Under the laws of the countries of the companies' incorporation and / or vessels' registration, the companies are not subject to tax on international shipping income; however, they are subject to registration and tonnage taxes, which are included in Vessel operating expenses in the accompanying consolidated statements of income.

The vessel owning companies with vessels that have called on the United States during the relevant year of operation are obliged to file tax returns, with the Internal Revenue Service. The applicable Tax is 50% of 4% of United States related gross transportation income unless an exemption applies. Management believes that based on current legislation the relevant vessel owning companies are entitled to an exemption as they satisfy the relevant requirements because (i) the related vessel owning companies are incorporated in a jurisdiction granting an

equivalent exemption to US corporations and (ii) over 50% of the ultimate shareholders of the vessel owning companies are residents of a country granting an equivalent exemption to US persons.

15. Derivatives:

(a) ***Interest rate swaps that meet the criteria for hedge accounting:*** The Company, according to its long-term strategic plan to maintain stability in its interest rate exposure, has decided to minimize exposure to floating interest rates by entering into interest rate swap agreements. To this effect, the Company has entered into interest rate swap transactions with varying start and maturity dates, in order to proactively and efficiently manage its floating rate exposure.

These interest rate swaps are designed to hedge the variability of interest cash flows arising from floating rate debt, attributable to movements in three-month or six-month USD LIBOR. According to the Company's Risk Management Accounting Policy, after putting in place the formal documentation required by ASC 815 in order to designate these swaps as hedging instruments, as from their inception, these interest rate swaps qualified for hedge accounting. Accordingly, since that time, only hedge ineffectiveness amounts arising from the differences in the change in fair value of the hedging instrument and the hedged item are recognized in the Company's earnings. Assessment and measurement of prospective and retrospective effectiveness for these interest rate swaps are being performed on a quarterly basis. For qualifying cash flow hedges, the fair value gain or loss associated with the effective portion of the cash flow hedge is recognized initially in stockholders' equity and recognized to the statement of income in the periods when the hedged item affects profit or loss. Any ineffective portion of the gain or loss on the hedging instrument is recognized in the statement of income immediately.

Notional amount \$85,000 amortizing zero-cost collar (2.23% - 6.00%) with knock-in floor sold at 2.23% and struck at 6.00%, as a 10 year forward hedge, covering the period from February 2007 to February 2017. The agreement guarantees that the interest rate payable on the Company's loans throughout the 10-year period will always remain between 2.23% and 6.00% excluding margin.

The interest rate swaps included in the table above are for the Credit Facility discussed in Note 9 and the term loans discussed in Note 9.2.1, 9.2.2, 9.2.3, 9.2.5, 9.2.6, 9.2.10, 9.2.11 and 9.2.12.

(b) **Interest rate swaps that do not meet the criteria for hedge accounting** As of both March 31, 2012 and December 31, 2011, the Company had outstanding one interest rate swap agreement for the purpose of managing risks associated with the variability of changing LIBOR-related interest rates. Such agreement did not meet hedge accounting criteria and therefore changes in their fair value are reflected in earnings. More specifically, the swap has a Notional amount \$100,000 non-amortizing zero-cost collar (1.37% - 6.00%) with a knock-in floor sold at

1.37% and struck at 6.00%, as a nine-year forward hedge, covering the period from September 2008 to March 2017. At December 31, 2011 and March 31, 2012, the fair value of this swap was a liability of \$20,254 and \$18,438, respectively and is included in Fair value of derivative in the accompanying consolidated balance sheets.

In the three-month periods ended March 31, 2011 and 2012, the realized ineffectiveness of the interest rate swaps discussed under (a) and (b) above was \$nil.

16. Financial Instruments:

(a) **Interest rate risk:** The Company's interest rates and loan repayment terms are described in Note 9.

(b) **Concentration of credit risk:** Financial Instruments consist principally of cash, trade accounts receivable, investments and derivatives. The Company places its temporary cash investments, consisting mostly of deposits, primarily with high credit rated financial institutions. The Company performs periodic evaluations of the relative credit standing of those financial institutions that are considered in the Company's investment strategy. The Company limits its credit risk with accounts receivable by performing ongoing credit evaluations of its customers financial condition and generally does not require collateral for its accounts receivable and does not have any agreements to mitigate credit risk. The Company limits the exposure of non-performance by counterparties to derivative instruments by diversifying among counterparties with high credit ratings and performing periodic evaluations of the relative credit standing of the counterparties.

(c) **Fair value:** The carrying amounts reflected in the accompanying Consolidated Balance Sheet of financial assets and accounts payable approximate their respective fair values due to the short maturity of these instruments. The fair value of long-term bank loans with variable interest rates approximate the recorded values, generally due to their variable interest rates. The fair value of the investments discussed in Note 4, determined through Level 1 of the fair value hierarchy, equates to the amounts that would be received by the Company in the event of sale of these investments. The fair value of the interest rate swap agreements discussed in Note 15 above are determined through Level 2 of the fair value hierarchy as defined in FASB guidance for Fair Value Measurements and are derived principally from or corroborated by observable market data, interest rates, yield curves and other items that allow value to be determined.

The fair value of the interest rate swap agreements discussed in Note 15(a) and (b) equates to the amount that would be paid by the Company to cancel the agreements. As at December 31, 2011 and March 31, 2012, the fair value of these interest rate swaps in aggregate amounted to a liability of \$170,691 and \$160,271, respectively.

The fair market value of the forward contracts discussed in Note 15(c) determined through Level 2 of the fair value hierarchy as at December 31, 2011 amounted to a liability of \$984 and as at March 31, 2012 amounted to an asset of \$230.

The following tables summarize the hierarchy for determining and disclosing the fair value of assets and liabilities by valuation technique on a recurring basis as of the valuation date.
