the characteristic of a controlling financial interest are referred to as VIEs. A VIE is consolidated by the variable interest holder that is determined to have the controlling financial interest (primary beneficiary) as a result of having both the power to direct the activities of a VIE that most significantly impact the VIE's economic performance and the obligation to absorb losses or right to receive benefits from the VIE that could potentially be significant to the VIE. The Company determines whether it is the primary beneficiary of an entity subject to consolidation based on a qualitative assessment of the VIE's capital structure, contractual terms, nature of the VIE's operations and purpose and the Company's relative exposure to the related risks of the VIE on the date it becomes initially involved in the VIE. The Company reassesses its VIE determination with respect to an entity on an ongoing basis.

As a result of the evaluation of the reinsurance agreements with Ibis Re and Ibis Re II, the Company concluded that Ibis Re and Ibis Re II are VIEs. However, while Ibis Re and Ibis Re II are VIEs, the Company concluded that it does not have a significant variable interest in Ibis Re or Ibis Re II as the variability in results, caused by the reinsurance agreements, is expected to be absorbed entirely by the bondholders and the Company is not entitled to any residual amounts. Accordingly, the Company is not the primary beneficiary of Ibis Re or Ibis Re II and does not consolidate the entities in the Company's financial statements.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

(Dollar amounts in thousands)

This Management's Discussion and Analysis of Financial Condition and Results of Operations (MD&A) addresses the financial condition of Assurant, Inc. and its subsidiaries (which we refer to collectively as Assurant or the Company) as of June 30, 2013, compared with December 31, 2012, and our results of operations for the three and six months ended June 30, 2013 and 2012. This discussion should be read in conjunction with our MD&A and annual audited consolidated financial statements as of December 31, 2012 included in our Annual Report on Form 10-K for the year ended December 31, 2012 filed with the U.S. Securities and Exchange Commission (the SEC) and the June 30, 2013 unaudited consolidated financial statements and related notes included elsewhere in this Form 10-Q. The 2012 Annual Report on Form 10-K, Second Quarter 2013 Form 10-Q, and other documents related to the Company are available free of charge through the SEC website at www.sec.gov and through our website at www.assurant.com.

Some of the statements in this MD&A and elsewhere in this report, particularly those anticipating future financial performance, business prospects, growth and operating strategies and similar matters, are forward-looking statements within the meaning of the U.S. Private Securities Litigation Reform Act of 1995. You can identify these statements by the fact that they may use words such as will, may, anticipates, expects, estimates, projects, intends, plans, believes, targets, forecasts, potential, approximately, or the negative version of those words and terms with a similar meaning. Any forward-looking statements contained in this report are based upon our historical performance and on current plans, estimates and expectations. The inclusion of this forward-looking information should not be regarded as a representation by us or any other person that the future plans, estimates or expectations contemplated by us will be achieved. Our actual results might differ materially from those projected in the forward-looking statements. The Company undertakes no obligation to update or review any forward-looking statement, whether as a result of new information, future events or other developments.

In addition to the factors described under Critical Factors Affecting Results, the following risk factors could cause our actual results to differ materially from those currently estimated by management:

- (i) actions by governmental agencies or government sponsored entities or other circumstances, including pending regulatory matters affecting our lender-placed insurance business, that could result in reductions of the premium rates we charge, increases in the claims we pay, fines or penalties, or other expenses;
- (ii) the effects of the Patient Protection and Affordable Care Act and the Health Care and Education Reconciliation Act of 2010, and the rules and regulations thereunder (together the Affordable Care Act), on our health and employee benefits businesses;
- (iii) loss of significant client relationships, distribution sources and contracts;
- (iv) unfavorable outcomes in litigation and/or regulatory investigations that could negatively affect our business and reputation;
- (v) current or new laws and regulations that could increase our costs and decrease our revenues;
- (vi) losses due to natural and man-made catastrophes;
- (vii) a decline in our credit or financial strength ratings (including the risk of ratings downgrades in the insurance industry);
- (viii) deterioration in the Company's market capitalization compared to its book value that could result in further impairment of goodwill;

Edgar Filing: ASSURANT INC - Form 10-Q

- (ix) risks related to outsourcing activities;
- (x) failure to attract and retain sales representatives or key managers;
- (xi) general global economic, financial market and political conditions (including difficult conditions in financial, capital credit and currency markets, the global economic slowdown, fluctuations in interest rates or a prolonged period of low interest rates, monetary policies, unemployment and inflationary pressure);
- (xii) inadequacy of reserves established for future claims;
- (xiii) failure to predict or manage benefits, claims and other costs;
- (xiv) uncertain tax positions and unexpected tax liabilities;
- (xv) fluctuations in exchange rates and other risks related to our international operations;
- (xvi) unavailability, inadequacy and unaffordable pricing of reinsurance coverage;
- (xvii) significant competitive pressures in our business;
- (xviii) diminished value of invested assets in our investment portfolio (due to, among other things, volatility in financial markets; the global economic slowdown; credit, currency and liquidity risk; other than temporary impairments and increases in interest rates);
- (xix) insolvency of third parties to whom we have sold or may sell businesses through reinsurance or modified co-insurance;
- (xx) inability of reinsurers to meet their obligations;
- (xxi) credit risk of some of our agents in Assurant Specialty Property and Assurant Solutions;
- (xxii) cyber security threats and cyber attacks
- (xxiii) failure to effectively maintain and modernize our information systems;

Table of Contents

- (xxiv) data breaches compromising client information and privacy;

- (xxv) failure to find and integrate suitable acquisitions and new ventures;

- (xxvi) inability of our subsidiaries to pay sufficient dividends;

- (xxvii) failure to provide for succession of senior management and key executives; and

- (xxviii) cyclical nature of the insurance industry.

For a more detailed discussion of the risk factors that could affect our actual results, please refer to Item 1A Risk Factors and Item 7 MD&A Critical Factors Affecting Results in our 2012 Annual Report on Form 10-K and First Quarter 2013 Form 10-Q.

Executive Summary

Assurant has five reportable segments. Our four operating segments are Assurant Solutions, Assurant Specialty Property, Assurant Health, and Assurant Employee Benefits. These operating segments partner with clients who are leaders in their industries in the United States of America (the U.S.) and select worldwide markets. The operating segments provide warranties and service contracts, pre-funded funeral insurance, debt protection administration, credit-related insurance, lender-placed homeowners insurance, renters insurance and related products, manufactured housing homeowners insurance, individual health and small employer group health insurance, group dental insurance, group disability insurance and reinsurance, group life insurance, group vision and supplemental insurance.

Our fifth segment, Corporate & Other, includes activities of the holding company, financing and interest expenses, net realized gains and losses on investments, interest income earned from short-term investments held and additional costs associated with excess of loss reinsurance programs reinsured and ceded to certain subsidiaries in the London market between 1995 and 1997. Corporate & Other also includes the amortization of deferred gains associated with the sales of Fortis Financial Group and Long-Term Care through reinsurance agreements.

The following discussion relates to the three and six months ended June 30, 2013 (Second Quarter 2013 and Six Months 2013) and the three and six months ended June 30, 2012 (Second Quarter 2012 and Six Months 2012).

Consolidated net income decreased \$35,647, or 21%, to \$133,523 in Second Quarter 2013, compared with \$169,170 for Second Quarter 2012. For Six Months 2013, consolidated net income decreased \$81,127, or 24%, to \$251,303, compared with \$332,430 for Six Months 2012.

Assurant Solutions net income decreased to \$31,391 for Second Quarter 2013 from \$40,363 for Second Quarter 2012. In our preneed business, results declined primarily due to lower investment yields and expenses increased as a result of higher amortization of selling expenses due to growth. In addition, Second Quarter 2013 results reflect a \$2,741 (after-tax) charge for a reduction in force in Europe and the previously disclosed loss of a mobile client. Second Quarter 2012 results benefitted from \$3,762 (after-tax) in client related settlements.

Net earned premiums and fees at Assurant Solutions increased to \$774,565, or 7% for Second Quarter 2013 compared with \$721,684 for Second Quarter 2012. Growth in domestic net earned premiums reflects promotional activity at an existing service contract client as well as increased vehicle service contract business. International net earned premiums increased primarily due to expansion in Brazil and Mexico.

We continue to expand our mobile business and recently announced that Assurant Solutions has added new programs with two large domestic mobile carriers. We expect the business from these programs to more than offset the previously disclosed loss of a mobile client.

The international combined ratio declined 250 basis points, excluding \$5,700 of favorable client related settlements in Second Quarter 2012 and the \$3,560 restructuring charge in Europe in Second Quarter 2013. Growth in Latin America and previous expense management actions contributed to the improvement. We expect these factors to continue to drive improvement in the international combined ratio through 2013. Our domestic combined ratio for Second Quarter 2013 decreased slightly to 97.6% from 97.9% in Second Quarter 2012, and remains below our long-term target of 98.0% due to expense savings actions taken in 2012.

Edgar Filing: ASSURANT INC - Form 10-Q

Overall, we expect modest premium growth at Assurant Solutions in 2013, reflecting increased sales in domestic and international service contracts. We also plan to continue our expense management efforts.

Table of Contents

Assurant Specialty Property net income increased \$14,198 to \$106,520 for Second Quarter 2013 from \$92,322 for Second Quarter 2012. The increase was primarily driven by revenue growth from lender-placed loan portfolios added during the past year and the continued expansion of our multi-family housing business. For Six Months 2013 we added 2.6 million loans and expect to add another 1.0 million loans during third quarter 2013. These additional 1.0 million loans will begin to produce net earned premiums later in the year. Our placement rate on lender-placed loans tracked was 2.81% for the Second Quarter 2013 compared with 2.83% in Second Quarter 2012. We continue to expect that placement rates will fluctuate in the near term, reflecting the composition of newly added loan portfolios, but will decline over the longer term.

On April 1, 2013, as a result of the discontinuation of a client quota share arrangement, we began retaining premiums and underwriting risk from a previously reinsured client. Premiums written prior to this date, and the associated claims, will continue to be ceded proportionately as they run off over the next year.

In 2012, we began a multi-phased roll-out of our new next generation lender-placed insurance product to respond to the changed environment following the housing downturn. This product is now available in 28 states and we expect it to be available in 10 more approved states by the end of the third quarter. We also filed new product forms and rates in Florida and New York, which are currently undergoing review.

As previously disclosed, we continue to engage in discussions with various state regulatory and federal departments regarding our lender-placed insurance program. During Six Months 2013 we reached a settlement with the New York Department of Financial Services (NYDFS) regarding our lender-placed insurance program in that state. Please refer to Assurant Specialty Property's results of operations section further below in this Item 2 for details on this settlement.

Overall, we expect Assurant Specialty Property's revenues to increase compared to 2012 due to higher volume in lender-placed loan portfolios, the discontinuation of the above-mentioned client reinsurance agreement and growth in multi-family housing products. We expect overall results to continue to be affected by changes in placement rates, loan portfolio activity, premium rates and catastrophe losses. We expect our expense ratio, excluding the effect of the NYDFS settlement, to increase in 2013, primarily reflecting increased costs to support new loan portfolio growth and customer service enhancements. We also expect our non-catastrophe loss ratio to increase due to anticipated higher frequency of such losses compared to 2012.

Assurant Health's net income decreased to \$4,083 for Second Quarter 2013 from \$28,932 for Second Quarter 2012. The decrease was primarily due to the absence of \$13,856 (after-tax) of net investment income from real estate joint venture partnerships that was included in Second Quarter 2012 results, and a higher effective income tax rate due to limitations on the deductibility of compensation.

Assurant Health's loss ratio increased to 75.2% for Second Quarter 2013 from 73.0% for Second Quarter 2012, reflecting less favorable loss experience compared with prior period and pricing changes in response to the minimum medical loss ratio on our major medical business.

We expect ongoing changes related to healthcare reform to continue to affect Assurant Health over the rest of 2013. We expect net earned premiums to decline compared with 2012 but overall insured lives to increase as consumers look for affordable health care alternatives. In addition, we will continue our expense management efforts. We continue to anticipate our effective tax rate will be elevated due to higher non-deductible compensation expenses.

At Assurant Employee Benefits, net income declined to \$11,474 for Second Quarter 2013 from \$18,621 for Second Quarter 2012. This decline was primarily due to less favorable disability results, reflecting lower recoveries in Second Quarter 2013, and the previously disclosed reduction in the discount rate for new disability claim reserves.

Net earned premiums increased slightly for Second Quarter 2013 compared with Second Quarter 2012, driven by higher dental sales. Assurant Employee Benefit continues to emphasize enrollment and administrative services for voluntary benefit plans.

Overall, for 2013, we expect net earned premiums and fees to be consistent with 2012 due to continued growth in voluntary products.

Critical Factors Affecting Results and Liquidity

Our results depend on the appropriateness of our product pricing, underwriting and the accuracy of our methodology for the establishment of reserves for future policyholder benefits and claims, returns on and values of invested assets and our ability to manage our expenses. Factors affecting these items, including unemployment, difficult conditions in financial markets and the global

Table of Contents

economy, may have a material adverse effect on our results of operations or financial condition. For more information on these factors, see Item 1A Risk Factors and Item 7 MD&A Critical Factors Affecting Results in our 2012 Annual Report on Form 10-K.

Management believes the Company will have sufficient liquidity to satisfy its needs over the next twelve months including the ability to pay interest on our debt and dividends on our common stock.

For the six months ended June 30, 2013, net cash provided by operating activities, including the effect of exchange rate changes on cash and cash equivalents, totaled \$261,096; net cash used in investing activities totaled \$(343,602) and net cash provided by financing activities totaled \$443,497. We had \$1,270,395 in cash and cash equivalents as of June 30, 2013. Please see Liquidity and Capital Resources, below for further details.

Critical Accounting Policies and Estimates

Our 2012 Annual Report on Form 10-K described the accounting policies and estimates that are critical to the understanding of our results of operations, financial condition and liquidity. The accounting policies and estimation process described in the 2012 Annual Report on Form 10-K were consistently applied to the unaudited interim consolidated financial statements for Second Quarter 2013.

The Assurant Health loss ratio reported on page 55 (the GAAP loss ratio) differs from the loss ratio calculated under the minimum medical loss ratio (MLR). The most significant differences include the fact that the MLR is calculated separately by state and legal entity; the MLR calculation includes credibility adjustments for each entity, which are not applicable to the GAAP loss ratio; the MLR calculation applies only to some of our health insurance products, while the GAAP loss ratio applies to the entire portfolio, including products not governed by the Affordable Care Act; the MLR includes quality improvement expenses, taxes and fees; changes in reserves are treated differently in the MLR calculation; and the MLR premium rebate amounts are considered adjustments to premiums for GAAP reporting whereas they are reported as additions to incurred claims in the MLR rebate estimate calculations.

Assurant Health has estimated its Second Quarter 2013 impact of this regulation based on definitions and calculation methodologies outlined in the Interim Final Regulation from HHS released December 1, 2010 with Technical Corrections released December 29, 2010 and the HHS Final Regulation released December 7, 2011. An estimate was based on separate projection models for individual medical and small group business using projections of expected premiums, claims, and enrollment by state, legal entity and market for medical business subject to MLR requirements for the MLR reporting year. In addition, the projection models include quality improvement expenses, state assessments and taxes.

(1) Includes amortization of deferred acquisition costs (DAC) and value of business acquired (VOBA).

The following discussion provides a general overall analysis of how the consolidated results were affected by our four operating segments and our Corporate and Other segment for Second Quarter 2013 and Six Months 2013, and Second Quarter 2012 and Six Months 2012. Please see the discussion that follows, for each of these segments, for a more detailed analysis of the fluctuations.

For the Three Months Ended June 30, 2013 Compared to the Three Months Ended June 30, 2012*Net Income*

The Company reported net income of \$133,523 in Second Quarter 2013, a decrease of \$35,647, or 21%, compared with \$169,170 of net income for Second Quarter 2012. The decrease was primarily due to a \$23,004 (after-tax) decline in net investment income, including \$17,529 (after-tax) of additional investment income from real estate joint venture partnerships in Second Quarter 2012 compared with Second Quarter 2013. In addition, results in our Assurant Solutions, Assurant Health and Assurant Employee Benefits segments declined, partially offset by improved results in our Assurant Specialty Property segment.

For the Six Months Ended June 30, 2013 Compared to the Six Months Ended June 30, 2012*Net Income*

Edgar Filing: ASSURANT INC - Form 10-Q

The Company reported net income of \$251,303 for Six Months 2013, a decrease of \$81,127, or 24%, compared with \$332,430 of net income for Six Months 2012. The decrease was primarily due to a \$27,105 (after-tax) decline in net investment income, including \$16,024 (after-tax) of additional investment income from real estate joint venture partnerships in Six Months 2012 compared with Six Months 2013. In addition, Six Months 2013 includes a \$14,000 (non tax-deductible) settlement with the New

Table of Contents

York Department of Financial Services (NYDFS) and a \$9,351 (after-tax) increase in reportable catastrophe losses in our Assurant Specialty Property segment. For additional detail on the NYDFS settlement, please refer to Assurant Specialty Property s results of operations section further below in this Item 2. Also contributing to the decline was a \$10,205 tax liability increase due to a change in estimated non-deductible compensation expenses related to the Affordable Care Act.

Table of Contents

- (1) This includes emerging products and run-off product lines.
- (2) Gross written premiums does not necessarily translate to an equal amount of subsequent net earned premiums since Assurant Solutions reinsures a portion of its premiums to insurance subsidiaries of its clients.
- (3) The combined ratio is equal to total benefits, losses and expenses divided by net earned premiums and fees and other income excluding the preneed business.

For the Three Months Ended June 30, 2013 Compared to the Three Months Ended June 30, 2012

Net Income

Segment net income decreased \$8,972, or 22%, to \$31,391 for Second Quarter 2013 from \$40,363 for Second Quarter 2012, primarily due to lower investment yields and higher selling expenses associated with growth in our preneed business as well as the previously disclosed loss of a mobile client. Results also include restructuring charges of \$2,741 (after-tax) in Europe. Second Quarter 2012 included \$3,762 (after-tax) of favorable client related settlements.

Total Revenues

Total revenues increased \$46,977, or 6%, to \$868,993 for Second Quarter 2013 from \$822,016 for Second Quarter 2012. The increase was mainly the result of higher net earned premiums of \$36,362, primarily in our international and domestic service contract businesses. International service contract net earned premiums increased primarily due to expansion in Latin America including mobile; this increase was partially offset by the unfavorable impact of changes in foreign exchange rates. Domestic net earned premiums increased mostly due to growth from an existing service contract client and in vehicle service contracts. Fees and other income increased \$16,519, mostly driven by growth in our domestic wireless business, and increased sales in our preneed business. In addition Second Quarter 2012 included \$5,700 of Latin American client-related settlements.

Gross written premiums increased \$67,026, or 7%, to \$1,083,613 for Second Quarter 2013 from \$1,016,587 for Second Quarter 2012. Gross written premiums from our domestic service contract business increased \$49,878 from both new and existing automotive and retail clients. Second Quarter 2012 included a one-time benefit of \$33,200 related to a correction of a client reporting error, which had no impact on net income due to the recording of an offsetting deferred commission amount. Our international service contract business increased \$27,520 primarily due to growth in Latin America from new and existing clients. This increase was partially offset by the unfavorable impact of changes in foreign exchange rates.

Table of Contents

Preneed face sales increased \$22,926 or 10%, to \$256,913 for Second Quarter 2013 from \$233,987 for Second Quarter 2012. This increase was mostly attributable to growth from our exclusive distribution partnership with Service Corporation International (SCI), the largest funeral provider in North America. This exclusive distribution partnership is effective through September 29, 2014.

Total Benefits, Losses and Expenses

Total benefits, losses and expenses increased \$57,429, or 8%, to \$818,661 for Second Quarter 2013 from \$761,232 for Second Quarter 2012. Policyholder benefits remained relatively consistent while selling, underwriting and general expenses increased \$57,904. Commissions, taxes, licenses and fees, of which amortization of DAC is a component, increased \$55,587 due to earnings in our domestic service contract and international businesses. General expenses increased \$2,317 primarily due to higher restructuring charges in Europe, higher costs to support growth in Latin America and increased expenses related to a new domestic wireless program. These items were partially offset by expense savings in our domestic credit, domestic service contract, and European businesses.

*For the Six Months Ended June 30, 2013 Compared to the Six Months Ended June 30, 2012**Net Income*

Segment net income decreased \$17,465, or 21%, to \$66,298 for Six Months 2013 from \$83,763 for Six Months 2012. The decrease was primarily due to the previously disclosed loss of a mobile client effective October 1, 2012 and reduced results in our preneed business due to lower investment yields, higher mortality experience and higher selling expenses associated with growth. Results also include restructuring charges of \$2,741 (after-tax) in Europe, and higher expenses associated with business growth, primarily in Latin America. Six Months 2012 included favorable client-related settlements of \$3,762 (after-tax) and a one-time premium tax liability release of \$2,405 (after-tax) in Canada.

Total Revenues

Total revenues increased \$112,119, or 7%, to \$1,732,834 for Six Months 2013 from \$1,620,715 for Six Months 2012. The increase was mainly the result of higher net earned premiums of \$98,914, primarily in our international and domestic service contract businesses. International service contract net earned premiums increased due to growth in Latin America, partially offset by the unfavorable impact of changes in foreign exchange rates. Domestic service contract net earned premiums increased mostly from an existing service contract client as well as additional vehicle service contract clients, partially offset by a previously disclosed loss of a mobile client. Fees and other income increased \$23,191, mostly driven by a new program in our domestic wireless business, and increased sales in our preneed business. In addition, Six Months 2012 included \$5,700 of Latin American client-related settlements.

Gross written premiums increased \$127,572, or 7%, to \$2,072,270 for Six Months 2013 from \$1,944,698 for Six Months 2012. Gross written premiums from our domestic service contract business increased \$98,506 primarily from both new and existing automotive and retail clients. Six Months 2012 included a one-time benefit of \$33,200 related to a correction of a client reporting error, which had no impact on net income due to the recording of an offsetting deferred commission amount. Our international service contract business increased \$42,589 primarily due to growth from new and existing clients in Latin America and Europe, partially offset by the unfavorable impact of changes in foreign exchange rates.

Preneed face sales increased \$40,241, to \$486,391 for Six Months 2013 from \$446,150 for Six Months 2012. This increase was mostly attributable to growth from our exclusive distribution partnership with SCI.

Total Benefits, Losses and Expenses

Total benefits, losses and expenses increased \$135,791, or 9%, to \$1,630,008 for Six Months 2013 from \$1,494,217 for Six Months 2012. Policyholder benefits increased \$1,454 primarily due to higher mortality experience in our preneed business, partially offset by decreases in certain domestic lines of business that are in run-off. Selling, underwriting and general expenses increased \$134,337. Commissions, taxes, licenses and fees, of which amortization of DAC is a component, increased \$140,997 due to higher earnings in our international and domestic service contract businesses. General expenses decreased \$6,660 due to expense savings in our domestic credit and service contract businesses, as well as in Europe, as a result of a 2012 restructuring. These items were partially offset by restructuring charges in Europe, increased expenses related to a new domestic wireless program and the recognition of a one-time premium tax liability release in Canada of \$3,700 in Six Months 2012.

- (1) This primarily includes lender-placed flood, miscellaneous specialty property and multi-family housing insurance products.
- (2) The loss ratio is equal to policyholder benefits divided by net earned premiums.
- (3) The expense ratio is equal to selling, underwriting and general expenses divided by net earned premiums and fees and other income.
- (4) The combined ratio is equal to total benefits, losses and expenses divided by net earned premiums and fees and other income.

Regulatory Matters

On March 21, 2013, the Company and two of its wholly owned subsidiaries, American Security Insurance Company (ASIC) and American Bankers Insurance Company of Florida (ABIC), reached an agreement with the NYDFS regarding the Company's lender-placed insurance business in the State of New York. Under the terms of the agreement, and without admitting or denying any wrongdoing, ASIC made a \$14,000 settlement payment to the NYDFS. In addition, among other things, ASIC and ABIC agreed to modify certain business practices in accordance with requirements that apply to all New York-licensed lender-placed insurers of properties in the state, and filed our new lender-placed program and new rates in New York.

Edgar Filing: ASSURANT INC - Form 10-Q

Assurant Specialty Property's business strategy has been to pursue long-term growth in lender-placed homeowners insurance and adjacent markets with similar characteristics, such as lender-placed flood insurance and lender-placed mobile home insurance. Lender-placed insurance products accounted for approximately 72% and 71% of Assurant Specialty Property's net earned premiums for Six Months 2013 and full year 2012, respectively. The approximate corresponding contributions to segment net income in these periods were 86% and 90%, respectively. The portion of total segment net income attributable to lender-placed products may vary substantially over time depending on the frequency, severity and location of catastrophic losses, the cost of catastrophe reinsurance and reinstatement coverage, the variability of claim processing costs and client acquisition costs, and other factors. In addition, we expect placement rates for these products to decline.

Table of Contents

For the Three Months Ended June 30, 2013 Compared to the Three Months Ended June 30, 2012

Net Income

Segment net income increased \$14,198, or 15%, to \$106,520 for Second Quarter 2013 from \$92,322 for Second Quarter 2012. The increase is primarily due to an increase in lender-placed homeowners net earned premiums attributable to loan portfolios that were added during the past twelve months and growth in our multi-family housing business. Partially offsetting these items is an increase in general expenses to support the growth in the homeowners business.

Total Revenues

Total revenues increased \$93,967, or 17%, to \$637,131 for Second Quarter 2013 from \$543,164 for Second Quarter 2012, driven primarily by growth in lender-placed homeowners net earned premiums mainly due to loan portfolio growth and increased revenues from our multi-family housing business.

Total Benefits, Losses and Expenses

Total benefits, losses and expenses increased \$75,657 or 19%, to \$478,504 for Second Quarter 2013 from \$402,847 for Second Quarter 2012. The loss ratio decreased 60 basis points primarily due to lower reportable catastrophe losses of \$14,098 in Second Quarter 2013 compared to reportable catastrophe losses of \$15,117 in Second Quarter 2012. Reportable catastrophe losses include only individual catastrophic events that generated losses to the Company in excess of \$5,000, pre-tax and net of reinsurance. The expense ratio increased by 50 basis points in Second Quarter 2013 primarily due to an increase in operating costs to support loan portfolio growth.

For the Six Months Ended June 30, 2013 Compared to the Six Months Ended June 30, 2012

Net Income

Segment net income decreased \$4,562, or 2%, to \$200,764 for Six Months 2013 from \$205,326 for six months 2012. The decrease is primarily due to a \$14,000 (non tax-deductible) settlement with the NYDFS, and an increase in operating expenses to support loan portfolio growth. Reportable catastrophe losses also increased \$9,351 (after-tax). Partially offsetting these items is increased lender-placed homeowners net earned premiums primarily due to loan portfolios added during the past twelve months.

Total Revenues

Total revenues increased \$142,675, or 13%, to \$1,218,879 for Six Months 2013 from \$1,076,204 for Six Months 2012, driven primarily by growth in lender-placed homeowners net earned premiums, mainly due to loan portfolio growth and increased revenues from our multifamily housing business.

Total Benefits, Losses and Expenses

Total benefits, losses and expenses increased \$144,937 or 19%, to \$910,506 for Six Months 2013 from \$765,569 for Six Months 2012. The loss ratio increased 130 basis points with a 110 basis point increase due to higher reportable catastrophe losses of \$29,503 in Six Months 2013 compared to \$15,117 of reportable catastrophe losses in Six Months 2012. Reportable catastrophe losses include only individual catastrophic events that generated losses to the Company in excess of \$5,000, pre-tax and net of reinsurance. The expense ratio increased 190 basis points in Six Months 2013 primarily due to regulatory expenses including a \$14,000 (non tax-deductible) settlement with the NYDFS and an increase in operating costs to support business growth.

(3) The combined ratio is equal to total benefits, losses and expenses divided by net earned premiums and fees and other income.

The Affordable Care Act

Some provisions of the Affordable Care Act have taken effect already, and other provisions will become effective at various dates before the end of 2014. Given the sweeping nature of the changes represented by the Affordable Care Act, our results of operations and financial position could

Edgar Filing: ASSURANT INC - Form 10-Q

be materially adversely affected. For more information, see Item 1A, Risk Factors - Risk related to our industry - Reform of the health care industry could make our health insurance business unprofitable in our 2012 Annual Report on Form 10-K.

Table of Contents

For the Three Months Ended June 30, 2013 Compared to the Three Months Ended June 30, 2012

Net Income

Segment net income decreased \$24,849, or 86%, to \$4,083 for Second Quarter 2013 from \$28,932 for Second Quarter 2012. The decrease was primarily attributable to the absence of \$13,584 (after-tax) of net investment income from real estate joint venture partnerships that was included in 2012 results, and a higher effective income tax rate due to limitations on the deductibility of compensation related to the Affordable Care Act.

Total Revenues

Total revenues decreased \$30,652, or 7%, to \$412,267 for Second Quarter 2013 from \$442,919 for Second Quarter 2012. Net earned premiums from our individual markets business decreased \$2,268, or 1%, due to a decline in individual major medical policies, partially offset by increased sales of lower priced supplemental and affordable choice products and premium rate increases. Net earned premiums from our small employer group business decreased \$5,195, or 5%, due to fewer small group insured lives, partially offset by premium rate increases. Net investment income decreased \$22,932, primarily due to less investment income from real estate joint venture partnerships. Second Quarter 2012 included \$21,317 of investment income from real estate joint venture partnerships, while Second Quarter 2013 had \$418.

Total Benefits, Losses and Expenses

Total benefits, losses and expenses increased \$3,687, or 1%, to \$399,874 for Second Quarter 2013 from \$396,187 for Second Quarter 2012. Policyholder benefits increased \$3,245, or 1%, and the benefit loss ratio increased to 75.2% from 73.0%. The increase in policyholder benefits was primarily attributable to less favorable loss experience, partially offset by a decline in business volume. The increase in the benefit loss ratio is due to less favorable loss experience and pricing changes in response to the medical minimum loss ratio related to our major medical business. Selling, underwriting and general expenses stayed relatively consistent.

For the Six Months Ended June 30, 2013 Compared to the Six Months Ended June 30, 2012

Net (Loss) Income

Segment results decreased \$41,807 to a net loss of \$1,260 for Six Months 2013 from net income of \$40,547 for Six Months 2012. The decrease was primarily attributable to less favorable loss experience and a \$10,205 tax liability increase in connection with the Affordable Care Act due to a change in estimated non-deductible compensation expenses. In addition, Six Months 2012 results included \$13,359 (after-tax) more investment income from real estate joint venture partnerships than Six Months 2013.

Total Revenues

Total revenues decreased \$62,376, or 7%, to \$806,899 for Six Months 2013 from \$869,275 for Six Months 2012. Net earned premiums from our individual markets business decreased \$21,815, or 4%, due to a decline in individual major medical policies, partially offset by increased sales of lower priced supplemental and affordable choice products and premium rate increases. Net earned premiums from our small employer group business decreased \$13,912, or 7%, due to fewer small group insured lives, partially offset by premium rate increases. Net investment income decreased \$24,713, primarily due to less investment income from real estate joint venture partnerships.

Total Benefits, Losses and Expenses

Total benefits, losses and expenses decreased \$22,984, or 3%, to \$780,038 for Six Months 2013 from \$803,022 for Six Months 2012. Policyholder benefits decreased \$23,744, or 4%, while the benefit loss ratio increased to 73.9% from 73.6%. The decrease in policyholder benefits was primarily attributable to a decline in business volume, partially offset by higher loss experience. The slight increase in the benefit loss ratio was due to less favorable loss experience on individual major medical policies. Selling, underwriting and general expenses stayed relatively consistent.

(2) The expense ratio is equal to selling, underwriting and general expenses divided by net earned premiums and fees and other income.

Table of Contents

For the Three Months Ended June 30, 2013 Compared to the Three Months Ended June 30, 2012

Net Income

Segment net income decreased 38% to \$11,474 for Second Quarter 2013 from \$18,621 for Second Quarter 2012. The decline was primarily attributable to less favorable disability loss experience partially offset by favorable dental and life loss experience. Second Quarter 2013 results were also affected by lower net investment income compared to Second Quarter 2012. Additionally, Second Quarter 2013 results include a previously disclosed decrease in the new long-term disability claims reserve discount rate.

Total Revenues

Total revenues decreased 1% to \$289,407 for Second Quarter 2013 from \$293,418 for Second Quarter 2012. Second Quarter 2013 net earned premiums increased \$1,508 or 1%. The increase in net earned premiums was primarily driven by growth in life and supplemental products partially offset by lower premiums from dental products. Net investment income decreased 11% or \$3,892 driven by lower average invested assets as well as \$2,393 less investment income from real estate joint venture partnerships in Second Quarter 2013 compared to Second Quarter 2012.

Total Benefits, Losses and Expenses

Total benefits, losses and expenses increased 3% to \$272,035 for Second Quarter 2013 from \$265,205 for Second Quarter 2012. The loss ratio increased to 68.8% from 66.7% primarily driven by unfavorable disability results partially offset by favorable dental and life loss experience. Disability results include a previously disclosed decrease in the reserve discount rate for new long-term disability claims. The expense ratio remained relatively flat compared to Second Quarter 2012.

For the Six Months Ended June 30, 2013 Compared to the Six Months Ended June 30, 2012

Net Income

Segment net income decreased 37% to \$17,557 for Six Months 2013 from \$27,685 for Six Months 2012. Results for Six Months 2013 were driven by unfavorable disability and life loss experience partially offset by favorable dental loss experience. Six Months 2013 results include a decrease in the reserve discount rate for new long-term disability claims. Additionally, Six Months 2013 results were also affected by lower net investment income compared to Six Months 2012.

Total Revenues

Total revenues decreased 2% to \$577,114 for Six Months 2013 from \$590,799 for Six Months 2012. Six Months 2013 net earned premiums decreased \$4,992 or 1%. The decrease in net earned premiums was driven primarily by the previously disclosed loss of two assumed disability clients. Net investment income decreased 9% or \$5,687 driven by lower average invested assets as well as \$1,930 less investment income from real estate joint venture partnerships in Six Months 2013 compared to Six Months 2012.

Total Benefits, Losses and Expenses

Total benefits, losses and expenses increased less than 1% to \$550,553 for Six Months 2013 from \$548,910 for Six Months 2012. The loss ratio increased to 70.8% from 69.8% primarily driven by unfavorable disability and life loss experience partially offset by favorable dental loss experience. Expenses remained relatively flat.

Table of Contents**Assurant Corporate & Other**

The table below presents information regarding the Corporate & Other segment's results of operations:

	For the Three Months Ended June 30,		For the Six Months Ended June 30,

Segment net loss	\$ (19,945)	\$ (11,068)	\$ (32,056)	\$ (24,891)

For the Three Months Ended June 30, 2013 Compared to the Three Months Ended June 30, 2012*Net Loss*

Segment net loss increased \$8,877 to a net loss of \$19,945 for Second Quarter 2013 compared with net loss of \$11,068 for Second Quarter 2012. The increase is primarily related to increased employee benefit related expenses and additional investments in areas targeted for growth. In addition, interest expense increased \$4,190 (after-tax) due to the issuance of senior notes with an aggregate principal amount of \$700,000 on March 28, 2013.

Total Revenues

Total revenues increased \$2,195 to \$29,968 for Second Quarter 2013 compared with \$27,773 for Second Quarter 2012. The increase in revenues is primarily due to increased net realized gains on investments.

Total Benefits, Losses and Expenses

Total expenses increased \$18,767 to \$57,925 for Second Quarter 2013 compared with \$39,158 for Second Quarter 2012. The increase in expenses is primarily due to increased employee benefit related expenses, additional investments in areas targeted for growth and increased interest expense related to the March 28, 2013 debt issuance mentioned above.

Table of Contents

For the Six Months Ended June 30, 2013 Compared to the Six Months Ended June 30, 2012

Net Loss

Segment net loss increased \$7,165, to a net loss of \$32,056 for Six Months 2013 compared with a net loss of \$24,891 for Six Months 2012. The increase is primarily related to increased employee benefit related expenses and additional investments in areas targeted from growth. In addition, interest expense increased \$4,190 (after-tax) due to the issuance of two series of senior notes with an aggregate principal amount of \$700,000 on March 28, 2013. These items were partially offset by a \$5,314 (after-tax) increase in net realized gains on investments.

Total Revenues

Total revenues increased \$7,442, to \$52,663 for Six Months 2013 compared with \$45,221 for Six Months 2012. The increase in revenues is mainly due to increased net realized gains on investments.

Total Benefits, Losses and Expenses

Total expenses increased \$23,906, to \$100,093 in Six Months 2013 compared with \$76,187 in Six Months 2012. The increase in expenses is mainly due to increased employee benefit related expenses, additional investments in areas targeted for growth and increased interest expense related to the March 28, 2013 debt issuance mentioned above.

Table of Contents**Investments**

The Company had total investments of \$14,648,169 and \$14,976,318 as of June 30, 2013 and December 31, 2012, respectively. For more information on our investments see Note 4 to the Notes to Consolidated Financial Statements included elsewhere in this report.

The following table shows the credit quality of our fixed maturity securities portfolio as of the dates indicated:

Fixed Maturity Securities by Credit Quality (Fair Value)	As of			
	June 30, 2013		December 31, 2012	
Aaa / Aa / A	\$ 7,368,870	64.5%	\$ 7,704,911	63.2%
Baa	3,335,151	29.2%	3,730,850	30.7%

B and lower	242,588	2.1%	263,104	2.2%
Total	\$ 11,423,221	100.0%	\$ 12,171,638	100.0%

Major categories of net investment income were as follows:

	Three Months Ended June 30,		Six Months Ended June 30,	
	2013	2012	2013	2012
Fixed maturity securities	\$ 133,295	\$ 139,396	\$ 267,623	\$ 280,578
Equity securities	6,856	6,148	13,743	12,020
Commercial mortgage loans on real estate	19,463	19,567	38,800	39,230
Policy loans	739	677	1,732	1,475
Short-term investments	649	1,184	1,090	2,561
Other investments	5,512	34,499	11,611	39,573
Cash and cash equivalents	2,992	3,516	6,908	7,417
Total investment income	169,506	204,987	341,507	382,854
Investment expenses	(5,582)	(5,673)	(11,598)	(11,245)
Net investment income	\$ 163,924	\$ 199,314	\$ 329,909	\$ 371,609

Net investment income decreased \$35,390, or 17.8%, to \$163,924 for Second Quarter 2013 compared with \$199,314 for Second Quarter 2012. Net investment income decreased \$41,700, or 11.2%, to \$329,909 for Six Months 2013 compared with \$371,609 for Six Months 2012. The decrease for both periods was primarily related to \$26,967 and \$24,653 in additional investment income from real estate joint venture partnerships in Second Quarter 2012 and Six Months 2012, respectively, compared to Second Quarter 2013 and Six Months 2013. Also contributing to the decrease for both periods were lower investment yields.

As of June 30, 2013, the Company owned \$221,841 of securities guaranteed by financial guarantee insurance companies. Included in this amount was \$204,472 of municipal securities, with a credit rating of A+ both with and without the guarantee.

The Company has exposure to sub-prime and related mortgages within our fixed maturity securities portfolio. At June 30, 2013, approximately 3.3% of our residential mortgage-backed holdings had exposure to sub-prime mortgage collateral. This represented approximately 0.2% of the total fixed income portfolio and 1.7% of the total unrealized gain position. Of the securities with sub-prime exposure, approximately 14.1% are rated as investment grade. All residential mortgage-backed securities, including those with sub-prime exposure, are reviewed as part of the ongoing other-than-temporary impairment monitoring process.

Table of Contents*Collateralized Transactions*

The Company engages in transactions in which fixed maturity securities, primarily bonds issued by the U.S. government and government agencies and authorities, and U.S. corporations, are loaned to selected broker/dealers. Collateral, greater than or equal to 102% of the fair value of the securities lent, plus accrued interest, is received in the form of cash and cash equivalents held by a custodian bank for the benefit of the Company. The use of cash collateral received is unrestricted. The Company reinvests the cash collateral received, generally in investments of high credit quality that are designated as available-for-sale. The Company monitors the fair value of securities loaned and the collateral received, with additional collateral obtained, as necessary. The Company is subject to the risk of loss to the extent there is a loss on the re-investment of cash collateral.

As of June 30, 2013 and December 31, 2012, our collateral held under securities lending, of which its use is unrestricted, was \$96,014 and \$94,729, respectively, and is included in the consolidated balance sheets under the collateral held/pledged under securities agreements. Our liability to the borrower for collateral received was \$96,000 and \$94,714, respectively, and is included in the consolidated balance sheets under the obligation under securities agreements. The difference between the collateral held and obligations under securities lending is recorded as an unrealized gain and is included as part of AOCI. There was one security in an unrealized loss position as of June 30, 2013 and it has been in an unrealized loss position for less than 12 months. All securities were in an unrealized gain position as of December 31, 2012. The Company includes the available-for-sale investments purchased with the cash collateral in its evaluation of other-than-temporary impairments.

Cash proceeds that the Company receives as collateral for the securities it lends and subsequent repayment of the cash are regarded by the Company as cash flows from financing activities, since the cash received is considered a borrowing. Since the Company reinvests the cash collateral generally in investments that are designated as available-for-sale, the reinvestment is presented as cash flows from investing activities.

Liquidity and Capital Resources*Regulatory Requirements*

Assurant, Inc. is a holding company and, as such, has limited direct operations of its own. Our holding company's assets consist primarily of the capital stock of our subsidiaries. Accordingly, our holding company's future cash flows depend upon the availability of dividends and other statutorily permissible payments from our subsidiaries, such as payments under our tax allocation agreement and under management agreements with our subsidiaries. The ability to pay such dividends and to make such other payments will be limited by applicable laws and regulations of the states in which our subsidiaries are domiciled, which subject our subsidiaries to significant regulatory restrictions. The dividend requirements and regulations vary from state to state and by type of insurance provided by the applicable subsidiary. These laws and regulations require, among other things, our insurance subsidiaries to maintain minimum solvency requirements and limit the amount of dividends these subsidiaries can pay to the holding company. For further information on pending amendments to state insurance holding company laws, including the NAIC's Solvency Modernization Initiative, see Item 1A Risk Factors Risks Related to Our Company Changes in regulation may reduce our profitability and limit our growth in our 2012 Annual Report on Form 10-K. Along with solvency regulations, the primary driver in determining the amount of capital used for dividends is the level of capital needed to maintain desired financial strength ratings from A.M. Best.

It is possible that regulators or rating agencies could become more conservative in their methodology and criteria, including increasing capital requirements for our insurance subsidiaries which, in turn, could negatively affect our capital resources. On March 12, 2013, Moody's Investor Services (Moody's) downgraded the insurance financial strength ratings of two of Assurant's rated life and health subsidiaries from A3 to Baa1 due to pressures on earnings and concerns about the impact of the Affordable Care Act. Moody's outlook on these two subsidiaries remains negative. On June 24, 2013, Standard and Poor's (S&P) upgraded the Senior Debt rating of Assurant, Inc from BBB to BBB+ and revised the outlook on the rating from positive to stable. In addition, S&P upgraded the financial strength ratings of American Security Insurance Company, American Bankers Insurance Company of Florida, American Bankers Life Assurance Company of Florida and American Memorial Life from A- to A and revised the outlook on the ratings from positive to stable. The upgrades reflect Assurant's strong earnings capability based on its well-diversified competitive position and very strong capital adequacy, as well as the company's strong financial flexibility supported by its strong leverage and coverage metrics. For further information on our ratings and the risks of ratings downgrades, see Item 1 Business and Item 1A Risk Factors Risks Related to Our Company A.M. Best, Moody's and S&P rate the financial strength of our insurance company subsidiaries, and a decline in these ratings could affect our standing in the insurance industry and cause our sales and earnings to decrease in our 2012 Annual Report on Form 10-K. For 2013, the maximum amount of dividends our U.S. domiciled insurance subsidiaries could pay, under applicable laws and regulations without prior regulatory approval, is approximately \$524,000. During Six Months 2013, we received dividends or returns of capital, net of infusions, of \$206,393 from our subsidiaries. We expect 2013 dividends from the operating segments to approximate their earnings subject to the growth of the businesses, rating agency and regulatory capital requirements and investment performance.

Table of Contents

Liquidity

As of June 30, 2013, we had \$887,060 in holding company capital, excluding \$476,280 from the March 28, 2013 debt offering which will be used to repay debt maturing in February 2014. We use the term *holding company capital* to represent cash and other liquid marketable securities held at Assurant, Inc., out of a total of \$1,571,940, that we are not otherwise holding for a specific purpose as of the balance sheet date, but can be used for stock repurchases, stockholder dividends, acquisitions, and other corporate purposes. \$250,000 of the \$887,060 of holding company capital is intended to serve as a buffer against remote risks (such as large-scale hurricanes). Dividends or returns of capital, net of infusions, made to the holding company from its operating companies were \$206,393 and \$581,908 for Six Months 2013 and the year ended December 31, 2012, respectively. We use these cash inflows primarily to pay expenses, to make interest payments on indebtedness, to make dividend payments to our stockholders, to make subsidiary capital contributions, to fund acquisitions and to repurchase our outstanding shares.

In addition to paying expenses and making interest payments on indebtedness, our capital management strategy provides for several uses for the cash generated by our subsidiaries, including without limitation, returning capital to shareholders through share repurchases and dividends; investing in our businesses to support growth in targeted areas; and making prudent and opportunistic acquisitions. We made share repurchases and paid dividends to our stockholders of \$237,668 and \$472,103 during Six Months 2013 and the year ended December 31, 2012, respectively.

The primary sources of funds for our subsidiaries consist of premiums and fees collected, proceeds from the sales and maturity of investments and net investment income. Cash is primarily used to pay insurance claims, agent commissions, operating expenses and taxes. We generally invest our subsidiaries' excess funds in order to generate investment income.

We conduct periodic asset liability studies to measure the duration of our insurance liabilities, to develop optimal asset portfolio maturity structures for our significant lines of business and ultimately to assess that cash flows are sufficient to meet the timing of cash needs. These studies are conducted in accordance with formal company-wide Asset Liability Management (ALM) guidelines.

To complete a study for a particular line of business, models are developed to project asset and liability cash flows and balance sheet items under a large, varied set of plausible economic scenarios. These models consider many factors including the current investment portfolio, the required capital for the related assets and liabilities, our tax position and projected cash flows from both existing and projected new business.

Alternative asset portfolio structures are analyzed for significant lines of business. An investment portfolio maturity structure is then selected from these profiles given our return hurdle and risk preference. Sensitivity testing of significant liability assumptions and new business projections is also performed.

Our liabilities generally have limited policyholder optionality, which means that the timing of payments is relatively insensitive to the interest rate environment. In addition, our investment portfolio is largely comprised of highly liquid fixed maturity securities with a sufficient component of such securities invested that are near maturity which may be sold with minimal risk of loss to meet cash needs. Therefore, we believe we have limited exposure to disintermediation risk.

Generally, our subsidiaries' premiums, fees and investment income, along with planned asset sales and maturities, provide sufficient cash to pay claims and expenses. However, there may be instances when unexpected cash needs arise in excess of that available from usual operating sources. In such instances, we have several options to raise needed funds, including selling assets from the subsidiaries' investment portfolios, using holding company cash (if available), issuing commercial paper, or drawing funds from our revolving credit facility. In addition, we have filed an automatically effective shelf registration statement on Form S-3 with the SEC. This registration statement allows us to issue equity, debt or other types of securities through one or more methods of distribution. The terms of any offering would be established at the time of the offering, subject to market conditions. If we decide to make an offering of securities, we will consider the nature of the cash requirement as well as the cost of capital in determining what type of securities we may offer.

We paid dividends of \$0.25 per common share on June 11, 2013 to stockholders of record as of May 28, 2013. This represents a 19 percent increase above the quarterly dividend of \$0.21 per common share paid on March 11, 2013 to stockholders of record as of February 25, 2013. Any determination to pay future dividends will be at the discretion of our Board of Directors and will be dependent upon: our subsidiaries' payment of dividends and/or other statutorily permissible payments to us; our results of operations and cash flows; our financial position and capital requirements; general business conditions; any legal, tax, regulatory and contractual restrictions on the payment of dividends; and any other factors our Board of Directors deems relevant.

On May 14, 2012, our Board of Directors authorized the Company to repurchase up to an additional \$600,000 of its outstanding common stock. As of December 31, 2012, there was \$502,900 remaining under the total repurchase authorization. During the six months ended June 30, 2013, we repurchased 4,246,113 shares of our outstanding common stock at a cost of \$200,639, exclusive of commissions. As of June 30, 2013,

Edgar Filing: ASSURANT INC - Form 10-Q

\$302,261 remained under the total repurchase authorization. The timing and the amount of future repurchases will depend on market conditions and other factors.

Table of Contents

Management believes the Company will have sufficient liquidity to satisfy its needs over the next twelve months, including the ability to pay interest on our Senior Notes and dividends on our common shares.

Retirement and Other Employee Benefits

Our qualified pension benefits plan (the Plan) was under-funded by \$21,969 and \$107,666 (based on the fair value of Plan assets compared to the projected benefit obligation) at June 30, 2013 and December 31, 2012, respectively. This equates to a 97% and 87% funded status at June 30, 2013 and December 31, 2012, respectively. The change in under-funded projected benefit obligation status is mainly due to an increase in the discount rate used to determine the projected benefit obligation.

In prior years we established a funding policy in which service cost plus 15% of qualified plan deficit will be contributed annually. During Six Months 2013, we contributed \$25,000 in cash to the Plan. Additional cash, up to \$25,000, is expected to be contributed to the Plan over the remainder of 2013.

Commercial Paper Program

Our commercial paper program requires us to maintain liquidity facilities either in an available amount equal to any outstanding notes from the program or in an amount sufficient to maintain the ratings assigned to the notes issued from the program. Our commercial paper is rated AMB-2 by A.M. Best, P-2 by Moody's and A-2 by S&P. Our subsidiaries do not maintain commercial paper or other borrowing facilities. This program is currently backed up by a \$350,000 senior revolving credit facility, of which \$344,439 was available at June 30, 2013, due to outstanding letters of credit.

On September 21, 2011, we entered into a four-year unsecured \$350,000 revolving credit agreement (2011 Credit Facility) with a syndicate of banks arranged by JP Morgan Chase Bank, N.A. and Bank of America, N.A. The 2011 Credit Facility provides for revolving loans and the issuance of multi-bank, syndicated letters of credit and/or letters of credit from a sole issuing bank in an aggregate amount of \$350,000 and is available until September 2015, provided we are in compliance with all covenants. The 2011 Credit Facility has a sublimit for letters of credit issued thereunder of \$50,000. The proceeds of these loans may be used for our commercial paper program or for general corporate purposes. The Company may increase the total amount available under the 2011 Credit Facility to \$525,000 subject to certain conditions. No bank is obligated to provide commitments above their current share of the \$350,000 facility.

We did not use the commercial paper program during the six months ended June 30, 2013 or 2012, and there were no amounts outstanding relating to the commercial paper program at June 30, 2013 and December 31, 2012. The Company made no borrowings using the 2011 Credit Facility and no loans are outstanding at June 30, 2013. We had \$5,561 of letters of credit outstanding under the 2011 Credit Facility as of June 30, 2013.

The 2011 Credit Facility contains restrictive covenants and requires that the Company maintain certain specified minimum ratios and thresholds. Among others, these covenants include maintaining a maximum debt to capitalization ratio and a minimum consolidated adjusted net worth. At June 30, 2013, we were in compliance with all covenants, minimum ratios, and thresholds.

Senior Notes

On March 28, 2013, we completed an issuance of two series of senior notes with an aggregate principal amount of \$700,000 (the 2013 Senior Notes). The first series is \$350,000 in principal amount, bears interest at 2.50% per year and is payable in a single installment due March 15, 2018. The second series is \$350,000 in principal amount, bears interest at 4.00% per year and is payable in a single installment due March 15, 2023.

The net proceeds from the sale of the 2013 Senior Notes was \$698,093, which represents the principal amount less the discount before offering expenses. The Company intends to use the net proceeds of the 2013 Senior Notes offering for general corporate purposes, including to repay \$476,280 of remaining debt maturing in 2014.

In addition, we have two series of senior notes outstanding in an aggregate principal amount of \$975,000 (the 2004 Senior Notes). The first series is \$500,000 in principal amount, bears interest at 5.63% per year and is due February 15, 2014. The second series is \$475,000 in principal amount, bears interest at 6.75% per year and is due February 15, 2034.

Edgar Filing: ASSURANT INC - Form 10-Q

During the three months ended June 30, 2013, the Company repurchased \$23,720 of the 2004 Senior Notes through open market transactions. The \$774 difference between the reacquisition price and the net carrying amount of the extinguished debt was recorded as an extinguishment loss and is included in the consolidated statement of operations as part of interest expense.

Table of Contents

Interest on our 2004 Senior Notes is payable semi-annually on February 15 and August 15 of each year. The interest expense incurred related to the 2004 Senior Notes was \$15,003 and \$15,074 for the three months ended June 30, 2013 and 2012, respectively, and \$30,081 and \$30,150 for the six months ended June 30, 2013 and 2012, respectively. There was \$22,070 and \$22,570 of accrued interest at June 30, 2013 and 2012, respectively. The 2004 Senior Notes are unsecured obligations and rank equally with all of our other senior unsecured indebtedness. The 2004 Senior Notes are not redeemable prior to maturity.

Interest on our 2013 Senior Notes is payable semi-annually on March 15 and September 15 of each year. The interest expense incurred related to the 2013 Senior Notes was \$5,743 for both the three and six months ended June 30, 2013. There was \$5,688 of accrued interest at June 30, 2013. The 2013 Senior Notes are unsecured obligations and rank equally with all of our other senior unsecured indebtedness. The 2013 Senior Notes are not redeemable prior to maturity.

Cash Flows

We monitor cash flows at the consolidated, holding company and subsidiary levels. Cash flow forecasts at the consolidated and subsidiary levels are provided on a monthly basis, and we use trend and variance analyses to project future cash needs, making adjustments to the forecasts when needed.

The table below shows our recent net cash flows:

	For the Six Months Ended June 30,	
	2013	2012
Net cash provided by (used in):		
Operating activities (1)	\$ 261,096	\$ 181,398
Investing activities	(343,602)	51,417
Financing activities	443,497	(292,536)
 Net change in cash	 \$ 360,991	 \$ (59,721)

(1) Includes effect of exchange rate changes on cash and cash equivalents.

We typically generate operating cash inflows from premiums collected from our insurance products and income received from our investments while outflows consist of policy acquisition costs, benefits paid, and operating expenses. These net cash flows are then invested to support the obligations of our insurance products and required capital supporting these products. Our cash flows from operating activities are affected by the timing of premiums, fees, and investment income received and expenses paid.

Net cash provided by operating activities was \$261,096 and \$181,398 for Six Months 2013 and Six Months 2012, respectively. The increase in cash provided by operating activities was primarily due to higher tax payments made in Six Months 2012 compared with Six Months 2013 and increased net written premiums in our Assurant Solutions segment during Six Months 2013. These increases were partially offset by increased catastrophe loss payments and a \$14,000 settlement with the New York Department of Financial Services in our Assurant Specialty Property segment during Six Months 2013.

Net cash (used in) provided by investing activities was \$(343,602) and \$51,417 for Six Months 2013 and Six Months 2012, respectively. The increase in investing activities was mainly due to changes in short term investments and increased purchases of fixed maturity and equity securities and other invested assets.

Net cash provided by (used in) financing activities was \$443,497 and \$(292,536) for Six Months 2013 and Six Months 2012, respectively. The increase in financing activities was primarily due to the issuance of two series of senior notes during First Quarter 2013. The Company received proceeds of \$698,093 from this transaction, which represents the principal amount less the discount before offering expenses. In addition, the Company repurchased \$23,720 of the 2004 Senior Notes through open market transactions during Second Quarter 2013 and repurchased \$65,571 less of its common stock during Six Months 2013 compared with Six Months 2012.

Table of Contents

The table below shows our cash outflows for interest and dividends for the periods indicated:

	For the Six Months Ended June 30,	
	2013	2012
Interest paid on debt	\$ 30,094	\$ 30,094
Common stock dividends	36,944	35,349
Total	\$ 67,038	\$ 65,443

Letters of Credit

In the normal course of business, we issue letters of credit primarily to support reinsurance arrangements. These letters of credit are supported by commitments with financial institutions. We had \$5,561 and \$19,760 of letters of credit outstanding as of June 30, 2013 and December 31, 2012, respectively.

Recent Accounting Pronouncements

For a discussion of recent accounting pronouncements, see Note 3 to the Notes to Consolidated Financial Statements.

Table of Contents

Item 3. Quantitative and Qualitative Disclosures About Market Risk

Our 2012 Annual Report on Form 10-K described our Quantitative and Qualitative Disclosures About Market Risk. There were no material changes to the assumptions or risks during Second Quarter 2013.

Item 4. Controls and Procedures

Evaluation of Disclosure Controls and Procedures

The Company's Chief Executive Officer and Chief Financial Officer have evaluated the effectiveness of the Company's disclosure controls and procedures pursuant to Rule 13a-15 under the Securities Exchange Act of 1934, as amended (the Exchange Act) as of June 30, 2013. They have concluded that the Company's disclosure controls and procedures are effective, and provide reasonable assurance that information the Company is required to disclose in its reports under the Exchange Act is recorded, processed, summarized and reported accurately. They also have concluded that information that the Company is required to disclose is accumulated and communicated to the Company's management as appropriate to allow timely decisions regarding required disclosure.

Internal Control over Financial Reporting

During the quarter ended June 30, 2013, we made no changes in our internal control over financial reporting that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

PART II

OTHER INFORMATION

Item 1. Legal Proceedings.

The Company is involved in a variety of legal and regulatory actions in the ordinary course relating to its current and past business operations, both as a defendant and as a plaintiff, and may from time to time become involved in other such actions. See Note 13 to the Notes to Consolidated Financial Statements for a description of certain matters, which description is incorporated herein by reference. Although the Company cannot predict the outcome of any pending or future litigation, examination or investigation, it is possible that the outcome of such matters could have a material adverse effect on the Company's consolidated results of operations or cash flows for an individual reporting period. However, based on currently available information, management does not believe that any pending matter is likely to have a material adverse effect, individually or in the aggregate, on the Company's financial condition.

Item 1A. Risk Factors.

Certain factors may have a material adverse effect on our business, financial condition and results of operations and you should carefully consider them. It is not possible to predict or identify all such factors. For discussion of our potential risks or uncertainties, please refer to Item 1A Risk Factors included in our 2012 Annual Report on Form 10-K and First Quarter 2013 Form 10-Q. There have been no material changes during Second Quarter 2013.
