Nuveen Fund Boards Approve Closed-End Fund Reorganization

CHICAGO, March 14, 2017 – The Boards of Trustees of Nuveen Real Asset Income and Growth Fund (NYSE: JRI) and Diversified Real Asset Income Fund (NYSE: DRA) have approved the reorganization of DRA into JRI. The reorganization is subject to customary conditions, including approval by the shareholders of each fund at the respective fund’s annual shareholder meeting. Annual shareholder meetings for both funds are scheduled to take place on May 31, 2017. By combining two funds with substantially identical portfolios, the proposed reorganization is intended to benefit shareholders of each fund through fee and expense savings as well as enhanced secondary market visibility and liquidity from the combined fund’s greater outstanding shares, which over time is anticipated to promote increased investor interest and narrower trading discounts relative to net asset value. JRI will be the surviving fund in the reorganization.

More information on the proposed reorganization will be contained in proxy materials expected to be filed in the next several days. The proposed fund reorganization is as follows:

Proposed Reorganization Q&A

March 14, 2017

The Boards of Trustees of Nuveen Real Asset Income and Growth Fund (JRI) and Diversified Real Asset Income Fund (DRA) today announced the proposed reorganization (merger) of DRA into JRI. The following Q&A is intended to provide additional shareholder information regarding the proposal.

Q: What are the expected benefits of the proposed merger?

A: By combining two funds with substantially identical portfolios (other than DRA's holdings of approximately \$18 million of whole loans and unsecured, mortgage-related interests, which amounts to just under 4% of its investment exposure), the proposed reorganization is intended to provide shareholders of each fund with the following potential benefits:

1. Lower fund fees and expenses (excluding the costs of leverage) over time as fixed costs are spread over a larger asset base.
2. Enhanced secondary market visibility and liquidity from the combined fund's greater outstanding shares. A larger fund is anticipated to promote increased investor interest and narrower trading discounts relative to net asset value over time.
3. Lower trading costs through reduced bid/ask spreads due to a larger common share float.
4. Increased portfolio management flexibility and fund flexibility in managing the structure and cost of its leverage over time.

Q: Will my distributions be affected?

A: The combined fund will retain JRI's existing distribution policy. It is anticipated that common share distribution amounts immediately following the merger will be at least equal to pre-merger levels for each fund on a common share equivalent basis.

Q: Will the proposed merger be a taxable event to shareholders?

A: No. The merger is intended to qualify as a tax-free reorganization for federal income tax purposes.

Q: When will the proposed merger take place?

A: The merger is subject to approval by the shareholders of each fund. Both funds will hold their annual shareholder meeting on May 31, 2017. Subject to market conditions, the merger is expected to be completed shortly after receipt of shareholder approval.

Q: Do shareholders need to take any action at this time?

A: No. Shareholders will receive proxy materials in the coming weeks that will provide additional information regarding the proposed merger. To reduce expense, and minimize phone calls to shareholders from the proxy solicitor, please vote as soon as possible. If you are a financial advisor, please encourage your clients to vote as soon as possible.

¹ Both DRA and JRI employ a cash-flow based distribution policy: Historical distribution sources have included net investment income, realized gains and return of capital. If a distribution includes anything other than net investment income, the fund provides a notice of the best estimate of its distribution sources at that time which may be viewed at www.nuveen.com/CEFDistributions. These estimates may not match the final tax characterization (for the full year's distributions) contained in shareholders' 1099-DIV forms after the end of the year. You should not draw any conclusions about a fund's past or future investment performance from its current distribution rate.
