Fixed-line Network

In 1Q05, Brasil Telecom installed 41.1 thousand lines, closing the quarter with 10.8 million terminals.

In 1Q05 we had 9.5 million lines in service, a result of 9.2 thousand net additions during the quarter. Based on a strategy of client segmentation with the objective of improving profitability and prevent delinquency, we continued to encourage our subscribers of alternative plans to migrate to our hybrid plan. This initiative increased the number of such terminals by 14.0% in the quarter.

Billed Pulses

Influenced by seasonal effects typical of the first quarter of the year, local traffic decreased by 16.9%. Additionally, the record sale of mobile phones in December 2004, as well as the increase in the number of ADSL accesses in service, contributed to the reduction of local traffic.

Long Distance Traffic

In 1Q05, LD traffic decreased by 7.1% compared to the previous quarter. Seasonal effects of the quarter also affected long distance traffic. **In the intra-sector segment Anatel's resolution regarding conurbated areas explains the traffic variation compared to 1Q04.**

LD Market Share

Brasil Telecom closed 1Q05 well positioned in the long distance market, with a 51.0% and 29.1% (quarterly average) market share in the interregional and international long distance segments. This reflects the success of our marketing campaigns (*Viaje com 14 e Aniversário das Cidades*) and the strength of the Brasil Telecom brand in Region II.

Sequentially, our **quarterly average long distance market share increased 0.6 p.p. in the intra-state segment**, reaching 82.9%. In the inter-state segment, our market share was of 91.0%.

Inter-Network Traffic

Inter-network traffic decreased by 12.0% in 1Q05 compared to the previous quarter. **We have implemented initiatives to increase the profitability of our operations.** In this sense, we offer pre-paid and hybrid plans, which have features that help to reduce fixed-to-mobile traffic. Additionally, subscribers of our residential plan have tried to control this type of traffic. Moreover, seasonality also played a role in the reduction of this traffic.

Graph 4: Gross Revenues Breakdown

Local Service

Gross revenues from local service reached R\$1,195.7 million in 1Q05, up 7.3% year-on-year and down 5.3% quarter-on-quarter, mainly as a result of the decrease in revenues from measured service.

Gross revenues from activation fees totaled R\$7.7 million in 1Q05, up 5.1% sequentially, due to the increase in the number of lines activated in the quarter. In 1Q05, 378.5 thousand lines were activated, compared to 376.8 thousand in 4Q04. Additionally, the rate adjustment of 3.4% effective since November 1, 2004 also positively impacted revenues from activation fees.

Gross revenues from basic subscription fees reached R\$830.8 million in the quarter, stable compared to the R\$832.2 million reported in 4Q04.

Gross revenues from measured service totaled R\$337.7 million in 1Q05, stable compared to the corresponding period in 2004.

Public Telephony

Gross revenues from public telephony services reached R\$86.9 million in 1Q05, due to the implementation of the *Brasil VirtualCel* service, which converts fixed-to-mobile calls made from public payphones into mobile-to-mobile calls. As a result, revenues from calls made from public payphones to mobile phones, which amounted to R\$42.6 million, are recognized as revenues of Brasil Telecom GSM.

Long Distance

Gross revenues from long distance services reached R\$430.2 million in 1Q05, down 3.3% sequentially. This reduction is mainly explained by the decrease of 7.1% in traffic, which in turn, was affected by seasonal effects typical of the first quarter of the year.

Inter-Network

Gross revenues from inter-network calls amounted to R\$832.5 million in 1Q05, down 2.6% quarter-on-quarter, due to a 12.0% decrease in inter-network traffic, which was offset by the increase of VC-2 and VC-3 traffic as a percentage of total of inter-network traffic. The VC-2 and VC-3 rates were also adjusted in February 2005, in accordance with the maximum rate authorized by Anatel in February 2004.

Interconnection

Gross revenues from interconnection fees in 1Q05 decreased by 7.6% compared to 4Q04, mainly due to the increase in our market share in long distance segments and the impact of seasonality in 1Q05.

Data Communications

In 1Q05, gross revenues from data communications and other services reached R\$420.6 million, up 12.5% sequentially, due to the growth in data communications services such as *VPN*, *Vetor*, and *Interlan*, and also by the 16.8% increase in ADSL accesses in service.

Data communications revenues have been increasing as a percentage of total revenues. **The segment increased its share from 8.6% of total revenues a year ago to 12.1% in 1Q05.**

Mobile Telephony

In 1Q05, gross revenues from mobile telephony services totaled R\$147.0 million, of which R\$99.6 million are related to services and R\$47.4 million to the sale of handsets and accessories. Due to our good client-mix (32.1% post-paid) revenues from monthly subscription fees accounted for 34.7% of total revenues from services.

Fixed-line Telephony ARPU

Fixed-line telephony ARPU (net revenues/Avg. LIS/month) was of R\$83.2 in 1Q05, compared to R\$83.9 in 4Q04.

Mobile Telephony ARPU

Total mobile telephony ARPU reached R\$29.4 in 1Q05. Post-paid ARPU was of R\$53.6 while pre-paid ARPU reached R\$17.7.

(Excluding Depreciation, Provisions, Losses and Other)

Operating Costs and Expenses

Operating costs and expenses reached R\$2,294.8 million in 1Q05, compared to R\$2,338.5 million in the previous quarter.

Cash costs (operating costs and expenses excluding depreciation, amortization, provisions, losses and other) was of R\$1,362.1 million in 1Q05, compared to R\$1,449.7 million in 4Q04, a decrease of 6.0% quarter-on-quarter. The main items responsible for this reduction were: interconnection (-11.0%) and materials (-42.8%).

Employees

At the end of 1Q05, our fixed-line arm had 5,690 employees, compared to 5,805 of the previous quarter.

Brasil Telecom GSM had 918 employees at the end of the quarter compared to 881 at 4Q04.

Personnel

Total personnel costs reached R\$153.2 million, up 22.2% from the previous quarter, mainly due to the recording of R\$14.1 million previously accounted for under the employee profit sharing line, the consolidation of iG in December 2004, and the effectiveness of the new Collective Bargaining Agreement since January 2005.

Cost of Subcontracted Services

Cost of subcontracted services, excluding interconnection costs and advertising and marketing expenses, totaled R\$492.2 million in 1Q05, virtually stable compared to the previous quarter.

Interconnection

Interconnection costs totaled R\$576.1 million in 1Q05, a decrease of 11.0% sequentially. Lower interconnection costs are associated to the synergies achieved between our mobile operations and the rest of our business, as well as the reduction in inter-network traffic.

Advertising and Marketing

Advertising and marketing expenses totaled R\$62.0 million in 1Q05, up 15.9% quarter-on-quarter.

Losses from accounts receivable as a percentage of gross revenues

Losses from accounts receivable as a percentage of gross revenues in 1Q05 reached 3.0%, compared to 3.7% in 4Q04. Losses from accounts receivable totaled R\$104.9 million in 1Q05, down 19.0% sequentially.

Accounts Receivable

Net of provision for doubtful accounts in the amount of R\$270.0 million, net accounts receivable totaled R\$2,186.8 million at the end of 1Q05.

Provision for Contingencies

In 1Q05, provision for contingencies totaled R\$35.9 million, down 71.8% quarter-on-quarter.

Materials

Costs and expenses related to materials amounted to R\$78.6 million in 1Q05, down 42.8% quarter-on-quarter. This was mainly due to the decrease in costs of handsets and accessories, which totaled R\$58.7 million in 1Q05, compared to R\$113.6 million in the previous quarter, which in turn, was as a result of the sales volume of Brasil Telecom GSM.

Other Operating Costs and Expenses / Revenues

Other operating costs and expenses reached R\$120.4 million in 1Q05.

BrTurbo launches e-mail-mobile convergence service

BrTurbo launched the **Giga Mail** service in the entire country. This new service offers **1 Gigabyte of email storage, virus and spam protection, digital certification, and allow its subscribers to integrate their e-mail accounts with their mobile phones.**

Giga Mail subscribers can access their email inbox by typing wapmail.brturbo.com.br in their mobile phone's WAP browser, and the service is compatible with all mobile operators that offer WAP services.

The launch of BrTurbo's **Giga Mail** is part of Brasil Telecom's **convergent integration of telecommunications service** strategy.

2005 SCENARIO (GUIDELINES)

Disclaimer

This press release contains forward-looking statements. Such statements are not statements of historical fact, and reflect the beliefs and expectations of the Company's management. The words "anticipates," "believes," "estimates," "expects," "forecasts," "intends," "plans," "predicts," "projects" and "targets" and similar words are intended to identify these statements, which necessarily involve known and unknown risks and uncertainties. Accordingly, the actual results of operations of the Company may be different from the company's current expectations, and the reader should not place undue reliance on these forward-looking statements. Forward-looking statements speak only as of the date they are made, and the Company does not undertake any obligation to update them in light of new information or future developments.

Broadband

We maintain our estimates of having **1.0 million ADSL accesses in service by the end of 2005**, virtually doubling our client base throughout the year.

Mobile Operations

Due to the success of our sales in the first quarter, we have revised our estimates and anticipate that **Brasil Telecom GSM's customer base should reach 2.1 million clients at the end of 2005, of which 77% are expected to be pre-paid. We also revised our ARPU estimates to R\$26 in 2005.** We maintain our average SAC estimate at R\$220 in 2005. We expect a churn rate equivalent to 50% of the market's average in 2005.

Revenues

We anticipate a healthy growth in revenues from data, mobile, internet and value-added services throughout 2005. Consequently revenues in 2005 should grow at a similar rate as the one observed in 2004.

Costs

Cost control will continue to be one of the strengths of our management in 2005. We expect a nominal increase in fixed-line telephony costs in-line with the Brazilian inflation rate.

Provision for Doubtful Accounts

We expect to report relatively lower provisions for doubtful accounts in 2005 compared to 2004, as internal controls improve and economic conditions continue to thrive, positively impacting income and employment figures.

EBITDA Margin

EBITDA margin for the fixed-line segment should remain in-line with 2004 and we expect a negative impact of 6 p.p. from mobile operations on the consolidated figure.

Debt

We expect to overcome the challenge of extending our debt maturity further, as well as to optimize our capital structure, and maintain a conservative leverage ratio and rich liquidity, so as to participate in possible consolidation opportunities in the sector and meet all of our obligations during the year.

CAPEX

2005's fixed-line Capex should be in-line with 2004's, excluding expenditures associated with the Universalization Targets established by Anatel for 2005. Mobile telephony Capex should be marginal and targeted at the increase of our coverage in Region II.
