2.4 Review of operating results

In the first three quarters of 2009, faced with the negative effect of the international financial crisis on the world economy, the Chinese government implemented a stimulus package scheme, a proactive financial policy and a moderately loosed monetary policy that are designed to enable Chinese economy to maintain a satisfactory growth and achieving a GDP increase of 7.7%. The international crude oil prices skyrocketed and then moved in a narrow range. Domestically, the refined oil product price and tax reform programme has been carried out in order to improve the operational environment of refinery. The domestic demand for oil products has stopped falling and begun to rebound, the demand for chemical products has bounced back. The Company put great efforts in developing the market, enlarging production capacity, enhancing integration of production, sales and research, and the output of crude oil and gas and refinery throughput increased steadily.

Exploration & Production Segment: Strengthen refined exploration to improve development quality; intensify the integrated exploration-development management of key regions to enhance the potentials of existing oilfields; in the development of natural gas, proactively prepare for commissioning the Sichuan-to-East China Gas Project, which has been completed basically. In the first three quarters, the output of crude oil and natural gas of the Company increased by 1.28% and 0.20%, respectively, compared with the same period of last year.

Refining Segment: Carefully arrange the safe and high-load operations of oil refining and optimize the procurement and allocation of crude oil resources. Adjust product mix by increasing the output of products with highly added value to support the smooth progress of oil-refining device transformation project for nationwide implementation of the state-standard (III) gasoline and implementation of the state-standard (IV) gasoline in certain areas. In the first three quarters, the processing volume of crude oil increased by 2.99% and the output of oil product increased by 3.36%, compared with the same period of last year, and light products yield was further increased.

Marketing and Distribution Segment: Optimize the operating structure, expand terminal sales, strengthen the sales of gasoline and jet fuels, enlarge the scale of non-oil business and step up the cooperation with key customers. Expand the business of lube oil and fuel oil. Accelerate the construction of new gas stations. In the first three quarters, our domestic distribution and retail amount of oil products dropped by 5.53% and 9.32%, respectively, compared to the same period of last year. However, the data of the second quarter and the third quarter showed a quarter-on-quarter increase of 18.35% and 1.85%, respectively.

Chemicals Segment: Strongly expand the market of chemical products, reinforce the integration of production, sales and research, intensify customer service awareness, boost the development and application of new chemical products and increase the output of chemical products. In the first three quarters, the output of ethylene was 4.741 million tons, decreased by 2.25% and the output of synthetic resin was 7.408 million tons, increased by 1.05%, compared with the same period of last year.

3.2 Significant events and their impacts as well as the analysis and explanations for the solutions

Applicable Inapplicable

On the Acquisition of All the Assets of 6 Research Institutes and All the Equity Interests of 5 Companies under Sinopec Asset Management Company

On August 21, 2009, Sinopec Corp. held the second meeting of its 4th Session of the Board of Directors, where the attendees reviewed and approved the Proposal Concerning the Acquisition of Certain Assets and Equity Interests of Sinopec Assets Management Company. Under the proposal, Sinopec Corp. acquired all the assets of 6 subsidiaries of Sinopec Asset Management Company, including RIPED, RIPP, BCRI and three other research institutes in Shanghai, Fushun and Qingdao, and 100% equity interests of 5 wholly-owned subsidiaries, including Xingpu Company, BCRI Design Institute, Sinosun Certification Center, Fushun Huanke Company and Materials Equipment Company. The acquisition consideration amounts to RMB 3,945.81 million, including RMB 3,110.16 million for all the assets of the 6 research institutes and RMB 835.65 million for 100% equity interests in the 5 limited-liability companies. For more information, please read the connected transaction announcements released in China Securities Journal, ShangHai Securities News and Securities Times dated August 24.

3.3 Status of commitment issue fulfillment by the Company, shareholder and actual controller.

Applicable Inapplicable

3.4 Caution and explanation as to the anticipated loss of accumulated net profits from the beginning of the year to the end of the next reporting period or significant changes over the same period of last year.

Applicable Inapplicable

In 2008, the international crude oil price went up by a large margin and tight control was imposed on the domestic price of oil products. The oil product price was even lower than the crude oil price. The Company took all measures to ensure the supply of oil product to the market by purchasing resources from a wide range of sources and importing of oil products in time, and further optimizing the transportation of oil products. The measures caused a heavy loss to the Company's refining business and a significant decline in overall results.

Since the beginning of 2009, China launched the reform of refined oil product prices and taxes. The domestic oil refining business has gradually taken a turn for the better, making it possible to give a play to the advantages of the Company's oil refining business in scale, cost, integration and management. The market demand for chemical products also shows an upturn. The Company expects a year-on-year increase of more than 50% in the 2009 annual results.

3.5 Implementation of Cash Dividend in the Reporting Period
