Platform P-56 begins production in Marlim Sul field

Rio de Janeiro, August 16, 2011 – Petróleo Brasileiro S.A - Petrobras announces that semi-submersible platform P-56 began production on August 15, in Marlim Sul field, in Campos Basin (RJ). The unit began production through well 7-MLS-163HPRJS, which has a potential of approximately 16,000 barrels per day.

Installed at a water depth of 1,670 meters, the platform is designed to process up to 100 thousand barrels of oil per day when it reaches maximum capacity, expected to take place in the first quarter of 2012. Besides heavy oil of 18° API, P-56 will have the capacity to process and treat up to 6 million m³ per day of natural gas.

P-56 will be interconnected to 21 wells, of which 10 will be producers and 11 water injectors. The produced oil will be sent through oil pipeline to platform P-38, which is a FSO (floating storage and offloading vessel) type, located 20 km from the Platform. Then, the oil will be transferred to shuttle tankers and the natural gas will be delivered through gas pipeline to the Cabiúnas terminal.

P-56 is 125m long, 110m wide, 137m tall and has a total weight of more than 54 thousand tons. Construction of the integrated modules (topside) of P-56 reached a high rate of local content. The hull was built entirely in Brazil, which demonstrates the capacity of the local manufacturing sector to meet the orders of Petrobras.

FORWARD-LOOKING STATEMENTS

This press release may contain forward-looking statements within the meaning of Section 27A of the Securities Act of 1933, as amended (Securities Act), and Section 21E of the Securities Exchange Act of 1934, as amended (Exchange Act) that are not based on historical facts and are not assurances of future results. These forward-looking statements are based on management's current view and estimates of future economic circumstances, industry conditions, company performance and financial results. The words "anticipates", "believes", "estimates", "expects", "plans" and similar expressions, as they relate to the company, are intended to identify forward-looking statements. Statements regarding the declaration or payment of dividends, the implementation of principal operating and financing strategies and capital expenditure plans, the direction of future operations and the factors or trends affecting financial condition, liquidity or results of operations are examples of forward-looking statements. Such statements reflect the current views of management and are subject to a number of risks and uncertainties. There is no guarantee that the expected events, trends or results will actually occur. The statements are based on many assumptions and factors, including general economic and market conditions, industry conditions, and operating factors. Any changes in such assumptions or factors could cause actual results to differ materially from current expectations.

All forward-looking statements are expressly qualified in their entirety by this cautionary statement, and you should not place reliance on any forward-looking statement contained in this press release. We undertake no obligation to publicly update or revise any forward-looking statements, whether as a result of new information or future events or for any other reason.
