**2013 FOURTH QUARTER AND FULL-YEAR RESULTS**

**Very good resilience in 2013**

**2016 Objectives confirmed**

**Full-year performance reflects continued resilience in a contrasting market:**

**2013 revenue up 10%, at \$3.766bn**

**EBIT at \$423m before non-recurring with EBIT margin at 11.2%**

**Positive Free Cash Flow before NRFI\* at \$5m**

**NRFI at \$(17)m**

**\$800 million impairment and write-off in Acquisition Division. Excluding this non-recurring item, net income was at \$101 million compared to \$92 million in 2012**

**Backlog was \$1.35bn as of 1<sup>st</sup> January 2014, up 9% and marine fleet coverage is at 100% for Q1, 75% for Q2 and 35% for Q3**

**CGG's 2014-2016 strategic roadmap confirmed :**

**Rebalancing of our portfolio of activities**

**Targeting revenue above \$4bn and 400bps EBIT margin improvement by the end of 2016 versus 2013**

**PARIS, France February 27<sup>th</sup> 2014** CGG (ISIN: 0000120164 NYSE: CGG), world leader in Geoscience announced today its non-audited 2013 fourth quarter and full-year consolidated results.

**CGG CEO, Jean-Georges Malcor commented:**

*« In a contrasting year with deteriorating market conditions in H2, CGG demonstrated resilience in its 2013 performance. The successful integration of the Geoscience activities within CGG reinforces the Group in a growing and profitable market segment.*

*As announced during our Capital Market Day in December, we are rebalancing our portfolio of activities and implementing our 2014-2016 strategic roadmap focused on cash & profitability. The down-sizing of our Acquisition division, combined with the Acquisition market outlook, result in a \$800 million impairment in our 2013 accounts. Concerning marine activity, our objective is to reduce the fleet from 18 to 13 3D high-end vessels by*

the end of 2016. Mid-February, the CGG Symphony has stopped operating and will be de-rigged. Concerning land activity, we have reinforced our partnership in the Middle East with ARGAS and we are restructuring our activities in North America. The restructuring costs across the 2014-2016 period are expected to remain below \$100m.

In 2014, we expect Acquisition market conditions to remain stable with however a low Q1, as already indicated. Our priorities are to deliver our plan and stay focused on tight cash management, cost reductions, and operational and commercial efficiency.

In 2016, in unchanged market conditions, we confirm our objectives of revenues above \$4bn and improved Ebit margin by 400bps compared to 2013. »

## Q4 Performance

**Revenue up 2%, at \$955m**

**EBIT at \$73m before non-recurring items with EBIT margin at 7.6%**

**Net income of \$(17) million after NRFI and before impairment & write-off**

**Positive Free Cash Flow before NRFI at \$179m**

**Equipment division total Revenue** was \$317 million, up 10% compared to the fourth quarter of 2012 and up 42% sequentially. This typically strong seasonal sales rebound, linked to the budgetary cycle of our customers, was mainly driven by land equipment sales. External sales were \$270 million, up 10% year-on-year while internal sales represented 15% of total revenue. Sales in Russia were strong to prepare for the winter season while China and Middle East were also active.

**Equipment division EBITDAs** was \$111.4 million, a margin of 35.1%.

**Equipment division EBIT** was \$101.9 million, a margin of 32.1%.

**Equipment division Capital Employed** was \$0.9 billion at the end of December 2013.

--	------------	------------	------------	--------------	--------------

**Acquisition division Total Revenue** was \$459 million, down 9% year-on-year and down 19% sequentially. This decrease is mainly due to challenging winter market conditions both in marine and land. External revenue was \$315 million.

**Marine Acquisition** revenue was \$363 million, stable year-on-year and down 21% sequentially. Our fleet utilization rate was down this quarter with availability rate at 83%. This was mainly due to planned dockings and large program awards delayed leading to commercial standby. Production rate remained at a satisfactory 90% level. 34% of the fleet was dedicated to multi-client programs.

**Land and Airborne Acquisition** revenue totaled \$95 million, down 28% year-on-year and down 10% sequentially. Land winter activity was particularly low in North America this quarter, where we operated two land crews compared to six last year, hitting severely the bottom line. The conditions of the Airborne activity remain tight, with a mining market, still depressed.

**Acquisition division EBITDAs** was \$12.5 million, a margin of 2.7%.

**Acquisition division EBIT** was \$(61.4) million.

**Acquisition division Capital Employed** was \$2.4 billion at the end of December 2013 after impairment & write-off.

<b>Capital Employed (in billion \$)</b>	<b>1.8</b>	<b>2.8</b>	<b>2.8</b>	<b>56%</b>	<b>0%</b>

**GGR Division Total Revenue** was \$371 million, up 28% year-on-year and up 25% sequentially. This strong performance by the GGR division clearly demonstrates, less than one year after the transaction, the value of the Fugro Geoscience acquisition.

**Multi-client revenue** increased to \$166 million, up 7% year-on-year and up 35% sequentially. Multi-client prefunding revenue was impacted by delays of large programs as some clients deferred their spending decisions.

*Prefunding revenue* was \$81 million. Multi-client cash capex was \$117 million, 69% pre-funded, and mainly focused on the Gulf of Mexico with the continuation of our IBALT program, in preparation for the future lease rounds but also offshore in the North Sea. Late in the quarter CGG was also awarded, three large high-end 3D multi-client survey programs offshore Brazil that will cover 30,000 km<sup>2</sup> including the promising provinces of Foz do Amazonas Basin, Barreirinhas and Campos.

*After-sales* were \$85 million, up 25% year-on-year.

**Subsurface Imaging & Reservoir** revenue was \$206 million, up 51% year-on-year and up 18% sequentially. Demand for subsurface imaging was strong in all centers. Subsurface Imaging centers in France and Oman were renewed and two new centers opened in Thailand and Myanmar. The contribution of reservoir businesses to revenue was solid. Our Data Management Services activity was awarded a significant contract in Norway with the Norwegian Petroleum Directorate (NPD) relating to the Diskos Database. This solution will streamline data

management through the shared electronic storage of seismic data of Norway.

**GGR Division EBITDAs** was \$230.0 million, a margin of 61.9%.

**GGR Division EBIT** was \$86.3 million, a margin of 23.2%. The multi-client depreciation rate amounted to 74%, leading to a \$783 million Net Book Value at the end of December 2013 (not including the Geospec library and other libraries with a \$35m Net Book Value).

**GGR Division Capital Employed** was \$2.8 billion at the end of December 2013.

#### Fourth Quarter 2013 Group Financial Results

**Group Total Revenue** was \$955 million, up 2% year-on-year and up 5% sequentially. This breaks down to 28% from the Equipment division, 33% from the Acquisition division, and 39% from the GGR division.

**Group EBITDAs** was \$280.3 million, a margin of 29.3%. After the Non-Recurring Items relating to Fugro (NRFI), Group EBITDAs was \$230.4 million, a margin of 24.1%

**Group EBIT** was \$72.9 million, a margin of 7.6%. After NRFI, Group EBIT was \$53 million, and after impairment & write-off, Group EBIT was \$(746.9) million.

## Full-Year 2013 Financial Results

**Group Total Revenue** was \$3.766 billion, up 10% compared to 2012 as a result of an estimated 17% increase corresponding to the activities acquired from Fugro and a (4)% decrease relating to the transfer of the SWOBS activities to Seabed Geosolutions. Group revenue breaks down to 22% from the Equipment division, 43% from the Acquisition division and 35% from the GGR division.

Equipment revenue was down (13)%. 57% of the total sales related to land equipment and 43% to marine equipment. No high-channel-count crews were launched in 2013 compared to 2012 where \$150 million related to high-channel-count crews in Oman and Saudi Arabia. Sales were at a record level in Russia where the size of crews increased although softer in China. Marine streamers sales were mainly driven by the replacement market this year.

Acquisition revenue was up 19%. The four C-Class vessels from Fugro joined CGG's fleet on 1<sup>st</sup> of February. Production rate was at a record high 92% level compared to 90% in 2012. Airborne joined in early September. Marine contract revenue was up 36% year-on-year at \$1.786 billion, while land and airborne revenue was down (23)% at \$440 million.

GGR revenue was up 36%. Multi-client revenue was up 24% with a particularly strong H1, mainly driven by Brazil and the North Sea. The year was excellent for Subsurface Imaging with sustained activity in all centers and large projects in the US. Reservoir businesses delivered a solid contribution as expected.

**Group EBIT** was \$423.2 million up 5%, and representing a margin of 11.2%. After NRFI, Group EBIT was \$406 million, and after impairment & write-off, Group EBIT was \$(394.3) million:

The NFRI were \$(17) million at the end of December. With the \$63 million net capital gain from the SWOBS transaction (the \$85 million capital gain was reduced by the negative contribution of the Seabed Geosolutions JV due to a slow start and operational issues on one project), the integration and restructuring costs relating to the Fugro Geoscience transaction eventually amounted to \$(80) million.

Assets impairment & write-off at \$800 million:

Land: \$79 million as a result of more difficult market conditions overall.

Marine \$721 million: due to \$139 million vessel fair value rebasement to reflect future utilization mode and \$582 million as a consequence of the planned (25)% fleet downsizing plan and the change in market outlook.

Equipment EBIT margin was 28.0% with a very strong Q4, showing a strong resilience thanks to efficient cost management, despite the lower volume and lack of high-channel-count crews. R&D expenses were high at 5.6% of revenue. Sercel launched two new products: Sentinel MS (Multi-Sensor streamer) in marine and the 508<sup>XT</sup> land acquisition system.

Acquisition EBIT margin was 2.5%. After a H1 which was above expectations, H2 was tougher with difficult market conditions. Despite an excellent marine production rate at 92% and a high commercial success rate, marine activity was impacted by H2 delays and low pricing environment. Land suffered from challenging safety and weather conditions in H1 and from a very low winter season in North America. Airborne's contribution was limited as it joined CGG in early September.

GGR EBIT margin was at 24.5%, a solid performance across all the businesses. Multi-client activity was strong in H1 and the prefunding rate for the whole year was 69%. Subsurface Imaging performance was at a record high level in all centers across the world. Reservoir and geology activities continued to be solid driven by sustained demand for geology products & services and reservoir softwares.

**Financial Charges** were \$214 million:

The cost of debt was \$192 million, while the total amount of interest paid was \$137 million.

Other financial items were negative at \$22 million including notably \$4 million relating to the financial cost of the Fugro Geoscience transaction (bridge loan), the \$5 million accelerated amortization of the issuing fees of the former Revolving Credit Facilities we renewed in July, and the \$6 million call premium relating to the \$125 million early repayment of the 2016 High Yield Bond we made in August.

**Taxes** were \$83 million, including the \$10 million favorable impact of deferred tax on currency conversion.

**Group Net Income** was \$101 million after NRFI and before the impairment and write-off. After impairment and write-off, Group Net Income was \$(691) million.

After minority interests and after NRFI and before impairment & write-off, **Net Income attributable to the owners of CGG** was \$94 million/ 71 million. EPS was positive at \$0.53/ 0.40, up 15% year-on-year.

### Cash Flow

**Cash Flow from operations** was \$908 million.

**Global Capex** was \$834 million, up 13% year-on-year.

**Free Cash Flow**

**Free cash flow** was negative at \$(56) million and positive at \$5 million excluding NRFI.

**Balance Sheet****Debt Management:**

As part of the company's proactive management of its debt, CGG accelerated the refinancing of its credit facilities during the year by extending the debt maturity periods:

In July:

A five-year-\$200-million credit facility was signed with a 4.4% interest rate, notably to reimburse the 2013 tranche of our Fugro Vendor Loan

The two existing \$289m Revolving Credit Facilities expiring in January/February 2014 were fully renewed with:

A-\$165-million US Revolving Credit Facility for a period of five years

A-\$325-million French Revolving Credit Facility for a period of three years with two extension options of one year each

In August:

CGG made an early repayment of \$125 million of the 9.5% 2016 High Yield Bond

In September:

After full completion of the Fugro Geoscience transaction and repayment of the 2013 installment, the Fugro Vendor Loan totaled 112.5 million.

In December:

A \$25 million streamer financing was signed.

**Net Debt to Equity Ratio:**

Group gross debt was \$2.748 billion at the end of December 2013. Available cash was \$530 million and Group net debt was \$2.218 billion.

Net debt to equity ratio, at the end of December 2013, was 58%.

## UNAUDITED ANALYSIS BY SEGMENT

We previously reported our results on the basis of two segments: Geophysical Services and Geophysical Equipment. As a result of the acquisition of Fugro's Geoscience Division, we changed our organization, as well as the way management measures our performance. Since February 1, 2013, we have been organized in three Divisions:

**Acquisition** segment, which comprises the following business lines:

Marine acquisition: seismic data acquisition offshore undertaken by us on behalf of a specific client or for our Multi-client business line (internal activity);

Land and Airborne: other seismic data acquisition undertaken by us on behalf of a specific client, or for our Multi-client business line (internal activity);

**Geology, Geophysics & Reservoir ( GGR )** segment which comprises the following business lines:

Multi-clients: development and management of seismic surveys undertaken by us and licensed to a number of clients on a non-exclusive basis;

Subsurface Imaging and Reservoir: processing and imaging of geophysical data, reservoir characterization, geophysical consulting and software services, geological data library and data management solutions.

**Equipment** segment, which we conduct through Sercel, comprises our manufacturing and sales activities for seismic equipment used for data acquisition, both on land and marine.

Financial information by segment is reported in accordance with our internal reporting system and provides internal segment information that is used by the chief operating decision maker to manage and measure the performance.

We also changed our main performance indicator from operating income to earnings before interest and tax ( EBIT ). We define EBIT as operating income plus our share of income in companies accounted for under the equity method. EBIT is used by management as a performance indicator because it captures the contribution to our results of the significant businesses that we manage through our joint-ventures.

Prior period segment disclosure has been restated to reflect the new segments.
