PART I

Item 1. Business.

Throughout this report Mattel refers to Mattel, Inc. and/or one or more of its family of companies. Mattel designs, manufactures, and markets a broad variety of toy products worldwide which are sold to its customers and directly to consumers. Mattel’s vision is creating the future of play. Mattel’s objectives are to grow its share in the marketplace, continue to improve its operating margins, and create long-term stockholder value. To achieve these objectives, management has established the following strategies:

The first strategy is to deliver consistent growth by investing in its core brands, optimizing entertainment partnerships, building new franchises, and working to expand and leverage its international footprint.

The second strategy is to optimize operating margins through sustaining gross margins of about 50% over the long-term, and delivering on cost savings initiatives.

The third strategy is to generate significant cash flow and continue its disciplined, opportunistic, and value-enhancing deployment.

Mattel believes its products are among the most widely recognized toy products in the world. Mattel’s portfolio of brands and products are grouped into four major brand categories, including the Construction and Arts & Crafts brand category, which was introduced in the second quarter of 2014 with the acquisition of MEGA Brands Inc. (MEGA Brands).

Mattel Girls & Boys Brands including Barbie® fashion dolls and accessories (Barbie), Monster High®, Disney Classics®, Ever After High®, Little Mommy®, and Polly Pocket® (collectively Other Girls), Hot Wheels® and Matchbox® vehicles and play sets (collectively Wheels), and CARS®, Disney Planes , BOOMco , Radical Toy Story®, Max Steel®, WWE® Wrestling, Batman®, and games and puzzles (collectively Entertainment).

Fisher-Price Brands including Fisher-Price®, Little People®, BabyGear , Laugh & Learn®, and Imaginext® (collectively Core Fisher-Price), Thomas & Friends , Dora the Explorer®, Mickey Mouse® Clubhouse, and Disney Jake and the Never Land Pirates® (collectively Fisher-Price Friends), and Power Wheels®.

American Girl Brands including My American Girl®, BeForever , and Bitty Baby®. American Girl Brands products are sold directly to consumers via its catalog, website, and proprietary retail stores. Its children’s publications are also sold to certain retailers.

Construction and Arts & Crafts Brands including MEGA BLOKS®, RoseArt®, and Board Dudes®.

Mattel, Inc. was incorporated in California in 1948 and reincorporated in Delaware in 1968. Its executive offices are located at 333 Continental Blvd., El Segundo, California 90245-5012, telephone number (310) 252-2000.

Business Segments

Mattel’s operating segments are separately managed business units, consisting of: (i) North America, which consists of the US and Canada, (ii) International, and (iii) American Girl. The North America and International segments sell products in the Mattel Girls & Boys Brands, Fisher-Price Brands, and Construction and Arts & Crafts Brands categories, although some products are developed and adapted for particular international markets.

For additional information on Mattel’s segment reporting, including revenues and segment income, see Part II, Item 7 Management’s Discussion and Analysis of Financial Condition and Results of Operations Results of Operations and Part II, Item 8 Financial Statements and Supplementary Data Note 12 to the Consolidated

Financial Statements and Supplementary Data Note 12 to the Consolidated Financial Statements Segment Information. For additional information regarding revenues by brand category, see Part II, Item 8 Financial Statements and Supplementary Data Note 12 to the Consolidated Financial Statements Segment Information.

For a discussion of the risks inherent in the foreign operations of Mattel, which affect each segment, see Item 1A Risk Factors.

North America Segment

The North America segment markets and sells toys in the US and Canada through the Mattel Girls & Boys Brands, Fisher-Price Brands, and Construction and Arts & Crafts Brands categories.

In the Mattel Girls & Boys Brands category, Barbie includes Barbie fashion dolls and accessories. Other Girls includes Monster High, Disney Classics, Ever After High, Little Mommy, and Polly Pocket. Wheels includes Hot Wheels and Matchbox vehicles and play sets. Entertainment includes CARS, Disney Planes, BOOMco, Radica, Toy Story, Max Steel, WWE Wrestling, Batman, as well as games and puzzles.

In 2015, Barbie will continue to inspire girls and remind them that anything is possible. The global campaign will be supported by innovative products, events, and strategic partnerships. In addition, Barbie will feature new products to support two animated launches, *Barbie in Princess Power* in spring 2015 and *Barbie in Rock N Royals* in fall 2015. Barbie will also continue to encourage girls to explore fashion through a new line of Fashionista dolls that reflect styles they see in the classrooms. Monster High will celebrate its fifth year with new characters, new scale, and new entertainment. A new Monster High DVD will be released in spring 2015 entitled *Haunted* and a second DVD, *Boo York, Boo York: A Monsterrific Musical!*, will be released in fall 2015. Monster High will introduce new larger scale dolls and vinyl figures in order to engage girls in a new way. Ever After High will continue to feature creative storylines and original characters in 2015. Ever After High will deliver new content through a Netflix original movie and Netflix original series and will also extend storylines through five new books by acclaimed author Susan Selfors. Ever After High will also offer new Royal and Rebel core doll extensions. New product extensions of Disney Princess® Frozen will accompany new short-form content with a new look for Anna and Elsa. In addition, timed to the release of *Cinderella*, there will be a targeted marketing strategy to engage consumers.

In 2015, Hot Wheels will enable children to create and discover new play experiences through new vehicles and track sets, as well as immersive gaming and storytelling. Hot Wheels will continue to allow children to design, create, and customize their track creation by connecting existing tracks with new track pieces using the Track Builder System. In addition, Hot Wheels and Star Wars have come together for the first time to provide unique vehicle experiences for fans of all ages with both Star Wars-inspired cars and authentic replica vehicles. The Entertainment business will include new and innovative products based on CARS, Disney Planes, and Toy Story, as well as products to support Warner Bros. new animated series Batman Unlimited. WWE Wrestling will launch a new customizable line, Create A WWE Superstar, allowing kids to recreate their favorite moments in the ring. For games and puzzles, Mattel will continue offering products of its existing Bounce-off, UNO, and Pictionary® games, as well as celebrate Apples to Apples® 15 anniversary. In 2015, BOOMco will introduce high-performance functionality and new innovations engineered for the blaster-field.

The Fisher-Price Brands category includes Fisher-Price, Little People, BabyGear, Laugh & Learn, Imaginext, Thomas & Friends, Dora the Explorer, Mickey Mouse Clubhouse, Disney Jake and the Never Land Pirates, and Power Wheels.

Fisher-Price will introduce new innovative products for its BabyGear and core toy lines in 2015, including the Smart Connect Swing and Smart Connect Projection Mobile that will allow parents to control the products remotely without having to disturb their babies using Bluetooth technology. Supporting the Laugh & Learn infant

Table of Contents

line, Fisher-Price will introduce BeatBo, a new character that will get babies singing, dancing, and moving along. Also in 2015, Thomas & Friends will celebrate 70 years of friendship with a year's worth of great products and programming. In summer 2015, the first permanent US theme park for Thomas & Friends, located at Edaville USA, will open to the public. Thomas & Friends will continue to be supported with new products, including Turbo Flip Thomas and Trackmaster Shipwreck.

The Construction and Arts & Crafts Brands category includes MEGA BLOKS, RoseArt, and Board Dudes.

MEGA BLOKS will celebrate 30 years of construction in 2015 and will continue to expand its Preschool, Kids, and Collectors portfolios of building sets. MEGA BLOKS junior construction line will partner with Fisher-Price to offer Fisher-Price endorsed First Builders products. In honor of this year's Thomas & Friends DVD release, *Sodor's Legend of the Lost Treasure*, MEGA BLOKS will introduce a range of buildable Thomas construction sets that include motorized features. For boys, the brand will feature new MEGA BLOKS SpongeBob SquarePants and Despicable Me sets, each based on the franchises' 2015 movie releases, *The SpongeBob Movie: Sponge Out of Water* and *Minions*. For girls, the brand will introduce a line of build & display Monster High sets with secret reveals, electronic features, and fully articulated mini-monster figures. The MEGA BLOKS Collectors portfolio will bring highly detailed builds, product features, and micro action figures based on the highly anticipated 2015 releases of Halo®, Call of Duty®, and Assassin's Creed video games. New to the Collectors portfolio this year is the launch of MEGA BLOKS Terminator Genisys construction sets with all-new characters, vehicles, and locations.

International Segment

Products marketed by the International segment are generally the same as those developed and marketed by the North America segment, although some are developed or adapted for particular international markets. Mattel's products are sold directly to retailers and wholesalers in most European, Latin American, and Asian countries, and in Australia and New Zealand, and through agents and distributors in those countries where Mattel has no direct presence.

Mattel's International segment revenue represented 46% of worldwide consolidated gross sales in 2014. Within the International segment, Mattel operates in three regional groups that generated the following gross sales during 2014:

	Amount (In millions, except percentage information)	Percentage of International Gross Sales
Europe	\$ 1,687.1	55%
Latin America	909.4	30%
Asia Pacific	465.0	15%
	\$ 3,061.5	100%

No individual country within the International segment exceeded 6% of worldwide consolidated gross sales during 2014.

The strength of the US dollar relative to other currencies can significantly affect the revenues and profitability of Mattel's international operations. Mattel enters into foreign currency forward exchange contracts, primarily to hedge its purchase and sale of inventory and other intercompany transactions denominated in foreign currencies, to limit the impact of exchange rate fluctuations on its results of operations and cash flows. See Part II, Item 7A Quantitative and Qualitative Disclosures About Market Risk and Part II, Item 8 Financial Statements and Supplementary Data Note 9 to the Consolidated Financial Statements Derivative

Table of Contents

Instruments. For financial information by geographic area, see Part II, Item 8 Financial Statements and Supplementary Data Note 12 to the Consolidated Financial Statements Segment Information.

American Girl Segment

The American Girl segment is a direct marketer, children's publisher, and retailer best known for its flagship line of historical dolls, books, and accessories, as well as the My American Girl and Bitty Baby brands. American Girl also publishes best-selling Advice & Activity books and the award-winning American Girl magazine. In January 2015, American Girl introduced Grace Thomas, the 2015 Girl of the Year doll. American Girl products are sold in the US and Canada. Beginning in summer 2015, American Girl products will also be sold in Mexico.

Manufacturing and Materials

Mattel manufactures toy products for all segments in both company-owned facilities and through third-party manufacturers. Products are also purchased from unrelated entities that design, develop, and manufacture those products. To provide greater flexibility in the manufacture and delivery of its products, and as part of a continuing effort to reduce manufacturing costs, Mattel has concentrated production of most of its core products in company-owned facilities and generally uses third-party manufacturers for the production of non-core products.

Mattel's principal manufacturing facilities are located in Canada, China, Indonesia, Malaysia, Mexico, and Thailand. To help avoid disruption of its product supply due to political instability, civil unrest, economic instability, changes in government policies or regulations, and other risks, Mattel produces its products in multiple facilities across multiple countries. Mattel believes that the existing production capacity at its own and its third-party manufacturers' facilities is sufficient to handle expected volume in the foreseeable future. See Item 1A Risk Factors.

Mattel bases its production schedules for toy products on customer orders and forecasts, taking into account historical trends, results of market research, and current market information. Actual shipments of products ordered and order cancellation rates are affected by consumer acceptance of product lines, strength of competing products, marketing strategies of retailers, changes in buying patterns of both retailers and consumers, and overall economic conditions. Unexpected changes in these factors could result in a lack of product availability or excess inventory in a particular product line.

The majority of Mattel's raw materials are available from numerous suppliers but may be subject to fluctuations in price.

Competition and Industry Background

Mattel is a worldwide leader in the manufacture, marketing, and sale of toys. Competition in the toy industry is based primarily on quality, play value, and price. Mattel offers a diverse range of products for children of all ages and families that include, among others, toys for infants and preschoolers, girls' toys, boys' toys, youth electronics, hand-held and other games, puzzles, educational toys, media-driven products, and fashion-related toys. The North America segment competes with several large toy companies, including Bandai, Hasbro, Jakks Pacific, Leap Frog, Lego, MGA Entertainment, Spin Master, Tomy, and VTech, many smaller toy companies, and several manufacturers of video games and consumer electronics. The International segment competes with global toy companies including Bandai, Hasbro, Lego, MGA Entertainment, Playmobil, Tomy, and VTech, other national and regional toy companies, and manufacturers of video games and consumer electronics. Foreign regions may include competitors that are strong in a particular toy line or geographical area but do not compete with Mattel or other international toy companies worldwide. The American Girl segment competes with companies that manufacture girls' toys and with children's book publishers and retailers.

Table of Contents

Competition among the above companies is intensifying due to recent trends towards shorter life cycles for individual toy products and an increasing use of high technology in toys. In addition, as a result of the phenomenon of children getting older younger resulting from children outgrowing toys at younger ages, Mattel competes with companies that sell products outside the toy aisle, such as electronic consumer products and video games. Competition continues to be heavily influenced by the fact that a small number of retailers account for a large portion of all toy sales, allocate the shelf space from which toys are viewed, and have direct contact with parents and children through in-store purchases, coupons, and print advertisements. Such retailers can and do promote their own private-label toys, facilitate the sale of competitors' toys, and allocate shelf space to one type of toy over another. Competition is also intensifying due to the availability of online-only distributors, including Amazon.com, which are able to promote a wide variety of toys and represent a wide variety of toy manufacturers, and, with limited overhead, do so at a lower cost.

Seasonality

Mattel's business is highly seasonal, with consumers making a large percentage of all toy purchases during the traditional holiday season. A significant portion of Mattel's customers' purchasing occurs in the third and fourth quarters of Mattel's fiscal year in anticipation of holiday buying. These seasonal purchasing patterns and requisite production lead times create risk to Mattel's business associated with the underproduction of popular toys and the overproduction of less popular toys that do not match consumer demand. Retailers have also been attempting to manage their inventories more tightly in recent years, requiring Mattel to ship products closer to the time the retailers expect to sell the products to consumers. These factors increase the risk that Mattel may not be able to meet demand for certain products at peak demand times or that Mattel's own inventory levels may be adversely impacted by the need to pre-build products before orders are placed. Additionally, as retailers manage their inventories, Mattel experiences cyclical ordering patterns for products and product lines that may cause its sales to vary significantly from period to period.

In anticipation of retail sales in the traditional holiday season, Mattel significantly increases its production in advance of the peak selling period, resulting in a corresponding build-up of inventory levels in the first three quarters of its fiscal year. Seasonal shipping patterns result in significant peaks in the third and fourth quarters in the respective levels of inventories and accounts receivable, which result in seasonal working capital financing requirements. See Part II, Item 8 Financial Statements and Supplementary Data Note 5 to the Consolidated Financial Statements Seasonal Financing and Debt.

Product Design and Development

Through its product design and development group, Mattel regularly refreshes, redesigns, and extends existing toy product lines and develops innovative new toy product lines for all segments. Mattel believes its success is dependent on its ability to continue these activities effectively. See Item 1A Risk Factors. Product design and development activities are principally conducted by a group of professional designers and engineers employed by Mattel. During 2014, 2013, and 2012, Mattel incurred expenses of \$209.5 million, \$201.9 million, and \$195.1 million, respectively, in connection with the design and development of products, exclusive of royalty payments. See Part II, Item 8 Financial Statements and Supplementary Data Note 13 to the Consolidated Financial Statements Supplemental Financial Information.

Additionally, independent toy designers and developers bring concepts and products to Mattel and are generally paid a royalty on the net selling price of products licensed to Mattel. These independent toy designers may also create different products for other toy companies.

Advertising and Marketing

Mattel supports its product lines with extensive advertising and consumer promotions. Advertising takes place at varying levels throughout the year and peaks during the traditional holiday season. Advertising includes

Table of Contents

television and radio commercials, magazine, newspaper, and internet advertisements, and social media. Promotions include in-store displays, sweepstakes, merchandising materials, and major events focusing on products and tie-ins with various consumer products companies.

During 2014, 2013, and 2012, Mattel incurred expenses of \$733.2 million (12.2% of net sales), \$750.2 million (11.6% of net sales), and \$717.8 million (11.2% of net sales), respectively, for advertising and promotion.

Sales

Mattel's products are sold throughout the world. Products within the North America segment are sold directly to retailers, including discount and free-standing toy stores, chain stores, department stores, other retail outlets, and, to a limited extent, wholesalers. Mattel also operates several small retail outlets, generally near or at its corporate headquarters and distribution centers as a service to its employees and as an outlet for its products. Products within the International segment are sold directly to retailers and wholesalers in most European, Latin American, and Asian countries, and in Australia and New Zealand, and through agents and distributors in those countries where Mattel has no direct presence. Mattel also has retail outlets in Latin America and Europe that serve as outlets for its products. American Girl products are sold directly to consumers, and its children's publications are also sold to certain retailers. Mattel has eighteen American Girl retail stores: American Girl Place in Chicago, Illinois, Los Angeles, California, and New York, New York, and American Girl stores in Alpharetta, Georgia, Bloomington, Minnesota, Charlotte, North Carolina, Chesterfield, Missouri, Columbus, Ohio, Dallas, Texas, Houston, Texas, Lone Tree, Colorado, Lynnwood, Washington, McLean, Virginia, Miami, Florida, Natick, Massachusetts, Orlando, Florida, Overland Park, Kansas, and Palo Alto, California, each of which features children's products from the American Girl segment. American Girl also has a retail outlet in Oshkosh, Wisconsin that serves as an outlet for its products. Mattel also plans to open retail stores in Nashville, Tennessee and Scottsdale, Arizona in 2015. Additionally, Mattel sells certain of its products online through websites of one or more of its subsidiaries.

During 2014, Mattel's three largest customers (Wal-Mart at \$1.1 billion, Toys R Us at \$0.6 billion, and Target at \$0.5 billion) accounted for approximately 35% of worldwide consolidated net sales. Within countries in the International segment, there is also a concentration of sales to certain large customers that do not operate in the US, none of which exceed 10% of net sales. The customers and the degree of concentration vary depending upon the region or nation. See Item 1A Risk Factors and Part II, Item 8 Financial Statements and Supplementary Data Note 12 to the Consolidated Financial Statements Segment Information.

Licenses and Distribution Agreements

Mattel has license agreements with third parties that permit Mattel to utilize the trademark, characters, or inventions of the licensor in products that Mattel sells. A number of these licenses relate to product lines that are significant to Mattel's business and operations.

Mattel has entered into agreements to license entertainment properties from, among others, Disney Enterprises, Inc. (including ©Disney characters such as Mickey Mouse, Disney Princess, Jake and the Never Land Pirates, Planes, CARS and Toy Story from Pixar, and certain Disney films and television properties), Viacom International, Inc. relating to its Nickelodeon® properties (including Dora the Explorer, and SpongeBob SquarePants), Warner Bros. Consumer Products (including Batman, Superman®, and Justice League®), and WWE Wrestling.

Royalty expense for 2014, 2013, and 2012 was \$242.4 million, \$246.9 million, and \$240.2 million, respectively. See Commitments and Part II, Item 8 Financial Statements and Supplementary Data Note 11 to the Consolidated Financial Statements Commitments and Contingencies.

Table of Contents

Mattel's license agreement with Disney Enterprises, Inc. for the global rights to produce and sell toys based on Disney Princess characters is scheduled to expire at the end of 2015 and will not be renewed.

Mattel also licenses a number of its trademarks and other property rights to others for use in connection with the sale of their products. Mattel distributes some third-party finished products that are independently designed and manufactured.

Trademarks, Copyrights and Patents

Most of Mattel's products are sold under trademarks, trade names, and copyrights, and a number of these products incorporate patented devices or designs. Trademarks, copyrights, and patents are significant assets of Mattel in that they provide product recognition and acceptance worldwide.

Mattel customarily seeks trademark, copyright, and patent protection covering its products, and it owns or has applications pending for US and foreign trademarks, copyrights, and patents covering many of its products. A number of these trademarks, copyrights, and patents relate to product lines that are significant to Mattel's business and operations. Mattel believes its rights to these properties are adequately protected, but there can be no assurance that its rights can be successfully asserted in the future or will not be invalidated, circumvented, or challenged.

Commitments

In the normal course of business, Mattel enters into contractual arrangements for future purchases of goods and services to ensure availability and timely delivery and to obtain and protect Mattel's right to create and market certain products. Certain of these commitments routinely contain provisions for guarantees or minimum expenditures during the term of the contracts. Current and future commitments for guaranteed payments reflect Mattel's focus on expanding its product lines through alliances with businesses in other industries. Additionally, Mattel routinely enters into noncancelable lease agreements for premises and equipment used in the normal course of business.

Agreements to purchase inventory, services, and other items with terms extending through 2018 contain future minimum payments totaling approximately \$387 million. Licensing and similar agreements with terms extending through 2019 and beyond contain provisions for future guaranteed minimum payments totaling approximately \$285 million. Operating lease commitments with terms extending through 2019 and beyond contain future minimum obligations totaling approximately \$520 million. See Part II, Item 7 Management's Discussion and Analysis of Financial Condition and Results of Operations Commitments and Part II, Item 8 Financial Statements and Supplementary Data Note 11 to the Consolidated Financial Statements Commitments and Contingencies.

Backlog

Mattel ships products in accordance with delivery schedules specified by its customers, which usually request delivery within three months. In the toy industry, orders are subject to cancellation or change at any time prior to shipment. In recent years, a trend toward just-in-time inventory practices in the toy industry has resulted in fewer advance orders and therefore less backlog of orders. Mattel believes that the amount of backlog orders at any given time may not accurately indicate future sales.

Financial Instruments

Currency exchange rate fluctuations may impact Mattel's results of operations and cash flows. Mattel seeks to mitigate its exposure to market risk by monitoring its foreign currency transaction exposure for the year and partially hedging such exposure using foreign currency forward exchange contracts primarily to hedge its

Table of Contents

purchase and sale of inventory and other intercompany transactions denominated in foreign currencies. These contracts generally have maturity dates of up to 18 months. In addition, Mattel manages its exposure to currency exchange rate fluctuations through the selection of currencies used for international borrowings. Mattel does not trade in financial instruments for speculative purposes.

For additional information regarding foreign currency contracts, see International Segment above, Part II, Item 7A Quantitative and Qualitative Disclosures About Market Risk, and Part II, Item 8 Financial Statements and Supplementary Data Note 9 to the Consolidated Financial Statements Derivative Instruments.

Seasonal Financing

See Part II, Item 8 Financial Statements and Supplementary Data Note 5 to the Consolidated Financial Statements Seasonal Financing and Debt.

Government Regulations and Environmental Quality

Mattel's products sold in the US are subject to the provisions of the Consumer Product Safety Act, as amended by the Consumer Product Safety Improvement Act of 2008, the Federal Hazardous Substances Act, and the Consumer Product Safety Improvement Act of 2008, and may also be subject to the requirements of the Flammable Fabrics Act or the Food, Drug, and Cosmetics Act and the regulations promulgated pursuant to such statutes. These statutes and the related regulations ban from the market consumer products that fail to comply with applicable product safety laws, regulations, and standards. The Consumer Product Safety Commission may require the recall, repurchase, replacement, or repair of any such banned products or products that otherwise create a substantial risk of injury and may seek penalties for regulatory noncompliance under certain circumstances. Similar laws exist in some US states. Mattel believes that it is in substantial compliance with these federal and state laws and regulations.

Mattel's products sold worldwide are subject to the provisions of similar laws and regulations in many jurisdictions, including the European Union and Canada. Mattel believes that it is in substantial compliance with these laws and regulations.

Mattel maintains a quality control program to help ensure compliance with applicable product safety requirements. Nonetheless, Mattel has experienced, and may in the future experience, issues in products that result in recalls, withdrawals, or replacements of products. A product recall could have a material adverse effect on Mattel's results of operations and financial condition, depending on the product affected by the recall and the extent of the recall efforts required. A product recall could also negatively affect Mattel's reputation and the sales of other Mattel products. See Item 1A Risk Factors.

Mattel's advertising is subject to the Federal Trade Commission Act, The Children's Television Act of 1990, the rules and regulations promulgated by the Federal Trade Commission, and the Federal Communications Commission, as well as laws of certain countries that regulate advertising and advertising to children. In addition, Mattel's online and other digital communications activity are or may be subject to US and foreign privacy-related regulations, including the US Children's Online Privacy Protection Act of 1998 and the EU Data Protection Directive (Directive 95/46/EC) and related national regulations. Mattel believes that it is in substantial compliance with these laws and regulations.

Mattel's worldwide operations are subject to the requirements of various environmental laws and regulations in the jurisdictions where those operations are located. Mattel believes that it is in substantial compliance with those laws and regulations. Mattel's operations are from time to time the subject of investigations, conferences, discussions, and negotiations with various federal, state and local environmental agencies within and outside the US with respect to the discharge or cleanup of hazardous waste. Mattel is not aware of any material cleanup liabilities.

Table of Contents

Mattel is subject to various other federal, state, local and international laws and regulations applicable to its business. Mattel believes that it is in substantial compliance with these laws and regulations.

Employees

The total number of persons employed by Mattel and its subsidiaries at any one time varies because of the seasonal nature of its manufacturing operations. As of December 31, 2014, Mattel's total number of employees was approximately 31,000.

Executive Officers of the Registrant

The current executive officers of Mattel, all of whom are appointed annually by and serve at the pleasure of the Board of Directors, are as follows:

Name	Age	Position	Executive Officer Since
Christopher A. Sinclair	64	Chairman of the Board and Interim Chief Executive Officer	2015
Richard Dickson	47	President, Chief Brands Officer	2014
Kevin M. Farr	57	Chief Financial Officer	1996
Peter D. Gibbons	53	Executive Vice President, Chief Supply Chain Officer	2013
Alan Kaye	61	Executive Vice President, Chief Human Resources Officer	2000
Timothy J. Kilpin	54	President, Chief Commercial Officer	2011
Jean A. McKenzie	55	Executive Vice President of Mattel and President, American Girl	2013
Robert Normile	55	Executive Vice President, Chief Legal Officer and Secretary	1999
Mandana Sadigh	55	Senior Vice President and Corporate Treasurer	2010
H. Scott Topham	54	Senior Vice President and Corporate Controller	2004
Geoffrey H. Walker	49	Executive Vice President, Global Brands Team Fisher-Price	2013

Mr. Sinclair has been Chairman of the Board and Interim Chief Executive Officer since January 2015 and a member of the Board of Directors since 1996. Prior to assuming the role of Chairman of the Board and Interim Chief Executive Officer, Mr. Sinclair served as the Independent Lead Director and Chairman of the Audit Committee of the Board of Directors since 2011. From 2002 to 2008, he served as Executive Chairman of Scandent Holdings, an information technology investment company. From 2005 to 2009, he also served as Executive Chairman of Cambridge Solutions Corporation Ltd., a leader in providing information technology and business process outsourcing services. He also served as a Managing Director of Manticore Partners, LLC, a venture capital advisory firm, from 2000 to 2005, as an Operating Partner of Pegasus Capital Advisors, LP, a private equity firm, from 2000 to 2002 and as Chairman of the Board and Chief Executive Officer of Caribiner International, Inc. from 1999 to 2000. Earlier, he served as President and Chief Executive Officer of Quality Food, Inc., Chairman and Chief Executive Officer of Pepsi-Cola Company and President and Chief Executive Officer of PepsiCo Foods & Beverages International and Pepsi-Cola International for more than five years.

Mr. Dickson has been President, Chief Brands Officer since January 2015. From May 2014 to January 2015, he served as Chief Brands Officer. From February 2010 to May 2014, he served as President and CEO of Branded Businesses at The Jones Group, Inc. From August 2008 to February 2010, he served as General Manager and Senior Vice President of Barbie at Mattel. From 2000 to 2008, he was Senior Vice President at

Table of Contents

Mattel overseeing Consumer Products, Marketing, Media, Entertainment and Packaging. Prior to Mattel, he served as Vice President of Brand Management and Merchandising at Estee Lauder Companies, Inc. and was principal with Gloss.com, an e-commerce beauty website he helped develop and manage until its acquisition by Estee Lauder. Mr. Dickson started his career and spent nearly a decade with Bloomingdale's, a leading US fashion retailer.

Mr. Farr has been Chief Financial Officer since February 2000. From September 1996 to February 2000, he was Senior Vice President and Corporate Controller. From June 1993 to September 1996, he served as Vice President, Tax. Prior to that, he served as Senior Director, Tax from August 1992 to June 1993.

Mr. Gibbons has been Executive Vice President and Chief Supply Chain Officer since January 2015. From April 2013 to January 2015, he served as Executive Vice President, Global Supply Chain. From July 2008 to November 2012, he served as Executive Vice President, Global Supply Chain Operations at Starbucks Corporation. From February 2007 to July 2008 he served as Senior Vice President, Global Manufacturing Operations, at Starbucks Corporation. From March 1999 to February 2007, he was Executive Vice President, Supply Chain, for the Glidden Company, a subsidiary of ICI Americas, Inc., a global chemical company. Prior to that, he held various roles in operations, finance and engineering with ICI plc in Europe and Latin America and the Scottish Development Agency.

Mr. Kaye has been Executive Vice President and Chief Human Resources Officer, since February 2011 and from July 1997 to February 2011 he was Senior Vice President, Human Resources. From June 1996 to June 1997 he was President, Texas Division of Kaufman and Broad Homes, a home building company. From June 1991 to June 1996, he served as Senior Vice President, Human Resources for Kaufman and Broad Homes. Prior to that, he worked for two years with the Hay Group, a compensation consulting firm and for 12 years with IBM in various human resources positions.

Mr. Kilpin has been President, Chief Commercial Officer since January 2015. From May 2014 to January 2015, he served as Executive Vice President, International. From February 2011 to May 2014, he served as Executive Vice President, Global Brands Team Boys & Girls. From February 2010 to February 2011, he served as General Manager and Senior Vice President, Mattel Brands El Segundo. Mr. Kilpin served as General Manager and Senior Vice President for the Girls, Boys and Games groups from November 2008 to February 2010 and for the Boys group from October 2005 to November 2008. Prior to rejoining Mattel as a Senior Vice President, Marketing in 2003, he was Executive Vice President of Studio Franchise Management at The Walt Disney Company. Mr. Kilpin first joined Mattel in August 1984 and until October 1999, held various marketing positions, culminating as Executive Vice President and General Manager of the then Character Brands business unit.

Ms. McKenzie has been President of American Girl since January 2013 and also served as Executive Vice President of Mattel since September 2012. Prior to re-joining Mattel in October 2011 as Senior Vice President, Marketing, she was Senior Vice President for The Walt Disney Company from 2007 to 2010 and President and Chief Executive Officer of Gateway Learning Corporation from 1999 to 2005. From 1989 to 1998, Ms. McKenzie served in various executive positions at Mattel working on the Barbie brand, most recently as Executive Vice President and General Manager of Worldwide Barbie.

Mr. Normile has been Executive Vice President, Chief Legal Officer and Secretary since February 2011, and from March 1999 to February 2011 he was Senior Vice President, General Counsel and Secretary. He served as Vice President, Associate General Counsel and Secretary from August 1994 to March 1999. From June 1992 to August 1994, he served as Assistant General Counsel. Prior to that, he was associated with the law firms of Latham & Watkins LLP and Sullivan & Cromwell LLP.

Ms. Sadigh has been Senior Vice President and Corporate Treasurer since November 2010. She served as Senior Vice President, Mattel Brands Finance and Strategy from October 2005 to November 2010. From January 2001 to October 2005, she served as Senior Vice President in various leadership roles, including Corporate

Table of Contents

Strategic Planning, Sales Strategy, and International Finance. From December 1999 until January 2001, she served as Vice President and Assistant Controller. Prior to that, she served from August 1991 to December 1999 in Corporate Finance positions. Prior to joining Mattel, Ms. Sadigh spent eight years in the banking industry.

Mr. Topham has been Senior Vice President and Corporate Controller since September 2005. He served as Senior Vice President and Treasurer from March 2005 to August 2005 and as Vice President and Treasurer from March 2004 to March 2005. Prior to that, he served as Vice President and Assistant Controller from May 2001 to March 2004. From August 2000 to May 2001, he served as Vice President and Treasurer of Premier Practice Management, Inc. From June 1999 to August 2000, he served as Division Vice President of Dataworks, Inc., a specialized publishing company. Prior to that, he spent eight years with Total Petroleum (North America) Ltd., most recently as Vice President of Human Resources.

Mr. Walker has been Executive Vice President, Global Brands Teams Fisher-Price since April 2013. From January 2011 to April 2013, he served as Senior Vice President and General Manager of Mattel's European businesses. From October 2010 through December 2010, he served as Senior Vice President Global Core Brands Marketing Strategy. From August 2008 to October 2010, he served as Senior Vice President Marketing. Mr. Walker held a variety of roles within the Mattel marketing organization from December 2000 to August 2008. Starting with Mattel in July 1995, Mr. Walker has held a variety of brand management positions within the Wheels, Entertainment and Games divisions.

Available Information

Mattel files its Annual Report on Form 10-K, Quarterly Reports on Form 10-Q, Current Reports on Form 8-K, Proxy Statements and amendments to those reports filed or furnished pursuant to Section 13(a) or 15(d) of the Securities Exchange Act of 1934 (the Exchange Act) with the SEC. The public may read and copy any materials that Mattel files with the SEC at the SEC's Public Reference Room at 100 F Street, NE, Washington, DC 20549. The public may obtain information on the operation of the Public Reference Room by calling the SEC at 1-800-SEC-0330. The SEC maintains an Internet website that contains reports, proxy and other information regarding issuers that file electronically with the SEC at <http://www.sec.gov>.

Mattel's Internet website address is <http://corporate.mattel.com>. Mattel makes available on its Internet website, free of charge, its Annual Report on Form 10-K, Quarterly Reports on Form 10-Q, Current Reports on Form 8-K, Proxy Statements and amendments to those reports filed or furnished pursuant to Section 13(a) or 15(d) of the Exchange Act as soon as reasonably practicable after such materials are electronically filed with, or furnished to, the SEC.

Item 1A. Risk Factors.

(Cautionary Statement Under the Private Securities Litigation Reform Act of 1995)

Mattel is including this Cautionary Statement to make applicable and take advantage of the safe harbor provisions of the Private Securities Litigation Reform Act of 1995 (the Act) for forward-looking statements. This Annual Report on Form 10-K includes forward-looking statements within the meaning of the Act. Forward-looking statements can be identified by the fact that they do not relate strictly to historical or current facts. They often include words such as believes, expects, anticipates, estimates, intends, plans, seeks or words of similar meaning, or conditional verbs, such as will, should, could, may, aims, intends, or projects. A forward-looking statement is neither a prediction nor a guarantee of future events or circumstances, and those future events or circumstances may not occur. Investors should not place undue reliance on the forward-looking statements, which speak only as of the date of this Annual Report on Form 10-K. These forward-looking statements are all based on currently available operating, financial, economic and competitive information and are subject to various risks and uncertainties. The Company's actual future results and trends may differ materially depending on a variety of factors, including, but not limited to, the risks and uncertainties discussed below. Mattel expressly disclaims any obligation to update or revise any forward-looking statement, whether as a result of new developments or otherwise.

Table of Contents

If Mattel does not successfully identify or satisfy consumer preferences, its results of operations may be adversely affected.

Mattel's business and operating results depend largely upon the appeal of its toy products. Consumer preferences, particularly with children as the end users of Mattel's products, are continuously changing. Significant, sudden shifts in demand are caused by hit toys and trends, which are often unpredictable. Mattel offers a diverse range of products for children of all ages and families that includes, among others, toys for infants and preschoolers, girls' toys, boys' toys, youth electronics, digital media, hand-held and other games, puzzles, educational toys, media-driven products, and fashion-related toys. Mattel competes domestically and internationally with a wide range of large and small manufacturers, marketers and sellers of toys, video games, consumer electronics such as tablets and mobile devices, and other play products, as well as retailers, which means that Mattel's market position is always at risk. Mattel's ability to maintain its current product sales, and increase its product sales or establish product sales with new, innovative toys, will depend on Mattel's ability to satisfy play preferences, enhance existing products, develop and introduce new products, and achieve market acceptance of these products. These challenges are intensifying due to recent trends towards shorter life cycles for individual toy products, the phenomenon of children outgrowing traditional toys at younger ages, and an increasing use of more sophisticated technology in toys. If Mattel does not successfully meet the challenges outlined above in a timely and cost-effective manner, demand for its products could decrease, and Mattel's revenues, profitability and results of operations may be adversely affected.

High levels of competition and low barriers to entry make it difficult to achieve, maintain, or build upon the success of Mattel's brands, products, and product lines.

Mattel faces competitors who are also constantly monitoring and attempting to anticipate consumer tastes, seeking ideas which will appeal to consumers and introducing new products that compete with Mattel's products. In addition, competition for access to entertainment properties could lessen Mattel's ability to secure, maintain, and renew popular licenses to entertainment products developed by other parties and licensed to Mattel or require Mattel to pay licensors higher royalties and higher minimum guaranteed payments in order to obtain or retain these licenses. In addition, the barriers to entry for new participants in the toy products industry are low. In a very short period of time, new market participants with a popular product idea or entertainment property can become a significant source of competition for Mattel and its products. If demand for Mattel's brands, products and product lines is reduced as a result of these factors, Mattel's results of operations may be adversely affected.

Inaccurately anticipating changes and trends in popular culture, media and movies, fashion, or technology can negatively affect Mattel's sales.

Successful movies and characters in children's literature affect play preferences, and many toys depend on media-based intellectual property licenses. Media-based licenses can cause a line of toys to gain immediate success among children, parents, or families. Trends in media, movies, and children's characters change swiftly and contribute to the transience and uncertainty of play preferences. In addition, certain developments in the entertainment industry, including labor strikes, could cause delay or interruption in the release of new movies and television programs and could adversely affect the sales of Mattel's toys based on such movies and television programs. Mattel responds to such trends and developments by modifying, refreshing, extending, and expanding its product offerings on an annual basis. If Mattel does not accurately anticipate trends in popular culture, movies, media, fashion, or technology, its products may not be accepted by children, parents, or families and Mattel's revenues, profitability, and results of operations may be adversely affected.

Mattel's failure to successfully market or advertise its products could have an adverse effect on Mattel's business, financial condition, and results of operations.

Mattel's products are marketed worldwide through a diverse spectrum of advertising and promotional programs. Mattel's ability to sell products is dependent in part upon the success of these programs. If Mattel does not successfully market its products or if media or other advertising or promotional costs increase, these factors could have an adverse effect on Mattel's business, financial condition, and results of operations.

Table of Contents

Mattel's business is highly seasonal and its operating results depend, in large part, on sales during the relatively brief traditional holiday season. Any events that disrupt Mattel's business during its peak demand times could significantly, adversely and disproportionately affect Mattel's business.

Mattel's business is subject to risks associated with the underproduction of popular toys and the overproduction of toys that are less popular with consumers. Sales of toy products at retail are highly seasonal, with a majority of retail sales occurring during the period from September through December. In recent years, many consumers have delayed their purchases until just before the holidays. As a result, Mattel's operating results depend, in large part, on sales during the relatively brief traditional holiday season. Retailers attempt to manage their inventories tightly, which requires Mattel to ship products closer to the time the retailers expect to sell the products to consumers. This in turn results in shorter lead times for production. Management believes that the recent increase in last minute shopping during the holiday season and the popularity of gift cards (which often shift purchases to after the holiday season) may negatively impact customer re-orders during the holiday season. These factors may decrease sales or increase the risks that Mattel may not be able to meet demand for certain products at peak demand times or that Mattel's own inventory levels may be adversely impacted by the need to pre-build products before orders are placed.

In addition, as a result of the seasonal nature of Mattel's business, Mattel may be significantly and adversely affected, in a manner disproportionate to the impact on a company with sales spread more evenly throughout the year, by unforeseen events, such as terrorist attacks, economic shocks, severe weather, earthquakes or other catastrophic events, that harm the retail environment or consumer buying patterns during its key selling season, or by events, such as strikes, disruptions in transportation or port delays, that interfere with the manufacture or shipment of goods during the critical months leading up to the holiday purchasing season.

Mattel has significant customer concentration, so that economic difficulties or changes in the purchasing policies or patterns of its key customers could have a significant impact on Mattel's business and operating results.

A small number of customers account for a large share of Mattel's net sales. In 2014, Mattel's three largest customers, Wal-Mart, Toys 'R Us, and Target, in the aggregate, accounted for approximately 35% of net sales, and its ten largest customers, in the aggregate, accounted for approximately 45% of net sales. While the concentration of Mattel's business with a relatively small number of customers may provide certain benefits to Mattel, such as potentially more efficient product distribution and decreased costs of sales and distribution, this concentration may expose Mattel to a material adverse effect if one or more of Mattel's large customers were to significantly reduce purchases for any reason, favor competitors or new entrants, or increase their direct competition with Mattel by expanding their private-label business. Customers make no binding long-term commitments to Mattel regarding purchase volumes and make all purchases by delivering one-time purchase orders. Any customer could reduce its overall purchases of Mattel's products, reduce the number and variety of Mattel's products that it carries and the shelf space allotted for Mattel's products, or otherwise seek to materially change the terms of the business relationship at any time. Any such change could significantly harm Mattel's business and operating results.

Liquidity problems or bankruptcy of Mattel's key customers could have a significant adverse effect on Mattel's business, financial condition and results of operations.

Mattel's sales to customers are typically made on credit without collateral. There is a risk that key customers will not pay, or that payment may be delayed, because of bankruptcy, contraction of credit availability to such customers, weak retail sales or other factors beyond the control of Mattel, which could increase Mattel's exposure to losses from bad debts. In addition, if key customers were to cease doing business as a result of bankruptcy or significantly reduce the number of stores operated, it could have a significant adverse effect on Mattel's business, financial condition, and results of operations.

Table of Contents

Significant increases in the price of commodities, transportation, or labor, if not offset by declines in other input costs, or a reduction or interruption in the delivery of raw materials, components and finished products from Mattel's vendors could negatively impact Mattel's financial results.

Cost increases, whether resulting from rising costs of materials, transportation, services, labor or compliance with existing or future regulatory requirements could impact the profit margins realized by Mattel on the sale of its products. Because of market conditions, timing of pricing decisions, and other factors, there can be no assurance that Mattel will be able to offset any of these increased costs by adjusting the prices of its products. Increases in prices of Mattel's products may not be sustainable and could result in lower sales. Mattel's ability to meet customer demand depends, in part, on its ability to obtain timely and adequate delivery of materials, parts and components from its suppliers and internal manufacturing capacity. Mattel has experienced shortages in the past, including shortages of raw materials and components. Additionally, as Mattel cannot guarantee the stability of its major suppliers, major suppliers may stop manufacturing components at any time with little or no notice. If Mattel is required to use alternative sources, it may be required to redesign some aspects of the affected products, which may involve delays and additional expense. Although Mattel works closely with suppliers to avoid these types of shortages, there can be no assurance that Mattel will not encounter these problems in the future. A reduction or interruption in supplies or in the delivery of finished products, whether resulting from more stringent regulatory requirements, disruptions in transportation, port delays, labor strikes, lockouts, an outbreak of a severe public health pandemic, severe weather, the occurrence or threat of wars or other conflicts, or a significant increase in the price of one or more supplies, such as fuel or resin (which is an oil-based product used in plastics), or otherwise, could negatively impact Mattel's financial results.

Significant changes in currency exchange rates or the ability to transfer capital across borders could have a significant adverse effect on Mattel's business and results of operations.

Mattel operates facilities and sells products in numerous countries outside the United States. During 2014, Mattel's net sales to international customers comprised 47% of Mattel's total consolidated net sales. Furthermore, Mattel's net investment in its foreign subsidiaries and its results of operations and cash flows are subject to changes in currency exchange rates and regulations. Highly inflationary economies of certain foreign countries can result in foreign currency devaluation, which negatively impacts Mattel's profitability. Mattel seeks to mitigate the exposure of its results of operations to fluctuations in currency exchange rates by aligning its prices with the local currency cost of acquiring inventory, distributing earnings in US Dollars, and partially hedging this exposure using foreign currency forward exchange contracts. These contracts are primarily used to hedge Mattel's purchase and sale of inventory, and other intercompany transactions denominated in foreign currencies. Government action may restrict Mattel's ability to transfer capital across borders and may also impact the fluctuation of currencies in the countries where Mattel conducts business or has invested capital. Significant changes in currency exchange rates, reductions in Mattel's ability to transfer its capital across borders, and changes in government-fixed currency exchange rates, including the Chinese yuan and Venezuelan bolivar fuerte, could have a significant adverse effect on Mattel's business and results of operations.

If global economic conditions deteriorate, Mattel's business and financial results could be adversely affected.

Mattel designs, manufactures, and markets a wide variety of toy products worldwide through sales to retailer customers and directly to consumers. Mattel's performance is impacted by the level of discretionary consumer spending, which remains relatively weak in the United States and in many countries around the world in which Mattel does business. Consumers' discretionary purchases of toy products may be impacted by job losses, foreclosures, bankruptcies, reduced access to credit, significantly falling home prices, lower consumer confidence, and other macroeconomic factors that affect consumer spending behavior. Any of these factors can reduce the amount which consumers spend on the purchase of Mattel's products. Deterioration of global economic conditions or disruptions in credit markets in the markets in which Mattel operates could potentially have a material adverse effect on Mattel's liquidity and capital resources, including increasing Mattel's cost of capital or its ability to raise additional capital if needed, or otherwise adversely affect Mattel's business and financial results.

Table of Contents

In addition to experiencing potentially lower revenues during times of economic difficulty, in an effort to maintain sales during such times, Mattel may need to increase promotional spending or take other steps to encourage retailer and consumer purchase of its products. Those steps may increase costs and/or decrease operating margins.

Failure to successfully implement new initiatives or meet product introduction schedules could have a significant adverse effect on Mattel's business, financial condition and results of operations.

Mattel has announced, and in the future may announce, initiatives to reduce its costs, increase its efficiency, improve the execution of its core business, globalize and extend Mattel's brands, catch new trends, create new brands, and offer new innovative products, enhance product safety, develop people, improve productivity, simplify processes, maintain customer service levels, as well as initiatives designed to drive sales growth, capitalize on Mattel's scale advantage, and improve its supply chain. These initiatives involve investment of capital and complex decision-making as well as extensive and intensive execution, and the success of these initiatives is not assured. In addition, Mattel may anticipate introducing a particular product, product line or brand at a certain time in the future. There is no guarantee that Mattel will be able to manufacture, source and ship new or continuing products in a timely manner and on a cost-effective basis. Unforeseen delays or difficulties in the development process or significant increases in the planned cost of development for new Mattel products may cause the introduction date for products to be later than anticipated or, in some situations, may cause a product or new product introduction to be discontinued. Failure to successfully implement any of these initiatives, or launches, or the failure of any of these initiatives or launches to produce the results anticipated by management, could have a significant adverse effect on Mattel's business, financial condition, and results of operations.

Mattel's business depends in large part on the success of its vendors and outsourcers, and Mattel's brands and reputation may be harmed by actions taken by third-parties that are outside Mattel's control. In addition, any material failure, inadequacy, or interruption resulting from such vendors or outsourcings could harm Mattel's ability to effectively operate its business.

As a part of its efforts to cut costs, achieve better efficiencies and increase productivity and service quality, Mattel relies significantly on vendor and outsourcing relationships with third parties for services and systems including manufacturing, transportation, logistics and information technology. Any shortcoming of a Mattel vendor or outsourcer, particularly an issue affecting the quality of these services or systems, may be attributed by customers to Mattel, thus damaging Mattel's reputation, and brand value, and potentially affecting its results of operations. In addition, problems with transitioning these services and systems to or operating failures with these vendors and outsourcers could cause delays in product sales, and reduce efficiency of Mattel's operations, and significant capital investments could be required to remediate the problem.

Increases in interest rates, reduction of Mattel's credit ratings, contraction of credit availability, or the inability of Mattel to meet the debt covenant requirements in its credit facilities could negatively impact Mattel's ability to conduct its operations.

Mattel relies on external financing, including commercial paper and borrowings under its domestic unsecured committed revolving credit facility, to help fund its seasonal working capital needs. Increases in interest rates, both domestically and internationally, could negatively affect Mattel's cost of financing its operations. Any reduction in Mattel's credit ratings could increase the cost of obtaining financing. Mattel may be hindered from obtaining, or incur additional costs to obtain, additional credit in tight credit markets. Additionally, Mattel's ability to issue long-term debt and obtain seasonal financing could be adversely affected by factors such as market conditions and an inability to meet its debt covenant requirements, which include maintaining certain financial ratios. Mattel's ability to conduct its operations could be negatively impacted should these or other adverse conditions affect its ability to access these sources of liquidity.

Table of Contents

If Mattel is not able to adequately protect its proprietary intellectual property and information, and protect against third party claims that Mattel is infringing on their intellectual property rights, its results of operations could be adversely affected.

The value of Mattel's business depends on its ability to protect its intellectual property and information, including its trademarks, trade names, copyrights, patents and trade secrets, in the US and around the world, as well as its customer, employee, and consumer data. The steps Mattel has taken may not prevent unauthorized use of its intellectual property, particularly in foreign countries where the laws may not protect its intellectual property as fully as in the US. Mattel may need to resort to litigation to protect its intellectual property rights, which could result in substantial costs and diversion of resources. If Mattel fails to protect its proprietary intellectual property and information, including any successful challenge to Mattel's ownership of its intellectual property or material infringements of its intellectual property, this failure could have a significant adverse effect on Mattel's business, financial condition, and results of operations.

Mattel has acquired certain intellectual properties from third parties. Declines in the profitability of these acquired brands may impact Mattel's ability to recover the carrying value of the related assets and could result in an impairment charge. Reduction in net earnings caused by impairment charges could harm Mattel's financial results.

Unfavorable resolution of or adverse developments in legal proceedings, other investigations, or regulatory matters could have a significant adverse effect on Mattel's financial condition.

Mattel periodically receives claims of infringement of intellectual property rights held by other parties. Responding to any infringement claim, regardless of its validity, may be costly and time-consuming and may divert management and key personnel from business operations. If Mattel, its distributors, its licensors or its manufacturers are found to be infringing on the intellectual property rights of any third party, they may be required to obtain a license to use those rights, which may not be obtainable on reasonable terms, if at all.

Mattel is, from time to time, involved in litigation or other disputes, investigations, and regulatory matters. An unfavorable resolution of these matters could have a significant adverse effect on Mattel's financial condition and its operations. Regardless of their outcome, these matters may result in substantial costs and expenses, significantly divert the attention of management, or interrupt Mattel's normal business operations. There can be no assurance that Mattel will be able to prevail in, or achieve a favorable settlement of, any of these matters.

Mattel is subject to various laws and government policies or regulations in numerous jurisdictions, violation of which could subject it to sanctions. In addition, changes in such laws or policies or regulations may lead to increased costs, changes in Mattel's effective tax rate, or the interruption of normal business operations that would negatively impact Mattel's financial condition and results of operations.

Mattel operates in a highly regulated environment in the US and international markets. US federal, state, and local governmental entities, and foreign governments regulate many aspects of Mattel's business, including its products and the importation and exportation of its products. These policies or regulations may include accounting standards, taxation requirements (including changes in applicable income tax rates, new tax laws and revised tax law interpretations), product safety and other safety standards, trade restrictions, duties and tariffs, and regulations regarding currency and financial matters, anticorruption standards (such as the US Foreign Corrupt Practices Act), environmental matters, advertising directed toward children, product content, and privacy and data protection, as well as other administrative and regulatory restrictions. While Mattel takes all the steps it believes are necessary to comply with these laws and policies or regulations, there can be no assurance that Mattel will be in compliance in the future. Compliance with these various laws, regulations and policies imposes significant costs on Mattel's business, and failure to comply could result in monetary liabilities and other penalties, and could lead to significant negative media attention and consumer dissatisfaction, which could have a significant adverse effect on Mattel's business, financial condition and results of operations.

Table of Contents

In addition, changes in laws or policies or regulations may lead to increased costs, changes in Mattel's effective tax rate, or the interruption of normal business operations, any of which could negatively impact its financial condition and results of operations.

Issues with products may lead to product liability, personal injury or property damage claims, recalls, withdrawals, replacements of products, or regulatory actions by governmental authorities that could divert resources, affect business operations, decrease sales, increase costs, and put Mattel at a competitive disadvantage, any of which could have a significant adverse effect on Mattel's financial condition.

Mattel has experienced, and may in the future experience, issues with products that may lead to product liability, personal injury or property damage claims, recalls, withdrawals, replacements of products, or regulatory actions by governmental authorities. Any of these activities could result in increased governmental scrutiny, harm to Mattel's reputation, reduced demand by consumers for its products, decreased willingness by retailer customers to purchase or provide marketing support for those products, adverse impacts on Mattel's ability to enter into licensing agreements for products on competitive terms, absence or increased cost of insurance, or additional safety and testing requirements. Such results could divert development and management resources, adversely affect Mattel's business operations, decrease sales, increase legal fees and other costs, and put Mattel at a competitive disadvantage compared to other manufacturers not affected by similar issues with products, any of which could have a significant adverse effect on Mattel's financial condition and results of operations.

Mattel's current and future operating procedures and product requirements may increase costs, significantly and adversely affect its relationship with vendors, and make it more difficult for Mattel to produce, purchase, and deliver products on a timely basis to meet market demands. Future conditions may require Mattel to adopt further changes that may increase its costs and further affect its relationship with vendors.

Mattel's current operating procedures and product requirements, including testing requirements and standards, have imposed costs on both Mattel and the vendors from which it purchases products. Changes in business conditions, including those resulting from new legislative and regulatory requirements, have caused and in the future could cause further revisions in Mattel's operating procedures and product requirements. Changes in Mattel's operating procedures and product requirements may delay delivery of products and increase costs. Mattel's relationship with its existing vendors may be adversely affected as a result of these changes, making Mattel more dependent on a smaller number of vendors. Some vendors may choose not to continue to do business with Mattel or not to accommodate Mattel's needs to the extent that they have done in the past. In addition, rising production costs, contraction of credit availability, and labor shortages have caused a substantial contraction in the number of toy manufacturers in China, decreasing the number of potential vendors to manufacture Mattel's products. Because of the seasonal nature of Mattel's business and the demands of its customers for deliveries with short lead times, Mattel depends upon the cooperation of its vendors to meet market demand for its products in a timely manner. There can be no assurance that existing and future events will not require Mattel to adopt additional requirements and incur additional costs, and impose those requirements and costs on its vendors, which may adversely affect its relationship with those vendors and Mattel's ability to meet market demand in a timely manner.

Political developments, including trade relations, and the threat or occurrence of war or terrorist activities could adversely impact Mattel, its personnel and facilities, its customers and suppliers, retail and financial markets, and general economic conditions.

Mattel's business is worldwide in scope, including operations in 40 countries and territories. The deterioration of the political situation in a country in which Mattel has significant sales or operations, or the breakdown of trade relations between the US and a foreign country in which Mattel has significant manufacturing facilities or other operations, could adversely affect Mattel's business, financial condition, and results of operations. For example, a change in trade status for China could result in a substantial increase in the

Table of Contents

import duty of toys manufactured in China and imported into the US. In addition, the occurrence of war or hostilities between countries or threat of terrorist activities, and the responses to and results of these activities, could adversely impact Mattel, its personnel and facilities, its customers and suppliers, retail and financial markets, and general economic conditions.

Disruptions in Mattel's manufacturing operations due to political instability, civil unrest, or disease could negatively impact Mattel's business, financial position, and results of operations.

Mattel owns, operates and manages manufacturing facilities and utilizes third-party manufacturers throughout Asia, primarily in China, Indonesia, Malaysia and Thailand. The risk of political instability and civil unrest exists in certain of these countries, which could temporarily or permanently damage Mattel's manufacturing operations located there. In the past, outbreaks of SARS have been significantly concentrated in Asia, particularly in Hong Kong, and in the Guangdong province of China, where many of Mattel's manufacturing facilities and third-party manufacturers are located. The design, development and manufacture of Mattel's products could suffer if a significant number of Mattel's employees or the employees of its third-party manufacturers or their suppliers contract SARS, avian flu or other communicable diseases, or otherwise are unable to fulfill their obligations to Mattel. While Mattel has developed contingency plans designed to help mitigate the impact of disruptions in its manufacturing operations, its business, financial position, and results of operations could be negatively impacted by a significant disruption to its manufacturing operations or suppliers.

Earthquakes or other catastrophic events out of Mattel's control may damage its facilities or those of its contractors and harm Mattel's results of operations.

Mattel has significant operations near major earthquake faults, including its corporate headquarters in El Segundo, California. A catastrophic event where Mattel has important operations, such as an earthquake, tsunami, flood, typhoon, fire, or other natural or manmade disaster, could disrupt Mattel's operations or those of its contractors and impair production or distribution of its products, damage inventory, interrupt critical functions, or otherwise affect its business negatively, harming Mattel's results of operations.

The production and sale of private-label toys by Mattel's retail customers may result in lower purchases of Mattel-branded products by those retail customers.

In recent years, consumer goods companies, including those in the toy business, generally have experienced the phenomenon of retail customers developing their own private-label products that directly compete with the products of traditional manufacturers. Some retail chains that are customers of Mattel sell private-label toys designed, manufactured and branded by the retailers themselves. These toys may be sold at prices lower than comparable toys sold by Mattel and may result in lower purchases of Mattel-branded products by these retailers. In some cases, retailers who sell these private-label toys are larger than Mattel and may have substantially more resources than Mattel.

Mattel depends on key personnel and may not be able to hire, retain, and integrate sufficient qualified personnel to maintain and expand its business.

Mattel's future success depends partly on the continued contribution of key executives, designers, technical, sales, marketing, manufacturing, and administrative personnel. The loss of services of any of Mattel's key personnel could harm Mattel's business. Recruiting and retaining skilled personnel is costly and highly competitive. If Mattel fails to retain, hire, train, and integrate qualified employees and contractors, Mattel may not be able to maintain or expand its business.

Table of Contents

Mattel may engage in acquisitions, mergers, or dispositions, which may affect the profit, revenues, profit margins, debt-to-capital ratio, capital expenditures, or other aspects of Mattel's business. In addition, Mattel has certain anti-takeover provisions in its by-laws that may make it more difficult for a third party to acquire Mattel without its consent, which may adversely affect Mattel's stock price.

Mattel may engage in acquisitions, mergers or dispositions, which may affect the profit, revenues, profit margins, debt-to-capital ratio, capital expenditures, or other aspects of Mattel's business. There can be no assurance that Mattel will be able to identify suitable acquisition targets or merger partners or that, if identified, it will be able to acquire these targets on terms acceptable to Mattel and to potential merger partners. There can also be no assurance that Mattel will be successful in integrating any acquired company into its overall operations, or that any such acquired company will operate profitably or will not otherwise adversely impact Mattel's results of operations. Further, Mattel cannot be certain that key talented individuals at those acquired companies will continue to work for Mattel after the acquisition or that they will continue to develop popular and profitable products or services. In addition, Mattel has certain anti-takeover provisions in its by-laws that may make it more difficult for a third party to acquire Mattel without its consent, which may adversely affect Mattel's stock price.

Mattel relies extensively on information technology in its operations, and any material failure, inadequacy, interruption, or security breach of that technology could have a material adverse impact on its business.

Mattel relies extensively on information technology systems across its operations, including for management of its supply chain, sale and delivery of its products, reporting its results of operations, collection and storage of consumer data, personal data of customers, employees and other stakeholders, and various other processes and transactions. Many of these systems are managed by third-party service providers. Mattel's ability to effectively manage its business and coordinate the production, distribution, and sale of its products depends significantly on the reliability and capacity of these systems and third-party service providers. Mattel has exposure to similar security risks faced by other large companies that have data stored on their information technology systems. To its knowledge, Mattel has not experienced any material breach of its cybersecurity systems. The cybersecurity system of Mattel's third party insurance provider has been recently compromised. If Mattel's or its third-party service providers' systems fail to operate effectively or are damaged, destroyed, or shut down, or there are problems with transitioning to upgraded or replacement systems, or there are security breaches in these systems, any of the above which could occur as a result of natural disasters, software or equipment failures, telecommunications failures, loss or theft of equipment, acts of terrorism, circumvention of security systems, or other cyber-attacks, Mattel could experience delays or decreases in product sales, and reduced efficiency of its operations. Additionally, any of these events could lead to violations of privacy laws, loss of customers, or loss, misappropriation or corruption of confidential information, trade secrets or data, which could expose Mattel to potential litigation, regulatory actions, sanctions or other statutory penalties, any or all of which could adversely affect its business, and cause it to incur significant losses and remediation costs.

The level of returns on pension plan assets and the actuarial assumptions used for valuation purposes could affect Mattel's earnings in future periods. Changes in standards and government regulations could also affect its pension plan expense and funding requirements.

Assumptions used in determining projected benefit obligations and the fair value of plan assets for Mattel's pension plan are evaluated by Mattel in consultation with outside actuaries. In the event that Mattel determines that changes are warranted in the assumptions used, such as the discount rate, expected long term rate of return, or health care costs, its future pension benefit expenses could increase or decrease. Due to changing market conditions or changes in the participant population, the actuarial assumptions that Mattel uses may differ from actual results, which could have a significant impact on its pension and postretirement liability and related costs. Funding obligations are determined based on the value of assets and liabilities on a specific date as required under relevant government regulations for each plan. Future pension funding requirements, and the timing of funding payments, could be affected by legislation enacted by the relevant governmental authorities.

Table of Contents

If Mattel's nonamortizable intangible assets or goodwill becomes impaired, Mattel's results of operations could be adversely affected.

Mattel tests its nonamortizable intangible assets, including trademarks and trade names, and goodwill for impairment annually or more often if an event or circumstance indicates that an impairment may have occurred. The impairment test for nonamortizable intangible assets is performed by comparing the estimated fair values of the assets with their carrying values. Future changes in estimates used to determine the fair values may impact the fair value of Mattel's intangible assets, which could result in a write-down, negatively impacting its results of operations. For purposes of evaluating whether goodwill is impaired, goodwill is allocated to various reporting units, which are at the operating segment level. Declines in profitability of Mattel's reporting units may impact the fair value of its reporting units, which could result in a write-down of its goodwill, negatively impacting its results of operations.

Mattel's stock price has been volatile over the past several years and could decline in the future, resulting in losses for our investors.

All the factors discussed in this section or any other material announcements or events could affect our stock price. In addition, quarterly fluctuations in our operating results, changes in investor and analyst perception of our business risks and conditions of our business, our ability to meet earnings estimates and other performance expectations of financial analysts or investors, unfavorable commentary or downgrades of our stock by research analysts, fluctuations in the stock prices of our peer companies or in stock markets in general, and general economic or political conditions could also cause the price of our stock to change. A significant drop in the price of our stock could expose us to the risk of securities class action lawsuits, which could result in substantial costs and divert management's attention and resources, adversely affecting our business.

If any of the risks and uncertainties described in the cautionary risk factors listed above actually occurs, Mattel's business, financial condition and results of operations could be significantly and adversely affected. The risk factors listed above are not exhaustive. Other sections of this Annual Report on Form 10-K include additional factors that could materially and adversely impact Mattel's business, financial condition and results of operations. Moreover, Mattel operates in a very competitive and rapidly changing environment. New factors emerge from time to time, and it is not possible for management to predict the impact of all of these factors on Mattel's business, financial condition or results of operations, or the extent to which any factor, or combination of factors, may cause actual results to differ materially from those contained in any forward-looking statements. Given these risks and uncertainties, investors should not rely on forward-looking statements as a prediction of actual results. Any or all of the forward-looking statements contained in this Annual Report on Form 10-K and any other public statement made by Mattel or its representatives may turn out to be wrong. Mattel expressly disclaims any obligation to update or revise any forward-looking statements, whether as a result of new developments or otherwise.

Item 1B. Unresolved Staff Comments.

None.

Item 2. Properties.

Mattel owns its corporate headquarters in El Segundo, California, consisting of approximately 335,000 square feet, and an adjacent office building consisting of approximately 55,000 square feet. Mattel also leases buildings in El Segundo consisting of approximately 327,000 square feet. All segments use these facilities. Mattel also owns facilities in East Aurora, New York, consisting of approximately 535,000 square feet, which is used by the North America segment and for brand and corporate support functions. American Girl owns its headquarters facilities in Middleton, Wisconsin, consisting of approximately 180,000 square feet, a warehouse in

Table of Contents

Middleton, consisting of approximately 215,000 square feet, and distribution facilities in Middleton, DeForest, and Wilmot, Wisconsin, consisting of a total of approximately 948,000 square feet, all of which are used by the American Girl segment. Additionally, Mattel leases a facility in Montreal, Canada, consisting of approximately 817,000 square feet, which is used for brand support and manufacturing functions, and a warehouse in Lachine, Canada, consisting of approximately 276,000 square feet. These facilities in Canada are used by both the North America and International segments. Mattel also owns its principal manufacturing facilities located in Indonesia, Malaysia, Mexico, and Thailand.

Mattel maintains leased offices in Arkansas, California, Illinois, Indiana, Minnesota, New York, and Pennsylvania, and leased warehouse and distribution facilities in California, New Jersey, and Texas, all of which are used by the North America segment. Mattel has leased retail and related office space in Chicago, Illinois, Los Angeles, California, and New York, New York for its American Girl Place stores, Alpharetta, Georgia, Bloomington, Minnesota, Charlotte, North Carolina, Chesterfield, Missouri, Columbus, Ohio, Dallas, Texas, Houston, Texas, Lone Tree, Colorado, Lynnwood, Washington, McLean, Virginia, Miami, Florida, Nashville, Tennessee, Natick, Massachusetts, Orlando, Florida, Overland Park, Kansas, Palo Alto, California, and Scottsdale, Arizona for its American Girl stores, leased retail space in Oshkosh, Wisconsin, which is used by the American Girl segment, and Pomona, California, which is used by the North America segment. Internationally, Mattel has offices and/or warehouse space in Argentina, Australia, Austria, Belgium, Bermuda, Brazil, Canada, Chile, China, Colombia, Czech Republic, Denmark, France, Germany, Greece, Hong Kong, Hungary, India, Italy, Japan, Luxembourg, Malaysia, Mexico, the Netherlands, New Zealand, Peru, Poland, Portugal, Russia, South Korea, Spain, Switzerland, Taiwan, Turkey, the United Kingdom, and Venezuela, which are leased (with the exception of office and warehouse space in Chile and certain warehouse space in France that is owned by Mattel) and used by the International segment. Mattel also has office space and principal manufacturing facilities in China, which support both the North America and International segments.

For leases that are scheduled to expire during the next twelve months, Mattel may negotiate new lease agreements, renew existing lease agreements, or utilize alternate facilities. See Part II, Item 8 Financial Statements and Supplementary Data Note 11 to the Consolidated Financial Statements Commitments and Contingencies. Mattel believes that its owned and leased facilities, in general, are suitable and adequate for its present and currently foreseeable needs.

Item 3. Legal Proceedings.

See Part II, Item 8 Financial Statements and Supplementary Data Note 11 to the Consolidated Financial Statements Commitments and Contingencies Litigation.

Item 4. Mine Safety Disclosures.

Not applicable.

PART II

Item 5. Market for the Registrant's Common Equity, Related Stockholder Matters and Issuer Purchases of Equity Securities.

Market Information

For information regarding the markets in which Mattel's common stock, par value \$1.00 per share, is traded, see the cover page hereof. For information regarding the high and low closing prices of Mattel's common stock for the last two calendar years, see Item 8 Financial Statements and Supplementary Data Note 14 to the Consolidated Financial Statements Quarterly Financial Information (Unaudited).

Holders of Record

As of February 13, 2015, Mattel had approximately 30,000 holders of record of its common stock.

Dividends

During 2014, 2013, and 2012, Mattel paid total dividends per share of \$1.52, \$1.44, and \$1.24, respectively, to holders of its common stock. The Board of Directors declared the dividends on a quarterly basis, and Mattel paid the dividends during the quarters in which the dividends were declared. The payment of dividends on common stock is at the discretion of the Board of Directors and is subject to customary limitations.

Under US federal income tax rules, corporate dividends are designated as a dividend or a non-dividend distribution based on the applicable earnings and profits of the entity paying the dividend. Although Mattel has significant retained earnings, these earnings do not constitute earnings and profits as defined in US federal tax rules. Non-dividend distributions are considered a return of capital and are generally not taxable; however, the recipient must adjust his cost basis to reflect the distribution. In 2014, based on assumptions by Mattel, approximately 80% of the distribution is a non-dividend distribution for US federal income tax purposes. Mattel expects more than 50% of its future dividends to be designated as a non-dividend distribution for US federal income tax purposes, assuming no changes to current business operations or current tax laws.

Recent Sales of Unregistered Securities

During the fourth quarter of 2014, Mattel did not sell any unregistered securities.

Issuer Purchases of Equity Securities

During 2014, Mattel repurchased 4.9 million shares of its common stock at a cost of \$177.2 million. During 2013, Mattel repurchased 11.0 million shares of its common stock at a cost of \$469.2 million. During 2012, Mattel repurchased 2.3 million shares of its common stock at a cost of \$77.9 million.

Table of Contents

The following table provides certain information with respect to Mattel's purchases of its common stock during the fourth quarter of 2014:

Period	Total Number of Shares (or Units) Purchased (1)	Average Price Paid per Share (or Unit)	Total Number of Shares (or Units) Purchased as Part of Publicly Announced Plans or Programs	Maximum Number (or Approximate Dollar Value) of Shares (or Units) that May Yet Be Purchased Under the Plans or Programs (2)
October 1 - 31	1,594,636	\$ 30.77	1,592,655	\$ 203,016,273
November 1 - 30	2,509	31.25		203,016,273
December 1 - 31	587	30.84		203,016,273
Total	1,597,732	\$ 30.77	1,592,655	\$ 203,016,273

- (1) The total number of shares purchased includes 5,077 shares withheld from employees to satisfy minimum tax withholding obligations that occur upon vesting of restricted stock units. These shares were not purchased as part of a publicly announced repurchase plan or program.
- (2) Mattel's share repurchase program was first announced on July 21, 2003. On July 17, 2013, the Board of Directors authorized Mattel to increase its share repurchase program by \$500.0 million. At December 31, 2014, share repurchase authorizations of \$203.0 million had not been executed. Repurchases under the program will take place from time to time, depending on market conditions. Mattel's share repurchase program has no expiration date.

Stockholders equity	2,949,071	3,251,559	3,067,044	2,610,603	2,628,584

- (a) In 2012, a charge arising from the litigation between Mattel and MGA Entertainment, Inc. resulted in reductions to operating income and net income of \$137.8 million and \$87.1 million, respectively. This litigation charge also negatively impacted both basic and diluted net income per common share by \$0.25 per share.
- (b) The provision for income taxes in 2014 was positively impacted by net tax benefits of \$42.6 million, primarily related to reassessments of prior years tax liabilities based on the status of audits and tax filings in various jurisdictions around the world, settlements, and enacted tax law changes, partially offset by a tax charge related to a 2014 tax restructuring for the HIT Entertainment and MEGA Brands operations. The provision for income taxes in 2013 was positively impacted by net tax benefits of \$32.2 million, primarily related to reassessments of prior years tax liabilities based on the status of audits and tax filings in various jurisdictions around the world, settlements, and enacted tax law changes. The provision for income taxes in 2012 was positively impacted by net tax benefits of \$16.0 million, primarily related to reassessments of prior years tax liabilities based on the status of audits and tax filings in various jurisdictions around the world, settlements, and enacted tax law changes. The provision for income taxes in 2011 was positively impacted by net tax benefits of \$6.8 million, primarily related to reassessments of prior years tax liabilities based on the status of audits and tax filings in various jurisdictions around the world, settlements, and enacted tax law changes. The provision for income taxes in 2010 was positively impacted by net tax benefits of \$16.8 million, primarily related to the release of a valuation allowance related to the anticipated utilization of excess foreign tax credit carryforwards, reassessments of prior years tax liabilities based on the status of audits and tax filings in various jurisdictions around the world, settlements, and enacted tax law changes, partially offset by the incremental tax cost to repatriate earnings from certain foreign subsidiaries for which income taxes had not been previously provided.

Table of Contents

Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations.

The following discussion should be read in conjunction with the consolidated financial statements and the related notes. See Item 8 Financial Statements and Supplementary Data.

Overview

Mattel's vision is creating the future of play. Mattel's objectives are to grow its share in the marketplace, continue to improve its operating margins, and create long-term stockholder value. To achieve these objectives, management has established the following strategies:

The first strategy is to deliver consistent growth by investing in its core brands, optimizing entertainment partnerships, building new franchises, and working to expand and leverage its international footprint.

The second strategy is to optimize operating margins through sustaining gross margins of about 50% over the long-term, and delivering on cost savings initiatives.

The third strategy is to generate significant cash flow and continue its disciplined, opportunistic, and value-enhancing deployment.

2014 Overview

Mattel's 2014 results were disappointing. Revenue and profitability did not meet management's expectations, as Mattel's performance fell short in three areas. Mattel's product innovation was inconsistent, resulting in brand propositions that were not compelling enough to consumers. The doll category environment was dynamic and challenging and, although Mattel experienced success with the Disney Princess line, it did not drive significant overall growth in the doll category where Mattel's doll brands make up approximately 40% of its revenue. Additionally, global retail execution fell short of management's expectations, especially in North America.

Mattel's 2014 financial highlights include the following:

Net sales decreased 7% from \$6.48 billion in 2013 to \$6.02 billion in 2014.

Gross profit as a percentage of net sales for 2014 was 49.8%, a decrease of 380 basis points from 2013.

Operating income was \$653.7 million in 2014, or 10.9% of net sales, compared to the prior year's operating income of \$1.17 billion in 2013, or 18.0% of net sales.

Mattel's Operational Excellence 3.0 program resulted in gross cost savings before severance charges and investments of approximately \$119 million, or approximately \$74 million in net cost savings.

Mattel paid total annual dividends of \$1.52 per share, an increase of 6% from the prior year, and repurchased 4.9 million shares of its common stock.

2015 and Beyond

In 2015 and beyond, Mattel intends to utilize its unmatched portfolio of brands, global scale of infrastructure, capable management team, and strong balance sheet to work towards revitalizing its business and to deepen its connection with children and parents around the world. In addition, Mattel will launch Funding Our Future, its next cost savings program, where it will look to simplify its global operations through structural and process improvements and supply chain optimization.

Table of Contents**Results of Operations****2014 Compared to 2013***Consolidated Results*

Net sales for 2014 were \$6.02 billion, a 7% decrease, as compared to \$6.48 billion in 2013, with an unfavorable impact from changes in currency exchange rates of 2 percentage points. Net income for 2014 was \$498.9 million, or \$1.45 per diluted share, as compared to net income of \$903.9 million, or \$2.58 per diluted share, in 2013. Net income for 2014 was negatively impacted by lower sales volume, lower gross margins, and higher other selling and administrative expenses, partially offset by lower income taxes.

The following table provides a summary of Mattel's consolidated results for 2014 and 2013 (in millions, except percentage and basis point information):

	For the Year				Year/Year Change	
	2014		2013		%	Basis Points of Net Sales
	Amount	% of Net Sales	Amount	% of Net Sales		
Net sales	\$ 6,023.8	100.0%	\$ 6,484.9	100.0%	7%	
Gross profit	\$ 3,001.0	49.8%	\$ 3,478.9	53.6%	14%	380
Advertising and promotion expenses	733.2	12.2	750.2	11.6	2%	60
Other selling and administrative expenses	1,614.1	26.8	1,560.6	24.1	3%	270
Operating income	653.7	10.9	1,168.1	18.0	44%	710
Interest expense	79.3	1.3	78.5	1.2	1%	10
Interest (income)	(7.4)	0.1	(5.6)	0.1	33%	
Other non-operating (income), net	(5.1)		(3.9)			
Income before income taxes	\$ 586.9	9.7%	\$ 1,099.1	16.9%	47%	720

Sales

Net sales for 2014 were \$6.02 billion, a 7% decrease, as compared to \$6.48 billion in 2013, with an unfavorable impact from changes in currency exchange rates of 2 percentage points.

Table of Contents

The following table provides a summary of Mattel's consolidated gross sales by brand for 2014 and 2013:

	For the Year		
	2014	2013	% Change
	(In millions, except percentage information)		
Mattel Girls & Boys Brands:			
Barbie	\$ 1,009.5	\$ 1,202.8	16%
Other Girls	1,293.5	1,322.8	2%
Wheels	754.9	747.7	1%
Entertainment	839.3	1,042.6	20%
	3,897.2	4,315.9	10%
Fisher-Price Brands:			
Core Fisher-Price	1,213.4	1,374.9	12%
Fisher-Price Friends	504.8	608.6	17%
Other Fisher-Price	124.4	137.2	9%
	1,842.6	2,120.7	13%
American Girl Brands	620.7	632.5	2%
Construction and Arts & Crafts Brands	315.0		
Other	42.9	48.7	
Total Gross Sales	\$ 6,718.4	\$ 7,117.8	6%

Gross sales were \$6.72 billion in 2014, down \$399.4 million or 6%, as compared to \$7.12 billion in 2013, with an unfavorable impact from changes in currency exchange rates of 2 percentage points. The decrease in gross sales was due to lower sales of Entertainment, Fisher-Price Friends, Barbie, and Core Fisher-Price products, partially offset by Construction and Arts & Crafts products. Of the 20% decrease in Entertainment gross sales, 5% was due to lower sales of Max Steel products, 4% was due to lower sales of Superman products, 4% was due to lower sales of CARS products, and 2% was due to lower sales of kids' games. Of the 17% decrease in Fisher-Price Friends gross sales, 6% was due to lower sales of Disney Jake and the Never Land Pirates products, 4% was due to lower sales of Nickelodeon products, and 3% was due to lower sales of Mike the Knight® products. The 16% decrease in Barbie gross sales was primarily due to competition within the doll category and brand propositions that were not compelling enough to consumers. Of the 12% decrease in Core Fisher-Price gross sales, 4% was due to lower sales of Little People products and 3% was due to lower sales of Imaginext products. The increase in Construction and Arts & Crafts gross sales was due to initial sales of MEGA Brands products.

Cost of Sales

Cost of sales as a percentage of net sales was 50.2% in 2014, as compared to 46.4% in 2013. Cost of sales increased by \$16.8 million, or 1%, from \$3.01 billion in 2013 to \$3.02 billion in 2014, as compared to a 7% decrease in net sales. Within cost of sales, product and other costs increased by \$21.5 million, or 1%, from \$2.42 billion in 2013 to \$2.44 billion in 2014; royalty expenses decreased \$4.5 million, or 2%, from \$246.9 million in 2013 to \$242.4 million in 2014; and freight and logistics expenses decreased by \$0.2 million from \$337.3 million in 2013 to \$337.1 million in 2014.

Gross Profit

Gross profit as a percentage of net sales decreased from 53.6% in 2013 to 49.8% in 2014. The decrease in gross profit as a percentage of net sales was primarily due to the impact of the MEGA Brands acquisition, including the impact of the inventory fair value markup above historical cost, efforts to improve consumer

Table of Contents

takeaway, the impact of lower sales volume on Mattel's fixed cost manufacturing and distribution base, and unfavorable product mix, partially offset by price increases and Operational Excellence 3.0 savings offset by higher input costs.

Advertising and Promotion Expenses

Advertising and promotion expenses primarily consist of: (i) media costs, which primarily include the media, planning, and buying fees for television, print, and online advertisements, (ii) non-media costs, which primarily include commercial and website production, merchandising, and promotional costs, (iii) retail advertising costs, which primarily include consumer direct catalogs, newspaper inserts, fliers, and mailers and (iv) generic advertising costs, which primarily include trade show costs. Advertising and promotion expenses as a percentage of net sales increased to 12.2% in 2014 from 11.6% in 2013, primarily as a result of lower sales volume.

Other Selling and Administrative Expenses

Other selling and administrative expenses were \$1.61 billion in 2014, or 26.8% of net sales, as compared to \$1.56 billion in 2013, or 24.1% of net sales. The \$53.5 million increase in other selling and administrative expenses was primarily due to approximately \$53 million of transaction, integration, and amortization costs associated with the MEGA Brands acquisition, the addition of MEGA Brands' ongoing other selling and administrative expenses of approximately \$51 million, and approximately \$25 million of incremental severance and other termination-related costs, partially offset by lower employee-related expenses, including incentive and equity compensation, of approximately \$51 million, and Operational Excellence 3.0 gross savings of approximately \$35 million.

Non-Operating Items

Interest expense increased by \$0.8 million to \$79.3 million in 2014, as compared to \$78.5 million in 2013, primarily due to higher average long-term borrowings, partially offset by lower average interest rates. Interest income increased by \$1.8 million to \$7.4 million in 2014, as compared to \$5.6 million in 2013, primarily due to higher average invested cash.

Provision for Income Taxes

Mattel's effective tax rate on income before income taxes in 2014 was 15.0% as compared to 17.8% in 2013. The 2014 and 2013 income tax provisions include net tax benefits of \$42.6 million and \$32.2 million, respectively. The 2014 net tax benefits primarily relate to reassessments of prior years' tax liabilities based on the status of audits and tax filings in various jurisdictions around the world, settlements, and enacted tax law changes, partially offset by a tax charge related to a 2014 tax restructuring for the HIT Entertainment and MEGA Brands operations. The 2013 net tax benefits primarily related to reassessments of prior years' tax liabilities based on the status of audits and tax filings in various jurisdictions around the world, settlements, and enacted tax law changes.

Table of Contents*North America Segment*

The following table provides a summary of Mattel's gross sales by brand for the North America segment for 2014 and 2013:

	For the Year		
	2014	2013	% Change
	(In millions, except percentage information)		
Mattel Girls & Boys Brands:			
Barbie	\$ 423.6	\$ 458.6	8%
Other Girls	563.1	600.0	6%
Wheels	337.9	352.0	4%
Entertainment	379.0	454.1	17%
	1,703.6	1,864.7	9%
Fisher-Price Brands:			
Core Fisher-Price	682.5	816.7	16%
Fisher-Price Friends	279.7	361.8	23%
Other Fisher-Price	108.3	120.4	10%
	1,070.5	1,298.9	18%
Construction and Arts & Crafts Brands	220.5		
Other	17.0	17.6	
Total Gross Sales	\$ 3,011.6	\$ 3,181.2	5%

Gross sales for the North America segment were \$3.01 billion in 2014, down \$169.6 million or 5%, as compared to \$3.18 billion in 2013, with no impact from changes in currency exchange rates. The decrease in the North America segment gross sales was due to lower sales of Fisher-Price Friends, Entertainment, and Core Fisher-Price products, partially offset by Construction and Arts & Crafts products. Of the 23% decrease in Fisher-Price Friends gross sales, 6% was due to lower sales of Nickelodeon products, 5% was due to lower sales of Thomas and Friends products, 5% was due to lower sales of Disney Jake and the Never Land Pirates products, and 4% was due to lower sales of Mike the Knight products. Of the 17% decrease in Entertainment gross sales, 6% was due to lower sales of Superman products, 5% was due to lower sales of CARS products, 4% was due to lower sales of Radica products, and 3% was due to lower sales of Max Steel products. Of the 16% decrease in Core Fisher-Price gross sales, 6% was due to lower sales of Little People products and 4% was due to lower sales of Imaginext products. The increase in Construction and Arts & Crafts gross sales was due to initial sales of MEGA Brands products. Cost of sales increased 3% in 2014, compared to a 7% decrease in net sales, primarily due to higher product and other costs, partially offset by lower royalty expenses. Gross margins decreased due to the impact of the MEGA Brands acquisition, including the impact of the inventory fair value markup above historical cost, efforts to improve consumer takeaway, the impact of lower sales volume on Mattel's fixed cost manufacturing and distribution base, and unfavorable product mix, partially offset by price increases and Operational Excellence 3.0 savings offset by higher input costs.

North America segment income decreased by 36% to \$459.8 million in 2014, as compared to \$723.8 million in 2013, due to lower gross profit and higher other selling and administrative expenses.

Table of Contents*International Segment*

The following table provides a summary of percentage changes in gross sales within the International segment in 2014 versus 2013:

	% Change in Gross Sales	Impact of Change in Currency Rates (in % pts)
Total International Segment	7	4
Europe	7	4
Latin America	10	4
Asia Pacific	1	2

The following table provides a summary of Mattel's gross sales by brand for the International segment for 2014 and 2013:

	2014	2013	% Change
	(In millions, except percentage information)		
Mattel Girls & Boys Brands:			
Barbie	\$ 585.9	\$ 744.2	21%
Other Girls	730.4	722.8	1%
Wheels	417.0	395.7	5%
Entertainment	460.3	588.5	22%
	2,193.6	2,451.2	11%
Fisher-Price Brands:			
Core Fisher-Price	530.9	558.2	5%
Fisher-Price Friends	225.1	246.8	9%
Other Fisher-Price	16.1	16.8	4%
	772.1	821.8	6%
Construction and Arts & Crafts Brands			
Other	94.5	4.8	
	1.3	4.8	
Total Gross Sales	\$ 3,061.5	\$ 3,277.8	7%

Gross sales for the International segment were \$3.06 billion in 2014, down \$216.3 million or 7%, as compared to \$3.28 billion in 2013, with an unfavorable impact from changes in currency exchange rates of 4 percentage points. The decrease in the International segment gross sales was due to lower sales of Entertainment and Barbie products, partially offset by Construction and Arts & Crafts products. Of the 22% decrease in Entertainment gross sales, 7% was due to lower sales of Max Steel products, 5% was due to lower sales of kids' games, 3% was due to lower sales of CARS products, 3% was due to lower sales of Superman products, and 3% was due to lower sales of Disney Planes products. The 21% decrease in Barbie gross sales was primarily due to competition within the doll category and brand propositions that were not compelling enough to consumers. The increase in Construction and Arts & Crafts gross sales was due to initial sales of MEGA Brands products. Cost of sales remained flat in 2014, as compared to a 9% decrease in net sales, as lower product and other costs and lower freight and logistics expenses were offset by higher royalty expenses. Gross margins decreased due to efforts to improve consumer takeaway, the impact of the MEGA Brands acquisition, including the impact of the inventory fair value markup above historical cost, the impact of lower sales volume on Mattel's fixed cost manufacturing and distribution base, unfavorable product mix, and higher input costs offset by price increases.

International segment income decreased by 42% to \$359.9 million in 2014, as compared to \$622.9 million in 2013, primarily due to lower gross profit and higher other selling and administrative expenses.

Table of Contents*American Girl Segment*

The following table provides a summary of Mattel's gross sales by brand for the American Girl segment for 2014 and 2013:

	For the Year		% Change
	2014	2013	
	(In millions, except percentage information)		
American Girl Segment:			
American Girl Brands	\$ 620.7	\$ 632.5	2%
Other Brands	24.6	26.3	6%
Total American Girl Segment	\$ 645.3	\$ 658.8	2%

Gross sales for the American Girl segment were \$645.3 million in 2014, down \$13.5 million or 2%, as compared to \$658.8 million in 2013, with no impact from changes in currency exchange rates. Of the 2% decrease in American Girl Brands gross sales, 3% was due to lower sales of BeForever products. Cost of sales increased 2% in 2014, as compared to a 2% decrease in net sales, primarily due to higher product and other costs. Gross margins decreased as a result of efforts to improve consumer takeaway.

American Girl segment income decreased by 18% to \$113.6 million in 2014, as compared to \$138.0 million in 2013, primarily due to lower gross profit and higher advertising and promotion expenses.

2013 Compared to 2012*Consolidated Results*

Net sales for 2013 were \$6.48 billion, a 1% increase, as compared to \$6.42 billion in 2012, with an unfavorable impact from changes in currency exchange rates of 1 percentage point. Net income for 2013 was \$903.9 million, or \$2.58 per diluted share, as compared to net income of \$776.5 million, or \$2.22 per diluted share, in 2012. As compared to 2012, net income for 2013 was positively impacted by lower other selling and administrative expenses due to a 2012 litigation charge of \$137.8 million, arising out of the litigation between Mattel and MGA Entertainment, Inc. (the Litigation Charge), and higher gross margins. In 2012, the Litigation Charge reduced net income by \$87.1 million, or \$0.25 per share.

The following table provides a summary of Mattel's consolidated results for 2013 and 2012 (in millions, except percentage and basis point information):

	For the Year				Year/Year Change	
	2013		2012		%	Basis Points of Net Sales
	Amount	% of Net Sales	Amount	% of Net Sales		
Net sales	\$ 6,484.9	100.0%	\$ 6,420.9	100.0%	1%	
Gross profit	\$ 3,478.9	53.6%	\$ 3,409.2	53.1%	2%	50
Advertising and promotion expenses	750.2	11.6	717.8	11.2	5%	40
Other selling and administrative expenses	1,560.6	24.1	1,670.4	26.0	7%	(190)
Operating income	1,168.1	18.0	1,021.0	15.9	14%	210
Interest expense	78.5	1.2	88.8	1.4	12%	(20)
Interest (income)	(5.6)	0.1	(6.8)	0.1	19%	
Other non-operating (income), net	(3.9)		(6.0)			
Income before income taxes	\$ 1,099.1	16.9%	\$ 945.0	14.7%	16%	220

Table of Contents*Sales*

Net sales for 2013 were \$6.48 billion, a 1% increase, as compared to \$6.42 billion in 2012, with an unfavorable impact from changes in currency exchange rates of 1 percentage point.

The following table provides a summary of Mattel's consolidated gross sales by brand for 2013 and 2012:

	For the Year		
	2013	2012	% Change
	(In millions, except percentage information)		
Mattel Girls & Boys Brands:			
Barbie	\$ 1,202.8	\$ 1,275.3	6%
Other Girls	1,322.8	1,059.9	25%
Wheels	747.7	813.4	8%
Entertainment	1,042.6	1,038.0	
	4,315.9	4,186.6	3%
Fisher-Price Brands:			
Core Fisher-Price	1,374.9	1,505.8	9%
Fisher-Price Friends	608.6	571.7	6%
Other Fisher-Price	137.2	174.8	21%
	2,120.7	2,252.3	6%
American Girl Brands			
Other	632.5	567.5	11%
	48.7	46.2	
Total Gross Sales	\$ 7,117.8	\$ 7,052.6	1%

Gross sales were \$7.12 billion in 2013, up \$65.2 million or 1%, as compared to \$7.05 billion in 2012, with no impact from changes in currency exchange rates. The increase in gross sales was due to higher sales of Other Girls products, partially offset by lower sales of Core Fisher-Price products. Of the 25% increase in Other Girls gross sales, 20% was due to higher sales of Monster High products and 5% was due to the initial launch of the Ever After High product line. The 9% decrease in Core Fisher-Price gross sales reflected product innovation not being strong enough to drive growth, along with lower effectiveness of in-store, commercial, and promotional activities.

Cost of Sales

Cost of sales as a percentage of net sales was 46.4% in 2013, as compared to 46.9% in 2012. Cost of sales was flat at \$3.01 billion in 2013 and 2012, as compared to a 1% increase in net sales. Within cost of sales, product and other costs decreased by \$16.8 million, or 1%, from \$2.44 billion in 2012 to \$2.42 billion in 2013; royalty expenses increased \$6.7 million, or 3%, from \$240.2 million in 2012 to \$246.9 million in 2013; and freight and logistics expenses increased by \$4.4 million, or 1%, from \$332.9 million in 2012 to \$337.3 million in 2013.

Gross Profit

Gross profit as a percentage of net sales increased to 53.6% in 2013 from 53.1% in 2012. The increase in gross profit as a percentage of net sales was primarily due to Operational Excellence 3.0 savings, favorable product mix, and price increases offset by higher input costs, partially offset by unfavorable changes in foreign currency exchange rates.

Table of Contents*Advertising and Promotion Expenses*

Advertising and promotion expenses primarily consist of: (i) media costs, which primarily include the media, planning, and buying fees for television, print, and online advertisements, (ii) non-media costs, which primarily include commercial and website production, merchandising, and promotional costs, (iii) retail advertising costs, which primarily include consumer direct catalogs, newspaper inserts, fliers, and mailers and (iv) generic advertising costs, which primarily include trade show costs. Advertising and promotion expenses as a percentage of net sales increased to 11.6% in 2013 from 11.2% in 2012, primarily as a result of lower than expected fourth quarter sales and higher non-media and generic advertising spending.

Other Selling and Administrative Expenses

Other selling and administrative expenses were \$1.56 billion in 2013, or 24.1% of net sales, as compared to \$1.67 billion in 2012, or 26.0% of net sales. The decrease in other selling and administrative expenses was primarily due to the Litigation Charge of \$137.8 million in 2012 and lower incentive compensation expense of approximately \$43 million, partially offset by higher other employee-related expenses and investments in strategic initiatives of approximately \$78 million and an asset impairment charge of approximately \$14 million.

Non-Operating Items

Interest expense decreased by \$10.3 million to \$78.5 million in 2013, as compared to \$88.8 million in 2012, primarily due to lower average interest rates related to long-term borrowings.

Provision for Income Taxes

Mattel's effective tax rate on income before income taxes in 2013 was flat with 2012 at 17.8%. The 2013 and 2012 income tax provisions include net tax benefits of \$32.2 million and \$16.0 million, respectively, primarily related to reassessments of prior years' tax liabilities based on the status of audits and tax filings in various jurisdictions around the world, settlements, and enacted tax law changes.

North America Segment

The following table provides a summary of Mattel's gross sales by brand for the North America segment for 2013 and 2012:

	For the Year		
	2013	2012	% Change
	(In millions, except percentage information)		
Mattel Girls & Boys Brands:			
Barbie	\$ 458.6	\$ 522.6	12%
Other Girls	600.0	502.2	19%
Wheels	352.0	394.2	11%
Entertainment	454.1	485.0	6%
	1,864.7	1,904.0	2%
Fisher-Price Brands:			
Core Fisher-Price	816.7	919.8	11%
Fisher-Price Friends	361.8	332.5	9%
Other Fisher-Price	120.4	157.0	23%
	1,298.9	1,409.3	8%
Other	17.6	16.9	
Total Gross Sales	\$ 3,181.2	\$ 3,330.2	4%

Table of Contents

Gross sales for the North America segment were \$3.18 billion in 2013, down \$149.0 million or 4%, as compared to \$3.33 billion in 2012, with no impact from changes in currency exchange rates. The decrease in the North America segment gross sales was due to lower sales of Barbie, Core Fisher-Price, and Wheels products, partially offset by higher sales of Other Girls products. The 12% decrease in Barbie gross sales reflected product innovation not being strong enough to drive growth, increased competition within the doll category, along with lower effectiveness of in-store, commercial, and promotional activities. The 11% decrease in Core Fisher-Price gross sales reflected product innovation not being strong enough to drive growth, along with lower effectiveness of in-store, commercial, and promotional activities. Of the 11% decrease in Wheels gross sales, 8% was due to lower sales of radio-controlled vehicles and Matchbox products, and 3% was due to lower sales of Hot Wheels products. Of the 19% increase in Other Girls gross sales, 11% was due to higher sales of Monster High products, and 7% was due to the initial launch of the Ever After High product line. Cost of sales decreased 4% in 2013, consistent with the 4% decrease in net sales, primarily due to lower product and other costs. Gross margins decreased slightly as a result of higher input costs partially offset by price increases, which were partially offset by Operational Excellence 3.0 savings.

North America segment income decreased by 11% to \$723.8 million in 2013, as compared to \$810.3 million in 2012, due to lower gross profit and higher other selling and administrative expenses.

International Segment

The following table provides a summary of percentage changes in gross sales within the International segment in 2013 versus 2012:

	% Change in Gross Sales	Impact of Change in Currency Rates (in % pts)
Total International Segment	5	1
Europe	7	1
Latin America		4
Asia Pacific	6	5

The following table provides a summary of Mattel's gross sales by brand for the International segment for 2013 and 2012:

	For the Year		
	2013	2012	% Change
	(In millions, except percentage information)		
Mattel Girls & Boys Brands:			
Barbie	\$ 744.2	\$ 752.7	1%
Other Girls	722.8	557.7	30%
Wheels	395.7	419.2	6%
Entertainment	588.5	553.0	6%
	2,451.2	2,282.6	7%
Fisher-Price Brands:			
Core Fisher-Price	558.2	586.0	5%
Fisher-Price Friends	246.8	239.2	3%
Other Fisher-Price	16.8	17.8	5%
	821.8	843.0	3%
Other	4.8	0.5	
Total Gross Sales	\$ 3,277.8	\$ 3,126.1	5%

Table of Contents

Gross sales for the International segment were \$3.28 billion in 2013, up \$151.8 million or 5%, as compared to \$3.13 billion in 2012, with an unfavorable impact from changes in currency exchange rates of 1 percentage point. The increase in the International segment gross sales was due to higher sales of Other Girls products. Of the 30% increase in Other Girls gross sales, 29% was due to higher sales of Monster High products. Cost of sales increased by 2% in 2013, as compared to a 5% increase in net sales, primarily due to higher product and other costs and higher freight and logistics expenses. Gross margins increased as a result of Operational Excellence 3.0 savings, favorable product mix, and price increases partially offset by higher input costs, partially offset by unfavorable changes in foreign currency exchange rates.

International segment income increased by 9% to \$622.9 million in 2013, as compared to \$571.4 million in 2012, primarily due to higher gross profit, partially offset by higher other selling and administrative expenses and higher advertising and promotion expenses.

American Girl Segment

The following table provides a summary of Mattel's gross sales by brand for the American Girl segment for 2013 and 2012:

	For the Year		% Change
	2013	2012	
	(In millions, except percentage information)		
American Girl Segment:			
American Girl Brands	\$ 632.5	\$ 567.5	11%
Other Brands	26.3	28.8	9%
Total American Girl Segment	\$ 658.8	\$ 596.3	10%

Gross sales for the American Girl segment were \$658.8 million in 2013, up \$62.5 million or 10%, as compared to \$596.3 million in 2012, with an unfavorable impact from changes in currency exchange rates of 1 percentage point. Of the 11% increase in American Girl Brands gross sales, 6% was due to higher sales of the 2013 Girl of the Year, Saige®, and 3% was due to higher sales of My American Girl products. Cost of sales increased 8% in 2013, as compared to a 10% increase in net sales, primarily due to higher product and other costs and higher freight and logistics expenses. Gross margins increased as a result of favorable product mix and price increases partially offset by higher input costs.

American Girl segment income increased by 13% to \$138.0 million in 2013, as compared to \$121.6 million in 2012, primarily due to higher gross profit, partially offset by higher other selling and administrative expenses.

Cost Savings Programs

During 2011, Mattel initiated Operational Excellence 2.0, which targeted cumulative cost savings of approximately \$175 million by the end of 2012. Mattel exceeded its Operational Excellence 2.0 goal by realizing approximately \$187 million of cumulative gross cost savings throughout the program. The major initiatives within the Operational Excellence 2.0 program included:

A reorganization which resulted in the North America division,

Additional procurement initiatives designed to fully leverage Mattel's global scale,

SKU efficiency, and

Packaging optimization.

Edgar Filing: MATTEL INC /DE/ - Form 10-K

During 2012, Mattel realized gross cost savings before severance charges and investments of approximately \$93 million (or approximately \$77 million in net cost savings). The gross cost savings included approximately \$53 million of structural cost savings and approximately \$40 million of legal cost savings. Of the gross cost

Table of Contents

savings realized in 2012, approximately \$55 million was reflected within other selling and administrative expenses, approximately \$27 million within gross profit, and approximately \$11 million within advertising and promotion expenses.

During 2013, Mattel initiated Operational Excellence 3.0, which targeted cumulative gross cost savings of approximately \$175 million by the end of 2014. Mattel exceeded its Operational Excellence 3.0 goal by realizing approximately \$179 million of cumulative gross cost savings throughout the program. The cost savings program was designed to generate sustainable cost savings through the following primary initiatives:

Manufacturing efficiencies through automation, Lean manufacturing principles, design for manufacturing, enterprise quality, and packaging optimization,

Indirect procurement, and

Operational efficiencies related to enhanced International clustering and realignment of North America operations.

During 2013, Mattel realized gross cost savings before severance charges and investments of approximately \$60 million (or approximately \$39 million in net cost savings). Of the gross cost savings realized in 2013, approximately \$51 million was reflected within gross profit, approximately \$8 million within other selling and administrative expenses, and approximately \$1 million within advertising and promotion expenses.

During 2014, Mattel realized gross cost savings before severance charges and investments of approximately \$119 million (or approximately \$74 million in net cost savings). Of the gross cost savings realized in 2014, approximately \$77 million was reflected within gross profit, approximately \$35 million within other selling and administrative expenses, and approximately \$7 million within advertising and promotion expenses.

In 2015, Mattel has initiated the next phase of its cost savings program, Funding Our Future, which targets additional cumulative gross cost savings of approximately \$250 million to \$300 million by the end of 2016. The cost savings program is designed to generate cost savings through various initiatives, including structural and process improvements and supply chain optimization.

Income Taxes

Mattel's effective tax rate on income before income taxes in 2014 was 15.0%, as compared to 17.8% in 2013. The 2014 income tax provision included net tax benefits of \$42.6 million, primarily related to reassessments of prior years' tax liabilities based on the status of audits and tax filings in various jurisdictions around the world, settlements, and enacted tax law changes, partially offset by a tax charge related to a 2014 tax restructuring for the HIT Entertainment and MEGA Brands operations.

Mattel's effective tax rate on income before income taxes in both 2013 and 2012 was 17.8%. The 2013 income tax provision included net tax benefits of \$32.2 million, primarily related to reassessments of prior years' tax liabilities based on the status of audits and tax filings in various jurisdictions around the world, settlements, and enacted tax law changes. The 2012 income tax provision included net tax benefits of \$16.0 million, primarily related to reassessments of prior years' tax liabilities based on the status of audits and tax filings in various jurisdictions around the world, settlements, and enacted tax law changes.

Liquidity and Capital Resources

Mattel's primary sources of liquidity are its cash and equivalents balances, access to short-term borrowing facilities, including its \$1.60 billion domestic unsecured committed revolving credit facility ("Credit Facility"), and issuances of long-term debt securities. Cash flows from operating activities could be negatively impacted by decreased demand for Mattel's products, which could result from factors such as adverse economic conditions and changes in public and consumer preferences, or by increased costs associated with manufacturing and

Table of Contents

distribution of products or shortages in raw materials or component parts. Additionally, Mattel's ability to issue long-term debt and obtain seasonal financing could be adversely affected by factors such as global economic crises and tight credit environments, an inability to meet its debt covenant requirements, which include maintaining consolidated debt-to-earnings before interest, taxes, depreciation, and amortization (EBITDA) and interest coverage ratios, or a deterioration of Mattel's credit ratings. Mattel's ability to conduct its operations could be negatively impacted should these or other adverse conditions affect its primary sources of liquidity.

Of Mattel's \$971.7 million in cash and equivalents as of December 31, 2014, approximately \$765 million is held by foreign subsidiaries. Mattel may need to accrue and pay additional income taxes if some or all of the undistributed earnings of foreign subsidiaries were repatriated. Mattel does not intend nor foresee a need to repatriate undistributed earnings of foreign subsidiaries. Mattel has several liquidity options to fund its domestic operations and obligations, including investing and financing activities such as dividends, share repurchases, and debt service. Positive cash flows generated annually by its domestic operations, the unused Credit Facility of \$1.60 billion as of December 31, 2014, and access to both long-term and short-term public and private debt markets at highly competitive interest rates are available to fund domestic operations and obligations. If these sources are not adequate, Mattel also has the ability to repatriate highly taxed foreign earnings, receive repayment of intercompany loans to foreign subsidiaries, and distribute liquidating dividends from foreign subsidiaries, all of which would have a very nominal impact, if any, on Mattel's tax liabilities. Mattel believes that its policy to indefinitely reinvest the earnings of its foreign subsidiaries will not result in and is not reasonably likely to result in a material change to Mattel's liquidity position.

Current Market Conditions

Mattel is exposed to financial market risk resulting from changes in interest and foreign currency exchange rates. Mattel believes that it has ample liquidity to fund its business needs, including beginning of year cash and equivalents, cash flows from operations, and access to the commercial paper markets and its Credit Facility, which it uses for seasonal working capital requirements. As of December 31, 2014, Mattel had available incremental borrowing resources totaling \$1.60 billion under the Credit Facility, and Mattel has not experienced any limitations on its ability to access this source of liquidity. Market conditions could affect certain terms of other debt instruments that Mattel enters into from time to time.

Mattel monitors the third-party depository institutions that hold the Company's cash and equivalents. Mattel's emphasis is primarily on safety and liquidity of principal, and secondarily on maximizing the yield on those funds. Mattel diversifies its cash and equivalents among counterparties and securities to minimize risks.

Mattel is subject to credit risks relating to the ability of its counterparties in hedging transactions to meet their contractual payment obligations. The risks related to creditworthiness and nonperformance have been considered in the fair value measurements of Mattel's foreign currency forward exchange contracts. Mattel closely monitors its counterparties and takes action, as necessary, to manage its counterparty credit risk.

Mattel expects that some of its customers and vendors may experience difficulty in obtaining the liquidity required to buy inventory or raw materials. Mattel monitors its customers' financial condition and their liquidity in order to mitigate Mattel's accounts receivable collectibility risks, and customer terms and credit limits are adjusted, if necessary. Additionally, Mattel uses a variety of financial arrangements to ensure collectibility of accounts receivable of customers deemed to be a credit risk, including requiring letters of credit, factoring, purchasing various forms of credit insurance with unrelated third parties, or requiring cash in advance of shipment.

Mattel sponsors defined benefit pension plans and postretirement benefit plans for its employees. Actual returns below the expected rate of return, along with changes in interest rates that affect the measurement of the liability, would impact the amount and timing of Mattel's future contributions to these plans.

Table of Contents

Capital and Investment Framework

To guide future capital deployment decisions, with a goal of maximizing stockholder value, Mattel's Board of Directors established the following capital and investment framework:

To maintain approximately \$800 million to \$1 billion in year-end cash available to fund a substantial portion of seasonal working capital,

To maintain a year-end debt-to-capital ratio of about 35%,

To invest approximately \$180 million to \$200 million in capital expenditures annually to maintain and grow the business,

To make strategic opportunistic acquisitions, and

To return excess funds to stockholders through dividends and share repurchases.

Over the long term, assuming annual cash flows from operating activities remain strong, Mattel plans to use its free cash flows to invest in strategic acquisitions and to return funds to stockholders through cash dividends and share repurchases. Mattel's share repurchase program has no expiration date and repurchases will take place from time to time, depending on market conditions. The ability to successfully implement the capital deployment plan is directly dependent on Mattel's ability to generate strong annual cash flows from operating activities. There is no assurance that Mattel will continue to generate strong annual cash flows from operating activities or achieve its targeted goals for investing activities.

Operating Activities

Cash flows from operating activities were \$888.6 million during 2014, as compared to \$698.4 million during 2013 and \$1.28 billion during 2012. The increase in cash flows from operating activities in 2014 from 2013 was primarily due to reductions in working capital usage, partially offset by lower net income. The decrease in cash flows from operating activities in 2013 from 2012 was primarily due to higher working capital usage, including payment of the Litigation Charge of approximately \$138 million, partially offset by higher net income.

Investing Activities

Cash flows used for investing activities were \$708.6 million during 2014, as compared to \$242.1 million during 2013 and \$900.2 million during 2012. The increase in cash flows used for investing activities in 2014 from 2013 was primarily due to the acquisition of MEGA Brands. The decrease in cash flows used for investing activities in 2013 from 2012 was primarily due to the acquisition of HIT Entertainment in 2012, partially offset by higher purchases of tools, dies, and molds and other property, plant, and equipment in 2013.

Financing Activities

Cash flows used for financing activities were \$227.3 million during 2014, as compared to \$740.0 million during 2013 and \$410.9 million during 2012. The decrease in cash flows used for financing activities in 2014 from 2013 was primarily due to lower repayments of long-term borrowings and lower share repurchases, partially offset by lower proceeds from the exercise of stock options. The increase in cash flows used for financing activities in 2013 from 2012 was primarily due to higher share repurchases and higher repayments of long-term borrowings, partially offset by net proceeds from long-term borrowings.

During 2014, Mattel repurchased 4.9 million shares of its common stock at a cost of \$177.2 million. During 2013, Mattel repurchased 11.0 million shares of its common stock at a cost of \$469.2 million. During 2012, Mattel repurchased 2.3 million shares of its common stock at a cost of \$77.9 million, of which \$23.5 million was unsettled at December 31, 2012. Mattel's share repurchase program was first announced on July 21, 2003. On July 17, 2013, the Board of Directors authorized Mattel to increase its share repurchase program by \$500.0

Table of Contents

million. At December 31, 2014, share repurchase authorizations of \$203.0 million had not been executed. Repurchases under the program will take place from time to time, depending on market conditions. Mattel's share repurchase program has no expiration date.

During 2014, 2013, and 2012, Mattel paid total dividends per share of \$1.52, \$1.44, and \$1.24, respectively, to holders of its common stock. The Board of Directors declared the dividends on a quarterly basis, and Mattel paid the dividends during the quarters in which the dividends were declared. The payment of dividends on common stock is at the discretion of the Board of Directors and is subject to customary limitations. Dividend payments were \$514.8 million, \$494.4 million, and \$423.4 million in 2014, 2013, and 2012, respectively.

Seasonal Financing

See Item 8 Financial Statements and Supplementary Data Note 5 to the Consolidated Financial Statements Seasonal Financing and Debt.

Financial Position

Mattel's cash and equivalents decreased \$67.6 million to \$971.7 million at December 31, 2014, as compared to \$1.04 billion at December 31, 2013. The decrease was primarily due to dividend payments, the acquisition of MEGA Brands, purchases of tools, dies, and molds and other property, plant, and equipment, and share repurchases, partially offset by cash flow from operating activities and net proceeds from the issuance of \$500.0 million of 2.35% senior unsecured notes due May 6, 2019 (the 2014 Senior Notes).

Accounts receivable decreased \$166.9 million to \$1.09 billion at December 31, 2014, as compared to \$1.26 billion at December 31, 2013. Inventory decreased \$6.8 million to \$562.0 million at December 31, 2014, as compared to \$568.8 million at December 31, 2013. The decrease in accounts receivable was primarily due to lower sales volume and the timing of cash collections. The decrease in inventory was primarily due to efforts to tightly manage inventory as a result of sales volume declines and lower advanced purchases of raw materials. The change in accounts receivable and inventory from December 31, 2013 includes an increase of \$84.5 million and \$32.7 million, respectively, related to the MEGA Brands acquisition.

Accounts payable and accrued liabilities increased \$54.7 million to \$1.07 billion at December 31, 2014, as compared to \$1.02 billion at December 31, 2013. The increase was primarily due to the timing and amount of payments for various liabilities, including royalties and advertising and promotion, partially offset by lower incentive compensation accruals. The change in accounts payable and accrued liabilities from December 31, 2013 includes an increase of \$45.3 million related to the MEGA Brands acquisition.

As of December 31, 2014, Mattel had no foreign short-term bank loans outstanding, which is a decrease of \$4.3 million from December 31, 2013.

A summary of Mattel's capitalization is as follows:

	December 31,			
	2014	(In millions, except percentage information)		2013
2010 Senior Notes	\$ 500.0	9%	\$ 500.0	9%
2011 Senior Notes	600.0	11	600.0	12
2013 Senior Notes	500.0	9	500.0	9
2014 Senior Notes	500.0	9		
Total noncurrent long-term debt	2,100.0	38	1,600.0	30
Other noncurrent liabilities	584.0	10	540.6	10
Stockholders' equity	2,949.1	52	3,251.6	60
	\$ 5,633.1	100%	\$ 5,392.2	100%

Table of Contents

Noncurrent long-term debt increased \$500.0 million from December 31, 2013 to \$2.10 billion at December 31, 2014, due to the issuance of \$500.0 million of 2014 Senior Notes.

Stockholders' equity decreased \$302.5 million from December 31, 2013 to \$2.95 billion at December 31, 2014, primarily due to dividend payments, currency translation adjustments, and share repurchases, partially offset by net income.

Mattel's debt-to-total capital ratio, including short-term borrowings and the current portion of long-term debt, increased from 33.0% at December 31, 2013 to 41.6% at December 31, 2014 as a result of higher borrowings and lower stockholders' equity.

Off-Balance Sheet Arrangements

Mattel has no off-balance sheet arrangements that have or are reasonably likely to have a current or future material effect on its financial condition, revenues or expenses, results of operations, liquidity, capital expenditures, or capital resources.

Commitments

In the normal course of business, Mattel enters into debt agreements and contractual arrangements to obtain and protect Mattel's right to create and market certain products and for future purchases of goods and services to ensure availability and timely delivery. These arrangements include commitments for future inventory and service purchases and royalty payments pursuant to licensing agreements. Certain of these commitments routinely contain provisions for guarantees or minimum expenditures during the terms of the contracts. Mattel also has defined benefit and postretirement benefit plans, which require future cash contributions and benefit payments. Additionally, Mattel routinely enters into noncancelable lease agreements for premises and equipment used, which contain minimum rental payments.

The following table summarizes Mattel's contractual commitments and obligations:

	Total	2015	2016	2017 (In millions)	2018	2019	Thereafter
Long-term debt	\$ 2,100.0	\$	\$ 300.0	\$	\$ 250.0	\$ 500.0	\$ 1,050.0
Interest on long-term debt	1,043.5	74.1	72.9	66.6	63.2	54.7	712.0
Capital leases*	1.5	0.3	0.3	0.3	0.3	0.3	
Operating leases	519.5	113.8	93.9	73.3	54.5	40.2	143.8
Minimum guarantees under licensing and similar agreements	284.6	62.9	108.9	66.1	29.1	17.5	0.1
Defined benefit and postretirement benefit plans	415.4	34.7	43.7	45.2	46.5	44.3	201.0
Purchases of inventory, services, and other	387.4	363.0	21.1	2.6	0.7		
Total	\$ 4,751.9	\$ 648.8	\$ 640.8	\$ 254.1	\$ 444.3	\$ 657.0	\$ 2,106.9

* Represents total obligation, including imputed interest of \$0.3 million.

Liabilities for uncertain tax positions for which a cash tax payment is not expected to be made in the next twelve months are classified as other noncurrent liabilities. Due to the uncertainty about the periods in which examinations will be completed and limited information related to current audits, Mattel is not able to make reasonably reliable estimates of the periods in which cash settlements will occur with taxing authorities for the noncurrent liabilities.

Table of Contents

Subsequent Event

On January 26, 2015, Mattel announced that its Board of Directors declared a first quarter dividend of \$0.38 per common share. The dividend is payable on March 6, 2015 to stockholders of record on February 19, 2015.

Litigation

The content of Item 8 Financial Statements and Supplementary Data Note 11 to the Consolidated Financial Statements Commitments and Contingencies Litigation is hereby incorporated by reference in this Item 7.

Effects of Inflation

Inflation rates in the US and in major foreign countries where Mattel does business have not had a significant impact on its results of operations or financial position during 2014, 2013, or 2012. Mattel receives some protection from the impact of inflation from high turnover of inventories and its ability, under certain circumstances and at certain times, to pass on higher prices to its customers.

Employee Savings Plan

Mattel sponsors a 401(k) savings plan, the Mattel, Inc. Personal Investment Plan (the Plan), for its domestic employees. Contributions to the Plan include voluntary contributions by eligible employees and employer automatic and matching contributions by Mattel. The Plan allows employees to allocate both their voluntary contributions and their employer automatic and matching contributions to a variety of investment funds, including a fund that is invested in Mattel common stock (the Mattel Stock Fund). Employees are not required to allocate any of their Plan account balance to the Mattel Stock Fund, allowing employees to limit or eliminate their exposure to market changes in Mattel's stock price. Furthermore, the Plan limits the percentage of the employee's total account balance that may be allocated to the Mattel Stock Fund to 25%. Employees may generally reallocate their account balances on a daily basis. However, pursuant to Mattel's insider trading policy, employees classified as insiders and restricted personnel under Mattel's insider trading policy are limited to certain periods in which they may make allocations into or out of the Mattel Stock Fund.

Application of Critical Accounting Policies and Estimates

Mattel makes certain estimates and assumptions that affect the reported amounts of assets and liabilities and the reported amounts of revenues and expenses. The accounting policies and estimates described below are those Mattel considers most critical in preparing its consolidated financial statements. Management has discussed the development and selection of these critical accounting policies and estimates with the Audit Committee of its Board of Directors, and the Audit Committee has reviewed the disclosures included below. These accounting policies and estimates include significant judgments made by management using information available at the time the estimates are made. As described below, however, these estimates could change materially if different information or assumptions were used instead.

For a summary of Mattel's significant accounting policies, estimates, and methods used in the preparation of Mattel's consolidated financial statements, see Item 8 Financial Statements and Supplementary Data Note 1 to the Consolidated Financial Statements Summary of Significant Accounting Policies. In most instances, Mattel must use an accounting policy or method because it is the only policy or method permitted under accounting principles generally accepted in the United States of America (US GAAP).

Accounts Receivable Allowance for Doubtful Accounts

The allowance for doubtful accounts represents adjustments to customer trade accounts receivable for amounts deemed partially or entirely uncollectible. Management believes the accounting estimate related to the allowance for doubtful accounts is a critical accounting estimate because significant changes in the

Table of Contents

assumptions used to develop the estimate could materially affect key financial measures, including other selling and administrative expenses, net income, and accounts receivable. In addition, the allowance requires a high degree of judgment since it involves estimation of the impact of both current and future economic factors in relation to its customers' ability to pay amounts owed to Mattel.

Mattel's products are sold throughout the world. Products within the North America segment are sold directly to retailers, including discount and free-standing toy stores, chain stores, department stores, other retail outlets and, to a limited extent, wholesalers, and directly to consumers. Products within the International segment are sold directly to retailers and wholesalers in most European, Latin American, and Asian countries, and in Australia and New Zealand, and through agents and distributors in those countries where Mattel has no direct presence.

In recent years, the mass-market retail channel has experienced significant shifts in market share among competitors, causing some large retailers to experience liquidity problems. Mattel's sales to customers are typically made on credit without collateral and are highly concentrated in the third and fourth quarters due to the seasonal nature of toy sales, which results in a substantial portion of trade receivables being collected during the latter half of the year and the first quarter of the following year. There is a risk that customers will not pay, or that payment may be delayed, because of bankruptcy or other factors beyond the control of Mattel. This could increase Mattel's exposure to losses from bad debts.

A small number of customers account for a large share of Mattel's net sales and accounts receivable. In 2014, Mattel's three largest customers, Wal-Mart, Toys 'R Us, and Target, in the aggregate, accounted for approximately 35% of net sales, and its ten largest customers, in the aggregate, accounted for approximately 45% of net sales. As of December 31, 2014, Mattel's three largest customers accounted for approximately 34% of net accounts receivable, and its ten largest customers accounted for approximately 47% of net accounts receivable. The concentration of Mattel's business with a relatively small number of customers may expose Mattel to a material adverse effect if one or more of Mattel's large customers were to experience financial difficulty.

Mattel has procedures to mitigate its risk of exposure to losses from bad debts. Revenue is recognized upon shipment or upon receipt of products by the customer, depending on the terms, provided that: there are no uncertainties regarding customer acceptance; persuasive evidence of an agreement exists documenting the specific terms of the transaction; the sales price is fixed or determinable; and collectibility is reasonably assured. Value added taxes are recorded on a net basis and are excluded from revenue. Credit limits and payment terms are established based on the underlying criteria that collectibility must be reasonably assured at the levels set for each customer. Extensive evaluations are performed on an ongoing basis throughout the fiscal year of each customer's financial performance, cash generation, financing availability, and liquidity status. Customers are reviewed at least annually, with more frequent reviews being performed, if necessary, based on the customer's financial condition and the level of credit being extended. For customers who are experiencing financial difficulties, management performs additional financial analyses prior to shipping to those customers on credit. Customers' terms and credit limits are adjusted, if necessary, to reflect the results of the review. Mattel uses a variety of financial arrangements to ensure collectibility of accounts receivable of customers deemed to be a credit risk, including requiring letters of credit, factoring, purchasing various forms of credit insurance with unrelated third parties, or requiring cash in advance of shipment.

The following table summarizes Mattel's allowance for doubtful accounts at December 31:

	2014	2013	2012
	(In millions, except percentage information)		
Allowance for doubtful accounts	\$ 26.3	\$ 20.4	\$ 33.5
As a percentage of total accounts receivable	1.7%	1.6%	2.7%

Table of Contents

Mattel's allowance for doubtful accounts is based on management's assessment of the business environment, customers' financial condition, historical collection experience, accounts receivable aging, and customer disputes. Changes in the allowance for doubtful accounts reflect management's assessment of the factors noted above, including past due accounts, disputed balances with customers, and the financial condition of customers. The allowance for doubtful accounts is also affected by the time at which uncollectible accounts receivable balances are actually written off.

Mattel believes that its allowance for doubtful accounts at December 31, 2014 is adequate and proper. However, as described above, Mattel's business is greatly dependent on a small number of customers. Should one or more of Mattel's major customers experience liquidity problems, then the allowance for doubtful accounts may not be sufficient to cover such losses. Any incremental bad debt charges would negatively affect the results of operations of one or more of Mattel's business segments.

Inventories Allowance for Obsolescence

Inventories, net of an allowance for excess quantities and obsolescence, are stated at the lower of cost or market. Inventory obsolescence reserves are recorded for damaged, obsolete, excess, and slow-moving inventory. Inventory allowances are charged to cost of sales and establish a lower cost basis for the inventory. Management believes that the accounting estimate related to the allowance for obsolescence is a critical accounting estimate because changes in the assumptions used to develop the estimate could materially affect key financial measures, including gross profit, net income, and inventories. As more fully described below, valuation of Mattel's inventory could be impacted by changes in public and consumer preferences, demand for product, or changes in the buying patterns of both retailers and consumers and inventory management of customers.

In the toy industry, orders are subject to cancellation or change at any time prior to shipment since actual shipments of products ordered and order cancellation rates are affected by consumer acceptance of product lines, strength of competing products, marketing strategies of retailers, changes in buying patterns of both retailers and consumers, and overall economic conditions. Unexpected changes in these factors could result in excess inventory in a particular product line, which would require management to record a valuation adjustment on such inventory.

Mattel bases its production schedules for toy products on customer orders and forecasts, taking into account historical trends, results of market research, and current market information. Mattel ships products in accordance with delivery schedules specified by its customers, who usually request delivery within three months. In anticipation of retail sales in the traditional holiday season, Mattel significantly increases its production in advance of the peak selling period, resulting in a corresponding build-up of inventory levels in the first three quarters of its fiscal year. These seasonal purchasing patterns and requisite production lead times create risk to Mattel's business associated with the underproduction of popular toys and the overproduction of toys that do not match consumer demand. Retailers are also attempting to manage their inventories more tightly, requiring Mattel to ship products closer to the time the retailers expect to sell the products to consumers. These factors increase inventory valuation risk since Mattel's inventory levels may be adversely impacted by the need to pre-build products before orders are placed.

When current conditions in the domestic and global economies become uncertain, it is difficult to estimate the level of growth or contraction for the economy as a whole. It is even more difficult to estimate growth or contraction in various parts of the economy, including the economies in which Mattel participates. Because all components of Mattel's budgeting and forecasting are dependent upon estimates of growth or contraction in the markets it serves and demand for its products, economic uncertainty makes estimates of future demand for product more difficult. Such economic changes may affect the sales of Mattel's products and its corresponding inventory levels, which could potentially impact the valuation of its inventory.

Table of Contents

At the end of each quarter, management within each business segment, North America, International, and American Girl, performs a detailed review of its inventory on an item-by-item basis and identifies products that are believed to be impaired. Management assesses the need for, and the amount of, an obsolescence reserve based on the following factors:

Customer and/or consumer demand for the item,

Overall inventory positions of Mattel's customers,

Strength of competing products in the market,

Quantity on hand of the item,

Sales price of the item,

Mattel's cost for the item, and

Length of time the item has been in inventory.

The timeframe between when an estimate is made and the time of disposal depends on the above factors and may vary significantly. Generally, slow-moving inventory is liquidated during the next annual selling cycle.

The following table summarizes Mattel's obsolescence reserve at December 31:

	2014	2013	2012
	(In millions, except percentage information)		
Allowance for obsolescence	\$ 46.9	\$ 49.1	\$ 46.6
As a percentage of total inventory	7.7%	7.9%	9.1%

Management believes that its allowance for obsolescence at December 31, 2014 is adequate and proper. However, the impact resulting from the aforementioned factors could cause actual results to vary. Any incremental obsolescence charges would negatively affect the results of operations of one or more of Mattel's business segments.

Goodwill and Nonamortizable Intangible Assets

Mattel tests goodwill and nonamortizable intangible assets for impairment annually or more often if an event or circumstance indicates that an impairment may have occurred. Management believes that the accounting estimates related to the fair value estimates of its goodwill and nonamortizable intangible assets are critical accounting estimates because significant changes in the assumptions used to develop the estimates could materially affect key financial measures, including net income, goodwill, and other intangible assets.

Assessing goodwill for impairment involves a high degree of judgment due to the assumptions that underlie the valuation. For purposes of evaluating whether goodwill is impaired, goodwill is allocated to various reporting units, which are at the operating segment level. Mattel's reporting units are: (i) North America, (ii) International, and (iii) American Girl. Mattel then assesses qualitative factors to determine whether it is more likely than not that the fair value of a reporting unit is less than its carrying value. This qualitative assessment is used as a basis for determining whether it is necessary to perform the quantitative two-step goodwill impairment test. When the quantitative two-step goodwill impairment test is necessary, impairment is determined by estimating the fair value of a reporting unit and comparing that value to the reporting

unit's book value. If the fair value is greater than the book value of the reporting unit, goodwill is not impaired. If an impairment exists, the fair value of the reporting unit is allocated to all of its assets and liabilities excluding goodwill, with the excess amount representing the fair value of goodwill. An impairment loss is measured as the amount by which the book value of the reporting unit's goodwill exceeds the estimated fair value of that goodwill.

Table of Contents

When performing the quantitative two-step goodwill impairment test, Mattel utilizes the fair value based upon the discounted cash flows that the business can be expected to generate in the future (the Income Approach). The Income Approach valuation method requires Mattel to make projections of revenue, operating costs, and working capital investment for the reporting unit over a multi-year period. Additionally, management must make an estimate of a weighted average cost of capital that a market participant would use as a discount rate. Changes in these projections or estimates could result in a reporting unit either passing or failing the first step of the impairment model, which could significantly change the amount of any impairment ultimately recorded.

During the third quarter of 2014, Mattel assessed its goodwill for impairment by evaluating qualitative factors, such as reporting unit performance, results of its most recent quantitative assessments, general economic conditions, access to capital, the industry and competitive environment, current business strategies, and the interest rate environment, for each of its reporting units and determined that it was not more likely than not that the fair value of its reporting units were less than the carrying amounts. As a result of this determination, the quantitative two-step goodwill impairment test was deemed unnecessary.

Testing nonamortizable intangible assets for impairment also involves a high degree of judgment due to the assumptions that underlie the valuation. Mattel evaluates nonamortizable intangible assets, including trademarks and trade names, for impairment by comparing the estimated fair values with the carrying values. The fair value is measured using a multi-period excess earnings method, which reflects the incremental after-tax cash flows attributable to the trademark and trade names after deducting the appropriate contributory asset charges.

During the second quarter of 2013, Mattel changed its brand strategy for Polly Pocket, which includes a more focused allocation of resources to support the Polly Pocket brand in specific markets, resulting in a reduction of the forecasted future cash flows of the brand. As a result of the change, Mattel tested the asset for impairment. The Polly Pocket trade name, which previously had a carrying value of approximately \$113 million, had a fair value of approximately \$99 million, and Mattel recorded an impairment charge of approximately \$14 million within other selling and administrative expenses. In conjunction with the impairment test, Mattel reassessed Polly Pocket's nonamortizable classification and determined that the nonamortizable classification could no longer be supported. As such, the Polly Pocket trade name was reclassified as an amortizable intangible asset, and the remaining fair value of the asset is being amortized over its estimated remaining useful life. See Item 8 Financial Statements and Supplementary Data Note 2 to the Consolidated Financial Statements Goodwill and Other Intangibles for additional information.

During the third quarter of 2014, Mattel performed the annual impairment test for the remaining nonamortizable intangible assets as required and determined that its remaining nonamortizable intangible assets were not impaired as the fair values of the nonamortizable intangible assets exceeded their carrying values. Mattel also considered events and circumstances subsequent to these impairment tests in concluding there was no impairment as of December 31, 2014.

Sales Adjustments

Mattel routinely enters into arrangements with its customers to provide sales incentives, support customer promotions, and provide allowances for returns and defective merchandise. Such programs are based primarily on customer purchases, customer performance of specified promotional activities, and other specified factors such as sales to consumers. Accruals for these programs are recorded as sales adjustments that reduce gross revenue in the period the related revenue is recognized. Sales adjustments for such programs totaled \$694.6 million, \$632.9 million, and \$631.7 million during 2014, 2013, and 2012, respectively.

The above-described programs primarily involve fixed amounts or percentages of sales to customers. Accruals for such programs are calculated based on an assessment of customers' purchases and performance under the programs and any other specified factors. While the majority of sales adjustment amounts are readily

Table of Contents

determinable at period end and do not require estimates, certain of the sales adjustments require management to make estimates. In making these estimates, management considers all available information, including the overall business environment, historical trends, and information from customers. Management believes that the accruals recorded for customer programs as of December 31, 2014 are adequate and proper.

Benefit Plan Assumptions

Mattel and certain of its subsidiaries have retirement and other postretirement benefit plans covering substantially all employees of these companies. See Item 8 Financial Statements and Supplementary Data Note 4 to the Consolidated Financial Statements Employee Benefit Plans.

Actuarial valuations are used in determining amounts recognized in the financial statements for certain retirement and other postretirement benefit plans. These valuations incorporate the following significant assumptions:

Weighted average discount rate to be used to measure future plan obligations and interest cost component of plan income or expense,

Rate of future compensation increases (for defined benefit pension plans),

Expected long-term rate of return on plan assets (for funded plans), and

Health care cost trend rates (for other postretirement benefit plans).

Management believes that these assumptions are critical accounting estimates because significant changes in these assumptions could impact Mattel's results of operations and financial position. Management believes that the assumptions utilized to record its obligations under its plans are reasonable based on the plans' experience and advice received from its outside actuaries. Mattel reviews its benefit plan assumptions annually and modifies its assumptions based on current rates and trends as appropriate. The effects of such changes in assumptions are amortized as part of plan income or expense in future periods.

At the end of each fiscal year, Mattel determines the weighted average discount rate used to calculate the projected benefit obligation. The discount rate is an estimate of the current interest rate at which the benefit plan liabilities could be effectively settled at the end of the year. The discount rate also impacts the interest cost component of plan income or expense. As of December 31, 2014, Mattel determined the discount rate for its domestic benefit plans used in determining the projected and accumulated benefit obligations to be 3.8%, as compared to 4.7% and 4.0% as of December 31, 2013 and 2012, respectively. In estimating this rate, Mattel reviews rates of return on high-quality corporate bond indices, which approximate the timing and amount of benefit payments. Assuming all other benefit plan assumptions remain constant, the decrease in the discount rate from 4.7% to 3.8% would result in a increase in benefit plan expense during 2015 of approximately \$3 million.

The rate of future compensation increases used by Mattel for the benefit obligation and the net periodic pension cost of its domestic defined benefit pension plans averaged 3.8% for 2014, 2013, and 2012, based on plan demographics. This assumption is reviewed annually based on historical salary increases for participants in the defined benefit pension plans and impacts the service and interest cost components of plan income or expense.

The long-term rate of return on plan assets is based on management's expectation of earnings on the assets that secure Mattel's funded defined benefit pension plans, taking into account the mix of invested assets, the arithmetic average of past returns, economic and stock market conditions and future expectations, and the long-term nature of the projected benefit obligation to which these investments relate. The long-term rate of return is used to calculate the expected return on plan assets that is used in calculating pension income or expense. The difference between this expected return and the actual return on plan assets is deferred, net of tax, and is included in accumulated other comprehensive loss. The net deferral of past asset gains or losses affects the calculated

Table of Contents

value of plan assets and, ultimately, future pension income or expense. Mattel's long-term rate of return used in determining plan expense for its domestic defined benefit pension plans was 8.0% in 2014, 2013, and 2012. Assuming all other benefit plan assumptions remain constant, a one percentage point decrease in the expected return on plan assets would result in an increase in benefit plan expense during 2015 of approximately \$4 million.

The health care cost trend rates used by Mattel for its other postretirement benefit plans reflect management's best estimate of expected claim costs over the next ten years. These trend rates impact the service and interest cost components of plan expense. Rates ranging from 8.5% in 2014 to 5.4% in 2030, with rates assumed to stabilize in 2030 and thereafter, were used in determining plan expense for 2014. These rates are reviewed annually and are estimated based on historical costs for participants in the other postretirement benefit plans as well as estimates based on current economic conditions. As of December 31, 2014, Mattel adjusted the health care cost trend rates for its other postretirement benefit plan obligation to 7.5% for participants younger than age 65 and 8.8% for participants age 65 and older. For participants younger than age 65, the cost trend rates are estimated to reduce to 4.5% by 2023, with rates assumed to stabilize in 2023. For participants age 65 and older, the cost trend rates are estimated to reduce to 4.5% by 2024, with rates assumed to stabilize in 2024. Assuming all other postretirement benefit plan assumptions remain constant, a one percentage point increase in the assumed health care cost trend rates would result in an increase in benefit plan expense during 2015 of less than \$1 million.

A one percentage point increase/(decrease) in the assumed health care cost trend rate for each future year would impact the postretirement benefit obligation as of December 31, 2014 by \$2.0 million and \$(1.7) million, respectively, and the service and interest cost recognized for 2014 by \$0.1 million and \$(0.1) million, respectively.

Share-Based Payments

Mattel recognizes the cost of employee share-based payment awards on a straight-line attribution basis over the requisite employee service period, net of estimated forfeitures. In determining when additional tax benefits associated with share-based payment exercises are recognized, Mattel follows the ordering of deductions under the tax law, which allows deductions for share-based payment exercises to be utilized before previously existing net operating loss carryforwards.

Determining the fair value of share-based awards at the measurement date requires judgment, including estimating the expected term that stock options will be outstanding prior to exercise, the associated volatility, and the expected dividends. Mattel estimates the fair value of options granted using the Black-Scholes valuation model. The expected life of the options used in this calculation is the period of time the options are expected to be outstanding and has been determined based on historical exercise experience. Expected stock price volatility is based on the historical volatility of Mattel's stock for a period approximating the expected life, the expected dividend yield is based on Mattel's most recent actual annual dividend payout, and the risk-free interest rate is based on the implied yield available on US Treasury zero-coupon issues approximating the expected life. Judgment is also required in estimating the amount of share-based awards that will be forfeited prior to vesting. Management believes that these assumptions are critical accounting estimates because significant changes in the assumptions used to develop the estimates could materially affect key financial measures, including net income.

Table of Contents

The weighted average grant date fair value of options granted during 2014, 2013, and 2012 was \$4.57, \$8.80, and \$7.32, respectively. The following weighted average assumptions were used in determining the fair value of options granted:

	2014	2013	2012
Expected life (in years)	4.9	4.9	5.0
Risk-free interest rate	1.6%	1.5%	0.7%
Volatility factor	23.7%	31.8%	35.0%
Dividend yield	4.3%	3.4%	3.6%

The following table summarizes the sensitivity of valuation assumptions within the calculation of stock option fair values, if all other assumptions are held constant:

	Increase in Assumption Factor	Increase (Decrease) in Fair Value (in % pts)
Expected life (in years)	1 year	3.6
Risk-free interest rate	1%	12.5
Volatility factor	1%	6.8
Dividend yield	1%	(14.1)

	(Decrease) in Assumption Factor	Increase (Decrease) in Fair Value (in % pts)
Expected life (in years)	(1) year	(3.2)
Risk-free interest rate	(1)%	(9.8)
Volatility factor	(1)%	(4.8)
Dividend yield	(1)%	18.2

Mattel recognized compensation expense of \$12.5 million, \$12.1 million, and \$13.8 million for stock options during 2014, 2013, and 2012, respectively, which is included within other selling and administrative expenses. Compensation expense recognized related to grants of restricted stock units (RSUs), including performance-based restricted stock units (Performance RSUs), was \$39.5 million, \$49.6 million, and \$49.5 million in 2014, 2013, and 2012, respectively, and is also included within other selling and administrative expenses. As of December 31, 2014, total unrecognized compensation cost related to unvested share-based payments totaled \$87.7 million and is expected to be recognized over a weighted-average period of 1.8 years.

Income Taxes

Mattel's income tax provision and related income tax assets and liabilities are based on actual and expected future income, US and foreign statutory income tax rates, and tax regulations and planning opportunities in the various jurisdictions in which Mattel operates. Management believes that the accounting estimates related to income taxes are critical accounting estimates because significant judgment is required in interpreting tax regulations in the US and in foreign jurisdictions, evaluating Mattel's worldwide uncertain tax positions, and assessing the likelihood of realizing certain tax benefits. Actual results could differ materially from those judgments, and changes in judgments could materially affect Mattel's consolidated financial statements.

Certain income and expense items are accounted for differently for financial reporting and income tax purposes. As a result, the income tax expense reflected in Mattel's consolidated statements of operations is different than that reported in Mattel's tax returns filed with the taxing authorities. Some of these differences are permanent, such as expenses that are not deductible in Mattel's tax return, and some differences reverse over

Table of Contents

time, such as depreciation expense. These timing differences create deferred income tax assets and liabilities. Deferred income tax assets generally represent items that can be used as a tax deduction or credit in Mattel's tax returns in future years for which Mattel has already recorded a tax benefit in its consolidated statement of operations. Mattel records a valuation allowance to reduce its deferred income tax assets if, based on the weight of available evidence, management believes expected future taxable income is not likely to support the use of a deduction or credit in that jurisdiction. Management evaluates the level of Mattel's valuation allowances at least annually, and more frequently if actual operating results differ significantly from forecasted results.

Mattel records unrecognized tax benefits for US federal, state, local, and foreign tax positions related primarily to transfer pricing, tax credits claimed, tax nexus, and apportionment. For each reporting period, management applies a consistent methodology to measure unrecognized tax benefits and all unrecognized tax benefits are reviewed periodically and adjusted as circumstances warrant. Mattel's measurement of its unrecognized tax benefits is based on management's assessment of all relevant information, including prior audit experience, the status of audits, conclusions of tax audits, lapsing of applicable statutes of limitations, identification of new issues, and any administrative guidance or developments. Mattel recognizes unrecognized tax benefits in the first financial reporting period in which information becomes available indicating that such benefits will more-likely-than-not (a greater than 50 percent likelihood) be realized.

Mattel's effective tax rate on income before income taxes in 2014 was 15.0%, as compared to 17.8% in 2013. The income tax provision included net tax benefits of \$42.6 million, \$32.2 million, and \$16.0 million in 2014, 2013, and 2012, respectively. The 2014 net tax benefits primarily relate to reassessments of prior years' tax liabilities based on the status of audits and tax filings in various jurisdictions around the world, settlements, and enacted tax law changes, partially offset by a tax charge related to a 2014 tax restructuring for the HIT Entertainment and MEGA Brands operations. The 2013 and 2012 net tax benefits primarily related to the reassessments of prior years' tax liabilities based on the status of audits and tax filings in various jurisdictions around the world, settlements, and enacted tax law changes.

In the normal course of business, Mattel is regularly audited by federal, state, local, and foreign tax authorities. The ultimate settlement of any particular issue with the applicable taxing authority could have a material impact on Mattel's consolidated financial statements.

New Accounting Pronouncements

See Item 8 Financial Statements and Supplementary Data Note 1 to the Consolidated Financial Statements Summary of Significant Accounting Policies.

Non-GAAP Financial Measure

In this Annual Report on Form 10-K, Mattel includes a non-GAAP financial measure, gross sales, which it uses to analyze its operations and to monitor, assess, and identify meaningful trends in its operating and financial performance. Net sales, as reported in the consolidated statements of operations, include the impact of sales adjustments such as trade discounts and other allowances. Gross sales represent sales to customers, excluding the impact of sales adjustments. Consistent with its segment reporting, Mattel presents changes in gross sales as a metric for comparing its aggregate, business unit, brand, and geographic results to highlight significant trends in Mattel's business. Changes in gross sales are discussed because, while Mattel records the detail of such sales adjustments in its financial accounting systems at the time of sale, such sales adjustments are generally not associated with individual products, making net sales less meaningful.

Table of Contents

A reconciliation of gross sales to the most directly comparable GAAP financial measure, net sales, is as follows:

	2014	For the Year 2013 (In thousands)	2012
Revenues by Segment			
North America	\$ 3,011,633	\$ 3,181,205	\$ 3,330,217
International	3,061,506	3,277,840	3,126,088
American Girl	645,309	658,768	596,298
Gross sales	6,718,448	7,117,813	7,052,603
Sales adjustments	(694,629)	(632,921)	(631,722)
Net sales	\$ 6,023,819	\$ 6,484,892	\$ 6,420,881

Table of Contents

Item 7A. Quantitative and Qualitative Disclosures About Market Risk.

Foreign Currency Exchange Rate Risk

Currency exchange rate fluctuations may impact Mattel's results of operations and cash flows. Inventory transactions denominated in the Euro, British pound sterling, Mexican peso, Brazilian real, and Indonesian rupiah were the primary transactions that caused foreign currency transaction exposure for Mattel during 2014, 2013, and 2012. Mattel seeks to mitigate its exposure to market risk by monitoring its foreign currency transaction exposure for the year and partially hedging such exposure using foreign currency forward exchange contracts primarily to hedge its purchase and sale of inventory and other intercompany transactions denominated in foreign currencies. These contracts generally have maturity dates of up to 18 months. For those intercompany receivables and payables that are not hedged, the transaction gains or losses are recorded in the consolidated statement of operations in the period in which the exchange rate changes as part of operating income or other non-operating income/expense, net based on the nature of the underlying transaction. Transaction gains or losses on hedged intercompany inventory transactions are recorded in the consolidated statement of operations in the period in which the inventory is sold to customers. In addition, Mattel manages its exposure to currency exchange rate fluctuations through the selection of currencies used for international borrowings. Mattel does not trade in financial instruments for speculative purposes.

Mattel's financial position is also impacted by currency exchange rate fluctuations on translation of its net investments in subsidiaries with non-US dollar functional currencies. Assets and liabilities of subsidiaries with non-US dollar functional currencies are translated into US dollars at fiscal year-end exchange rates. Income, expense, and cash flow items are translated at weighted average exchange rates prevailing during the fiscal year. The resulting currency translation adjustments are recorded as a component of accumulated other comprehensive loss within stockholders' equity. Mattel's primary currency translation exposures during 2014 were related to its net investments in entities having functional currencies denominated in the Euro, Mexican peso, British pound sterling, Russian ruble, and Brazilian real.

There are numerous factors impacting the amount by which Mattel's financial results are affected by foreign currency translation and transaction gains and losses resulting from changes in currency exchange rates, including, but not limited to, the level of foreign currency forward exchange contracts in place at a given time and the volume of foreign currency-denominated transactions in a given period. However, assuming that such factors were held constant, Mattel estimates that a 1 percent change in the US dollar Trade-Weighted Index would impact Mattel's net sales by approximately 0.5% and its full year earnings per share by approximately \$0.01 to \$0.02.

Table of Contents

Mattel's foreign currency forward exchange contracts that were used to hedge firm foreign currency commitments as of December 31, 2014 are shown below. All contracts in the following table are against the US dollar and are maintained by reporting units with a US dollar functional currency, with the exception of the Indonesian rupiah contracts, which are maintained by entities with a rupiah functional currency.

	Contract Amount	Buy Weighted Average Contract Rate	Fair Value	Contract Amount	Sell Weighted Average Contract Rate	Fair Value
(In thousands of US dollars, except for rates)						
Australian dollar*	\$ 42,682	0.82	\$ (82)	\$ 4,934	0.91	\$ 557
British pound sterling*	44,743	1.57	(485)			
Canadian dollar*	12,886	0.86	19	14,574	0.89	517
Czech koruna	809	21.96	(29)			
Danish krone	51	5.95	(2)			
Euro*	265,501	1.25	(8,565)	377,501	1.33	32,349
Hungarian forint	2,104	249.64	(93)			
Indonesian rupiah	72,418	12,590.81	(431)			
Japanese yen				13,154	117.20	285
Mexican peso	117,913	14.73		75,489	14.73	252
New Turkish lira	1,257	2.37	16			
New Zealand dollar*	17,149	0.78	38			
Polish zloty	11,915	3.36	(594)			
Russian ruble	5,560	62.95	1,028			
Singapore dollar	6,483	1.31	(90)			
Swiss franc	29,014	0.96	(1,016)			
Taiwan dollar				13,657	31.50	83
	\$ 630,485		\$ (10,286)	\$ 499,309		\$ 34,043

* The weighted average contract rate for these contracts is quoted in US dollar per local currency.

For the purchase of foreign currencies, fair value reflects the amount, based on dealer quotes, that Mattel would pay at maturity for contracts involving the same notional amounts, currencies, and maturity dates, if they had been entered into as of December 31, 2014. For the sale of foreign currencies, fair value reflects the amount, based on dealer quotes, that Mattel would receive at maturity for contracts involving the same notional amounts, currencies, and maturity dates, if they had been entered into as of December 31, 2014. The differences between the market forward amounts and the contract amounts are expected to be fully offset by currency transaction gains and losses on the underlying hedged transactions.

In addition to the contracts involving the US dollar detailed in the above table, Mattel also had contracts to sell British pound sterling for the purchase of Euro. As of December 31, 2014, these contracts had a contract amount of \$57.7 million and a fair value of \$(2.0) million.

Had Mattel not entered into hedges to limit the effect of currency exchange rate fluctuations on its results of operations and cash flows, its income before income taxes would have increased by approximately \$32 million in 2014, decreased by approximately \$9 million in 2013, and decreased by approximately \$35 million in 2012.

Venezuelan Operations

Since January 1, 2010, Mattel has accounted for Venezuela as a highly inflationary economy as the three-year cumulative inflation rate for Venezuela exceeded 100%. Accordingly, Mattel's Venezuelan subsidiary uses the US dollar as its functional currency, and monetary assets and liabilities denominated in Venezuelan bolivar fuerte (BsF) generate income or expense for changes in value associated with foreign currency exchange rate

Table of Contents

fluctuations against the US dollar. From January 2010 through January 2013, Mattel's Venezuelan subsidiary used the Sistema de Transacciones con Títulos en Moneda Extranjera (SITME) rate, which was controlled by the Central Bank of Venezuela, to remeasure monetary assets and liabilities denominated in BsF. The SITME rate was quoted at 5.30 BsF per US dollar as of December 31, 2012.

During February 2013, the Central Bank of Venezuela revised its official exchange rate to 6.30 BsF per US dollar and eliminated the SITME rate. Since February 2013, Mattel's Venezuelan subsidiary has used the official exchange rate as its remeasurement rate. The change in the exchange rate resulted in an unrealized foreign currency exchange loss of approximately \$5 million, which was primarily recognized within other non-operating (income) expense, net in the consolidated statements of operations in the first quarter of 2013.

During March 2013, the Venezuelan government announced a complementary currency exchange system, the Sistema Complementario de Administracion de Divisas 1 (SICAD 1). Participation in SICAD 1 is controlled by the Venezuelan government. SICAD 1 is intended to function as an auction system, allowing entities in specific sectors to bid for US dollars to be used for specified import transactions. During December 2013, the government regulation that created SICAD 1 was amended to expand its use and to require publication of the average exchange rate implied by transactions settled in SICAD 1 auctions. In January 2014, the Venezuelan government announced a new foreign currency administration body, the National Center for Foreign Commerce (CENCOEX), which approves certain transactions at the official rate.

During February 2014, the Venezuelan government created a third currency exchange system called the Sistema Complementario de Administracion de Divisas 2 (SICAD 2), which was expected to provide a greater supply of US dollars from sources other than the Venezuelan government, is expected to allow all sectors and companies to participate, and is expected to permit US dollars to be offered in cash or bonds. Foreign exchange transactions in SICAD 2 will be regulated by the Central Bank of Venezuela and administered by registered banks, brokerage firms, and exchange houses that have been authorized by the Central Bank of Venezuela.

Mattel was not eligible to access US dollars in Venezuela through SICAD 1. Based on a number of factors, including the restrictions placed on eligible participants, the amount of US dollars available to purchase through the auction process, and the ineligibility of past import transactions to be settled through SICAD 1, Mattel does not believe it was appropriate to use the SICAD 1 rate as its remeasurement rate as of December 31, 2014. However, had Mattel used the SICAD 1 rate of 12.00 BsF per US dollar as of December 31, 2014 as its remeasurement rate, it would have recognized a pre-tax charge of approximately \$10 million in its consolidated statement of operations.

Mattel was not able to access US dollars in Venezuela through SICAD 2 due to the restrictions associated with SICAD 2 and the limited access to the SICAD 2 system. As such, Mattel does not believe it was appropriate to use the SICAD 2 rate as its remeasurement rate as of December 31, 2014. However, had Mattel used the SICAD 2 rate of 49.99 BsF per US dollar as of December 31, 2014 as its remeasurement rate, it would have recognized a pre-tax charge of approximately \$19 million in its consolidated statement of operations.

During February 2015, the Venezuelan government announced that it will launch a new three-tiered currency exchange platform, which will include a new exchange system called the Marginal Currency System (SIMADI). The first tier will be used for food, medicine, agriculture, and other essential goods and will use the existing official exchange rate of 6.30 BsF per US dollar. The second tier will be a merger of the SICAD 1 and SICAD 2 systems, which will continue to hold periodic auctions for entities in specific sectors. The third tier will be the new SIMADI system, which is a market-driven exchange that will allow for legal trading of foreign currency based on supply and demand. Mattel will monitor the accessibility of US dollars through the new currency exchange platform and will assess the impact to its financial statements as additional information becomes available.

Table of Contents

Mattel's Venezuelan subsidiary represented less than 0.1% of Mattel's consolidated net sales in 2014 and had approximately \$22 million of net monetary assets denominated in BsF as of December 31, 2014. Venezuela currency matters, along with economic and political instability, continue to impact the operating results of Mattel's Venezuelan subsidiary. If the Venezuelan bolivar fuerte significantly devalues in the future, or if the economic or political conditions significantly worsen, Mattel may consider ceasing operations of its Venezuelan subsidiary, which could result in a pre-tax charge to its consolidated statement of operations of up to \$95 million.

Item 8. Financial Statements and Supplementary Data.

MANAGEMENT'S REPORT ON INTERNAL CONTROL OVER FINANCIAL REPORTING

Management is responsible for establishing and maintaining adequate internal control over financial reporting (as defined in Exchange Act Rules 13a-15(f) and 15d-15(f)). Mattel's management, including Christopher A. Sinclair, its principal executive officer, and Kevin M. Farr, its principal financial officer, evaluated the effectiveness of Mattel's internal control over financial reporting using the framework in *Internal Control - Integrated Framework (2013)* issued by the Committee of Sponsoring Organizations of the Treadway Commission. The scope of management's evaluation of the effectiveness of internal control over financial reporting does not include any internal controls of MEGA Brands Inc., a corporation incorporated under the laws of Canada ("MEGA Brands"), which was acquired on April 30, 2014. This exclusion is in accordance with the SEC's general guidance that a recently acquired business may be omitted from the scope of the assessment in the year of acquisition. MEGA Brands, excluding acquired intangible assets, represented less than 3% of Mattel's total assets as of December 31, 2014 and less than 5% of Mattel's total net sales for the year ended December 31, 2014. Based on this evaluation, management concluded that Mattel's internal control over financial reporting was effective as of December 31, 2014. The effectiveness of the Company's internal control over financial reporting as of December 31, 2014 has been audited by PricewaterhouseCoopers LLP, an independent registered public accounting firm, as stated in their report which appears herein.

Table of Contents

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

To the Board of Directors and Stockholders of Mattel, Inc.

In our opinion, the consolidated financial statements listed in the index appearing under Item 15(a)(1) present fairly, in all material respects, the financial position of Mattel, Inc. and its subsidiaries at December 31, 2014 and December 31, 2013, and the results of their operations and their cash flows for each of the three years in the period ended December 31, 2014 in conformity with accounting principles generally accepted in the United States of America. In addition, in our opinion, the financial statement schedule listed in the index appearing under Item 15(a)(2) presents fairly, in all material respects, the information set forth therein when read in conjunction with the related consolidated financial statements. Also in our opinion, the Company maintained, in all material respects, effective internal control over financial reporting as of December 31, 2014, based on criteria established in *Internal Control Integrated Framework (2013)* issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO). The Company's management is responsible for these financial statements and financial statement schedule, for maintaining effective internal control over financial reporting and for its assessment of the effectiveness of internal control over financial reporting, included in Management's Report on Internal Control Over Financial Reporting appearing under Item 8. Our responsibility is to express opinions on these financial statements, on the financial statement schedule, and on the Company's internal control over financial reporting based on our integrated audits. We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audits to obtain reasonable assurance about whether the financial statements are free of material misstatement and whether effective internal control over financial reporting was maintained in all material respects. Our audits of the financial statements included examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements, assessing the accounting principles used and significant estimates made by management, and evaluating the overall financial statement presentation. Our audit of internal control over financial reporting included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. Our audits also included performing such other procedures as we considered necessary in the circumstances. We believe that our audits provide a reasonable basis for our opinions.

A company's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that (i) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (ii) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (iii) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

As described in Management's Report on Internal Control Over Financial Reporting, management has excluded MEGA Brands Inc. (MEGA Brands), from its assessment of internal control over financial reporting as of December 31, 2014 because MEGA Brands was acquired by the Company in a purchase business combination during 2014. We have also excluded MEGA Brands from our audit of internal control over financial reporting. MEGA Brands is a wholly-owned subsidiary whose total assets and total revenues represent less than 3% and less than 5%, respectively, of the related consolidated financial statement amounts as of and for the year ended December 31, 2014.

MATTEL, INC. AND SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

Note 1 Summary of Significant Accounting Policies

Principles of Consolidation and Basis of Preparation

The consolidated financial statements include the accounts of Mattel, Inc. and its subsidiaries. All wholly and majority-owned subsidiaries are consolidated and included in Mattel's consolidated financial statements. Mattel does not have any minority stock ownership interests in which it has a controlling financial interest that would require consolidation. All significant intercompany accounts and transactions have been eliminated upon consolidation.

Use of Estimates

Preparation of the consolidated financial statements in conformity with accounting principles generally accepted in the United States of America (US GAAP) requires management to make estimates and assumptions that affect the amounts reported in the consolidated financial statements and accompanying notes. Actual results could ultimately differ from those estimates.

Cash and Equivalents

Cash and equivalents include short-term investments, which are highly liquid investments with maturities of three months or less when purchased. Such investments are stated at cost, which approximates market value.

Accounts Receivable and Allowance for Doubtful Accounts

Credit is granted to customers on an unsecured basis. Credit limits and payment terms are established based on extensive evaluations made on an ongoing basis throughout the fiscal year of the financial performance, cash generation, financing availability, and liquidity status of each customer. Customers are reviewed at least annually, with more frequent reviews performed as necessary, based on the customers' financial condition and the level of credit being extended. For customers who are experiencing financial difficulties, management performs additional financial analyses before shipping to those customers on credit. Mattel uses a variety of financial arrangements to ensure collectibility of accounts receivable of customers deemed to be a credit risk, including requiring letters of credit, purchasing various forms of credit insurance with unrelated third parties, factoring, or requiring cash in advance of shipment.

Mattel records an allowance for doubtful accounts based on management's assessment of the business environment, customers' financial condition, historical collection experience, accounts receivable aging, and customer disputes.

Inventories

Inventories, net of an allowance for excess quantities and obsolescence, are stated at the lower of cost or market. Inventory allowances are charged to cost of sales and establish a lower cost basis for the inventory. Cost is determined by the first-in, first-out method.

Property, Plant, and Equipment

Property, plant, and equipment are stated at cost less accumulated depreciation. Depreciation is computed using the straight-line method over estimated useful lives of 10 to 30 years for buildings, 3 to 10 years for machinery and equipment, 3 to 10 years for software, and 10 to 20 years, not to exceed the lease term, for leasehold improvements. Tools, dies, and molds are depreciated using the straight-line method over 3 years.

Table of Contents

Estimated useful lives are periodically reviewed and, where appropriate, changes are made prospectively. The carrying value of property, plant, and equipment is reviewed when events or changes in circumstances indicate that the carrying value of an asset may not be recoverable. Any potential impairment identified is assessed by evaluating the operating performance and future undiscounted cash flows of the underlying assets. When property is sold or retired, the cost of the property and the related accumulated depreciation are removed from the consolidated balance sheet, and any resulting gain or loss is included in the results of operations.

Goodwill and Intangible Assets

Goodwill is allocated to various reporting units, which are at the operating segment level, for purposes of evaluating whether goodwill is impaired. Mattel's reporting units are: (i) North America, (ii) International, and (iii) American Girl. Components of the operating segments have been aggregated into a single reporting unit as the components have similar economic characteristics. The similar economic characteristics include the nature of the products, the nature of the production processes, the customers, and the manner in which the products are distributed. Mattel tests its goodwill for impairment annually in the third quarter and whenever events or changes in circumstances indicate that the carrying value of a reporting unit may exceed its fair value.

Mattel tests its nonamortizable intangible assets, including trademarks and trade names, for impairment by comparing the estimated fair values of the nonamortizable intangible assets with the carrying values. Mattel tests nonamortizable intangible assets for impairment annually in the third quarter or whenever events or changes in circumstances indicate that the carrying value may exceed its fair value.

Mattel also tests its amortizable intangible assets, which are primarily comprised of trademarks and trade names, for impairment whenever events or changes in circumstances indicate that the carrying value of the asset may not be recovered.

Foreign Currency Translation Exposure

Mattel's reporting currency is the US dollar. The translation of its net investments in subsidiaries with non-US dollar functional currencies subjects Mattel to the impact of currency exchange rate fluctuations in its results of operations and financial position. Assets and liabilities of subsidiaries with non-US dollar functional currencies are translated into US dollars at year-end exchange rates. Income, expense, and cash flow items are translated at weighted average exchange rates prevailing during the year. The resulting currency translation adjustments are recorded as a component of accumulated other comprehensive loss within stockholders' equity. Mattel's primary currency translation exposures in 2014 were related to its net investments in entities having functional currencies denominated in the Euro, Mexican peso, British pound sterling, Russian ruble, and Brazilian real.

Foreign Currency Transaction Exposure

Currency exchange rate fluctuations may impact Mattel's results of operations and cash flows. Mattel's currency transaction exposures include gains and losses realized on unhedged inventory purchases and unhedged receivables and payables balances that are denominated in a currency other than the applicable functional currency. Gains and losses on unhedged inventory purchases and other transactions associated with operating activities are recorded in the components of operating income in the consolidated statement of operations. Gains and losses on unhedged intercompany loans and advances are recorded as a component of other non-operating (income) expense, net in the consolidated statement of operations in the period in which the currency exchange rate changes. Inventory transactions denominated in the Euro, British pound sterling, Mexican peso, Brazilian real, and Indonesian rupiah were the primary transactions that caused foreign currency transaction exposure for Mattel in 2014.

Table of Contents

Derivative Instruments

Mattel uses foreign currency forward exchange contracts as cash flow hedges primarily to hedge its purchases and sales of inventory denominated in foreign currencies. At the inception of the contracts, Mattel designates these derivatives as cash flow hedges and documents the relationship of the hedge to the underlying transaction. Hedge effectiveness is assessed at inception and throughout the life of the hedge to ensure the hedge qualifies for hedge accounting. Changes in fair value associated with hedge ineffectiveness, if any, are recorded in the results of operations. Changes in fair value of cash flow hedge derivatives are deferred and recorded as part of accumulated other comprehensive loss in stockholders' equity until the underlying transaction affects earnings. In the event that an anticipated transaction is no longer likely to occur, Mattel recognizes the change in fair value of the derivative in its results of operations in the period the determination is made.

Additionally, Mattel uses foreign currency forward exchange contracts to hedge intercompany loans and advances denominated in foreign currencies. Due to the short-term nature of the contracts involved, Mattel does not use hedge accounting for these contracts, and as such, changes in fair value are recorded in the period of change in the consolidated statements of operations.

Revenue Recognition and Sales Adjustments

Revenue is recognized upon shipment or upon receipt of products by the customer, depending on the terms, provided that: there are no uncertainties regarding customer acceptance; persuasive evidence of an agreement exists documenting the specific terms of the transaction; the sales price is fixed or determinable; and collectibility is reasonably assured. Management assesses the business environment, the customer's financial condition, historical collection experience, accounts receivable aging, and customer disputes to determine whether collectibility is reasonably assured. If collectibility is not considered reasonably assured at the time of sale, Mattel does not recognize revenue until collection occurs. Value added taxes are recorded on a net basis and are excluded from revenue. Mattel routinely enters into arrangements with its customers to provide sales incentives, support customer promotions, and provide allowances for returns and defective merchandise. Such programs are based primarily on customer purchases, customer performance of specified promotional activities, and other specified factors such as sales to consumers. The costs of these programs are recorded as sales adjustments that reduce gross revenue in the period the related revenue is recognized.

Advertising and Promotion Costs

Costs of media advertising are expensed the first time the advertising takes place, except for direct-response advertising, which is capitalized and amortized over its expected period of future benefits. Direct-response advertising consists primarily of catalog production and mailing costs, which are generally amortized within three months from the date the catalogs are mailed.

Product Recalls and Withdrawals

Mattel establishes a reserve for product recalls and withdrawals on a product-specific basis when circumstances giving rise to the recall or withdrawal become known. Facts and circumstances related to the recall or withdrawal, including where the product affected by the recall or withdrawal is located (e.g., with consumers, in customers' inventory, or in Mattel's inventory), cost estimates for shipping and handling for returns, cost estimates for communicating the recall or withdrawal to consumers and customers, and cost estimates for parts and labor if the recalled or withdrawn product is deemed to be repairable, are considered when establishing a product recall or withdrawal reserve. These factors are updated and reevaluated each period, and the related reserves are adjusted when these factors indicate that the recall or withdrawal reserve is either not sufficient to cover or exceeds the estimated product recall or withdrawal expenses.

Table of Contents

Design and Development Costs

Product design and development costs primarily include employee compensation and outside services and are charged to the results of operations as incurred.

Employee Benefit Plans

Mattel and certain of its subsidiaries have retirement and other postretirement benefit plans covering substantially all employees of these companies. Actuarial valuations are used in determining amounts recognized in the financial statements for certain retirement and other postretirement benefit plans (see Note 4 to the Consolidated Financial Statements Employee Benefit Plans).

Share-Based Payments

Mattel recognizes the cost of employee share-based payment awards on a straight-line attribution basis over the requisite employee service period, net of estimated forfeitures. In determining when additional tax benefits associated with share-based payment exercises are recognized, Mattel follows the ordering of deductions under the tax law, which allows deductions for share-based payment exercises to be utilized before previously existing net operating loss carryforwards.

Determining the fair value of share-based awards at the measurement date requires judgment, including estimating the expected term that stock options will be outstanding prior to exercise, the associated volatility, and the expected dividends. Mattel estimates the fair value of options granted using the Black-Scholes valuation model. The expected life of the options used in this calculation is the period of time the options are expected to be outstanding and has been determined based on historical exercise experience. Expected stock price volatility is based on the historical volatility of Mattel's stock for a period approximating the expected life, the expected dividend yield is based on Mattel's most recent actual annual dividend payout, and the risk-free interest rate is based on the implied yield available on US Treasury zero-coupon issues approximating the expected life. Judgment is also required in estimating the amount of share-based awards that will be forfeited prior to vesting.

Income Taxes

Certain income and expense items are accounted for differently for financial reporting and income tax purposes. Deferred income tax assets and liabilities are determined based on the difference between the financial statement and tax bases of assets and liabilities, applying enacted statutory income tax rates in effect for the year in which the differences are expected to reverse.

In the normal course of business, Mattel is regularly audited by federal, state, local, and foreign tax authorities. The ultimate settlement of any particular issue with the applicable taxing authority could have a material impact on Mattel's consolidated financial statements.

Venezuelan Operations

Since 2010, Mattel has accounted for Venezuela as a highly inflationary economy and, accordingly, Mattel's Venezuelan subsidiary uses the US dollar as its functional currency. Mattel's Venezuelan subsidiary has been unable to access US dollars as a result of currency restrictions enacted by the Venezuelan government. These currency restrictions, along with economic and political instability, continue to impact the operating results of Mattel's Venezuelan subsidiary. In 2014, Mattel's Venezuelan subsidiary represented less than 0.1% of Mattel's consolidated net sales in 2014 and had approximately \$22 million of net monetary assets denominated in Venezuelan bolivar fuerte as of December 31, 2014. If the Venezuelan bolivar fuerte significantly devalues in the future, or if the economic or political conditions significantly worsen, Mattel may consider ceasing operations of its Venezuelan subsidiary, which could result in a pre-tax charge to its consolidated statement of operations of up to \$95 million.

Table of Contents*New Accounting Pronouncements*

In April 2014, the Financial Accounting Standards Board (FASB) issued Accounting Standards Update (ASU) 2014-08, *Reporting Discontinued Operations and Disclosures of Disposals of Components of an Entity*, which requires that a disposal of a component of an entity or a group of components of an entity to be reported in discontinued operations if the disposal represents a strategic shift that has, or will have, a major effect on an entity's operations and financial results. The new guidance also requires additional disclosures for discontinued operations to provide more information about the assets, liabilities, revenues, expenses, and cash flows of discontinued operations. ASU 2014-08 will be effective for interim and annual reporting periods beginning after December 15, 2014 for all new disposals, or new classifications as held for sale, of components of an entity that occur within those years and all businesses that are classified as held for sale that occur within those years. Early application is permitted only for disposals, or classifications as held for sale, that have not been reported in financial statements previously issued or available for issuance. Mattel is currently evaluating the impact of the adoption of ASU 2014-08 on its operating results and financial position.

In May 2014, the FASB issued ASU 2014-09, *Revenue from Contracts with Customers (Topic 606)*, which supersedes the revenue recognition requirements in Accounting Standards Codification (ASC) 605, *Revenue Recognition*, and most industry-specific guidance. The core principle of the guidance is that an entity should recognize revenue to depict the transfer of promised goods or services to customers in an amount that reflects the consideration to which the entity expects to be entitled in exchange for those goods or services. The new guidance establishes a five-step model to achieve that core principle and also requires additional disclosures about the nature, amount, timing, and uncertainty of revenue and cash flows arising from customer contracts. ASU 2014-09 will be effective for interim and annual reporting periods beginning after December 15, 2016. Early application is not permitted. Mattel is currently evaluating the impact of the adoption of ASU 2014-09 on its operating results and financial position.

In June 2014, the FASB issued ASU 2014-12, *Accounting for Share-Based Payments When the Terms of an Award Provide That a Performance Target Could Be Achieved after the Requisite Service Period*, which requires that a performance target that affects vesting and that could be achieved after the requisite service period be treated as a performance condition. ASU 2014-12 will be effective for interim and annual reporting periods beginning after December 15, 2015. Early application is permitted. Mattel is currently evaluating the impact of the adoption of ASU 2014-12 on its operating results and financial position.

Note 2 Goodwill and Other Intangibles

Goodwill is allocated to various reporting units, which are at the operating segment level, for purposes of evaluating whether goodwill is impaired. Mattel's reporting units are: (i) North America, (ii) International, and (iii) American Girl. Components of the operating segments have been aggregated into a single reporting unit as the components have similar economic characteristics. The similar economic characteristics include the nature of the products, the nature of the production processes, the customers, and the manner in which the products are distributed.

Table of Contents

The change in the carrying amount of goodwill by operating segment for 2014 and 2013 is shown below. Brand-specific goodwill held by foreign subsidiaries is allocated to the North America and American Girl operating segments selling those brands, thereby causing a foreign currency translation impact for these operating segments.

	North America	International	American Girl	Total
	(In thousands)			
Balance at December 31, 2012	\$ 546,898	\$ 320,169	\$ 213,731	\$ 1,080,798
Currency exchange rate impact	697	1,487	257	2,441
Balance at December 31, 2013	547,595	321,656	213,988	1,083,239
Acquisition	176,182	144,148		320,330
Currency exchange rate impact	(2,264)	(6,569)	(768)	(9,601)
Balance at December 31, 2014	\$ 721,513	\$ 459,235	\$ 213,220	\$ 1,393,968

In the third quarter of 2014, Mattel assessed its goodwill for impairment by evaluating qualitative factors for each of its reporting units and determined that it was not more likely than not that the fair values of its reporting units were less than the carrying amounts. As a result of this determination, the quantitative two-step goodwill impairment test was deemed unnecessary. Mattel has not recorded any goodwill impairment charges since it initially adopted the provisions of ASC 350-20, *Goodwill*.

Acquisition of MEGA Brands Inc.

On April 30, 2014, Mattel acquired MEGA Brands Inc., a corporation incorporated under the laws of Canada (MEGA Brands), pursuant to the Arrangement Agreement dated as of February 27, 2014, between MEGA Brands, Mattel Overseas Operations Ltd., a corporation incorporated under the laws of Bermuda, Mattel-MEGA Holdings Inc., a corporation incorporated under the laws of Canada (the Purchasing Subsidiary), and with respect to certain provisions thereof, Mattel (the Arrangement Agreement). Pursuant to the terms set forth in the Arrangement Agreement, Mattel indirectly acquired, through the Purchasing Subsidiary, 100% of the issued and outstanding common shares and warrants of MEGA Brands for total cash consideration of \$454.9 million, including payment for cash acquired of \$31.6 million. The acquisition of MEGA Brands will build upon Mattel's portfolio of brands by expanding into the construction building sets and arts and crafts categories.

The total purchase consideration was allocated to the assets acquired and liabilities assumed based on their estimated fair values. As a result of the acquisition, Mattel recognized \$95.0 million of identifiable intangible assets (primarily related to trade names and existing product lines), \$39.6 million of net assets acquired (which included \$31.6 million of cash, \$35.3 million of accounts receivable, \$83.3 million of inventory, \$32.5 million of property, plant, and equipment, \$66.6 million of accounts payable and accrued liabilities, \$44.6 million of long-term debt, and \$31.9 million of other net liabilities), and \$320.3 million of goodwill, which is not deductible for tax purposes. The fair values of the identifiable intangible assets related to trade names were based on the relief from royalty method, using Level 3 inputs within the fair value hierarchy, which included forecasted future cash flows, long-term revenue growth rates, royalty rates, and discount rates. The fair values of the identifiable intangible assets related to existing product lines were estimated based on the multi-period excess earnings method, using Level 3 inputs within the fair value hierarchy, which included forecasted future cash flows, long-term revenue growth rates, and discount rates. Goodwill relates to a number of factors built into the purchase price, including the future earnings and cash flow potential of the business, as well as the complementary strategic fit and the resulting synergies it brings to Mattel's existing operations. Mattel is in the process of finalizing the valuation of the assets acquired and liabilities assumed. The determination of the final values of assets acquired and liabilities assumed may result in adjustments to the values presented and a corresponding adjustment to goodwill.

During 2014, Mattel recognized approximately \$21 million and \$7 million of integration costs and transaction costs, respectively. Integration and transaction costs are recorded within other selling and administrative expenses in the consolidated statements of operations. The pro forma and actual results of operations for this acquisition have not been presented because they are not material.

Table of Contents*Acquisition of HIT Entertainment*

On February 1, 2012, Mattel acquired Helium Holdings 1A Ltd, a private limited company existing under the laws of Jersey (HIT Entertainment), pursuant to the Stock Purchase Agreement dated as of October 23, 2011, between Mattel's wholly-owned subsidiary, Mattel Entertainment Holdings Limited, a private limited company existing under the laws of England and Wales (the Purchasing Sub), HIT Entertainment's parent company, HIT Entertainment Scottish Limited Partnership, a limited partnership existing under the laws of Scotland and majority-owned by a consortium of funds led by Apax Partners, LLP and its affiliates (the Selling Stockholder) and, with respect to certain provisions thereof, Mattel (the Purchase Agreement). Pursuant to the terms set forth in the Purchase Agreement, Mattel indirectly acquired, through the Purchasing Sub, 100% of the issued and outstanding shares of HIT Entertainment from the Selling Stockholder for total cash consideration of \$713.5 million, including payment for acquired cash, subject to customary adjustments. HIT Entertainment owns and licenses a diverse portfolio of pre-school entertainment brands, including Thomas & Friends.

The total purchase consideration was allocated to the assets acquired and liabilities assumed based on their estimated fair values. As a result of the acquisition, Mattel recognized \$510.7 million of identifiable intangible assets (primarily related to intellectual property rights), \$49.4 million of net liabilities assumed (primarily related to deferred tax liabilities), and \$252.2 million of goodwill, which is not deductible for tax purposes. The fair values of the identifiable intangible assets were estimated based on the multi-period excess earnings method, using Level 3 inputs within the fair value hierarchy, which included forecasted future cash flows, long-term revenue growth rates, and the weighted average cost of capital. Goodwill relates to a number of factors built into the purchase price, including the future earnings and cash flow potential of the business, as well as the complementary strategic fit and the resulting synergies it brings to Mattel's existing operations.

Mattel recognized approximately \$5 million and \$18 million of integration costs during 2013 and 2012, respectively. During 2012, Mattel recognized approximately \$6 million of transaction costs. No integration costs were incurred during 2014, and no transaction costs were incurred during 2014 or 2013. Integration and transaction costs are recorded within other selling and administrative expenses in the consolidated statements of operations. The pro forma and actual results of operations for this acquisition have not been presented because they are not material.

Other Intangibles

Identifiable intangibles include the following:

	December 31,	
	2014	2013
	(In thousands)	
Nonamortizable identifiable intangibles	\$ 498,517	\$ 504,241
Identifiable intangibles (net of amortization of \$103.6 million and \$68.3 million at December 31, 2014 and 2013, respectively)	240,227	176,579
	\$ 738,744	\$ 680,820

In connection with the acquisition of MEGA Brands during 2014, Mattel recognized \$95.0 million of amortizable identifiable intangible assets, primarily related to trade names and existing product lines.

During the second quarter of 2013, Mattel changed its brand strategy for Polly Pocket®, which includes a more focused allocation of resources to support the Polly Pocket brand in specific markets, resulting in a reduction of the forecasted future cash flows of the brand. As a result of the change, Mattel tested the Polly Pocket trade name for impairment. The Polly Pocket trade name, which had a carrying value of approximately \$113 million, was previously determined to be a nonamortizable intangible asset. Its fair value was determined to be approximately \$99 million based on a discounted cash flow analysis using the multi-period excess earnings

Table of Contents

method. Level 3 inputs, including forecasted future cash flows, an estimated useful life, and a discount rate, were used in the valuation. As the fair value of the asset was below the carrying value, Mattel recorded an impairment charge of approximately \$14 million, which was reflected within other selling and administrative expenses in the consolidated statement of operations for the North America and International operating segments during 2013.

In conjunction with the Polly Pocket trade name impairment test, Mattel reassessed the intangible asset's nonamortizable classification and determined that the nonamortizable classification could no longer be supported. During the second quarter of 2013, the Polly Pocket trade name was reclassified as an amortizable intangible asset, and the remaining fair value of the asset is being amortized over its estimated remaining useful life.

Mattel tests nonamortizable intangible assets, including trademarks and trade names, for impairment annually in the third quarter and whenever events or changes in circumstances indicate that the carrying values may exceed the fair values. During 2014, Mattel performed the annual impairment tests and determined that its nonamortizable intangible assets were not impaired.

Mattel also tests its amortizable intangible assets for impairment whenever events or changes in circumstances indicate that the carrying value of the asset may not be recoverable. Mattel determined that its amortizable intangible assets were not impaired during 2014.

Note 3 Income Taxes

Consolidated pre-tax income consists of the following:

	2014	For the Year 2013 (In thousands)	2012
US operations	\$ 39,149	\$ 231,372	\$ 104,707
Foreign operations	547,761	867,756	840,338
	\$ 586,910	\$ 1,099,128	\$ 945,045

The provision (benefit) for current and deferred income taxes consists of the following:

	2014	For the Year 2013 (In thousands)	2012
Current			
Federal	\$ (25,075)	\$ 38,227	\$ 69,639
State	(2,029)	6,447	8,660
Foreign	106,998	130,878	126,465
	79,894	175,552	204,764
Deferred			
Federal	21,987	30,342	(26,489)
State	8,233	(512)	520
Foreign	(22,078)	(10,198)	(10,214)
	8,142	19,632	(36,183)
Provision for income taxes	\$ 88,036	\$ 195,184	\$ 168,581

Table of Contents

Deferred income taxes are provided principally for tax credit carryforwards, research and development expenses, net operating loss carryforwards, employee compensation-related expenses, and certain other reserves that are recognized in different years for financial statement and income tax reporting purposes. Mattel's deferred income tax assets (liabilities) are composed of the following:

	December 31,	
	2014	2013
	(In thousands)	
Tax credit carryforwards	\$ 54,674	\$ 77,396
Research and development expenses	189,694	187,477
Loss carryforwards	172,347	124,201
Allowances and reserves	233,434	202,141
Deferred compensation	91,530	111,850
Postretirement benefits	50,235	37,479
Intangible assets	30,803	
Other	68,604	66,599
Gross deferred income tax assets	891,321	807,143
Intangible assets	(298,444)	(282,737)
Other	(3,868)	(5,555)
Gross deferred income tax liabilities	(302,312)	(288,292)
Deferred income tax asset valuation allowances	(133,297)	(64,641)
Net deferred income tax assets	\$ 455,712	\$ 454,210

The table of deferred tax assets and liabilities as shown above does not include \$4.6 million of deferred tax assets for net operating losses as of December 31, 2013 that arose directly from tax deductions attributable to windfall income tax benefits. In 2014, these deferred tax assets were realized and additional paid-in-capital was increased by \$4.6 million. Mattel uses tax law ordering when determining when excess tax benefits have been realized.

Net deferred income tax assets are reported in the consolidated balance sheets as follows:

	December 31,	
	2014	2013
	(In thousands)	
Prepaid expenses and other current assets	\$ 195,841	\$ 195,872
Other noncurrent assets	385,434	373,638
Accrued liabilities	(181)	(109)
Other noncurrent liabilities	(125,382)	(115,191)
Net deferred income tax assets	\$ 455,712	\$ 454,210

Table of Contents

As of December 31, 2014, Mattel has federal and foreign loss carryforwards totaling \$869.9 million and tax credit carryforwards of \$72.5 million, which excludes carryforwards that do not meet the threshold for recognition in the financial statements. Utilization of these loss and tax credit carryforwards is subject to annual limitations. Mattel's loss and tax credit carryforwards expire in the following periods:

	Loss Carryforwards	Tax Credit Carryforwards
	(In thousands)	
2015 - 2019	\$ 251,698	\$ 25,620
Thereafter	376,764	42,890
No expiration date	241,478	3,959
Total	\$ 869,940	\$ 72,469

Management considered all available evidence under existing tax law and anticipated expiration of tax statutes and determined that a valuation allowance of \$92.6 million was required as of December 31, 2014 for those loss and tax credit carryforwards that are not expected to provide future tax benefits. In addition, management determined that a valuation allowance of \$40.7 million was required as of December 31, 2014 for those deferred tax assets for which there is not sufficient evidence as to their ultimate utilization, primarily related to certain foreign affiliates. Changes in the valuation allowance for 2014 primarily relate to (1) increases in the valuation allowance related to certain MEGA Brands losses and deferred tax assets, 2014 foreign losses without benefits, and for certain deferred tax assets and (2) decreases in the valuation allowance for expirations and projected utilization of tax loss and tax credit carryforwards. Management believes it is more-likely-than-not (a greater than 50 percent likelihood) that Mattel will generate sufficient taxable income in the appropriate future periods to realize the benefit of the remaining net deferred income tax assets of \$455.7 million. Changes in enacted tax laws, audits in various jurisdictions around the world, settlements, or acquisitions could negatively impact Mattel's ability to fully realize all of the benefits of its remaining net deferred tax assets.

Differences between the provision for income taxes at the US federal statutory income tax rate and the provision in the consolidated statements of operations are as follows:

	2014	For the Year 2013	2012
	(In thousands)		
Provision at US federal statutory rate	\$ 205,419	\$ 384,695	\$ 330,766
(Decrease) increase resulting from:			
Foreign earnings taxed at different rates, including withholding taxes	(107,409)	(165,768)	(157,488)
Foreign losses without income tax benefit	20,140	3,215	1,047
State and local taxes, net of US federal benefit	3,760	4,854	6,856
Adjustments to previously accrued taxes	(55,026)	(32,200)	(16,000)
Tax restructuring	12,400		
Other	8,752	388	3,400
Provision for income taxes	\$ 88,036	\$ 195,184	\$ 168,581

In assessing whether uncertain tax positions should be recognized in its financial statements, Mattel first determines whether it is more-likely-than-not that a tax position will be sustained upon examination, including resolution of any related appeals or litigation processes, based on the technical merits of the position. In evaluating whether a tax position has met the more-likely-than-not recognition threshold, Mattel presumes that the position will be examined by the appropriate taxing authority that would have full knowledge of all relevant information. For tax positions that meet the more-likely-than-not recognition threshold, Mattel measures the amount of benefit recognized in the financial statements at the largest amount of benefit that is greater than 50

Table of Contents

percent likely of being realized upon ultimate settlement. Mattel recognizes unrecognized tax benefits in the first financial reporting period in which information becomes available indicating that such benefits will more-likely-than-not be realized.

Mattel records unrecognized tax benefits for US federal, state, local, and foreign tax positions related primarily to transfer pricing, tax credits claimed, tax nexus, and apportionment. For each reporting period, management applies a consistent methodology to measure unrecognized tax benefits, and all unrecognized tax benefits are reviewed periodically and adjusted as circumstances warrant. Mattel's measurement of its unrecognized tax benefits is based on management's assessment of all relevant information, including prior audit experience, the status of audits, conclusions of tax audits, lapsing of applicable statutes of limitations, identification of new issues, and any administrative guidance or developments.

A reconciliation of unrecognized tax benefits is as follows:

	2014	For the Year 2013 (In thousands)	2012
Unrecognized tax benefits at January 1	\$ 111,370	\$ 285,560	\$ 262,560
Increases for positions taken in current year	9,886	12,997	14,800
Increases for positions taken in a prior year	53,221	14,289	21,030
Decreases for positions taken in a prior year	(51,421)	(186,555)	(700)
Decreases for settlements with taxing authorities	(9,493)	(5,135)	(800)
Decreases for lapses in the applicable statute of limitations	(13,206)	(9,786)	(11,330)
Unrecognized tax benefits at December 31	\$ 100,357	\$ 111,370	\$ 285,560

Of the \$100.4 million of unrecognized tax benefits as of December 31, 2014, \$96.8 million would impact the effective tax rate if recognized.

During 2014, Mattel recognized \$2.4 million of interest and penalties related to unrecognized tax benefits, which are reflected in provision for income taxes in the consolidated statements of operations. As of December 31, 2014, Mattel accrued \$18.1 million in interest and penalties related to unrecognized tax benefits. Of this balance, \$17.5 million would impact the effective tax rate if recognized.

In the first quarter of 2014, Mattel adopted ASU 2013-11, *Presentation of an Unrecognized Tax Benefit When a Net Operating Loss Carryforward, a Similar Tax Loss, or a Tax Credit Carryforward Exists*, which generally requires an unrecognized tax benefit, or a portion of an unrecognized tax benefit, to be presented in the financial statements as a reduction to a deferred tax asset for a net operating loss carryforward, a similar tax loss, or a tax credit carryforward. However, to the extent a net operating loss carryforward, a similar tax loss, or a tax credit carryforward is not available at the reporting date to settle any additional income taxes that would result from the disallowance of a tax position or the applicable tax law does not require the entity to use, and the entity does not intend to use, the deferred tax asset for such purpose, the unrecognized tax benefit should be presented in the financial statements as a liability and should not be combined with deferred tax assets. Mattel reclassified unrecognized tax benefits of approximately \$44 million, primarily recorded within other noncurrent liabilities, against its noncurrent deferred tax assets upon adoption in the first quarter of 2014. There was no impact on Mattel's operating results.

In the normal course of business, Mattel is regularly audited by federal, state, local and foreign tax authorities. In May 2014, the IRS completed its audit of Mattel's 2010 and 2011 federal income tax returns. Mattel files multiple state and local income tax returns and remains subject to examination in various of these jurisdictions, including California for the 2008 through 2014 tax years, New York for the 2007 through 2014 tax years, and Wisconsin for the 2008 through 2014 tax years. Mattel files multiple foreign income tax returns and

Table of Contents

remains subject to examination in major foreign jurisdictions, including Hong Kong for the 2008 through 2014 tax years, Brazil, Mexico and Netherlands for the 2009 through 2014 tax years and Russia for the 2011 through 2014 tax years. Based on the current status of federal, state, local and foreign audits, Mattel believes it is reasonably possible that in the next 12 months, the total unrecognized tax benefits could decrease by \$8.7 million related to the settlement of tax audits and/or the expiration of statutes of limitations. The ultimate settlement of any particular issue with the applicable taxing authority could have a material impact on Mattel's consolidated financial statements.

The income tax provision included net tax benefits of \$42.6 million, \$32.2 million, and \$16.0 million in 2014, 2013, and 2012, respectively. The 2014 net tax benefits primarily relate to reassessments of prior years' tax liabilities based on the status of audits and tax filings in various jurisdictions around the world, settlements, and enacted tax law changes, partially offset by a tax charge related to a 2014 tax restructuring for the HIT Entertainment and MEGA Brands operations. The 2013 and 2012 net tax benefits primarily related to the reassessments of prior years' tax liabilities based on the status of audits and tax filings in various jurisdictions around the world, settlements, and enacted tax law changes.

The cumulative amount of undistributed earnings of foreign subsidiaries that Mattel intends to indefinitely reinvest and upon which no deferred US income taxes have been provided is approximately \$6.4 billion as of December 31, 2014. Management periodically reviews the undistributed earnings of its foreign subsidiaries and reassesses the intent to indefinitely reinvest such earnings. It is not practicable for Mattel to determine the deferred tax liability associated with these undistributed earnings due to the availability of foreign tax credits, the complexity of our international holding company structure, the rules governing the utilization of foreign tax credits, and the interplay between utilization of such foreign tax credits and Mattel's other significant tax attributes.

US GAAP requires that windfall income tax benefits related to the exercise of nonqualified stock options and vesting of other stock compensation awards be credited to additional paid-in capital in the period in which such amounts reduce current taxes payable. The exercise of nonqualified stock options and vesting of other stock compensation awards resulted in an increase to additional paid-in capital for related windfall income tax benefits totaling \$21.2 million, \$50.4 million, and \$35.8 million in 2014, 2013, and 2012, respectively.

Note 4 Employee Benefit Plans

Mattel and certain of its subsidiaries have qualified and nonqualified retirement plans covering substantially all employees of these companies. These plans include defined benefit pension plans, defined contribution retirement plans, postretirement benefit plans, and deferred compensation and excess benefit plans. In addition, Mattel makes contributions to government-mandated retirement plans in countries outside the US where its employees work.

A summary of retirement plan expense is as follows:

	2014	For the Year 2013 (In thousands)	2012
Defined contribution retirement plans	\$ 43,819	\$ 43,694	\$ 40,266
Defined benefit pension plans	18,124	30,747	33,597
Deferred compensation and excess benefit plans	4,840	9,298	5,740
Postretirement benefit plans	1,461	2,245	1,607
	\$ 68,244	\$ 85,984	\$ 81,210

Table of Contents*Defined Benefit Pension and Postretirement Benefit Plans*

Mattel provides defined benefit pension plans for eligible domestic employees, which are intended to comply with the requirements of the Employee Retirement Income Security Act of 1974 (ERISA). Some of Mattel 's foreign subsidiaries have defined benefit pension plans covering substantially all of their eligible employees. Mattel funds these plans in accordance with the terms of the plans and local statutory requirements, which differ for each of the countries in which the subsidiaries are located. Mattel also has unfunded postretirement health insurance plans covering certain eligible domestic employees.

A summary of the components of Mattel 's net periodic benefit cost and other changes in plan assets and benefit obligations recognized in other comprehensive income for the years ended December 31 is as follows:

	Defined Benefit Pension Plans			Postretirement Benefit Plans		
	2014	2013	2012	2014	2013	2012
	(In thousands)					
Net periodic benefit cost:						
Service cost	\$ 7,515	\$ 12,982	\$ 13,285	\$ 67	\$ 82	\$ 79
Interest cost	27,708	25,580	29,530	1,377	1,585	1,411
Expected return on plan assets	(31,833)	(29,786)	(31,270)			
Amortization of prior service credit	(1,037)	(1,057)	(502)			
Recognized actuarial loss	15,771	21,193	19,020	17	578	117
Settlement loss		1,835	3,534			
Net periodic benefit cost	\$ 18,124	\$ 30,747	\$ 33,597	\$ 1,461	\$ 2,245	\$ 1,607
Other changes in plan assets and benefit obligations recognized in other comprehensive income:						
Net actuarial loss (gain)	\$ 48,502	\$ (95,744)	\$ 27,144	\$ (2,205)	\$ 3,470	\$ 4,755
Prior service cost (credit)	20		(11,789)			
Amortization of prior service credit	1,037	1,057	501			
Total recognized in other comprehensive income (a)	\$ 49,559	\$ (94,687)	\$ 15,856	\$ (2,205)	\$ 3,470	\$ 4,755
Total recognized in net periodic benefit cost and other comprehensive income	\$ 67,683	\$ (63,940)	\$ 49,453	\$ (744)	\$ 5,715	\$ 6,362

(a) Amounts exclude related tax (benefit) expense of \$(17.8) million, \$32.5 million, and \$(2.3) million, during 2014, 2013, and 2012, respectively, which are also included in other comprehensive income.

Table of Contents

Net periodic benefit cost for Mattel's domestic defined benefit pension and postretirement benefit plans was calculated on January 1 of each year using the following assumptions:

	2014	For the Year 2013	2012
<i>Defined benefit pension plans:</i>			
Discount rate	4.7%	4.0%	4.5%
Weighted average rate of future compensation increases	3.8%	3.8%	3.8%
Long-term rate of return on plan assets	8.0%	8.0%	8.0%
<i>Postretirement benefit plans:</i>			
Discount rate	4.7%	4.0%	4.5%
Annual increase in Medicare Part B premium	6.0%	6.0%	6.0%
<i>Health care cost trend rate:</i>			
Pre-65	8.5%	8.5%	7.5%
Post-65	7.5%	7.5%	7.5%
<i>Ultimate cost trend rate:</i>			
Pre-65	6.1%	6.1%	5.0%
Post-65	5.4%	5.4%	5.0%
<i>Year that the rate reaches the ultimate cost trend rate:</i>			
Pre-65	2030	2030	2017
Post-65	2030	2030	2017

Discount rates, weighted average rates of future compensation increases, and long-term rates of return on plan assets for Mattel's foreign defined benefit pension plans differ from the assumptions used for Mattel's domestic defined benefit pension plans due to differences in local economic conditions in the locations where the non-US plans are based. The rates shown in the preceding table are indicative of the weighted average rates of all Mattel's defined benefit pension plans given the relative insignificance of the foreign plans to the consolidated total.

The estimated net actuarial loss and prior service credit for the domestic defined benefit pension plans that will be amortized from accumulated other comprehensive loss into net periodic benefit cost in 2015 is \$16.7 million. The estimated net actuarial loss for the domestic postretirement benefit plans that will be amortized from accumulated other comprehensive loss into net periodic benefit cost in 2015 is \$0.1 million.

Table of Contents

Mattel used a measurement date of December 31, 2014 for its defined benefit pension and postretirement benefit plans. A summary of the changes in benefit obligation and plan assets is as follows:

	Defined Benefit Pension Plans		Postretirement Benefit Plans	
	2014	2013	2014	2013
(In thousands)				
Change in Benefit Obligation:				
Benefit obligation, beginning of year	\$ 616,938	\$ 669,351	\$ 37,914	\$ 35,433
Service cost	7,515	12,982	67	82
Interest cost	27,708	25,580	1,377	1,585
Impact of currency exchange rate changes	(10,673)	(2,206)		
Actuarial loss (gain)	75,839	(57,418)	(2,188)	4,048
Benefits paid	(39,686)	(31,351)	(2,768)	(3,234)
Benefit obligation, end of year	\$ 677,641	\$ 616,938	\$ 34,402	\$ 37,914
Change in Plan Assets:				
Plan assets at fair value, beginning of year	\$ 456,445	\$ 406,163	\$	\$
Actual return on plan assets	43,804	47,529		
Employer contributions	21,596	32,078	2,768	3,234
Impact of currency exchange rate changes	(6,219)	2,026		
Benefits paid	(39,686)	(31,351)	(2,768)	(3,234)
Plan assets at fair value, end of year	\$ 475,940	\$ 456,445	\$	\$
Net Amount Recognized in Consolidated Balance Sheets:				
Funded status, end of year	\$ (201,701)	\$ (160,493)	\$ (34,402)	\$ (37,914)
Current accrued benefit liability	(2,540)	(2,661)	(3,600)	(2,700)
Noncurrent accrued benefit liability	(199,161)	(157,832)	(30,802)	(35,214)
Total accrued benefit liability	\$ (201,701)	\$ (160,493)	\$ (34,402)	\$ (37,914)
Amounts Recognized in Accumulated Other Comprehensive Loss (a):				
Net actuarial loss	\$ 253,593	\$ 205,091	\$ 4,914	\$ 7,119
Prior service (credit)	(9,036)	(10,093)		
	\$ 244,557	\$ 194,998	\$ 4,914	\$ 7,119

(a) Amounts exclude related tax benefits of \$88.0 million and \$70.2 million for December 31, 2014 and 2013, respectively, which are also included in accumulated other comprehensive loss.

The accumulated benefit obligation differs from the projected benefit obligation in that it assumes future compensation levels will remain unchanged. Mattel's accumulated benefit obligation for its defined benefit pension plans as of December 31, 2014 and 2013 totaled \$632.2 million and \$579.0 million, respectively.

Table of Contents

The assumptions used in determining the projected and accumulated benefit obligations of Mattel's domestic defined benefit pension and postretirement benefit plans are as follows:

	December 31,	
	2014	2013
<i>Defined benefit pension plans:</i>		
Discount rate	3.8%	4.7%
Weighted average rate of future compensation increases	3.8%	3.8%
<i>Postretirement benefit plans:</i>		
Discount rate	3.8%	4.7%
Annual increase in Medicare Part B premium	6.0%	6.0%
<i>Health care cost trend rate:</i>		
Pre-65	7.5%	8.5%
Post-65	8.8%	7.5%
<i>Ultimate cost trend rate:</i>		
Pre-65	4.5%	6.1%
Post-65	4.5%	5.4%
<i>Year that the rate reaches the ultimate cost trend rate:</i>		
Pre-65	2023	2030
Post-65	2024	2030

A one percentage point increase/(decrease) in the assumed health care cost trend rate for each future year would impact the postretirement benefit obligation as of December 31, 2014 by \$2.0 million and \$(1.7) million, respectively, and the service and interest cost recognized for 2014 by \$0.1 million and \$(0.1) million, respectively.

The estimated future benefit payments for Mattel's defined benefit pension and postretirement benefit plans are as follows:

	Defined Benefit Pension Plans	Postretirement Benefit Plans
	(In thousands)	
2015	\$ 31,082	\$ 3,600
2016	40,340	3,400
2017	41,846	3,400
2018	43,161	3,300
2019	41,119	3,200
2020 - 2024	186,866	14,100

Mattel expects to make cash contributions totaling approximately \$21 million to its defined benefit pension and postretirement benefit plans in 2015, which includes approximately \$7 million for benefit payments for its unfunded plans.

Mattel periodically commissions a study of the plans' assets and liabilities to determine an asset allocation that would best match expected cash flows from the plans' assets to expected benefit payments. Mattel monitors the returns earned by the plans' assets and reallocates investments as needed. Mattel's overall investment strategy is to achieve an adequately diversified asset allocation mix of investments that provides for both near-term benefit payments as well as long-term growth. The assets are invested in a combination of indexed and actively managed funds. The target allocations for Mattel's domestic plan assets, which comprise 80% of Mattel's total plan assets, are 35% in US equities, 35% in non-US equities, 20% in US long-term bonds, and 10% in US Treasury inflation-protected securities. The US equities are benchmarked against the S&P 500, and the non-US

Table of Contents

equities are benchmarked against a combination of developed and emerging markets indices. Fixed income securities are long-duration bonds intended to closely match the duration of the liabilities and include US government treasuries and agencies, corporate bonds from various industries, and mortgage-backed and asset-backed securities.

Mattel's defined benefit pension plan assets are measured and reported in the financial statements at fair value using inputs, which are more fully described in Note 10 to the Consolidated Financial Statements Fair Value Measurements, as follows:

	Level 1	December 31, 2014		Total
		Level 2	Level 3	
(In thousands)				
Collective trust funds:

Collective trust funds:				
US equity securities	\$	\$ 174,735	\$	\$ 174,735
International equity securities		164,998		164,998
International fixed income		41,523		41,523
US government and US government agency securities		31,434		31,434
US corporate debt instruments		21,171		21,171
International corporate debt instruments		4,996		4,996
Mutual funds	1,520	7,221		8,741
Other		8,847		8,847
Total	\$ 1,520	\$ 454,925	\$	\$ 456,445

The fair value of collective trust funds and mutual funds are determined based on the net asset value of shares held at year-end. The fair value of US government securities, US government agency securities, and corporate debt instruments are determined based on quoted market prices or are estimated using pricing models with observable inputs, quoted prices of securities with similar characteristics, or discounted cash flows.

Mattel's defined benefit pension plan assets are not directly invested in Mattel common stock. Mattel believes that the long-term rate of return on plan assets of 8.0% used in determining plan expense for the year ended December 31, 2014 was reasonable based on historical returns.

Defined Contribution Retirement Plans

Domestic employees are eligible to participate in a 401(k) savings plan, the Mattel, Inc. Personal Investment Plan (the Plan), sponsored by Mattel, which is a funded defined contribution plan intended to comply with ERISA's requirements. Contributions to the Plan include voluntary contributions by eligible employees and

Table of Contents

employer automatic and matching contributions by Mattel. The Plan allows employees to allocate both their voluntary contributions and their employer automatic and matching contributions to a variety of investment funds, including a fund that is invested in Mattel common stock (the Mattel Stock Fund). Employees are not required to allocate any of their Plan account balance to the Mattel Stock Fund, allowing employees to limit or eliminate their exposure to market changes in Mattel's stock price. Furthermore, the Plan limits the percentage of the employee's total account balance that may be allocated to the Mattel Stock Fund to 25%. Employees may generally reallocate their account balances on a daily basis. However, pursuant to Mattel's insider trading policy, employees classified as insiders and restricted personnel under Mattel's insider trading policy are limited to certain periods in which they may make allocations into or out of the Mattel Stock Fund.

Certain non-US employees participate in other defined contribution retirement plans with varying vesting and contribution provisions.

Deferred Compensation and Excess Benefit Plans

Mattel maintains a deferred compensation plan that permits certain officers and key employees to elect to defer portions of their compensation. The deferred compensation plan, together with certain contributions made by Mattel and participating employees to an excess benefit plan, earns various rates of return. The liability for these plans as of December 31, 2014 and 2013 was \$73.6 million and \$68.0 million, respectively, and is included in other noncurrent liabilities in the consolidated balance sheets. Changes in the market value of the participant-selected investment options are recorded as retirement plan expense within other selling and administrative expenses in the consolidated statements of operations. Separately, Mattel has purchased group trust-owned life insurance contracts designed to assist in funding these programs. The cash surrender value of these policies, valued at \$67.6 million and \$66.0 million as of December 31, 2014 and 2013, respectively, are held in an irrevocable grantor trust, the assets of which are subject to the claims of Mattel's creditors and are included in other noncurrent assets in the consolidated balance sheets.

Incentive Compensation Plans

Mattel has annual incentive compensation plans under which officers and key employees may earn incentive compensation based on Mattel's performance and are subject to certain approvals of the Compensation Committee of the Board of Directors. For 2014, 2013, and 2012, \$25.2 million, \$65.0 million, and \$108.1 million, respectively, was charged to expense for awards under these plans.

Mattel had two long-term incentive program (LTIP) performance cycles in place for the time period between 2012 and 2014: (i) a January 1, 2011 – December 31, 2013 performance cycle, which was established by the Compensation Committee of the Board of Directors in March 2011, and (ii) a January 1, 2014 – December 31, 2016 performance cycle, which was established by the Compensation Committee of the Board of Directors in March 2014.

For the January 1, 2011 – December 31, 2013 LTIP performance cycle, Mattel granted performance-based restricted stock units (Performance RSUs) under the Mattel, Inc. 2010 Equity and Long-Term Compensation Plan to officers and certain employees providing services to Mattel. Performance RSUs granted under this program were earned based on an initial target number with the final number of Performance RSUs payable being determined based on the product of the initial target number of Performance RSUs multiplied by a performance factor based on measurements of Mattel's performance with respect to: (i) annual operating result targets for each year in the performance cycle using a net operating profit after taxes less capital charge measure and a net sales performance measure (the 2011-2013 performance-related components), and (ii) Mattel's total stock return (TSR) for the three-year performance cycle relative to the TSR realized by companies comprising the S&P 500 as of the first day of the performance cycle (the 2011-2013 market-related component), adjusted for dividends declared during the three-year performance cycle. The Performance RSUs also had dividend equivalent rights that were converted to shares of Mattel common stock when the underlying Performance RSUs

Table of Contents

were earned and paid in shares of Mattel common stock. For the January 1, 2011 – December 31, 2013 LTIP performance cycle, 1.0 million shares were earned relating to the 2011-2013 performance-related components, 0.5 million shares were earned relating to the 2011-2013 market-related component, and 0.1 million shares were earned related to dividend equivalent rights, resulting in a total of 1.6 million shares that vested in February 2014.

For the January 1, 2011 – December 31, 2013 LTIP performance cycle, the weighted average grant date fair value of the 2011-2013 performance-related and 2011-2013 market-related components of the Performance RSUs were \$42.30 and \$4.59 per share, respectively, for 2013, and \$32.87 and \$4.55 per share, respectively, for 2012. During 2013 and 2012, \$10.0 million and \$12.4 million, respectively, was charged to expense relating to the 2011-2013 performance-related components. Additionally, during 2013 and 2012, Mattel recognized share-based compensation expense of \$1.4 million and \$1.8 million, respectively, for the 2011-2013 market-related component.

For the January 1, 2014 – December 31, 2016 LTIP performance cycle, Mattel also granted 2014-2016 Performance RSUs under the Mattel, Inc. 2010 Equity and Long-Term Compensation Plan to officers and certain employees providing services to Mattel. Performance RSUs granted under this program are also earned based on an initial target number with the final number of Performance RSUs payable being determined based on the product of the initial target number of Performance RSUs multiplied by a performance factor based on measurements of Mattel's performance with respect to: (i) annual operating result targets for each year in the performance cycle using a net operating profit after taxes less capital charge measure and a net sales performance measure (the 2014-2016 performance-related components), and (ii) Mattel's TSR for the three-year performance cycle relative to the TSR realized by companies comprising the S&P 500 as of the first day of the performance cycle (the 2014-2016 market-related component), adjusted for dividends declared during the three-year performance cycle. The Performance RSUs also have dividend equivalent rights that are converted to shares of Mattel common stock only when and to the extent the underlying Performance RSUs are earned and paid in shares of Mattel common stock. For the 2014-2016 performance-related components, the range of possible outcomes is that between zero and 0.5 million shares can be earned for each year during the performance cycle. For the 2014-2016 market-related component, the possible outcomes range from an upward adjustment of 0.5 million shares to a downward adjustment of 0.5 million shares to the results of the performance-related components over the three-year performance cycle.

For the January 1, 2014 – December 31, 2016 LTIP performance cycle, the weighted average grant date fair value of the performance-related and market-related components of the Performance RSUs were \$39.03 and \$(3.57) per share, respectively, for 2014. During 2014, actual results did not meet minimum performance thresholds, as such no shares were earned and no expense was recognized related to the 2014-2016 performance-related component. During 2014, no share-based compensation expense was recorded related to the 2014-2016 market-related component.

The fair values of the performance-related components were based on the closing stock prices of Mattel's common stock on each of the grant dates. The fair values of the market-related component were estimated at the grant dates using a Monte Carlo valuation methodology.

Note 5 Seasonal Financing and Debt*Seasonal Financing*

Mattel maintains and periodically amends or replaces its domestic unsecured committed revolving credit facility with a commercial bank group. The facility is used as a back-up to Mattel's commercial paper program, which is used as the primary source of financing for the seasonal working capital requirements of its domestic subsidiaries. The agreement governing the credit facility was amended and restated on March 11, 2013 to, among other things, (i) extend the maturity date of the credit facility to March 12, 2018, (ii) increase aggregate commitments under the credit facility to \$1.60 billion, with an accordion feature, which allows Mattel to

Table of Contents

increase the aggregate availability under the credit facility to \$1.85 billion under certain circumstances, (iii) decrease the applicable interest rate margins to a range of 0.00% to 0.75% above the applicable base rate for base rate loans and 0.88% to 1.75% above the applicable LIBOR for Eurodollar rate loans, in each case depending on Mattel's senior unsecured long-term debt rating, and (iv) decrease commitment fees to a range of 0.08% to 0.28% of the unused commitments under the credit facility.

The amended credit facility has a borrowing capacity of up to \$1.60 billion over a term of five years. Prior to the amendment, the facility permitted Mattel to borrow up to \$1.40 billion and had two years remaining to maturity. The proportion of unamortized debt issuance costs from the prior facility renewal related to creditors involved in both the prior facility and amended facility and borrowing costs incurred as a result of the amendment were deferred, and such costs will be amortized over the term of the amended facility.

Mattel is required to meet financial ratio covenants at the end of each quarter and fiscal year, using the formulae specified in the credit agreement to calculate the ratios. Mattel was in compliance with such covenants at the end of each fiscal quarter and fiscal year in 2014. As of December 31, 2014, Mattel's consolidated debt-to-EBITDA ratio, as calculated per the terms of the credit agreement, was 2.30 to 1 (compared to a maximum allowed of 3.00 to 1), and Mattel's interest coverage ratio was 11.55 to 1 (compared to a minimum required of 3.50 to 1).

The credit agreement is a material agreement, and failure to comply with the financial ratio covenants may result in an event of default under the terms of the credit facility. If Mattel were to default under the terms of the credit facility, its ability to meet its seasonal financing requirements could be adversely affected.

Mattel believes its cash on hand, amounts available under its credit facility, and its foreign credit lines will be adequate to meet its seasonal financing requirements in 2015.

To finance seasonal working capital requirements of certain foreign subsidiaries, Mattel avails itself of individual short-term credit lines with a number of banks. As of December 31, 2014, foreign credit lines totaled approximately \$340 million. Mattel expects to extend the majority of these credit lines throughout 2015.

Additionally, sales of foreign receivables occur periodically to finance seasonal working capital requirements. The outstanding amounts of accounts receivable that have been sold under international factoring arrangements were \$22.3 million and \$25.6 million at December 31, 2014 and 2013, respectively. These amounts have been excluded from Mattel's consolidated balance sheets.

In January 2015, a major credit rating agency changed Mattel's long-term credit rating from BBB+ to BBB and maintained its short-term credit rating of A-2 and outlook at stable. Another major credit rating agency maintained Mattel's long-term credit rating of Baa1 and short-term credit rating of P-2 and changed its outlook from stable to negative. A third major credit rating agency maintained Mattel's long-term credit rating of A- and short-term credit rating of F2 and changed its outlook from stable to negative. A reduction in Mattel's credit ratings could increase the cost of obtaining financing.

Short-Term Borrowings

As of December 31, 2014, Mattel had no foreign short-term bank loans outstanding. As of December 31, 2013, Mattel had foreign short-term bank loans outstanding of \$4.3 million. As of December 31, 2014 and 2013, Mattel had no borrowings outstanding under the credit facility.

During 2014 and 2013, Mattel had average borrowings of \$17.5 million and \$38.0 million, respectively, under its foreign short-term bank loans, and \$680.8 million and \$262.3 million, respectively, under the credit facility and other short-term borrowings, to help finance its seasonal working capital requirements. The weighted average interest rate on foreign short-term bank loans during 2014 and 2013 was 11.2% and 9.4%, respectively. The weighted average interest rate on the credit facility and other short-term borrowings was 0.2% during both 2014 and 2013.

Table of Contents*Long-Term Debt*

In May 2014, Mattel issued \$500.0 million aggregate principal amount of 2.35% senior unsecured notes due May 6, 2019 (2014 Senior Notes). Interest on the 2014 Senior Notes is payable semi-annually on May 6 and November 6 of each year, beginning November 6, 2014. Mattel may redeem all or part of the 2014 Senior Notes at any time or from time to time at its option, at a redemption price equal to the greater of (i) 100% of the principal amount of the notes being redeemed plus accrued and unpaid interest to, but excluding, the redemption date, and (ii) a make-whole amount based on the yield of a comparable US Treasury security plus 12.5 basis points.

In March 2013, Mattel issued \$250.0 million aggregate principal amount of 1.70% senior unsecured notes (1.70% Senior Notes) due March 15, 2018 and \$250.0 million aggregate principal amount of 3.15% senior unsecured notes (3.15% Senior Notes) due March 15, 2023 (collectively, 2013 Senior Notes). Interest on the 2013 Senior Notes is payable semi-annually on March 15 and September 15 of each year, beginning September 15, 2013. Mattel may redeem all or part of the 1.70% Senior Notes at any time or from time to time at its option, at a redemption price equal to the greater of (i) 100% of the principal amount of the notes being redeemed plus accrued and unpaid interest to, but excluding, the redemption date, and (ii) a make-whole amount based on the yield of a comparable US Treasury security plus 15 basis points. Mattel may redeem all or part of the 3.15% Senior Notes at any time or from time to time prior to December 15, 2022 (three months prior to the maturity date of the 3.15% Senior Notes) at its option, at a redemption price equal to the greater of (i) 100% of the principal amount of the notes being redeemed plus accrued and unpaid interest to, but excluding, the redemption date, and (ii) a make-whole amount based on the yield of a comparable US Treasury security plus 20 basis points. Mattel may redeem all or part of the 3.15% Senior Notes at any time or from time to time on or after December 15, 2022 (three months prior to the maturity date for the 3.15% Senior Notes) at its option, at a redemption price equal to 100% of the principal amount of the notes to be redeemed plus accrued and unpaid interest to, but excluding, the redemption date.

Mattel's long-term debt consists of the following:

	December 31,	
	2014	2013
	(In thousands)	
2010 Senior Notes due October 2020 and October 2040	\$ 500,000	\$ 500,000
2011 Senior Notes due November 2016 and November 2041	600,000	600,000
2013 Senior Notes due March 2018 and March 2023	500,000	500,000
2014 Senior Notes due May 2019	500,000	
	2,100,000	1,600,000
Less: current portion		
Total long-term debt	\$ 2,100,000	\$ 1,600,000

Mattel's 2010 Senior Notes bear interest at fixed rates ranging from 4.35% to 6.20%, with a weighted average interest rate of 5.275% as of December 31, 2014 and 2013. Mattel's 2011 Senior Notes bear interest at fixed rates ranging from 2.50% to 5.45%, with a weighted average interest rate of 3.975% as of December 31, 2014 and 2013. Mattel's 2013 Senior Notes bear interest at fixed rates ranging from 1.70% to 3.15%, with a weighted average interest rate of 2.425% as of December 31, 2014 and 2013. Mattel's 2014 Senior Notes bear interest at a fixed rate of 2.35% as of December 31, 2014.

During 2014, Mattel repaid \$44.6 million of long-term borrowings assumed through the acquisition of MEGA Brands.

Table of Contents

During 2013, Mattel repaid the remaining \$350.0 million of its 2008 Senior Notes in connection with their scheduled maturity. During 2013, Mattel repaid \$50.0 million of its Medium-term notes in connection with their scheduled maturities.

The aggregate amount of long-term debt maturing in the next five years and thereafter is as follows:

	2010 Senior Notes	2011 Senior Notes	2013 Senior Notes (In thousands)	2014 Senior Notes	Total
2015	\$	\$	\$	\$	\$
2016		300,000			300,000
2017					
2018			250,000		250,000
2019				500,000	500,000
Thereafter	500,000	300,000	250,000		1,050,000
	\$ 500,000	\$ 600,000	\$ 500,000	\$ 500,000	\$ 2,100,000

Note 6 Stockholders Equity*Preference Stock*

Mattel is authorized to issue up to 20.0 million shares of \$0.01 par value preference stock, of which none is currently outstanding.

Preferred Stock

Mattel is authorized to issue up to 3.0 million shares of \$1.00 par value preferred stock, of which none is currently outstanding.

Common Stock Repurchase Program

During 2014, Mattel repurchased 4.9 million shares of its common stock at a cost of \$177.2 million. During 2013, Mattel repurchased 11.0 million shares of its common stock at a cost of \$469.2 million. During 2012, Mattel repurchased 2.3 million shares of its common stock at a cost of \$77.9 million. Mattel's share repurchase program was first announced on July 21, 2003. On July 17, 2013, the Board of Directors authorized Mattel to increase its share repurchase program by \$500.0 million. At December 31, 2014, share repurchase authorizations of \$203.0 million had not been executed. Repurchases will take place from time to time, depending on market conditions. Mattel's share repurchase program has no expiration date.

Dividends

During 2014, 2013, and 2012, Mattel paid total dividends per share of \$1.52, \$1.44, and \$1.24, respectively, to holders of its common stock. The Board of Directors declared the dividends on a quarterly basis, and Mattel paid the dividends during the quarters in which the dividends were declared. The payment of dividends on common stock is at the discretion of the Board of Directors and is subject to customary limitations.

Table of Contents*Accumulated Other Comprehensive Income (Loss)*

The following tables present changes in the accumulated balances for each component of other comprehensive income, including current period other comprehensive income and reclassifications out of accumulated other comprehensive income (loss):

	For the Year Ended December 31, 2014			Total
	Derivative Instruments	Defined Benefit Pension Plans	Currency Translation Adjustments	
Accumulated Other Comprehensive Income (Loss), Net of Tax, as of December 31, 2013	\$ (10,789)	\$ (131,946)	\$ (300,941)	\$ (443,676)

Table of Contents

The following table presents the classification and amount of the reclassifications from accumulated other comprehensive income (loss) to the consolidated statement of operations:

	2014	For the Year 2013 (In thousands)	2012	Statements of Operations Classification
Derivative Instruments				
(Loss) gain on foreign currency forward exchange contracts	\$ (916)	\$ (5,735)	\$ 29,978	Cost of sales
	33	838	(45)	Provision for income taxes
	\$ (883)	\$ (4,897)	\$ 29,933	Net income
Defined Benefit Pension Plans				
Amortization of prior service credit	\$ 1,037	\$ 1,057	\$ 502	(a)
Recognized actuarial loss	(15,788)	(21,771)	(19,137)	(a)
Settlement loss		(1,835)	(3,534)	(a)
	(14,751)	(22,549)	(22,169)	
	5,343	8,127	8,037	Provision for income taxes
	\$ (9,408)	\$ (14,422)	\$ (14,132)	Net income

(a) The amortization of prior service credit, recognized actuarial loss, and settlement loss are included in the computation of net periodic benefit cost. Refer to Note 4 to the Consolidated Financial Statements Employee Benefit Plans for additional information regarding Mattel's net periodic benefit cost.

Currency Translation Adjustments

For 2014, currency translation adjustments resulted in a net loss of \$189.7 million, primarily due to the weakening of the Euro, Mexican peso, British pound sterling, Russian ruble, and Brazilian real against the US dollar. For 2013, currency translation adjustments resulted in a net loss of \$29.7 million, primarily due to the weakening of the Brazilian real, Australian dollar, and Indonesian rupiah against the US dollar, partially offset by the strengthening of the Euro against the US dollar. For 2012, currency translation adjustments resulted in a net gain of \$27.6 million, primarily due to the strengthening of the Euro, Mexican peso, and British pound sterling against the US dollar, partially offset by the weakening of the Brazilian real against the US dollar.

Note 7 Share-Based Payments*Mattel Stock Option Plans*

In May 2010, Mattel's stockholders approved the Mattel, Inc. 2010 Equity and Long-Term Compensation Plan (the 2010 Plan). Upon approval of the 2010 Plan, Mattel terminated its 2005 Equity Compensation Plan (the 2005 Plan), except with respect to grants then outstanding under the 2005 Plan. All restricted stock unit (RSU) awards made under the 2005 Plan have vested as of December 31, 2014. Outstanding stock option grants under the 2005 Plan that have not expired or have not been terminated continue to be exercisable under the terms of their respective grant agreements. The terms of the 2010 Plan are substantially similar to the terms of the 2005 Plan.

Under the 2010 Plan, Mattel has the ability to grant nonqualified stock options, incentive stock options, stock appreciation rights, restricted stock, RSUs, dividend equivalent rights, performance awards, and shares of common stock to officers, employees, and other persons providing services to Mattel. Generally, options vest and become exercisable contingent upon the grantees' continued employment or service with Mattel. Nonqualified stock options are granted at not less than 100% of the fair market value of Mattel's common stock on the date of grant, expire no later than ten years from the date of grant, and vest on a schedule determined by the

Table of Contents

Compensation Committee of the Board of Directors, generally during a period of three years from the date of grant. In the event of a retirement of an employee aged 55 years or older with 5 or more years of service, or the death or disability of an employee, that occurs in each case at least 6 months after the grant date, nonqualified stock options become fully vested. Similar provisions exist for non-employee directors. Time-vesting RSUs granted under the 2010 Plan are generally accompanied by dividend equivalent rights and generally vest over a period of three years from the date of grant. In the event of the involuntary termination of an employee aged 55 years or older with 5 or more years of service, or the death or disability of an employee, that occurs at least 6 months after the grant date, RSUs become fully vested. The 2010 Plan also contains provisions regarding grants of equity compensation to the non-employee members of the Board of Directors. The 2010 Plan expires on March 25, 2020, except as to any grants then outstanding.

The number of shares of common stock available for grant under the 2010 Plan is subject to an aggregate limit of the sum of (i) 48 million shares, (ii) the number of shares that remained available for issuance under the 2005 Plan on May 12, 2010, and (iii) any shares subject to awards outstanding under the 2005 Plan that on or after May 12, 2010 are forfeited or otherwise terminate or expire without the issuance of shares to the holder of the award. The 2010 Plan is further subject to detailed share-counting rules. As a result of such share-counting rules, full-value grants such as grants of restricted stock or RSUs count against shares remaining available for grant at a higher rate than grants of stock options and stock appreciation rights. Each stock option or stock appreciation right grant is treated as using one available share for each share actually subject to such grant, whereas each restricted stock or RSU grant is treated as using three available shares for each share actually subject to such full-value grant. At December 31, 2014, there were approximately 15 million shares of common stock available for grant remaining under the 2010 Plan.

As of December 31, 2014, total unrecognized compensation cost related to unvested share-based payments totaled \$87.7 million and is expected to be recognized over a weighted-average period of 1.8 years.

Stock Options

Mattel recognized compensation expense of \$12.5 million, \$12.1 million, and \$13.8 million for stock options during 2014, 2013, and 2012, respectively, which is included within other selling and administrative expenses in the consolidated statements of operations. Income tax benefits related to stock option compensation expense recognized in the consolidated statements of operations during 2014, 2013, and 2012 totaled \$3.5 million, \$3.8 million, and \$4.5 million, respectively.

The fair value of options granted has been estimated using the Black-Scholes valuation model. The expected life of the options used in this calculation is the period of time the options are expected to be outstanding and has been determined based on historical exercise experience. Expected stock price volatility is based on the historical volatility of Mattel's stock for a period approximating the expected life, the expected dividend yield is based on Mattel's most recent actual annual dividend payout, and the risk-free interest rate is based on the implied yield available on US Treasury zero-coupon issues approximating the expected life. The weighted average grant date fair value of options granted during 2014, 2013, and 2012 was \$4.57, \$8.80, and \$7.32, respectively. The following weighted average assumptions were used in determining the fair value of options granted:

	2014	2013	2012
Expected life (in years)	4.9	4.9	5.0
Risk-free interest rate	1.6%	1.5%	0.7%
Volatility factor	23.7%	31.8%	35.0%
Dividend yield	4.3%	3.4%	3.6%

Table of Contents

The following is a summary of stock option information and weighted average exercise prices for Mattel's stock options:

	2014		2013		2012	
	Shares	Weighted Average Exercise Price	Shares	Weighted Average Exercise Price	Shares	Weighted Average Exercise Price
	(In thousands, except weighted average exercise price)					
Outstanding at January 1	9,218	\$ 27.48	14,630	\$ 22.34	19,299	\$ 20.30
Granted	3,373	35.33	1,488	42.70	1,827	34.29
Exercised	(1,891)	22.35	(6,828)	19.74	(6,312)	19.50
Forfeited	(166)	36.85	(60)	33.18	(134)	27.13
Canceled	(11)	25.28	(12)	20.02	(50)	20.02
Outstanding at December 31	10,523	\$ 30.77	9,218	\$ 27.48	14,630	\$ 22.34
Exercisable at December 31	5,810	\$ 26.07	6,135	\$ 22.70	10,971	\$ 20.03

The intrinsic value of a stock option is the amount by which the current market value of the underlying stock exceeds the exercise price of an option. The total intrinsic value of options exercised during 2014, 2013, and 2012 was \$24.1 million, \$156.6 million, and \$85.8 million, respectively. At December 31, 2014, options outstanding had an intrinsic value of \$38.4 million, with a weighted average remaining life of 7.2 years. At December 31, 2014, options exercisable had an intrinsic value of \$38.3 million, with a weighted average remaining life of 5.6 years. At December 31, 2014, stock options vested or expected to vest totaled 10.3 million shares, with a total intrinsic value of \$38.4 million, weighted average exercise price of \$30.66, and weighted average remaining life of 7.1 years. During 2014, approximately 2 million stock options vested. The total grant date fair value of stock options vested during 2014, 2013, and 2012 was approximately \$12 million, \$13 million, and \$15 million, respectively.

Mattel uses treasury shares purchased under its share repurchase program to satisfy stock option exercises. Cash received from stock options exercised during 2014, 2013, and 2012 was \$43.3 million, \$134.5 million, and \$122.3 million, respectively.

Restricted Stock Units

RSUs are valued at the market value on the date of grant and the expense is evenly attributed to the periods in which the restrictions lapse, which is generally three years from the date of grant.

Compensation expense recognized related to grants of RSUs, excluding Performance RSUs, was \$39.5 million, \$38.2 million, and \$35.3 million in 2014, 2013, and 2012, respectively, and is included within other selling and administrative expenses in the consolidated statements of operations. Income tax benefits related to RSU compensation expense recognized in the consolidated statements of operations during 2014, 2013, and 2012 totaled \$10.6 million, \$10.6 million, and \$9.6 million, respectively.

Table of Contents

The following is a summary of RSU information and weighted average grant date fair values for Mattel's RSUs, excluding Performance RSUs:

	2014		2013		2012	
	Shares	Weighted Average Grant Date Fair Value	Shares	Weighted Average Grant Date Fair Value	Shares	Weighted Average Grant Date Fair Value
	(In thousands, except weighted average grant date fair value)					
Unvested at January 1	3,036	\$ 34.94	3,505	\$ 28.24	3,732	\$ 22.53
Granted	1,786	34.83	1,116	42.82	1,417	34.43
Vested	(1,426)	29.77	(1,337)	24.53	(1,479)	19.96
Forfeited	(223)	36.27	(248)	31.82	(165)	26.47
Unvested at December 31	3,173	\$ 37.10	3,036	\$ 34.94	3,505	\$ 28.24

At December 31, 2014, RSUs expected to vest totaled 3.1 million shares, with a weighted average grant date fair value of \$36.69. The total grant date fair value of RSUs vested during 2014, 2013, and 2012 was \$42.5 million, \$32.8 million, and \$29.5 million, respectively.

No compensation expense, or related income tax benefit, was recognized during 2014 for Performance RSUs granted in connection with its January 1, 2014 – December 31, 2016 LTIP performance cycle, as Mattel did not achieve its targeted annual performance results, which is more fully described in Note 4 to the Consolidated Financial Statements – Employee Benefit Plans. Mattel recognized compensation expense of \$11.4 million and \$14.2 million during 2013 and 2012, respectively, for Performance RSUs granted in connection with its January 1, 2011 – December 31, 2013 LTIP performance cycle, also more fully described in Note 4 to the Consolidated Financial Statements – Employee Benefit Plans. Income tax benefits related to Performance RSU compensation expense recognized in the consolidated statements of operations during 2013 and 2012 totaled \$4.2 million and \$5.2 million, respectively.

Note 8 Earnings Per Share

Unvested share-based payment awards that contain nonforfeitable rights to dividends or dividend equivalents (whether paid or unpaid) are participating securities and are included in the computation of earnings per share pursuant to the two-class method. Certain of Mattel's RSUs are considered participating securities because they contain nonforfeitable rights to dividend equivalents.

Table of Contents

Under the two-class method, net income is reduced by the amount of dividends declared in the period for each class of common stock and participating securities. The remaining undistributed earnings are then allocated to common stock and participating securities as if all of the net income for the period had been distributed. Basic earnings per common share excludes dilution and is calculated by dividing net income allocable to common shares by the weighted average number of common shares outstanding for the period. Diluted earnings per common share is calculated by dividing net income allocable to common shares by the weighted average number of common shares for the period, as adjusted for the potential dilutive effect of non-participating share-based awards. The following table reconciles earnings per common share:

	2014	For the Year 2013	2012
	(In thousands, except per share amounts)		
Basic:			
Net income	\$ 498,874	\$ 903,944	\$ 776,464
Less: Net income allocable to participating RSUs	(4,028)	(8,335)	(7,730)
Net income available for basic common shares	\$ 494,846	\$ 895,609	\$ 768,734
Weighted average common shares outstanding	339,016	343,394	341,665
Basic net income per common share	\$ 1.46	\$ 2.61	\$ 2.25
Diluted:			
Net income	\$ 498,874	\$ 903,944	\$ 776,464
Less: Net income allocable to participating RSUs	(4,028)	(8,291)	(7,682)
Net income available for diluted common shares	\$ 494,846	\$ 895,653	\$ 768,782
Weighted average common shares outstanding	339,016	343,394	341,665
Weighted average common equivalent shares arising from:			
Dilutive stock options and non-participating RSUs	1,752	4,065	4,493
Weighted average number of common and potential common shares	340,768	347,459	346,158
Diluted net income per common share	\$ 1.45	\$ 2.58	\$ 2.22

The calculation of potential common shares assumes the exercise of dilutive stock options and vesting of non-participating RSUs, net of assumed treasury share repurchases at average market prices. Nonqualified stock options and non-participating RSUs totaling 2.8 million shares, 0.6 million shares, and 0.7 million shares were excluded from the calculation of diluted net income per common share for 2014, 2013, and 2012, respectively, because they were antidilutive.

Note 9 Derivative Instruments

Mattel seeks to mitigate its exposure to foreign currency transaction risk by monitoring its foreign currency transaction exposure for the year and partially hedging such exposure using foreign currency forward exchange contracts. Mattel uses foreign currency forward exchange contracts as cash flow hedges primarily to hedge its purchases and sales of inventory denominated in foreign currencies. These contracts generally have maturity dates of up to 18 months. These derivative instruments have been designated as effective cash flow hedges, whereby the unsettled hedges are reported in Mattel's consolidated balance sheets at fair value, with changes in the fair value of the hedges reflected in other comprehensive income (OCI). Realized gains and losses for these contracts are recorded in the consolidated statements of operations in the period in which the inventory is sold to customers. Additionally, Mattel uses foreign currency forward exchange contracts to hedge intercompany loans and advances denominated in foreign currencies. Due to the short-term nature of the contracts involved, Mattel does not use hedge accounting for these contracts, and as such, changes in fair value are recorded in the period of change in the consolidated statements of operations. As of December 31, 2014 and 2013, Mattel held foreign currency forward exchange contracts with notional amounts of \$1.19 billion and \$1.55 billion, respectively.

Table of Contents

The following table presents Mattel's derivative assets and liabilities:

	Balance Sheet Classification	Derivative Assets	
		Fair Value	
		December 31, 2014	December 31, 2013
(In thousands)			
Derivatives designated as hedging instruments:			
Foreign currency forward exchange contracts	Prepaid expenses and other current assets	\$ 31,982	\$ 415
Foreign currency forward exchange contracts	Other noncurrent assets	1,443	
Total derivatives designated as hedging instruments		\$ 33,425	\$ 415
Derivatives not designated as hedging instruments:			
Foreign currency forward exchange contracts	Prepaid expenses and other current assets	\$ 318	\$ 1,895
Total		\$ 33,743	\$ 2,310

	Balance Sheet Classification	Derivative Liabilities	
		Fair Value	
		December 31, 2014	December 31, 2013
(In thousands)			
Derivatives designated as hedging instruments:			
Foreign currency forward exchange contracts	Accrued liabilities	\$ 2,408	\$ 12,432
Foreign currency forward exchange contracts	Other noncurrent liabilities	36	470
Total derivatives designated as hedging instruments		\$ 2,444	\$ 12,902
Derivatives not designated as hedging instruments:			
Foreign currency forward exchange contracts	Accrued liabilities	\$ 10,954	\$ 1,711
Total		\$ 13,398	\$ 14,613

The following tables present the classification and amount of gains and losses, net of tax, from derivatives reported in the consolidated statements of operations:

	Derivatives Designated As Hedging Instruments			Statements of Operations Classification
	For the Year 2014	For the Year 2013	For the Year 2012	
	(In thousands)			
Foreign currency forward exchange contracts:				
Amount of gain (loss) recognized in OCI	\$ 39,931	\$ (13,103)	\$ 2,734	
Amount of gain (loss) reclassified from accumulated OCI to statements of operations	(883)	(4,897)	29,933	Cost of sales

Table of Contents

The net (losses) gains of \$(0.9) million, \$(4.9) million, and \$29.9 million reclassified from accumulated other comprehensive loss to the consolidated statements of operations during 2014, 2013, and 2012, respectively, are offset by the changes in cash flows associated with the underlying hedged transactions.

	Derivatives Not Designated As Hedging Instruments			Statements of Operations Classification
	For the Year 2014	For the Year 2013	For the Year 2012	
(In thousands)				
Amount of gain (loss) recognized in the statements of operations:				
Foreign currency forward exchange contracts	\$ (31,485)	\$ 17,975	\$ 6,317	Non-operating income/expense
Foreign currency forward exchange contracts	732	(4,455)	(910)	Cost of sales
Total	\$ (30,753)	\$ 13,520	\$ 5,407	

The net (losses) gains of \$(30.8) million, \$13.5 million, and \$5.4 million recognized in the consolidated statements of operations during 2014, 2013, and 2012, respectively, are offset by foreign currency transaction gains and losses on the related hedged balances.

Note 10 Fair Value Measurements

The following table presents information about Mattel's assets and liabilities measured and reported in the financial statements at fair value on a recurring basis as of December 31, 2014 and 2013 and indicates the fair value hierarchy of the valuation techniques utilized to determine such fair value. The three levels of the fair value hierarchy are as follows:

Level 1 Valuations based on unadjusted quoted prices in active markets for identical assets or liabilities that the entity has the ability to access.

Level 2 Valuations based on quoted prices for similar assets or liabilities, quoted prices in markets that are not active, or other inputs that are observable or can be corroborated by observable data for substantially the full term of the assets or liabilities.

Level 3 Valuations based on inputs that are unobservable, supported by little or no market activity, and that are significant to the fair value of the assets or liabilities.

Mattel's financial assets and liabilities include the following:

	December 31, 2014			Total
	Level 1	Level 2	Level 3	
(In thousands)				
Assets:				
Foreign currency forward exchange contracts (a)	\$	\$ 33,743	\$	\$ 33,743
Auction rate security (b)			30,960	30,960
Total assets	\$	\$ 33,743	\$ 30,960	\$ 64,703
Liabilities:				

Edgar Filing: MATTEL INC /DE/ - Form 10-K

Foreign currency forward exchange contracts (a)	\$	\$ 13,398	\$	\$ 13,398
---	----	-----------	----	-----------

Table of Contents

	December 31, 2013			Total
	Level 1	Level 2	Level 3 (In thousands)	
Assets:				
Foreign currency forward exchange contracts (a)	\$	\$ 2,310	\$	\$ 2,310
Auction rate security (b)			28,895	28,895
Total assets	\$	\$ 2,310	\$ 28,895	\$ 31,205
Liabilities:				
Foreign currency forward exchange contracts (a)	\$	\$ 14,613	\$	\$ 14,613

- (a) *The fair value of the foreign currency forward exchange contracts is based on dealer quotes of market forward rates and reflects the amount that Mattel would receive or pay at their maturity dates for contracts involving the same notional amounts, currencies, and maturity dates.*
- (b) *The fair value of the auction rate security is estimated using a discounted cash flow model based on (i) estimated interest rates, timing, and amount of cash flows, (ii) credit spreads, recovery rates, and credit quality of the underlying securities, (iii) illiquidity considerations, and (iv) market correlation.*

The following table presents information about Mattel's auction rate security measured and reported at fair value on a recurring basis using significant Level 3 inputs:

	Level 3 (In thousands)
Balance at December 31, 2011	\$ 15,630
Unrealized gain	3,626
Balance at December 31, 2012	\$ 19,256
Unrealized gain	9,639
Balance at December 31, 2013	\$ 28,895
Unrealized gain	2,065
Balance at December 31, 2014	\$ 30,960

The unrealized gains and losses recognized relating to the auction rate security are reflected within other non-operating income in the consolidated statements of operations.

Non-Recurring Fair Value Measurements

Mattel tests its long-lived assets for impairment whenever events or changes in circumstances indicate that the carrying value may not be recoverable or that the carrying value may exceed its fair value. During the second quarter of 2013, Mattel changed its brand strategy for Polly Pocket, which includes a more focused allocation of resources to support the Polly Pocket brand in specific markets, resulting in a reduction of the forecasted future cash flows of the brand. As a result, Mattel recognized an impairment charge of approximately \$14 million, which reduced the value of the intangible asset to approximately \$99 million, as more fully described in Note 2 to the Consolidated Financial Statements Goodwill and Other Intangibles.

During 2014, 2013, and 2012, Mattel did not have any other assets or liabilities measured and reported at fair value on a non-recurring basis in periods subsequent to initial recognition.

Other Financial Instruments

Mattel's financial instruments include cash and equivalents, accounts receivable and payable, short-term borrowings, and accrued liabilities. The carrying value of these instruments approximate their fair value because of their short-term nature and are classified as Level 2 within the fair value hierarchy.

Table of Contents

The estimated fair value of Mattel's long-term debt, including the current portion, was \$2.18 billion (compared to a carrying value of \$2.10 billion) as of December 31, 2014 and \$1.62 billion (compared to a carrying value of \$1.60 billion) as of December 31, 2013. The estimated fair values have been calculated based on broker quotes or rates for the same or similar instruments and are classified as Level 2 within the fair value hierarchy.

Note 11 Commitments and Contingencies*Leases*

Mattel routinely enters into noncancelable lease agreements for premises and equipment used in the normal course of business. Certain of these leases include escalation clauses that adjust rental expense to reflect changes in price indices, as well as renewal options. In addition to minimum rental payments, certain of Mattel's leases require additional payments to reimburse the lessors for operating expenses such as real estate taxes, maintenance, utilities, and insurance. Rental expense is recorded on a straight-line basis, including escalating minimum payments. The American Girl Place leases in Chicago, Illinois, Los Angeles, California, and New York, New York, and American Girl store leases in Alpharetta, Georgia, Bloomington, Minnesota, Charlotte, North Carolina, Chesterfield, Missouri, Columbus, Ohio, Dallas, Texas, Houston, Texas, Lone Tree, Colorado, Lynnwood, Washington, McLean, Virginia, Miami, Florida, Nashville, Tennessee, Natick, Massachusetts, Orlando, Florida, Overland Park, Kansas, Palo Alto, California, and Scottsdale, Arizona also contain provisions for additional rental payments based on a percentage of the sales of each store after reaching certain sales benchmarks. Contingent rental expense is recorded in the period in which the contingent event becomes probable. During 2014, 2013, and 2012, contingent rental expense was not material. The following table shows the future minimum obligations under lease commitments in effect at December 31, 2014:

	Capital Leases	Operating Leases
	(In thousands)	
2015	\$ 294	\$ 113,756
2016	294	93,917
2017	294	73,299
2018	294	54,503
2019	294	40,179
Thereafter	25	143,856
	\$ 1,495(a)	\$ 519,510

(a) Includes \$0.3 million of imputed interest.

Rental expense under operating leases amounted to \$120.9 million, \$111.0 million, and \$116.5 million for 2014, 2013, and 2012, respectively, net of sublease income of \$2.6 million, \$0.9 million, and \$0.9 million in 2014, 2013, and 2012, respectively.

Commitments

In the normal course of business, Mattel enters into contractual arrangements to obtain and protect Mattel's right to create and market certain products and for future purchases of goods and services to ensure availability and timely delivery. Such arrangements include royalty payments pursuant to licensing agreements and commitments primarily for future inventory purchases. Certain of these commitments routinely contain provisions for guarantees or minimum expenditures during the term of the contracts. Current and future commitments for guaranteed payments reflect Mattel's focus on expanding its product lines through alliances with businesses in other industries.

Table of Contents

Licensing and similar agreements in effect at December 31, 2014 contain provisions for future minimum payments as shown in the following table:

	Licensing and Similar Agreements (In thousands)
2015	\$ 62,938
2016	108,960
2017	66,063
2018	29,092
2019	17,465
Thereafter	60
	\$ 284,578

Royalty expense for 2014, 2013, and 2012 was \$242.4 million, \$246.9 million, and \$240.2 million, respectively.

The following table shows the future minimum obligations for purchases of inventory, services, and other as of December 31, 2014:

	Other Purchase Obligations (In thousands)
2015	\$ 363,013
2016	21,116
2017	2,573
2018	708
2019	
	\$ 387,410

Insurance

Mattel has a wholly-owned subsidiary, Far West Insurance Company, Ltd. (Far West), that was established to insure Mattel's workers compensation, general, automobile, product liability, and property risks. Far West insures the first \$1.0 million per occurrence for workers compensation risks, the first \$0.5 million for general and automobile liability risks, the first \$2.0 million per occurrence and \$2.0 million per year for product liability risks, and up to \$1.0 million per occurrence for property risks. Various insurance companies, that have an A or better AM Best rating at the time the policies are purchased, reinsure Mattel's risk in excess of the amounts insured by Far West. Mattel's liability for reported and incurred but not reported claims at December 31, 2014 and 2013 totaled \$14.2 million and \$15.8 million, respectively, and is included in other noncurrent liabilities in the consolidated balance sheets. Loss reserves are accrued based on Mattel's estimate of the aggregate liability for claims incurred.

*Litigation**Litigation Related to Carter Bryant and MGA Entertainment, Inc.*

In April 2004, Mattel filed a lawsuit in Los Angeles County Superior Court against Carter Bryant (Bryant), a former Mattel design employee. The suit alleges that Bryant aided and assisted a Mattel competitor, MGA Entertainment, Inc. (MGA), during the time he was employed by Mattel, in violation of his contractual

Table of Contents

and other duties to Mattel. In September 2004, Bryant asserted counterclaims against Mattel, including counterclaims in which Bryant sought, as a putative class action representative, to invalidate Mattel's Confidential Information and Proprietary Inventions Agreements with its employees. Bryant also removed Mattel's suit to the United States District Court for the Central District of California. In December 2004, MGA intervened as a party-defendant in Mattel's action against Bryant, asserting that its rights to Bratz properties are at stake in the litigation.

Separately, in November 2004, Bryant filed an action against Mattel in the United States District Court for the Central District of California. The action sought a judicial declaration that Bryant's purported conveyance of rights in Bratz was proper and that he did not misappropriate Mattel property in creating Bratz.

In April 2005, MGA filed suit against Mattel in the United States District Court for the Central District of California. MGA's action alleges claims of trade dress infringement, trade dress dilution, false designation of origin, unfair competition, and unjust enrichment. The suit alleges, among other things, that certain products, themes, packaging, and/or television commercials in various Mattel product lines have infringed upon products, themes, packaging, and/or television commercials for various MGA product lines, including Bratz. The complaint also asserts that various alleged Mattel acts with respect to unidentified retailers, distributors, and licensees have damaged MGA and that various alleged acts by industry organizations, purportedly induced by Mattel, have damaged MGA. MGA's suit alleges that MGA has been damaged in an amount believed to reach or exceed tens of millions of dollars and further seeks punitive damages, disgorgement of Mattel's profits and injunctive relief.

In June 2006, the three cases were consolidated in the United States District Court for the Central District of California. On July 17, 2006, the Court issued an order dismissing all claims that Bryant had asserted against Mattel, including Bryant's purported counterclaims to invalidate Mattel's Confidential Information and Proprietary Inventions Agreements with its employees, and Bryant's claims for declaratory relief.

On January 12, 2007, Mattel filed an Amended Complaint setting forth counterclaims that included additional claims against Bryant as well as claims for copyright infringement, Racketeer Influenced and Corrupt Organizations (RICO) violations, misappropriation of trade secrets, intentional interference with contract, aiding and abetting breach of fiduciary duty and breach of duty of loyalty, and unfair competition, among others, against MGA, its Chief Executive Officer Isaac Larian, certain MGA affiliates and an MGA employee. The RICO claim alleged that MGA stole Bratz and then, by recruiting and hiring key Mattel employees and directing them to bring with them Mattel confidential and proprietary information, unfairly competed against Mattel using Mattel's trade secrets, confidential information, and key employees to build their business. On January 12, 2007, the Court granted Mattel leave to file these claims as counterclaims in the consolidated cases, which Mattel did that same day.

Mattel sought to try all of its claims in a single trial, but in February 2007, the Court decided that the consolidated cases would be tried in two phases, with the first trial to determine claims and defenses related to Mattel's ownership of Bratz works and whether MGA infringed those works. On May 19, 2008, Bryant reached a settlement agreement with Mattel and is no longer a defendant in the litigation. In the public stipulation entered by Mattel and Bryant in connection with the resolution, Bryant agreed that he was and would continue to be bound by all prior and future Court Orders relating to Bratz ownership and infringement, including the Court's summary judgment rulings.

The first phase of the first trial resulted in a unanimous jury verdict on July 17, 2008 in favor of Mattel. The jury found that almost all of the Bratz design drawings and other works in question were created by Bryant while he was employed at Mattel; that MGA and Isaac Larian intentionally interfered with the contractual duties owed by Bryant to Mattel, aided and abetted Bryant's breaches of his duty of loyalty to Mattel, aided and abetted Bryant's breaches of the fiduciary duties he owed to Mattel, and converted Mattel property for their own use. The same jury determined that defendants MGA, Larian, and MGA Entertainment (HK) Limited infringed Mattel's

Table of Contents

copyrights in the Bratz design drawings and other Bratz works, and awarded Mattel total damages of approximately \$100 million against the defendants. On December 3, 2008, the Court issued a series of orders rejecting MGA's equitable defenses and granting Mattel's motions for equitable relief, including an order enjoining the MGA party defendants from manufacturing, marketing, or selling certain Bratz fashion dolls or from using the Bratz name. The Court stayed its December 3, 2008 injunctive orders until further order of the Court.

The parties filed and argued additional motions for post-trial relief, including a request by MGA to enter judgment as a matter of law on Mattel's claims in MGA's favor and to reduce the jury's damages award to Mattel. Mattel additionally moved for the appointment of a receiver. On April 27, 2009, the Court entered an order confirming that Bratz works found by the jury to have been created by Bryant during his Mattel employment were Mattel's property and that hundreds of Bratz female fashion dolls infringe Mattel's copyrights. The Court also upheld the jury's award of damages in the amount of \$100 million and ordered an accounting of post-trial Bratz sales. The Court further vacated the stay of the December 3, 2008 orders.

MGA appealed the Court's equitable orders to the Court of Appeals for the Ninth Circuit. On December 9, 2009, the Ninth Circuit heard oral argument on MGA's appeal and issued an order staying the District Court's equitable orders pending a further order to be issued by the Ninth Circuit. On July 22, 2010, the Ninth Circuit vacated the District Court's equitable orders. The Ninth Circuit stated that, because of several jury instruction errors it identified, a significant portion if not all of the jury verdict and damage award should be vacated.

In its opinion, the Ninth Circuit found that the District Court erred in concluding that Mattel's Invention Agreement unambiguously applied to ideas; that it should have considered extrinsic evidence in determining the application of the agreement; and if the conclusion turns on conflicting evidence, it should have been up to the jury to decide. The Ninth Circuit also concluded that the District Judge erred in transferring the entire brand to Mattel based on misappropriated names and that the Court should have submitted to the jury, rather than deciding itself, whether Bryant's agreement assigned works created outside the scope of his employment and whether Bryant's creation of the Bratz designs and sculpt was outside of his employment. The Court then went on to address copyright issues which would be raised after a retrial, since Mattel might well convince a properly instructed jury that it owns Bryant's designs and sculpt. The Ninth Circuit stated that the sculpt itself was entitled only to thin copyright protection against virtually identical works, while the Bratz sketches were entitled to broad protection against substantially similar works; in applying the broad protection, however, the Ninth Circuit found that the lower court had erred in failing to filter out all of the unprotectable elements of Bryant's sketches. This mistake, the Court said, caused the lower court to conclude that all Bratz dolls were substantially similar to Bryant's original sketches.

Judge Stephen Larson, who presided over the first trial, retired from the bench during the course of the appeal, and the case was transferred to Judge David O. Carter. After the transfer, Judge Carter granted Mattel leave to file a Fourth Amended Answer and Counterclaims which focused on RICO, trade secret and other claims, and added additional parties, and subsequently granted in part and denied in part a defense motion to dismiss those counterclaims.

Later, on August 16, 2010, MGA asserted several new claims against Mattel in response to Mattel's Fourth Amended Answer and Counterclaims, including claims for alleged trade secret misappropriation, an alleged violation of RICO, and wrongful injunction. MGA alleged, in summary, that, for more than a decade dating back to 1992, Mattel employees engaged in a pattern of stealing alleged trade secret information from competitors' toy fair showrooms, and then sought to conceal that alleged misconduct. Mattel moved to strike and/or dismiss these claims, as well as certain MGA allegations regarding Mattel's motives for filing suit. The Court granted that motion as to the wrongful injunction claim, which it dismissed with prejudice, and as to the allegations about Mattel's motives, which it struck. The Court denied the motion as to MGA's trade secret misappropriation claim and its claim for violations of RICO.

Table of Contents

The Court resolved summary judgment motions in late 2010. Among other rulings, the Court dismissed both parties' RICO claims; dismissed Mattel's claim for breach of fiduciary duty and portions of other claims as preempted by the trade secrets act; dismissed MGA's trade dress infringement claims; dismissed MGA's unjust enrichment claim; dismissed MGA's common law unfair competition claim; and dismissed portions of Mattel's copyright infringement claim as to later generation Bratz dolls.

Trial of all remaining claims began in early January 2011. During the trial, and before the case was submitted to the jury, the Court granted MGA's motions for judgment as to Mattel's claims for aiding and abetting breach of duty of loyalty and conversion. The Court also granted a defense motion for judgment on portions of Mattel's claim for misappropriation of trade secrets relating to thefts by former Mattel employees located in Mexico.

The jury reached verdicts on the remaining claims in April 2011. In those verdicts, the jury ruled against Mattel on its claims for ownership of Bratz-related works, for copyright infringement, and for misappropriation of trade secrets. The jury ruled for MGA on its claim of trade secret misappropriation as to 26 of its claimed trade secrets and awarded \$88.5 million in damages. The jury ruled against MGA as to 88 of its claimed trade secrets. The jury found that Mattel's misappropriation was willful and malicious.

In early August 2011, the Court ruled on post-trial motions. The Court rejected MGA's unfair competition claims and also rejected Mattel's equitable defenses to MGA's misappropriation of trade secrets claim. The Court reduced the jury's damages award of \$88.5 million to \$85.0 million. The Court awarded MGA an additional \$85.0 million in punitive damages and approximately \$140 million in attorney's fees and costs. The Court entered a judgment which totaled approximately \$310 million in favor of MGA.

On August 11, 2011, Mattel appealed the judgment, challenging on appeal the entirety of the District Court's monetary award in favor of MGA, including both the award of \$170 million in damages for alleged trade secret misappropriation and approximately \$140 million in attorney's fees and costs. On January 24, 2013, the Ninth Circuit Court of Appeals issued a ruling on Mattel's appeal. In that ruling, the Court found that MGA's claim for trade secrets misappropriation was not compulsory to any Mattel claim and could not be filed as a counterclaim-in-reply. Accordingly, the Court of Appeals vacated the portion of the judgment awarding damages and attorney's fees and costs to MGA for prevailing on its trade secrets misappropriation claim, totaling approximately \$172.5 million. It ruled that, on remand, the District Court must dismiss MGA's trade secret claim without prejudice. In its ruling, the Court of Appeals also affirmed the District Court's award of attorney's fees and costs under the Copyright Act. Accordingly, Mattel recorded a litigation accrual of approximately \$138 million during the fourth quarter of 2012 to cover these fees and costs.

Because multiple claimants asserted rights to the attorney's fees portion of the judgment, on February 13, 2013, Mattel filed a motion in the District Court for orders permitting Mattel to interplead the proceeds of the judgment and releasing Mattel from liability to any claimant based on Mattel's payment of the judgment.

On February 27, 2013, MGA filed a motion for leave to amend its prior complaint in the existing federal court lawsuit so that it could reassert its trade secrets claim. Mattel opposed that motion. On December 17, 2013, the District Court denied MGA's motion for leave to amend and entered an order dismissing MGA's trade secrets claim without prejudice. Also on December 17, 2013, following a settlement between MGA and certain insurance carriers, the District Court denied Mattel's motion for leave to interplead the proceeds of the judgment.

On December 21, 2013, a stipulation regarding settlement with insurers and payment of judgment was filed in the District Court, which provided that (i) Mattel would pay approximately \$138 million, including accrued interest, in full satisfaction of the copyright fees judgment, (ii) all parties would consent to entry of an order exonerating and discharging the appeal bond posted by Mattel, and (iii) MGA's insurers would dismiss all pending actions related to the proceeds of the copyright fees judgment, including an appeal by Evanston Insurance Company in an action against Mattel that was pending in the Ninth Circuit. On December 23, 2013, Mattel paid the copyright fees judgment in the total sum, including interest, of approximately \$138 million. On

Table of Contents

December 26, 2013, the District Court entered an order exonerating and discharging the appeal bond posted by Mattel, and on December 27, 2013, MGA filed an acknowledgment of satisfaction of judgment. On December 30, 2013, Evanston Insurance Company's appeal in its action against Mattel was dismissed.

On January 13, 2014, MGA filed a new, but virtually identical, trade secrets claim against Mattel in Los Angeles County Superior Court. In its complaint, MGA purports to seek damages in excess of \$1 billion. Mattel believes that MGA's claim should be barred as a matter of law, and intends to vigorously defend against it. On December 3, 2014, the Court overruled Mattel's request to dismiss MGA's case as barred as a result of prior litigation between the parties. In light of that ruling, Mattel believes that it is reasonably possible that damages in this matter could range from \$0 to approximately \$12.5 million. In addition, Mattel believes that if such damages are awarded, it is reasonably possible that pre-judgment interest, ranging from \$0 to approximately \$10 million, could be awarded. Mattel may be entitled to an offset against any damages awarded to MGA. Mattel has not quantified the amount of any such offset as it is not currently estimable. As Mattel believes a loss in this matter is reasonably possible but not probable, no liability has been accrued to date.

Litigation Related to Yellowstone do Brasil Ltda.

Yellowstone do Brasil Ltda. (formerly known as Trebbor Informática Ltda.) was a customer of Mattel's subsidiary Mattel do Brasil Ltda. when a commercial dispute arose between Yellowstone and Mattel do Brasil regarding the supply of product and related payment terms. As a consequence of the dispute, in April 1999, Yellowstone filed a declarative action against Mattel do Brasil before the 15th Civil Court of Curitiba State of Parana (the Trial Court), requesting the annulment of its security bonds and promissory notes given to Mattel as well as requesting the Trial Court to find Mattel do Brasil liable for damages incurred as a result of Mattel do Brasil's alleged abrupt and unreasonable breach of an oral exclusive distribution agreement between the parties relating to the supply and sale of toys in Brazil. Yellowstone's complaint sought alleged loss of profits of approximately \$1 million, plus an unspecified amount of damages consisting of: (i) compensation for all investments made by Yellowstone to develop Mattel do Brasil's business; (ii) reimbursement of the amounts paid by Yellowstone to terminate labor and civil contracts in connection with the business; (iii) compensation for alleged unfair competition and for the goodwill of trade; and (iv) compensation for non-pecuniary damages.

Mattel do Brasil filed its defenses to these claims and simultaneously presented a counterclaim for unpaid accounts receivable for goods supplied to Yellowstone in the approximate amount of \$4 million.

During the evidentiary phase a first accounting report was submitted by a court-appointed expert. Such report stated that Yellowstone had invested approximately \$3 million in its business. Additionally, the court-appointed expert calculated a loss of profits compensation of approximately \$1 million. Mattel do Brasil challenged the report since it was not made based on the official accounting documents of Yellowstone and since the report calculated damages based only on documents unilaterally submitted by Yellowstone.

The Trial Court accepted the challenge and ruled that a second accounting examination should take place in the lawsuit. Yellowstone appealed the decision to the Court of Appeals of the State of Parana (the Appeals Court), but it was upheld by the Appeals Court.

The second court-appointed expert's report submitted at trial did not assign a value to any of Yellowstone's claims and found no evidence of causation between Mattel do Brasil's actions and such claims.

In January 2010, the Trial Court ruled in favor of Mattel do Brasil and denied all of Yellowstone's claims based primarily on the lack of any causal connection between the acts of Mattel do Brasil and Yellowstone's alleged damages. Additionally, the Trial Court upheld Mattel do Brasil's counterclaim and ordered Yellowstone to pay Mattel do Brasil approximately \$4 million. The likelihood of Mattel do Brasil recovering this amount was uncertain due to the fact that Yellowstone was declared insolvent and filed for bankruptcy protection. In February 2010, Yellowstone filed a motion seeking clarification of the decision which was denied.

Table of Contents

In September 2010, Yellowstone filed a further appeal with the Appeals Court. Under Brazilian law, the appeal was de novo and Yellowstone restated all of the arguments it made at the Trial Court level. Yellowstone did not provide any additional information supporting its unspecified alleged damages. The Appeals Court held hearings on the appeal in March and April 2013. On July 26, 2013, the Appeals Court awarded Yellowstone approximately \$17 million in damages, as adjusted for inflation and interest. The Appeals Court also awarded Mattel approximately \$7.5 million on its counterclaim, as adjusted for inflation. On August 2, 2013, Mattel filed a motion with the Appeals Court for clarification since the written decision contained clear errors in terms of amounts awarded and interest and inflation adjustments. Mattel's motion also asked the Appeals Court to decide whether Yellowstone's award could be offset by the counterclaim award, despite Yellowstone's status as a bankrupt entity. Yellowstone also filed a motion for clarification on August 5, 2013. A decision on the clarification motions was rendered on November 11, 2014, and the Appeals Court accepted partially the arguments raised by Mattel. As a result, the Appeals Court awarded Yellowstone approximately \$14.5 million in damages, as adjusted for inflation and interest. The Appeals Court also awarded Mattel approximately \$7.5 million on its counterclaim, as adjusted for inflation. The decision also recognized the existence of legal rules that support Mattel's right to offset its counterclaim award of approximately \$7.5 million. Mattel filed a new motion for clarification with the Appeals Court on January 21, 2015, due to the incorrect statement made by the reporting judge of the Appeals Court, that the court-appointed expert analyzed the accounting documents of Yellowstone. As soon as a new decision on this motion for clarification is rendered, Mattel will appeal the Appeals Court decision to both the Superior Court of Justice and the Federal Supreme Court (collectively, the Superior Courts), based on both procedural and substantive grounds.

Mattel believes that it is reasonably possible that a loss in this matter could range from \$0 to approximately \$15 million. The high end of this range, approximately \$15 million, is based on the calculation of the current amount of the damages and loss of profits, including interest and inflation adjustments, reported in the first court-appointed examination report submitted in the lawsuit, plus attorney's fees. Mattel do Brasil will also be entitled to offset its counterclaim award of approximately \$7.5 million, the current amount including inflation adjustment, against such loss. The existence of procedural matters that will be addressed to the Superior Courts adds some uncertainty to the final outcome of the matter. Mattel believes, however, that it has valid legal grounds for appeal of the Appeals Court decision and currently does not have grounds to affirm that a loss is probable for this matter. Accordingly, a liability has not been accrued to date. Mattel may be required by the Trial Court to place a bond or the full amount of the damage award in escrow pending an appeal decision by the Superior Courts.

Note 12 Segment Information

Description of Segments

Mattel, through its subsidiaries, sells a broad variety of toy products which are grouped into four major brand categories, including the Construction and Arts & Crafts brand category, which was introduced in the second quarter of 2014:

Mattel Girls & Boys Brands including Barbie® fashion dolls and accessories (Barbie), Monster High®, Disney Classics®, Ever After High®, Little Mommy®, and Polly Pocket (collectively Other Girls), Hot Wheels® and Matchbox® vehicles and play sets (collectively Wheels), and CARS®, Disney Planes®, BOOMco®, Radica! Toy Story®, Max Steel®, WWE® Wrestling, Batman®, and games and puzzles (collectively Entertainment).

Fisher-Price Brands including Fisher-Price®, Little People®, BabyGear®, Laugh & Learn®, and Imaginext® (collectively Core Fisher-Price), Thomas & Friends™, Dora the Explorer®, Mickey Mouse® Clubhouse, and Disney Jake and the Never Land Pirates® (collectively Fisher-Price Friends), and Power Wheels®.

American Girl Brands including My American Girl®, BeForever®, and Bitty Baby®. American Girl Brands products are sold directly to consumers via its catalog, website, and proprietary retail stores. Its children's publications are also sold to certain retailers.

Construction and Arts & Crafts Brands including MEGA BLOKS®, RoseArt®, and Board Dudes®.

Table of Contents

Mattel's operating segments are: (i) North America, which consists of the US and Canada, (ii) International, and (iii) American Girl. Factors considered in determining the operating segments include the nature of business activities, the management structure directly accountable to the Chief Operating Decision Maker (CODM) for operating and administrative activities, availability of discrete financial information, and strategic priorities within the organizational structure. These factors correspond to the manner in which the CODM reviews and evaluates operating performance to make decisions about resources to be allocated to these operating segments.

The North America and International segments sell products in the Mattel Girls & Boys Brands, Fisher-Price Brands, and Construction and Arts & Crafts Brands categories, although some are developed and adapted for particular international markets.

Segment Data

The following tables present information about revenues, income, and assets by segment. Mattel does not include sales adjustments such as trade discounts and other allowances in the calculation of segment revenues (referred to as gross sales). Mattel records these adjustments in its financial accounting systems at the time of sale to each customer, but the adjustments are not allocated to individual products. For this reason, Mattel's CODM uses gross sales by segment as one of the metrics to measure segment performance. Such sales adjustments are included in the determination of segment income from operations based on the adjustments recorded in the financial accounting systems. Segment income represents each segment's operating income, while consolidated operating income represents income from operations before net interest, other non-operating income, and income taxes as reported in the consolidated statements of operations. The corporate and other expense category includes costs not allocated to individual segments, including charges related to incentive compensation, share-based payments, and corporate headquarters functions managed on a worldwide basis, and the impact of changes in foreign currency rates on intercompany transactions.

Table of Contents

- (a) *Net loss for the first quarter of 2014 included \$3.7 million of net tax expense primarily related to reassessments of prior years tax liabilities based on the status of audits and tax filings in various jurisdictions, settlements, and enacted tax law changes. Net income for the second and third quarters of 2014 included net tax benefits of \$40.1 million and \$15.1 million, respectively, primarily related to reassessments of prior years tax liabilities based on the status of audits and tax filings in various jurisdictions, settlements, and enacted tax law changes. Net income for the fourth quarter of 2014 included net tax expense of \$8.9 million, primarily related to a tax charge related to a 2014 tax restructuring for the HIT Entertainment and MEGA Brands operations, partially offset by reassessments of prior years tax liabilities based on the status of audits and tax filings in various jurisdictions around the world, settlements, and enacted tax law changes. Net income for the first quarter of 2013 included \$4.0 million of net tax benefits primarily related to enacted tax law changes. Net income for the second and third quarter of 2013 included net tax benefits of \$11.2 million and \$17.0 million, respectively, primarily related to reassessments of prior years tax liabilities based on the status of audits and tax filings in various jurisdictions, settlements, and enacted tax law changes.*

Note 15 Subsequent Event

On January 26, 2015, Mattel announced that its Board of Directors declared a first quarter dividend of \$0.38 per common share. The dividend is payable on March 6, 2015 to stockholders of record on February 19, 2015.

Item 9. Changes in and Disagreements with Accountants on Accounting and Financial Disclosure.

None.

Item 9A. Controls and Procedures.

Evaluation of Disclosure Controls and Procedures

As of December 31, 2014, Mattel's disclosure controls and procedures were evaluated, with the participation of Mattel's principal executive officer and principal financial officer, to assess whether they are effective in providing reasonable assurance that information required to be disclosed by Mattel in the reports that it files or submits under the Securities Exchange Act of 1934 is accumulated and communicated to management, including its principal executive officer and principal financial officer, as appropriate, to allow timely decisions regarding required disclosure and to provide reasonable assurance that such information is recorded, processed, summarized and reported within the time periods specified in Securities and Exchange Commission rules and forms. The scope of Mattel's assessment of the effectiveness of its disclosure controls and procedures does not include any disclosure controls and procedures of MEGA Brands, which was acquired on April 30, 2014, that are also part of MEGA Brands' internal controls over financial reporting. This exclusion is in accordance with the SEC's general guidance that a recently acquired business may be omitted from the scope of the assessment in the year of acquisition. Based on this evaluation, Christopher A. Sinclair, Mattel's principal executive officer, and Kevin M. Farr, Mattel's principal financial officer, concluded that these disclosure controls and procedures were effective as of December 31, 2014.

Management's Report on Internal Control Over Financial Reporting

The report called for by Item 308(a) of Regulation S-K is incorporated by reference to Management's Report on Internal Control Over Financial Reporting, included in Item 8 Financial Statements and Supplementary Data of this report.

Report of Independent Registered Public Accounting Firm

The report called for by Item 308(b) of Regulation S-K is incorporated by reference to Report of Independent Registered Public Accounting Firm, included in Item 8 Financial Statements and Supplementary Data of this report.

Changes in Internal Control Over Financial Reporting

There was no change in our internal control over financial reporting that occurred during the period covered by this report that has materially affected, or is reasonably likely to materially affect, our internal control over financial reporting. We completed the acquisition of MEGA Brands in 2014, which has not yet been fully integrated into our internal control framework.

Item 9B. Other Information.

None.

Table of Contents

PART III

Item 10. Directors, Executive Officers and Corporate Governance.

The information required under this Item is incorporated herein by reference to sections entitled Proposal 1 Election of Directors ; Section 16(a) Beneficial Ownership Reporting Compliance ; and The Board of Directors and Corporate Governance Board Committees Audit Committee in the Mattel Notice of Annual Meeting of Stockholders and 2015 Proxy Statement to be filed with the SEC within 120 days after December 31, 2014 (the Proxy Statement). Information with respect to the executive officers of Mattel appears under the heading Executive Officers of the Registrant in Part I herein.

Mattel has adopted the Mattel Code of Conduct (the Code of Conduct), which satisfies the listing rules of the NASDAQ Stock Market (NASDAQ) regarding code of conduct and satisfies the SEC rules regarding disclosure of a code of ethics for the Interim Chief Executive Officer, Chief Financial Officer and Controller. The Code of Conduct is publicly available on Mattel s corporate website at <http://corporate.mattel.com>, and the text of the Code of Conduct will be updated on the website to reflect any amendment. A copy may also be obtained free of charge by mailing a request in writing to: Secretary, Mail Stop M1-1516, Mattel, Inc., 333 Continental Blvd., El Segundo, CA 90245-5012. If Mattel grants any waiver from a provision of the Code of Conduct for any executive officer or director, or makes any substantive amendment to the SEC-mandated code of ethics that applies to the Interim Chief Executive Officer, Chief Financial Officer or Controller, Mattel will make disclosures to the extent required by applicable laws, regulations and stock exchange listing standards on its corporate website or in a Current Report on Form 8-K. Mattel has posted the Board of Directors corporate governance guidelines and the charters of its Audit, Compensation and Governance and Social Responsibility Committees of the Board of Directors on its corporate website at <http://corporate.mattel.com>. Copies of the corporate governance guidelines and committee charters may be obtained free of charge by mailing a request to the address noted above.

Mattel has filed the Sarbanes-Oxley Act Section 302 certifications of its Interim Chief Executive Officer and Chief Financial Officer as Exhibit 31.0 and Exhibit 31.1 hereto, respectively.

Item 11. Executive Compensation.

The information required under this Item is incorporated herein by reference to sections entitled Executive Compensation and The Board of Directors and Corporate Governance Board Committees Compensation Committee in the Proxy Statement.

Item 12. Security Ownership of Certain Beneficial Owners and Management and Related Stockholder Matters.

The information required under this Item is incorporated herein by reference to sections entitled Principal Stockholders ; Security Ownership of Management and the Board ; and Equity Compensation Plan Information in the Proxy Statement.

Item 13. Certain Relationships and Related Transactions, and Director Independence.

The information required under this Item is incorporated herein by reference to sections entitled Certain Transactions with Related Persons and The Board of Directors and Corporate Governance Director Independence in the Proxy Statement.

Item 14. Principal Accountant Fees and Services.

The information required under this Item is incorporated herein by reference to the section entitled Audit Matters Fees Incurred for Services by PricewaterhouseCoopers LLP in the Proxy Statement.

POWER OF ATTORNEY

KNOW ALL PERSONS BY THESE PRESENTS, that we, the undersigned directors and officers of Mattel, Inc., do hereby severally constitute and appoint Robert Normile, Tiffani Zack Magri, and Christopher A. Sinclair, and each of them, our true and lawful attorneys-in-fact and agents, each with full powers of substitution, to do any and all acts and things in our name and behalf in our capacities as directors and officers and to execute any and all instruments for us and in our names in the capacities indicated below, which said attorneys-in-fact and agents, or any of them, may deem necessary or advisable to enable Mattel, Inc. to comply with the Securities Exchange Act of 1934, as amended, and any rules, regulations and requirements of the Securities and Exchange Commission, in connection with this Annual Report on Form 10-K, including specifically, but without limitation, power and authority to sign for us or any of us, in our names in the capacities indicated below, any and all amendments hereto; and we do each hereby ratify and confirm all that said attorneys-in-fact and agents or their substitutes, or any one of them, shall do or cause to be done by virtue hereof.

Pursuant to the requirements of the Securities Exchange Act of 1934, this report has been signed below by the following persons on behalf of the registrant and in the capacities and on the dates indicated.
