During the third quarter we continued to implement the 2013 business plan. The volume of launches reached R\$498 million in the period, a slight increase over the previous quarter, and totaled R\$1.3 billion for the 9M13 period. Delays in obtaining certain licenses and project approvals in the Gafisa segment, particularly in the city of São Paulo, and in the Alphaville segment, resulted in some launches being moved to the fourth quarter. Consequently, the last three months of the year are expected to contain a higher concentration of launches, with \$430 million already launched in the month of October. Given the strong fourth quarter pipeline, and assuming stable market conditions, the Company expects to achieve its full year launch guidance.

Market conditions remain positive, with supply and demand evenly balanced in the Company's three segments. Nevertheless, selective product development and thorough preparation in the lead up to project launches are key drivers of sales absorption. Third quarter sales volumes were similar to last quarter, keeping pace with launch activity. As predicted, the number of cancellations has declined throughout the year and in the third quarter, the volume fell 23% on a sequential basis. Looking ahead, preliminary fourth quarter operating results appear positive, with sales of approximately R\$370 million in October.

Cash generation was a third quarter highlight, given a return to positive cash generation of R\$32.1 million in the quarter, versus cash burn of R\$27.6 million in the 2Q13. For the 9M13 period, the result was a cash burn of R\$80.1 million. Operational cash flow was positive at R\$194.5 million in the 3Q13, and totaled R\$423.4 million in the first nine months of the year.

Delivery volumes reached 3,106 units in the 3Q13. Fourth quarter volumes are expected to be concentrated in the Tenda and Alphaville segments.

The Company's turnaround plan, which was initiated almost two years ago, is expected to be substantially concluded in early 2014. As stated in this report, Tenda has successfully delivered nearly 25 thousand legacy units since the end of 2011 and reduced its complexity, thereby returning capital to the Company's cash balances. At the same time, the brand has been relaunched under a profitable business model and new projects are performing well. The Gafisa brand is now focused on the states of São Paulo and Rio de Janeiro, and having almost completed the delivery of legacy projects outside of these core markets, is on the cusp of achieving metrics expected for the segment. Throughout the turnaround period Alphaville has maintained a consistent rate of growth and strong results. And Alphaville kept the pace of growth of recent years, with consistent results. The final stage of the restructuring is underway with the settlement of the sale of the 70% stake in Alphaville, expected to be complete by year-end. Funds shall be used to reduce our indebtedness, leaving the Company with an appropriate capital structure, lower level of leverage and focus on the strengthened Gafisa and Tenda operations.

In keeping with the new configuration of the Company's portfolio, we are in the process of developing a business plan for the five-year period dated 2014 to 2018. The planning process will take into account certain material assumptions and guidelines regarding project development in coming years. These include the expected size of Gafisa and Tenda's operations, the amount of capital allocated to each operation, the appropriate level of leverage for the Company's operations, the respective expected returns for each business unit, and, in particular, our commitment to capital discipline and shareholder value generation.

RECENT EVENTS

Updated Status of Alphaville

On June 7, Gafisa signed an agreement to sell a 70% stake in Alphaville to the private equity funds Blackstone and Pátria. On July 3, Gafisa completed the purchase of the outstanding 20% stake in Alphaville, belonging to Alphapar, thus holding 100% of Alphaville's capital stock. Since the announcement of the transaction, the Company and its advisors have been working on meeting the conditions precedent to the completion of the transaction. Approval by CADE – the antitrust agency - has already been granted, as well as consents from creditors and partners. The completion of the transaction is expected to occur towards the end of the 4Q13.

Capital Structure Following the Acquisition of a 20% stake in Alphaville

As mentioned above, in the 3Q13 the Company settled the acquisition of the outstanding 20% stake in Alphaville. This transaction resulted in a temporary increase in the Company's leverage to 126% (Net Debt/Equity) at the end of 3Q13. The following should be noted: (i) cash disbursement and debt issuance related to the acquisition of the remaining 20% stake; and (ii) reduction in Shareholders Equity due to adjustments in the lines of minority shareholders and goodwill constituted in the acquisition of the remaining 20% stake; which ultimately contributed to this transient increase in the Company's leverage.

With the settlement of the sale of the 70% stake in Alphaville, the projected Net Debt/Equity ratio is expected to reach around 55%, due to the following impacts: (i) cash entry net of taxes and transaction costs; (ii) profit recorded as a result of the operation, impacting the Company's Shareholders'Equity, and (iii) reversal of goodwill previously recorded.

The Company reaffirms its commitment with a healthy capital structure, by means of a level of leverage which is adequate for its operations.

Classification of Assets as Available for Sale with Retention of Associate Non-Controlling Interest

Given the impending sale of a 70% stake in Alphaville and associated transfer of operations to the buyer, these assets have been classified as available for sale. The adjustments were made in accordance with Brazilian accounting standards and international practices, and the effect of classifying Alphaville operations as assets available for sale on the ongoing operations for the current and comparative prior periods are summarized below. The income statement from September 30, 2012 was restated considering the effects of the Alphaville deconsolidation and presented in a separate heading titled "Result from discontinued operations". The financial statements of prior periods (3Q12 and 9M12) were presented on a comparable basis.

Updated Status of the Turnaround Strategy

Gafisa Segment

The Gafisa segment remains focused on the core markets of São Paulo and Rio de Janeiro, which form part of the Company's core strategy. The recovery in gross margin reflects the reduced participation of legacy projects in Gafisa's results.

Third quarter consolidated pro forma backlog revenue for the Gafisa Segment totaled R\$1.8 billion, of which around R\$121 million relates to projects located in discontinued markets. The projects outside core markets comprised 4 construction sites and 1,216 units under construction. The Company expects to hold two final outstanding construction sites at the beginning of 2014.

The higher volume of deliveries versus the second half of 2012 resulted in increased sales cancellations in the 1H13, which has since normalized in the 3Q13. In the first nine months of the year, the volume of dissolutions was R\$402.3 million, of which 38% refer to completed units and 34.6% to units in non-core markets. Of the cancelled units, 38.3% were resold in the same period (44.8% resold in São Paulo, 49.4% resold in Rio de Janeiro and 31.0% resold in other markets).

While projects located in São Paulo and Rio de Janeiro are performing well, the segment's gross margin continues to be slightly impacted by the worst performance of projects outside core markets. The Company believes in more normalized profitability levels as from the 1H14. Excluding legacy projects in discontinued markets, the Gafisa Segment gross margin would have been 34.0%.

The sales speed for inventory outside of core markets remains lower than that of sales within core markets, particularly in São Paulo and Rio de Janeiro. The sale of this inventory and the run-off of legacy projects are on schedule and expected to conclude in 2014.

Tenda Segment

The Tenda brand resumed launches in early 2013 under a new business model, which was initially focused on the markets of São Paulo and Bahia. Currently, the Company continues to operate in 4 macro regions: São Paulo, Rio de Janeiro, Minas Gerais and Northeast (Bahia and Pernambuco). The new operating model is based on three basic pillars: operating efficiency, risk management and capital discipline.

The new business model has resulted in a consistent reduction in the level of dissolutions in recent quarters. We expect this trend to be maintained over the coming quarters, as legacy projects are replaced by projects recently launched by Tenda. In 3Q13, once again, Tenda reported a 15.4% reduction in dissolutions compared to the previous quarter and a 49.4% decline compared with the prior year period. During the 3Q13, sales cancellations declined to R\$133.7 million from R\$157.8 million in the 2Q13, and to R\$263.8 million in the 3Q12. Of the 3,540 units experiencing sales cancellations in the Tenda segment and returned to inventory, 79.1% were resold in the 9M13 period.

Tenda remains focused on the completion and delivery of its remaining projects, and is also dissolving contracts with non-eligible clients, so as to sell the units to qualified customers. Thus, Tenda worked to improve its financial cycle, by reducing the average time required to conclude the contract signing, which has been halved from 14 months in 3Q12, to 7 months in the 3Q13. Taking into account only projects launched within the new business model, the average time is 4 months.

The run-off of legacy projects is on schedule and shall be mostly concluded in 2014. The final phase of Tenda legacy projects includes around 5,689 units to be delivered.

Consolidated Operating Results

Consolidated Launches

Third-quarter launches totaled R\$498.3 million, a 8.1% increase compared to 2Q13, and 10.3% rise versus 3Q12. For the 9M13, launches were R\$1.3 billion, a 13.4% decrease compared to the same period last year. The result was impacted by delays in receiving certain licenses and in the approval process for the Gafisa segment, particularly in the city of São Paulo, and for the Alphaville segment, which caused some launches to be moved to the 4Q13.

Year to date launch volumes represent 42% of the mid-range of full-year launch guidance of R\$2.7 to R\$3.3 billion. The before mentioned delays are expected to result in a higher concentration of 4Q13 launches.

18 projects/phases were launched across 6 states in the 9M13. In terms of PSV, Gafisa accounted for 32% of the total, Alphaville 48% and Tenda the remaining 20%.

Third-quarter consolidated pre-sales totaled R\$429.0 million, a decrease of 22.4% compared to 2Q13, and 37.7% versus 3Q12. The result reflects the lower volume of launches in the period.

In the 9M13, sales from launches represented 44.1% of the total, while sales from inventory comprised the remaining 55.9%.

Consolidated Sales over Supply (SoS)

Consolidated sales over supply reached 10.6% in 3Q13, compared to 13.4% in 2Q13. The consolidated sales speed of launches in the 9M13 reached 41.3%.

Sales of this quarter were impacted by the 2 phased launches of Alphaville projects, in which the distribution of sales throughout the construction phase was already expected, and the contribution of one Gafisa segment launch in the period.

Dissolutions

The Company has achieved a consistent reduction in its dissolution levels (ex-Alphaville) since the end of 2012, with quarterly dissolutions declining approximately 64.0%, from R\$573.8 million in 4Q11 to R\$206.5 million in 3Q13. The most notable improvement occurred in Tenda, which achieved a 71.5% reduction in dissolutions over this period, due to the implementation of a new business model and a reduction in old projects. The Gafisa segment, in turn, also achieved a substantial reduction, with dissolutions declining 47.0% on a sequential basis.

History of Dissolutions (R\$ million)

Of the 1,113 Gafisa segment units that were cancelled and returned to inventory in the 9M13, 38.3% have been resold. For the Tenda brand, 3,331 units were returned to inventory following their cancellation, of which 79.1% have been resold.

Projects & Unit Deliveries

The Company delivered 14 projects encompassing 3,106 units in the third quarter, with 1,477 units stemming from the Gafisa segment, 1,014 from Tenda and the remaining 615 from Alphaville. The delivery date is based on the "Delivery Meeting" that takes place with customers, and not upon the physical completion, which is prior to the delivery meeting. In the 9M13, projects delivered by the Gafisa Group comprised 7,779 units. The 9M13 result equates to 50% of full-year guidance.

Units to be delivered in the 4Q13 are either complete or at final stages of completion, awaiting final documentation.

Additional information concerning projects and units delivered by the Gafisa Group can be found in the appendix to this release.

Gross Profit

Gross profit for the period was R\$173.5 million, compared with R\$143.8 million registered in 2Q13 and a 10.8% rise y-o-y. from the R\$156.6 million of the 3Q12. Gross margin in the quarter reached 27.6%, increase of 5 percentage points from the previous quarter. Still, the gross margin is improving as Gafisa and Tenda segment legacy projects are replaced by projects launched in core markets containing higher margins. The increased contribution of more profitable projects to consolidated results can be observed throughout 2013. In addition, other factors contributed to the margin improvement, such as the effect of the National Index of Construction Costs (INCC) variation in May and the sale of landbank at Gafisa.

SG&A expenses totaled R\$101.3 million in the 3Q13, a 12.6% decrease compared with the R\$115.9 reported in 3Q12 and a 7.9% sequential reduction. The improvement primarily reflects reduced selling expenses, which amounted to R\$46.1 million, representing a 23.6% decrease versus 2Q13. General and administrative expenses decreased by 8.2% compared to 3Q12, but rose 11.2% compared with the 2Q13.

Liquidity

In the third quarter, the Company's level of indebtedness and leverage was temporarily impacted by the settlement of the purchase of the outstanding (20%) shares of Alphaville. Following is a brief explanation about the impacts:

Table 38. Impact Acquisition of 20% Stake in Alphaville

Minority Shareholders	50,834	169,132	-118,298	-120,051
Shareholder's Equity	2,216,828	2,449,326	-232,498	-252,449
Shareholder's Equity + Minority	2,267,662	2,618,458	-350,796	-372,500
Cash and Cash Equivalents	781,606	1,101,160	-319,554	-366,662
Total Debt + Investor Obligations	3,639,701	3,620,379	19,322	-
Net Debt	2,858,095	2,519,219	338,876	-
(Net Debt) / (Shareholder's Equity)	126.0%	96.2%	2998 bps	-

The acquisition of the remaining stake (20%) of Alphaville eventually impacted the level of indebtedness of the Company and hence its leverage ratio. The transaction was financed through the partial use of the Company's cash and by funding R\$250.0 million in June, or the 2Q13. The total disbursement was made in July (3Q13) in the amount of R\$366.6 million.

As a result of the acquisition, the Minority Shareholders line was reduced by R\$120.1 million, related to the 20% stake in Alphaville recognized as Asset Available for Sale. This change has led to the first impact on the Company's shareholder's equity. The recognition of goodwill amounting to R\$252.4 million resulted in a further reduction of the Company's shareholder's equity, which went from R\$2.618 billion in the last quarter to R\$2.268 billion in the 3Q13, a 13.4% decrease. Such goodwill will be reversed by the time of the settlement of the sale of the 70% stake in Alphaville.

During these transitory adjustments, the Company saw its net debt/equity ratio reach 126.0%, compared to 96.2% in the previous quarter. Excluding Project Finance, this net debt/equity ratio reached 44.7% versus 27.5% in the previous period.

In addition, it should be noted that at the time of settlement of the Alphaville transaction, the Company's expected leverage ratio (Net Debt / Equity) is estimated to reach around 55%.

Further detail about the Company's indebtedness structure after the transient effects of the acquisition of the remaining stake of Alphaville is noted below.

Net debt totaled R\$2.8 billion at the end of 3Q12, a slight increase of 3.7% over the previous year. Currently, the Company has access to a total of R\$1.6 billion in construction finance lines contracted with banks and R\$665 million in lines in the process of being approved. Also, Gafisa has R\$2.4 billion available in construction finance lines of credit for future developments.

Cash generation is a highlight of the third quarter. Gafisa Group's cash generation was around R\$32.1 million, compared to cash burn of R\$27.6 million in the 2Q13. Operational cash flow was positive at R\$194.5 million in the 3Q13, totaling R\$423.4 million in the 9M13. These figures take into consideration the classification of Alphaville as an asset available for sale.

OUTLOOK

Third-quarter launches totaled R\$498.3 million, an 8.1% sequential increase and a 10.3% rise versus the 3Q12. For the 9M13 period, total launches were R\$1.3 billion, a 13.4% decrease compared to the same period last year. This result was impacted by delays in receiving certain licenses and approvals for the Gafisa segment in the city of São Paulo and also for the Alphaville segment, resulting in some projects being moved to 4Q13. Launch volume represents 42% of the mid-range of full-year launch guidance of R\$2.7 to R\$3.3 billion. The above mentioned movement will result in a concentration in launches in the 4Q13.

The Company expects an adjusted EBITDA margin in the range of 12% - 14% in 2013, as margins continue to be impacted by (1) the resolution of Tenda legacy projects, including the delivery of around 7,000 units in 2013, and (2) the delivery of lower margin projects launched by Gafisa in non-core markets, expected to be substantially concluded in 2013.

Gafisa Group plans to deliver between 13,500 and 17,500 units in 2013, of which 27% will be delivered by Gafisa, 46% by Tenda segment and the remaining 27% by Alphaville. The Company expects to achieve full-year delivery guidance, in line with an anticipated increase in deliveries in the coming quarters.

PoC Method

Under Brazilian GAAP, real estate development revenues, costs and related expenses are recognized using the percentage-of-completion (“PoC”) method of accounting by measuring progress towards completion in terms of actual costs incurred versus total budgeted expenditures for each stage of a development.

Pre-sales

Contracted pre-sales are the aggregate amount of sales resulting from all agreements for the sale of units entered into during a certain period, including new units and units in inventory. Contracted pre-sales will be recorded as revenue as construction progresses (PoC method). There is no definition of "contracted pre-sales" under Brazilian GAAP.

PSV

Potential Sales Value.

SFH Funds

Funds from SFH are originated from the Governance Severance Indemnity Fund for Employees (FGTS) and from savings accounts deposits. Banks are required to invest 65% of the total savings accounts balance in the housing sector, either to final customers or developers, at lower interest rates than the private market.

Swap Agreements

A system in which we grant the land-owner a certain number of units to be built on the land or a percentage of the proceeds from the sale of units in such development in exchange for the land. By acquiring land through this system, we intend to reduce our cash requirements and increase our returns.
