Announcement to Shareholders

On February 15, 2006, BlackRock, Inc. ("BlackRock") and Merrill Lynch & Co., Inc. ("Merrill Lynch") entered into an agreement to contribute Merrill Lynch's investment management business, Merrill Lynch Investment Managers, L.P. and certain affiliates (including Fund Asset Management, L.P. and Merrill Lynch Investment Managers International Limited), to BlackRock to create a new independent company that will be one of the world's largest asset management firms with over \$1 trillion in assets under management (based on combined assets under management as of March 31, 2006). The transaction is expected to close in the third quarter of 2006, at which time the new company will operate under the BlackRock name. The Funds' Board of Directors has approved a new investment advisory agreement with BlackRock Advisors, Inc. or its successor ("BlackRock

Edgar Filing: MUNIYIELD QUALITY FUND INC - Form N-CSRS

Advisors") on substantially the same terms and for the same advisory fee as the current investment advisory agreement with the Investment Adviser. If the new agreement is approved by the Funds' shareholders, BlackRock Advisors is expected to become the Funds' investment adviser upon the closing of the transaction between Merrill Lynch and BlackRock.

SEMI-ANNUAL REPORTS

APRIL 30, 2006

A Letter From the President

Dear Shareholder

You may be aware that changes are on the horizon at Merrill Lynch Investment

Edgar Filing: MUNIYIELD QUALITY FUND INC - Form N-CSRS

Managers ("MLIM"). On February 15, 2006, Merrill Lynch announced plans to combine the firm's investment advisory business, including MLIM, with another highly regarded investment manager -- BlackRock, Inc. ("BlackRock").

We believe this merger of asset management strength will benefit our investors. MLIM is a leading investment management organization with over \$576 billion in assets under management globally and 2,757 employees in 17 countries. It offers over 100 investment strategies in vehicles ranging from mutual funds to institutional portfolios. BlackRock is one of the largest publicly traded investment management firms in the United States with \$463.1 billion in assets under management and 1,839 employees. It manages assets on behalf of institutional and individual investors worldwide through a variety of equity, fixed income, liquidity and alternative investment products.

At the completion of the transaction, which is expected in the third quarter of this year, the resultant firm will be a top-10 investment manager worldwide with over \$1 trillion in assets under management.* The combined company will provide a wider selection of high-quality investment solutions across a range of asset classes and investment styles. MLIM and BlackRock possess complementary capabilities that together create a well-rounded organization uniting some of the finest money managers in the industry. At the same time, the firms share similar values and beliefs -- they are focused on delivering excellence on behalf of clients, and both make investment performance their single most important mission. In short, the merger only reinforces our commitment to shareholders.

Most of MLIM's investment products -- including mutual funds, separately managed accounts, annuities and variable insurance funds -- eventually will carry the "BlackRock" name. As a shareholder in one or more MLIM-advised mutual funds, you will receive a proxy package in the coming weeks in connection with this transaction. After you receive this information, should you have any questions or concerns, do not hesitate to contact your financial advisor.

As always, we thank you for entrusting us with your investment assets, and we look forward to continuing to serve your investment needs with even greater strength and scale as the new BlackRock.

Sincerely,

/s/ Robert C. Doll, Jr.

Robert C. Doll, Jr.
President and Chief Investment Officer
Merrill Lynch Investment Managers

* \$1.039 trillion in assets under management as of March 31, 2006.

A Discussion With Your Funds' Portfolio Managers

The Funds outperformed their respective Lipper category averages for the period while also offering shareholders an attractive level of tax-exempt income.

Describe the recent market environment relative to municipal bonds.

Edgar Filing: MUNIYIELD QUALITY FUND INC - Form N-CSRS

Long-term bond yields rose sharply during the six-month period ended April 30, 2006, with much of the increase occurring in March and April 2006. Bond prices, which move opposite of yields, declined. Bond prices were pressured as investors focused on solid economic growth, both globally and in the United States, and renewed inflationary pressures deriving from rising commodity prices. First quarter 2006 gross domestic product growth was recently estimated at 4.8%, well above the 1.7% rate recorded in the fourth quarter of 2005.

The Federal Reserve Board (the Fed) continued to raise short-term interest rates at each of its meetings during the period, bringing the federal funds target rate to 4.75% at period-end, and to 5% on May 10. In response, the Treasury curve continued to flatten, with short-term interest rates rising more than longer-term interest rates. Over the past six months, 30-year U.S. Treasury bond yields rose 41 basis points (.41%) to 5.17% and 10-year U.S. Treasury note yields rose 50 basis points to 5.07%, the highest level since May 2002.

While the municipal yield curve also flattened during the period, the market's strong technical position provided significant price support. This allowed municipal bond prices to improve slightly or decline much less than those of their taxable counterparts. As measured by Municipal Market Data, yields on AAA-rated issues maturing in 30 years fell six basis points to 4.53%, while yields on AAA-rated issues maturing in 10 years rose 16 basis points to 4.08%.

For the most part, the tax-exempt market's recent outperformance has been fostered by a dramatic decline in new bond issuance so far in 2006. In 2005, more than \$408 billion in new long-term tax-exempt bonds was underwritten, a new annual record and an increase of more than 13% compared to 2004. Over the past six months, \$170 billion in long-term municipal bonds was issued, a decline of 8.6% versus the same period a year earlier. The record new issuance in 2005 was largely triggered by a 47% increase in refunding activity as issuers took advantage of historically low bond yields and a flattening yield curve to refinance outstanding higher-couponed debt. Year-to-date through April 2006, refunding issuance declined more than 55% relative to the first four months of 2005. This decline already has led some analysts to reduce their forecasts for 2006 new issuance from the \$350 billion - \$370 billion range to \$300 billion - \$325 billion. Lower annual issuance would further solidify the tax-exempt market's already positive technical position.

The tax-exempt market has continued to enjoy strong investor demand. As reported by the Investment Company Institute, long-term municipal bond funds received net new monies of \$5.0 billion in 2005 -- a sharp reversal from the \$3.7 billion outflow in 2004. During the first quarter of 2006, tax-exempt mutual funds received over \$9.3 billion, slightly higher than the \$8.9 billion inflow during the same period in 2005. Recent statistics from AMG Data Services indicate that, thus far in 2006, weekly cash flows into long-term municipal bond funds averaged over \$300 million, a significant improvement from the weekly average of \$65 million in December 2005.

Looking ahead, the fundamentals for the tax-exempt bond market appear favorable, and continued positive cash flows are anticipated. Given their attractive yields relative to comparable U.S. Treasury bonds, and the prospects for reduced issuance in 2006, we believe municipal bonds could enjoy solid results in the coming months.

MuniYield Fund, Inc.

How did the Fund perform during the period?

Edgar Filing: MUNIYIELD QUALITY FUND INC - Form N-CSRS

For the six-month period ended April 30, 2006, the Common Stock of MuniYield Fund, Inc. had net annualized yields of 6.69% and 6.42%, based on a period-end per share net asset value of \$14.57 and a per share market price of \$15.18, respectively, and \$.483 per share income dividends. Over the same period, the total investment return on the Fund's Common Stock was +4.03%, based on a change in per share net asset value from \$14.48 to \$14.57, and assuming reinvestment of all distributions.

The Fund's total return, based on net asset value, significantly exceeded the +2.60% average return of the Lipper General Municipal Debt Funds (Leveraged) category for the six-month period. (Funds in this Lipper category invest primarily in municipal debt issues rated in the top four credit-rating categories. These funds can be leveraged via use of debt, preferred equity and/or reverse repurchase agreements.) As in prior periods, Fund performance continued to be driven by our overweight exposure to lower-rated, higher-yielding credits. As credit spreads tightened throughout the period, lower-rated instruments outperformed the broader market and provided both price appreciation and incremental yield for the Fund. Our exposure to airline-related debt, in particular, proved to be the most significant factor in the Fund's outperformance. The airline sector had been the sole laggard in the high yield space until investors finally took notice of the industry's improving prospects within the past three months to six months.

Also benefiting Fund performance was our active management of the portfolio's duration, or its sensitivity to interest rate risk. Entering the period, we had a neutral duration posture compared to our Lipper peers, with the intention of lengthening that position slightly going into the end of 2005 -- which we did. In light of market improvement, we subsequently shortened our duration modestly in a timely move ahead of the market backup that occurred in the latter half of the period. We also continued to position the portfolio to take advantage of the flattening trend in the municipal yield curve. The curve did flatten further over the past six months, and our strategy contributed to performance.

For a description of the Fund's total investment return based on a change in the per share market value of the Fund's Common Stock (as measured by the trading price of the Fund's shares on the New York Stock Exchange), and assuming reinvestment of dividends, please refer to the Financial Highlights section of this report. As a closed-end fund, the Fund's shares may trade in the secondary market at a premium or discount to the Fund's net asset value. As a result, total investment returns based on changes in the market value of the Fund's Common Stock may vary significantly from total investment returns based on changes in the Fund's net asset value.

What changes were made to the portfolio during the period?

We had anticipated further flattening of the municipal yield curve during the period and, as such, portfolio activity remained focused on taking advantage of that trend. To that end, we typically made purchases in the 20-year - 30-year maturity range using proceeds from the sale of bonds with much shorter maturities, such as those in the five-year - 10-year area. We also looked to sell longer-dated bonds that were likely to be called by their issuers in that five-year - 10-year time frame.

In fact, the problem of longer, higher-coupon issues being called by issuers is one that has challenged most investors as long-term interest rates declined or failed to rise as anticipated. As a result, many portfolios have seen a tremendous influx of cash, which they have opted to invest in lower-rated, higher-yielding credits. During this period, we sought to take advantage of the fairly aggressive pricing that this demand has caused by selling some of our high yield issues, and thereby reducing our overweight position in this sector.

A number of factors have combined to sharply reduce the overall supply of

Edgar Filing: MUNIYIELD QUALITY FUND INC - Form N-CSRS

municipal issues in the early months of 2006. The low interest rate environment of 2005 may have exhausted much of the potential new-issue supply, and with interest rates having risen somewhat over the past few months, some issuers may have been discouraged from coming to market. Despite this dearth of new supply, our superior research and analysis capabilities allowed the Fund to identify opportunities in lesser known issues that most other investors may have overlooked. This activity has helped us to maintain a competitive dividend distribution rate despite the ill effects of early calls, scant supply and declining yields.

SEMI-ANNUAL REPORTS

APRIL 30, 2006

5

A Discussion With Your Funds' Portfolio Managers (continued)

For the six-month period ended April 30, 2006, the Fund's Auction Market Preferred Stock (AMPS) had an average yield of 3.06% for Series A, 2.96% for Series B, 3.15% for Series C, 3.21% for Series D, 2.96% for Series E, 3.03% for Series F and 2.99% for Series G. The Fed raised the short-term interest rate target 100 basis points during the six-month period (and another 25 basis points on May 10), and this continued to affect the Fund's borrowing costs. We would expect additional increases in the cost of funds to be more limited as the Fed nears a pause in its monetary tightening campaign. Despite the rate increases during the period, the tax-exempt yield curve maintained a positive slope, allowing us to borrow at a lower rate than where we invest. This continued to generate an income benefit to the holders of Common Stock from the leveraging of Preferred Stock. However, should the spread between short-term and long-term interest rates narrow, the benefits of leveraging will decline and, as a result, reduce the yield on the Fund's Common Stock. At the end of the period, the Fund's leverage amount, due to AMPS, was 34.50% of total net assets, before the deduction of Preferred Stock. (For a more complete explanation of the benefits and risks of leveraging, see page 10 of this report to shareholders.)

How would you characterize the Fund's position at the close of the period?

At period-end, the Fund was neutrally positioned in terms of both interest rate risk and credit quality, having reduced our overweight position in lower-rated securities somewhat. Our yield curve outlook has changed in response to recent speculation that the Fed may be closer to the end of its monetary tightening program. Therefore, we believe the majority of the curve flattening is behind us, and we are in the early stages of reducing our exposure to the long end of the curve. We now see the most attractive value closer to the middle of the curve, around the 10-year -- 15-year range. While we believe there is still some risk of further Fed tightening, the markets tend to anticipate and react to those moves before the fact, so we prefer to be at the front end of that trend.

MuniYield Quality Fund, Inc.

How did the Fund perform during the period?

For the six-month period ended April 30, 2006, the Common Stock of MuniYield Quality Fund, Inc. had net annualized yields of 5.50% and 5.91%, based on a period-end per share net asset value of \$14.89 and a per share market price of \$13.85, respectively, and \$.406 per share income dividends. Over the same period, the total investment return on the Fund's Common Stock was +2.04%, based on a change in per share net asset value from \$15.02 to \$14.89, and assuming reinvestment of all distributions.

The Fund's total return, based on net asset value, outpaced the +1.94% average return of the Lipper Insured Municipal Debt Funds (Leveraged) category for the six-month period. (Funds in this Lipper category invest primarily in municipal

Edgar Filing: MUNIYIELD QUALITY FUND INC - Form N-CSRS

debt issues insured as to timely payment. These funds can be leveraged via use of debt, preferred equity and/or reverse repurchase agreements.)

Overall, the municipal market performed fairly well in this period of rising interest rates. The yield curve continued to flatten as the long end rallied slightly while the short end underperformed. Against this backdrop, Fund performance benefited from our strategy of moving further out on the curve as opportunities presented themselves. Also contributing to Fund results was our focus on maintaining an above-average yield and, consistent with that goal, remaining fully invested.

For a description of the Fund's total investment return based on a change in the per share market value of the Fund's Common Stock (as measured by the trading price of the Fund's shares on the New York Stock Exchange), and assuming reinvestment of dividends, please refer to the Financial Highlights section of this report. As a closed-end fund, the Fund's shares may trade in the secondary market at a premium or discount to the Fund's net asset value. As a result, total investment returns based on changes in the market value of the Fund's Common Stock can vary significantly from total investment returns based on changes in the Fund's net asset value.

6

SEMI-ANNUAL REPORTS

APRIL 30, 2006

What changes were made to the portfolio during the period?

We entered the period with a neutral posture as the Fed appeared to be approaching a pause in its rate-hiking campaign. Although both the Treasury and the municipal yield curves continued to flatten during the past six months, the move was not nearly as dramatic as we have seen in prior periods. Notably, the municipal curve retained a positive slope, particularly relative to the Treasury curve which actually inverted early in 2006, and this contributed to the market's and the Fund's positive performance.

The other important dynamic in the municipal market during the six-month period was the drop in new issuance, especially fixed rate, longer-term issuance. This decline in supply supported the performance of the municipal market, but also meant there were fewer options for restructuring the portfolio. Notwithstanding that fact, we were still able to take advantage of inter-period volatility, using backups in market yields to selectively book tax losses (that is, taking losses to offset any gains) and swap into other bonds in instances where we thought it would be beneficial to the Fund. In addition, we sold some of the portfolio's premium-coupon, short-call bonds into a strong market inquiry. Given that there was an interested buyer in the market, we were able to sell the bonds at very favorable prices. Generally speaking, we redeployed the proceeds from the sale into bonds with maturities in the 25-year range and with coupons of approximately 5%.

For the six-month period ended April 30, 2006, the Fund's Auction Market Preferred Stock (AMPS) had average yields of 3.09% for Series A, 3.00% for Series B, 3.23% for Series C, 3.02% for Series D and 3.01% for Series E. The Fed raised the short-term interest rate target 100 basis points during the six-month period (and another 25 basis points on May 10), and this continued to affect the Fund's borrowing costs. We would expect additional increases in the cost of funds to be more limited as the Fed nears a pause in its monetary tightening campaign. Despite the rate increases during the period, the tax-exempt yield curve maintained a positive slope, allowing us to borrow at a lower rate than where we invest. This continued to generate an income benefit to the holders of Common Stock from the leveraging of Preferred Stock. However, should the spread between short-term and long-term interest rates narrow, the benefits of leveraging will decline and, as a result, reduce the yield on the Fund's Common

Edgar Filing: MUNIYIELD QUALITY FUND INC - Form N-CSRS

Stock. At the end of the period, the Fund's leverage amount, due to AMPS, was 35.57% of total net assets, before the deduction of Preferred Stock. (For a more complete explanation of the benefits and risks of leveraging, see page 10 of this report to shareholders.)

How would you characterize the Fund's position at the close of the period?

We remain focused on generating an attractive level of tax-exempt income for our shareholders. The Fund ended the period fully invested and with an overall neutral market posture, in keeping with our internal Investment Committee's recommendation. After 16 consecutive interest rate hikes, the Fed may be near a pause in its monetary tightening program. However, global economies and certain pockets of the U.S. economy continue to show solid growth, leading us to believe that it still may be early to become too aggressive. We believe a neutral posture is prudent in the current environment and should provide for competitive performance.

On a tactical basis, we recently started to look at opportunities back down the yield curve in the 15-year - 20-year area, as opposed to the previously favored 25-year - 30-year range. We have found that we can move five years - 10 years down the yield curve without sacrificing a significant amount of yield. Given the degree of yield-curve flattening that has occurred over the course of the Fed's rate-hiking campaign, we believe this maturity range could be ready to outperform. As always, we will continue to monitor the economy, the Fed and the municipal market, and stand ready to adjust our approach as needed.

SEMI-ANNUAL REPORTS

APRIL 30, 2006

7

A Discussion With Your Funds' Portfolio Managers (concluded)

MuniYield Quality Fund II, Inc.

How did the Fund perform during the period?

For the six-month period ended April 30, 2006, the Common Stock of MuniYield Quality Fund II, Inc. had net annualized yields of 5.51% and 5.85%, based on a period-end per share net asset value of \$13.25 and a per share market price of \$12.47, respectively, and \$.362 per share income dividends. Over the same period, the total investment return on the Fund's Common Stock was +2.11%, based on a change in per share net asset value from \$13.36 to \$13.25, and assuming reinvestment of all distributions.

The Fund's total return, based on net asset value, outpaced the +1.94% average return of the Lipper Insured Municipal Debt Funds (Leveraged) category for the six-month period. (Funds in this Lipper category invest primarily in municipal debt issues insured as to timely payment. These funds can be leveraged via use of debt, preferred equity and/or reverse repurchase agreements.)

Overall, the municipal market performed fairly well in this period of rising interest rates. The yield curve continued to flatten as the long end rallied slightly while the short end underperformed. Against this backdrop, Fund performance benefited from our strategy of moving further out on the curve as opportunities presented themselves. Also contributing to Fund results was our focus on maintaining an above-average yield and, consistent with that goal, remaining fully invested.

For a description of the Fund's total investment return based on a change in the per share market value of the Fund's Common Stock (as measured by the trading price of the Fund's shares on the New York Stock Exchange), and assuming reinvestment of dividends, please refer to the Financial Highlights section of

Edgar Filing: MUNIYIELD QUALITY FUND INC - Form N-CSRS

this report. As a closed-end fund, the Fund's shares may trade in the secondary market at a premium or discount to the Fund's net asset value. As a result, total investment returns based on changes in the market value of the Fund's Common Stock can vary significantly from total investment returns based on changes in the Fund's net asset value.

What changes were made to the portfolio during the period?

We entered the period with a neutral posture as the Fed appeared to be approaching a pause in its rate-hiking campaign. Although both the Treasury and the municipal yield curves continued to flatten during the past six months, the move was not nearly as dramatic as we have seen in prior periods. Notably, the municipal curve retained a positive slope, particularly relative to the Treasury curve which actually inverted early in 2006, and this contributed to the market's and the Fund's positive performance.

The other important dynamic in the municipal market during the six-month period was the drop in new issuance, especially fixed rate, longer-term issuance. This decline in supply supported the performance of the municipal market, but also meant there were fewer options for restructuring the portfolio. Notwithstanding that fact, we were still able to take advantage of inter-period volatility, using backups in market yields to selectively book tax losses (that is, taking losses to offset any gains) and swap into other bonds in instances where we thought it would be beneficial to the Fund. In addition, we sold some of the portfolio's premium-coupon, short-call bonds into a strong market inquiry. Given that there was an interested buyer in the market, we were able to sell the bonds at very favorable prices. Generally speaking, we redeployed the proceeds from the sale into bonds with maturities in the 25-year range and with coupons of approximately 5%.

For the six-month period ended April 30, 2006, the Fund's Auction Market Preferred Stock (AMPS) had average yields of 3.12% for Series A, 3.33% for Series B, 2.99% for Series C and 2.99% for Series D. The Fed raised the short-term interest rate target 100 basis points during the six-month period (and another 25 basis points on May 10), and this continued to affect the Fund's borrowing costs. We would expect additional increases in the cost of funds to be more limited as the Fed nears a pause in its monetary tightening campaign. Despite the rate increases during the period, the tax-exempt yield curve maintained a positive slope, allowing us to borrow at a lower rate than where we invest. This continued to

SEMI-ANNUAL REPORTS

APRIL 30, 2006

9

The Benefits and Risks of Leveraging

The Funds utilize leveraging to seek to enhance the yield and net asset value of their Common Stock. However, these objectives cannot be achieved in all interest rate environments. To leverage, each Fund issues Preferred Stock, which pays dividends at prevailing short-term interest rates, and invests the proceeds in long-term municipal bonds. The interest earned on these investments, net of dividends to Preferred Stock, is paid to Common Stock shareholders in the form of dividends, and the value of these portfolio holdings is reflected in the per share net asset value of each Fund's Common Stock. However, in order to benefit Common Stock shareholders, the yield curve must be positively sloped; that is, short-term interest rates must be lower than long-term interest rates. At the same time, a period of generally declining interest rates will benefit Common Stock shareholders. If either of these conditions change, then the risks of leveraging will begin to outweigh the benefits.

To illustrate these concepts, assume a fund's Common Stock capitalization of \$100 million and the issuance of Preferred Stock for an additional \$50 million, creating a total value of \$150 million available for investment in long-term municipal bonds. If prevailing short-term interest rates are approximately 3% and long-term interest rates are approximately 6%, the yield curve has a strongly positive slope. The fund pays dividends on the \$50 million of Preferred Stock based on the lower short-term interest rates. At the same time, the fund's total portfolio of \$150 million earns the income based on long-term interest rates.

In this case, the dividends paid to Preferred Stock shareholders are significantly lower than the income earned on the fund's long-term investments, and therefore the Common Stock shareholders are the beneficiaries of the incremental yield. However, if short-term interest rates rise, narrowing the differential between short-term and long-term interest rates, the incremental yield pickup on the Common Stock will be reduced or eliminated completely. At the same time, the market value of the fund's Common Stock (that is, its price as listed on the New York Stock Exchange) may, as a result, decline. Furthermore, if long-term interest rates rise, the Common Stock's net asset

Edgar Filing: MUNIYIELD QUALITY FUND INC - Form N-CSRS

value will reflect the full decline in the price of the portfolio's investments, since the value of the fund's Preferred Stock does not fluctuate. In addition to the decline in net asset value, the market value of the fund's Common Stock may also decline.

As a part of their investment strategy, the Funds may invest in certain securities whose potential income return is inversely related to changes in a floating interest rate ("inverse floaters"). In general, income on inverse floaters will decrease when short-term interest rates increase and increase when short-term interest rates decrease. Investments in inverse floaters may be characterized as derivative securities and may subject the Funds to the risks of reduced or eliminated interest payments and losses of invested principal. In addition, inverse floaters have the effect of providing investment leverage and, as a result, the market value of such securities will generally be more volatile than that of fixed rate, tax-exempt securities. To the extent the Funds invest in inverse floaters, the market value of each Fund's portfolio and the net asset value of each Fund's shares may also be more volatile than if the Funds did not invest in these securities. As of April 30, 2006, the percentages of MuniYield Fund, Inc.'s, MuniYield Quality Fund, Inc.'s and MuniYield Quality Fund II, Inc.'s total net assets invested in inverse floaters were 6.43%, 12.71% and 12.59%, respectively, before the deduction of Preferred Stock.

Swap Agreements

The Funds may invest in swap agreements, which are over-the-counter contracts in which one party agrees to make periodic payments based on the change in market value of a specified bond, basket of bonds, or index in return for periodic payments based on a fixed or variable interest rate or the change in market value of a different bond, basket of bonds or index. Swap agreements may be used to obtain exposure to a bond or market without owning or taking physical custody of securities. Swap agreements involve the risk that the party with whom each Fund has entered into a swap will default on its obligation to pay the Fund and the risk that the Fund will not be able to meet its obligations to pay the other party to the agreement.

SEMI-ANNUAL REPORTS

APRIL 30, 2006

35

Notes to Financial Statements

1. Significant Accounting Policies:

MuniYield Fund, Inc., MuniYield Quality Fund, Inc. and MuniYield Quality Fund II, Inc. (the "Funds" or individually as the "Fund") are registered under the Investment Company Act of 1940, as amended, as non-diversified, closed-end management investment companies. The Funds' financial statements are prepared in conformity with U.S. generally accepted accounting principles, which may require the use of management accruals and estimates. Actual results may differ from these estimates. These unaudited financial statements reflect all adjustments, which are, in the opinion of management, necessary to present a fair statement of the results for the interim period. All such adjustments are of a normal, recurring nature. The Funds determine and make available for publication the net asset value of their Common Stock on a daily basis. The Funds' Common Stock shares are listed on the New York Stock Exchange under the symbol MYD for MuniYield Fund, Inc., MQY for MuniYield Quality Fund, Inc. and MQT for MuniYield Quality Fund II, Inc. The following is a summary of significant accounting policies followed by the Funds.

(a) Valuation of investments -- Municipal bonds are traded primarily in the over-the-counter ("OTC") markets and are valued at the last available bid price in the OTC market or on the basis of values as obtained by a pricing service. Pricing services use valuation matrixes that incorporate both dealer-supplied valuations and valuation models. The procedures of the pricing service and its valuations are reviewed by the officers of the Funds under the general direction of the Board of Directors. Such valuations and procedures are reviewed periodically by the Board of Directors of the Funds. Financial futures contracts and options thereon, which are traded on exchanges, are valued at their closing prices as of the close of such exchanges. Options written or purchased are valued at the last sale price in the case of exchange-traded options. In the case of options traded in the OTC market, valuation is the last asked price (options written) or the last bid price (options purchased). Swap agreements are valued by quoted fair values received daily by the Funds' pricing service. Short-term investments with a remaining maturity of 60 days or less are valued at amortized cost, which approximates market value, under which method the investment is valued at cost and any premium or discount is amortized on a

Edgar Filing: MUNIYIELD QUALITY FUND INC - Form N-CSRS

straight line basis to maturity. Investments in open-end investment companies are valued at their net asset value each business day. Securities and other assets for which market quotations are not readily available are valued at fair value as determined in good faith by or under the direction of the Board of Directors of the Funds.

(b) Derivative financial instruments -- Each Fund may engage in various portfolio investment strategies both to increase the return of each Fund and to hedge, or protect, its exposure to interest rate movements and movements in the securities markets. Losses may arise due to changes in the value of the contract or if the counterparty does not perform under the contract.

o Financial futures contracts -- Each Fund may purchase or sell financial futures contracts and options on such futures contracts. Futures contracts are contracts for delayed delivery of securities at a specific future date and at a specific price or yield. Upon entering into a contract, the Fund deposits and maintains as collateral such initial margin as required by the exchange on which the transaction is effected. Pursuant to the contract, the Fund agrees to receive from or pay to the broker an amount of cash equal to the daily fluctuation in value of the contract. Such receipts or payments are known as variation margin and are recorded by the Fund as unrealized gains or losses. When the contract is closed, the Fund records a realized gain or loss equal to the difference between the value of the contract at the time it was opened and the value at the time it was closed.

o Options -- Each Fund may purchase and write call and put options. When the Fund writes an option, an amount equal to the premium received by the Fund is reflected as an asset and an equivalent liability. The amount of the liability is subsequently marked-to-market to reflect the current market value of the option written. When a security is purchased or sold through an exercise of an option, the related premium paid (or received) is added to (or deducted from) the basis of the security acquired or deducted from (or added to) the proceeds of the security sold. When an option expires (or the Fund enters into a closing transaction), the Fund realizes a gain or loss on the option to the extent of the premiums received or paid (or gain or loss to the extent the cost of the closing transaction exceeds the premium paid or received).

Written and purchased options are non-income producing investments.

o Forward interest rate swaps -- Each Fund may enter into forward interest rate swaps. In a forward interest rate swap, the Fund and the counterparty agree to make periodic net payments on a specified notional contract amount, commencing on a specified future effective date, unless terminated earlier. When the agreement is closed,

36

SEMI-ANNUAL REPORTS

APRIL 30, 2006

Notes to Financial Statements (continued)

the Fund records a realized gain or loss in an amount equal to the value of the agreement.

(c) Income taxes -- It is each Fund's policy to comply with the requirements of the Internal Revenue Code applicable to regulated investment companies and to distribute substantially all of its taxable income to its shareholders. Therefore, no federal income tax provision is required.

(d) Security transactions and investment income -- Security transactions are

Edgar Filing: MUNIYIELD QUALITY FUND INC - Form N-CSRS

recorded on the dates the transactions are entered into (the trade dates). Realized gains and losses on security transactions are determined on the identified cost basis. Dividend income is recorded on the ex-dividend dates. Interest income is recognized on the accrual basis. The Funds amortize all premiums and discounts on debt securities.

(e) Dividends and distributions -- Dividends from net investment income are declared and paid monthly. Distributions of capital gains are recorded on the ex-dividend dates.

(f) Offering expenses -- Direct expenses relating to the public offering of each Fund's Preferred Stock were charged to capital at the time of issuance of the shares. Any adjustments to estimates of offering costs were recorded back to capital.

2. Investment Advisory Agreement and Transactions with Affiliates:

Each Fund has entered into an Investment Advisory Agreement with Fund Asset Management, L.P. ("FAM"). The general partner of FAM is Princeton Services, Inc. ("PSI"), an indirect, wholly-owned subsidiary of Merrill Lynch & Co., Inc. ("ML & Co."), which is the limited partner.

FAM is responsible for the management of the Funds' portfolios and provides the necessary personnel, facilities, equipment and certain other services necessary to the operations of the Funds. For such services, each Fund pays a monthly fee at an annual rate of .50% of the Fund's average weekly net assets, including proceeds from the issuance of Preferred Stock. The Investment Adviser has agreed to reimburse its management fee by the amount of management fees each Fund pays to FAM indirectly through its investment in Merrill Lynch Institutional Tax-Exempt Fund. For the six months ended April 30, 2006, FAM reimbursed each Fund as follows:

	Reimbursement
MuniYield Fund, Inc.	\$15,691
MuniYield Quality Fund, Inc.	\$ 4,760
MuniYield Quality Fund II, Inc.	\$ 3,113

For the six months ended April 30, 2006, the Funds reimbursed FAM for certain accounting services. The reimbursements were as follows:

	Reimbursement
MuniYield Fund, Inc.	\$10,595
MuniYield Quality Fund, Inc.	\$ 7,902
MuniYield Quality Fund II, Inc.	\$ 5,025

Certain officers and/or directors of the Funds are officers and/or directors of FAM, PSI, and/or ML & Co.

In February 2006, ML & Co. and BlackRock, Inc. entered into an agreement to contribute ML & Co.'s investment management business, including FAM, to the investment management business of BlackRock, Inc. The transaction is expected to close in the third quarter of 2006.

3. Investments:

Purchases and sales of investments, excluding short-term securities, for the six

Edgar Filing: MUNIYIELD QUALITY FUND INC - Form N-CSRS

months ended April 30, 2006 were as follows:

	MuniYield Fund, Inc.	MuniYield Quality Fund, Inc.	MuniYield Quality Fund II, Inc.
Total Purchases	\$170,256,735	\$192,111,191	\$128,867,595
Total Sales	\$155,960,946	\$191,225,197	\$129,124,261

4. Stock Transactions:

Each Fund is authorized to issue 200,000,000 shares of stock, including Preferred Stock, par value \$.10 per share all of which were initially classified as Common Stock. The Board of Directors is authorized, however, to reclassify any unissued shares of stock without approval of the holders of Common Stock.

Common Stock

MuniYield Fund, Inc.

Shares issued and outstanding during the six months ended April 30, 2006 and the year ended October 31, 2005, increased by 186,342 and 93,211, respectively, as a result of dividend reinvestment.

MuniYield Quality Fund, Inc.

Shares issued and outstanding during the six months ended April 30, 2006 and the year ended October 31, 2005 remained constant.

MuniYield Quality Fund II, Inc.

Shares issued and outstanding during the six months ended April 30, 2006 and the year ended October 31, 2005 remained constant.

SEMI-ANNUAL REPORTS

APRIL 30, 2006

Notes to Financial Statements (concluded)

Preferred Stock

Auction Market Preferred Stock are redeemable shares of Preferred Stock of the Funds, with a liquidation preference of \$25,000 per share, plus accrued and unpaid dividends that entitle their holders to receive cash dividends at an annual rate that may vary for the successive dividend periods. The yields in effect at April 30, 2006 were as follows:

	MuniYield Fund, Inc.	MuniYield Quality Fund, Inc.	MuniYield Quality Fund II, Inc.
Series A	3.40%	3.52%	3.35%
Series B	3.36%	3.75%	3.39%
Series C	3.275%	3.60%	3.775%
Series D	3.65%	3.60%	3.70%
Series E	3.65%	3.60%	--
Series F	3.65%	--	--
Series G	3.64%	--	--

Edgar Filing: MUNIYIELD QUALITY FUND INC - Form N-CSRS

MuniYield Fund, Inc.

Shares issued and outstanding during the six months ended April 30, 2006 and the year ended October 31, 2005 remained constant.

MuniYield Quality Fund, Inc.

Shares issued and outstanding during the six months ended April 30, 2006 remained constant and during the year ended October 31, 2005 increased by 2,000 shares from the issuance of an additional series of Preferred Stock.

MuniYield Quality Fund II, Inc.

Shares issued and outstanding during the six months ended April 30, 2006 remained constant and during the year ended October 31, 2005 increased by 400 shares from the issuance of an additional series of Preferred Stock.

Each Fund pays commissions to certain broker-dealers at the end of each auction at an annual rate ranging from .25% to .375%, calculated on the proceeds of each auction. For the six months ended April 30, 2006, MLPF&S earned commissions as follows:

	Commissions
MuniYield Fund, Inc.	\$184,769
MuniYield Quality Fund, Inc.	\$168,821
MuniYield Quality Fund II, Inc.	\$ 96,323

5. Capital Loss Carryforward:

MuniYield Fund, Inc.

At October 31, 2005, the Fund had a net capital loss carryforward of \$43,211,705, of which \$3,242,729 expires in 2006, \$7,973,446 expires in 2007, \$25,806,020 expires in 2008, \$6,000,235 expires in 2009 and \$189,275 expires in 2010. These amounts will be available to offset like amounts of any future taxable gains.

MuniYield Quality Fund, Inc.

At October 31, 2005, the Fund had a net capital loss carryforward of \$2,453,619, of which \$114,477 expires in 2010 and \$2,339,142 expires in 2012. These amounts will be available to offset like amounts of any future taxable gains.

MuniYield Quality Fund II, Inc.

At October 31, 2005, the Fund had a net capital loss carryforward of \$35,441,922, of which \$2,730,523 expires in 2007, \$26,079,903 expires in 2008, \$1,096,837 expires in 2010 and \$5,534,659 expires in 2012. These amounts will be available to offset like amounts of any future taxable gains.

6. Subsequent Event:

Each Fund paid a tax-exempt income dividend to holders of Common Stock on May 30, 2006 to shareholders of record on May 15, 2006. The amount of the tax-exempt income dividend was as follows:

Edgar Filing: MUNIYIELD QUALITY FUND INC - Form N-CSRS

	Per Share Amount
MuniYield Fund, Inc.	\$.080000
MuniYield Quality Fund, Inc.	\$.066000
MuniYield Quality Fund II, Inc.	\$.059000

Dividend Policy

The Funds' dividend policy is to distribute all or a portion of their net investment income to its share holders on a monthly basis. In order to provide

Edgar Filing: MUNIYIELD QUALITY FUND INC - Form N-CSRS

shareholders with a more stable level of dividend distributions, the Funds may at times pay out less than the entire amount of net investment income earned in any particular month and may at times in any month pay out such accumulated but undistributed income in addition to net investment income earned in that month. As a result, the dividends paid by the Funds for any particular month may be more or less than the amount of net investment income earned by the Funds during such month. The Funds' current accumulated but undistributed net investment income, if any, is disclosed in the Statement of Assets, Liabilities and Capital, which comprises part of the Financial Information included in this report.

42
