Commission File Number 0-51367

OTTAWA SAVINGS BANCORP, INC.

(Exact Name of Registrant as Specified in Charter)

United States **20-3074627**
(State or other Jurisdiction (I.R.S. Employer
of Incorporation) **Identification No.)**

925 LaSalle Street, Ottawa, Illinois **61350**
(Address of Principal Executive Offices) (Zip Code)

Registrant's telephone number, including area code: (815) 433-2525

Securities registered pursuant to Section 12(b) of the Act: None

Securities registered pursuant to Section 12(g) of the Act:

Common Stock, Par Value \$0.01 per share

(Title of Class)

Indicate by check mark if the registrant is a well-known seasoned issuer, as defined in Rule 405 of the Securities Act. Yes No .

Indicate by check mark if the registrant is not required to file reports pursuant to Section 13 or Section 15(d) of the

Act. Yes No .

Indicate by check mark whether the issuer (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes No .

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T (Section 232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files). Yes No .

Indicate by check mark if disclosure of delinquent filers pursuant to Item 405 of Regulation S-K is not contained herein, and will not be contained, to the best of registrant's knowledge, in definitive proxy or information statements incorporated by reference in Part III of this Form 10-K or any amendment to this Form 10-K.

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer or a smaller reporting company. See the definitions of "large accelerated filer," "accelerated filer" and "smaller reporting company" in Rule 12b-2 of the Exchange Act. (Check one):

Large Accelerated Filer

Accelerated Filer

Non-Accelerated filer (do not check if a smaller reporting company)

Smaller Reporting Company

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act). Yes No .

As of June 30, 2015, the aggregate market value of the voting common equity held by non-affiliates of the registrant was approximately \$9,049,963 (based on the last sale price of the common stock on the OTC Bulletin Board of \$11.84 per share on June 30, 2015).

The number of shares of Common Stock of the registrant issued and outstanding as of March 30, 2016 was 2,894,123.

DOCUMENTS INCORPORATED BY REFERENCE

Portions of the registrant's definitive proxy statement for its 2016 Annual Meeting of Stockholders to be filed with the Securities and Exchange Commission pursuant to SEC Regulation 14A are incorporated by reference into Part III.

Forward-Looking Statements

This report includes forward-looking statements, including statements regarding our strategy, effectiveness of investment programs, evaluations of future interest rate trends and liquidity, expectations as to growth in assets, deposits and results of operations, future operations, market position, financial position, and prospects, plans and objectives of management. These forward-looking statements, which are based on certain assumptions and describe our future plans, strategies and expectations, can generally be identified by use of the words “believe,” “expect,” “intend,” “anticipate,” “estimate,” “project,” or similar expressions. Our ability to predict results or the actual effect of future plans or strategies is inherently uncertain and actual results may differ materially from those predicted in such forward-looking statements. A number of factors, some of which are beyond our ability to predict or control, could cause future results to differ materially from those contemplated. These factors include but are not limited to: recent and future bail out actions by the government; a further slowdown in the national and Illinois economies; a further deterioration in asset values locally and nationwide; volatility of rate sensitive deposits; changes in the regulatory environment; increasing competitive pressure in the banking industry; our ability to realize estimated cost savings from acquired or merged entities; our ability to successfully integrate acquired or merged entities with us; operational risks; asset/liability matching risks and liquidity risks; continued access to liquidity sources; changes in the securities markets; changes in our borrowers’ performance on loans; changes in critical accounting policies and judgments; changes in accounting policies or procedures as may be required by the Financial Accounting Standards Board or other regulatory agencies; changes in the equity and debt securities markets; effect of additional provision for loan losses; fluctuations of our stock price; success and timing of our business strategies; impact of reputation risk created by these developments on such matters as business generation and retention, funding and liquidity; and political developments, wars or other hostilities that may disrupt or increase volatility in securities or otherwise affect economic conditions. The consequences of these factors, any of which could hurt our business, could include, among others: increased loan delinquencies; an escalation in problem assets and foreclosures; a decline in demand for our products and services; a reduction in the value of the collateral for loans made by us, especially real estate, which, in turn would likely reduce our customers’ borrowing power and the value of assets and collateral associated with our existing loans; a reduction in the value of certain assets held by our company; an inability to meet our liquidity needs and an inability to engage in certain lines of business. These risks and uncertainties should be considered in evaluating forward-looking statements, and undue reliance should not be placed on such statements. Except to the extent required by applicable law or regulation the Company does not undertake any obligation to update any forward-looking statement to reflect circumstances or events that occur after the date the forward-looking statements are made. See also “Item 1A. Risk Factors” and other risk factors discussed elsewhere in this Annual Report.

ITEM 1. BUSINESS

General

Ottawa Savings Bancorp, Inc. (the “Company”) is a savings and loan holding company incorporated under the laws of the United States on July 11, 2005, for the purpose of serving as the holding company of Ottawa Savings Bank (the

“Bank”), as part of the Bank’s conversion from a mutual to a stock form of organization. The Company is a publicly traded banking company with assets of \$213.6 million at year-end 2015 and is headquartered in Ottawa, Illinois. The Bank’s business is to attract deposits from the general public and use those funds to originate and purchase one-to-four family, multi-family and non-residential real estate, construction, commercial and consumer loans, which the Bank primarily holds for investment. The Bank has continually diversified its products to meet the needs of the communities it serves.

In 2005, the Board of Directors of the Bank unanimously adopted a plan of conversion providing for the conversion of the Bank from an Illinois chartered mutual savings bank to a federally chartered stock savings bank and the purchase of all of the common stock of the Bank by the Company.

The conversion was completed in 2005 when the Company issued 1,223,701 shares of common stock to Ottawa Savings Bancorp MHC (a mutual holding company) and 1,001,210 shares of common stock to the public.

On December 31, 2014, the Company acquired Twin Oaks Savings Bank (“Twin Oaks”) and merged Twin Oaks with and into the Bank, with the Bank being the surviving entity in the merger (the “Merger”). Since the Merger occurred at the close of business on December 31, 2014, there were no operating results of the former Twin Oaks included in the consolidated financial statements for 2014. As a result of the Merger, the Company increased its market share in the La Salle County market and expanded into Grundy County. The Merger helped expand our customer base.

In connection with the Merger, the Company issued 776,144 shares of common stock to Ottawa Savings Bancorp, MHC. As of December 31, 2015, Ottawa Savings Bancorp MHC holds 1,999,845 shares of common stock, representing 69.1% of the Company's common shares outstanding.

Business Strategy

The Company's business strategy is to operate as a well-capitalized and profitable community savings bank dedicated to providing high quality customer service and innovative new products. The Bank operates three branches in Ottawa, Marseilles and Morris, Illinois. Each facility has an ATM and drive-up lanes to provide quality customer service to customers in the community.

Highlights of our business strategy are as follows:

- Continue to emphasize the origination of one-to four-family mortgage loans;
- Aggressively market core deposits;
- Offer a broad range of financial products and services to both retail and commercial customers in the Bank's market area;
- Pursue opportunities to increase non-residential real estate and multi-family lending in the Bank's market area;
- Continue to utilize conservative underwriting guidelines to limit credit risk in the Bank's loan portfolio to achieve a high level of asset quality; and
- Consider judicious expansion into new market areas to grow the Bank's business through the addition of new branch locations and/or through possible acquisitions.

Market Area and Competition

The Company is headquartered in Ottawa, Illinois, which is located in north-central Illinois approximately 80 miles southwest of Chicago. Its market area, which benefits from its proximity to Chicago, includes all of LaSalle County and parts of Grundy County.

The Bank faces significant competition for the attraction of deposits and origination of loans. Our most direct competition for deposits and loans has historically come from the several financial institutions operating in our market area, including a number of independent banks, and, to a lesser extent, from other financial service companies, such as brokerage firms, credit unions, mortgage companies and mortgage brokers. In addition, the Bank faces competition for investors' funds from money market funds and other corporate and government securities. Competition for loans also comes from the increasing number of non-depository financial service companies entering the mortgage and consumer

credit market, such as securities companies and specialty finance companies. The Bank believes that its long-standing presence in Ottawa, Illinois, its recent expansion into Grundy County as a result of the Twin Oaks acquisition, and its personal service philosophy enhance its ability to compete favorably in attracting and retaining individual and business customers. The Company actively solicits deposit-related customers and competes for deposits by offering customers personal attention, professional service and competitive interest rates.

Lending Activities

General. Our loan portfolio consists primarily of one-to-four family residential mortgage loans. To a lesser extent, our loan portfolio includes multi-family and non-residential real estate, commercial, construction and consumer loans. Substantially all of our loans are made within our local market, excluding our purchased loan portfolio.

Loan Portfolio Composition. The following table sets forth the composition of our loan portfolio by type of loan as of the dates indicated, including a reconciliation of gross loans receivable after consideration of the undisbursed portion of construction loan funds, the allowance for loan losses and net deferred costs (fees).

Asset Quality. Within our investment portfolio we have no subprime or Alt-A backed instruments among our securities. Historically, our lending activity has promoted home ownership in the communities we serve. Our consumer and residential mortgage loans are originated consistent with the underwriting approach described herein. This includes an assessment of each borrower's personal financial condition, including a review of credit reports and related FICO scores as well as verification of income and assets. The Company does not conduct lending programs that target the subprime market. During the ordinary course of business to achieve our goal of being a community bank, we originate and manage loans in our portfolio to some borrowers with a risk of default higher than customers considered prime. Thus, an extended economic downturn may affect us indirectly, albeit to a lesser extent than it would likely impact those banks and thrifts that produce and retain significant portfolios that target such loans and securities. While we believe that the nature of our one-to-four family lending niche and our underwriting standards would limit the impact of the downward turn in the credit cycle on the quality of our assets—particularly in comparison with those institutions that directly target subprime and Alt-A lending—another downturn in the credit cycle could result in our experiencing higher levels of charge-offs and/or provisions for loan losses, which might impact our results of operations.

One- to-Four Family Residential Loans. Our primary lending activity is the origination of mortgage loans to enable borrowers to purchase or refinance existing homes or to construct new residential dwellings in our market area. We offer fixed-rate and adjustable-rate mortgage loans with terms up to 30 years. Borrower demand for adjustable-rate loans versus fixed-rate loans is a function of the level of interest rates, the expectations of changes in the level of interest rates, the difference between the interest rates and loan fees offered for fixed-rate mortgage loans and the initial period interest rates and loan fees for adjustable-rate loans. The relative amount of fixed-rate mortgage loans and adjustable-rate mortgage loans that can be originated or purchased at any time is largely determined by the demand for each in a competitive environment and the effect each has on our interest rate risk. The loan fees charged, interest rates, and other provisions of mortgage loans are determined by us on the basis of our own pricing criteria and competitive market conditions.

We offer fixed rate loans with terms of either 15, 20 or up to 30 years. We traditionally sell 30-year fixed rate loans into the secondary market, resulting in a fixed rate loan portfolio primarily composed of loans with less than 15 to 20 year terms. Our adjustable-rate mortgage loans are based on either a 15, 20 or up to 30 year amortization schedule and interest rates and payments on our adjustable-rate mortgage loans adjust every one, three or five years. Interest rates and payments on our adjustable-rate loans generally are adjusted to a rate that is based on the respective one, three, and five year monthly Constant Maturity Treasury indices (CMT). The maximum amount by which the interest rate may be increased or decreased is generally 1% to 2% per adjustment period, depending on the type of loan, and the lifetime interest rate ceiling is generally 5% over the initial interest rate of the loan. The initial and floor rates for owner occupied properties are 1.875%, 2.875% and 3.125% for the one, three and five-year adjustable rate loans, respectively, and range of 4.5% to 6.5% for non-owner occupied one-to-four family properties, respectively, at this time.

Due to historically low interest rate levels, borrowers generally have preferred fixed-rate loans in recent years. While we anticipate that our adjustable-rate loans will better offset the adverse effects on our net interest income of an increase in interest rates as compared to fixed-rate mortgages, the increased mortgage payments required of adjustable-rate loans in a rising interest rate environment could cause an increase in delinquencies and defaults. The

marketability of the underlying property also may be adversely affected in a high interest rate environment. In addition, although adjustable-rate mortgage loans help make our asset base more responsive to changes in interest rates, the extent of this interest rate sensitivity is limited by the annual and lifetime interest rate adjustment limits.

While one-to-four family residential real estate loans are normally originated with up to 30-year terms, such loans typically remain outstanding for substantially shorter periods because borrowers often prepay their loans in full upon sale of the property pledged as security or upon refinancing the original loan. Therefore, average loan maturity is a function of, among other factors, the level of purchase and sale activity in the real estate market, prevailing interest rates and the interest rates payable on outstanding loans.

On occasion we originate loans to individuals and purchase loans that finance the construction of residential dwellings for personal use. Our construction loans generally provide for the payment of interest only during the construction phase, which is usually ten months. At the end of the construction phase, most of our loans automatically convert to permanent mortgage loans. Construction loans generally can be made with a maximum loan to value ratio of 80% of the appraised value with maximum terms of 30 years. The largest outstanding residential construction loan at December 31, 2015 was \$316,000, of which \$296,000 was disbursed. We also require periodic inspections of the property during the term of the construction.

We generally do not make conventional loans with loan-to-value ratios exceeding 80%. Loans with loan-to-value ratios in excess of 80% generally require private mortgage insurance, government guarantee or additional collateral. We require all properties securing mortgage loans to be appraised by an independent appraiser approved by our Board of Directors and licensed by the State of Illinois. We require title insurance on all first mortgage loans. Borrowers must obtain hazard insurance, or flood insurance for loans on property located in a flood zone, before closing the loan.

We participate with the USDA Rural Development Company to offer loans to qualifying customers. Loans are granted up to 100% of appraised value and the USDA guarantees up to 90% of the loan. These loans require no down payment but are subject to maximum income limitations.

Lines of Credit. We offer lines of credit, principally home equity lines of credit, which have adjustable rates of interest that are indexed to the prime rate as published in *The Wall Street Journal* for terms of up to 20 years. These loans are originated with maximum loan-to-value ratios of 80% of the appraised value of the property, and we require that we have a second lien position on the property. We also offer secured and unsecured lines of credit for well-qualified individuals and small businesses. Management includes these loans based on the collateral supporting the line of credit in either the non-residential, multi-family, commercial or one-to-four family categories for the purposes of monitoring and evaluating the portfolio.

Multi-Family and Non-Residential Real Estate Loans. We offer fixed rate and adjustable-rate mortgage loans secured by multi-family and non-residential real estate. Our multi-family and non-residential real estate loans are generally secured by condominiums, apartment buildings, single-family subdivisions and owner-occupied properties used for businesses.

We originate and purchase multi-family and non-residential real estate loans with terms generally up to 25 years. Interest rates and payments on adjustable-rate loans adjust every one, three and five years. Interest rates and payments on our adjustable rate loans generally are adjusted to a rate typically equal to the interest rate used for one- to- four family loan products, plus 50 basis points to 100 basis points based on credit-worthiness and risk. Loan amounts generally do not exceed 80% of the appraised value for well-qualified borrowers.

We originate and purchase land loans to individuals on approved residential building lots for personal use for terms of up to 15 years and to a maximum loan to value ratio of 80% of the appraised value. Our land loans are adjustable loans with adjustments occurring every one, three and five years, based on the original contract. Interest rate adjustments are based on the CMT plus a spread. For adjustable loans in this class, the loans generally have an interest rate floor.

We also make non-residential loans for commercial development projects including condominiums, apartment buildings, single-family subdivisions, single-family speculation loans, as well as owner-occupied properties used for business. These loans provide for payment of interest only during the construction phase and may, in the case of an apartment or commercial building, convert to a permanent mortgage loan. In the case of a single family subdivision or construction or builder loan, as individual lots are sold, the principal balance is reduced by a minimum of 80% of the net lot sales price. In the case of a commercial construction loan, the construction period may be from nine months to two years. Loans are generally made to a maximum of 70% of the appraised value as determined by an appraisal of the property made by an independent licensed appraiser. We also require periodic inspections of the property during the term of the construction loan. The largest non-residential loan at December 31, 2015 was a troubled debt

restructured loan from 2012 with a restructured balance of \$2.0 million, of which \$1.7 million is outstanding. This loan has been performing per its modified terms and will be returned to a performing status once scheduled principal payments begin. For adjustable loans in this category, there generally is an interest rate floor ranging from 3.75% to 6.00%.

Loans secured by multi-family and non-residential real estate generally have larger balances and involve a greater degree of risk than one-to-four family residential mortgage loans. Of primary concern in multi-family and non-residential real estate lending is the borrower's credit-worthiness and the feasibility and cash flow potential of the project. Payments on loans secured by income producing properties often depend on successful operation and management of the properties. As a result, repayment of such loans may be subject, to a greater extent than residential real estate loans, to adverse conditions in the real estate market or the economy. In reaching a decision on whether to make a multi-family or non-residential real estate loan, we consider the net operating income of the property, the borrower's expertise, credit history and profitability, and the value of the underlying property.

Commercial Loans. These loans consist of operating lines of credit secured by general business assets and equipment. We loan primarily to businesses with less than \$5,000,000 in annual revenues. The operating lines of credit are generally short term in nature with interest rates tied to short term rates and adjustments occurring daily, monthly, or quarterly based on the original contract. For adjustable loans, there is also an interest rate floor. The equipment loans are typically made with maturities of less than five years and are priced with a fixed interest rate. The Bank has originated commercial loans from Bankers Healthcare Group in prior years. Bankers Healthcare Group specializes in loans to healthcare professionals of all specialties throughout the United States. These loans are primarily comprised of working capital and equipment loans. We underwrite these loans based on our criteria and service the loans in-house.

Consumer Loans. We offer a variety of consumer loans, which include auto, share loans and personal unsecured loans to our customer base. Unsecured loans generally have a maximum borrowing limit of \$25,000 and a maximum term of four years.

The procedures for underwriting consumer loans include an assessment of the applicant's payment history on other debts and ability to meet existing obligations and payments on the proposed loans. Although the applicant's credit-worthiness is a primary consideration, the underwriting process also includes a comparison of the value of the collateral, if any, to the proposed loan amount.

Consumer loans may entail greater risk than do residential mortgage loans, particularly in the case of consumer loans that are unsecured or secured by assets that depreciate rapidly. In such cases, repossessed collateral for a defaulted consumer loan may not provide an adequate source of repayment for the outstanding loan and the remaining deficiency often does not warrant further substantial collection efforts against the borrower. In addition, consumer loan collections depend on the borrower's continuing financial stability, and therefore are more likely to be adversely affected by job loss, divorce, illness, or personal bankruptcy. Furthermore, the application of various federal and state laws, including federal and state bankruptcy and insolvency laws may limit the amount which can be recovered on such loans.

Purchased Auto Loans. The Bank purchases auto loans from regulated financial institutions. At December 31, 2015 and 2014, we had \$5.2 million and \$8.7 million of loans outstanding, respectively. These types of loans are primarily low balance individual auto loans. We have the opportunity to review the loans at least three days prior to our purchase and we have a right to refuse any specific loan within thirty days of the purchase of any given loan pool. During 2015, we did not purchase any auto loans.

Loan Origination, Purchases and Sales. Loan originations come from a number of sources. The primary source of loan originations are our in-house loan originators, and to a lesser extent, advertising and referrals from customers. We occasionally purchase loans or participation interests in loans. As of December 31, 2015, we had an aggregate of \$10.8 million in purchased loan participations outstanding, including the auto loans purchased as discussed in the previous paragraph. The largest outstanding loan participation as of December 31, 2015 was a commercial loan for \$2.9 million. This loan is performing in accordance with its terms.

We sell some of the longer-term fixed-rate one-to-four family mortgage loans that we originate in the secondary market based on prevailing market interest rate conditions, an analysis of the composition and risk of the loan portfolio, liquidity needs and interest rate risk management goals. Generally, loans are sold without recourse and with servicing retained. We sold \$7.9 million and \$3.1 million of loans in the years ended December 31, 2015 and 2014, respectively. We occasionally sell participation interests in loans and may sell loan participations in the future.

The following table shows our loan originations, purchases, sales and repayment activities for the periods indicated.

(1) All loan sales were one-to-four family loans.

Loan Approval Procedures and Authority. Our lending activities follow written, non-discriminatory underwriting standards and loan origination procedures established by our Board of Directors and management.

For one-to-four family loans and owner occupied residential loans, our President may approve loans up to \$500,000. Residential loans and all commercial loans above \$500,000 up to \$1 million in the aggregate to any borrower(s) must be approved by a majority of our officers' loan committee. This committee consists of our President, Executive Vice-President and our Commercial Banking Officer. For loans to any borrower(s) in the aggregate of more than \$1

million up to \$2 million, approval is required by a majority of our level two loan committee, which consists of the officers' loan committee, one designated outside director and our Chairman of the Board. For loan requests above \$2 million in the aggregate to any borrower(s), approval is required by a majority of the loan committee of the Board of Directors, which consists of the officers' loan committee and the Bank's Board of Directors as a whole.

Loans to One Borrower. The maximum amount that we may lend to one borrower and the borrower's related entities is limited by regulation to generally 15% of our stated capital and reserves. At December 31, 2015, our regulatory maximum was \$4.5 million.

Loan Commitments. We issue commitments for fixed-rate and adjustable-rate mortgage loans conditioned upon the occurrence of certain events. Commitments to originate mortgage loans are legally binding agreements to lend to our customers and generally expire in 45 days.

Delinquencies. When a borrower fails to make a required loan payment, we take a number of steps to have the borrower cure the delinquency and restore the loan to current status. We make initial contact with the borrower when the loan becomes 10 days past due. If payment is not then received by the 30th day of delinquency, additional letters are sent and phone calls generally are made to the customer by the Vice President or President. When the loan becomes 120 days past due, we generally commence foreclosure proceedings against any real property that secures the loan or attempt to repossess any personal property that secures a consumer loan. If a foreclosure action is instituted and the loan is not brought current, paid in full, or refinanced before the foreclosure sale, the real property securing the loan generally is sold at foreclosure. We may consider loan workout arrangements with certain borrowers under certain circumstances.

Management informs the Board of Directors on a monthly basis of the amount of loans delinquent more than 60 days, all loans in foreclosure and all foreclosed and repossessed property that we own.

Classified Assets. Federal Deposit Insurance Corporation regulations and our Asset Classification Policy provide that loans and other assets considered to be of lesser quality be classified as “substandard,” “doubtful” or “loss” assets. An asset is considered “substandard” if it is inadequately protected by the current net worth and paying capacity of the obligor or of the collateral pledged, if any. “Substandard” assets include those characterized by the “distinct possibility” that the institution will sustain “some loss” if the deficiencies are not corrected. Assets classified as “doubtful” have all of the weaknesses inherent in those classified as “substandard,” with the added characteristic that the weaknesses present make “collection or liquidation in full,” on the basis of currently existing facts, conditions and values, “highly questionable and improbable.” Assets classified as “loss” are those considered “uncollectible” and of such little value that their continuance

as assets without the establishment of a specific loss reserve is not warranted. We classify an asset as “special mention” if the asset has a potential weakness that warrants management’s an escalated level of attention. While such assets are not impaired, management has concluded that if the potential weakness in the asset is not addressed, the value of the asset may deteriorate, adversely affecting the repayment of the asset. Loans classified as impaired for financial reporting purposes are generally those loans classified as substandard or doubtful for regulatory reporting purposes.

An insured institution is required to establish allowances for loan losses in an amount deemed prudent by management for loans classified as substandard or doubtful, as well as for other problem loans. General allowances represent loss allowances which have been established to recognize the inherent losses associated with lending activities, but which, unlike specific allowances, have not been allocated to particular problem assets. When an insured institution classifies problem assets as “loss,” it is required to charge off such amounts. An institution’s determination as to the classification of its assets and the amount of its valuation allowances is subject to review by the Office of the Comptroller of the Currency (“OCC”).

On the basis of management’s review of its assets, at December 31, 2015 and 2014, we classified \$0.7 million and \$2.1 million, respectively, of our assets as special mention and \$5.0 million and \$6.0 million, respectively, of our assets as substandard. We classified none of our assets as doubtful at December 31, 2015 and December 31, 2014. There were no assets classified as loss for the years ended December 31, 2015 or 2014. The loan portfolio is reviewed on a regular basis to determine whether any loans require classification in accordance with applicable regulations. Not all classified assets constitute non-performing assets.

Although the economy continued to stabilize in our market during 2015, foreclosures and liquidations as a manner of reducing non-performing assets continued to prove costly. However, there are circumstances when foreclosure and liquidations are the remedy pursued. From time to time, the Company as part of our loss mitigation strategy may renegotiate the loan terms (i.e. interest rate, structure, repayment term, A/B note format, etc.) based on the economic or legal reasons related to the borrower's financial difficulties. There were no new troubled debt restructurings ("TDRs") during 2014 or 2015. TDRs are considered to be non-performing, except for those that have established a sufficient performance history (generally a minimum of six consecutive months of performance) under the terms of the restructured loan.

At December 31, 2015, six loans (with aggregate balances of \$2.6 million) of our 34 substandard loans (with aggregate balances of \$5.0 million) were considered TDRs and were included in non-performing assets. At December 31, 2014, 14 loans (with aggregate balances of \$2.6 million) of our 64 substandard loans (with aggregate balances of \$6.0 million) were considered TDRs and were included in non-performing assets. During the year ended December 31, 2015, there were no new modifications classified as TDRs and one addition to loans classified as TDR's of approximately \$60,000 due to the Merger. Additionally, two previously performing TDRs originally restructured in 2010, totaling approximately \$0.6 million at December 31, 2015 were returned to non-performing status during 2015, and principal advances totaling approximately \$0.2 million were made on two TDRs to pay real estate taxes. The increases in TDRs included in impaired loans were offset by writing down and moving 11 TDRs totaling approximately \$0.9 million to OREO, resulting a decrease in the number of TDRs included in impaired loans from December 2014 to December 2015, while the balance remained approximately \$2.6 million.

The following table shows the amounts and relevant ratios of nonperforming assets for the periods indicated:

	December 31,				
	2015	2014	2013	2012	2011
	(In Thousands)

Ratios

	December 31,				
	2015	2014	2013	2012	2011
Allowance for loan losses as a percent of gross loans receivable	1.56 %	1.59 %	2.52 %	2.69 %	3.57 %
Allowance for loan losses as a percent of total nonperforming loans	44.00%	38.33%	49.48%	53.46%	54.67%
Nonperforming loans as a percent of gross loans receivable	3.55 %	4.15 %	5.10 %	5.04 %	6.53 %
Nonperforming loans as a percent of total assets	2.37 %	2.72 %	3.45 %	3.53 %	4.75 %
Nonperforming assets as a percent of total assets	2.52 %	2.86 %	3.80 %	4.26 %	5.06 %

The total amount of non-accrual loans decreased to \$5.1 million from \$6.0 million as of December 31, 2015 and 2014, respectively. Total non-performing loans consist of 36 loans to 34 borrowers for the year ended December 31, 2015, as compared to 77 loans to 40 borrowers for the year ended December 31, 2014. For the years ended December 31, 2015 and 2014, gross interest income of \$214,000 and \$196,000, respectively, would have been recorded had the non-accrual loans at the end of the period been on accrual status throughout the period. We recognized no interest income on these loans.

Allowance for Loan Losses

Our allowance for loan losses is maintained at a level necessary to absorb loan losses which are both probable and reasonably estimable. Management, in determining the allowance for loan losses, considers the losses inherent in its loan portfolio and changes in the nature and volume of loan activities, along with the general economic and real estate market conditions. We utilize a two-tier approach: (1) identification of impaired loans and establishment of specific loss allowances on such loans; and (2) establishment of general valuation allowances on the remainder of our loan portfolio. We maintain a loan review system, which allows for a periodic review of our loan portfolio and the early identification of potential impaired loans. Such system takes into consideration, among other things, delinquency status, size of loans, type and market value of collateral and financial condition of the borrowers. Specific loan loss allowances are established for identified losses based on a review of such information. A loan evaluated for impairment is considered to be impaired when, based on current information and events, it is probable that we will be unable to collect all amounts due according to the contractual terms of the loan agreement. All loans identified as impaired are evaluated independently. We do not aggregate such loans for evaluation purposes. Loan impairment is measured based on the present value of expected future cash flows discounted at the loan's effective interest rate or, as a practical expedient, at the loan's observable market price or the fair value of the collateral if the loan is collateral dependent. The interest on these loans is accounted for on the cash-basis or cost-recovery method, until qualifying for return to accrual status. Should full collection of principal be expected, cash collected on nonaccrual loans can be recognized as interest income.

The general component consists of quantitative and qualitative factors and covers non-impaired loans. The quantitative factors are based on historical loss experience adjusted for qualitative factors. For all loans other than performing credits acquired from Twin Oaks on December 31, 2014, the historical loss experience is determined by portfolio segment and is based on the actual loss history experienced by the Company using the most recent twelve quarters with heavier weighting given to the most recent quarters. For performing credits acquired from Twin Oaks on December 31, 2014, the historical loss experience is determined by portfolio segment and is based on the actual loss history experienced by Twin Oaks prior to the merger, and by the Company after the merger, using the most recent sixteen quarters with heavier weighting given to the most recent quarters.

This actual loss experience is supplemented with other qualitative factors based on the risks present for each portfolio segment. These qualitative factors include consideration of the following:

Levels of and trends in delinquencies and impaired loans

Levels of and trends in charge-offs and recoveries

Trends in volume and terms of loans

Effects of any changes in risk selection and underwriting standards

Other changes in lending policies, procedures and practices

Experience, ability and depth of lending management and other relevant staff

National and local economic trends and conditions

Industry conditions

Effects of changes in credit concentrations

The allowance is increased through provisions charged against current earnings, and offset by recoveries of previously charged-off loans. Loans which are determined to be uncollectible are charged against the allowance. Management uses available information to recognize probable and reasonably estimable loan losses, but future loss provisions may be necessary based on changing economic conditions. The allowance for loan losses as of December 31, 2015 is maintained at a level that represents management's best estimate of losses inherent in the loan portfolio, and such losses were both probable and reasonably estimable. In addition, the OCC, as an integral part of its examination process, periodically reviews our allowance for loan losses.

Allowance for Loan Losses. The following table analyzes changes in the allowance for the periods indicated.

(1) Allowances applicable to lines of credit and construction loans are maintained in the related category of the underlying collateral.

Each quarter, management evaluates the total balance of the allowance for loan losses based on several factors that are not loan specific, but are reflective of the inherent losses in the loan portfolio. This process includes, but is not limited to, a periodic review of loan collectability in light of historical experience, the nature and volume of loan activity, conditions that may affect the ability of the borrower to repay, underlying value of collateral, if applicable, and economic conditions in our market areas. First, we group loans by delinquency status. All loans 90 days or more delinquent and all loans classified as substandard or doubtful are evaluated individually, based primarily on the value of the collateral securing the loan. Specific loss allowances are established as required by this analysis. All loans for which a specific loss allowance has not been assigned are segregated by type and delinquency status and a loss allowance is established by using loss experience data and management's judgment concerning other matters it considers significant. The allowance is allocated to each category of loan based on the results of the above analysis.

Total allowance for loan losses decreased \$0.1 million to \$2.2 million at December 31, 2015 from \$2.3 million at December 31, 2014. The decrease in the allowances for loan losses was primarily due to a net decrease of \$0.4 million in the general portion of the reserve. The decrease in the general portion was due primarily to the stabilization of the nonperforming asset levels and charge-off levels which had a favorable impact on the historical loss factors. The historical loss factor for one-to-four family, multi-family, and non-residential property declined the most due to the historical loss percentage improving as charge-off levels declined by \$1.1 million, as well as movements in the qualitative factors as risks in their segments change. The historical loss factors increased slightly for the other categories with the largest increases in the consumer and purchased auto segments. Additionally, management reduced the qualitative factors for most of the segments related to the economy to reflect the stabilization of local economic conditions, which began in mid-2014. The loan portfolio also includes \$25.1 million of loans acquired at their fair values in the Twin Oaks merger on December 31, 2014. Offsetting this decrease was an increase of \$344,000 of specific reserves on impaired loans. Impaired loans were \$5.0 million with a valuation allowance of \$387,000 at December 31, 2015, as compared to \$6.0 million with a valuation allowance of \$43,000 at December 31, 2014. Of the \$5.0 million of impaired loans, \$0.5 million were acquired in the merger with Twin Oaks and valued per FASB ASC 310-30 (see Note 2 to the Notes to the Consolidated Financial Statements).

This analysis process is inherently subjective, as it requires us to make estimates that are susceptible to revisions as more information becomes available. Although we believe that we have established the allowance at a level to absorb probable and estimable losses, additions may be necessary if economic or other conditions in the future differ from the current environment.

Investment Activities

We have legal authority to invest in various types of liquid assets, including U.S. Treasury obligations, securities of various federal agencies and of state and municipal governments, mortgage-backed securities and certificates of deposit of federally insured institutions.

At December 31, 2015, our investment portfolio consisted primarily of municipal securities with maturities of five to more than ten years and residential mortgage-backed securities issued by Fannie Mae, Freddie Mac, and Ginnie Mae with stated final maturities of 30 years or less.

Our investment objectives are to provide and maintain liquidity, to maintain a balance of high quality, diversified investments to minimize risk, to provide collateral for pledging requirements, to establish an acceptable level of interest rate risk, to provide an alternate source of low-risk investments when demand for loans is weak and to generate a favorable return. Our Board of Directors has the overall responsibility for our investment portfolio, including approval of our investment policy and appointment of our Investment Committee. The Investment Committee is responsible for approval of investment strategies and monitoring of investment performance. Our Executive Vice-President and CFO are the designated investment officers and they are responsible for the daily investment activities and are authorized to make investment decisions consistent with our investment policy. The Investment Committee, consisting of seven external Board of Director members, meets regularly with the Executive Vice-President and CFO to review and determine investment strategies and transactions.

The following table sets forth the carrying value of our investment portfolio at the dates indicated.

Portfolio Maturities and Yields. The composition and maturities of the investment securities portfolio at December 31, 2015 are summarized in the following table. Maturities are based on the final contractual payment dates, and do not reflect the impact of prepayments or early redemptions that may occur. Certain mortgage-backed securities have interest rates that are adjustable and will re-price annually within the various maturity ranges. These re-pricing schedules are not reflected in the table below.

Deposit Activities and Other Sources of Funds

General. Deposits and loan repayments are the major sources of our funds for lending and other investment purposes. Loan repayments are a relatively stable source of funds, while deposit inflows and outflows and loan prepayments are significantly influenced by general interest rates and market conditions.

Deposit Accounts. The vast majority of our depositors are residents of LaSalle County. Deposits are raised primarily from within our primary market area through the offering of a broad selection of deposit instruments, including checking accounts, money market accounts, regular savings accounts, club savings accounts, certificate accounts and various retirement accounts. The Bank also is a member of the Certificate of Deposit Registry Service (CDARS), which allows the Bank to retain high deposit relationships with its depository customer base, while still allowing the

customer to enjoy FDIC deposit insurance on amounts in excess of the current limit of \$250,000. Other than our relationship with CDARS, we do not utilize brokered funds. Deposit account terms vary according to the minimum balance required, the time periods the funds must remain on deposit, and the interest rate among other factors. In determining the terms of our deposit accounts, we consider the rates offered by our competition, profitability to us, matching deposit and loan products and customer preferences and concerns. We generally review our deposit mix and pricing weekly. Our current strategy is to offer competitive rates, but not be the market leader in every type and maturity.

The following table sets forth the dollar amount of deposits by type as of the dates indicated.

Borrowings. If necessary, we borrow from the Federal Home Loan Bank of Chicago to supplement our supply of lendable funds and to meet deposit withdrawal requirements. The Federal Home Loan Bank functions as a central reserve bank providing credit for member financial institutions. As a member, we are required to own capital stock in the Federal Home Loan Bank of Chicago and are authorized to apply for advances on the security of such stock and certain of our mortgage loans and other assets (principally securities that are obligations of, or guaranteed by, the United States), provided certain standards related to credit-worthiness have been met. Advances are made under several different programs, each having its own interest rate and range of maturities. Depending on the program, limitations on the amount of advances are based either on a fixed percentage of an institution's net worth or on the Federal Home Loan Bank's assessment of the institution's credit-worthiness. Under its current credit policies, the Federal Home Loan Bank generally limits advances to 25% of a member's assets, and short-term borrowings of less than one year may not exceed 10% of the institution's assets. The Federal Home Loan Bank determines specific lines of credit for each member institution. There were approximately \$2.1 million of Federal Home Loan Bank advances outstanding at December 31, 2015. At December 31, 2015, we had the ability to borrow \$68.3 million from the Federal Home Loan Bank of Chicago. In addition, as of December 31, 2015, the Bank had \$5.0 million of available credit from Bankers Bank of Wisconsin to purchase federal funds.

Personnel

At December 31, 2015, we had 42 full-time employees and 11 part-time employees, none of whom is represented by a collective bargaining unit. We believe our relationship with our employees is good.

Subsidiaries

The Company's only subsidiary is Ottawa Savings Bank.

REGULATION AND SUPERVISION

General

Ottawa Savings Bank as an insured federal savings bank is subject to extensive regulation, examination and supervision by the Office of the Comptroller of the Currency (“OCC”), as its primary federal regulator, and the Federal Deposit Insurance Corporation, as the insurer of its deposits. Ottawa Savings Bank is a member of the Federal Home Loan Bank System and its deposit accounts are insured up to applicable limits by the Deposit Insurance Fund (“DIF”) managed by the Federal Deposit Insurance Corporation. Ottawa Savings Bank must file reports with the OCC and the Federal Deposit Insurance Corporation concerning its activities and financial condition in addition to obtaining regulatory approvals prior to entering into certain transactions such as mergers with, or acquisitions of, other financial institutions. There are periodic examinations by the OCC and, under certain circumstances, the Federal Deposit Insurance Corporation to evaluate Ottawa Savings Bank’s safety and soundness and compliance with various regulatory requirements. This regulatory structure is intended primarily for the protection of the insurance fund and depositors. The regulatory structure also gives the regulatory authorities extensive discretion in connection with their supervisory and enforcement activities and examination policies, including policies with respect to the classification of assets and the establishment of adequate loan loss reserves for regulatory purposes. Any change in such policies, whether by the OCC, the Federal Deposit Insurance Corporation or Congress, could have a material adverse impact on Ottawa Savings Bancorp, Inc., Ottawa Savings Bancorp MHC and Ottawa Savings Bank and their operations.

Ottawa Savings Bancorp, Inc. and Ottawa Savings Bancorp MHC, as savings and loan holding companies, are required to file certain reports with, are subject to examination by, and otherwise must comply with the rules and regulations of the Board of Governors of the Federal Reserve System (the “Federal Reserve Board”). Ottawa Savings Bancorp, Inc. is also subject to the rules and regulations of the Securities and Exchange Commission under the federal securities laws.

The Dodd-Frank Wall Street Reform and Consumer Protection Act of 2010 (the “Dodd-Frank Act”) made extensive changes to the regulation and supervision of financial institutions, including the Bank. Under the Dodd-Frank Act, the Office of Thrift Supervision (“OTS”) was eliminated and responsibility for the supervision and regulation of federal savings associations was transferred to the OCC on July 21, 2011. At the same time, the responsibility for supervising and regulating the savings and loan holding companies like Ottawa Savings Bancorp, Inc. and Ottawa Savings Bancorp MHC was transferred to the Federal Reserve Board. In addition, the Dodd-Frank Act created a new agency, the Consumer Financial Protection Bureau which assumed responsibility for the implementation of the federal financial consumer protection and fair lending laws and regulations and has authority to impose new requirements. However, institutions of \$10.0 billion or less in assets, such as Ottawa Savings Bank, continue to be examined for compliance with consumer protection and fair lending laws and regulations by, and be subject to the enforcement authority of, their prudential regulator rather than the Consumer Financial Protection Bureau. Many of the provisions of the Dodd-Frank Act require the issuance of regulations before their impact on operations can be fully assessed by management. However, there is a significant possibility that the Dodd-Frank Act will, at a minimum, result in increased regulatory burden and compliance costs for Ottawa Savings Bank, Ottawa Savings Bancorp, Inc. and Ottawa Savings Bancorp MHC.

Certain of the regulatory requirements that are applicable to Ottawa Savings Bank, Ottawa Savings Bancorp, Inc. and Ottawa Savings Bancorp MHC are described below. This description of statutes and regulations is not intended to be a complete explanation of such statutes and regulations and their effects on Ottawa Savings Bank, Ottawa Savings Bancorp, Inc. and Ottawa Savings Bancorp MHC and is qualified in its entirety by reference to the actual statutes and regulations.

Regulation of Federal Savings Banks

Business Activities. Federal laws and regulations govern the activities of federal savings banks, such as the Ottawa Savings Bank. These laws and regulations delineate the nature and extent of the activities in which federal savings banks may engage. In particular, certain lending authority for federal savings banks, e.g., commercial, non-residential real property loans and consumer loans, is limited to a specified percentage of the institution’s capital or assets.

The Dodd-Frank Act authorizes depository institutions to pay interest on commercial demand deposits effective July 21, 2011.

Capital Requirements. Under Basel III, the capital regulations now require federal savings banks to meet four minimum capital standards: a 4.0% Tier 1 leverage ratio; a 4.5% common equity Tier 1 ratio; a 6.0% Tier 1 capital ratio; and an 8% Total capital ratio. In addition, the prompt corrective action standards discussed below also establish, in effect, a minimum 2% tangible capital standard. The rules eliminated the inclusion of certain instruments, such as trust preferred securities, from Tier 1 capital. Instruments issued before May 19, 2010 are grandfathered for companies with consolidated assets of \$15 billion or less. The rules also established a “capital conservation buffer” of

2.5% above the new regulatory minimum capital requirements, which must consist entirely of common equity Tier 1 capital and would result in the following minimum ratios: (1) a common equity Tier 1 capital ratio of 7.0%, (2) a Tier 1 capital ratio of 8.5%, and (3) a total capital ratio of 10.5%. The new capital conservation buffer requirement will be phased in beginning in January 2016 at 0.625% of risk-weighted assets and would increase by that amount each year until fully implemented in January 2019. An institution will be subject to limitations on paying dividends, engaging in share repurchases and paying discretionary bonuses if its capital level falls below the buffer amount. These limitations will establish a maximum percentage of eligible retained income that could be utilized for such actions.

The risk-based capital standard requires federal savings banks to maintain Tier 1 and total capital (which is defined as core capital and supplementary capital, less certain specified deductions from total capital such as reciprocal holdings of depository institution capital, instruments and equity investments) to risk-weighted assets of at least 6% and 8%, respectively. In determining the amount of risk-weighted assets, all assets, including certain off-balance sheet assets, recourse obligations, residual interests and direct credit substitutes, are multiplied by a risk-weight factor of 0% to 150%, as assigned by the capital regulation based on the risks believed inherent in the type of asset. Tier 1 capital is generally defined as common stockholders' equity (including retained earnings), certain non-cumulative perpetual preferred stock and related surplus and minority interests in equity accounts of consolidated subsidiaries, less intangibles other than certain mortgage servicing rights and credit card relationships. The components of Tier 2 capital currently include cumulative preferred stock, long-term perpetual preferred stock, mandatory convertible securities, subordinated debt and intermediate preferred stock, the allowance for loan and lease losses limited to a maximum of 1.25% of risk-weighted assets and up to 45% of unrealized gains on available-for-sale equity securities with readily determinable fair market values. Overall, the amount of Tier 2 capital included as part of total capital cannot exceed 100% of core capital.

Savings and loan holding companies with less than \$1 billion in assets are not subject to specific regulatory capital requirements. The Dodd-Frank Act, however, requires the Federal Reserve Board to promulgate consolidated capital requirements for depository institution holding companies, including savings and loan holding companies that are no less stringent, both quantitatively and in terms of components of capital, than those applicable to institutions themselves.

As of December 31, 2015, our current capital levels exceed the required capital amounts to be considered “well capitalized” and we believe they also meet the fully-phased in minimum capital requirements, including the related capital conservation buffers, as required by the Basel III capital rules.

Prompt Corrective Regulatory Action. The OCC is required to take certain supervisory actions against undercapitalized institutions, the severity of which depends upon the institution’s degree of undercapitalization. Generally, a savings bank that has a ratio of total capital to risk weighted assets of less than 8%, a ratio of Tier 1 capital to risk-weighted assets of less than 6%, a ratio of common equity Tier 1 capital to risk weighted assets of less than 4.5%, or a Tier 1 leverage ratio of less than 4% is considered to be “undercapitalized.” A savings bank that has a total risk-based capital ratio less than 6%, a Tier 1 capital ratio of less than 4%, a common equity Tier 1 ratio of less than 3%, or a Tier 1 leverage ratio that is less than 3% is considered to be “significantly undercapitalized” and a savings bank that has a tangible capital to assets ratio equal to or less than 2% is deemed to be “critically undercapitalized.” Subject to a narrow exception, the OCC is required to appoint a receiver or conservator within specified time frames for an institution that is “critically undercapitalized.” An institution must file a capital restoration plan with the OCC within 45 days of the date it receives notice that it is “undercapitalized,” “significantly undercapitalized” or “critically undercapitalized.” Compliance with the plan must be guaranteed by any parent holding company. In addition, numerous mandatory supervisory actions become immediately applicable to an undercapitalized institution, including, but not limited to, increased monitoring by regulators and restrictions on growth, capital distributions and expansion. “Significantly undercapitalized” and “critically undercapitalized” institutions are subject to more extensive mandatory regulatory actions. The OCC could also take any one of a number of discretionary supervisory actions, including the issuance of a capital directive and the replacement of senior executive officers and directors.

In addition to the increase in capital requirements set forth in the Dodd-Frank Act, federal banking agencies have the authority to impose higher capital requirements on an individual bank basis. These requirements may be greater than those set forth in the Dodd-Frank Act or that would qualify a bank as being “well capitalized” under the FDIC’s prompt corrective action regulations.

Loans to One Borrower. Federal law provides that savings banks are generally subject to the limits on loans to one borrower applicable to national banks. Generally, subject to certain exceptions, savings banks may not make a loan or extend credit to a single or related group of borrowers in excess of 15% of its unimpaired capital and surplus. An additional amount may be lent, equal to 10% of unimpaired capital and surplus, if secured by specified readily-marketable collateral.

Standards for Safety and Soundness. The federal banking agencies have adopted Interagency Guidelines prescribing Standards for Safety and Soundness in various areas such as internal controls and information systems, internal audit, loan documentation and credit underwriting, interest rate exposure, asset growth and quality, earnings and compensation, fees and benefits. The guidelines set forth the safety and soundness standards that the federal banking agencies use to identify and address problems at insured depository institutions before capital becomes impaired. If the OCC determines that a savings bank fails to meet any standard prescribed by the guidelines, the OCC may require the savings bank to submit an acceptable plan to achieve compliance with the standard.

Limitation on Capital Distributions. Federal regulations impose limitations upon all capital distributions by a savings bank, including cash dividends, payments to repurchase its shares and payments to stockholders of another institution in a cash-out merger. Under the regulations, an application to and the prior approval of the OCC is required before any capital distribution if the savings bank does not meet the criteria for “expedited treatment” of applications under OCC regulations (i.e., generally, examination and Community Reinvestment Act ratings in the two top categories), the total capital distributions for the calendar year exceed net income for that year plus the amount of retained net income for the preceding two years, the savings bank would be undercapitalized following the distribution or the distribution would otherwise be contrary to a statute, regulation or agreement with the OCC. If an application is not required, the savings bank must still provide 30 days prior written notice to the Federal Reserve Board of the capital distribution if, like Ottawa Savings Bank, it is a subsidiary of a holding company, as well as a written notice filing with the OCC. If Ottawa Savings Bank’s capital were ever to fall below its regulatory requirements or the OCC notified it that it was in need of increased supervision, its ability to make capital distributions could be restricted. In addition, the OCC could prohibit a proposed capital distribution that would otherwise be permitted by the regulation, if the agency determines that such distribution would constitute an unsafe or unsound practice.

Qualified Thrift Lender Test. Federal law requires savings banks to meet a qualified thrift lender test. Under the test, a savings bank is required to either qualify as a “domestic building and loan association” under the Internal Revenue Code or maintain at least 65% of its “portfolio assets” (total assets less: (i) specified liquid assets up to 20% of total assets; (ii) intangibles, including goodwill; and (iii) the value of property used to conduct business) in certain “qualified thrift investments” (primarily multi-family residential mortgages and related investments, including certain mortgage-backed securities but also including education, credit card and small business loans) in at least 9 months out of each 12 month period.

A savings bank that fails the qualified thrift lender test is subject to certain operating restrictions. The Dodd-Frank Act also specifies that failing the qualified thrift lender test is a violation of law that could result in an enforcement action and dividend limitations. As of December 31, 2015, Ottawa Savings Bank maintained 81.6% of its portfolio assets in qualified thrift investments and, therefore, met the qualified thrift lender test.

Transactions with Related Parties. Federal law limits Ottawa Savings Bank's authority to lend to, and engage in certain transactions (collectively, "covered transactions") with "affiliates" (e.g., any company that controls or is under common control with an institution), including Ottawa Savings Bancorp, Inc. and Ottawa Savings Bancorp MHC). The aggregate amount of covered transactions with any individual affiliate is limited to 10% of the capital and surplus of the savings institution. The aggregate amount of covered transactions with all affiliates is limited to 20% of the savings institution's capital and surplus. Loans and other specified transactions with affiliates are required to be secured by collateral in an amount and of a type described in federal law. The purchase of low quality assets from affiliates is generally prohibited. Transactions with affiliates must be on terms and under circumstances that are at least as favorable to the institution as those prevailing at the time for comparable transactions with non-affiliated companies. In addition, savings banks are prohibited from lending to any affiliate that is engaged in activities that are not permissible for bank holding companies and no savings bank may purchase the securities of any affiliate other than a subsidiary.

The Sarbanes-Oxley Act generally prohibits loans by the Company to its executive officers and directors. However, the Sarbanes-Oxley Act contains a specific exemption from such prohibition for loans by Ottawa Savings Bank to its executive officers and directors in compliance with federal banking regulations. Federal regulations require that all loans or extensions of credit to executive officers and directors of insured institutions and 10% stockholders ("insiders"), as well as entities such persons control, must be made on substantially the same terms, including interest rates and collateral, as those prevailing at the time for comparable transactions with parties not related to Ottawa Savings Bancorp, Inc. or Ottawa Savings Bank and must not involve more than the normal risk of repayment or present other unfavorable features. Ottawa Savings Bank is therefore prohibited from making any new loans or extensions of credit to executive officers and directors at different rates or terms than those offered to the general public. Notwithstanding this rule, federal regulations permit the Bank to make loans to executive officers and directors at reduced rates if the loan is made under a benefit program generally available to all other employees and does not give preference to any executive officer or director over any other employee. All past banking transactions between Ottawa Savings Bancorp, Inc. and its officers and directors: (i) were made in the ordinary course of business; (ii) were made on substantially the same terms, including interest rates and collateral, as those prevailing at the time for comparable loans with persons not related to Ottawa Savings Bancorp, Inc.; and (iii) did not involve more than the normal risk of collectability or present other unfavorable features.

In accordance with banking regulations, the Board of Directors reviews all loans made to a director or executive officer in an amount that, when aggregated with the amount of all other loans to such person and his or her related interests, exceed the greater of \$25,000 or 5% of Ottawa Savings Bancorp's capital and surplus (up to a maximum of \$500,000) and such loans must be approved in advance by a majority of the disinterested members of the Board of Directors. Additionally, pursuant to the Company's Code of Ethics and Business Conduct, all executive officers and directors of the Company must disclose any existing or emerging conflicts of interest to the President and Chief Executive Officer of the Company. Such potential conflicts of interest include, but are not limited to, the following: (i)

the Company conducting business with or competing against an organization in which a family member of an executive officer or director has an ownership or employment interest; and (ii) the ownership of more than 1% of the outstanding securities (or that represents more than 5% of the total assets of the employee and/or family member) of any business entity that does business with or is in competition with the Company.

Enforcement. The OCC has primary enforcement responsibility over federal savings banks and has the authority to bring actions against the institution and all institution-affiliated parties, including stockholders, and any attorneys, appraisers and accountants who knowingly or recklessly participate in wrongful action likely to have an adverse effect on an insured institution. Formal enforcement action may range from the issuance of a capital directive or cease and desist order, to removal of officers and/or directors, to institution of receivership, conservatorship or termination of deposit insurance. Civil penalties cover a wide range of violations and can amount to \$25,000 per day, or even \$1 million per day in especially egregious cases subject to adjustments for inflation. The Federal Deposit Insurance Corporation (“FDIC”) has authority to recommend to the OCC that enforcement action be taken with respect to a particular savings institution. If action is not taken by the OCC, the FDIC has authority to take such action under certain circumstances. Federal law also establishes criminal penalties for certain violations.

Assessments. Federal savings banks are required to pay assessments to the OCC to fund its operations. The general assessments, paid on a semi-annual basis, are based upon the savings bank’s total assets, including consolidated subsidiaries, as reported in the institution’s latest quarterly thrift financial report or call report, its financial condition and the complexity of its portfolio. The OCC assessments paid by Ottawa Savings Bank for the year ended December 31, 2015 was approximately \$81,000.

Insurance of Deposit Accounts. The Bank's deposits are insured up to applicable limits, which are \$250,000 per depositor by the Deposit Insurance Fund ("DIF") of the FDIC.

Under the FDIC's risk-based assessment system, insured institutions are assigned to one of four risk categories based on supervisory evaluations, regulatory capital levels and certain other factors, with less risky institutions paying lower assessments. An institution's assessment rate depends upon the category to which it is assigned. Effective April 1, 2009, assessment rates range from seven to 77.5 basis points. The FDIC may adjust the scale uniformly from one quarter to the next, except that no adjustment can deviate more than three basis points from the base scale without notice and comment. No institution may pay a dividend if in default of the federal deposit insurance assessment.

On February 7, 2011, the FDIC approved a final rule that implemented changes to the deposit insurance assessment system mandated by the Dodd-Frank Act. The final rule, which took effect for the quarter beginning April 1, 2011, requires that the base on which deposit insurance assessments are charged be revised from one that is based on domestic deposits to one that is based on average consolidated total assets minus average tangible equity. Under the final rule, insured depository institutions are required to report their average consolidated total assets on a daily basis, using the regulatory accounting methodology established for reporting total assets. For purposes of the final rule, tangible equity is defined as Tier 1 capital.

In addition to the assessment for deposit insurance, institutions are required to make payments on bonds issued in the late 1980s by the Financing Corporation to recapitalize a predecessor deposit insurance fund. That payment is established quarterly and during the four quarters ended December 31, 2015 averaged 0.15 basis points of assessable deposits.

The Dodd-Frank Act increased the minimum Deposit Insurance Fund ratio from 1.15% of estimated insured deposits to 1.35% of estimated insured deposits. The FDIC must seek to achieve the 1.35% ratio by September 30, 2020. Insured institution with assets of \$10.0 billion or more are supposed to fund the increase. The Dodd-Frank Act eliminated the 1.5% maximum fund ratio, instead leaving it to the discretion of the FDIC and the FDIC has recently exercised that discretion by establishing a long range fund of 2%.

The FDIC has authority to increase insurance assessments. A significant increase in insurance premiums would likely have an adverse effect on the operating expenses and results of operations of Ottawa Savings Bank. Management cannot predict what insurance assessment rates will be in the future.

Insurance of deposits may be terminated by the FDIC upon a finding that the institution has engaged in unsafe or unsound practices, is in an unsafe or unsound condition to continue operations or has violated any applicable law, regulation, rule, order or condition imposed by the FDIC or the OCC. The management of Ottawa Savings Bank does

not know of any practice, condition or violation that might lead to termination of deposit insurance.

Federal Reserve System. The Federal Reserve Board regulations require savings associations to maintain noninterest-earning reserves against their transaction accounts (primarily Negotiable Order of Withdrawal “NOW” and regular checking accounts). The amounts are adjusted annually and, for 2015, the regulations provide that reserves be maintained against aggregate transaction accounts as follows: a 3% reserve ratio is assessed on net transaction accounts up to and including \$110.2 million; a 10% reserve ratio is applied above \$110.2 million. The first \$15.2 million of otherwise reservable balances are exempted from the reserve requirements. The Bank complies with the foregoing requirements.

Federal Home Loan Bank System. Ottawa Savings Bank is a member of the Federal Home Loan Bank System, which consists of twelve regional Federal Home Loan Banks. The Federal Home Loan Bank provides a central credit facility primarily for member institutions. Ottawa Savings Bank, as a member of the Federal Home Loan Bank of Chicago, is required to acquire and hold shares of capital stock in that Federal Home Loan Bank. Ottawa Savings Bank had an investment in Federal Home Loan Bank of Chicago stock at December 31, 2015 of \$1.1 million.

The Federal Home Loan Banks are required to provide funds for the resolution of insolvent thrifts in the late 1980s and to contribute funds for affordable housing programs. These requirements, as well as general financial results, could reduce the amount of dividends that the Federal Home Loan Banks pay to their members and could also result in the Federal Home Loan Banks imposing a higher rate of interest on advances to their members. If dividends were reduced, or interest on future Federal Home Loan Bank advances increased, our net interest income would likely also be reduced.

Community Reinvestment Act. Under the Community Reinvestment Act, as implemented by OCC regulations, a savings bank has a continuing and affirmative obligation consistent with its safe and sound operations to help meet the credit needs of its entire community, including low and moderate income neighborhoods. The Community Reinvestment Act does not establish specific lending requirements or programs for financial institutions nor does it limit an institution's discretion to develop the types of products and services that it believes are best suited to its particular community, consistent with the Community Reinvestment Act. The Community Reinvestment Act requires the OCC, in connection with its examination of a savings bank, to assess the institution's record of compliance with the Community Reinvestment Act. In addition, the Equal Credit Opportunity Act and the Fair Housing Act prohibit lenders from discriminating in their lending practices on the basis of characteristics specified in those statutes. A savings bank's failure to comply with the provisions of the Community Reinvestment Act could result in denial of certain corporate applications, such as branches or mergers, or restrictions on its activities. Responsibility for administering the Community Reinvestment Act, unlike other fair lending laws, is not being transferred to the Consumer Financial Protection Bureau. The Bank's most recent Community Reinvestment Act rating was "satisfactory."

Holding Company Regulation

General. Ottawa Savings Bancorp, Inc. and Ottawa Savings Bancorp MHC are savings and loan holding companies within the meaning of federal law. As part of such, they are subject to Federal Reserve Board regulations, examinations, supervision, reporting requirements and regulations concerning corporate governance and activities. In addition, the Federal Reserve Board has enforcement authority over Ottawa Savings Bancorp, Inc. and Ottawa Savings Bancorp MHC. Among other things, this authority permits the Federal Reserve Board to restrict or prohibit activities that are determined to be a serious risk to Ottawa Savings Bank.

As part of the Dodd-Frank Act regulatory restructuring, the responsibilities of the OTS as to savings and loan holding companies were transferred to the Federal Reserve Board on July 21, 2011. The Federal Reserve Board is the agency that regulates bank holding companies.

Restrictions Applicable to Mutual Holding Companies. According to federal law and Federal Reserve Board regulations, a mutual holding company, such as Ottawa Savings Bancorp MHC, may generally engage in the following activities: (1) investing in the stock of a savings association; (2) acquiring a mutual association through the merger of such association into a savings association subsidiary of such holding company or an interim savings association subsidiary of such holding company; (3) merging with or acquiring another holding company, one of whose subsidiaries is a savings association; and (4) any activity approved by the Federal Reserve Board for a bank holding company or financial holding company or previously approved by the Federal Reserve Board for multiple savings and loan holding companies. In addition, mutual holding companies may engage in activities permitted for financial holding companies, expanded the authorized activities. Financial holding companies may engage in a broad array of financial service activities including insurance and securities.

Federal law prohibits a savings and loan holding company, including a federal mutual holding company, from directly or indirectly, or through one or more subsidiaries, acquiring more than 5% of the voting stock of another savings institution, or its holding company, without prior written approval of the Federal Reserve Board. Federal law also prohibits a savings and loan holding company from acquiring more than 5% of a company engaged in activities other than those authorized for savings and loan holding companies by federal law; or acquiring or retaining control of a depository institution that is not insured by the Federal Deposit Insurance Corporation. In evaluating applications by holding companies to acquire savings institutions, the Federal Reserve Board must consider the financial and managerial resources and future prospects of the company and institution involved, the effect of the acquisition on the risk to the insurance funds, the convenience and needs of the community and competitive factors.

The Federal Reserve Board is prohibited from approving any acquisition that would result in a multiple savings and loan holding company controlling savings institutions in more than one state, except: (1) the approval of interstate supervisory acquisitions by savings and loan holding companies; and (2) the acquisition of a savings institution in another state if the laws of the state of the target savings institution specifically permit such acquisitions. The states vary in the extent to which they permit interstate savings and loan holding company acquisitions.

If the savings institution subsidiary of a savings and loan holding company fails to meet the qualified thrift lender test, the holding company must register with the Federal Reserve Board as a bank holding company within one year of the savings institution's failure to so qualify.

Capital Requirements. Savings and loan holding companies with less than \$1 billion in assets are not subject to specific regulatory capital requirements. The Dodd-Frank Act, however, requires the Federal Reserve Board to promulgate consolidated capital requirements for depository institution holding companies that are no less stringent, both quantitatively and in terms of components of capital, than those applicable to institutions themselves.

Source of Strength. The Dodd-Frank Act also extends the “source of strength” doctrine to savings and loan holding companies. The regulatory agencies must issue regulations requiring that all banks and savings and loan holding companies serve as a source of strength to their subsidiary depository institutions by providing capital, liquidity and other support in times of financial stress.

Dividends and Stock Repurchases. The Federal Reserve Board has issued a policy statement regarding the payment of dividends and the repurchase of shares of common stock by bank holding companies that it has made applicable to savings and loan holding companies as well. In general, the policy provides that dividends should be paid only out of current earnings and only if the prospective rate of earnings retention by the holding company appears consistent with the organization’s capital needs, asset quality and overall financial condition. Regulatory guidance provides for prior regulatory review of capital distributions in certain circumstances such as where the company’s net income for the past four quarters, net of dividends previously paid over that period, is insufficient to fully fund the dividend or the company’s overall rate of earnings retention is not consistent with the company’s capital needs and overall financial condition. The ability of a holding company to pay dividends may be restricted if a subsidiary bank becomes undercapitalized. Moreover, a company should inform the Federal Reserve Board reasonably in advance of declaring or paying a dividend that exceeds earnings for the period for which the dividend is being paid. The policy statement also provides for regulatory review prior to a holding company redeeming or repurchasing regulatory capital instruments when the holding company is experiencing financial weaknesses or redeeming or repurchasing common stock or perpetual preferred stock that would result in a net reduction as of the end of a quarter in the amount of such equity instruments outstanding compared with the beginning of the quarter in which the redemption or repurchase occurred. These regulatory policies could affect the ability of the Company to pay dividends, repurchase shares of common stock or otherwise engage in capital distributions.

Stock Holding Company Subsidiary Regulation. The Federal Reserve Board has adopted regulations governing the two-tier mutual holding company form of organization and subsidiary stock holding companies that are controlled by mutual holding companies. Ottawa Savings Bancorp, Inc. is the stock holding company subsidiary of Ottawa Savings Bancorp MHC. Ottawa Savings Bancorp, Inc. is permitted to engage in activities that are permitted for Ottawa Savings Bancorp MHC subject to the same restrictions and conditions.

Waivers of Dividends. Federal Reserve Board regulations currently require mutual holding companies to notify them if they propose to waive receipt of dividends from their stock holding company subsidiary. In addition, the regulations require that the mutual holding company obtain the approval of a majority of the eligible votes of members of the mutual holding company (generally Bank depositors and certain former Twin Oaks borrowers) before it can waive dividends. The Federal Reserve Board reviews dividend waiver notices on a case-by-case basis, and, in general, does not object to a waiver if: (i) the waiver would not be detrimental to the safe and sound operation of the savings association; and (ii) the mutual holding company’s board of directors determines that their waiver is consistent with such directors’ fiduciary duties to the mutual holding company’s members. Subject to the non-objection or approval of the Federal Reserve Board, we anticipate that Ottawa Savings Bancorp MHC will waive dividends that Ottawa Savings Bancorp, Inc. may pay, if any.

Conversion to Stock Form. Federal Reserve Board regulations permit Ottawa Savings Bancorp MHC to convert from the mutual form of organization to the capital stock form of organization. In a conversion transaction, a new holding company would be formed as the successor to Ottawa Savings Bancorp MHC and Ottawa Savings Bancorp, Inc., Ottawa Savings Bancorp MHC's corporate existence would end and certain depositors in the Bank would receive a right to subscribe for shares of a new holding company. In a conversion transaction, each share of common stock of Ottawa Savings Bancorp, Inc. held by stockholders other than Ottawa Savings Bancorp MHC would be automatically converted into a number of shares of common stock of the new holding company based on an exchange ratio designed to ensure that stockholders other than Ottawa Savings Bancorp MHC own the same percentage of common stock in the new holding company as they owned in Ottawa Savings Bancorp, Inc. immediately before conversion. The total number of shares held by stockholders other than Ottawa Savings Bancorp MHC after a conversion transaction would be increased by any purchases by such stockholders in the stock offering conducted as part of the conversion transaction.

Acquisition of Control. Under the federal Change in Bank Control Act, a notice must be submitted to the Federal Reserve Board if any person (including a company), or group acting in concert, seeks to acquire direct or indirect "control" of a savings and loan holding company or savings bank. Under certain circumstances, a change of "control" may occur, and prior notice is required, upon the acquisition of 10% or more of the voting stock of a savings and loan holding company or savings institution, unless the Federal Reserve Board has found that the acquisition will not result in a change of control. Under the Change in Bank Control Act, the Federal Reserve Board has 60 days from the filing of a complete notice to act, taking into consideration certain factors, including the financial and managerial resources of the acquirer and the anti-trust effects of the acquisition. Any company that so acquires control would then be subject to regulation as a savings and loan holding company.

Federal Securities Laws

Ottawa Savings Bancorp, Inc. common stock is registered with the Securities and Exchange Commission under the Securities Exchange Act of 1934. Ottawa Savings Bancorp, Inc. is subject to the information, proxy solicitation, insider trading restrictions and other requirements under the Securities Exchange Act of 1934.

The registration, under the Securities Act of 1933, of the shares of common stock does not cover the resale of those shares. Shares of common stock purchased by persons who are not affiliates of Ottawa Savings Bancorp, Inc. may be resold without registration. Shares purchased by an affiliate of Ottawa Savings Bancorp, Inc. will be subject to the resale restrictions of Rule 144 under the Securities Act of 1933. If Ottawa Savings Bancorp, Inc. meets the current public information requirements of Rule 144, each affiliate of Ottawa Savings Bancorp, Inc. that complies with the other conditions of Rule 144, including those that require the affiliate's sale to be aggregated with those of other persons, would be able to sell in the public market, without registration, a number of shares not to exceed, in any three-month period, the greater of 1% of the outstanding shares of Ottawa Savings Bancorp, Inc., or the average weekly volume of trading in the shares during the preceding four calendar weeks. In the future, Ottawa Savings Bancorp, Inc. may permit affiliates to have their shares registered for sale under the Securities Act of 1933.

FEDERAL AND STATE TAXATION

Federal Income Taxation

General. We report our income on a fiscal year basis using the accrual method of accounting. The federal income tax laws apply to us in the same manner as to other corporations with some exceptions, including particularly our reserve for bad debts discussed below. The following discussion of tax matters is intended only as a summary and does not purport to be a comprehensive description of the tax rules applicable to us. Our federal income tax returns have been either audited or closed under the statute of limitations through tax year 2011. Ottawa Savings Bank's maximum federal income tax rate was 35% for both the 2015 and 2014 tax year.

Ottawa Savings Bancorp, Inc. has filed a consolidated federal income tax return with Ottawa Savings Bank. Accordingly, it is anticipated that any cash distributions made by Ottawa Savings Bancorp, Inc. to its stockholders would be treated as cash dividends and not as a non-taxable return of capital to stockholders for federal and state tax purposes.

Bad Debt Reserves. For fiscal years beginning before June 30, 1996, thrift institutions that qualified under certain definitional tests and other conditions of the Internal Revenue Code were permitted to use certain favorable provisions to calculate their deductions from taxable income for annual additions to their bad debt reserve. A reserve could be established for bad debts on qualifying real property loans, generally secured by interests in real property improved or to be improved, under the percentage of taxable income method or the experience method. The reserve for non-qualifying loans was computed using the experience method. Federal legislation enacted in 1996 repealed the reserve method of accounting for bad debts for institutions with assets in excess of \$500 million and the percentage of taxable income method for all institutions for tax years beginning after 1995 and requires savings institutions to recapture or take into income certain portions of their accumulated bad debt reserves. Approximately \$2.3 million of our accumulated bad debt reserves would not be recaptured into taxable income unless Ottawa Savings Bank makes a “non-dividend distribution” to Ottawa Savings Bancorp, Inc. as described below.

Distributions. If Ottawa Savings Bank makes “non-dividend distributions” to Ottawa Savings Bancorp, Inc., the distributions will be considered to have been made from Ottawa Savings Bank’s un-recaptured tax bad debt reserves, to the extent of the “non-dividend distributions,” and then from Ottawa Savings Bank’s supplemental reserve for losses on loans, to the extent of those reserves, and an amount based on the amount distributed, but not more than the amount of those reserves, will be included in Ottawa Savings Bank’s taxable income. Non-dividend distributions include distributions in excess of Ottawa Savings Bank’s current and accumulated earnings and profits, as calculated for federal income tax purposes, distributions in redemption of stock, and distributions in partial or complete liquidation. Dividends paid out of Ottawa Savings Bank’s current or accumulated earnings and profits will not be so included in Ottawa Savings Bank’s taxable income.

The amount of additional taxable income triggered by a non-dividend is an amount that, when reduced by the tax attributable to the income, is equal to the amount of the distribution. Therefore, if Ottawa Savings Bank makes a non-dividend distribution to Ottawa Savings Bancorp, Inc., approximately one and one-half times the amount of the distribution not in excess of the amount of the reserves would be includable in income for federal income tax purposes, assuming a 34% federal corporate income tax rate. Ottawa Savings Bank does not intend to pay dividends that would result in a recapture of any portion of its bad debt reserves.

Tax Allocation Agreement. Ottawa Savings Bancorp, Inc. and Ottawa Savings Bank have executed a Tax Allocation Agreement. The purpose of this agreement is to set forth the rights and obligations of Ottawa Savings Bancorp, Inc. and Ottawa Savings Bank for purposes of filing consolidated federal and state combined income tax returns.

Under the Tax Allocation Agreement, Ottawa Savings Bancorp, Inc. and Ottawa Savings Bank calculate their federal and state income tax liabilities as if they were filing a separate tax return. If there is tax liability calculated on this separate entity basis, Ottawa Savings Bank pays that tax liability to Ottawa Savings Bancorp, Inc. Payments are made no earlier than five days prior to the time that Ottawa Savings Bancorp, Inc. is required to make either estimated or final tax payments for the consolidated or combined return. If Ottawa Savings Bank has a taxable loss for a year on a separate entity basis, and if that loss could have been carried back to obtain a refund, Ottawa Savings Bancorp, Inc. pays an amount equal to such refund to Ottawa Savings Bank, whether or not any such refund is actually received on a consolidated or combined basis. If that taxable loss would not have resulted in a refund on a separate entity basis because there was no carry-back available, but that loss is used on the consolidated or combined return to reduce tax liability on a consolidated or combined basis, Ottawa Savings Bancorp, Inc. pays Ottawa Savings Bank an amount equal to the tax savings from using that loss.

Ottawa Savings Bank is required to contribute to Ottawa Savings Bancorp, Inc. its share of any required estimated tax payments. When the consolidated or combined return is actually filed, if the estimated payments by Ottawa Savings Bank to Ottawa Savings Bancorp, Inc. exceed the amount of Ottawa Savings Bank's tax liability on a separate entity basis, Ottawa Savings Bancorp, Inc. will refund the excess to Ottawa Savings Bank. If Ottawa Savings Bank's tax liability on a separate entity basis exceeds the estimated payments it has paid to Ottawa Savings Bancorp, Inc., Ottawa Savings Bank will pay the deficiency to Ottawa Savings Bancorp, Inc.

State Taxation

Ottawa Savings Bancorp, Inc. is subject to the Illinois Income Tax and the Illinois Personal Property Tax Replacement Income Tax, at the rates of 5.25% and 2.5%, respectively, for the fiscal year 2015 as compared to 7.0% and 2.5%, respectively, for the fiscal year 2014. These taxes are imposed on our federal taxable income, with certain adjustments.

ITEM 1A. RISK FACTORS

Our allowance for loan losses may prove to be insufficient to absorb potential losses in our loan portfolio.

We established our allowance for loan losses and maintain it at a level considered adequate by management to absorb loan losses that are inherent in the portfolio. The amount of future loan losses is susceptible to changes in economic, operating and other conditions, including changes in interest rates, which may be beyond our control, and such losses may exceed current estimates. At December 31, 2015, our allowance for loan losses as a percentage of total gross loans was 1.56% and as a percentage of total non-performing loans was approximately 44.00%. Because of the concentration of one-to-four family, non-residential and commercial loans in our loan portfolio, the movement of a small number of loans to non-performing status can have a significant impact on this ratio. Although management believes that the allowance for loan losses as of December 31, 2015 was adequate to absorb losses on any existing loans that may become uncollectible, in light of the current economic environment, we cannot predict loan losses with certainty, and we cannot assure you that our allowance for loan losses will prove sufficient to cover actual loan losses in the future, particularly if economic conditions worsen beyond what management currently expects. Additional provisions to the allowance for loan losses and loan losses in excess of our allowance for loan losses may adversely affect our business, financial condition and results of operations. For additional details, see “Management’s Discussion and Analysis of Financial Condition and Results of Operation -- Comparison of Financial Condition at December 31, 2015 and December 31, 2014-- Provision for Loan Losses.”

Our origination or purchase of non-residential real estate, multi-family, commercial or construction loans may expose us to increased lending risks.

Our loan portfolio includes non-residential real estate, multi-family, commercial and construction loans. We intend to continue to underwrite loans of this nature when it is prudent to do so from a business standpoint as long as the loans fall within internal policy limits and enable us to remain in compliance with regulatory guidelines and limits. These types of loans generally expose a lender to greater risk of non-payment and loss than one-to-four family residential mortgage loans because repayment of the loans often depends on the successful operation of the property and the income stream of the borrowers. Such loans typically involve larger loan balances to single borrowers or groups of related borrowers compared to one-to-four family residential mortgage loans. Also, many of these types of borrowers have more than one loan outstanding with us. Consequently, an adverse development with respect to one loan or one credit relationship can expose us to a significantly greater risk of loss compared to an adverse development with respect to a one- to-four family residential mortgage loan.

Fiscal challenges facing the U.S government could negatively impact financial markets which in turn could have an adverse effect on our financial position or results of operations.

Many of our investment securities are issued by the U.S. government and government agencies and sponsored entities. As a result of uncertain domestic political conditions, including the recent federal government shutdown and potential future federal government shutdowns, the possibility of the federal government defaulting on its obligations for a period of time due to debt ceiling limitations or other unresolved political issues, investments in financial instruments issued or guaranteed by the federal government pose liquidity risks. In 2011, Standard & Poor's lowered its long term sovereign credit rating on the U.S. from AAA to AA+. A further downgrade or a downgrade by other rating agencies, as well as sovereign debt issues facing the governments of other countries, could have a material adverse impact on financial markets and economic conditions in the U.S. and worldwide. Additionally, the U.S. government and the governments of other countries took steps to stabilize the financial system, including investing in financial institutions, and implementing programs to improve general economic conditions, but there can be no assurances that these efforts will restore long-term stability and that they will not result in adverse unintended consequences.

Fluctuations in interest rates could reduce our profitability and affect the value of our assets.

Short-term market interest rates (which we use as a guide to price our deposits) remain near historically low levels, and longer-term market interest rates (which we use as a guide to price our longer-term loans) have been volatile since rising during the latter part of 2013 from historically low levels. In recent years the Federal Reserve Board's policy has been to maintain interest rates at historically low levels through its targeted federal funds rate and the purchase of mortgage-backed securities. As a result, market interest rates on the loans we have originated and the yields on securities we have purchased have been at historically low levels for several years. For the year ended December 31, 2015, our interest rate spread was 3.54% compared to 3.65% for the year ended December 31, 2014. Our ability to lower our interest expense is limited at current interest rate levels while the average yield on our interest-earning assets may continue to decrease. A continuation of a low interest rate environment will likely continue to adversely affect our net interest income, which would likely have an adverse effect on our profitability. If short-term interest rates rise, and if rates on our deposits re-price upwards faster than the rates on our long-term loans and investments, we would experience compression of our interest rate spread and net interest margin, which would have a negative effect on our profitability. Decreases in interest rates can result in increased prepayments of loans and mortgage-related securities, as borrowers refinance to reduce their borrowing costs. Under these circumstances, we are subject to reinvestment risk as we may have to re-deploy such loan or securities proceeds into lower-yielding assets, which might also negatively impact our income.

Strong competition within our market area could hurt our profits and slow growth.

We face intense competition both in making loans and attracting deposits. This competition has made it more difficult for us to make new loans and at times has forced us to offer higher deposit rates. Price competition for loans and

deposits might result in us earning less on our loans and paying more on our deposits, which reduces net interest income. According to data obtained from the FDIC, as of June 30, 2015, we held approximately 6.5% of all bank and thrift deposits in LaSalle County, which was the 6th largest market share of deposits out of 24 financial institutions (excluding credit unions) in LaSalle County. For Grundy County, we held approximately 1.5% of all bank and thrift deposits which was the 12th largest market share of deposits out of 13 financial institutions (excluding credit unions). We face substantial competition from the other financial institutions that operate in our market area, most of which have substantially greater resources and lending limits than we have and may offer services that we do not provide. We expect competition to increase in the future as a result of legislative, regulatory and technological changes and the continuing trend of consolidation in the financial services industry. Our profitability depends upon our continued ability to compete successfully in our market area.

Our small size makes it more difficult for us to compete.

Our small asset size makes it more difficult to compete with other financial institutions which are generally larger and can more easily afford to invest in the marketing and technologies needed to attract and retain customers. Because our principal source of income is the net interest income we earn on our loans and investments after deducting interest paid on deposits and other sources of funds, our ability to generate the revenues needed to cover our expenses and finance such investments is limited by the size of our loan and investment portfolios. Accordingly, we are not always able to offer new products and services as quickly as our competitors. Our ability to originate larger loans is limited by our lower loans to one borrower limit, which reduces our ability to compete for certain types of loans and can reduce our interest income. Our lower earnings also make it more difficult to offer competitive salaries and benefits. In addition, our smaller customer base makes it difficult to generate meaningful non-interest income. Finally, as a smaller institution, we are disproportionately affected by the ongoing increased costs of compliance with banking and other regulations.

We may not realize estimated cost savings following the completion of mergers and acquisitions.

The success of the December 2014 merger with Twin Oaks Savings Bank, and of any future mergers and acquisitions, may depend, in part, on our ability to realize the estimated cost savings from combining Twin Oaks and other acquired entities with our existing operations. It is possible that the potential cost savings could turn out to be more difficult to achieve than anticipated. The cost savings estimates also depend on the ability to combine the business in a manner that permits those cost savings to be realized. If the estimates turn out to be incorrect, or if there is an inability to combine successfully, the anticipated cost savings may not be realized fully or at all, or may take longer to realize than expected.

Successfully integrating acquired businesses with our operations may be more difficult, costly or time-consuming than expected and may result in a loss of customers.

It is possible that the process of merger integration could result in the loss of key employees, the disruption of ongoing business or inconsistencies in standards, controls, procedures and policies that adversely impact our ability to maintain relationships with clients and employees or to achieve the anticipated benefits of the merger or acquisition. There also may be disruptions that cause us to lose customers or cause customers to withdraw their deposits. Customers may also not readily accept changes to their banking arrangements or other customer relationships after the merger or acquisition, which may adversely impact our results of operations.

Our expansion strategy may negatively impact our earnings.

We consider our primary market area to consist of LaSalle and Grundy Counties, Illinois. We currently operate three branches with our headquarters located in Ottawa, Illinois. We also have branch locations in Marseilles and Morris, Illinois. We may expand our presence throughout our market area and pursue further expansion through the establishment of one or more branches. The profitability of any expansion policy will depend on whether the income that we generate from the additional branches we may establish will offset the increased expenses resulting from operating new branches. It may take a period of time before any new branches would become profitable, especially in areas in which we do not have an established presence. During this period, operating any new branches would likely have a negative impact on our net income.

The loss of any one of our senior executive officers could hurt our operations.

We rely heavily on our senior executive officers. The loss of any one of these officers could have an adverse effect on us because, as a small community bank, each of these officers has more responsibilities than would be typical at a larger financial institution with more employees. In addition, as a small community bank, we have fewer management level personnel who are in a position to assume the responsibilities of such officers' positions with us should we need to find replacements for any of these senior members of management.

Our geographic concentration means that our performance may be affected by economic, regulatory and demographic conditions in our market area.

As of December 31, 2015, most of our total loans were to individuals and/or secured by properties located in our primary market area of LaSalle and Grundy Counties in Illinois. As a result, our revenues and profitability are subject to prevailing economic, regulatory, demographic and other conditions in LaSalle County. Because our business is concentrated in this area, adverse economic, regulatory, demographic or other developments that are limited to this area may have a disproportionately greater effect on us than they would have if we did business in markets outside that particular geographic area.

The value of our goodwill and other intangible assets may decline in the future.

As of December 31, 2015, we had \$650,000 of goodwill and \$737,000 of other intangible assets. A significant decline in our expected future cash flows, a significant adverse change in the business climate, slower growth rates or a significant and sustained decline in the price of our common stock, any or all of which could be materially impacted by many of the risk factors discussed herein, may necessitate our taking charges in the future related to the impairment of our goodwill. Future regulatory actions could also have a material impact on assessments of goodwill for impairment. If the fair value of our net assets improves at a faster rate than the market value of our reporting units, or if we were to experience increases in book values of a reporting unit in excess of the increase in fair value of equity, we may also have to take charges related to the impairment of our goodwill. If we were to conclude that a future write-down of our goodwill is necessary, we would record the appropriate charge, which could have a material adverse effect on our results of operations.

Identifiable intangible assets other than goodwill consist of core deposit intangibles and mortgage servicing rights. Adverse events or circumstances could impact the recoverability of these intangible assets including loss of core deposits, increased competition or adverse changes in the economy. To the extent these intangible assets are deemed unrecoverable, a non-cash impairment charge would be recorded, which could have a material adverse effect on our results of operations.

If the value of real estate in LaSalle and Grundy County, Illinois were to decline materially, a significant portion of our loan portfolio could become under-collateralized, which could have a material adverse effect on us.

With most of our loans concentrated in LaSalle and Grundy County, Illinois, a continued decline in local economic conditions could adversely affect the value of the real estate collateral securing our loans. A further decline in property values would further diminish our ability to recover on defaulted loans by selling the real estate collateral, making it more likely that we would suffer losses on defaulted loans. Additionally, decreases in asset quality have required and may require further additions to our allowance for loan losses through increased provisions for loan losses, which would hurt our profits. Also, a continued decline in local economic conditions may have a greater effect on our earnings and capital than on the earnings and capital of larger financial institutions whose real estate loan portfolios are more geographically diverse. Real estate values are affected by various factors in addition to local economic conditions, including, among other things, changes in general or regional economic conditions, governmental rules or policies and natural disasters.

Ineffective liquidity management could adversely affect our financial results and condition.

Effective liquidity management is essential for the operation of our business. We require sufficient liquidity to meet customer loan requests, customer deposit maturities/withdrawals, payments on our debt obligations as they come due and other cash commitments under both normal operating conditions and other unpredictable circumstances causing industry or general financial market stress. Our access to funding sources in amounts adequate to finance our activities on terms that are acceptable to us could be impaired by factors that affect us specifically or the financial services industry or economy generally. Factors that could detrimentally impact our access to liquidity sources include a downturn in the geographic markets in which our loans and operations are concentrated or difficult credit markets. Our access to deposits may also be affected by the liquidity needs of our depositors. In particular, a majority of our liabilities during 2015 were checking accounts and other liquid deposits, which are payable on demand or upon several days' notice, while by comparison, a substantial majority of our assets were loans, which cannot be called or sold in the same time frame. Although we have historically been able to replace maturing deposits and advances as necessary, we might not be able to replace such funds in the future, especially if a large number of our depositors seek to withdraw their accounts, regardless of the reason. A failure to maintain adequate liquidity could materially and adversely affect our business, results of operations or financial condition.

We are a community bank and our ability to maintain our reputation is critical to the success of our business. The failure to do so may adversely affect our performance.

We are a community bank and our reputation is one of the most valuable assets of our business. A key component of our business strategy is to rely on our reputation for customer service and knowledge of local markets to expand our presence by capturing new business opportunities from existing and prospective customers in our market area and

contiguous areas. As such, we strive to conduct our business in a manner that enhances our reputation. This is done, in part, by recruiting, hiring and retaining employees who share our core values of being an integral part of the communities we serve, delivering superior service to our customers and caring about our customers. If our reputation is negatively affected by the actions of our employees, by our inability to conduct our operations in a manner that is appealing to current or prospective customers or otherwise, our business and operating results may be materially adversely affected.

We continually encounter technological change, and we may have fewer resources than our competitors to continue to invest in technological improvements.

The financial services industry continues to undergo rapid technological changes, with frequent introductions of new technology-driven products and services. In addition to serving customers better, the effective use of technology increases efficiency and enables financial institutions to reduce costs. Our future success may depend, in part, upon our ability to address the needs of our customers by using technology to provide products and services that will satisfy customer demands for convenience, as well as to create additional efficiencies in our operations. Many of our competitors have substantially greater resources to invest in technological improvements. We cannot assure you that we will be able to effectively implement new technology-driven products and services or be successful in marketing these products and services to our customers.

An interruption in or breach in security of our information systems may result in a loss of customer business.

We rely heavily on communications and information systems to conduct our business, and while we have established policies and procedures to prevent or limit the impact of system failures, interruptions, or security breaches, there can be no guarantees that such events will not occur or that they will be adequately addressed if they do. In addition, we outsource certain aspects of our data processing and other operational functions to third-party providers. If our third-party providers encounter difficulties, or if we are unable to communicate with them, our ability to adequately process and account for transactions could be affected, and our business operations could be adversely impacted. The occurrence of any failures, interruptions, or security breaches to our systems or those of our third-party providers could result in a loss of customer business, additional regulatory scrutiny, and exposure to legal liability, which would have a material adverse effect on our business, financial condition, results of operations and cash flows.

Cyber-attacks or other security breaches could adversely affect our operations, net income or reputation.

We regularly collect, process, transmit and store significant amounts of confidential information regarding our customers, employees and others and concerning our own business, operations, plans and strategies. In some cases, this confidential or proprietary information is collected, compiled, processed, transmitted or stored by third parties on our behalf.

Information security risks have generally increased in recent years because of the proliferation of new technologies, the use of the Internet and telecommunications technologies to conduct financial and other transactions and the increased sophistication and activities of perpetrators of cyber-attacks and mobile phishing. Mobile phishing, a means for identity thieves to obtain sensitive personal information through fraudulent e-mail, text or voice mail, is an emerging threat targeting the customers of popular financial entities. A failure in or breach of our operational or information security systems, or those of our third-party service providers, as a result of cyber-attacks or information security breaches or due to employee error, malfeasance or other disruptions could adversely affect our business, result in the disclosure or misuse of confidential or proprietary information, damage our reputation, increase our costs and/or cause losses.

If this confidential or proprietary information were to be mishandled, misused or lost, we could be exposed to significant regulatory consequences, reputational damage, civil litigation and financial loss.

Although we employ a variety of physical, procedural and technological safeguards to protect this confidential and proprietary information from mishandling, misuse or loss, these safeguards do not provide absolute assurance that mishandling, misuse or loss of the information will not occur, and that if mishandling, misuse or loss of information does occur, those events will be promptly detected and addressed. Similarly, when confidential or proprietary

information is collected, compiled, processed, transmitted or stored by third parties on our behalf, our policies and procedures require that the third party agree to maintain the confidentiality of the information, establish and maintain policies and procedures designed to preserve the confidentiality of the information, and permit us to confirm the third party's compliance with the terms of the agreement. As information security risks and cyber threats continue to evolve, we may be required to expend additional resources to continue to enhance our information security measures and/or to investigate and remediate any information security vulnerabilities.

The trading history of our common stock is characterized by low trading volume. The value of your common stock may be subject to sudden decreases due to the volatility of the price of our common stock.

Although our common stock trades on OTC Electronic Bulletin Board, it has not been regularly traded. We cannot predict the extent to which investor interest in us will lead to a more active trading market in our common stock or how liquid that market might become. A public trading market having the desired characteristics of depth, liquidity and orderliness depends upon the presence in the marketplace of willing buyers and sellers of our common stock at any given time, which presence is dependent upon the individual decisions of investors, over which we have no control.

The market price of our common stock may be highly volatile and subject to wide fluctuations in response to numerous factors, including, but not limited to, the factors discussed in other risk factors and the following:

actual or anticipated fluctuations in our operating results;
changes in interest rates;

changes in the legal or regulatory environment in which we operate;
press releases, announcements or publicity relating to us or our competitors or relating to trends in our industry;
changes in expectations as to our future financial performance, including financial estimates or recommendations by securities analysts and investors;
future sales of our common stock;

changes in economic conditions in our marketplace, general conditions in the U.S. economy, financial markets or the banking industry; and other developments affecting our competitors or us.

These factors may adversely affect the trading price of our common stock, regardless of our actual operating performance, and could prevent you from selling your common stock at or above the price at which you purchased shares. In addition, the stock markets, from time to time, experience extreme price and volume fluctuations that may be unrelated or disproportionate to the operating performance of companies. These broad fluctuations may adversely affect the market price of our common stock, regardless of our trading performance.

We operate in a highly regulated environment and we may be adversely affected by changes in laws and regulations.

We are subject to extensive regulation, supervision and examination by the OCC, our chartering authority and the FDIC, as insurer of our deposits. Ottawa Savings Bancorp MHC, Ottawa Savings Bancorp, Inc. and Ottawa Savings Bank are all subject to regulation and supervision by the Federal Reserve Board. Such regulation and supervision governs the activities in which an institution and its holding company may engage, and are intended primarily for the protection of the insurance fund and depositors. Regulatory authorities have extensive discretion in their supervisory and enforcement activities, including the imposition of restrictions on our operations, the classification of our assets and determination of the level of our allowance for loan losses. Any change in such regulation and oversight, whether in the form of regulatory policy, regulations, legislation or supervisory action, may have a material impact on our operations.

Recently enacted financial regulatory reform may have a material impact on our operations.

On July 21, 2010, the President signed into law the Dodd-Frank Act. The Dodd-Frank Act restructures the regulation of depository institutions. Under the Dodd-Frank Act, the OTS, which formerly regulated the Bank, was merged into the OCC. Savings and loan holding companies, including Ottawa Savings Bancorp MHC and Ottawa Savings Bancorp, Inc. are now regulated by the Federal Reserve Board. The Dodd-Frank Act also created a new federal agency to administer consumer protection and fair lending laws, a function that was formerly performed by the depository institution regulators. The federal preemption of state laws that was formerly accorded federally chartered depository institutions has been reduced as well and State Attorneys General now have greater authority to bring a suit against a federally chartered institution, such as Ottawa Savings Bank, for violations of certain state and federal consumer protection laws. The Dodd-Frank Act also imposes consolidated capital requirements on savings and loan holding companies, which may limit our ability to borrow at the holding company and invest the proceeds from such borrowings as capital in Ottawa Savings Bank that could be leveraged to support additional growth. The Dodd-Frank Act contains various other provisions designed to enhance the regulation of depository institutions and prevent the recurrence of a financial crisis such as occurred in 2008-2009. The full impact of the Dodd-Frank Act on our business and operations will not be known for years until regulations implementing the statute are written and adopted. The

Dodd-Frank Act may have a material impact on our operations, particularly through increased regulatory burden and compliance costs.

In addition to the enactment of the Dodd-Frank Act, the federal regulatory agencies recently have begun to take stronger supervisory actions against financial institutions that have experienced increased loan losses and other weaknesses as a result of the current economic crisis. The actions include the entering into of written agreements and cease and desist orders that place certain limitations on their operations. Federal bank regulators recently have also been using with more frequency their ability to impose individual minimal capital requirements on banks, which requirements may be higher than those imposed under the Dodd-Frank Act or which would otherwise qualify the bank as being “well capitalized” under the OCC’s prompt corrective action regulations. If we were to become subject to a supervisory agreement or higher individual capital requirements, such action may have a negative impact on our ability to execute our business plans, as well as our ability to grow, pay dividends or engage in mergers and acquisitions and may result in restrictions in our operations. See “Regulation and Supervision – Federal Banking Regulation – Capital Requirements” for a discussion of regulatory capital requirements.

The Federal Reserve Board has adopted an interim final rule which requires Ottawa Savings Bancorp, MHC to notify the Federal Reserve Board if it proposes to waive receipt of dividends from the Company. In addition, the regulations also require that Ottawa Savings Bancorp, MHC obtain the approval of a majority of the eligible votes of members of the Ottawa Savings Bancorp, MHC (generally Bank depositors and certain former Twin Oaks borrowers) before it can waive dividends. For a grandfathered company such as Ottawa Savings Bancorp, MHC that waived dividends prior to December 1, 2009, the Federal Reserve Board may not object to a dividend waiver request if the board of directors of the mutual holding company expressly determines that a waiver of the dividend is consistent with its fiduciary duties to members and the waiver would not be detrimental to the safe and sound operation of the savings association subsidiaries of the holding company. The Federal Reserve Board’s interim final rule regarding dividend waiver requests is subject to comment and there can be no assurances as to the timing of changes to the interim final rule, if any, the form of the final dividend waiver regulations or the effect of such regulations on Ottawa Savings Bancorp, MHC’s ability to waive dividends.

While Ottawa Savings Bancorp, MHC is grandfathered for purposes of the Federal Reserve Board dividend waiver regulations, we cannot assure that the Federal Reserve Board will grant dividend waiver requests in the future and, if granted, there can be no assurance as to the conditions, if any, the Federal Reserve Board will place on future dividend waiver requests. The denial of a dividend waiver request or the imposition of burdensome conditions on an approval of a waiver request may significantly limit the amount of dividends the Company pays in the future, if any.

The fiscal and monetary policies of the federal government and its agencies could have a material adverse effect on our earnings.

The Board of Governors of the Federal Reserve System regulates the supply of money and credit in the United States. Its policies determine in large part the cost of funds for lending and investing and the return earned on those loans and investments, both of which affect the net interest margin. The resultant changes in interest rates can also materially decrease the value of certain financial assets we hold, such as debt securities. Its policies can also adversely affect borrowers, potentially increasing the risk that they may fail to repay their loans. Changes in Federal Reserve Board policies are beyond our control and difficult to predict; consequently, the impact these changes on our activities and results of operations is difficult to predict.

We may be subject to more stringent capital requirements.

In July 2013, the OCC and the Federal Reserve Board approved a new rule that will substantially amend the regulatory risk-based capital rules applicable to Ottawa Savings Bank and Ottawa Savings Bancorp, Inc. The final rule implements the “Basel III” regulatory capital reforms and changes required by the Dodd-Frank Act.

The final rule includes new minimum risk-based capital and leverage ratios, which became effective for Ottawa Savings Bank and Ottawa Savings Bancorp, Inc. on January 1, 2015, and refines the definition of what constitutes “capital” for purposes of calculating these ratios. The new minimum capital requirements are: (i) a new common equity Tier 1 capital ratio of 4.5%; (ii) a Tier 1 to risk-based assets capital ratio of 6% (increased from 4%); (iii) a total capital ratio of 8% (unchanged from current rules); and (iv) a Tier 1 leverage ratio of 4%. The final rule also establishes a “capital conservation” buffer of 2.5%, and will result in the following minimum ratios: (i) a common equity Tier 1 capital ratio of 7%; (ii) a Tier 1 to risk-based assets capital ratio of 8.5%; and (iii) a total capital ratio of 10.5%. The new capital conservation buffer requirement will be phased in beginning in January 2016 at 0.625% of risk-weighted assets and will increase each year until fully implemented in January 2019. An institution will be subject to limitations on paying dividends, engaging in share repurchases, and paying discretionary bonuses if its capital level falls below the buffer amount. These limitations will establish a maximum percentage of eligible retained income that can be utilized for such actions.

The application of more stringent capital requirements for Ottawa Savings Bank and Ottawa Savings Bancorp, Inc. could among other things, result in lower returns on equity, require the raising of additional capital, and result in regulatory actions constraining us from paying dividends or repurchasing shares if we were unable to comply with such requirements.

Rulemaking changes implemented by the CFPB will result in higher regulatory and compliance costs that may adversely affect our results of operations.

The Dodd-Frank Act created a new, independent federal agency, the CFPB, which was granted broad rulemaking, supervisory and enforcement powers under various federal consumer financial protection laws. The CFPB also has examination and primary enforcement authority with respect to depository institutions with \$10 billion or more in assets, their service providers and certain non-depository entities such as debt collectors and consumer reporting agencies. Since its formation, the CFPB has finalized a number of significant rules that could have a significant impact on our business and the financial services industry more generally. In particular, the CFPB has adopted rules impacting nearly every aspect of the lifecycle of a residential mortgage loan as discussed in the “Supervision and Regulation” section of Item 1. “Business” of this Annual Report on Form 10-K above. The CFPB has also issued guidance which could radically reshape the automotive financing industry by subjecting indirect auto lenders to regulation as creditors under the Equal Credit Opportunity Act, which would make indirect auto lenders monitor and control certain credit policies and procedures undertaken by auto dealers. Compliance with the rules and policies adopted by the CFPB may limit the products we may permissibly offer to some or all of our customers, or limit the terms on which those products may be issued, or may adversely affect our ability to conduct our business as previously conducted (including our residential mortgage and indirect auto lending businesses in particular). We may also be required to add additional compliance personnel or incur other significant compliance-related expenses. Our business, results of operations or competitive position may be adversely affected as a result.

ITEM 1B. UNRESOLVED STAFF COMMENTS

None.

ITEM 2. PROPERTIES

The Company is located and conducts its business at the Bank's main office at 925 LaSalle Street, Ottawa, Illinois 61350. The Company owns the building. The Company believes that the current facility is adequate to meet its present and immediately foreseeable needs. Additionally, the Bank has branch offices in Marseilles and Morris, Illinois.

The following table sets forth certain information relating to these facilities at December 31, 2015.

Location	Year Opened/ Acquired	Net Book Value at December 31, 2015	Square Footage	Owned/ Leased	Date of Lease Expiration
925 LaSalle Street, Ottawa, IL 61350	1958	\$6,118,800	21,000	Owned	N/A
125 West Bluff Street, Marseilles IL 61341	2014	\$293,203	3,286	Owned	N/A
1508 Creek Drive, Morris IL 60450	2014	\$360,186	2,729	Owned	N/A

ITEM 3. LEGAL PROCEEDINGS

The Company and the Bank are not involved in any pending proceedings other than legal proceedings occurring in the ordinary course of business. Such legal proceedings, in the aggregate, are believed by management to be immaterial to the Company's business, financial condition, results of operations and cash flows.

ITEM 4. MINE SAFETY PROCEEDINGS

Not applicable.

PART II**ITEM 5. MARKET FOR REGISTRANT'S COMMON EQUITY, RELATED STOCKHOLDER MATTERS AND ISSUER PURCHASES OF EQUITY SECURITIES**

The Company's common stock is traded on the Over-the-Counter ("OTC") Bulletin Board under the symbol "OTTW". At December 31, 2015, the Company had 304 record holders of its common stock. The table below shows the reported high and low sale price of the common stock, as reported on the OTC Bulletin Board and dividends declared during the periods indicated in 2015 and 2014. Quotations reflect inter-dealer prices without mark-up, mark-down or commissions, and may not represent actual transactions.

	2015		2014			
	High	Low	Dividends Declared	High	Low	Dividends Declared
First quarter	\$ 11.59	\$ 9.50	\$ -	\$ 8.90	\$ 8.50	\$ -
Second quarter	\$ 12.00	\$ 10.00	\$ -	\$ 9.50	\$ 8.40	\$ -
Third quarter	\$ 11.84	\$ 9.99	\$ -	\$ 10.00	\$ 9.00	\$ -
Fourth quarter	\$ 11.00	\$ 9.81	\$ -	\$ 10.00	\$ 9.50	\$ -

Dividend Policy

The Company paid no cash dividends during 2015 or 2014. On August 18, 2011, the Company announced that the Board of Directors voted to suspend the equity cash dividend on the Company's common stock in an effort to conserve capital, and that the board intended to reevaluate the payment of a quarterly dividend on a quarter-by-quarter basis. The Board of Directors will declare dividends upon consideration of a number of factors, including capital requirements, the Company's and the Bank's financial condition and results of operations, tax considerations, statutory and regulatory limitations and general economic conditions. No assurances can be given that any dividends will be paid or that, if paid, will not be reduced or eliminated in future periods. Special cash dividends, stock dividends or returns of capital may, to the extent permitted by regulations, be paid in addition to, or in lieu of, regular cash dividends. The Company has filed consolidated tax returns with the Bank. Accordingly, it is anticipated that any future cash distributions made by the Company to its stockholders would be treated as cash dividends and not as a

nontaxable return of capital for federal and state income tax purposes.

Dividends from the Company will depend, in large part, upon receipt of dividends from the Bank and ability of the MHC to waive the receipt of dividends paid by the Company to its shareholders. Federal and state law imposes certain limitations on dividends by savings banks and the waiver of receipt of dividends by mutual holding companies. See “*Item 1. Business.*” and “*Item 1A. Risk Factors.*”

Issuer Purchases

There were no shares purchased by the Company during 2015.

ITEM 6. SELECTED FINANCIAL DATA

The following tables set forth selected financial and other data of the Company for the periods and at the dates indicated. The information should be read in conjunction with the Consolidated Financial Statements and Notes beginning on page F-1.

At December 31,
2015 2014 2013
(In Thousands, except per
share data)

Financial Condition Data:

Total Assets	\$213,563	\$221,725	\$170,610
Loans, net (1)	140,110	142,502	110,673

Allowance for loan losses to gross loans outstanding	1.56		1.59		2.52	
Non-performing loans to gross loans	3.55		4.15		5.10	
Non-performing assets to total assets (5)	2.52		2.86		3.80	
Other Data:						
Number of full-service offices	3		3		1	

- (1) The net interest rate spread represents the difference between the weighted average yield on interest-earning assets and the weighted average cost of interest-bearing liabilities.
- (2) The net interest margin represents net interest income as a percent of average interest-earning assets.
- (3) The efficiency ratio represents other expense as a percent of net interest income before the provision for loan losses and other income.
- (4) Regulatory capital ratios are based on BASEL III capital standards for 2015 and BASEL I standards for 2014 and 2013.
- (5) Non-performing assets consist of non-performing loans and foreclosed real estate. Non-performing loans consist of all loans 90 days or more past due and all loans no longer accruing interest.

ITEM 7. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATION

General

This discussion and analysis reflects the Company's consolidated financial statements and other relevant statistical data, and is intended to enhance your understanding of our financial condition and results of operations. The information in this section has been derived from and should be read in conjunction with the consolidated financial statements and notes to the consolidated financial statements, which appear beginning on page F-1.

Our results of operations depend primarily on our net interest income. Net interest income is the difference between the interest income we earn on our interest-earning assets, consisting primarily of loans, investment securities, mortgage-backed securities and other interest-earning assets (primarily cash and cash equivalents), and the interest we pay on our interest-bearing liabilities, consisting of money market accounts, passbook savings accounts, individual retirement accounts and certificates of deposit. Our results of operations also are affected by our provisions for loan losses, non-interest income and non-interest expense. Non-interest income currently consists primarily of fees, service charges, and gains on the sale of loans. Non-interest expense currently consists primarily of salaries and employee benefits, deposit insurance premiums, directors' fees, occupancy, data processing and professional fees. Our results of operations also may be affected significantly by general and local economic and competitive conditions, changes in market interest rates, governmental policies and actions of regulatory authorities.

Critical Accounting Policies

We consider accounting policies involving significant judgments and assumptions by management that have, or could have, a material impact on the carrying value of certain assets or on income to be critical accounting policies. We consider the allowance for loan losses to be our critical accounting policy.

Allowance for Loan Losses. The allowance for loan losses is an amount necessary to absorb known or inherent losses that are both probable and reasonably estimable and is established through a provision for loan losses charged to earnings. Loan losses are charged against the allowance when management believes the uncollectibility of a loan balance is confirmed. Subsequent recoveries, if any, are credited to the allowance. The allowance for loan losses is evaluated on a regular basis by management and is based upon management's periodic review of the collectibility of the loans in light of historical experience, the nature and volume of the loan portfolio, adverse situations that may affect each borrower's ability to repay, estimated value of any underlying collateral and prevailing economic conditions. This evaluation is inherently subjective as it requires estimates that are susceptible to significant revision as more information becomes available.

A loan is considered impaired when, based on current information and events, it is probable that we will be unable to collect the scheduled payments of principal or interest when due according to the contractual terms of the loan agreement. Factors considered by management in determining impairment include payment status, collateral value, and the probability of collecting scheduled principal and interest payments when due. Loans that experience insignificant payment delays and payment shortfalls generally are not classified as impaired. Management determines the significance of payment delays and payment shortfalls on a case-by-case basis, taking into consideration all of the circumstances surrounding the loan and the borrower, including the length of the delay, the reasons for the delay, the borrower's prior payment record, and the amount of the shortfall in relation to the principal and interest owed. Impairment is measured on a loan by loan basis for commercial and construction loans by either the present value of expected future cash flows discounted at the loan's effective interest rate, the loan's obtainable market price, or the fair value of the collateral if the loan is collateral dependent.

Comparison of Financial Condition at December 31, 2015 and December 31, 2014

The Company's total assets decreased \$8.1 million, or 3.7%, to \$213.6 million at December 31, 2015, from \$221.7 million at December 31, 2014. The decrease in assets was primarily due to a decrease in loans of \$2.4 million, a decrease in securities available for sale of \$5.8 million, a decrease in non-marketable equity securities of \$0.4 million, a decrease in time deposits of \$0.6 million, and decreases in other assets of \$0.5 million, partially offset by an increase in cash and cash equivalents of \$1.9 million.

Cash and cash equivalents increased \$1.9 million, or 37.4%, to \$7.1 million at December 31, 2015 from \$5.2 million at December 31, 2014, primarily as a result of cash provided by operating activities of \$2.5 million and investing activities of \$8.1 million exceeding cash used in financing activities of \$8.7 million. In addition to a decrease in deposits, the cash used in financing activities includes a principal reduction in Federal Home Loan Bank advances of \$3.3 million.

Federal funds sold decreased \$0.1 million, or 3.5%, to \$1.6 million at December 31, 2015 from \$1.7 million at December 31, 2014.

Securities available for sale decreased \$5.8 million, or 11.0%, to \$47.0 million at December 31, 2015 from \$52.8 million at December 31, 2014. The decrease was primarily due to sales, calls and maturities of \$7.6 million and pay-downs of \$7.1 million, offset by \$9.5 million in purchases.

Loans, net of the allowance for loan losses, decreased \$2.4 million, or 1.7%, to \$140.1 million at December 31, 2015 from \$142.5 million at December 31, 2014. The decrease in loans, net of the allowance for loan losses, was primarily due to a decrease in the purchased auto loan portfolio of \$3.5 million, a decrease in commercial loans of \$0.2 million, a decrease of \$0.1 million in consumer direct loans, and a decrease in non-residential real estate loans of \$0.8 million. The decreases were partially offset by an increase in one-to four family mortgage loans of \$1.1 million and an increase in multi-family loans of \$0.9 million. Additionally, there were normal pay-downs and principal reductions. The Company is focusing its lending efforts on customers based primarily in its local markets.

Foreclosed real estate increased approximately \$0.1 million, or 34.7%, to \$0.3 million at December 31, 2015 from \$0.2 million at December 31, 2014. The increase was primarily due to the addition of 26 properties valued at approximately \$1.2 million acquired through loan foreclosures offset by the sale of 18 properties with proceeds of \$1.2 million and additional valuation adjustments on three properties of approximately \$0.1 million.

Total deposits decreased \$5.5 million, or 3.0%, to \$176.7 million at December 31, 2015, from \$182.2 million at December 31, 2014. The decrease is primarily due to a decrease in certificates of deposit of \$11.4 million, or 11.5%, and a slight decrease in savings account balances of less than \$0.1 million, partially offset by an increase in checking balances of \$5.7 million, or 18.3% and an increase in money market balances of \$0.3 million from December 31, 2014 to December 31, 2015. The decrease in certificates of deposit and the increase in checking and money market balances is due to managements' continued efforts to strategically price interest rates to position the Bank for rising interest rates and customers seeking non-term products as they wait for a better rate environment.

FHLB Advances decreased \$3.3 million, or 61.0%, to \$2.1 million at December 31, 2015, from \$5.5 million at December 31, 2014. The Company made principal payments of \$3.3 million and received no new advances during the year ended December 31, 2015.

Equity increased \$1.0 million, or 3.4% to \$30.7 million at December 31, 2015 from \$29.7 million at December 31, 2014. The increase in equity is primarily a result of net income for the year ended December 31, 2015 of \$0.8 million, and an increase other comprehensive income and other increases totaling approximately \$0.2 million.

Comparison of Results of Operations for the Years Ended December 31, 2015 and December 31, 2014

General. Net income was approximately \$0.8 million for both years ended December 31, 2015 and 2014. Since the Merger occurred at the close of business on December 31, 2014, it had no effect on net income for 2014.

Net Interest Income. The following table summarizes interest and dividend income and interest expense for the years ended December 31, 2015 and 2014.

	2015	2014	\$ change	% change	
	(Dollars in thousands)				
Interest and dividend income:					
Interest and fees on loans	\$6,833	\$5,734	\$ 1,099	19.17	%
Securities:					
Mortgage-backed and related securities	631	527	104	19.73	
State and municipal securities	568	287	281	97.91	
Non-marketable equity securities	8	7	1	14.29	
Interest-bearing deposits	14	3	11	366.67	
Total interest and dividend income	8,054	6,558	1,496	22.81	
Interest expense:					
Deposits	865	952	(87)	(9.14)	
Borrowings	42	1	41	4,100.00	
Total interest expense	907	953	(46)	(4.83)	
Net interest income	\$7,147	\$5,605	\$ 1,542	27.51	%

Net interest income increased \$1.5 million, or 27.51%, to \$7.1 million for the year ended December 31, 2015 compared to \$5.6 million for the year ended December 31, 2014. Interest and dividend income increased \$1.5 million due to the increase in average interest earning assets of \$47.5 million, offset by the yield decreasing on interest earning assets from 4.36% to 4.07%. The increase in earning assets is primarily attributable to the Merger with Twin

Oaks. The yield on the loan portfolio declined as the low rate environment continued during 2015. In addition, average loans increased \$29.8 million as a result of loans added to the Bank's portfolio in connection with the Merger. The increase in net interest income also included a \$46,000, or 4.83%, decrease in interest expense. The cost of funds declined 17 basis points, or 24.3%, for the year ended December 31, 2015 compared to the year ended December 31, 2014, due to the continued low rate environment. Additionally, the average balance of interest bearing liabilities increased by \$37.0 million, or 27.4%, primarily due to the Merger. Net interest margin decreased during the year ended December 31, 2015 to 3.61% compared to 3.72% at December 31, 2014.

Provision for Loan Losses. Management recorded a loss provision of \$0.3 million for the year ended December 31, 2015, compared to \$0.9 million for the year ended December 31, 2014. The provision level is dictated based on activity to the allowance, including charge-offs and recoveries. Managements' assessment of risk in the portfolio is reflected in the qualitative factors, as discussed on page 12. Based on a review of the loans that were in the loan portfolio at December 31, 2015, management believes that the allowance is maintained at a level that represents its best estimate of inherent losses in the loan portfolio that were both probable and reasonably estimable.

Management uses available information to establish the appropriate level of the allowance for loan losses. Future additions or reductions to the allowance may be necessary based on estimates that are susceptible to change as a result of changes in economic conditions and other factors. As a result, our allowance for loan losses may not be sufficient to cover actual loan losses, and future provisions for loan losses could materially adversely affect the Company's operating results. In addition, various regulatory agencies, as an integral part of their examination process, periodically review the Company's allowance for loan losses. Such agencies may require the Company to recognize adjustments to the allowance based on their judgments about information available to them at the time of their examination.

Other Income. The following table summarizes other income for the years ended December 31, 2015 and 2014.

	Years Ended December 31,			
	2015	2014	\$ change	% change
(Dollars in thousands)				
Other income:				
Gain on sale of securities	\$37	\$42	\$ (5)	(11.90)%
Gain on sale of loans	227	56	171	305.36
Gain on sale of OREO	228	84	144	171.43
Gain on sale of repossessed assets	11	17	(6)	(35.29)
Origination of mortgage servicing rights, net of amortization	14	5	9	180.00
Customer service fees	449	304	145	47.70
Income on bank owned life insurance	47	52	(5)	(9.62)
Other	172	110	62	56.36
Total other income	\$1,185	\$670	\$ 515	76.87 %

The increase in total other income was primarily due to increases in gain on sale of loans, increases in customer service fees, and gains on sales of OREO properties. The increase in gain on sale of loans is primarily a result of an increase in loans originated for sale. The increase in gains on sales of OREO properties is primarily due to the sale of 21 OREO properties for gains of approximately \$0.2 million during 2015, compared to the sale of 10 OREO properties for gains of approximately \$0.08 million during 2014. The increase in customer service fees is primarily due to the increase in deposits related to the Merger with Twin Oaks at December 31, 2014.

Other Expenses. The following table summarizes other expenses for the years ended December 31, 2015 and 2014.

	Years Ended December 31,			
	2015	2014	\$ change	% change
(Dollars in thousands)				
Other expenses:				
Salaries and employee benefits	\$3,082	\$1,854	\$ 1,228	66.24 %
Directors fees	163	101	62	61.39
Occupancy	657	507	150	29.59
Deposit insurance premium	179	136	43	31.62
Legal and professional services	354	542	(188)	(34.69)
Data processing	1,423	328	1,095	333.84
Loss on sale of securities	33	17	16	94.12
Valuation adjustments and expenses on foreclosed real estate	172	55	117	212.73
Loss on sale of OREO	23	26	(3)	(11.54)
Loss on sale of repossessed assets	16	3	13	433.33

Other	943	653	290	44.41
Total other expenses	\$7,045	\$4,222	\$ 2,823	66.86 %
Efficiency ratio (1)	84.55 %	67.29 %		

(1) Computed as other expenses divided by the sum of net interest income and other income.

The increase in other expenses was primarily due to the Merger with Twin Oaks effective at close of business on December 31, 2014, as there are now three branch locations to support rather than the one facility that existed before the Merger. Additionally, data processing costs increased because, until mid-May of 2015, we were supporting two core processing systems and have also incurred additional costs related to data conversion of approximately \$0.3 million and approximately \$0.5 million in early termination fees. The increase also includes increases in salaries and employee benefits, resulting from additional staff and directors in connection with the Merger, as well as annual merit increases. The efficiency ratio increased due to increased other expenses for the current period primarily related to the Merger.

Income Taxes. The Company recorded an income tax expense of \$0.2 million for the year ended December 31, 2015, compared to \$0.3 million for the year ended December 31, 2014. The effective tax rates for the years ended December 31, 2015 and 2014 were 24.2% and 30.2%, respectively. The decrease in 2015 compared to 2014 is primarily due to higher tax-exempt interest income in 2015.

Average Balance Sheet

The following table presents for the periods indicated the total dollar amount of interest income from average interest earning assets and the resultant yields, as well as the interest expense on average interest bearing liabilities, expressed both in dollars and rates. No tax equivalent adjustments were made. All average balances are monthly average balances. Non-accruing loans have been included in the table as loans carrying a zero yield. The amortization of loan fees is included in computing interest income; however, such fees are not material.

(1) Includes unamortized discounts and premiums.

(2) Amount is net of deferred loan origination (costs) fees, undisbursed loan funds, unamortized discounts and allowance for loan losses and includes non-performing loans. Loan fees included in interest income were \$126,000, \$149,000, and \$135,000 for 2015, 2014, and 2013, respectively.

(3) Net interest rate spread represents the difference between the yield on average interest-earning assets and the average cost of interest-bearing liabilities.

(4) Net interest margin represents net interest income divided by average interest-earning assets.

Rate/Volume Analysis

The following table shows the dollar amount of changes in interest income and interest expense for major components of interest-earning assets and interest-bearing liabilities. It distinguishes between the changes related to changes in outstanding balances and those due to the changes in interest rates. For each category of interest-earning assets and interest-bearing liabilities, information is provided on changes attributable to (i) changes in volume (i.e., changes in volume multiplied by old rate) and (ii) changes in rate (i.e., changes in rate multiplied by old volume). For purposes of this table, changes attributable to both rate and volume, which cannot be segregated, have been allocated proportionately to the change due to volume and the change due to rate.

Management of Market Risk

General. The majority of our assets and liabilities are monetary in nature. Consequently, our most significant form of market risk is interest rate risk. Our assets, consisting primarily of residential mortgage loans, have longer maturities than our liabilities, consisting primarily of deposits. As a result, a principal part of our business strategy is to manage

interest rate risk and reduce the exposure of our net interest income to changes in market interest rates. Accordingly, our Board of Directors has established an Asset/Liability Management Committee which is responsible for evaluating the interest rate risk inherent in our assets and liabilities, for determining the level of risk that is appropriate given our business strategy, operating environment, capital, liquidity and performance objectives, and for managing this risk consistent with the guidelines approved by the Board of Directors. Senior management monitors the level of interest rate risk on a regular basis and the Asset/Liability Management Committee, which consists of senior management operating under a policy adopted by the Board of Directors, meets as needed to review our asset/liability policies and interest rate risk position.

We have sought to manage our interest rate risk in order to limit the exposure of our earnings and capital to changes in interest rates. In an attempt to accomplish this, we offer a variety of loan products, some of which are based on the prime rate and some loan products that adjust on one- to-five year intervals, based on various indices including the prime rate and U.S. Treasury securities. To shorten asset duration, we purchase investments, which are usually three to five years in length, as well as balance our investment purchases to ensure extension risk is minimized. In addition, we have attempted to lengthen the maturities of our deposit accounts by offering proportionately higher interest rates for longer terms, 3-5 year certificate accounts and by increasing our core deposits, in which the overall balances are generally less volatile to interest rate fluctuations than certificate accounts.

For additional information on our risk management strategy, see the sections entitled, “Item 1. Business – Delinquent Loans,” “Item 1. Business – Nonperforming Assets,” “Item 1. Business Ratios,” and “Item 1. Business - Allowance for Loan Losses.”

Net Portfolio Value. The net present value of an institution’s cash flow from assets, liabilities and off balance sheet items (the institution’s net portfolio value or “NPV”) would change in the event of a range of assumed changes in market interest rates. For periods subsequent to December 31, 2011, institutions are responsible for valuing their own portfolios, or arranging to obtain the required information from a third-party provider. The model utilized by the Company’s third-party provider utilizes a discounted cash flow analysis and an option-based pricing approach to measure the interest rate sensitivity of net portfolio value. The model estimates the economic value of each type of asset, liability and off-balance sheet contract under the assumption that the United States Treasury yield curve increases by 100 to 300 basis points, or decreases by 100 basis points instantaneously. A basis point equals one-hundredth of one percent, and 100 basis points equals one percent. An increase in interest rates from 3% to 4% would mean, for example, a 100 basis point increase in the “Change in Interest Rates” column below.

The tables below set forth, as of the periods indicated, net portfolio value, the estimated changes in our net portfolio value that would result from the designated instantaneous changes in the United States Treasury yield curve.

Year Ended December 31, 2015

Change In Interest Rate (Basis Points)	Net Portfolio Value			Net Portfolio Value As A Percentage Of Present Value Assets	
	Estimated NPV	Amount of Change	Percent of Change	NPV Ratio	Change In Basis Points
	(Dollars In Thousands)				
+300	\$34,025	\$(3,208)	-8.62 %	17.76 %	25
+200	35,419	(1,814)	-4.87 %	17.86 %	35
+100	36,804	(429)	-1.15 %	17.90 %	39
0	37,233	-	-	17.51 %	-
-100	35,768	(1,465)	-3.93 %	16.39 %	(112)

Year Ended December 31, 2014

Change In	Net Portfolio Value		Net Portfolio Value As A Percentage Of Present Value Assets	
	Estimated	Amount	NPV	
	(Dollars In Thousands)			

Interest Rates (Basis Points)	NPV	Of Change	Percent Of Change	Ratio	Change In Basis Points
	(Dollars In Thousands)				
+300	\$27,257	\$ (6,137)	-18.38 %	13.60%	(133)
+200	29,532	(3,862)	-11.56 %	14.21%	(72)
+100	31,920	(1,474)	-4.41 %	14.79%	(14)
0	33,394	-	-	14.93%	-
-100	35,033	1,639	4.91 %	15.27%	34

The table above indicates that at December 31, 2015, in the event of a 100 basis point increase in interest rates, we would experience a decrease of approximately 1.2% in net portfolio value. In the event of 200 basis point increase in interest rates, we would experience a decrease of approximately 4.9% in net portfolio value. For a 300 basis point increase in interest rates, we would experience a decrease value of approximately 8.6% in net portfolio value.

Certain shortcomings are inherent in the methodology used in the above interest rate risk measurement. Modeling changes in net portfolio value requires making certain assumptions that may or may not reflect the manner in which actual yields and costs respond to changes in market interest rates. In this regard, the net portfolio value table presented assumes that the composition of our interest-sensitive assets and liabilities existing at the beginning of a period remains constant over the period being measured and assumes that a particular change in interest rates is reflected uniformly across the yield curve regardless of the duration or re-pricing of specific assets and liabilities. Accordingly, although the net portfolio value table provides an indication of our interest rate risk exposure at a particular point in time, such measurements are not intended to and do not provide a precise forecast of the effect of changes in market interest rates on our net interest income and will differ from actual results.

Liquidity and Capital Resources

We maintain liquid assets at levels we believe are adequate to meet our liquidity needs. Our liquidity ratio averaged 5.01% for the year ended December 31, 2015 compared to 4.15% for the year ended December 31, 2014. We adjust our liquidity levels to fund deposit outflows, pay real estate taxes on mortgage loans, repay our borrowings, and to fund loan commitments. We also adjust liquidity as appropriate to meet asset and liability management objectives.

Our primary sources of liquidity are deposits, amortization and prepayment of loans and mortgage-backed securities, maturities of investment securities, other short-term investments, earnings, and funds provided from operations. While scheduled principal repayments on loans and mortgage-backed securities are a relatively predictable source of funds, deposit flows and loan prepayments are greatly influenced by market interest rates, economic conditions, and rates offered by our competition. We set the interest rates on our deposits to maintain a desired level of total deposits. In addition, we invest excess funds in short-term interest-earning assets, which provide liquidity to meet lending requirements.

Our cash flows are derived from operating activities, investing activities and financing activities as reported in our Consolidated Statements of Cash Flows included with the Consolidated Financial Statements which begin on page F-1 of this Form 10-K.

Our primary investing activities are the origination and purchase of one-to-four family, non-residential and multi-family real estate and other loans, including loans originated for sale, and the purchase of investment securities. For the years ended December 31, 2015 and 2014, our loan originations totaled \$31.2 million and \$16.4 million, respectively. For the years ended December 31, 2015, we purchased loans totaling \$2.0 million, compared to the purchase of loans totaling \$4.0 million for the year ended December 31, 2014. For the years ended December 31, 2015 and 2014, we received \$7.9 million and \$3.1 million, respectively, from the sale of loans, resulting in gains of \$227,000 and \$56,000, respectively. Cash received from the sales, calls, maturities and pay-downs on securities totaled \$14.8 million and \$9.5 million for the years ended December 31, 2015 and 2014 respectively. We purchased \$9.5 million and \$3.8 million in securities for the years ended December 31, 2015 and 2014, respectively. For a more detailed breakdown of our loan activity, see the section entitled “*Item 1. Business-Loan Origination, Purchase and Sales.*”

Deposit flows are generally affected by the level of interest rates, the interest rates and products offered by local competitors, and other factors. Excluding the impact of the acquired deposits in 2014, deposits decreased \$5.4 million for the year ended December 31, 2015 and decreased \$13.1 million for the year ended December 31, 2014. For a more detailed breakdown of our deposit activity, see the section entitled “*Item 1. Business-Deposit Activities and Other Sources of Funds.*”

Liquidity management is both a daily and long-term function of business management. If we require funds beyond our ability to generate them internally, borrowing agreements exist with the Federal Home Loan Bank of Chicago (“FHLBC”) to provide advances and with Bankers Bank of Wisconsin to purchase Federal Funds. As a member of the FHLBC, we are required to own capital stock in the Federal Home Loan Bank of Chicago and are authorized to apply for advances on the security of such stock and certain of our mortgage loans and other assets (principally securities which are obligations of, or guaranteed by, the United States), provided certain standards related to credit-worthiness have been met. We had an available borrowing limit of \$68.3 million and \$57.2 million from the FHLBC as of December 31, 2015 and 2014, respectively. In addition, as of December 31, 2015, the Bank had \$5.0 million of available credit from Bankers Bank of Wisconsin to purchase Federal Funds. There were \$2.1 million and \$5.5 million, respectively of Federal Home Loan Bank advances at December 31, 2015 and 2014 and no Federal Funds

purchased outstanding at December 31, 2015 and 2014.

At December 31, 2015 we had outstanding commitments to originate loans of \$0.9 million, unfunded commitments under lines of credit of \$12.0 million, unfunded commitments on construction loans of \$0.1 million, and less than \$0.1 million of unfunded standby letters of credit. At December 31, 2015, certificates of deposit scheduled to mature in less than one year totaled \$37.5 million. Based on prior experience, management believes that a significant portion of such deposits will remain with us, although there can be no assurance that this will be the case. In the event a significant portion of our deposits are not retained by us, we will have to utilize other funding sources, such as FHLBC advances, in order to maintain our level of assets. Alternatively, we could reduce our level of liquid assets, such as our cash and cash equivalents. In addition, the cost of such deposits may be significantly higher if market interest rates are higher at the time of renewal.

The Company is a separate legal entity from Ottawa Savings Bank and must provide for its own liquidity. In addition to its operating expenses, the Company is responsible for paying any dividends declared to its shareholders, and interest and principal on outstanding debt, if any. The Company also has repurchased shares of its common stock. The Company's primary source of income is dividends received from Ottawa Savings Bank. The amount of dividends that Ottawa Savings Bank may declare and pay to the Company in any calendar year, without the receipt of prior approval from the Federal Reserve Board, but with prior notice to the Federal Reserve Board, cannot exceed net income for that year to date plus retained net income (as defined) for the preceding two calendar years. At December 31, 2015, the Company had liquid assets of \$326,000.

Off-Balance Sheet Arrangements and Contractual Obligations

For the year ended December 31, 2015, the Company did not engage in any off-balance sheet transactions reasonably likely to have a material adverse effect on its financial condition, results of operations or cash-flows.

Recent Accounting Pronouncements

In January 2014, the FASB issued ASU No. 2014-04, Receivables - Troubled Debt Restructurings by Creditors (Subtopic 310-40): Reclassification of Residential Real Estate Collateralized Consumer Mortgage Loans upon Foreclosure. The update clarifies that an in substance repossession or foreclosure occurs, and a creditor is considered to have received physical possession of residential real estate property collateralizing a consumer mortgage loan, upon either (i) the creditor obtaining legal title to the residential real estate property upon completion of a foreclosure or (ii) the borrower conveying all interest in the residential real estate property to the creditor to satisfy that loan through completion of a deed in lieu of foreclosure or through a similar agreement. In addition, the update requires disclosure of both the amount of foreclosed residential real estate property held by the creditor and the recorded investment in consumer mortgage loans collateralized by residential real estate property that are in the process of foreclosure in accordance with local requirements of the applicable jurisdiction. An entity can elect to adopt the amendments using either a modified retrospective method or a prospective transition method. The Company adopted this guidance effective January 1, 2015. The adoption of this update did not have an impact on the Company's financial position, results of operation or cash flows.

In May 2014, the FASB issued ASU No. 2014-09, Revenue from Contracts with Customers. ASU 2014-09 implements a common revenue standard that clarifies the principles for recognizing revenue. The core principle of ASU 2014-09 is that an entity should recognize revenue to depict the transfer of promised goods or services to customers in an amount that reflects the consideration to which the entity expects to be entitled in exchange for those goods or services. To achieve that core principle, an entity should apply the following steps: (i) identify the contract(s) with a customer, (ii) identify the performance obligations in the contract, (iii) determine the transaction price, (iv) allocate the transaction price to the performance obligations in the contract and (v) recognize revenue when (or as) the entity satisfies a performance obligation. ASU 2014-09 is effective on January 1, 2018 and is not expected to have a significant impact on the Company's financial statements.

In August 2014, the FASB issued ASU No. 2014-14, Classification of Certain Government-Guaranteed Mortgage Loans upon Foreclosure. The objective of this guidance is to reduce diversity in practice related to how creditors classify government-guaranteed mortgage loans, including FHA or VA guaranteed loans, upon foreclosure. Some creditors reclassify those loans to real estate consistent with other foreclosed loans that do not have guarantees; others reclassify the loans to other receivables. The amendments in ASU 2014-14 require that a mortgage loan be derecognized and that a separate other receivable be recognized upon foreclosure if the following conditions are met: (1) The loan has a government guarantee that is not separable from the loan before foreclosure; (2) At the time of foreclosure, the creditor has the intent to convey the real estate property to the guarantor and make a claim on the guarantee, and the creditor has the ability to recover under that claim; and (3) At the time of foreclosure, any amount of the claim that is determined on the basis of the fair value of the real estate is fixed. Upon foreclosure, the separate other receivable should be measured based on the amount of the loan balance (principal and interest) expected to be recovered from the guarantor. The Company adopted this guidance effective January 1, 2015. The adoption of this update did not have an impact on the Company's financial position, results of operation or cash flows.

In January 2016, the FASB issued ASU 2016-01, *Financial Instruments—Overall (Subtopic 825-10): Recognition and Measurement of Financial Assets and Financial Liabilities*, which updates certain aspects of recognition, measurement, presentation and disclosure of financial instruments. ASU 2016-01 will be effective for the Company on January 1, 2018. The Company does not believe the adoption of the new financial instruments standard will have a material impact on its consolidated financial statements.

In February 2016, the FASB issued ASU 2016-02, *Leases (Topic 842)*. Under the new guidance in this ASU, lessees will be required to recognize the following for all leases (with the exception of short-term leases) at the commencement date: (1) a lease liability, which is a lessee's obligation to make lease payments arising from a lease, measured on a discounted basis; and (2) a right-of-use asset, which is an asset that represents the lessee's right to use, or control the use of, a specified asset for the lease term. Under the new guidance, lessor accounting is largely unchanged. Certain targeted improvements were made to align, where necessary, lessor accounting with the lessee accounting model and Topic 606, Revenue from Contracts with Customers. The new lease guidance also simplified the accounting for sale and leaseback transactions primarily because lessees must recognize lease assets and lease liabilities. Lessees will no longer be provided with a source of off-balance sheet financing. ASU 2016-02 is effective for public business entities for fiscal years beginning after December 15, 2018, including interim periods within those fiscal years. Early application is permitted. Lessees (for capital and operating leases) and lessors (for sales-type, direct financing, and operating leases) must apply a modified retrospective transition approach for leases existing at, or entered into after, the beginning of the earliest comparative period presented in the financial statements. The modified retrospective approach would not require any transition accounting for leases that expired before the earliest comparative period presented. Lessees and lessors may not apply a full retrospective transition approach. The Company is currently evaluating the effect that this standard will have on its financial statements.

Impact of Inflation and Changing Prices

The consolidated financial statements and related notes of the Company have been prepared in accordance with GAAP, which generally requires the measurement of financial position and operating results in terms of historical dollars without consideration for changes in the relative purchasing power of money over time due to inflation. The impact of inflation is reflected in the increased cost of our operations. Unlike industrial companies, our assets and liabilities are primarily monetary in nature. As a result, changes in market interest rates have a greater impact on performance than the effects of inflation.

ITEM 7A. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

The information required by this item is incorporated herein by reference to Part II, Item 7, “*Management’s Discussion and Analysis of Financial Condition and Results of Operation.*”

ITEM 8. FINANCIAL STATEMENTS AND SUPPLEMENTARY DATA

The information required by this Item 8 is contained on pages F-1 through F-51 of this Form 10-K.

ITEM 9. CHANGES IN AND DISAGREEMENTS WITH ACCOUNTANTS ON ACCOUNTING AND FINANCIAL DISCLOSURE

None.

ITEM 9A. CONTROLS AND PROCEDURES

(a) Disclosure Controls and Procedures

As of the end of the period covered by this report, the Company carried out an evaluation, under the supervision, and with the participation of our management, including our Chief Executive Officer and Chief Financial Officer, of the effectiveness of the design and operation of our “disclosure controls and procedures” as contemplated by Exchange Act Rule 13a-15(d). Based upon their evaluation, and as of the end of the period covered by this report, the Chief Executive Officer and Chief Financial Officer concluded that the Company’s disclosure controls and procedures are effective, in all material respects, in timely alerting them to material information relating to the Company (and its consolidated subsidiary) required to be included in the periodic reports the Company is required to file and submit to the SEC under the Exchange Act.

(b) Internal Controls Over Financial Reporting

Management’s annual report on internal control over financial reporting is incorporated herein by reference to page 48 of this Annual Report on Form 10-K.

(c) Changes to Internal Controls Over Financial Reporting

There were no changes in the Company's internal control over financial reporting identified in connection with the evaluation required by Exchange Act Rule 13a-15(d) that occurred during the fourth quarter of 2015 that have materially affected, or are reasonably likely to materially affect, the Company's internal control over financial reporting.

ITEM 9B. OTHER INFORMATION

None.

PART III

ITEM 10. DIRECTORS, EXECUTIVE OFFICERS, AND CORPORATE GOVERNANCE

The information required in response to this item regarding the Company’s directors, executive officers, the audit committee, the audit committee financial expert, the code of ethics and business conduct and compliance with Section 16(a) of the Exchange Act will be contained in the Company’s Proxy Statement for its Annual Meeting of Stockholders to be held on May 18, 2016 (the “Proxy Statement”) under the captions “*Proposal 1—Election of Directors*,” “*Corporate Governance—Meetings and Committees of the Board of Directors*,” “*Corporate Governance—Code of Ethics and Business Conduct*,” and “*Section 16(a) Beneficial Ownership Reporting Compliance*”

and the information included therein is incorporated herein by reference.

ITEM 11. EXECUTIVE COMPENSATION

The information required in response to this item will be contained in the Proxy Statement under the captions “*Directors’ Compensation*,” and “*Executive Compensation*” and the information included therein is incorporated herein by reference.

MANAGEMENT'S REPORT ON INTERNAL CONTROL OVER FINANCIAL REPORTING

The management of the Company is responsible for establishing and maintaining adequate internal control over financial reporting. The internal control process has been designed under our supervision to provide reasonable assurance regarding the reliability of financial reporting and the preparation of the Company's consolidated financial statements for external reporting purposes in accordance with accounting principles generally accepted in the United States of America.

Management conducted an assessment of the effectiveness of the Company's internal control over financial reporting as of December 31, 2015, utilizing the framework established in Internal Control – Integrated Framework of 2013 issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO). Based on this assessment, management has determined that the Company's internal control over financial reporting as of December 31, 2015 is effective.

Our internal control over financial reporting includes policies and procedures that pertain to the maintenance of records that accurately and fairly reflect, in reasonable detail, transactions and dispositions of assets; and provide reasonable assurances that: (1) transactions are recorded as necessary to permit preparation of financial statements in accordance with accounting principles generally accepted in the United States; (2) receipts and expenditures are being made only in accordance with authorizations of management and the directors of the Company; and (3) unauthorized acquisition, use, or disposition of the Company's assets that could have a material effect on the Company's financial statements are prevented or timely detected.

All internal control systems, no matter how well designed, have inherent limitations. Therefore, even those systems determined to be effective can provide only reasonable assurance with respect to financial statement preparation and presentation. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

This annual report does not include an attestation report of the Company's registered public accounting firm regarding internal control over financial reporting. Management's report was not subject to attestation by the Company's registered public accounting firm pursuant to the rules of the Securities and Exchange Commission that permit the Company to provide only management's report in this annual report.

Report of Independent Registered Public Accounting Firm

To the Board of Directors

Ottawa Savings Bancorp, Inc. and Subsidiary

We have audited the accompanying consolidated balance sheets of Ottawa Savings Bancorp, Inc. and Subsidiary (the Company) as of December 31, 2015 and 2014, and the related consolidated statements of operations, comprehensive income, stockholders' equity, and cash flows for the years then ended. These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. The Company is not required to have, nor were we engaged to perform, an audit of its internal control over financial reporting. Our audit included consideration of internal control over financial reporting as a basis for designing audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Company's internal control over financial reporting. Accordingly, we express no such opinion. An audit also includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements, assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the consolidated financial statements referred to above present fairly, in all material respects, the financial position of Ottawa Savings Bancorp, Inc. and Subsidiary as of December 31, 2015 and 2014, and the results of their operations and their cash flows for the years then ended, in conformity with U.S. generally accepted accounting principles.

Ottawa Savings Bancorp, Inc. & Subsidiary

Notes to Consolidated Financial Statements

Note 1. Summary of Significant Accounting Policies

Entity structure

In 2005, the Board of Directors of the Bank unanimously adopted a plan of conversion providing for the conversion of the Bank from an Illinois chartered mutual savings bank to a federally chartered stock savings bank and the purchase of all of the common stock of the Bank by the Company. The depositors of the Bank approved the plan at a meeting held in 2005.

In adopting the plan, the Board of Directors of the Bank determined that the conversion was advisable and in the best interests of its depositors and the Bank. The conversion was completed in 2005 when the Company issued 1,223,701 shares of common stock to Ottawa Savings Bancorp MHC (a mutual holding company), and 1,001,210 shares of common stock to the public.

On December 31, 2014, the Company completed a merger with Twin Oaks Savings Bank (“Twin Oaks”), whereby Twin Oaks was merged with and into the Bank, with the Bank as the surviving institution (See Note 2 for additional information). As part of the merger agreement, the Company issued 776,144 shares of common stock to Ottawa Savings Bancorp, MHC. As of December 31, 2015, Ottawa Savings Bancorp MHC holds 1,999,845 shares of common stock, representing 69.1% of the Company’s common shares outstanding.

Nature of business

The primary business of the Company is the ownership of the Bank. Through the Bank, the Company is engaged in providing a variety of financial services to individual and corporate customers in the Ottawa, Marseilles, and Morris, Illinois areas, which are primarily agricultural areas consisting of several rural communities with small to medium sized businesses. The Bank’s primary source of revenue is interest and fees related to single-family residential loans to middle-income individuals.

Principles of consolidation

The accompanying consolidated financial statements include the accounts of Ottawa Savings Bancorp, Inc. (the Company) and its wholly owned subsidiary Ottawa Savings Bank (the Bank). All significant intercompany transactions and balances are eliminated in consolidation.

Reclassifications

Some items in the prior year financial statements were reclassified to conform to the current presentation with no impact on previously reported net income or stockholders' equity.

Use of estimates

In preparing the consolidated financial statements, management is required to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates. Material estimates that are particularly susceptible to significant change relate to the fair value of securities available for sale, the determination of the allowance for loan losses, valuation of deferred income taxes, the determination of the liability for postretirement benefits, and the fair value measurement for the assets and liabilities.

Ottawa Savings Bancorp, Inc. & Subsidiary

Notes to Consolidated Financial Statements

Note 1. Summary of Significant Accounting Policies (Continued)

Concentration of credit risk

Most of the Bank's business activity is with customers within the Ottawa, Marseilles, and Morris areas. The Bank does not have any significant concentrations to any one industry or customer.

Cash and cash equivalents

For purposes of reporting cash flows, cash and cash equivalents include cash on hand and amounts due from banks, including cash items in process of clearing. Cash flows from loans, deposits, and federal funds sold or purchased are treated as net increases or decreases in the statement of cash flows.

The Company maintains its cash in bank deposit accounts which, at times, may exceed federally insured limits. The Company has not experienced any losses in such accounts. The Company believes it is not exposed to any significant credit risk on cash and cash equivalents.

Time deposits

Time deposits held at other financial institutions are carried at cost and include any time deposits with an original maturity of greater than three months. The Company has not experienced any losses in such accounts. The Company believes it is not exposed to any significant credit risk on time deposits.

Investment securities

Debt securities classified as available for sale are those debt securities that the Company intends to hold for an indefinite period of time, but not necessarily to maturity. Any decision to sell a security classified as available for sale would be based on various factors, including significant movements in interest rates, changes in maturity mix of the Company's assets and liabilities, liquidity needs, regulatory capital considerations and other similar factors. Securities available for sale are carried at fair value. The difference between the fair value and amortized cost, adjusted for amortization of premium and accretion of discounts, computed by the interest method over their contractual maturity, results in an unrealized gain or loss. Unrealized gains or losses are reported as accumulated other comprehensive income (loss), net of the related deferred tax effect and are included as a component of stockholders' equity. Gains or losses from the sale of securities are determined using the specific identification method and are included in earnings. Declines in the fair value of available for sale securities below their amortized cost basis that are deemed to be other than temporary are reflected in earnings as realized losses. Purchase premiums and discounts are recognized in interest income using the interest method over the terms of the securities.

Management evaluates securities for other-than-temporary impairment at least on a quarterly basis, and more frequently when economic or market concerns warrant such evaluation. Consideration is given to (1) the length of time and the extent to which the fair value has been less than cost, (2) the financial condition and near-term prospects of the issuer, and (3) the intent and ability of the Company to retain its investment in the issuer for a period of time sufficient to allow for any anticipated recovery in fair value. In addition, management monitors market trends and current events in order to identify trends and circumstances that might impact the carrying value of securities.

To determine if an "other-than-temporary" impairment (OTTI) exists on an investment security, the Company first determines if (a) it intends to sell the security or (b) it is more likely than not that it will be required to sell the security before its anticipated recovery. If either of the conditions is met, the Company will recognize an "other-than-temporary" impairment in earnings equal to the difference between the security's fair value and its adjusted cost basis. If neither of the conditions is met, the Company determines (a) the amount of the impairment related to credit loss and (b) the amount of the impairment due to all other factors. The difference between the present values of the cash flows expected to be collected and the amortized cost basis is the credit loss. The credit loss is the portion of the other-than-temporary impairment that is recognized in earnings and is a reduction to the cost basis of the security. The portion of total impairment related to all other factors is included in other comprehensive income (loss).

Ottawa Savings Bancorp, Inc. & Subsidiary

Notes to Consolidated Financial Statements

Note 1. Summary of Significant Accounting Policies (Continued)

Non-marketable equity securities

Investments in the Federal Home Loan Bank of Chicago, Bankers Bank of Wisconsin, and the Upper Illinois River Valley Development Corporation are carried at cost and periodically evaluated for impairment.

Loans

The Bank primarily lends to small and mid-sized businesses, non-residential real estate customers and consumers providing mortgage, commercial and consumer loans. A substantial portion of the loan portfolio is represented by mortgage loans throughout Ottawa, Illinois and the surrounding area. The ability of the Bank's debtors to honor their contracts is dependent upon the real estate and general economic conditions in this area.

It is the Bank's policy to review each prospective credit in order to determine the appropriateness and the adequacy of security or collateral prior to making a loan. In the event of borrower default, the Bank seeks recovery in compliance with state lending laws, the Bank's lending standards, and credit monitoring and remediation procedures.

Loans that management has the intent and ability to hold for the foreseeable future or until maturity or pay-off are generally reported at their outstanding unpaid principal balances adjusted for charge-offs, the allowance for loan losses, and any deferred fees or costs on originated loans. Interest income is accrued on the unpaid principal balance. Loan origination fees, net of certain direct origination costs, are deferred and recognized as an adjustment of the related loan yield over the contractual life of the loan using the interest method.

The following portfolio segments and classes of loan receivables have been identified by the Company:

Commercial

- Non-residential real estate
- One-to-four family residential real estate
- Multi-family residential real estate
- Consumer direct
- Purchased auto loans

Generally, for all classes of loans receivable, loans are considered past due when contractual payments are delinquent for 31 days or greater. Past due status is based on contractual terms of the loan. In all cases, loans are placed on nonaccrual status or charged-off at an earlier date if collection of principal or interest is considered doubtful.

For all classes of loans receivable, loans are placed on nonaccrual status when the loan has become over 90 days past due (unless the loan is well secured and in the process of collection).

When a loan is placed on nonaccrual status, income recognition is ceased. Previously recorded but uncollected amounts of interest on nonaccrual loans are reversed at the time the loan is placed on nonaccrual status. The interest on these loans is accounted for on the cash-basis or cost-recovery method, until qualifying for return to accrual status. Should full collection of principal be expected, cash collected on nonaccrual loans can be recognized as interest income.

Ottawa Savings Bancorp, Inc. & Subsidiary

Notes to Consolidated Financial Statements

Note 1. Summary of Significant Accounting Policies (Continued)

For all classes of loans receivable, nonaccrual loans may be restored to accrual status provided the following criteria are met:

- The loan is current, and all principal and interest amounts contractually due have been made,
- All principal and interest amounts contractually due, including past due payments, are reasonably assured of repayment within a reasonable period, and
- There is a period of minimum repayment performance, as follows, by the borrower in accordance with contractual terms:
 - Six months of repayment performance for contractual monthly payments, or
 - One year of repayment performance for contractual quarterly or semi-annual payments.

Troubled debt restructuring exists when the Company, for economic or legal reasons related to the borrower's financial difficulties, grants a concession (either imposed by court order, law, or agreement between the borrower and the Company) to the borrower that it would not otherwise consider. The Company is attempting to maximize its recovery of the balances of the loans through these various concessionary restructurings.

The following criteria, related to granting a concession, together or separately, create a troubled debt restructuring:

- A modification of terms of a debt such as one or a combination of:
 - The reduction of the stated interest rate to a rate lower than the current market rate for new debt with similar risk.
 - The extension of the maturity date or dates at a stated interest rate lower than the current market rate for new debt with similar risk.
 - The reduction of the face amount or maturity amount of the debt as stated in the instrument or other agreement.
 - The reduction of accrued interest.
 - A transfer from the borrower to the Company of receivables from third parties, real estate, other assets, or an equity position in the borrower to fully or partially satisfy a loan.

Allowance for loan losses

For all portfolio segments, the allowance for loan losses is an amount necessary to absorb known and inherent losses that are both probable and reasonably estimable and is established through a provision for loan losses charged to earnings. Loan losses, for all portfolio segments, are charged against the allowance when management believes the uncollectability of a loan balance is confirmed. Subsequent recoveries, if any, are credited to the allowance.

For all portfolio segments, the allowance for loan losses is evaluated on a regular basis by management and is based upon management's periodic review of the collectability of the loans in light of historical experience, the nature and volume of the loan portfolio, adverse situations that may affect the borrower's ability to repay, estimated value of any underlying collateral and prevailing economic conditions. This evaluation is inherently subjective as it requires estimates that are susceptible to significant revision as more information becomes available. In addition, regulatory agencies, as an integral part of their examination process, periodically review the allowance for loan losses and may require the Company to make additions to the allowance based upon their judgment about information available to them at the time of their examinations.

Ottawa Savings Bancorp, Inc. & Subsidiary

Notes to Consolidated Financial Statements

Note 1. Summary of Significant Accounting Policies (Continued)

The general component consists of quantitative and qualitative factors and covers non-impaired loans. The quantitative factors are based on historical loss experience adjusted for qualitative factors. The historical loss experience is determined by portfolio segment and is based on the actual loss history experienced by the Company using the most recent twelve quarters with heavier weighting given to the most recent quarters. For performing credits acquired from Twin Oaks on December 31, 2014, the historical loss experience is determined by portfolio segment and is based on the actual loss history experienced by Twin Oaks prior to the merger and by the Company after the merger using the most recent sixteen quarters with heavier weighting given to the most recent quarters.

This actual loss experience is supplemented with other qualitative factors based on the risks present for each portfolio segment. These qualitative factors include consideration of the following:

- Levels of and trends in delinquencies and impaired loans
- Levels of and trends in charge-offs and recoveries
- Trends in volume and terms of loans
- Effects of any changes in risk selection and underwriting standards
- Other changes in lending policies, procedures and practices
- Experience, ability and depth of lending management and other relevant staff
- National and local economic trends and conditions
- Industry conditions
- Effects of changes in credit concentrations

A loan is considered impaired when, based on current information and events, it is probable that the Company will be unable to collect the scheduled payments of principal or interest when due according to the contractual terms of the loan agreement. Factors considered by management in determining impairment include payment status, collateral value, and the probability of collecting scheduled principal and interest payments when due. Loans that experience insignificant payment delays and payment shortfalls generally are not classified as impaired. Management determines the significance of payment delays and payment shortfalls on a case-by-case basis, taking into consideration all of the circumstances surrounding the loan and the borrower, including the length of the delay, the reasons for the delay, the borrower's prior payment record, and the amount of the shortfall in relation to the principal and interest owed. Impairment is measured on a loan by loan basis for commercial and non-residential loans by either the present value of expected future cash flows discounted at the loan's effective interest rate, the loan's obtainable market price, or the fair value of the collateral if the loan is collateral dependent.

A discussion of the risk characteristics and the allowance for estimated losses on loans, by each portfolio segment, follows:

For commercial loans, the Company focuses on small and mid-sized businesses that have annual revenues below \$5,000,000 with primary operations as wholesalers, manufacturers, building contractors, business services companies, and retailers. The Company provides a wide range of commercial loans, including lines of credit for working capital and operational purposes, and term loans for the acquisition of facilities, equipment and other purposes. The Company also originates commercial loans through Bankers Health Group (BHG). BHG specializes in loans to healthcare professionals of all specialties throughout the United States. The loans for BHG are primarily comprised of working capital and equipment loans. We underwrite these loans based on our criteria and service the loans in-house. Approval is generally based on the following factors:

F-13

Ottawa Savings Bancorp, Inc. & Subsidiary

Notes to Consolidated Financial Statements

Note 1. Summary of Significant Accounting Policies (Continued)

- Ability and stability of current management of the borrower;
- Stable earnings with positive financial trends;
- Sufficient cash flow to support debt repayment;
- Earnings projections based on reasonable assumptions;
- Financial strength of the industry and business; and
- Value and marketability of collateral.

Collateral for commercial loans generally includes accounts receivable, inventory, and equipment. The lending policy specifies approved collateral types and corresponding maximum advance percentages. The value of collateral pledged on loans must exceed the loan amount by a margin sufficient to absorb potential erosion of its value in the event of foreclosure and cover the loan amount plus costs incurred to convert it to cash. The lending policy specifies maximum term limits for commercial loans. For term loans, the maximum term is 5 years. Generally, term loans range from 3 to 5 years. For lines of credit, the maximum term is 365 days. In addition, the Company often takes personal guarantees as support for repayment. Loans may be made on an unsecured basis if warranted by the overall financial condition of the borrower.

Non-residential real estate loans are subject to underwriting standards and processes similar to commercial loans, in addition to those standards and processes specific to real estate loans. Collateral for non-residential real estate loans generally includes the underlying real estate and improvements, and may include additional assets of the borrower. The lending policy specifies maximum loan-to-value limits based on the category of non-residential real estate (non-residential real estate loans on improved property, raw land, land development, and commercial construction). These limits are the same limits established by regulatory authorities. The lending policy also includes guidelines for real estate appraisals, including minimum appraisal standards based on certain transactions. In addition, the Company often takes personal guarantees as support for repayment.

Some of the non-residential loans that the Company originates finance the construction of residential dwellings and land development. For land development, the loans generally can be made with a maximum loan to value ratio of 70% and a maximum term up to 10 years. Additionally, the Company will underwrite commercial construction loans for commercial development projects including condominiums, apartment buildings, single-family subdivisions, single-family speculation loans, as well as owner-occupied properties used for business. These loans provide for payment of interest only during the construction phase and may, in the case of an apartment or commercial building, convert to a permanent loan upon completion. In the case of a single family subdivision or construction or builder loan, as individual lots are sold, the principal balance is reduced by a minimum of 80% of the net lot sales price. In the case of a commercial construction loan, the construction period may be from nine months to two years. Loans are

generally made to a maximum of 70% of the appraised value as determined by an appraisal of the property made by an independent state certified general real estate appraiser. Periodic inspections are required of the property during the term of the construction loan for both residential and commercial construction loans.

For commercial and non-residential real estate loans, the allowance for estimated losses on loans consists of specific and general components. For loans that are considered impaired as defined above, an allowance is established when the discounted cash flows (or collateral value or observable market price) of the impaired loan is lower than the carrying value of that loan.

The Company hires an independent firm to perform a loan review every 16-24 months to validate the risk ratings on selected commercial and non-residential loans. Additionally, the reviews include an analysis of debt service requirements, covenant compliance, if applicable, and collateral adequacy. They also perform a documentation review on selected loans to determine if the credit is properly documented and closed in accordance with approval authorities and conditions. The next review will occur during the first quarter of 2016.

Ottawa Savings Bancorp, Inc. & Subsidiary

Notes to Consolidated Financial Statements

Note 1. Summary of Significant Accounting Policies (Continued)

Generally, the Company's one-to-four family real estate loans conform to the underwriting standards of Freddie Mac and Fannie Mae which would allow the Company the ability to resell the loans in the secondary market. The Company structures most loans that will not conform to those underwriting requirements as adjustable rate mortgages that adjust in one, three or five year increments and retains those in its portfolio. The board approved lending policy establishes minimum appraisal and credit underwriting guidelines. The Company also participates with the USDA Rural Development Company to offer loans to qualifying borrowers. USDA guaranteed loans are granted up to 100% of the appraised value and the USDA guarantees up to 90% of the loan. These loans typically require no down payment, but are subject to maximum income limitations.

The Company also originates loans for multi-family dwellings. These loans follow board and regulatory approved underwriting guidelines similar to commercial loans, in addition to those standards and processes specific to real estate loans. Collateral for multi-family real estate loans generally includes the underlying real estate and improvements, and may include additional assets of the borrower. The board approved lending policy specifies maximum loan-to-value limits based on the type of property. The lending policy also includes guidelines for real estate appraisals, including minimum appraisal standards based on certain transactions. The policy also specifies minimum ongoing credit administration procedures including the collection of financial statements, tax returns and rent rolls when applicable. Additionally, the Company will take personal guarantees and cross collateralize other assets of the guarantors as support for repayment.

The Company provides many types of installment and other consumer loans including motor vehicle, home improvement, share loans, personal unsecured loans, home equity, and small personal credit lines. The lending policy addresses specific credit guidelines by consumer loan type. Unsecured loans generally have a maximum borrowing limit of \$25,000 and a maximum term of four years.

The procedures for underwriting consumer loans include an assessment of the applicant's payment history on other debts and ability to meet existing obligations and payments on the proposed loans. Although the applicant's credit-worthiness is a primary consideration, the underwriting process also includes a comparison of the value of the collateral, if any, to the proposed loan amount.

The Company purchases auto loans from regulated financial institutions. These types of loans are primarily low balance individual auto loans. The Company reviews the loans at least three days prior to the purchase. Any specific

loan can be refused within thirty days of the sale of any given loan pool.

For residential real estate loans, multi-family, consumer direct loans (e.g. installment, in-house auto, other consumer loans, etc.) and purchased auto loans, the allowance for estimated losses on loans consists of a specific and general component. The specific component is evaluated for only loans that are classified as impaired, which is based on current information and events if it is probable that the company will be unable to collect the scheduled payments according to the terms of the agreement. Impairment on these is measured on a case-by-case basis by either the present value of expected future cash flows discounted at the loan's effective interest rate, the loan's obtainable market price or the fair value of the collateral if the loan is collateral dependent. For large groups of smaller balance homogenous loans that are under 90 days past due, they are collectively evaluated for impairment. To determine the general component, the Company applies quantitative factors based on historical charge-off experience in total for each segment. Additionally, the historical loss factors are adjusted based on qualitative factors determined by the Company which impact each segment.

Residential real estate loans, multi-family real estate loans, consumer direct loans and purchased auto loans are not risk ranked individually. These loans are only classified when the borrower is 90 days or more past due or if the borrower has another loan with the Company that is over 90 days past due and dependent upon the same collateral. Under such circumstances, all of the loans connected with the collateral are classified as substandard and these loans are evaluated for impairment.

Ottawa Savings Bancorp, Inc. & Subsidiary

Notes to Consolidated Financial Statements

Note 1. Summary of Significant Accounting Policies (Continued)

Troubled debt restructurings are considered impaired loans and are subject to the same allowance methodology as described above for impaired loans by portfolio segment.

Loans Acquired in a Transfer

The loans acquired in the Twin Oaks merger (see Note 2) were recorded at fair value as of the acquisition date and no separate valuation allowance was established. Management engaged the services of an independent valuation specialist to determine the fair values based on expected cash flows discounted at appropriate rates.

FASB ASC Topic 310-30, *Loans and Debt Securities Acquired with Deteriorated Credit Quality*, applies to loans acquired in a transfer with evidence of deterioration of credit quality for which it is probable, at acquisition, that the investor will be unable to collect all contractually required payments receivable. If both conditions exist, the Company determines whether to account for each loan individually or whether such loans will be assembled into pools based on common risk characteristics such as credit score, loan type, and origination date. Based on this evaluation, the Company determined that the loans acquired from the Twin Oaks merger subject to ASC Topic 310-30 would be accounted for individually.

The Company considered expected prepayments and estimated the total expected cash flows, which included undiscounted expected principal and interest. The excess of that amount over the fair value of the loan is referred to as accretable yield. Accretable yield is recognized as interest income on a constant yield basis over the expected life of the loan. The excess of the contractual cash flows over expected cash flows is referred to as non-accretable difference and is not accreted into income. Over the life of the loan, the Company continues to estimate expected cash flows. Subsequent decreases in expected cash flows are recognized as impairments in the current period through the allowance for loan losses. Subsequent increases in cash flows to be collected are first used to reverse any existing valuation allowance and any remaining increases are recognized prospectively through an adjustment of the loan's yield over its remaining life.

FASB ASC Topic 310-20, *Nonrefundable Fees and Other Costs*, was applied to loans not considered to have deteriorated credit quality at acquisition. Under ASC Topic 310-20, the difference between the loan's principal balance at the time of purchase and the fair value is recognized as an adjustment of yield over the life of the loan.

Servicing

Servicing assets are recognized as separate assets when rights are acquired through purchase or through sale of financial assets. For sales of mortgage loans, a portion of the cost of originating the loan is allocated to the servicing right based on fair value. Fair value is based on market prices for comparable mortgage servicing contracts, when available, or alternatively, is based on a valuation model that calculates the present value of estimated future net servicing income. The valuation model incorporates assumptions that market participants would use in estimating future net servicing income, such as the cost to service, the discount rate, the custodial earnings rate, an inflation rate, ancillary income, prepayment speeds and default rates and losses. Capitalized servicing rights are amortized into non-interest income in proportion to, and over the period of, the estimated future net servicing income of the underlying financial assets.

Servicing assets are evaluated for impairment based upon the fair value of the rights as compared to amortized cost. Impairment is determined by stratifying rights into tranches based on predominant risk characteristics, such as interest rate, loan type and investor type. Impairment is recognized through a valuation allowance for an individual tranche, to the extent that fair value is less than the capitalized amount for the tranche. If the Company later determines that all or a portion of the impairment no longer exists for a particular tranche, a reduction of the allowance may be recorded as an increase to income.

Ottawa Savings Bancorp, Inc. & Subsidiary

Notes to Consolidated Financial Statements

Note 1. Summary of Significant Accounting Policies (Continued)

Servicing fee income is recorded for fees earned for servicing loans. The fees are based on a contractual percentage of the outstanding principal or a fixed amount per loan and are recorded as income when earned. The amortization of mortgage servicing rights is netted against loan servicing fee income.

Transfers of financial assets

Transfers of financial assets are accounted for as sales when control over the assets has been surrendered. Control over transferred assets is deemed to be surrendered when (1) the assets have been isolated from the Company, (2) the transferee obtains the right (free of conditions that constrain it from taking advantage of that right) to pledge or exchange the transferred assets, and (3) the Company does not maintain effective control over the transferred assets through an agreement to repurchase them before their maturity.

Foreclosed real estate

Real estate properties acquired through, or in lieu of, loan foreclosure are initially recorded at fair value less estimated costs to sell at the date of foreclosure, establishing a new cost basis. Subsequent to foreclosure, valuations are periodically performed by management and the assets are carried at the lower of carrying amount or fair value less estimated cost to sell. Revenue and expenses from operations and changes in the valuation allowance are included in other expenses.

The carrying value of foreclosed residential real estate property as of December 31, 2015 and 2014, was \$313,368 and \$232,650, respectively. There were four residential real estate loans in the process of foreclosure as of December 31, 2015, totaling approximately \$234,000 and 32 residential real estate loans in the process of foreclosure as of December 31, 2014, totaling approximately \$1.3 million.

Income taxes

Deferred income tax assets and liabilities are computed quarterly for differences between the financial statement and tax bases of assets and liabilities that will result in taxable or deductible amounts in the future based on enacted tax laws and rates applicable to the periods in which the differences are expected to affect taxable income. Valuation allowances are established when necessary to reduce deferred tax assets to amounts which are more likely than not realizable. Deferred tax assets and liabilities are adjusted for the effects of changes in tax laws and rates on the date of enactment. Income tax expense is the tax payable or refundable for the period plus or minus the change during the period in deferred tax assets and liabilities.

Deferred income tax expense results from changes in deferred tax assets and liabilities between periods. Deferred tax assets are recognized if it is more likely than not, based on the technical merits, that the tax position will be realized or sustained upon examination. The term more likely than not means a likelihood of more than 50 percent; the terms examined and upon examination also include resolution of the related appeals or litigation process, if any. A tax position that meets the more likely than not recognition threshold is initially and subsequently measured as the largest amount of tax benefit that has a greater than 50 percent likelihood of being realized upon settlement with a taxing authority that has full knowledge of all relevant information. The determination of whether or not a tax position has met the more likely than not recognition threshold considers the facts, circumstances, and information available at the reporting date and is subject to management's judgment. Deferred tax assets are reduced by a valuation allowance if, based on the weight of evidence available, it is more likely than not that some portion or all of a deferred tax asset will not be realized. The Company has no uncertain tax positions for which a liability has been recorded. The Company is no longer subject to examination by federal or state taxing authorities for the tax year 2011 and the years prior.

Note 1. Summary of Significant Accounting Policies (Continued)

Premises and equipment

Land is carried at cost. Premises and equipment are carried at cost, less accumulated depreciation. Premises and equipment are depreciated using the straight-line and accelerated depreciation methods over the estimated useful lives of the assets:

	Years		
Buildings	5	-	50
Furniture and equipment	5	-	39

Employee stock ownership plan

The Bank has an employee stock ownership plan (ESOP) covering substantially all employees. The cost of shares issued to the ESOP but not yet allocated to participants is presented in the consolidated balance sheets as a reduction of stockholders' equity. Compensation expense is recorded based on the market price of the shares as they are committed to be released for allocation to participant accounts.

Stock-based compensation

The Company recognizes compensation cost for all stock-based awards based on the estimated grant date fair value. The fair value of stock options is estimated using a Black-Scholes option pricing model and amortized to expense over the option's vesting periods, as more fully disclosed in Note 12.

Off-balance-sheet financial instruments

Financial instruments include off-balance-sheet credit instruments, such as commitments to originate loans, issued to meet customer financing needs. The face amount for these items represents the exposure to loss, before considering customer collateral or ability to repay. Such financial instruments are recorded when they are funded.

Comprehensive income (loss)

Comprehensive income (loss) consists of net income (loss) and other comprehensive income (loss). Other comprehensive income (loss) includes unrealized gains and losses on securities available for sale net of the related tax effect.

Loss contingencies

Loss contingencies, including claims and legal actions arising in the ordinary course of business, are recorded as liabilities when the likelihood of loss is probable and an amount or range of loss can be reasonably estimated. In the normal course of business, management will reach settlements over legal issues which are recorded in the period received. Management does not believe there are any such matters that will have a material effect on the consolidated financial statements.

Fair value measurements

In accordance with the provisions of FASB ASC 820, *Fair Value Measurements and Disclosures*, fair value is an exit price, representing the amount that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants and is not adjusted for transaction costs. This guidance also establishes a framework for measuring fair value and expands disclosure of fair value measurements. See Note 16 for additional information.

Ottawa Savings Bancorp, Inc. & Subsidiary

Notes to Consolidated Financial Statements

Note 1. Summary of Significant Accounting Policies (Continued)

Fair value of financial instruments

Fair values of financial instruments are estimated using relevant market information and other assumptions, as more fully disclosed in Note 17. Fair value estimates involve uncertainties and matters of significant judgment regarding interest rates, credit risk, prepayments, and other factors, especially in the absence of broad markets for particular items. Changes in assumptions or in market conditions could significantly affect the estimates.

Cash surrender value of life insurance

The Company has purchased bank-owned life insurance on certain directors and officers. Bank-owned life insurance is recorded at its cash surrender value. Changes in the cash surrender values are included in other income.

Goodwill

Goodwill resulting from business combinations is generally determined as the excess of the fair value of the consideration transferred over the fair value of the net assets acquired and liabilities assumed as of the acquisition date. On December 31, 2014, the Company completed a merger (see Note 2), which resulted in the recognition of goodwill of approximately \$650,000. Goodwill acquired in a purchase business combination is not amortized, but tested for impairment at least annually or more frequently if events or circumstances exist that indicate that a goodwill test should be performed. The Company has selected December 31 as the date to perform the annual impairment test. At December 31, 2015, the Company's evaluation of goodwill indicated that goodwill was not impaired.

Core deposit intangible

The core deposit intangible represents the value of acquired customer relationships resulting from the Company's December 31, 2014 merger (see Note 2) with Twin Oaks. The core deposit intangible will be amortized using the double declining balance method over an estimated useful life of 9.8 years. The Company will periodically review the status of the core deposit intangible for any events or circumstances which may change the recoverability of the underlying basis.

Estimated future amortization expense on core deposit intangible is shown in the table below:

<u>Years Ending December 31,</u>	<u>Amount</u>
2016	\$92,000
2017	73,000
2018	58,000
2019	46,000
2020	38,000
Thereafter	144,000
	\$451,000

Ottawa Savings Bancorp, Inc. & Subsidiary**Notes to Consolidated Financial Statements****Note 1. Summary of Significant Accounting Policies (Continued)***Earnings per share*

Basic earnings per share is based on net income divided by the weighted average number of shares outstanding during the period, including allocated and committed-to-be-released Employee Stock Ownership Plan (“ESOP”) shares and vested Management Recognition Plan (“MRP”) shares. Diluted earnings per share show the dilutive effect, if any, of additional common shares issuable under stock options and awards. See Note 12 for additional information on the MRP and RRP plans.

	Years ended December	
	31,	
	2015	2014
Net income available to common stockholders	\$770,962	\$804,317
Basic potential common shares:		
Weighted average shares outstanding	2,894,123	2,120,105
Weighted average unallocated ESOP shares	(23,081)	(28,169)
Weighted average unvested MRP shares	(2,572)	(4,389)
Basic weighted average shares outstanding	2,868,470	2,087,547
Dilutive potential common shares:		
Weighted average unrecognized compensation on MRP shares	2,406	3,659
Weighted average RRP options outstanding *	10,366	-
Dilutive weighted average shares outstanding	2,881,242	2,091,206
