Total accesses increased 0.7% over 2015, totaling 73,778 thousand accounting for 45.3% of mobile accesses, up by 2.9 p.p. in the annual accesses. The postpaid segment continues to be worthy of mention, with y-o-y expansion of 7.5%, totaling 33,391 thousand accesses and accounting for 45.3% of mobile accesses, up by 2.9 p.p. in the annual comparison. The human¹ postpaid base reached 26,123 thousand clients, 9.5% up y-o-y.

Total market share came to 30.2% (+1.8 p.p. y-o-y). Telefônica Brasil achieved 38.0% of 2016 net **postpaid** additions, with a market share of 42.1% (-0.3 p.p. y-o-y). The Company also has a relevant market share in 4G-technology terminals (35.7% in December 2016), reflecting the quality of the customer base and the Company's strategy focused on data.

In the fourth quarter, **net mobile additions** came to 283 thousand accesses, with net postpaid additions totaling 891 thousand accesses (+39.5% y-o-y) and net prepaid disconnections amounting to 608

¹ Excludes dongles and M2M.

thousand accesses, accompanied by a significant migration of prepaid clients to control plans.

- The **prepaid customer base** contracted by 4.3% in 4Q16 over 4Q15, due to the migration of prepaid clients to control plans and the continuous adoption of a restrictive policy for disconnecting inactive clients within the criteria established by ANATEL, underlying the Company's focus on rationality and profitability.
- The access base continued to expand in the **machine-to-machine (M2M)** market, reaching 5.0 million customers in December 2016, 18.2% up on the previous year.
- **Total ARPU** moved up by 10.8% in 4Q16 over 4Q15, fueled by the performance of **data ARPU**, up by 31.8%. Excluding MTR reductions, total ARPU posted y-o-y growth of 13.1%.

Note: As of 3Q16, for a better understanding of the business and to better reflect the results of our digital initiatives, digital services and VAS revenues were booked under the same line. With this in mind and for comparison purposes, historical figures were reclassified. The complete history of 2015 and 2016 data can be found on our website (www.telefonica.com.br/ir).

Net mobile revenue rose 2.6% in 4Q16 over 4Q15, thanks to the higher mobile services revenue, 3.9% up y-o-y, influenced by higher data and digital services revenue, partially offset by lower revenue from the sale of handsets (-20.7% y-o-y) and voice, the latter affected by the effect from MRT reductions in February 2016. Excluding the regulatory effect, fourth-quarter mobile services revenue increased by 6.2% over 4Q15.

Outgoing voice revenue reduced 15.7% over 4Q15, mainly reflecting the market's voice-to-data convergence trend. The prepaid segment was also influenced by the y-o-y lower volume of recharges (-3.6% y-o-y in 4Q16) due to macroeconomic conditions, but it is already showing signs of recovery over the previous quarter (+5.6% q-o-q).

Interconnection revenue contracted by 17.0% over 4Q15, mainly due to the MTR tariff reduction in February 2016 (-33.8%). With the normalization of this effect, interconnection revenue increased 16.0% in 4Q16 over 4Q15, thanks to the higher incoming traffic.

Data and digital services revenue rose 23.7% y-o-y and continued to be the main source of the Company's revenue growth, reflecting our strategy focused on data. This performance was influenced by the upselling of data bundles, particularly in postpaid offers, which are encouraged by the possibility of managing data consumption of additional lines under the same membership, and the higher penetration of smartphones in our customer base. In 4Q16, data and digital services revenue increased to 62.3% of net mobile services revenue, up by 10.0 p.p. y-o-y.

SMS revenue fell 17.8% y-o-y, due to the reduction in promotional SMS volume.

In 4Q16, **mobile internet** revenue moved up by 40.7% over 4Q15 and 12.6% over 3Q16, accounting for 76.5% of 4Q16 data revenue. This performance is directly linked to the growth in postpaid data accesses, especially in 4G plans, the increased sale of stand-alone data packages and the growth of the smartphone customer base. At the close of 4Q16, 79% of our customer base already had smartphones or webphones, 4.1 p.p. more than in 4Q15.

Digital services revenue reduced by 6.5% in 4Q16 over 4Q15, due to the simplification of the portfolio, a greater focus on qualified sales and the macroeconomic conditions which discourage the consumption of non-essential services. In 2016 over 2015, digital mobile services revenue was practically stable, but would have grown 5.2% when including revenue from traditional value-added services, currently booked under the voice and SMS lines. The Company has apps and services in the security, financial, video and music entertainment, and education segments which are of continuous interest for the customer base and add value to our customers. In addition, the Vivo Ads platform reflects the Company's strategy to encourage innovation with different types of monetization.

Other services revenue totaled R\$2.7 million, 96.2% down on 4Q15, influenced by the recovery of taxes on disputed invoices in 4Q15.

Mobile handset revenue reduced by 20.7% in 4Q16 over 4Q15, chiefly due to the Company's commercial strategy focused on higher-value customers, particularly in the corporate segment.

- The **fixed base** totaled 23,352 thousand accesses in 4Q16, 2.4% down on 4Q15, mainly influenced by the performance of voice and Pay TV accesses.
- **Fixed voice accesses** totaled 14,343 thousand in 4Q16, 4.6% down on 4Q15, mainly reflecting the fixed-to-mobile convergence and the voice-to- data substitution. Voice ARPU moved down by 2.7% y-o-y, fueled by the negative impact of VC reductions.
- **Fixed broadband accesses** registered 7.3 million customers in 4Q16, 2.5% more than in 4Q15. The FTTx customer base grew 9.3% in 4Q16 over 4Q15, reaching 4,133 thousand accesses, 735 thousand of which in the FTTH technology, 25.3% more than in the previous year. FTTx customers accounted for 56.7% of total broadband accesses, corresponding to a 9.3% growth over 4Q15, fueling the ARPU, which increased by 7.5% y-o-y in 4Q16.
- **Pay TV accesses** contracted 4.2% y-o-y, closing the fourth quarter with 1,713 thousand subscribers and a market share of 9.1% in December. IPTV accesses grew 47.9% in 4Q16 over 4Q15, while TV ARPU increased 9.4%, reflecting the Company's strategy of focusing on higher-value clients.

Note: Net Fixed Revenue includes revenue from the FWT solution ("Vivo Fixo"). Broadband revenue includes residential clients and SMEs.

Net revenue from the fixed business fell 1.2% in 4Q16 over 4Q15, impacted by fixed-to-mobile tariff (VC) and fixed interconnection tariff (TU-RL and TU-RIU) reductions in February 2016, partially offset by the increase in broadband, corporate data and IT, and Pay TV revenue. Excluding the negative effect from tariff reductions, net fixed services revenue would have grown 1.4%.

Voice revenue fell 6.7% in 4Q16 over 4Q15, chiefly due to the lower B2B traffic and service maturity. Excluding VC reductions (-20.6%), voice revenue fell 3.7% y-o-y.

Interconnection revenue moved down by 48.5% over 4Q15, due to the reduction in TU-RL (-65.9%) and TU-RIU (-21.3%) in February 2016. Excluding this effect, interconnection revenue declined by 6.6%, due to the lower incoming traffic.

Broadband revenue moved up by 9.6% y-o-y, fueled by higher ultra-broadband revenue, which accounted for approximately 60.3% of this line in the period and increased by 17.5% over the previous year, reflecting the Company's efforts to expand the base in FTTx and clients' migration to higher speeds, with ARPU increase.

Corporate data and IT revenue increased 3.1% y-o-y, due to the higher revenue from wholesale and corporate agreements.

Pay TV revenue grew 4.6% in 4Q16 over 4Q15. The Company continued with its selective strategy for this service, focusing on higher-value products, such as IPTV, in order to improve customer experience and boost the profitability of the subscriber base.

Other services revenue moved up by 6.8% y-o-y in 4Q16, mainly influenced by the sale of equipment to corporate clients.

The Company's operating costs excluding depreciation and amortization expenses totaled R\$7,250.3 million in 4Q16, 1.1% down on 4Q15. Excluding the non-recurring effect from the corporate restructuring in 4Q16, costs fell 1.8% over the previous year, in a period when inflation was 6.3% (IPCA). In 4Q16 over 3Q16, recurring operating costs reduced 1.2%.

Personnel costs rose 8.6% over last year, chiefly due to non-recurring costs of R\$49.1 million related to the organizational restructuring in 4Q16. Excluding the non-recurring effect, personnel costs climbed by only 3.2%, significantly below the period's inflation. This variation can be explained mainly by the continuous adoption of the policy of insourcing field services and call center employees, focusing on improving customer experience, and the collective bargaining agreement with base date in September 2016.

The **cost of services rendered** fell 6.8% in 4Q16 over 4Q15, positively influenced by MTR and TU-RL/TU-RIU reductions in February 2016. Excluding this effect, this line contracted by 0.9% y-o-y, mainly reflecting the renegotiation of the TV content agreement, lower electricity expenses and the insourcing of field employees, partially offset by higher expenses with network expansion.

Cost of goods sold (COGS) reduced 20.1% in 4Q16 over 4Q15, reflecting the Company's focus on higher-value clients and profitability.

Services selling expenses moved up by 1.2% y-o-y in the fourth quarter, due to the Company's commercial rationality and the capture of synergies.

Provisions for bad debt closed 4Q16 at R\$344.2 million, remaining virtually stable over 3Q16 (+0.5%), but increasing by 26.5% over 4Q15, chiefly due to the greater recovery with collection initiatives in the same quarter of 2015. The Company continued adopting effective collection initiatives and strict credit granting criteria, in the constant pursuit of greater efficiency in identifying clients' risk profile. In the fourth quarter, default accounted for 3.2% of net operating revenue, remaining flat over 3Q16 and increasing by 0.6 p.p. over 4Q15.

Third-party services contracted by 1.6% in 4Q16 over 4Q15, influenced by lower costs with commissions and sales promoters in retail stores as of 2Q16 and lower expenses with publicity and marketing thanks to the synergy generated with the unification of the brands in April 2016, eliminating communication redundancies. In addition, costs with call center services reduced thanks to digitalization, simplification of offers and improved customer experience.

General and administrative expenses grew 23.6% in 4Q16 over 4Q15, mainly due to synergies enablement and transformation costs, mainly related to the commercial efficiency and real estate optimization.

Other net operating revenues (expenses) totaled an expense of R\$162.2 million in 4Q16, 75.2% up on 4Q15, mainly as a result of higher taxes on the circulation of goods between states.

EBITDA

EBITDA (earnings before interest, taxes, depreciation and amortization) totaled R\$3,623.3 million in 4Q16, 5.6% up on 4Q15. Excluding expenses related to the corporate restructuring in 4Q16, this line grew 7.1% y-o-y, mainly due to the cost efficiency measures adopted by the Company and the capture of synergies from the acquisition of GVT.

The **EBITDA margin** reached 33.3%, with a y-o-y increase of 1.4 p.p. in 4Q16. The fourth-quarter **recurring EBITDA margin** came to 33.8%, corresponding to a y-o-y increase of 1.9 p.p.

In 2016, EBITDA amounted to R\$14,022.4 million, 10.3% up on 2015, impacted by non-recurring events throughout the year. Excluding this effect, recurring EBITDA totaled R\$13,662.6 million in 2016, accompanied by a **recurring EBITDA margin** of 32.1%.

The **depreciation and amortization** line contracted by 5.2% in 4Q16 over 4Q15, chiefly influenced by the reevaluation of the useful life of fixed assets, which were booked prospectively in November 2016 from the beginning of January 2016, reducing depreciation expenses by R\$157 million in 4Q16. In 2016, depreciation and amortization grew 4.6%, mainly influenced by the increase in fixed assets.

In 4Q16 over 4Q15, **net financial expenses** increased by R\$115 million, or 57.4%, particularly fueled by the higher expense with the monetary update of contingencies.

In 2016 over 2015, net financial expenses grew 11.3% (R\$125.8 million), particularly due to the higher expense with the monetary update of contingencies, partially offset by higher financial losses in 2015 related to the foreign exchange variation on GVT's loans and financing denominated in foreign currency, whose result was negatively impacted by the appreciation of the Euro against the Real.

Net Income

Net income totaled R\$1,214.8 million in 4Q16, 9.0% up on 4Q15, mainly due to the improved operating result recorded in 4Q16 and the lower depreciation because of the

reevaluation of the useful life of fixed assets.

In 2016, net income amounted to R\$4,085.2 million, 22.6% up on 2015, chiefly due to the increased EBITDA and the non-recurring effect from the sale of towers in 1Q16.

On January 31, 2017, the Company paid the 2nd and 3rd installments related to the auction of the national 700 MHz frequency bands for the rendering of SMP services (Personal Mobile Service), held by ANATEL on September 30, 2014, totaling R\$859.0 million. This amount already had been included in Company's capex in 2014.

This installment refers to the Company's share of responsibility under the agreement signed with ANATEL, whereby the operators winning this auction set up EAD, the company responsible for the isonomic operation of all TV channel and RTV redistribution procedures and for solving problems arising from interference in radio communication systems, in addition to other operations involving obligations of the operators winning the auction, as provided for in the agreement.

At the meeting held on January 26, 2017, the Company's Board of Directors approved the Company's 5th issue of simple, non-convertible, unsecured debentures, in a single series totaling R\$2.0 billion, which will be object of public distribution with restricted distribution efforts, under a firm commitment regimen, pursuant to CVM Instruction 476, of January 16, 2009, as amended ("Restricted Offering" and "CVM Instruction 476", respectively).

The Restricted Offering is exclusively for professional investors, and it is automatically exempt from registration for public distribution, pursuant to CVM Instruction 476.

The Company will issue 200,000 debentures, with nominal unit value of R\$10,000.00 on February 8, 2017 ("issue date"). The debentures will mature in 5 years as of the issue date, that is, on February 8, 2022. The nominal unit value of each debenture will not be monetarily restated.

The outstanding balance of the nominal unit value of each debenture will bear interest of 108.25% of the accumulated variation of the average daily rate of interbank one-day deposits ("DI"), "over extra-group", expressed as an annual percentage, based on a year of 252 business days, calculated and disclosed daily by the CETIP.

The net proceeds obtained by the Company with the issue will be fully allocated to the restructuring of the Company's financial liabilities to meet the capital needs in the normal course of its business.
