C			4.6	077 242
Gross unrealized appreciation				377,243
Gross unrealized depreciation			(3,1	10,968)

The difference between book-basis and tax-basis unrealized appreciation/depreciation of investments is attributable to the tax treatment of certain tender option bond transactions.

1 Security subject to Alternative Minimum Tax.

Net unrealized depreciation

Security exempt from registration pursuant to Rule 144A under the Securities Act of 1933. These securities, which represent 18.91% of net assets applicable to common shareholders as of December 31, 2009, are considered liquid and may be resold in transactions exempt from registration, normally to qualified institutional buyers.

(233,725)

Security represents underlying bond transferred to a special-purpose entity established in a tender option bond transaction in which the Fund acquired the inverse floater. These securities serve as collateral in a financing transaction. As of December 31, 2009, the aggregate principal amount of the inverse floaters and the floating rate notes are \$6,630,000 and \$19,865,000, respectively.

4 Floating rate security. The interest rate shown is the current rate as of December 31, 2009.

Investment Grade Municipal Income Fund Inc.

Schedule of investments December 31, 2009 (unaudited)

5 Security exempt from registration pursuant to Rule 144A under the Securities Act of 1933. This security, which represents 0.35% of net assets applicable to common shareholders as of December 31, 2009, is considered illiquid and restricted (See table below for more information).

Illiquid and restricted security	Acquisition date	Acquisition cost (\$)	Acquisition cost as a percentage of common net assets (%)	Value at 12/31/2009 (\$)	Value as a percentage of common net assets (%)
Standing Rock New Publ	ic Housing				
6.000%, due 08/07/13	08/08/02	570,741	0.38	520,362	0.35

The securities detailed in the table below are considered illiquid and restricted and represent 5.78% of net assets applicable to common shareholders as of December 31, 2009.

Illiquid and restricted securities	Acquisition dates	Acquisition cost (\$)	Acquisition cost as a percentage of common net assets (%)	Value at 12/31/2009 (\$)	Value as a percentage of common net assets (%)

- Variable rate demand notes are payable on demand. The maturity dates shown are the next interest rate reset dates. The interest rates shown are the current rates as of December 31, 2009.
- The Fund calculates its net asset value based on the current market value, where available, for its portfolio securities. The Fund 8 normally obtains market values for its securities from independent pricing sources and broker-dealers. Independent pricing sources may use last reported sale prices, official market closing price, current market quotations or valuations from computerized matrix systems that derive values based on comparable securities. A matrix system incorporates parameters such as security quality, maturity and coupon, and/or research and evaluations by its staff, including review of broker-dealer market price quotations, if available, in determining the valuation of the portfolio securities. If a market value is not available from an independent pricing source for a particular security, that security is valued at fair value as determined in good faith by or under the direction of the Fund s Board of Directors (the Board). Various factors may be reviewed in order to make a good faith determination of a security s fair value. These factors may include, but are not limited to, the type and cost of the security; contractual or legal restrictions on resale of the security; relevant financial or business developments of the issuer; actively traded similar or related securities; conversion or exchange rights on the security; related corporate actions; and changes in overall market conditions. If events occur that materially affect the value of securities between the close of trading in those securities and the close of regular trading on the New York Stock Exchange, the securities are fair valued. The amortized cost method of valuation, which approximates market value, generally is used to value short-term debt instruments with sixty days or less remaining to maturity. Securities traded in the over-the-counter market are valued at the last bid price available on the valuation date prior to valuation.

In June 2009, the Financial Accounting Standards Board (FASB) established the FASB Accounting Standards Codification (Codification) as the single source of authoritative accounting principles recognized by the FASB in the preparation of financial statements in conformity with US generally accepted accounting principles (GAAP). The Codification supersedes existing and nongrandfathered, non-SEC accounting and reporting standards. The Codification did not change GAAP but rather organized it into a hierarchy where all guidance within the Codification carries an equal level of authority. The Codification became effective on July 1, 2009.

Investment Grade Municipal Income Fund Inc.

Schedule of investments December 31, 2009 (unaudited)

GAAP requires disclosure surrounding the various inputs that are used in determining the value of the Fund s investments. These inputs are summarized into the three broad levels listed below:

Level 1 Unadjusted quoted prices in active markets for identical investments.

Level 2 Other significant observable inputs, including but not limited to, quoted prices for similar investments, interest rates, prepayment speeds and credit risks.

Level 3 Unobservable inputs inclusive of the Fund s own assumptions in determining the fair value of investments.

The following is a summary of the fair valuations according to the inputs used as of December 31, 2009 in valuing the Fund s investments:

	Unadjusted quoted prices in active markets for identical investments (Level 1) (\$)	Other significant observable inputs (Level 2) (\$)	Unobservable inputs (Level 3) (\$)	Total (\$)
Long-term municipal bonds		241,663,921		241,663,921
Short-term municipal notes		5,100,000		5,100,000
Total		246,763,921		246,763,921
