16. Restructuring

During the three months ended December 31, 2014, Hillenbrand incurred \$1.9 of restructuring costs (\$0.3 expense at the Process Equipment Group classified as operating expenses, \$1.2 expense at Batesville classified as cost of goods sold, and \$0.4 expense at Corporate classified as operating expenses). These costs related primarily to severance costs at the Process Equipment Group as we continue to integrate and streamline the business operations within the segment, disposal of equipment at Batesville, and corporate charges related to the realignment of the Company's executive management team. At December 31, 2014, \$1.2 was accrued and will be paid in 2015.

Table of Contents

Item 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

FORWARD-LOOKING STATEMENTS AND FACTORS THAT MAY AFFECT FUTURE RESULTS

Throughout this Form 10-Q, we make a number of "forward-looking statements" within the meaning of the Private Securities Litigation Reform Act of 1995. As the words imply, these are statements about future plans, objectives, beliefs, and expectations that might or might not happen in the future, as contrasted with historical information. Forward-looking statements are based on assumptions that we believe are reasonable, but by their very nature are subject to a wide range of risks.

Accordingly, in this Form 10-Q, we may say something like,

"We expect that future revenue associated with the Process Equipment Group will be influenced by order backlog."

That is a forward-looking statement, as indicated by the word "expect" and by the clear meaning of the sentence.

Other words that could indicate we are making forward-looking statements include:

intend	believe	plan	expect	may	goal	would
become	pursue	estimate	will	forecast	continue	could
targeted	encourage	promise	improve	progress	potential	should

This is not an exhaustive list, but is intended to give you an idea of how we try to identify forward-looking statements. The absence of any of these words; however, does not mean that the statement is not forward-looking.

Here is the key point: Forward-looking statements are not guarantees of future performance, and our actual results could differ materially from those set forth in any forward-looking statements. Any number of factors, many of which are beyond our control, could cause our performance to differ significantly from what is described in the forward-looking statements.

For a discussion of factors that could cause actual results to differ from those contained in forward-looking statements, see the discussions under the heading "Risk Factors" in Item 1A of Part II of this Form 10-Q. We assume no obligation to update or revise any forward-looking statements.

OPERATING PERFORMANCE MEASURES

The following discussion compares our results for the three months ended December 31, 2014, to the same period in fiscal year 2014. The Company's fiscal year ends on September 30. Unless otherwise stated, references to years relate to fiscal years. We begin the discussion at a consolidated level and then provide separate detail about the Process Equipment Group, Batesville, and Corporate. These financial results are prepared in accordance with accounting principles generally accepted in the U.S. ("GAAP").

We also provide certain non-GAAP operating performance measures. These non-GAAP measures are referred to as "adjusted" and exclude expenses associated with backlog intangible amortization, inventory step-up, business acquisition and integration, restructuring, and certain litigation costs. The related income tax for all of these items is also excluded. This non-GAAP information is provided as a supplement, not as a substitute for, or as superior to, measures of financial performance prepared in accordance with GAAP.

We use this non-GAAP information internally to make operating decisions and believe it is helpful to investors because it allows more meaningful period-to-period comparisons of our ongoing operating results. The information can also be used to perform trend analysis and to better identify operating trends that may otherwise be masked or distorted by these types of items. We believe this information provides a higher degree of transparency.

An important non-GAAP measure Hillenbrand uses is adjusted earnings before interest, income tax, depreciation, and amortization (“adjusted EBITDA”). As previously discussed, a part of Hillenbrand’s strategy is to selectively acquire companies that we believe can benefit from HBS to spur faster and more profitable growth. Given that strategy, it is a natural consequence to incur related expenses, such as amortization from acquired intangible assets and additional interest expense

Table of Contents

from debt-funded acquisitions. Accordingly, we use adjusted EBITDA, among other measures, to monitor business performance.

Another important non-GAAP operational measure used is backlog. Backlog is not a term recognized under GAAP; however it is a common measurement used in the Process Equipment Group's industry. Order backlog represents the amount of consolidated revenue that we expect to realize on contracts awarded related to the Process Equipment Group. Backlog includes expected revenue from large systems, equipment, and to a lesser extent, replacement parts, components, and service. The length of time that projects remain in backlog can span from days for replacement parts and service to approximately 18 months or longer for larger system sales. Backlog includes expected revenue from the remaining portion of firm orders not yet completed, as well as revenue from change orders to the extent that it is reasonably expected to be realized. For purposes of calculating backlog, 100% of estimated revenue attributable to consolidated subsidiaries is included. A small number of these subsidiaries are not 100% owned by Hillenbrand, although the aggregate un-owned portion of these subsidiaries is immaterial to Hillenbrand as a whole.

Future revenue for the Process Equipment Group is influenced by backlog because of the lead time involved in fulfilling engineered-to-order equipment for customers. Although backlog can be an indicator of future revenue, it does not include projects and parts orders that are booked and shipped within the same quarter. The timing of order placement, size, extent of customization, and customer delivery dates can create fluctuations in backlog and revenue. Revenue attributable to backlog is also affected by foreign exchange fluctuations for orders denominated in currencies other than United States dollars.

We analyze net revenue, gross profit, and operating expenses on a constant currency basis, which is a non-GAAP measure, to better measure the comparability of results between periods. This information is provided because exchange rates can distort the underlying change in sales, either positively or negatively.

See pages 23-24 for reconciliations of our non-GAAP measures to the most directly comparable GAAP measures. There is no GAAP financial measure comparable to backlog; therefore, a quantitative reconciliation of backlog is not provided.

CRITICAL ACCOUNTING ESTIMATES

For the three months ended December 31, 2014, there were no significant changes to our critical accounting estimates, as outlined in our Annual Report on Form 10-K for 2014.

EXECUTIVE OVERVIEW

(financial amounts in millions, except share and per share data, throughout Management's Discussion and Analysis)

Hillenbrand is a global diversified industrial company that makes and sells premium business-to-business products and services for a wide variety of industries. We pursue profitable growth and meaningful dividends for our shareholders by leveraging our leading brands, robust cash generation capabilities, and Hillenbrand Business System ("HBS"). Hillenbrand has two segments: the Process Equipment Group and Batesville. The Process Equipment Group has multiple market-leading brands of process and material handling equipment and systems serving a wide variety of industries across the globe. Batesville is a recognized leader in the North American death care industry. Batesville performs several critical roles within the Company. It has a long history of providing strong annual operating cash flows. As the source of HBS practices, including Lean, Strategy Management, and Talent Development, it provides talent to embed these management practices in acquired companies.

Batesville's performance has allowed management to invest in acquisitions that provide diversification, with a focus on companies for which we perceive growth opportunities and an ability to benefit from HBS. We believe we can most effectively continue to increase shareholder value by leveraging our strong financial position and HBS to continue to build a global diversified industrial company with strong positions in multiple growth-oriented industries.

Table of Contents

OPERATIONS REVIEW — CONSOLIDATED

	Three Months Ended December 31,		2013	
	2014	% of	Amount	% of
	Amount	Net Revenue		Net Revenue
Net revenue	\$401.5	100.0	\$384.9	100.0
Gross profit	138.4	34.5	131.0	34.0
Operating expenses	91.2	22.7	94.0	24.4
Operating profit	47.2	11.8	37.0	9.6
Interest expense	5.7	1.4	6.3	1.6
Other expense, net	—	—	(0.1) —
Income taxes	11.8	2.9	9.0	2.3
Net income(1)	29.5	7.3	20.3	5.3

(1) Net income attributable to Hillenbrand.

Three Months Ended December 31, 2014 Compared to Three Months Ended December 31, 2013

Net revenue increased \$16.6 (4%) or \$31.2 (8%) on a constant currency basis.

- The Process Equipment Group's net revenue increased \$14.2 (6%) or \$27.9 (12%) on a constant currency basis primarily due to increased volume of equipment sales. Order backlog decreased \$20.4 (3%) from \$610.8 on December 31, 2013, to \$590.4 on December 31, 2014. On a constant currency basis, backlog at December 31, 2014 would have been \$636.1; therefore, the decrease in backlog is primarily attributable to adverse changes in foreign currency rates.

- Batesville's net revenue increased \$2.4 (1.7%) or \$3.3 (2.3%) on a constant currency basis primarily due to an increase in volume (\$5.4) offset by a decrease in the average selling price (\$2.1). Higher volume was driven by an increase in North American deaths, partially offset by the increased rate at which families opted for cremation.

Gross profit increased \$7.4 (6%) to \$138.4 or \$11.6 (9%) on a constant currency basis and consolidated gross profit margin increased 50 basis points to 34.5%. On an adjusted basis, which excluded items described below, the consolidated gross profit margin increased 70 basis points to 34.8%.

- The Process Equipment Group's gross profit increased \$9.1 (12%) to \$84.3 or \$13.2 (18%) on a constant currency basis. Gross profit margin increased 190 basis points to 32.9% in 2015 primarily due to cost reduction initiatives.

- Batesville's gross profit decreased 3% to \$54.1 and gross profit margin decreased 180 basis points to 37.3%. The decreased gross profit and gross profit margin was due to restructuring charges from the disposal of equipment and increased personnel and benefit costs partially offset by higher volume.

Gross profit in 2015 included a \$1.2 increase to cost of goods sold related to restructuring charges from the disposal of equipment at Batesville. Gross profit in 2014 included \$0.1 of restructuring expenses. Excluding these items, adjusted gross profit increased 8.5 (6%) and adjusted gross profit margin increased 70 basis points to 34.8%.

Operating expenses decreased \$2.8 (3%) to \$91.2 or \$0.2 on a constant currency basis, primarily due to lower business acquisition and integration costs and the impact of cost reduction initiatives in 2015 compared to 2014,

Explanation of Responses:

partially offset by an increase in restructuring charges and litigation expenses. The operating expenses to net revenue ratio decreased by 170 basis points to 22.7% in 2015. Operating expenses included the following items:

21

Table of Contents

	Three Months Ended December 31,	
	2014	2013
Business acquisition and integration costs	\$0.3	\$1.9
Restructuring charges	0.7	0.2
Litigation expenses	0.5	—

On an adjusted basis, which excluded business acquisition and integration costs, restructuring charges, and litigation expenses, operating expenses decreased \$2.2 to \$89.7. The adjusted operating expenses to net revenue ratio decreased 160 basis points in 2015 to 22.3%, largely due to increased net revenue in the Process Equipment Group and cost reduction initiatives throughout the organization.

Interest expense decreased \$0.6 primarily due to lower weighted-average outstanding borrowings in 2015 compared to 2014.

The effective tax rate was 28.4% in 2015 compared to 29.4% in 2014. The decrease in the effective tax rate was primarily due the net effect of the change in the reserve for uncertain tax positions. Our adjusted effective income tax rate was 28.5% in 2015 compared to 29.3% in 2014 and excluded the tax impact of acquisition and integration costs, restructuring charges, and certain litigation costs.

OPERATIONS REVIEW — PROCESS EQUIPMENT GROUP

	Three Months Ended December 31,			
	2014		2013	
	Amount	% of Net Revenue	Amount	% of Net Revenue
Net revenue	\$256.4	100.0	\$242.2	100.0
Gross profit	84.3	32.9	75.2	31.0
Operating expenses	57.0	22.2	60.3	24.9
Operating profit	27.3	10.6	14.9	6.2

Three Months Ended December 31, 2014 Compared to Three Months Ended December 31, 2013

Net revenue increased \$14.2 (6%) or \$27.9 (12%) on a constant currency basis primarily due to increased volume of equipment sales. Order backlog decreased \$20.4 (3%) from \$610.8 on December 31, 2013, to \$590.4 on December 31, 2014. On a constant currency basis, backlog at December 31, 2014 would have been \$636.1; therefore, the decrease in backlog is primarily attributable to adverse changes in foreign currency rates.

Gross profit increased \$9.1 (12%) to \$84.3 or \$13.2 (18%) to \$88.4 on a constant currency basis due to increased volume of equipment sales in 2015. Gross profit margin increased 190 basis points to 32.9% in 2015 primarily due to cost reduction initiatives.

Operating expenses decreased \$3.3 (5%) to \$57.0 or \$0.4 to \$59.9 on a constant currency basis and the operating expenses to net revenue ratio improved by 270 basis points to 22.2% in 2015. The decrease in operating expenses and the improved ratio are primarily due to cost reduction initiatives.

Operating expenses in 2015 included business acquisition and integration costs (\$0.1) and restructuring costs (\$0.3). Operating expenses in 2014 included business acquisition and integration costs (\$0.7), and restructuring costs (\$0.2). Excluding these items, adjusted operating expenses decreased \$2.8 to \$56.6 and the operating expenses to net revenue

ratio improved 240 basis points to 22.1% in 2015.

OPERATIONS REVIEW — BATESVILLE

	Three Months Ended December 31, 2014		2013	
	Amount	% of Net Revenue	Amount	% of Net Revenue
Net revenue	\$145.1	100.0	\$142.7	100.0
Gross profit	54.1	37.3	55.8	39.1
Operating expenses	25.7	17.7	24.6	17.2
Operating profit	28.4	19.6	31.2	21.9

Three Months Ended December 31, 2014 Compared to Three Months Ended December 31, 2013

Net revenue increased \$2.4 (1.7%) or \$3.3 (2.3%) on a constant currency basis, primarily due to an increase in volume (\$5.4) offset by a decrease in the average selling price (\$2.1). Higher volume was driven by an increase in North American deaths, partially offset by the increased rate at which families opted for cremation.

Gross profit decreased 3% to \$54.1 and gross profit margin decreased 180 basis points to 37.3%. The decreased gross profit was primarily due to restructuring charges from the disposal of equipment and increased personnel and benefit costs, partially offset by higher volume.

Gross profit included restructuring charges (\$1.2 in 2015 and \$0.1 in 2014). Excluding restructuring charges, adjusted gross profit decreased \$0.6 (1%) and adjusted gross profit margin decreased 110 basis points to 38.1%.

Operating expenses increased \$1.1 to \$25.7, primarily due to increased selling expenses and litigation costs. The operating expenses to net revenue ratio increased 50 basis points to 17.7%.

Operating expenses in 2015 included \$0.5 of certain litigation costs. Excluding these costs, adjusted operating expenses in 2015 were \$25.2, a \$0.6 increase from 2014, and the operating expenses to net revenue ratio increased by 20 basis points to 17.4%.

REVIEW OF CORPORATE EXPENSES

	Three Months Ended December 31, 2014		2013	
	Amount	% of Net Revenue	Amount	% of Net Revenue
Core operating expenses	\$7.9	2.0	\$7.9	2.1
Business acquisition and integration costs	0.2	—	1.2	0.3
Restructuring charges	0.4	0.1	—	—
Operating expenses	\$8.5	2.1	\$9.1	2.4

Core operating expenses represent operating expenses excluding restructuring costs and costs related to business acquisition and integration, which we incur as a result of our strategy to grow through selective acquisitions.

Three Months Ended December 31, 2014 Compared to Three Months Ended December 31, 2013

Core operating expenses were substantially consistent year over year. These expenses as a percentage of revenue were 2.0%, a decrease of 10 basis points from 2014.

Explanation of Responses:

NON-GAAP OPERATING PERFORMANCE MEASURES

The following are reconciliations from the most directly comparable GAAP operating performance measures to our non-GAAP (adjusted) performance measures.

23

Table of Contents

	Three Months Ended December 31, 2014			2013		
	GAAP	Adjustments	Adjusted	GAAP	Adjustments	Adjusted
Cost of goods sold	\$263.1	\$(1.2) (a)	\$261.9	\$253.9	\$(0.1) (d)	\$253.8
Operating expenses	91.2	(1.5) (b)	89.7	94.0	(2.1) (e)	91.9
Income tax expense	11.8	0.8 (c)	12.6	9.0	0.6 (c)	9.6

Ratios:						
Gross margin	34.5 %	0.3 %	34.8 %	34.0 %	0.1 %	34.1 %
Operating expenses as a % of net revenue	22.7 %	(0.4)%	22.3 %	24.4 %	(0.5)%	23.9 %

(1) Net income attributable to Hillenbrand

P = Process Equipment Group; B = Batesville; C = Corporate

- (a) Restructuring (\$1.2 B)
- (b) Restructuring (\$0.3 P, \$0.4 C), business acquisition and integration costs (\$0.1 P, \$0.2 C), litigation costs (\$0.5 B)
- (c) Tax effect of adjustments
- (d) Restructuring (\$0.1 B)
- (e) Business acquisition and integration costs (\$0.7 P, \$1.2 C) and restructuring (\$0.2 P)

	Three Months Ended December 31,	
	2014	2013
Consolidated net income	\$29.7	\$21.6
Interest income	(0.3)	(0.2)
Interest expense	5.7	6.3
Income tax expense	11.8	9.0
Depreciation and amortization	15.0	14.3
EBITDA	\$61.9	\$51.0
Business acquisition and integration	0.3	1.9
Restructuring	0.7	0.3
Litigation and other	0.5	—
Adjusted EBITDA	\$63.4	\$53.2

Consolidated adjusted EBITDA increased \$10.2 (19%) for the three months ended December 31, 2014 compared to the same period in 2014. The increase during the three months ended December 31, 2014 was driven primarily by increased sales volume at both the Process Equipment Group and Batesville and cost reduction initiatives at the Process Equipment Group.

LIQUIDITY AND CAPITAL RESOURCES

We believe our ability to generate cash from operating activities is one of our fundamental financial strengths. In this section, we discuss our ability to generate and access cash to meet business needs. We describe actual results in generating and utilizing cash by comparing the first three months of 2015 to the same period last year. We discuss how we see cash flow being affected for the next twelve months. While it is not a certainty, we explain where we

think the cash will come from and how we intend to use it. Finally, we identify other significant matters that could affect liquidity on an ongoing basis.

We believe the 12-month outlook for our business remains strong. Although cash flow from operations in the Process Equipment Group business naturally experiences substantial fluctuations, we have significant flexibility to meet our financial

24

Table of Contents

commitments including working capital needs, capital expenditures, and financing obligations. Our debt financing includes long-term senior unsecured notes, including the Series A Notes, and our revolving credit facility (the “Facility”) as part of our overall financing strategy. We believe we continue to have ready access to capital markets, and we regularly review the optimal mix of fixed-rate and variable-rate debt. In addition to cash balances and our ability to access long-term financing, we had \$495.3 of maximum borrowing capacity under the Facility as of December 31, 2014, of which \$361.9 of borrowing capacity is immediately available based on our leverage covenant at December 31, 2014, with additional amounts available in the event of a qualifying acquisition. The available borrowing capacity reflects a reduction of \$14.4 for outstanding letters of credit issued under the Facility. The Company may request an increase of up to \$300.0 to the total borrowing capacity under the Facility, subject to the approval of the lenders.

In the normal course of business, the Process Equipment Group provides customers with bank guarantees and other credit arrangements in support of performance, warranty, advance payment, and other contractual obligations. This form of trade finance is customary in the industry and, as a result, we are required to maintain adequate capacity to provide the guarantees. As of December 31, 2014, we had guarantee arrangements with capacity totaling \$236.5, under which \$179.6 was utilized for this purpose. These arrangements include a €150.0 Syndicated Letter of Guarantee Facility (“LG Facility”), under which unsecured letters of credit, bank guarantees, or other surety bonds may be issued. The Company may request an increase to the total capacity under the LG Facility by an additional €70.0 subject to approval of the lenders.

We have significant operations outside the U.S. The majority of foreign earnings is considered to be indefinitely reinvested in foreign jurisdictions where the Company has made, and intends to continue to make, substantial investments to support the ongoing development and growth of our international operations. Accordingly, no U.S. federal and state income taxes have been accrued on the portion of our foreign earnings that is considered to be indefinitely reinvested in foreign jurisdictions. The cash at our international subsidiaries totaled \$41.6 at December 31, 2014. We do not intend, nor do we foresee a need, to repatriate these funds; however, repatriation of these funds under current regulatory and tax law for use in domestic operations would expose us to additional taxes.

Our anticipated contribution to our pension plans in 2015 is \$16.0, of which \$2.6 was made during the three months ended December 31, 2014. We will continue to monitor plan funding levels, performance of the assets within the plans, and overall economic activity, and will make additional discretionary funding decisions based on the net impact of these factors.

We currently expect to pay quarterly cash dividends in the future comparable to those we paid in 2014, which will require approximately \$12.6 each quarter based on our outstanding common stock at December 31, 2014. We are currently authorized by our Board of Directors to purchase additional shares of our common stock, and may elect to do so, depending on market conditions and other needs for cash consistent with our growth strategy. We repurchased approximately 222,000 shares of our common stock for \$6.8 as part of that plan during the three months ended December 31, 2014.

We believe existing cash, cash flows from operations, and the issuance of debt to continue to be sufficient to fund our operating activities and cash commitments for investing and financing activities. Based on these factors, we believe our current liquidity position is strong, and will continue to meet all of our financial commitments for the foreseeable future.

	Three Months Ended December
	31,
	2014
	2013

Cash flows (used in) provided by:

Explanation of Responses:

Operating activities	\$(41.9) \$45.9	
Investing activities	(7.8) (6.2)
Financing activities	42.3	(19.3)
Effect of exchange rate changes on cash and cash equivalents	1.4	(0.8)
Net cash flows	\$(6.0) \$19.6	

Operating Activities

Operating activities consumed \$41.9 of cash during the first three months of fiscal year 2015, in contrast to generating \$45.9 of cash during the first three months of fiscal year 2014, an \$87.8 unfavorable swing. This swing in operating cash was driven in part by a litigation settlement at Batesville and increased annual incentive compensation paid during the first quarter of the fiscal year, but it was primarily driven by a significant change in working capital balances at Coperion compared to the same period in 2014.

Table of Contents

In 2014 Coperion experienced a strong inflow of customer receipts on earlier stages of contracts in process. In contrast, during the first three months of fiscal year 2015, continued progress on compounding and extrusion orders at Coperion required a much stronger outflow of supplier payments. In addition, advance payments on orders recently commencing manufacturing were weaker on a period over period basis. Furthermore, payments on certain customer contracts were withheld due to delayed delivery, causing our net working capital investment in those contracts to increase during the quarter. We anticipate delivery to occur and payments to be received later this fiscal year. Working capital requirements for Coperion may fluctuate this way due to the type of product and geography of customer projects in process at any point in time. Working capital needs are lower when advance payments from customers are more heavily weighted toward the beginning of the project. Conversely, working capital needs are higher when a larger portion of the cash is to be received in later stages of manufacturing.

Investing Activities

Cash used in investing activities in the first three months of 2015 remained relatively flat compared to the same period in the prior year.

Financing Activities

Cash (used in)/provided by financing activities was largely impacted by net borrowing activity. Our general practice is to utilize our cash to pay down debt unless it is needed for an acquisition. Cash provided by financing activities during the first three months of 2015 was \$42.3, including \$59.5 of proceeds, net of debt repayments and financing costs. This includes the issuance of \$100.0 in 4.60% Series A Notes.

Cash used in financing activities in the first three months of 2014 was \$19.3 primarily due to net debt repayments.

We returned \$12.6 to shareholders during the first three months of 2015 in the form of quarterly dividends. We increased our quarterly dividend in 2015 to \$0.2000 per common share from \$0.1975 per common share paid during 2014. In addition, we repurchased approximately 222,000 shares of our common stock in 2015, for a total cost of \$6.8, as part of an approved and publicly announced program.

Off-Balance Sheet Arrangements

We have no significant off-balance sheet arrangements.

Recently Adopted and Issued Accounting Standards

For a summary of recently issued and adopted accounting standards applicable to us, see Item 1, Note 2 of Part I of this Form 10-Q.

Item 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISKS

A discussion of quantitative and qualitative disclosures about market risk may be found in Item 7A of our 2014 Form 10-K filed with the SEC on November 19, 2014. There have been no material changes in this information since the filing of our 2014 Form 10-K.

Item 4. CONTROLS AND PROCEDURES

Our management, with the participation of our President and Chief Executive Officer and our Senior Vice President and Chief Financial Officer (the "Certifying Officers"), evaluated the effectiveness of the design and operation of our

Explanation of Responses:

disclosure controls and procedures (as defined in Rules 13a-15(e) and 15d-15(e) of the Securities Exchange Act of 1934, as amended (the “Exchange Act”)). Based upon that evaluation, the Certifying Officers concluded that our disclosure controls and procedures as of the end of the period covered by this report are effective.

There have been no changes in internal controls over financial reporting (as defined in Rules 13a-15(f) and 15d-15(f) of the Exchange Act) for the period covered by this report that have materially affected or are reasonably likely to materially affect the Company’s internal control over financial reporting.

Table of Contents

PART II — OTHER INFORMATION

Item 1. LEGAL PROCEEDINGS

Information pertaining to legal proceedings can be found in Note 12 to the interim consolidated financial statements included in Part I, Item 1 of this Form 10-Q.

Item 1A. RISK FACTORS

In this section of the Form 10-Q, we describe the risks we believe are most important for you to think about when you consider investing in, selling, or owning our stock or debt. This information should be assessed along with the other information we provide you in this Form 10-Q. Like most companies, our business involves risks. The risks described below are not the only risks we face, but these are the ones we currently think have the potential to significantly affect stakeholders in our Company if they were to develop adversely (due to size, volatility, or both). We exclude risks that we believe are inherent in all businesses broadly as a function of simply being “in business.” Additional risks not currently known or considered immaterial by us at this time and thus not listed below could also result in adverse effects on our business. We have assigned the risks into categories to help you understand where they emanate from (e.g. the overall Company or a specific segment).

Risk Related to Hillenbrand

1. A key component of our growth strategy is making significant acquisitions, some of which may be outside the industries in which we currently operate. We may not be able to achieve some or all of the benefits that we expect to achieve from these acquisitions. If an acquisition were to perform unfavorably, it could have an adverse impact on our value.

All acquisitions involve inherent uncertainties, which may include, among other things, our ability to:

- successfully identify targets for acquisition;
- negotiate reasonable terms;
- properly perform due diligence and determine all the significant risks associated with a particular acquisition;
- successfully transition the acquired company into our business and achieve the desired performance; and
- where applicable, implement restructuring activities without an adverse impact to business operations.

We may acquire businesses with unknown liabilities, contingent liabilities, internal control deficiencies, or other risks. We have plans and procedures to review potential acquisition candidates for a variety of due diligence matters, including compliance with applicable regulations and laws prior to acquisition. Despite these efforts, realization of any of these liabilities or deficiencies may increase our expenses, adversely affect our financial position, or cause us to fail to meet our public financial reporting obligations.

We generally seek indemnification from sellers covering these matters; however, the liability of the sellers is often limited, and certain former owners may be unable to meet their indemnification responsibilities. We cannot assure you that these indemnification provisions will fully protect us, and as a result we may face unexpected liabilities that adversely affect our profitability and financial position.

We may not achieve the intended benefits of the acquisition and our business could be materially impacted. In addition, any benefits we anticipate from application of HBS may not be fully realized. Under such circumstances, management could be required to spend significant amounts of time and resources in the transition of the acquired business.

Explanation of Responses:

If we acquire a company that operates in an industry that is different from the ones in which we currently operate, our lack of experience with that company's industry could have a material adverse impact on our ability to manage that business and realize the benefits of that acquisition.

2. Global market and economic conditions, including those related to the financial markets, could have a material adverse effect on our operating results, financial condition, and liquidity.

Our business is sensitive to changes in general economic conditions, both inside and outside the U.S. Although we have seen stability or growth in some geographies since the global economic turmoil that began in 2008, we cannot assure you that these

27

Table of Contents

improvements will be sustainable or predict when the next recession will occur. In addition, continuing uncertainties in the euro zone may depress demand in the area and create additional risk to our financial results.

Instability in the global economy and financial markets can adversely affect our business in several ways, including limiting our customers' ability to obtain sufficient credit or pay for our products within the terms of sale. Competition could further intensify among the manufacturers and distributors with whom we compete for volume and market share, resulting in lower net revenue due to steeper discounts and product mix-down. In addition, if certain key or sole suppliers were to become capacity constrained or insolvent, it could result in a reduction or interruption in supplies or a significant increase in the price of supplies.

Substantial losses in the equity markets could have an adverse effect on the assets of the Company's pension plans. Volatility of interest rates and negative equity returns could require greater contributions to the defined benefit plans in the future.

3. International economic, political, legal, and business factors could negatively affect our operating results, cash flows, financial condition, and growth.

We derived approximately 46% and 47% of our revenue from our operations outside the U.S. for the three months ended December 31, 2014 and 2013. This revenue is primarily generated in Europe, the Middle East, Asia, South America, and Canada. In addition, we have manufacturing operations, suppliers, and employees located outside the U.S. Since our growth strategy depends in part on our ability to further penetrate markets outside the U.S., we expect to continue to increase our sales and presence outside the U.S., including in emerging markets.

Our international business is subject to risks that are often encountered in non-U.S. operations, including:

- interruption in the transportation of materials to us and finished goods to our customers;
- differences in terms of sale, including payment terms;
- local product preferences and product requirements;
- changes in a country's or region's political or economic condition, including with respect to safety and health issues;
- trade protection measures and import or export licensing requirements;
- unexpected changes in laws or regulatory requirements, including negative changes in tax laws;
- limitations on ownership and on repatriation of earnings and cash;
- difficulty in staffing and managing widespread operations;
- differing labor regulations;
- difficulties in enforcing contract and property rights under local law;
- difficulties in implementing restructuring actions on a timely or comprehensive basis; and
- differing protection of intellectual property.

Such risks may be more likely in emerging markets, where our operations may be subject to greater uncertainty due to increased volatility associated with the developing nature of their economic, legal, and governmental systems.

If we are unable to successfully manage the risks associated with expanding our global business, or to adequately manage operational fluctuations, it could adversely affect our business, financial condition, or results of operations.

4. We rely upon our employees, agents, and business partners to comply with laws in many different countries and jurisdictions. We establish policies and provide training to assist them in understanding our policies and the regulations most applicable to our business; however, our reputation, ability to do business, and financial results may be impaired by improper conduct by these individuals.

We cannot provide assurance that our internal controls and compliance systems will always protect us from acts committed by our employees, agents, or business partners that would violate U.S. and/or non-U.S. laws, including the laws governing payments to government officials, bribery, fraud, anti-kickback and false claims, competition, export and import compliance, money laundering, and data privacy. In particular, the U.S. Foreign Corrupt Practices Act, the U.K. Bribery Act, and similar anti-bribery laws in other jurisdictions generally prohibit companies and their intermediaries from making improper payments

Table of Contents

to government officials for the purpose of obtaining or retaining business, and we operate in many parts of the world that have experienced governmental corruption to some degree. Any such improper actions could subject us to civil or criminal investigations in the U.S. and in other jurisdictions; could lead to substantial civil and criminal, monetary and non-monetary penalties, and related shareholder lawsuits; could cause us to incur significant legal fees; and could damage our reputation.

5. We are subject to risks arising from currency exchange rate fluctuations, which may adversely affect our results of operations and financial condition.

We are subject to currency exchange rate risk to the extent that our costs are denominated in currencies other than those in which we earn revenues. In addition, since our financial statements are denominated in U.S. dollars, changes in currency exchange rates between the U.S. dollar and other currencies have had, and will continue to have, an impact on our results of operations. Although we address currency risk management through regular operating and financing activities, and through the use of derivative financial instruments, those actions may not prove to be fully effective.

6. Increased prices for, or unavailability of, raw materials used in our products could adversely affect profitability.

Our profitability is affected by the prices of the raw materials used in the manufacture of our products. These prices fluctuate based on a number of factors beyond our control, including changes in supply and demand, general economic conditions, labor costs, fuel-related delivery costs, competition, import duties, tariffs, currency exchange rates, and, in some cases, government regulation. Significant increases in the prices of raw materials that cannot be recovered through increases in the price of our products could adversely affect our results of operations and cash flows.

We cannot guarantee that the prices we are paying for commodities today will continue in the future or that the marketplace will continue to support current prices for our products or that such prices can be adjusted to fully offset commodity price increases in the future. Any increases in prices resulting from a tightening supply of these or other commodities could adversely affect our profitability. We do not engage in hedging transactions for raw material purchases, but we do enter into some fixed-price supply contracts.

Our dependency upon regular deliveries of supplies from particular suppliers means that interruptions or stoppages in such deliveries could adversely affect our operations until arrangements with alternate suppliers could be made. Several of the raw materials used in the manufacture of our products currently are procured from a single source. If any of these sole-source suppliers were unable to deliver these materials for an extended period of time as a result of financial difficulties, catastrophic events affecting their facilities, or other factors, or if we were unable to negotiate acceptable terms for the supply of materials with these sole-source suppliers, our business could be adversely affected. We may not be able to find acceptable alternatives, and any such alternatives could result in increased costs. Extended unavailability of a necessary raw material could cause us to cease manufacturing one or more products for a period of time.

7. The Company could face labor disruptions that would interfere with operations.

As of December 31, 2014, approximately 40% of Hillenbrand's employees work under collective bargaining agreements. Although we have not experienced any significant work stoppages in the past 20 years as a result of labor disagreements, we cannot ensure that such a stoppage will not occur in the future. Inability to negotiate satisfactory new agreements or a labor disturbance at one or more of our facilities could have a material adverse effect on our operations.

8. Volatility in our investment portfolio could adversely impact our operating results and financial condition.

Hillenbrand has certain investments that were transferred to us by our former parent company with an aggregate carrying value of \$12.3 as of December 31, 2014. Volatility in our investment portfolio impacts earnings. These investments could be adversely affected by general economic conditions, changes in interest rates, equity market volatility, and other factors, resulting in an adverse impact on our operating results and financial condition.

9. We are involved from time to time in claims, lawsuits, and governmental proceedings relating to our operations, including environmental, antitrust, patent infringement, business practices, commercial transactions, and other matters. The ultimate outcome of these claims, lawsuits, and governmental proceedings cannot be predicted with certainty, but could have a material adverse effect on our financial condition, results of operations, and cash flows.

We are also subject to other potential claims, including product and general liability, workers compensation, auto liability, and employment-related matters. While we maintain insurance for certain of these exposures, the policies in place are high-deductible policies.

29

Table of Contents

10. We have historically used debt to finance acquisitions. Increasing our debt could adversely affect the Company and limit our ability to respond to changes in our businesses. We expect to continue to make acquisitions as a key component of our growth strategy.

As of December 31, 2014, our outstanding debt was \$617.1. This level of debt and additional debt we may incur in the future could have important consequences to our businesses. For example:

• We may be more vulnerable to general adverse economic and industry conditions because we have lower borrowing capacity.

• We will be required to dedicate a larger portion of our cash flow from operations to payments on our indebtedness, thereby reducing the availability of our cash flow for other purposes, including business development efforts and acquisitions.

• We will continue to be exposed to the risk of increased interest rates because a portion of our borrowings is at variable rates of interest.

• We may be more limited in our flexibility in planning for, or reacting to, changes in our businesses and the industries in which they operate, thereby placing us at a competitive disadvantage compared to competitors that have less indebtedness.

• We may be more vulnerable to credit rating downgrades which could have an impact on our ability to secure future financing at attractive interest rates.

11. Provisions in our Articles of Incorporation and By-laws and facets of Indiana law may prevent or delay an acquisition of the Company, which could decrease the trading price of our common stock.

Our Articles of Incorporation and By-laws, as well as Indiana law, contain provisions that could delay or prevent changes in control if our Board of Directors determines that such changes in control are not in the best interests of our shareholders. While these provisions have the effect of encouraging persons seeking to acquire control of our Company to negotiate with our Board of Directors, they could enable our Board of Directors to hinder or frustrate a transaction that the Board of Directors believes is not in the best interests of shareholders, but which some, or a majority, of our shareholders might believe to be in their best interests.

These provisions include, among others:

- the division of our Board of Directors into three classes with staggered terms;
- the inability of our shareholders to act by less than unanimous written consent;
- rules regarding how shareholders may present proposals or nominate directors for election at shareholder meetings;
- the right of our Board of Directors to issue preferred stock without shareholder approval; and
- limitations on the right of shareholders to remove directors.

Indiana law also imposes some restrictions on mergers and other business combinations between us and any holder of 10% or more of our outstanding common stock.

We believe these provisions are important for a public company and protect our shareholders from coercive or otherwise potentially unfair takeover tactics by requiring potential acquirers to negotiate with our Board of Directors and by providing our Board of Directors with appropriate time to assess any acquisition proposal. These provisions are not intended to make our Company immune from takeovers; however, they may apply if the Board of Directors determines that a takeover offer is not in the best interests of our shareholders, even if some shareholders believe the offer to be beneficial.

Risk Related to the Process Equipment Group

1. A significant portion of our investments in the Process Equipment Group includes goodwill and intangible assets that are subject to periodic impairment evaluations. An impairment loss on these assets could have a material adverse impact on our financial condition and results of operations.

We acquired intangible assets with the acquisitions of Coperion, K-Tron, and Rotex, portions of which were identified as either goodwill or indefinite-lived assets. We periodically assess these assets to determine if they are impaired. Significant negative

30

Table of Contents

industry or economic trends, disruptions to our business, inability to effectively integrate acquired businesses, unexpected significant changes, or planned changes in use of the assets, divestitures, and market capitalization declines may impair these assets. Any charges relating to such impairments could adversely affect our results of operations in the periods recognized.

2. The Process Equipment Group operates in cyclical industries.

As an industrial capital goods supplier, the Process Equipment Group serves industries that are cyclical. During periods of economic expansion, when capital spending normally increases, the Process Equipment Group generally benefits from greater demand for its products. During periods of economic contraction, when capital spending normally decreases, the Process Equipment Group generally is adversely affected by declining demand for new equipment orders, and it may be subject to uncollectible receivables from customers who become insolvent. There can be no assurance that economic expansion or increased demand will be sustainable.

3. The Process Equipment Group derives significant revenues from the plastics industry. Any decrease in demand for plastics could have a material adverse effect on our business, financial condition, and results of operations.

The Process Equipment Group sells extruders and compounding systems to the plastics industry. Its sales are tied to the consumption of plastic products. The demand for plastics is dependent upon the consumer's choice. As a result, any downturn in or disruption to the plastics industry or decrease in the demand for plastics, could have a material adverse effect on our business, financial condition, and results of operations.

4. The Process Equipment Group derives significant revenues from the energy industry. Any decrease in demand for electricity, natural gas, or coal, or an increase in regulation of the energy industry could have a material adverse effect on our business, financial condition, and results of operations.

The Process Equipment Group sells dry material separation and size reduction equipment to the electric generating, natural gas, and coal mining industries. A significant portion of its sales are tied to the consumption of natural gas and coal as a means of generating electricity. The demand for natural gas and coal is dependent upon the availability and cost of alternative sources of energy, such as oil or nuclear power. Additionally, the cost of compliance with federal, state, and local laws and regulations on the energy industry may impact the demand for our products. As a result, any downturn in or disruption to the natural gas or coal industries or decrease in the demand for electricity could have a material adverse effect on our business, financial condition, and results of operations.

Risk Related to Batesville

1. Continued fluctuations in mortality rates and increased cremations may adversely affect, as they have in recent years, the sales volume of our burial caskets.

The life expectancy of U.S. citizens has increased steadily since the 1950s and is expected to continue to do so for the foreseeable future. However, we do anticipate a modest increase in deaths every year driven by the aging U.S. population.

Cremations as a percentage of total U.S. deaths have increased steadily since the 1960s and are expected to continue to increase for the foreseeable future. The increase in the number of cremations in the U.S. has resulted in a contraction in the demand for burial caskets. This has been a contributing factor to lower burial casket sales volumes for Batesville in each of the last five years. We expect these trends will continue in the foreseeable future and will likely continue to negatively impact burial casket volumes.

Finally, the number of deaths can vary over short periods of time and among different geographical areas, due to a variety of factors, including the timing and severity of seasonal outbreaks of illnesses such as pneumonia and influenza. Such variations could cause the sale of burial caskets to fluctuate from quarter to quarter and year to year.

2. Batesville's business is dependent on several major contracts with large national funeral providers. The relationships with these customers pose several risks.

Batesville has contracts with a number of national funeral home customers that constitute a sizeable portion of its overall sales volume. Any decision by national funeral home customers to discontinue purchases from Batesville could have a material adverse effect on our financial condition, results of operations, and cash flows. Also, while contracts with national funeral service providers give Batesville important access to purchasers of death care products, they may obligate Batesville to sell

Table of Contents

products at contracted prices for extended periods of time, therefore limiting Batesville's ability, in the short term, to raise prices in response to significant increases in raw material prices or other factors.

3. Batesville is facing competition from a number of non-traditional sources and from caskets manufactured abroad and imported into North America.

Non-traditional death care product providers, such as large discount retail stores, casket stores, and internet casket retailers could present more of a competitive threat to Batesville and its sales channel than is currently anticipated. In addition, a few foreign manufacturers, mostly from China, import caskets into the U.S. and Canada. For the past three years, sales from these non-traditional and Chinese providers have remained relatively stable and represent a small percentage of total casket sales in North America, collectively less than 5%. It is not possible to quantify the financial impact that these competitors will have on Batesville in the future. These competitors and any new entrants into the funeral products business may drive pricing and other competitive actions in an industry that already has nearly twice the necessary domestic production capacity. Such competitive developments could have a negative impact on our results of operations and cash flows.

Item 2. UNREGISTERED SALES OF EQUITY SECURITIES AND USE OF PROCEEDS

The following table summarizes repurchases of common stock during the quarter ended December 31, 2014:

Period	Total Number of Shares Purchased	Average Price Paid per Share	Total Number of Shares Purchased as Part of Publicly Announced Plans or Programs (1)	Maximum Dollar Amount that May Yet be Purchased Under Plans or Programs (1)
October	190,999	\$30.09	190,999	\$55.2
November	—	\$—	—	\$55.2
December	30,783	\$32.45	30,783	\$54.2
Total	221,782	\$30.41	221,782	\$54.2

(1) On July 24, 2008, our Board of Directors approved the repurchase of up to \$100.0 of common stock. As of December 31, 2014, we had repurchased approximately 1,900,000 shares for an aggregate price of \$45.8. The stock repurchase approval has no expiration date, and there was no termination of the stock repurchase plan during the quarter ended December 31, 2014.

Item 6. EXHIBITS

The exhibits filed with this report are listed on the Exhibit Index, which is incorporated herein by reference. In reviewing any agreements included as exhibits to this report, please remember that they are included to provide you with information regarding their terms and are not intended to provide any other factual or disclosure information about us or the other parties to the agreements. The agreements may contain representations and warranties by the parties to the agreements, including us. Except where explicitly stated otherwise, these representations and warranties have been made solely for the benefit of the other parties to the applicable agreement and:

- should not necessarily be treated as categorical statements of fact, but rather as a way of allocating the risk to one of the parties if those statements prove to be inaccurate;

Edgar Filing: Allanson Joe - Form 4

- may have been qualified by disclosures that were made to the other party in connection with the negotiation of the applicable agreement, which disclosures are not necessarily reflected in the agreement;
- may apply standards of materiality in a way that is different from what may be viewed as material to you or other investors; and
- were made only as of the date of the applicable agreement or such other date or dates as may be specified in the agreement and are subject to more recent developments.

Accordingly, these representations and warranties may not describe the actual state of affairs as of the date they were made or at any other time.
