Consumers Plant Restarts

On Sunday, January 9, 2005, Nuclear Management Company, LLC ("NMC"), the operator of the Palisades nuclear plant owned by Consumers, manually took the plant offline after recording a rapid reduction in the vacuum of the main condenser, the component that condenses steam from the turbine generators into water. The cause of the reduction in the vacuum was the result of air in leakage into the main condenser. NMC maintained the plant in hot shutdown condition and identified the specific source of the vacuum reduction. The repairs were completed and the plant was returned to service on January 19, 2005.

On Tuesday, January 11, 2005, Consumers took the J H Campbell Plant Unit 3 offline in order to repair a tube leak in the super heater portion of the Unit 3 boiler. The source of the tube leak was identified. The repair was routine and the plant was returned to service on January 16, 2005.
