Yes No

Production retaken at Platform P-50

Rio de Janeiro, July 9 2007 PETRÓLEO BRASILEIRO S/A - PETROBRAS, [Bovespa: PETR3/PETR4, NYSE: PBR/PBRA, Latibex: XPBR/XPBRA, BCBA: APBR/APBRA], a Brazilian international energy company, announces that production at Platform P-50 has been back at full capacity since the afternoon of Saturday, July 7, reaching the level of 160,000 barrels/day previous to the fire that took place on July 4. The fire caused no victims or oil leaks to the sea.

Full production was retaken after the transformer room cleaning operation was wrapped-up and after all other platform systems were checked and determined as fully operational.

Located in the Albacora Leste Field, in the Campos Basin, at nearly 120 km off the Rio de Janeiro coast, the P-50 is capable of producing up to 180,000 barrels of oil equivalent per day.

FORWARD-LOOKING STATEMENTS

This press release may contain forward-looking statements. These statements are statements that are not historical facts, and are based on management's current view and estimates of future economic circumstances, industry conditions, company performance and financial results. The words "anticipates", "believes", "estimates", "expects", "plans" and similar expressions, as they relate to the company, are intended to identify forward-looking statements. Statements regarding the declaration or payment of dividends, the implementation of principal operating and financing strategies and capital expenditure plans, the direction of future operations and the factors or trends affecting financial condition, liquidity or results of operations are examples of forward-looking statements. Such statements reflect the current views of management and are subject to a number of risks and uncertainties. There is no guarantee that the expected events, trends or results will actually occur. The statements are based on many assumptions and factors, including general economic and market conditions, industry conditions, and operating factors. Any changes in such assumptions or factors could cause actual results to differ materially from current expectations.
