## I. Operating Results and Financial Conditions

### 2013 in Review

Looking back at the global economy in 2013, although the U.S. and Japanese economies began heading toward moderate recoveries during the latter half of the year, the economic downturn in Europe continued to drag on while the economies of emerging countries such as China faced slowdowns. As such, contrary to expectations at the beginning of the year, the global economy remained stagnant. As for exchange rates, the correction of the historic high value of the yen continued, with a trend toward a weaker yen growing increasingly clear.

As for the markets in which Canon operates amid these conditions, owing to the economic slowdown, flat demand led to a continuation of the harsh business environment especially for consumer products. Among office multifunction devices (MFDs), color models continued to drive growth while demand for laser printers realized a turnaround toward recovery. Although demand for interchangeable-lens digital cameras continued to show strong growth in Japan, demand overseas fell short of the previous year's level as the economic rebound in such markets as Europe and China takes longer than expected. As for digital compact cameras, demand continued to shrink in both developed countries as well as emerging markets. Overall market demand for inkjet printers, hit by the prolonged economic downturn, also declined in all major markets. In the industry and others sector, a rebound in capital investment for memory devices led to a pickup in demand for semiconductor lithography equipment in the latter half of the year, while demand for lithography equipment used in the production of flat panel displays (FPD) showed healthy market growth for mid- and small-size panels used mainly in smartphones and tablet PCs, and a modest recovery for large-size panels.

The average value of the yen during the year was ¥97.84 against the U.S. dollar, a year-on-year depreciation of approximately ¥18, and ¥130.01 against the euro, a year-on-year depreciation of approximately ¥27.

Despite the decline in demand for digital compact cameras and industrial equipment, net sales for the year increased 7.2% to ¥3,731.4 billion (U.S.\$35,537 million) from the previous year. This was realized through the steady sales growth for MFDs and laser printers, along with an increase in sales of inkjet printers, made possible through sales-promotion efforts despite the harsh conditions posed by the shrinking inkjet printer market, as well as the positive effects of favorable currency exchange rates. The gross profit ratio rose 0.8 points year on year to 48.2% thanks to the effects of ongoing cost-cutting efforts along with the depreciation of the yen. Despite an increase in foreign-currency-denominated operating expenses after conversion into yen due to the depreciation of the yen, Group-wide efforts to thoroughly reduce spending contributed to limiting the increase in operating expenses to just ¥1,461.1 billion (U.S.\$13,916 million), an increase of 10.2% year on year. Consequently, operating profit increased by 4.1% to ¥337.3 billion (U.S.\$3,212 million). Other income decreased by ¥8.4 billion (U.S.\$80 million) due to foreign currency exchange losses while income before income taxes increased by 1.5% year on year to ¥347.6 billion (U.S.\$3,311 million). Net income attributable to Canon Inc. increased by 2.6% to ¥230.5 billion (U.S.\$2,195 million). Accordingly, Canon achieved increases in both sales and profit.

Basic net income attributable to Canon Inc. stockholders per share for the year was ¥200.78 (U.S.\$ 1.91), a year-on-year increase of ¥9.44 (U.S.\$ 0.09).

---

## Results by Segment

Looking at Canon's full-year performance by business unit, within the Office Business Unit, as for office MFDs, sales of color models increased from the year-ago period led by the imageRUNNER ADVANCE C5200/C2200 series. As for high speed continuous feed printers and wide-format printers, sales of the Océ ColorStream 3000 series showed solid growth. With regard to laser printers, laser multifunction models recorded strong growth contributing to a year-on-year increase in sales volume. As a result, sales for the business unit totaled ¥2,000.1 billion (U.S.\$19,048 million), an increase of 13.8% year on year, while operating profit totaled ¥266.9 billion (U.S.\$2,542 million), increasing 31.1%.

Within the Imaging System Business Unit, interchangeable-lens digital cameras maintained their top market share despite the challenging environment, which was marked by a drop in demand in Europe and China due to the economic downturn, although demand in Japan continued to expand. In particular, the EOS 5D Mark III and 70D advanced-amateur-model digital SLR cameras continued to realize healthy growth. Furthermore, in Japan, the new entry-level EOS Digital Rebel SL1 and T5i cameras proved popular. As for digital compact cameras, although total sales volume declined due to the market slowdown and the increasing popularity of smartphones, sales volume increased from the previous year for high-added-value models incorporating features that differentiate them from smartphones, such as large-size image sensors and models like the PowerShot SX50 HS and SX510 HS, which feature high-magnification zoom lenses. With regard to inkjet printers, despite the harsh market environment due to the rapid fall in demand in emerging markets, sales volume enjoyed solid growth thanks to efforts to boost sales through the introduction of new products offering enhanced support for cloud services. As a result, sales for the business unit increased by 3.1% to ¥1,448.9 billion (U.S.\$13,799 million) year on year, while operating profit totaled ¥203.8 billion (U.S.\$1,941 million), a decrease of 3.1%.

In the Industry and Others Business Unit, within the semiconductor lithography equipment, despite an increase in sales volume for memory devices in the latter half of the year fueled by renewed investment in capital expenditure by memory manufacturers, sales volumes for the year decreased slightly owing to restrained capital expenditure in the first half. As for FPD lithography equipment, sales volume remained the same as for the previous year amid the recovery trend in investment for large-size panels. Looking at medical equipment, sales volume for Canon's mainstay digital radiography systems steadily increased. Consequently, sales for the business unit totaled ¥374.9 billion (U.S.\$3,570 million), a decrease of 8.1% year on year, while operating profit recorded a loss of ¥25.3 billion (U.S.\$241 million), declining by ¥31.2 billion (U.S.\$298 million) from the previous year.

## Cash Flow

During 2013, cash flow from operating activities totaled ¥507.6 billion (U.S.\$4,835 million), an increase of ¥123.6 billion (U.S.\$1,177 million) compared with the previous year, owing to improvements in working capital through such means as increasing the collection of accounts receivable and reducing inventory. Although capital investment focused on new products, cash flow from investing activities increased ¥37.5 billion (U.S.\$357 million) year on year to ¥250.2 billion (U.S.\$2,383 million) as a result of an increased amount of time deposits included in short-term investments. Accordingly, free cash flow totaled ¥257.4 billion (U.S.\$2,452 million), an increase of ¥86.1 billion (U.S.\$820 million) compared with the previous year. Cash flow from financing activities recorded an outlay of ¥222.2 billion (U.S.\$2,116 million), mainly arising from the dividend payout and the repurchasing of treasury stock.

Owing to these factors, as well as the positive impact from foreign currency translation adjustments, cash and cash equivalents increased by ¥122.2 billion (U.S.\$1,164 million) to ¥788.9 billion (U.S.\$7,513 million) from the end of the previous year.

## Non-consolidated Results

Non-consolidated net sales totaled ¥2,128.8 billion (U.S.\$20,274 million), a year-on-year increase of 0.7%, ordinary profit increased by 0.4% to ¥236.7 billion (U.S.\$2,254 million), and net income increased by 8.1% to ¥170.4 billion (U.S.\$1,623 million).

---

## Outlook

As for the outlook in 2014, there are signs of brightness among developed countries with steady economic growth in the U.S. and Japan, and the European economy expected to realize a turnaround toward recovery. Although uncertainties remain in emerging countries such as China, since they are expected to maintain their course of moderate expansion, the global economy, having bottomed out in 2013, is also expected to realize a moderate recovery.

In the businesses in which Canon is involved, demand for MFDs is projected to expand moderately, mainly for color models. Likewise, demand in the laser printer market is also expected to continue growing moderately. With regard to interchangeable-lens digital cameras, demand is expected to remain in line with that for the previous year. Within the digital compact camera market, projections point to market contraction, mainly among low-end models, due to the popularity of smartphones. As for inkjet printers, dwindling demand is expected to come to an end with the economic recovery, leveling off to remain in line with the previous year. Within the industrial equipment market, demand for semiconductor lithography equipment is expected to increase as device manufacturers boost capital investment in response to their improved inventory levels, while demand for FPD lithography equipment will likely pick up along with the recovery in investment for large-size panels.

With regard to currency exchange rates for the year, on which Canon's performance outlook is based, despite the recent trend toward a weaker yen, uncertainties remain in the future and Canon anticipates exchange rates of ¥100 to the U.S. dollar and ¥135 to the euro, representing depreciations of approximately ¥2 against the U.S. dollar, and approximately ¥5 against the euro compared with the previous year. Upon taking into consideration these foreign exchange rate assumptions and the current economic forecast, Canon projects full-year consolidated net sales in 2014 of ¥3,850.0 billion (U.S.\$36,667 million), a year-on-year increase of 3.2%; operating profit of ¥360.0 billion (U.S.\$3,429 million), a year-on-year increase of 6.7%; income before income taxes of ¥360.0 billion (U.S.\$3,429 million), a year-on-year increase of 3.6%; and net income attributable to Canon Inc. of ¥240.0 billion (U.S.\$2,286 million), a year-on-year increase of 4.1%.

## Basic Policy Regarding Profit Distribution and Dividends for the Current Fiscal Year

Canon is being more proactive in returning profits to shareholders, mainly in the form of a dividend, taking into consideration mid-term profit forecasts, planned future investments, cash flow and other factors.

In 2013, despite the challenging business environment characterized by the prolonged European recession, Canon was able to generate adequate cash on hand thanks to comprehensive cash flow management and subsequent improvements in management efficiency. In light of this situation, Canon plans to distribute a full-year dividend totaling ¥130 (U.S.\$1.24) per share (interim dividend of ¥65 [U.S.\$0.62] per share [already distributed], and year-end dividend of ¥65 [U.S.\$0.62] per share), the same dividend amount as the previous year (including the commemorative dividend).

This document contains forward-looking statements with respect to future results, performance and achievements that are subject to risk and uncertainties and reflect management's views and assumptions formed by available information. All statements other than statements of historical fact are statements that could be considered forward-looking statements. When used in this document, words such as anticipate, believe, estimate, expect, intend, may, plan, project or similar expressions, as they relate to Canon, are intended to identify forward-looking statements. Many factors could cause the actual results, performance or achievements of Canon to be materially different from any future results, performance or achievements that may be expressed or implied by such forward-looking statements, including, among others, changes in general economic and business conditions, changes in currency exchange rates and interest rates, introduction of competing products by other companies, lack of acceptance of new products or services by Canon's targeted customers, inability to meet efficiency and cost reduction objectives, changes in business strategy and various other factors, both referenced and not referenced in this document. A detailed description of these and other risk factors is included in Canon's annual report on Form 20-F, which is on file with the United States Securities and Exchange Commission. Should one or more of these risks or uncertainties materialize, or should underlying assumptions prove incorrect, actual results may vary materially from those described herein. Canon does not intend or assume any obligation to update these forward-looking statements.

## II. Management Policy

### (1) Basic Policy

Under the corporate philosophy of kyosei living and working together for the common good Canon's basic management policy is to contribute to the prosperity and well-being of the world while endeavoring to become a truly excellent global corporation targeting continued growth and development.

### (2) Management Goals

Based on this basic management policy, Canon launched the Excellent Global Corporation Plan in 1996. For almost 20 years, Canon's aim has been to exhibit strong sustainable growth and actively fulfill its social responsibilities. Through Phases I, II and III, Canon worked to build a solid management base and, in 2011, embarked on Phase IV, devoting full attention to achieving sound business growth.

At that time, the global economy was, among other things, undergoing a recovery from the global recession sparked by the collapse of Lehman Brothers. Frequent and drastic changes in the business environment were also occurring. Faced with such circumstances, Canon, regarding the drastic change to be an opportunity to swiftly transform itself ahead of the changing times, remained focused on tackling the challenge of achieving the Company's goal of sound business growth, implementing measures aimed at maintaining high profitability and further expanding its operations.

Since then, due to such unforeseen events as the Great East Japan Earthquake and flooding in Thailand, as well as the financial crisis in Europe, there has been an extended period of instability in the business environment. Although the global economy has remained weak, it finally started to show signs of improvement in 2013, returning to a path of gradual recovery in the latter half of the year. Going forward, this growth trend is expected to continue. For Canon, 2014 represents the fourth year of Phase IV (2011 - 2015) of the Excellent Global Corporation Plan. The Canon Group will work in unity, taking steps to realize sound business growth and overcome challenges to firmly return to a path of growth.

### (3) Business Challenges and Countermeasures

In 2014, Canon will implement various measures under a basic policy of carrying out further reforms in order to return to the growth track.

In order to achieve our targets, Canon has established and will actively pursue the following five priority goals.

#### 1. Bolstering Strengths of Existing Core Businesses by Creating Outstanding Hit Products

Canon aims to improve its market share for existing core businesses, developing appealing products that outperform the competition, not only in terms of basic performance, but also cost and usability. At the same time, Canon will strengthen the development of businesses derived from existing core businesses.

#### 2. Securely Launch and Steadily Expand New Businesses

Canon will work to accelerate the business expansion of network camera systems for which significant growth is expected. The Company will also focus on strengthening its business foundation for 4K reference displays and mixed-reality systems, while also concentrating on the commercialization of Super Machine Vision. In the medical field, Canon aims to realize the early launch of DNA diagnostic systems.

#### 3. Holistically Developing Global Sales Forces

In emerging markets, Canon will work to expand sales networks and enhance product lineups in accordance with conditions in each country. In developed countries, in addition to boosting the Company's ability to respond to Internet-based and other direct-order sales, Canon will strengthen its response to the centralized purchasing practices used by global corporations when procuring office products.

## Edgar Filing: CANON INC - Form 6-K

### 4. Optimizing the Global Production System

Based on such factors as changes in local conditions in each country, Canon will work to realize the optimized global allocation of its production assets. The Company will also work to maintain or expand its production in Japan through automation, while also accelerating localized production of mainly consumables in the Americas and Europe through automated production systems.

-5-

5. Exploring a New Dimension of Cost Reductions

Canon will strive to further accelerate procurement reforms as well as expand in-house production and promote automation. Additionally, the Company will work to significantly reduce product development times and achieve cost savings, promoting prototype-less production through the utilization of its super computer. Furthermore, it will move forward with the fundamental reform of manufacturing through the utilization of 3D printers.

In addition to the above, in order to return to a path of growth in the face of the dramatically changing business environment, Canon will select and concentrate on technological themes that will open the way to the future, further enhance product quality management, effectively make use of the Company's workforce, and carry out reforms such as thoroughly strengthening information security.
