Note: ARPU data including intercompany revenue eliminations.

- **Total accesses** fell 11.3% over 2Q15, totaling 73,304 thousand accesses. Worthy of mention is the postpaid segment, which grew by 6.9% y-o-y, totaling 31,629 thousand accesses and accounting for 43.1% of mobile accesses, up by 7.4 p.p. in the annual comparison. The human postpaid base ^[1] reached 24,472 thousand customers, 9.0% up y-o-y.

- **Total market share** came to 28.7% in May (-0.6 p.p. y-o-y). Telefonica Brasil reached 37% of **postpaid** net additions in 2016, recording a market share of 42.3% (+0.7 p.p. y-o-y), reflecting the recognized superior quality of our services. The Company is also the leader in 4G-technology handsets, reaching market share of 36.9% in May 2016.

[1] Excludes dongles and M2M.

- In 2Q16, **mobile net additions** totaled 33 thousand accesses. Net postpaid additions reached 370 thousand accesses in the second quarter, with prepaid net disconnections amounting to 337 thousand accesses.
- The **prepaid customer base** contracted by 21.5% in 2Q16 over 2Q15, due to the continuous adoption of a restrictive policy for the disconnection of inactive customers according to Anatel's criteria, underlying the Company's focus on rationality and profitability.
- The access base continued to expand in the **machine-to-machine (M2M)** market, reaching 4.6 million customers in June, 16.7% up on 2Q15. On the other hand, the dongle customer base continued to shrink, with the disconnection of 635 thousand clients, 19.9% down on 2Q15.
- **Total ARPU** moved up by 15.9% y-o-y, fueled by the performance of **data ARPU**, which accelerated increase in 2Q16 over 2Q15 (+40.0%). Excluding MTR reductions in the period, total ARPU posted annual growth of 18.2%.

NET OPERATING REVENUES

| Messaging P2P | 411.1 | 428.6 | (4.1) | 405.7 | 1.3 | 816.7 | 842.2 | (3.0) |
| Internet | 2,450.5 | 1,776.6 | 37.9 | 2,167.5 | 13.1 | 4,618.0 | 3,374.4 | 36.9 |
| VAS | 469.7 | 481.3 | (2.4) | 476.7 | (1.5) | 946.4 | 948.6 | (0.2) |
| Other services | 103.5 | 72.6 | 42.7 | 52.3 | 97.9 | 155.9 | 141.3 | 10.3 |
| Net handset revenues | 309.7 | 383.4 | (19.2) | 301.7 | 2.6 | 611.4 | 722.1 | (15.3) |

Net mobile revenue increased 1.3% in 2Q16 over 2Q15, due to the higher mobile service revenue, up 2.6% y-o-y, influenced by the increasing data revenue, partially offset by the lower revenue from the sale of handsets (-19.2% y-o-y) and voice, the latter affected by the effect from MRT reductions in February 2016. Excluding the regulatory effect, second-quarter mobile service revenue increased by 4.7% y-o-y.

Outgoing voice revenue reduced by 17.4% over 2Q15, reflecting the growing replacement by mobile internet, which more than offsets this reduction. The prepaid segment was also impacted by the lower

volume of recharges in the period (-11.5% y-o-y), mainly reflecting current macroeconomic conditions. Nevertheless, recharges already show signs of quarter-on-quarter recovery (-3.6% q-o-q in 2Q16 versus -5.1% q-o-q in 1Q16).

Interconnection revenue contracted 14.3% y-o-y in 2Q16, mainly due to the MTR tariff reduction in February 2016 (-33.8%). With the normalization of this

effect, interconnection revenue grew by 16.4% in 2Q16 over 2Q15, also impacted by the higher incoming traffic, off-net effect in the period.

Data and VAS revenue increased 24.0% y-o-y and continues to be the main source of the Company's revenue growth, due to the strategy focused on data and to the voice-to-data convergence. The factors contributing to this growth were the upselling of data bundles, both in postpaid and prepaid offers, and the higher penetration of smartphones and webphones in our customer base. In 2Q16, data and VAS revenue increased to 55.7% of net mobile service revenue, up by 9.6 p.p. y-o-y.

SMS revenue declined by 4.1% over 2Q15, due to the reduction of SMS in the corporate segment.

Mobile internet revenue moved up by 37.9% y-o-y, also accelerating over the previous quarter, and accounted for 73.6% of data revenue in 2Q16. This performance is directly linked to the growth in postpaid data accesses, especially in 4G plans, the increased sale of stand-alone data packages and the growth of the smartphone customer base. By the end of 2Q16, 76.4% of our customer base already had smartphones or webphones, equivalent to a 4.6 p.p. increase over 2Q15.

VAS revenue moved down by 2.4% in 2Q16 over 2Q15, due to the lower use of VAS, particularly by prepaid customers that prioritize data services usage. Nevertheless, the sale of premium VAS in own stores, such as Vivo Música and Nuvem do Jornaleiro, and services of educational platforms, such as Kantoo, and safety platforms, such as Vivo Sync and Vivo Segurança online, recorded positive performance, with the continuous interest of our customers for these products.

Other services revenue totaled R\$103.5 million, 42.7% up on 2Q15, due to the growth of digital services revenue such as e-health, financial products and security, among others.

Mobile handset revenue fell 19.2% y-o-y, due to the Company's more selective strategy aimed at adding value, focusing on the sale of handsets only as leverage for higher-value customers.

- The **fixed access base** totaled 23,754 thousand accesses in 2Q16, 1.5% down on 2Q15, mainly influenced by the performance of voice and Pay TV accesses.
- **Fixed voice accesses** totaled 14,744 thousand in 2Q16, 3.3% down y-o-y, mainly reflecting the smaller number of residential connections. Voice ARPU moved down by 0.1% y-o-y, due to the negative impact of VC reductions and to the fixed-to-mobile substitution.
- **Fixed broadband accesses** registered 7.2 million customers in 2Q16, 2.4% up on 2Q15. The FTTx customer base reached 4,007 thousand accesses, 676 thousand of which in FTTH technology. The penetration of the UBB customer base reached 55.3% of total broadband accesses, 10.0% higher than in 2Q15, fueling the ARPU, which increased by 7.4% y-o-y in 2Q16.
- **Pay TV accesses** declined by 1.3% y-o-y, closing the second quarter with 1,762 thousand subscribers. Vivo's market share came to 9.4% in May, 0.3 p.p. up on 2Q15. Note: Fixed Net Revenue includes revenue from the FWT solution (“Vivo Fixo”). Broadband revenue includes residential clients and SME.

Net revenue from the fixed business remained virtually stable in 2Q16 (+0.1% y-o-y), impacted by reductions in fixed to mobile tariff (VC) and fixed interconnection tariff (TU-RL and TU-RIU), both in February 2016, offset by the increase in broadband and Pay TV revenue. Excluding the negative effect from tariff reductions, the variation in net fixed service revenue was 2.8%.

Voice revenue reduced 2.7% in 2Q16 over 2Q15. Excluding VC reductions (-20.6%), voice revenue increased by 3.1% y-o-y.

Interconnection revenue fell 56.8% over 2Q15, due to the reduction in TU-RL (-65.9%) and TU-RIU (-21.3%) in February 2016. Excluding this effect, interconnection revenue rose 32.6%.

Broadband revenue climbed 10.6% y-o-y, fueled by the growth in ultra-broadband revenue, which already accounts for around 60% of broadband revenue and increased by 21.1% y-o-y. The Company maintained its efforts to grow the customer base and to the migration of customers to higher speeds, mainly in FTTx, expanding the fiber customer base, which has higher ARPU and lower churn.

Corporate data and IT revenue fell 1.8% y-o-y, influenced by the economic downturn and the strong competition in this market.

Pay TV revenue expanded 13.9% in 2Q16 over 2Q15, chiefly due to the growth of the IPTV subscriber base, which accounted for 41.7% of Pay TV revenue expansion.

Other services revenue reduced 5.9% y-o-y, mainly influenced by the lower sale of equipment to large clients.

The Company's operating costs excluding depreciation and amortization expenses totaled R\$7,309.7 million in 2Q16, 0.4% down on 2Q15. Excluding the effect from the provision for corporate restructuring made in the quarter, totaling R\$101.2 million, costs came to R\$7,208.5 million, down by 1.8% y-o-y, in a period when inflation measured by the IPCA index was 8.8%. Recurring operating costs remained virtually stable over the previous quarter, already excluding the effect of the sale of towers in 1Q16.

The Company's operating costs excluding depreciation and amortization expenses totaled R\$7,309.7 million in 2Q16

Personnel costs rose 17.5% y-o-y, particularly influenced by the provision for the corporate restructuring, which resulted in non-recurring costs of R\$101.2 million. Excluding this effect, personnel costs increased 5.8%, continuing to post growth lower than the inflation recorded in the period.

The **cost of services rendered** reduced 2.1% in 2Q16 over 2Q15, positively influenced by MTR and TU-RL/TU-RIU reductions in February 2016. Excluding this effect, the y-o-y increase was 3.2%. This variation reflects mainly the

higher expenses with network maintenance and conservation services, due to the expansion in 4G coverage and the constant improvement in service quality, as well as higher expenses with site leasing. When compared to the 1Q16, expenses with the purchase of TV content fell 11.9%, mainly due to the synergies related to the renegotiation of certain agreements with content providers in the second quarter and more selective sales on this product.

Cost of goods sold (COGS) reduced by 15.9% in 2Q16 over 2Q15, reflecting the Company's focus on higher-value clients and profitability.

Selling expenses fell 3.6% y-o-y in the second quarter, due to the Company's commercial rationality and the capture of synergies, reversing the negative impact of the macroeconomic environment.

Provisions for bad debt closed 2Q16 at R\$317.0 million (+5.7% y-o-y), with delinquency levels at 3.0% of net operating revenue, almost stable on 2Q15, despite the macroeconomic deterioration. The Company continued to adopt strict credit granting criteria, improving the identification of clients' risk profile and adopting more effective collection measures. In comparison with the previous quarter, provisions for bad debt reduced 8.0%, essentially due to the seasonality effect inherent to the first quarter.

Third-party services posted a y-o-y reduction of 5.2% in 2Q16, influenced by lower costs with commissions and sales promoters in retail stores, due to the more selective commercial strategy, and lower expenses with publicity and marketing thanks to the synergy generated with the unification of the brands as of April 2016, which enabled the elimination of communication overlaps, a reduction in publicity agencies and the renegotiation of placement contracts.

Second-quarter **general and administrative expenses** increased by 13.8% y-o-y, chiefly due to higher electricity expenses, in addition to the recovery of taxes in 2Q15, influencing the comparison basis.

The other net operating revenues (expenses) line was an expense of R\$158.2 million in 2Q16, 12.4% up on 2Q15.

Ebitda

Second-quarter **EBITDA**(earnings before interest, taxes, depreciation and amortization) totaled R\$3,200.3 million. **Recurring EBITDA**, excluding expenses related to the R\$101.2 million provision for the corporate restructuring, amounted to R\$3,301.5 million, 7.0% up on 2Q15, mainly due to the cost efficiency measures adopted by the Company and the capture of synergies from the acquisition of GVT.

The **recurring EBITDA margin** stood at 31.4% in 2Q16, 1.8 p.p. up on 2Q15. **The EBITDA margin** came to 30.5% in 2Q16, 0.9 p.p. higher than the 2Q15 figure, reflecting the Company's focus on profitability and generation of value for shareholders.

Net financial expenses increased by R\$184.8 million in 2Q16 over 2Q15, mainly influenced by the higher financial revenue in 2Q15 due to the increased average cash invested in the period comprised between the capital increase held in May 2015 for the acquisition of GVT and the effective payment.

In 1H16, the net financial expenses reduced by 4.2% (R\$ 27.0 million) over 2Q15 mainly due to the losses related to the foreign exchange variation on GVT's loans and financing denominated in foreign currency (Euro) in 2015, which the result was negatively impacted by the appreciation of Euro against the Real, partially compensated by the higher financial revenue recorded in the 1H15, as mentioned above.

Net Income

Net income totaled R\$699.5 million in 2Q16, 23.2% down on 2Q15. Excluding the non-recurring impact from the provision for corporate restructuring, second-quarter net income amounted to R\$766.3 million, down by 15.9%, mainly due to the higher financial income recorded in the 2Q15 related to the resources from the capital increase for GVT's acquisition, despite the improved operating result in the 2Q16.

In the first six months of 2016, net income amounted to R\$1,917.7 million, 42.3% up on 1H15. Excluding the non-recurring net effects from the sale of towers in 1Q16 (R\$338.9 million) and the provision for corporate restructuring in 2Q16 (R\$66.8 million), 1H16 net income totaled R\$1,645.6 million, 22.1% more than in 1H15.

Second-quarter **capex** amounted to R\$1,770.6 million, accounting for 16.8% of net operating revenue, lower than in the 2Q15 due to the major efficiency in capital allocation focused on value, besides efficiency initiatives and synergies. In the second quarter, the Company continued to allocate its investments mainly to expand the network capacity in big centers to meet the stronger demand and guarantee service quality excellence and expand the infrastructure of transmission. In the second semester 2016, the investments will be focused to expand 4G coverage and increase the penetration of FTTx.

Free cash flow after extraordinary increased by 59.1% (R\$724.8 million), mainly due to the receipt of the proceeds from the sale of towers, besides the effects mentioned above.

In comparison with the previous quarter, free cash flow from business activities rose by R\$1,263.0 million, chiefly influenced by the seasonality effect and the Fistel payment in March.

Additional Notes

The Extraordinary Shareholders' Meeting of May 28, 2015 approved the acquisition of all the shares issued by GVTPart and 675,571 shares issued by GVT, as well as the merger of GVTPart's shares into the Company. As a result, the Company became the sole shareholder of GVTPart and the indirect controlling company of GVT, Pop Internet Ltda ("POP") and Innoweb Ltda ("Innoweb").

After the conclusion of the steps mentioned above, the Company's Board of Directors' Meeting of September 22, 2015 examined the corporate restructuring proposal involving the Company, its wholly-owned subsidiary (GVTPart) and its indirect subsidiaries (GVT and POP) so that at the end of the process, the services rendered by GVT that are not considered telecommunications services would be concentrated in POP and the telecommunications services would be concentrated in the Company.

On November 5, 2015, ANATEL granted its preliminary approval for the implementation of the corporate restructuring and at the Extraordinary Shareholders' Meeting of April 1, 2016, the shareholders approved said transaction, therefore concluding the corporate restructuring with the incorporation of GVT Part. During the GVT's acquisition process, the Company presented its estimates for the possible synergies that would be taken with the combination of the operations and structures of Telefônica and GVT. Since the start of the integration, we have reached important indicators and completed a number of initiatives to ensure the total capture of the initiatives announced in the long-term, as brand unification with a single fixed portfolio and integrated sales channels, organizational restructuring, renegotiation of contracts, costs reduction and investments related to networks and tax synergies.

These initiatives ensured a NPV of R\$12.2 billion, equivalent to 55 % of the best case scenario and a cash generation of R\$ 557 million until June.

SYNERGIES

| | | |
|--------------------------|---------|---------|
| Revenue | 149.2 | 32.0 |
| Opex | (127.5) | (68.1) |
| EBITDA | 276.7 | 100.1 |
| Capex | 16.4 | (99.3) |
| Capex and Opex avoidance | 263.5 | (635.3) |
| Direct Cash Flow* | 556.6 | (634.6) |
| Cash Flow | | 32 |

* Net of impact from upfront integration costs.

The solid execution of the integration processes and the better than expected results allowed us to identify additional opportunities with a trending NPV of R\$25 billion, 13% above the best case scenario. Initiatives such as the organizational restructuring announced in 2Q16 and the renegotiation contracts of technical services with results above expectation are part of the additional value identified.
