Table of Contents

GENERAL MOTORS COMPANY AND SUBSIDIARIES
NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

Note 1. Nature of Operations and Basis of Presentation

General Motors Company is sometimes referred to in this Quarterly Report on Form 10-Q as “we,” “our,” “us,” “ourselves,” the “Company,” “General Motors,” or “GM.” We design, build and sell cars, trucks and automobile parts worldwide. We also provide automotive financing services through General Motors Financial Company, Inc. (GM Financial). We analyze the results of our business through the following segments: GM North America (GMNA), GM Europe (GME), GM International Operations (GMIO), GM South America (GMSA) and GM Financial. Nonsegment operations are classified as Corporate. Corporate includes certain centrally recorded income and costs, such as interest, income taxes and corporate expenditures and certain nonsegment specific revenues and expenses.

As discussed in Note 8 we announced recalls of approximately 29 million vehicles and recorded recall-related charges of approximately \$2.5 billion in the six months ended June 30, 2014 and as discussed in Note 10 we announced the creation of a compensation program related to faulty ignition switches and recorded a charge of \$400 million in the six months ended June 30, 2014.

Basis of Presentation

The accompanying condensed consolidated financial statements have been prepared in conformity with U.S. GAAP pursuant to the rules and regulations of the Securities and Exchange Commission (SEC) for interim financial information. Accordingly they do not include all of the information and notes required by U.S. GAAP for complete financial statements. The accompanying condensed consolidated financial statements include all adjustments, composed of normal recurring adjustments, considered necessary by management to fairly state our results of operations, financial position and cash flows. The operating results for interim periods are not necessarily indicative of results that may be expected for any other interim period or for the full year. These condensed consolidated financial statements should be read in conjunction with the consolidated financial statements and notes thereto included in our Annual Report on Form 10-K for the year ended December 31, 2013 (2013 Form 10-K) as filed with the SEC. Certain prior year amounts were reclassified to conform to our current year presentation.

In the three months ended March 31, 2014 we changed our managerial and financial reporting structure to reclassify the results of our Russian subsidiaries previously reported in our GMIO segment to our GME segment. We have retrospectively revised the segment presentation for all periods presented. Refer to Note 15 for our segment reporting.

Change in Accounting Estimate

We have historically accrued estimated costs related to recall campaigns in GMNA when they are probable and reasonably estimable, which typically occurs once it is determined a specific recall campaign is needed and announced. During the three months ended June 30, 2014, following the significant increase in the number of vehicles subject to recall in GMNA, the results of our ongoing comprehensive safety review, additional engineering analysis, the creation of a new Global Product Integrity organization, the appointment of a new Global Vice President of Vehicle Safety responsible for the safety development of our vehicle systems and our overall commitment to customer satisfaction, we accumulated sufficient historical data in GMNA to support the use of an actuarial-based estimation technique for recall campaigns. As such, we now accrue at the time of vehicle sale in GMNA the costs for recall campaigns. Based on expanded historical data, we recorded a catch-up adjustment of \$874 million in Automotive cost of sales in the three months ended June 30, 2014 to adjust the estimate for recall costs for previously sold vehicles. In other geographical regions the historical claims data did not support the application of an actuarial-based model;

therefore, recall campaigns are accrued when probable and reasonably estimable, which typically occurs once it is determined a specific recall campaign is needed and announced.

Recently Adopted Accounting Principles

On January 1, 2014 we adopted Accounting Standards Update (ASU) 2013-11, "Presentation of an Unrecognized Tax Benefit When a Net Operating Loss Carryforward, a Similar Tax Loss, or a Tax Credit Carryforward Exists" (ASU 2013-11) which was issued to eliminate diversity in practice. This update requires that companies net their unrecognized tax benefits against all same-jurisdiction net operating losses or tax credit carryforwards that would be used to settle the position with a tax authority. The adoption of ASU 2013-11 did not have an effect on our condensed consolidated financial statements.

Accounting Standards Not Yet Adopted

Table of ContentsGENERAL MOTORS COMPANY AND SUBSIDIARIES
NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

In May 2014 the Financial Accounting Standards Board issued ASU 2014-09, "Revenue Recognition - Revenue from Contracts with Customers" (ASU 2014-09) that requires companies to recognize revenue when a customer obtains control rather than when companies have transferred substantially all risks and rewards of a good or service. This update is effective for annual reporting periods beginning on or after December 15, 2016 and interim periods therein and requires expanded disclosures. We are currently assessing the impact the adoption of ASU 2014-09 will have on our condensed consolidated financial statements.

Note 2. Marketable Securities

The following table summarizes information regarding marketable securities (dollars in millions):

	Fair Value Level	June 30, 2014		December 31, 2013	
		Cost	Fair Value	Cost	Fair Value

Total marketable securities classified as cash equivalents			11,870		10,837
Cash, cash equivalents and time deposits			7,994		9,184
Total cash and cash equivalents			\$19,864		\$20,021
Marketable securities					
Available-for-sale securities					
U.S. government and agencies	2	\$6,315	\$6,317	\$5,343	\$5,344
Corporate debt	2	1,866	1,873	1,867	1,869
Sovereign debt	2	36	36	22	22
Total available-for-sale securities		\$8,217	8,226	\$7,232	7,235
Trading securities - sovereign debt	2		1,709		1,737
Total marketable securities			\$9,935		\$8,972
Restricted cash and marketable securities					
Available-for-sale securities					
Money market funds	1	\$1,424	\$1,424	\$897	\$897
Other	2	30	31	34	35
Total marketable securities classified as restricted cash and marketable securities		\$1,454	1,455	\$931	932
Restricted cash and cash equivalents and time deposits			839		1,144
Total restricted cash and marketable securities			\$2,294		\$2,076

We are required to post cash and marketable securities as collateral for certain agreements that we enter into as part of our operations. Cash and marketable securities subject to contractual restrictions and not readily available are classified as Restricted cash and marketable securities. Restricted cash and marketable securities are invested in

accordance with the terms of the underlying agreements and include amounts related to securitizations, escrows and other cash collateral requirements.

Sales proceeds from investments classified as available-for-sale and sold prior to maturity were \$748 million and \$1.3 billion in the three months ended June 30, 2014 and 2013 and \$1.5 billion and \$1.7 billion in the six months ended June 30, 2014 and 2013. Cumulative unrealized gains and losses on available-for-sale securities were insignificant at June 30, 2014 and December 31, 2013 and net unrealized gains and losses on trading securities were insignificant in the three and six months ended June 30, 2014

7

Table of Contents

GENERAL MOTORS COMPANY AND SUBSIDIARIES

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS — (Continued)

and 2013. The following table summarizes the amortized cost and the fair value of investments classified as available-for-sale by contractual maturity at June 30, 2014 (dollars in millions):

	Amortized Cost	Fair Value
Due in one year or less	\$16,936	\$16,938
Due after one year through five years	1,961	1,969
Total available-for-sale securities with contractual maturities	\$18,897	\$18,907

Note 3. GM Financial Receivables, net

As a result of our October 2010 acquisition of GM Financial and GM Financial's acquisition of certain of the Ally Financial Inc. (Ally Financial) international operations in the year ended December 31, 2013, finance receivables are reported in two portfolios: pre-acquisition and post-acquisition portfolios. The pre-acquisition finance receivables portfolio consists of finance receivables that were considered to have had deterioration in credit quality at the time they were acquired with the acquisitions of GM Financial and the Ally Financial international operations. The pre-acquisition portfolio will decrease over time with the amortization of the acquired receivables. The post-acquisition finance receivables portfolio consists of finance receivables that were considered to have had no deterioration in credit quality at the time they were acquired with the acquisition of the Ally Financial international operations and finance receivables originated since the acquisitions of GM Financial and the Ally Financial international operations. The post-acquisition portfolio is expected to grow over time as GM Financial originates new receivables.

The following table summarizes the components of consumer and commercial finance receivables, net (dollars in millions):

	June 30, 2014			December 31, 2013		
	Consumer	Commercial	Total	Consumer	Commercial	Total
Pre-acquisition finance receivables, outstanding amount	\$839	\$—	\$839	\$1,294	\$—	\$1,294

Finance receivables	25,046	6,796	31,842	23,130	6,050	29,180
Less: allowance for loan losses	(575)	(40)	(615)	(497)	(51)	(548)
GM Financial receivables, net	\$24,471	\$6,756	\$31,227	\$22,633	\$5,999	\$28,632
Fair value of GM Financial receivables, net			\$31,604			\$28,668

Of the total allowance for loan losses in the above table, \$486 million and \$427 million were current at June 30, 2014 and December 31, 2013.

GM Financial determined the fair value of consumer finance receivables using observable and unobservable inputs within a cash flow model. The inputs reflect assumptions regarding expected prepayments, deferrals, delinquencies, recoveries and charge-offs of the loans within the portfolio. The cash flow model produces an estimated amortization schedule of the finance receivables which is the basis for the calculation of the series of cash flows that derive the fair value of the portfolio. The series of cash flows is calculated and discounted using a weighted-average cost of capital

Edgar Filing: General Motors Co - Form 10-Q

using unobservable debt and equity percentages, an unobservable cost of equity and an observable cost of debt based on companies with a similar credit rating and maturity profile as the portfolio. Macroeconomic factors could negatively affect the credit performance of the portfolio and therefore could potentially affect the assumptions used in GM Financial's cash flow model. A substantial majority of commercial finance receivables have variable interest rates and maturities of one year or less. Therefore the carrying amount is considered to be a reasonable estimate of fair value.

The following table summarizes activity for the allowance for loan losses on consumer and commercial finance receivables (dollars in millions):

8

Balance at end of period	\$615	\$447	\$615	\$447

The balances and activity of the allowance for commercial loan losses included in the above table at and in the three and six months ended June 30, 2014 and 2013 were insignificant.

Credit Quality

Consumer Finance Receivables

GM Financial uses proprietary scoring systems that measure the credit quality of the receivables using several factors, such as credit bureau information, consumer credit risk scores (e.g. FICO score) and contract characteristics. In addition to GM Financial's proprietary scoring systems GM Financial considers other individual consumer factors such as employment history, financial stability and capacity to pay. Subsequent to origination GM Financial reviews the credit quality of retail receivables based on customer payment activity. At the time of loan origination substantially all of GM Financial's international consumers have prime credit scores. In North America at the time of loan origination, many consumers have sub-prime credit scores, which is typically defined as a loan with a borrower that has a FICO score of less than 620. At June 30, 2014, 89% of the consumer finance receivables in North America were from consumers with FICO scores less than 620.

GM Financial purchases consumer finance contracts from automobile dealers without recourse, and accordingly, the dealer has no liability to GM Financial if the consumer defaults on the contract. Finance receivables are collateralized by vehicle titles and GM Financial has the right to repossess the vehicle in the event the consumer defaults on the payment terms of the contract.

An account is considered delinquent if a substantial portion of a scheduled payment has not been received by the date such payment was contractually due. At June 30, 2014 and December 31, 2013 the accrual of finance charge income has been suspended on delinquent consumer finance receivables with contractual amounts due of \$626 million and \$642 million. The following table summarizes the contractual amount of delinquent contracts, which is not significantly different than the recorded investment of the consumer finance receivables (dollars in millions):

	June 30, 2014		June 30, 2013	
	Amount	Percent of Contractual Amount Due	Amount	Percent of Contractual Amount Due
Delinquent contracts				
31-to-60 days	\$886	3.5 %	\$645	3.4 %
Greater-than-60 days	388	1.6 %	253	1.4 %
Total finance receivables more than 30 days delinquent	1,274	5.1 %	898	4.8 %
In repossession	40	0.1 %	35	0.2 %
Total finance receivables more than 30 days delinquent or in repossession	\$1,314	5.2 %	\$933	5.0 %

Impaired Finance Receivables - Troubled Debt Restructurings (TDRs)

9

Table of Contents

GENERAL MOTORS COMPANY AND SUBSIDIARIES

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS — (Continued)

Consumer finance receivables in the post-acquisition portfolio that become classified as TDRs because of payment deferral or other reasons are separately assessed for impairment. A specific allowance is estimated based on the present value of the expected future cash flows of the receivable discounted at the loan's original effective interest rate. The following table summarizes the outstanding recorded investment for consumer finance receivables that are considered to be TDRs and the related allowance (dollars in millions):

	June 30, 2014	December 31, 2013
Outstanding recorded investment	\$992	\$767
Less: allowance for loan losses	(123) (103
Outstanding recorded investment, net of allowance	\$869	\$664
Unpaid principal balance	\$1,009	\$779

Commercial Finance Receivables

GM Financial's commercial finance receivables consist of dealer financings, primarily for inventory purchases. A proprietary model is used to assign a risk rating to each dealer. A credit review of each dealer is performed at least annually, and if necessary, the dealer's risk rating is adjusted on the basis of the review. At June 30, 2014 and December 31, 2013 the commercial finance receivables on non-accrual status were insignificant. The following table summarizes the credit risk profile by dealer grouping of the commercial finance receivables (dollars in millions):

	June 30, 2014	December 31, 2013
Group I - Dealers with superior financial metrics	\$747	\$549
Group II - Dealers with strong financial metrics	1,577	1,460
Group III - Dealers with fair financial metrics	2,229	1,982
Group IV - Dealers with weak financial metrics	1,463	1,462
Group V - Dealers warranting special mention due to potential weaknesses	583	385
Group VI - Dealers with loans classified as substandard, doubtful or impaired	197	212
	\$6,796	\$6,050

The credit lines for Group VI dealers are suspended and no further funding is extended to these dealers.

Note 4. Inventories

The following table summarizes the components of Inventories (dollars in millions):

	June 30, 2014	December 31, 2013
Productive material, supplies and work in process	\$6,165	\$5,872
Finished product, including service parts	9,035	8,167
Total inventories	\$15,200	\$14,039

Note 5. Equity in Net Assets of Nonconsolidated Affiliates

Nonconsolidated affiliates are entities in which an equity ownership interest is maintained and for which the equity method of accounting is used due to the ability to exert significant influence over decisions relating to their operating and financial affairs.

Sales and income of our China joint ventures (China JVs) are not consolidated into our financial statements; rather, our proportionate share of the earnings of each joint venture is reflected as Equity income. There have been no significant ownership changes in our China JVs since December 31, 2013. The following table summarizes information regarding Equity income (dollars in millions):

10

Table of Contents

GENERAL MOTORS COMPANY AND SUBSIDIARIES

Others	47	11	57	18
Total equity income	\$523	\$429	\$1,128	\$984

We received dividends from nonconsolidated affiliates of \$1.3 billion and \$1.5 billion in the three months ended June 30, 2014 and 2013 and \$1.3 billion and \$1.6 billion in the six months ended June 30, 2014 and 2013. At June 30, 2014 and December 31, 2013 we had undistributed earnings including dividends declared but not received of \$1.7 billion and \$1.8 billion related to our nonconsolidated affiliates.

Transactions with Nonconsolidated Affiliates

Nonconsolidated affiliates are involved in various aspects of the development, production and marketing of cars, trucks and automobile parts. We purchase component parts and vehicles from certain nonconsolidated affiliates for resale to dealers. We also sell component parts and vehicles to certain nonconsolidated affiliates. The following tables summarize the effects of transactions with nonconsolidated affiliates (dollars in millions):

	Three Months Ended		Six Months Ended	
	June 30, 2014	June 30, 2013	June 30, 2014	June 30, 2013

Accounts payable			\$171	\$183

Note 6. Variable Interest Entities

Consolidated Variable Interest Entities (VIEs)

Automotive

VIEs that we do not control through a majority voting interest that are consolidated because we are the primary beneficiary include certain vehicle assembling, manufacturing and selling venture arrangements, the most significant of which is GM Egypt. Certain voting and other rights permit us to direct those activities of GM Egypt that most significantly affect its economic performance. The assets and liabilities recorded related to these VIEs consist primarily of Cash and cash equivalents, Accounts and notes receivable, net, Inventories, Property, net, Accounts payable (principally trade) and Accrued liabilities. Liabilities recognized as a result of consolidating VIEs generally do not represent claims against us or our other subsidiaries and assets recognized generally are for the benefit of the VIEs' operations and cannot be used to satisfy our obligations. The following tables summarize the carrying amounts

Edgar Filing: General Motors Co - Form 10-Q

of assets and liabilities and amounts recorded in earnings related to these consolidated VIEs stated prior to intercompany eliminations (dollars in millions):

	June 30, 2014	December 31, 2013
Total assets	\$618	\$564
Total liabilities	\$437	\$395

11

Table of Contents

GENERAL MOTORS COMPANY AND SUBSIDIARIES

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS — (Continued)

	Three Months Ended		Six Months Ended	
	June 30, 2014	June 30, 2013	June 30, 2014	June 30, 2013
Total net sales and revenue	\$327	\$250	\$633	\$496
Net income	\$30	\$17	\$57	\$37

GM Korea Company (GM Korea) and General Motors India Private Limited and Chevrolet Sales India Private Limited (collectively GM India) are non-wholly owned consolidated subsidiaries that we control through a majority voting interest. They are also VIEs because in the future they may require additional subordinated financial support. Combined creditors of GM Korea's and GM India's liabilities, which were composed of short-term and long-term debt, of \$218 million and \$242 million at June 30, 2014 and December 31, 2013, do not have recourse to our general credit.

Automotive Financing - GM Financial

GM Financial uses special purpose entities (SPEs) that are considered VIEs to issue variable funding notes to third party bank-sponsored warehouse facilities or asset-backed securities to investors in securitization transactions. The debt issued by these VIEs is backed by the cash flows related to finance receivables and leasing related assets transferred by GM Financial to the VIEs (Securitized Assets). GM Financial holds variable interests in the VIEs that could potentially be significant to the VIEs. GM Financial determined that they are the primary beneficiary of the SPEs because: (1) the servicing responsibilities for the Securitized Assets give GM Financial the power to direct the activities that most significantly impact the performance of the VIEs; and (2) the variable interests in the VIEs give GM Financial the obligation to absorb losses and the right to receive residual returns that could potentially be significant. The assets and liabilities of the VIEs are included in GM Financial's condensed consolidated balance sheets. The following table summarizes the assets and liabilities related to GM Financial's consolidated VIEs prior to intercompany eliminations (dollars in millions):

	June 30, 2014	December 31, 2013
Restricted cash	\$1,741	\$1,523
Securitized Assets	\$27,173	\$23,584
Securitization notes payable and other credit facilities	\$22,371	\$19,448

Restricted cash represents collections from the underlying Securitized Assets and certain reserve accounts held as credit enhancement for securitizations held by GM Financial for the benefit of the noteholders. Except for acquisition accounting adjustments, which are not recorded in SPE trusts, GM Financial recognizes finance charge income, leased vehicle income and other income on the Securitized Assets and interest expense on the secured debt issued by the SPEs. GM Financial also maintains an allowance for estimated probable credit losses on securitized receivables. Cash pledged to support the secured borrowings is deposited to a restricted cash account and recorded as restricted cash, which is invested in highly liquid securities with original maturities of 90 days or less.

The assets of the VIEs and the restricted cash held by GM Financial serve as the sole source of repayment for the asset-backed securities issued by these entities. Investors in the notes issued by the VIEs do not have recourse to GM Financial or its other assets, with the exception of customary representation and warranty repurchase provisions and indemnities that GM Financial provides as the servicer. GM Financial is not required and does not currently intend to provide additional financial support to these SPEs. While these subsidiaries are included in GM Financial's condensed consolidated financial statements, these subsidiaries are separate legal entities and their assets are legally owned by them and are not available to GM Financial's creditors.

Nonconsolidated VIEs

Automotive

VIEs that are not consolidated include certain vehicle assembling, manufacturing and selling venture arrangements and other automotive related entities to which we provided financial support including Ally Financial. We concluded these entities are VIEs because they do not have sufficient equity at risk or may require additional subordinated financial support. We currently lack the power or authority through voting or similar rights to direct the activities of these entities that most significantly affect their economic performance. Our variable interests in these nonconsolidated VIEs include accounts and notes receivable, equity in net assets, guarantees and financial support, some of which were provided to certain current or previously divested suppliers in order

12

Table of Contents

GENERAL MOTORS COMPANY AND SUBSIDIARIES

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS — (Continued)

to ensure that supply needs for production were not disrupted due to a supplier's liquidity concerns or possible shutdowns. The following table summarizes the carrying amounts of assets and liabilities and total off-balance sheet arrangements related to nonconsolidated VIEs (dollars in millions):

	June 30, 2014	December 31, 2013
Total assets	\$221	\$169
Total liabilities	\$945	\$838
Off-balance sheet arrangements	\$71	\$115

Assets and liabilities consist primarily of Equity in net assets of nonconsolidated affiliates, Short-term debt and current portion of long-term debt and Accrued liabilities. Off-balance sheet arrangements consist of commitments and other liquidity arrangements. Our maximum exposure to loss related to nonconsolidated VIEs approximated the carrying amount of total assets and the amount of off-balance sheet arrangements at June 30, 2014 and December 31, 2013. Refer to Note 10 for additional information on our maximum exposure to loss under agreements with Ally Financial.

Note 7. Short-Term and Long-Term Debt

Automotive

The following table summarizes the carrying amount and fair value of debt (dollars in millions):

	June 30, 2014	December 31, 2013
Carrying amount	\$7,474	\$7,137
Fair value	\$7,348	\$6,837

The fair value of debt was measured utilizing Level 2 inputs at June 30, 2014 and December 31, 2013 consisting of quoted market prices and if unavailable, a discounted cash flow model. This model utilizes observable inputs such as contractual repayment terms and benchmark yield curves, plus a spread based on our senior unsecured notes that is intended to represent our nonperformance risk. We acquire the benchmark yield curves and yields on unsecured notes from independent sources that are widely used in the financial industry.

Senior Unsecured Notes

In September 2013 we issued \$4.5 billion in aggregate principal amount of senior unsecured notes. These notes contain terms and covenants customary of these types of securities including limitations on the amount of certain secured debt we may issue. In June 2014 our registration statement for an exchange offer as part of the registration rights agreement associated with the senior unsecured notes was declared effective by the SEC. The exchange offer commenced in June 2014 and expired on July 21, 2014.

Technical Defaults and Covenant Violations

Several of our loan facilities require compliance with certain financial and operational covenants as well as regular reporting to lenders, including providing certain subsidiary financial statements. Failure to meet certain of these requirements may result in a covenant violation or an event of default depending on the terms of the agreement. An event of default may allow lenders to declare amounts outstanding under these agreements immediately due and payable, to enforce their interests against collateral pledged under these agreements or restrict our ability to obtain

additional borrowings. A foreign subsidiary was not in compliance with certain financial covenants under its \$71 million term loan facility. We are evaluating alternatives to cure this financial covenant issue and included this liability in Short-term debt and current portion of long-term debt at June 30, 2014 and December 31, 2013.

Losses on Extinguishment of Debt

In April 2013 GM Korea made a payment of \$708 million to acquire, prior to the mandatory redemption date, the remaining balance of GM Korea's mandatorily redeemable preferred shares that had a carrying amount of \$468 million. We recorded the difference of \$240 million as a loss on extinguishment of debt.

Table of Contents

GENERAL MOTORS COMPANY AND SUBSIDIARIES

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS — (Continued)

Automotive Financing - GM Financial

The following table summarizes the carrying amount and fair value of debt (dollars in millions):

	June 30, 2014		December 31, 2013	
	Carrying Amount	Fair Value	Carrying Amount	Fair Value
Secured				
Revolving credit facilities	\$8,591	\$8,611	\$9,000	\$8,995
Securitization notes payable	16,415	16,535	13,073	13,175
Total secured	25,006	25,146	22,073	22,170
Unsecured				
Senior notes	4,376	4,524	4,000	4,106
Credit facilities and other unsecured debt	3,220	3,227	2,973	2,972
Total unsecured	7,596	7,751	6,973	7,078
Total GM Financial debt	\$32,602	\$32,897	\$29,046	\$29,248

The fair value of debt included \$29.2 billion and \$23.0 billion measured utilizing Level 2 inputs and \$3.7 billion and \$6.2 billion measured utilizing Level 3 inputs at June 30, 2014 and December 31, 2013. For revolving credit facilities with variable interest rates and maturities of one year or less, and certain unsecured debt with maturities of one year or less, the carrying amount is considered to be a reasonable estimate of fair value. The fair value of other secured and unsecured debt is based on quoted market prices, when available. If quoted market prices are not available, the market value is estimated using quoted market prices of similar securities or by discounting future net cash flows expected to be settled using current risk-adjusted rates.

Secured Debt

The revolving credit facilities have revolving periods ranging from one to three years. At the end of the revolving period, if the facilities are not renewed, the debt will amortize over periods ranging up to seven years. Most of the secured debt was issued by VIEs and it is repayable only from proceeds related to the underlying pledged finance receivables and leases. Refer to Note 6 for additional information relating to GM Financial's involvement with VIEs. Weighted-average interest rates on secured debt are both fixed and variable, ranging from 0.5% to 13.4% at June 30, 2014.

Securitization notes payable represents debt issued by GM Financial through securitization transactions. In the six months ended June 30, 2014 GM Financial issued securitization notes payable of \$5.0 billion with a weighted-average interest rate of 1.5% maturing on various dates through 2022.

Unsecured Debt

In May 2014 GM Financial issued Canadian Dollar \$400 million of 3.25% senior notes which are due in May 2017 with interest payable semiannually. GM Financial intends to use the net proceeds from this offering for general corporate purposes. Senior notes outstanding at June 30, 2014 are due beginning in 2016 through 2023 and have interest rates that range from 2.75% to 6.75%.

In July 2014 GM Financial issued \$1.5 billion in aggregate principal amount of senior notes comprising \$700 million of 2.625% notes due in July 2017 and \$800 million of 3.5% notes due in July 2019. GM Financial intends to use the

net proceeds from this offering for general corporate purposes.

The maturity dates of unsecured credit facilities range up to five years. If not renewed, any balance outstanding under these credit facilities is either immediately due in full or will amortize over a defined period. Interest rates on unsecured credit facilities ranged from 0.25% to 13.55% at June 30, 2014.

Note 8. Product Warranty and Related Liabilities

The following table summarizes activity for policy, product warranty, recall campaigns and courtesy transportation (dollars in

14

Table of Contents

GENERAL MOTORS COMPANY AND SUBSIDIARIES

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS — (Continued)

millions):

	Six Months Ended	
	June 30,	June 30,
	2014	2013
Balance at beginning of period	\$7,601	\$7,633
Warranties issued and assumed in period - recall campaigns and courtesy transportation	2,485	343
Warranties issued and assumed in period - policy and warranty	1,309	1,369
Payments	(1,784) (1,659
Adjustments to pre-existing warranties	889	(37
Effect of foreign currency and other	28	(144
Balance at end of period	\$10,528	\$7,505

In the six months ended June 30, 2014 we recorded charges of approximately \$2.5 billion in Automotive cost of sales relating to recall campaigns and courtesy transportation, of which over 90% was recorded in GMNA. The recorded charges primarily comprised: (1) approximately \$680 million for 2.6 million vehicles to repair ignition switches that could result in a loss of electrical power under certain circumstances that may prevent front airbags from deploying in the event of a crash (accident victims who died or suffered physical injury associated with these vehicles (or their families) may be eligible to participate in a compensation program, as more fully described in Note 10); to fix ignition lock cylinders that could allow removal of the ignition key while the engine is running, leading to possible rollaway or crash; and to provide courtesy transportation to owners of affected vehicles; partially offset by adjustments of approximately \$95 million for courtesy transportation as a result of greater part availability and fewer customers utilizing courtesy transportation than originally estimated and approximately \$80 million for costs originally estimated separately for ignition switches and ignition lock cylinders that are now being shipped and repaired at the same time resulting in reduced costs; (2) approximately \$340 million for 1.9 million vehicles to replace either the power steering motor, the steering column, the power steering motor control unit or a combination of the steering column and the power steering motor control unit as the electric power steering could fail under certain circumstances; (3) approximately \$185 million for 1.3 million vehicles prone to non-deployment of the side impact restraints if vehicles are not serviced when the Service Air Bag warning light is illuminated; (4) approximately \$90 million for 2.7 million vehicles to modify the brake lamp wiring harness that could have corrosion develop due to micro-vibration; (5) approximately \$80 million for 1.5 million vehicles to replace front safety lap belt cables that could fatigue and separate over time; (6) approximately \$150 million for 1.4 million vehicles to replace the shift cable that could wear out over time resulting in mismatches of the gear position indicated by the shift lever; (7) approximately \$325 million for 12.1 million vehicles to rework or replace ignition keys because the ignition switch may move out of the “run” position which may impact power steering and power braking and, depending on the timing of the key movement relative to the activation of the sensing algorithm of a crash event, may result in airbags not deploying; and (8) approximately \$520 million for 5.2 million vehicles for other matters.

We have historically accrued estimated costs related to recall campaigns in GMNA when they are probable and reasonably estimable, which typically occurs once it is determined a specific recall campaign is needed and announced. During the three months ended June 30, 2014, following the significant increase in the number of vehicles subject to recall in GMNA, the results of our ongoing comprehensive safety review, additional engineering analysis, the creation of a new Global Product Integrity organization, the appointment of a new Global Vice President of Vehicle Safety responsible for the safety development of our vehicle systems and our overall commitment to customer satisfaction, we accumulated sufficient historical data in GMNA to support the use of an actuarial-based estimation technique for recall campaigns. Based on the expanded historical data, adjustments to pre-existing warranties in the six months ended June 30, 2014 included a catch-up adjustment of \$874 million to adjust the estimate for recall costs for previously sold vehicles. The estimation technique for recall campaigns takes into account our historical

experience, including incident rates of recall campaigns.

Note 9. Pensions and Other Postretirement Benefits

The following table summarizes the components of net periodic pension and other postretirement benefits (OPEB) (income) expense (dollars in millions):

GENERAL MOTORS COMPANY AND SUBSIDIARIES

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS — (Continued)

credit worthiness of the third parties. In March 2014 a new agreement was signed with Ally Financial that removed the repurchase obligation for vehicles invoiced after December 31, 2013. The existing repurchase obligation for vehicles invoiced prior to December 31, 2013 is maintained until December 31, 2014 at which time repurchase obligations will expire for all vehicles.

We have agreements with third parties that guarantee the fulfillment of certain suppliers' commitments and other obligations. These guarantees expire in 2014 through 2019 or are ongoing, or upon the occurrence of specific events.

In some instances certain assets of the party whose debt or performance we have guaranteed may offset, to some degree, the cost of the guarantee. The offset of certain of our payables to guaranteed parties may also offset certain guarantees, if triggered. If vehicles are required to be repurchased under vehicle repurchase obligations, the total exposure would be reduced to the extent vehicles are able to be resold to another dealer.

In connection with certain divestitures of assets or operating businesses, we have entered into agreements indemnifying certain buyers and other parties with respect to environmental conditions and other closure costs pertaining to real property we owned. We periodically enter into agreements that incorporate indemnification provisions in the normal course of business. It is not possible to estimate our maximum exposure under these indemnifications or guarantees due to the conditional nature of these obligations. Insignificant amounts have been recorded for such obligations as the majority of them are not probable or estimable at this time and the fair value of the guarantees at issuance was insignificant.

In addition to the guarantees and indemnifying agreements previously discussed, we indemnify dealers for certain product liability related claims as subsequently discussed.

With respect to other product-related claims involving products manufactured by certain joint ventures, we believe that costs incurred are adequately covered by recorded accruals. These guarantees terminate in years ranging from 2020 to 2028.

Other Litigation-Related Liability and Tax Administrative Matters

Various legal actions, governmental investigations, claims and proceedings are pending against us including matters arising out of alleged product defects; employment-related matters; governmental regulations relating to safety, emissions and fuel economy; product warranties; financial services; dealer, supplier and other contractual relationships; tax-related matters not recorded pursuant to Accounting Standards Codification (ASC) 740, "Income Taxes" (indirect tax-related matters) and environmental matters.

With regard to the litigation matters discussed in the previous paragraph, reserves have been established for matters in which we believe that losses are probable and can be reasonably estimated, the majority of which are associated with indirect tax-related matters as well as non-U.S. labor-related matters. Indirect tax-related matters are being litigated globally pertaining to value added taxes, customs, duties, sales, property taxes and other non-income tax related tax exposures. The various non-U.S. labor-related matters include claims from current and former employees related to alleged unpaid wage, benefit, severance and other compensation matters. Certain South American administrative proceedings are indirect tax-related and may require that we deposit funds in escrow. Escrow deposits may range from \$500 million to \$700 million. Some of the matters may involve compensatory, punitive or other treble damage claims, environmental remediation programs or sanctions that, if granted, could require us to pay damages or make other expenditures in amounts that could not be reasonably estimated at June 30, 2014. We believe that appropriate accruals have been established for such matters based on information currently available. Reserves for litigation losses are

recorded in Accrued liabilities and Other liabilities and deferred income taxes. Litigation is inherently unpredictable however; and unfavorable resolutions could occur. Accordingly it is possible that an adverse outcome from such proceedings could exceed the amounts accrued in an amount that could be material to our financial condition, results of operations and cash flows in any particular reporting period.

Proceedings Related to Ignition Switch Recall

In the three months ended March 31, 2014 we announced a recall to repair ignition switches that under certain circumstances could unintentionally move from the “run” position to the “accessory” or “off” position with a corresponding loss of power, which in turn may prevent front airbags from deploying in the event of a crash. The recall includes approximately 2.6 million Chevrolet Cobalt, HHR, Pontiac G5, Pursuit, Solstice, and Saturn ION and Sky vehicles.

Through July 23, 2014 we are aware of 95 putative class actions that have been filed against GM in various U.S. District Courts and state courts since the recall announcement alleging that consumers have been economically harmed by the recall and/or the

Table of Contents

GENERAL MOTORS COMPANY AND SUBSIDIARIES

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS — (Continued)

underlying vehicle condition. In the aggregate, these cases seek recovery for compensatory damages, including for alleged diminution in value of the vehicles, punitive damages and injunctive and other relief. Most, but not all, of these lawsuits are pending in federal court. Additionally, through July 23, 2014, eight putative class actions have been filed in various Provincial Courts in Canada seeking similar relief. In June 2014 the United States Judicial Panel on Multidistrict Litigation ordered that 15 of the then pending U.S. federal lawsuits involving ignition switches be transferred to and consolidated in a single federal court, the Southern District of New York. To date, more than 100 cases (including personal injury cases) have been transferred and consolidated in that same court, and GM has requested that various other recently filed federal lawsuits also be transferred and consolidated with those same actions. Because the majority of plaintiffs in these actions are suing over vehicles manufactured by pre-bankruptcy General Motors Corporation, GM will seek to enforce the terms of the federal Bankruptcy Court's July 2009 Sale Order and Injunction to preclude liability for any economic loss damages based on vehicles and parts manufactured prior to July 2009. These cases are in their very early stages. No discovery has yet taken place.

Through July 23, 2014 we are aware of two actions that have been filed against GM alleging that GM's purported concealment of the ignition switch and other defects that have been the subject of recalls in 2014 has diminished the value of other GM vehicles and seeking economic damages under California consumer protection statutes. One of these actions is a putative class action that has been consolidated with the ignition switch putative class actions and transferred to the Southern District of New York. The other action was brought by the Orange County, California district attorney and is pending in California state court. In the aggregate these actions seek recovery under California consumer protection statutes for economic damages as well as civil penalties, punitive damages, attorneys' fees, and costs.

On March 21, 2014 a putative shareholder class action was filed in the United States District Court for the Eastern District of Michigan against GM and various current and former officers of GM (Pio v. General Motors Company et al.) on behalf of purchasers of GM securities from November 17, 2010 through March 10, 2014. The complaint alleges that defendants made material misstatements and omissions relating to problems with the ignition switch in SEC filings. The plaintiff seeks unspecified monetary damages, interest and attorneys' fees and costs. Four shareholders have filed motions seeking to be appointed lead plaintiff in this putative class action. After the court rules on those motions and appoints a lead plaintiff, we anticipate the lead plaintiff will file an amended complaint that may include allegations different from those in the current complaint.

On March 28, 2014 a shareholder derivative action was filed in the United States District Court for the Eastern District of Michigan against certain current and former GM directors (Hockstein v. Barra, et al.). The complaint alleges breach of fiduciary duty, waste of corporate assets, and unjust enrichment by GM's directors in connection with monitoring, remediation and disclosure of the issues underlying the ignition switch recall. Between April 9, 2014 and July 22, 2014 seven other similar shareholder derivative actions were filed in the Eastern District of Michigan (Police Retirement System of St. Louis v. Barra, et al.), the Circuit Court for Wayne County, Michigan (Bekkerman v. Barra, et al., Wietschiner, et al. v. Barra, et al.) the Chancery Court for the State of Delaware (Nash v. Barra, et al., DiStefano v. Barra, et al., Newspaper and Magazine Employees Union v. Barra, et al., Boso v. Solso, et al.). All of these actions seek damages allegedly resulting from defendants' failure to timely identify, correct and disclose the ignition switch defect, an order compelling implementation of various corporate governance policies and practices, and other relief purportedly for the benefit of GM.

Through July 23, 2014 we are aware of 26 actions pending against GM alleging injury or death as a result of faulty ignition switches and/or the failure of air bags to properly deploy due to faulty ignition switches. Of these actions eight have been transferred to federal court in the Southern District of New York, three are the subject of GM's motion to consolidate and transfer to a single state court in Texas, and 15 are pending in various other federal and state courts

throughout the country. These actions generally assert that GM intentionally and fraudulently concealed facts relating to faulty ignition switches and related defects from plaintiffs, the public and the National Highway Traffic Safety Administration (NHTSA) over a lengthy period. These complaints assert various causes of action under federal and state law, including strict products liability, negligence, breach of implied warranty, fraud and fraudulent concealment, and Federal and Georgia Racketeer Influenced and Corrupt Organizations Acts and seek compensatory damages, treble damages, punitive damages and attorneys' fees and costs.

Through July 23, 2014 we are aware of six actions pending against GM alleging injury or death as a result of inadvertent ignition key rotation and/or failure of air bags to properly deploy as a result of inadvertent ignition key rotation. Of these actions, two have been transferred to federal court in the Southern District of New York, one is pending in federal court in the Southern District of Texas, two are pending in Texas state court and one is pending in Indiana state court. In the aggregate these actions assert that GM intentionally and fraudulently concealed facts relating to the inadvertent ignition key rotation and related defects from plaintiffs, the public and NHTSA over a lengthy period. These complaints assert various causes of action under federal and state law, including

Table of Contents

GENERAL MOTORS COMPANY AND SUBSIDIARIES

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS — (Continued)

strict products liability, negligence, breach of implied warranties, fraud and fraudulent concealment and seek compensatory damages, punitive damages and attorneys' fees and costs.

We are also subject to product liability claims associated with recently announced recalls, none of which we believe to be individually material. The number of product liability claims we receive may be higher as a result of the recently announced recalls.

GM intends to vigorously defend all of these actions.

We are also the subject of various inquiries, investigations, subpoenas and requests for information from the U.S. Attorney's Office for the Southern District of New York, Congress, the SEC, Transport Canada and 45 state attorney generals in connection with our recent recalls. We are investigating these matters internally and believe we are cooperating fully with all requests. Such investigations could in the future result in the imposition of material damages, fines or civil and criminal penalties.

We are currently unable to estimate a range of reasonably possible loss for the lawsuits and investigations because these matters involve significant uncertainties at these early stages. These uncertainties include the legal theory or the nature of the claims as well as the complexity of the facts. Although we cannot estimate a reasonable range of loss based on currently available information, the resolution of these matters could have a material adverse effect on our financial position, results of operations or cash flows.

GM Korea Wage Litigation

Commencing on or about September 29, 2010 current and former hourly employees of GM Korea filed eight separate group actions in the Incheon District Court in Incheon, Korea. The cases, which in aggregate involve more than 10,000 employees, allege that GM Korea failed to include bonuses and certain allowances in its calculation of Ordinary Wages due under the Presidential Decree of the Korean Labor Standards Act. On November 23, 2012 the Seoul High Court (an intermediate level appellate court) issued a decision affirming a decision of the Incheon District Court in a case involving five GM Korea employees which was contrary to GM Korea's position. GM Korea appealed to the Supreme Court of the Republic of Korea (Supreme Court) and initiated a constitutional challenge to the adverse interpretation of the relevant statute. In December 2013 the Supreme Court rendered a decision in a case involving another company not affiliated with us which addressed many of the issues presented in the cases pending against GM Korea and resolved many of them in a manner which we believe is favorable to GM Korea. In particular, while the Supreme Court held that fixed bonuses should be included in the calculation of Ordinary Wages, it also held that claims for retroactive application of this rule would be barred under certain circumstances. On May 29, 2014 the Supreme Court rendered its decision with respect to the case involving the five GM Korea employees and remanded the case to the Seoul High Court consistent with its December 2013 ruling. At June 30, 2014 we have an accrual of 79 billion South Korean Won (equivalent to \$78 million) related to these cases. We estimate our reasonably possible loss, as defined by ASC 450, "Contingencies," in excess of amounts accrued to be 591 billion South Korean Won (equivalent to \$584 million) at June 30, 2014. We are also party to litigation with current and former salaried employees over allegations relating to Ordinary Wages regulation. At June 30, 2014 we have identified a reasonably possible loss in excess of the amount of our accrual of 159 billion South Korean Won (equivalent to \$157 million). Both the scope of claims asserted and GM Korea's assessment of any or all of the individual claim elements may change if new information becomes available. These cases are currently pending before various district courts in Korea and the Supreme Court.

GMCL Dealers' Claim

On February 12, 2010 a claim was filed in the Ontario Superior Court of Justice against General Motors of Canada Limited (GMCL) on behalf of a purported class of over 200 former GMCL dealers (the Plaintiff Dealers) which had entered into wind-down agreements with GMCL. In May 2009 in the context of the global restructuring of the business and the possibility that GMCL might be required to initiate insolvency proceedings, GMCL offered the Plaintiff Dealers the wind-down agreements to assist with their exit from the GMCL dealer network and to facilitate winding down their operations in an orderly fashion by December 31, 2009 or such other date as GMCL approved but no later than on October 31, 2010. The Plaintiff Dealers allege that the Dealer Sales and Service Agreements were wrongly terminated by GMCL and that GMCL failed to comply with certain disclosure obligations, breached its statutory duty of fair dealing and unlawfully interfered with the Plaintiff Dealers' statutory right to associate in an attempt to coerce the Plaintiff Dealers into accepting the wind-down agreements. The Plaintiff Dealers seek damages and assert that the wind-down agreements are rescindable. The Plaintiff Dealers' initial pleading makes reference to a claim "not exceeding" Canadian Dollar \$750 million, without explanation of any specific measure of damages. On March 1, 2011 the court approved certification of a class for the purpose of deciding a number of specifically defined issues including: (1)

19

Table of Contents

GENERAL MOTORS COMPANY AND SUBSIDIARIES

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS — (Continued)

whether GMCL breached its obligation of "good faith" in offering the wind-down agreements; (2) whether GMCL interfered with the Plaintiff Dealers' rights of free association; (3) whether GMCL was obligated to provide a disclosure statement and/or disclose more specific information regarding its restructuring plans in connection with proffering the wind-down agreements; and (4) assuming liability, whether the Plaintiff Dealers can recover damages in the aggregate (as opposed to proving individual damages). A number of former dealers have opted out of participation in the litigation, leaving 181 dealers in the certified class. Trial of the class issues is scheduled to commence in the third quarter of 2014. The current prospects for liability are uncertain, but because liability is not deemed probable we have no accrual relating to this litigation. We cannot estimate the range of reasonably possible loss in the event of liability as the case presents a variety of different legal theories, none of which GMCL believes are valid.

UAW Claim

On April 6, 2010 the International Union, United Automobile, Aerospace and Agriculture Implement Workers of America (UAW) filed suit against us in the U.S. District Court for the Eastern District of Michigan claiming that we breached an obligation to contribute \$450 million to the UAW Retiree Medical Benefits Trust. The UAW alleges that we were contractually required to make this contribution. On December 10, 2013 the court granted our motion for summary judgment and dismissed the claims asserted by the UAW, holding that the relevant agreement is unambiguous and does not require the payment sought. The UAW has appealed. At this juncture we believe the prospects for liability on the claims asserted in this matter are remote.

Product Liability

With respect to product liability claims involving our and General Motors Corporation products, we believe that any judgment against us for actual damages will be adequately covered by our recorded accruals and, where applicable, excess liability insurance coverage. Although punitive damages are claimed in some of these lawsuits and such claims are inherently unpredictable, accruals incorporate historic experience with these types of claims. In addition we indemnify dealers for certain product liability related claims including products sold by General Motors Corporation. We monitor actual claims experience and make periodic adjustments to our estimates. In light of recent vehicle recalls it is reasonably possible that our accruals for product liability claims may increase in future periods in material amounts, although we cannot estimate a reasonable range of incremental loss based on currently available information.

Liabilities have been recorded in Accrued liabilities and Other liabilities and deferred income taxes for the expected cost of all known product liability claims plus an estimate of the expected cost for product liability claims that have already been incurred and are expected to be filed in the future for which we are self-insured.

Ignition Switch Recall Compensation Program

In the three months ended June 30, 2014 we announced the creation of a compensation program (the Program) to compensate accident victims who died or suffered physical injury (or their families) as a result of a faulty ignition switch related to the 2.6 million vehicles recalled as more fully described in Note 8. It is important to our company that we reach everyone through this Program who has been impacted. The Program is being administered by an independent program administrator. The independent administrator has established a protocol that defines the eligibility requirements to participate in the Program. There is no cap on the amount of payments that can be made to claimants under the Program.

At June 30, 2014 we have an accrual of \$400 million recorded in Corporate which represents our best estimate of amounts that may be paid under the Program. However, it is reasonably possible that the liability could exceed our recorded amount by approximately \$200 million. The most significant estimates affecting the amount recorded include the number of participants that have eligible claims related to death and physical injury, which also contemplates the severity of injury, the length of hospital stays and related compensation amounts and the number of people who actually elect to participate in the Program. Our estimate is subject to significant uncertainties, as programs of this nature are highly unusual and each eligible claim will have a unique underlying fact pattern. While we do not anticipate material changes to our current estimate, it is possible that material changes could occur should actual eligible claims and the related compensation amounts differ from this estimate. The Program will accept claims from August 1, 2014 through December 31, 2014. Payments to eligible claimants are anticipated to begin in the third quarter of 2014 and continue through the first half of 2015. Accident victims (or their families) could choose not to participate in the Program and pursue litigation against us.

Environmental Liability

20

Table of Contents

GENERAL MOTORS COMPANY AND SUBSIDIARIES

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS — (Continued)

Automotive operations, like operations of other companies engaged in similar businesses, are subject to a wide range of environmental protection laws, including laws regulating air emissions, water discharges, waste management and environmental remediation. Liabilities have been recorded primarily in Other liabilities and deferred income taxes for the expected costs to be paid over the periods of remediation for the applicable sites, which typically range from five to 30 years.

The final outcome of environmental matters cannot be predicted with certainty at this time. Subsequent adjustments to initial estimates are recorded as necessary based upon additional information obtained. In future periods new laws or regulations, advances in remediation technologies and additional information about the ultimate remediation methodology to be used could significantly change our estimates. It is possible that the resolution of one or more environmental matters could exceed the amounts accrued in an amount that could be material to our financial condition, results of operations and cash flows. At June 30, 2014 we estimate the remediation losses could range from \$110 million to \$210 million.

Other Matters

Brazil Excise Tax Incentive

In October 2012 the Brazilian government issued a decree which increased an excise tax rate by 30 percentage points, but also provided an offsetting tax incentive that requires participating companies to meet certain criteria, such as local investment and fuel efficiency standards. Participating companies that fail to meet the required criteria are subject to clawback provisions and fines. At June 30, 2014 we believe it is reasonably assured that the program requirements will be met based on the current business model and available technologies.

GME Planned Spending Guarantee

As part of our Opel/Vauxhall restructuring plan agreed to with European labor representatives we committed to achieving specified milestones associated with planned spending from 2011 to 2014 on certain product programs. If we had failed to accomplish the requirements set out under the agreement we would have been required to pay certain amounts up to Euro 265 million for each of those years, and/or interest on those amounts, to our employees. In April 2014 we reached an agreement with the European labor representatives terminating the agreement as all milestones have been or will be met timely in 2014.

India Tavera Emissions Compliance

We determined there was an emissions compliance issue with certain Tavera models produced in India. We self-reported this issue in the three months ended September 30, 2013 to local government authorities and are continuing to cooperate. We developed a solution, and while the issue was not safety related, we voluntarily recalled the vehicles to serve our customers.

Note 11. Income Taxes

For interim income tax reporting we estimate our annual effective tax rate and apply it to our year to date ordinary income (loss). Tax jurisdictions with a projected or year to date loss for which a tax benefit cannot be realized are excluded. The tax effects of unusual or infrequently occurring items, including changes in judgment about valuation allowances and effects of changes in tax laws or rates, are reported in the interim period in which they occur.

In the three months ended June 30, 2014 income tax benefit of \$254 million primarily resulted from tax benefit attributable to entities included in our effective tax rate calculation and other tax benefit items, none of which are individually significant. In the three months ended June 30, 2013 income tax expense of \$742 million primarily resulted from tax expense attributable to entities included in our effective tax rate calculation. In the six months ended June 30, 2014 income tax benefit of \$478 million primarily resulted from tax benefit attributable to entities included in our effective tax rate calculation and deductions taken for stock investments in non-US affiliates and tax audit settlements reported in the first quarter of 2014. In the six months ended June 30, 2013 income tax expense of \$1.2 billion primarily resulted from tax expense attributable to entities included in our effective tax rate calculation, partially offset by tax benefit related to the U.S. research credit legislated in the three months ended March 31, 2013. We have open tax years from 2006 to 2013 with various significant tax jurisdictions.

Note 12. Restructuring and Other Initiatives

21

Table of Contents

GENERAL MOTORS COMPANY AND SUBSIDIARIES

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS — (Continued)

We have executed various restructuring and other initiatives and we plan to execute additional initiatives in the future, if necessary, in order to align manufacturing capacity and other costs with prevailing global automotive production and to improve the utilization of remaining facilities. To the extent these programs involve voluntary separations no liabilities are generally recorded until offers to employees are accepted. If employees are involuntarily terminated a liability is generally recorded at the communication date. Related charges are recorded in Automotive cost of sales and Automotive selling, general and administrative expense.

The following tables summarize the reserves related to restructuring and other initiatives and charges by segment, including postemployment benefit reserves and charges (dollars in millions):

	GMNA	GME	GMIO	GMSA	Total
Balance at January 1, 2014	\$497	\$503	\$333	\$16	\$1,349
Additions, interest accretion and other	10	191	48	49	298

Effect of foreign currency	5	(4)	1	—	2
Balance at June 30, 2014(a)	\$460	\$699	\$264	\$8	\$1,431
	GMNA	GME	GMIO	GMSA	Total
Balance at January 1, 2013	\$653	\$590	\$39	\$38	\$1,320
Additions, interest accretion and other	27	35	2	22	86
Payments	(58)	(116)	(26)	(12)	(212)
Revisions to estimates	13	—	(1)	—	12
Effect of foreign currency	(6)	(14)	—	1	(19)
Balance at March 31, 2013	629	495	14	49	1,187
Additions, interest accretion and other	12	31	15	12	70
Payments	(56)	(80)	(13)	(34)	(183)
Revisions to estimates	(16)	(2)	—	—	(18)
Effect of foreign currency	(10)	6	(1)	(2)	(7)
Balance at June 30, 2013(a)	\$559	\$450	\$15	\$25	\$1,049

The remaining cash payments related to these reserves for restructuring and other initiatives, including temporary (a) layoff benefits of \$354 million and \$346 million at June 30, 2014 and 2013 for GMNA, primarily relate to postemployment benefits.

Three and Six Months Ended June 30, 2014

GME recorded charges, interest accretion and other and revisions to estimates primarily related to our plan to terminate all vehicle and transmission production at our Bochum, Germany facility by the end of 2014. Through June 30, 2014 the active separation programs related to Germany had a total cost of \$553 million. We expect to complete these programs in 2014 and incur additional charges of \$310 million. In total 3,690 employees will be affected by these programs.

GMIO recorded charges, interest accretion and other and revisions to estimates for separation programs in Australia, Korea and Chevrolet Europe locations. Through June 30, 2014 the active separation programs related to Australia, Korea and Chevrolet Europe locations had a total cost of \$390 million and had affected a total of 3,350 employees. We expect to complete these programs in 2017 and incur additional restructuring and other charges of \$440 million.

Table of Contents

GENERAL MOTORS COMPANY AND SUBSIDIARIES

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS — (Continued)

GMSA recorded charges, interest accretion and other primarily for active separation programs in Brazil and Venezuela. Through June 30, 2014 the active separation programs related to Brazil and Venezuela had a total cost of \$159 million.

Three and Six Months Ended June 30, 2013

GMNA recorded charges, interest accretion and other and revisions to estimates primarily related to cash severance incentive programs for skilled trade U.S. hourly employees.

GME recorded charges, interest accretion and other and revisions to estimates for previously announced separation and early retirement programs. Through June 30, 2013 the active separation programs related to Germany and the United Kingdom had a total cost of \$93 million and had affected a total of 625 employees.

Note 13. Stockholders' Equity

Preferred and Common Stock

We have 2.0 billion shares of preferred stock and 5.0 billion shares of common stock authorized for issuance. We had 156 million shares of Series A Preferred Stock issued and outstanding at June 30, 2014 and December 31, 2013, and 1.6 billion and 1.5 billion shares of common stock issued and outstanding at June 30, 2014 and December 31, 2013.

The following table summarizes dividends paid on our preferred and common stock (dollars in millions):

	Three Months Ended		Six Months Ended	
	June 30, 2014	June 30, 2013	June 30, 2014	June 30, 2013
Series A Preferred Stock(a)	\$88	\$156	\$176	\$311
Series B Preferred Stock(b)		\$58		\$118
Common stock(c)	\$481	\$—	\$962	\$—

(a) In September 2013 we purchased 120 million shares (or 43.5% of the total shares outstanding) of our Series A Preferred Stock.

(b) On December 1, 2013 all outstanding shares of our Series B Preferred Stock were converted into shares of our common stock.

(c) No common stock dividends were declared or paid prior to 2014.

Accumulated Other Comprehensive Loss

The following table summarizes the components of Accumulated other comprehensive loss (dollars in millions):

Other comprehensive income (loss)	39	64	(25)	(46)	(47)	1
Other comprehensive loss attributable to noncontrolling interests	5	—	5	11	—	11
Balance at end of period	\$ 398	\$ 3,531	\$(3,133)	\$(7,654)	\$ 386	\$(8,040)

(a) Included in the computation of net periodic pension and OPEB (income) expense. Refer to Note 9 for additional information.

Note 14. Earnings Per Share

Basic and diluted earnings per share are computed by dividing Net income attributable to common stockholders by the weighted-average common shares outstanding in the period. Diluted earnings per share is computed by giving effect to all potentially dilutive securities that are outstanding.

The following table summarizes basic and diluted earnings per share (in millions, except for per share amounts):

24

Weighted-average common shares outstanding - basic	1,608	1,376	1,598	1,374
Basic earnings per common share	\$0.12	\$0.87	\$0.20	\$1.57
Diluted earnings per share				
Net income attributable to stockholders	\$278	\$1,414	\$491	\$2,589
Add: preferred dividends to holders of Series B Preferred Stock		60		118
Less: cumulative dividends on preferred stock(a)	(88) (214) (176) (429
Less: earnings adjustment for dilutive stock compensation rights	—	—	(14) —
Net income attributable to common stockholders	\$190	\$1,260	\$301	\$2,278
Weighted-average common shares outstanding - diluted				
Weighted-average common shares outstanding - basic	1,608	1,376	1,598	1,374
Dilutive effect of warrants and restricted stock units (RSUs)	80	150	91	143
Dilutive effect of conversion of Series B Preferred Stock		151		151
Weighted-average common shares outstanding - diluted	1,688	1,677	1,689	1,668
Diluted earnings per common share	\$0.11	\$0.75	\$0.18	\$1.37

Includes earned but undeclared dividends of \$15 million on our Series A Preferred Stock in the three and six (a) months ended June 30, 2014 and earned but undistributed dividends of \$26 million on our Series A Preferred Stock and \$20 million on our Series B Preferred stock in the three and six months ended June 30, 2013.

Prior to the December 2013 conversion to common shares, our Series B Preferred Stock was a participating security that required the application of the more dilutive of the two-class or if-converted method to calculate earnings per share when the applicable market value of our common stock was below or above the range of \$33.00 to \$39.60 per common share. We were required to use the if-converted method to calculate earnings per share when the applicable market value of our common stock was within this range, which applied in the three and six months ended June 30, 2013. The dilutive effect of the Series B Preferred Stock was determined by assuming conversion of the securities at the beginning of the period resulting in an increase to the weighted-average common shares outstanding and an increase to Net income attributable to common stockholders from adding the accumulated dividends on our Series B Preferred Stock.

In the three and six months ended June 30, 2014 and 2013 warrants to purchase 46 million shares were not included in the computation of diluted earnings per share because the warrants' exercise price was greater than the average market price of the common shares.

Note 15. Segment Reporting

We analyze the results of our business through the following segments: GMNA, GME, GMIO, GMSA and GM Financial. The chief operating decision maker evaluates the operating results and performance of our automotive segments through income before interest and income taxes, as adjusted for additional amounts, which is presented net

of noncontrolling interests, and evaluates GM Financial through income before income taxes, as adjusted for additional amounts. Each segment has a manager responsible for executing our strategies. Our automotive manufacturing operations are integrated within the segments, benefit from broad-based trade agreements and are subject to regulatory requirements, such as Corporate Average Fuel Economy regulations. While not all vehicles within a segment are individually profitable on a fully allocated cost basis, those vehicles are needed in our product mix in order to attract customers to dealer showrooms and to maintain sales volumes for other, more profitable vehicles. Because of these and other factors, we do not manage our business on an individual brand or vehicle basis.

GENERAL MOTORS COMPANY AND SUBSIDIARIES

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS — (Continued)

Substantially all of the cars, trucks and parts produced are marketed through retail dealers in North America, and through distributors and dealers outside of North America, the substantial majority of which are independently owned.

In addition to the products sold to dealers for consumer retail sales, cars and trucks are also sold to fleet customers, including daily rental car companies, commercial fleet customers, leasing companies and governments. Sales to fleet customers are completed through the network of dealers and in some cases sold directly to fleet customers. Retail and fleet customers can obtain a wide range of aftersale vehicle services and products through the dealer network, such as maintenance, light repairs, collision repairs, vehicle accessories and extended service warranties.

GMNA primarily meets the demands of customers in North America with vehicles developed, manufactured and/or marketed under the following four brands:

- Buick
- Cadillac
- Chevrolet
- GMC

The demands of customers outside of North America are primarily met with vehicles developed, manufactured and/or marketed under the following brands:

- Buick
- Cadillac
- Chevrolet
- GMC
- Holden
- Opel
- Vauxhall

At June 30, 2014 we also had equity ownership stakes directly or indirectly in entities through various regional subsidiaries, primarily in Asia. These companies design, manufacture and market vehicles under the following brands:

- Alpheon
- Baojun
- Buick
- Cadillac
- Chevrolet
- Jiefang
- Wuling

Our automotive operations' interest income and interest expense are recorded centrally in Corporate. All intersegment balances and transactions have been eliminated in consolidation.

The following tables summarize key financial information by segment (dollars in millions):

At and For the Three Months Ended June 30, 2014

GENERAL MOTORS COMPANY AND SUBSIDIARIES

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

Basis of Presentation

This Management's Discussion and Analysis of Financial Condition and Results of Operations (MD&A) should be read in conjunction with the accompanying condensed consolidated financial statements and the consolidated financial statements and notes thereto included in our 2013 Form 10-K, as filed with the SEC.

In the three months ended March 31, 2014 we changed our managerial and financial reporting structure to reclassify the results of our Russian subsidiaries previously reported in our GMIO segment to our GME segment. We have retrospectively revised the segment presentation for all periods presented.

Wholesale vehicle sales data, which represents sales directly to dealers and others, is the measure that correlates vehicle sales to our revenue from the sale of vehicles, which is the largest component of automotive Net sales and revenue. Wholesale vehicle sales exclude vehicles produced by unconsolidated joint ventures. Retail vehicle sales data, which represents estimated sales to the end customer, including fleets, does not correlate directly to the revenue we recognize during the period. However, retail vehicle sales data is indicative of the underlying demand for our vehicles, is the basis for our market share, and is based upon the good faith estimates of management and includes all sales by joint ventures on a total vehicle basis, not based on the percentage of ownership in the joint venture. Market share information is based primarily on retail vehicle sales volume, but estimates may be used where retail vehicle sales volume is not available.

Overview

Automotive

Our vision is to design, build and sell the world's best vehicles. We offer a global vehicle portfolio of cars, crossovers and trucks. We are committed to leadership in vehicle design, quality, reliability, telematics and infotainment and safety, as well as to developing key energy efficiency and diversity and advanced propulsion technologies, including electric vehicles. Our business is diversified across products and geographic markets. We meet the local sales and service needs of our retail and fleet customers with a global network of independent dealers. In the six months ended June 30, 2014, 52.3% of our wholesale vehicle sales volume was generated outside the U.S.

As more fully described in the "GM North America" section of MD&A we recorded charges of approximately \$2.5 billion in Automotive cost of sales relating to recall campaigns and courtesy transportation in the six months ended June 30, 2014, of which over 90% was recorded in GMNA.

In the three months ended June 30, 2014 we announced the creation of a compensation program (the Program) to compensate accident victims who died or suffered physical injury (or their families) as a result of a faulty ignition switch related to the 2.6 million vehicles recalled under the Ignition Switch Recall. Refer to the "GM North America" section of MD&A for additional information on the Ignition Switch Recall. It is important to our company that we reach everyone through this Program who has been impacted. The Program is being administered by an independent program administrator. The independent administrator has established a protocol that defines the eligibility requirements to participate in the Program. There is no cap on the amount of payments that can be made to claimants under the Program.

In the three months ended June 30, 2014 we recorded \$0.4 billion in Automotive selling, general and administrative expense in Corporate which represents our best estimate of amounts that may be paid under the Program. However, it is reasonably possible that the liability could exceed our recorded amount by approximately \$0.2 billion. The most significant estimates affecting the amount recorded include the number of participants that have eligible claims related to death and physical injury, which also contemplates the severity of injury, the length of hospital stays and related compensation amounts and the number of people who actually elect to participate in the Program. Our estimate is subject to significant uncertainties, as programs of this nature are highly unusual and each eligible claim will have a unique underlying fact pattern. While we do not anticipate material changes to our current estimate, it is possible that material changes could occur if actual eligible claims and the related compensation amounts differ from this estimate. The Program will accept claims from August 1, 2014 through December 31, 2014. Payments to eligible claimants are anticipated to begin in the third quarter of 2014 and continue through the first half of 2015. Accident victims (or their families) could choose not to participate in the Program and pursue litigation against us. The amount recorded in the three months ended June 30, 2014 was treated as an adjustment for EBIT-adjusted reporting purposes.

Table of Contents

GENERAL MOTORS COMPANY AND SUBSIDIARIES

Even though our Net income decreased from \$2.6 billion to \$0.6 billion we had strong financial results in the six months ended June 30, 2014 excluding the impact of recall-related charges. GMNA and our consolidated international operations are consistent with our expectations, while Europe and China are outperforming our expectations. However, we experienced weaker performance in GMSA due to the challenging environment in Venezuela and Brazil.

We analyze the results of our automotive business through our four geographically-based segments:

GMNA

GMNA has sales, manufacturing and distribution operations in the U.S., Canada and Mexico and sales and distribution operations in Central America and the Caribbean. GMNA represented 55.1% of our wholesale vehicle sales volume in the six months ended June 30, 2014 and we had the largest market share, based upon retail vehicle sales, in North America at 16.9%. Combined Chevrolet, Buick, GMC and Cadillac retail vehicle sales in the six months ended June 30, 2014 increased by two percent compared with a year ago, including passenger car sales increases of three percent and truck increases of one percent. We achieved record average transaction prices (ATPs) in the United States in the six months ended June 30, 2014, according to J.D. Power PIN estimates, with ATPs up approximately \$2,700 per unit. This increase was due in large measure to a \$5,000 year-over-year increase in full-size pickup ATPs and a \$5,800 year-over-year increase in full-size SUV ATPs.

Customer safety and satisfaction were the major reasons for the recall of approximately 29 million vehicles announced during the first six months of 2014. These recalls included: (1) approximately 2.6 million vehicles to repair ignition switches that could result in a loss of electrical power under certain circumstances that may prevent front airbags from deploying in the event of a crash (accident victims who died or suffered physical injury associated with these vehicles (or their families) may be eligible to participate in a compensation program, as more fully described in Note 10 to our condensed consolidated financial statements) and to fix ignition lock cylinders that could allow removal of the ignition key while the engine is running, leading to possible rollaway or crash; (2) approximately 1.9 million vehicles to replace either the power steering motor, the steering column, the power steering motor control unit or a combination of the steering column and the power steering motor control unit as the electric power steering could fail under certain circumstances; (3) approximately 1.3 million vehicles prone to non-deployment of the side impact restraints if vehicles are not serviced when the Service Air Bag warning light is illuminated; (4) approximately 2.7 million vehicles to modify the brake lamp wiring harness that could have corrosion develop due to micro-vibration; (5) approximately 1.5 million vehicles to replace front safety lap belt cables that could fatigue and separate over time; (6) approximately 1.4 million vehicles to replace the shift cable that could wear out over time resulting in mismatches of the gear position indicated by the shift lever; (7) approximately 12.1 million vehicles to rework or replace ignition keys because the ignition switch may move out of the "run" position which may impact power steering and power braking and, depending on timing of the key movement relative to the activation of the sensing algorithm of a crash event, may result in airbags not deploying; and (8) approximately 5.2 million vehicles for other matters. In the three and six months ended June 30, 2014 we recorded charges of approximately \$1.1 billion and \$2.4 billion primarily for the estimated costs of parts and labor to repair these vehicles and for courtesy transportation. At June 30, 2014 it appears we have not experienced a meaningful impact to our Net sales and revenue as a result of our recent recall actions. Of the approximately 29 million vehicles subject to recall, approximately 66% of the vehicles and 72% of the costs involve vehicles we no longer produce or sell. We began repairing vehicles in early April and consistent with our recent communication to NHTSA, our plan is to produce enough repair parts by October 2014 to have the ability to repair the majority of vehicles impacted by the Ignition Switch Recall. Refer to the "GM North America" section of MD&A for additional information on all of the recalls we announced in 2014.

We have been recognized for our record on customer safety and satisfaction which continues to remain our highest priority. Our Chevrolet, Buick, GMC and Cadillac brands all rank in the top five of all automotive brands in the J.D. Power 2014 U.S. Customer Service Index with Cadillac and Buick taking the top spots in their respective categories. Two of our vehicle models were the only midsize SUVs to earn 2014 Top Safety Pick+ ratings from the Insurance Institute for Highway Safety. GM received more Initial Quality Awards from J.D. Power than any other automaker for two years in a row.

GME

GME has sales, manufacturing and distribution operations across Eastern, Western and Central Europe including Russia and the other members of the Commonwealth of Independent States. GME's wholesale vehicle sales volume represented 20.1% of our wholesale vehicle sales volume in the six months ended June 30, 2014. In the six months ended June 30, 2014 we estimate we had the number four market share, based upon retail vehicle sales, in Europe at 7.0%. Our European operations continue to show signs

30

Table of Contents

GENERAL MOTORS COMPANY AND SUBSIDIARIES

of improvement underscored by our first Opel and Vauxhall market share increase in 14 years in 2013. This market share increase was partially driven by the successful launches of the Opel Mokka, ADAM and Cascada during 2013.

In an effort to rationalize our manufacturing footprint in GME we reached agreement with the labor union in Germany to terminate all vehicle and transmission production at our Bochum, Germany facility by the end of 2014. Affected employees will be eligible for a voluntary restructuring separation program. Restructuring charges will be recorded primarily through 2014. Refer to Note 12 to our condensed consolidated financial statements for additional information.

Due to the recent deterioration in the Russian Ruble, along with other market factors, we are currently strategically assessing our Russian operations. Should further deterioration in the outlook for the market or the finalization of the strategic reviews and related recommended actions affect our ability to generate sufficient cash flows we may be required to test certain long-lived assets for recoverability. The estimate of charges, if any, is subject to significant uncertainty and highly dependent on decisions not yet taken.

GMIO

GMIO has sales, manufacturing and distribution operations in Asia/Pacific, the Middle East and Africa. GMIO represented 10.7% of our wholesale vehicle sales volume in the six months ended June 30, 2014. The Asia/Pacific, Middle East and Africa region is our largest region by retail vehicle sales volume and represented 43.7% of our global retail vehicle sales volume in the six months ended June 30, 2014. In the six months ended June 30, 2014 we estimate we had the number three market share, based upon retail vehicle sales, in Asia/Pacific, Middle East and Africa at 9.9%. In the six months ended June 30, 2014 we estimate we had market share of 14.4% in China and sold 1.7 million vehicles, a 10.5% increase over the comparable period last year.

We continue to strategically assess our performance and the manner in which we operate in certain countries which may require us to test certain long-lived assets for recoverability in the near term. The estimate of charges, if any, is subject to significant uncertainty and highly dependent on finalization of our strategic assessments.

GMSA

GMSA has sales, manufacturing, distribution and/or financing operations in Brazil, Argentina, Colombia, Ecuador and Venezuela as well as sales and distribution operations in Bolivia, Chile, Paraguay, Peru and Uruguay. GMSA represented 14.1% of our wholesale vehicle sales volume in the six months ended June 30, 2014 and derived 68.0% of its wholesale vehicle sales volume from Brazil. In the six months ended June 30, 2014 we estimate we had the largest market share, based upon retail vehicle sales, in South America at 16.5% and the number three market share, based upon retail vehicle sales, in Brazil at 16.8%.

In the three months ended March 31, 2014 we recorded devaluation charges related to a change in the exchange rate we use for remeasuring our Venezuelan subsidiaries' non-U.S. Dollar denominated monetary assets and liabilities from the Venezuela official exchange rate to the rate determined by an auction process conducted by Venezuela's Complementary System of Foreign Currency Administration (SICAD I). In addition to currency controls already in place the Venezuelan government announced pricing controls that, taken with other initiatives, require us to closely monitor and consider our ability to maintain a controlling financial interest in our Venezuelan subsidiaries. Refer to the "GM South America" section of MD&A for additional information.

Wholesale and Retail Vehicle Sales

We present both wholesale and retail vehicle sales data to assist in the analysis of our revenue and our market share. Worldwide market share and vehicle sales data exclude the markets of Cuba, Iran, North Korea, Sudan and Syria. The joint venture agreements with SAIC-GM-Wuling Automobile Co., Ltd. (SGMW) and FAW-GM Light Duty Commercial Vehicle Co., Ltd. (FAW-GM) allow for significant rights as a member as well as the contractual right to report SGMW and FAW-GM joint venture retail vehicle sales in China.

The following table summarizes total wholesale vehicle sales of new vehicles by automotive segment (vehicles in thousands):

31

North America vehicle sales primarily represent sales to the end customer. Europe (including Chevrolet Europe vehicle sales that will cease in 2015), Asia/Pacific, Middle East and Africa and South America vehicle sales primarily represent estimated sales to the end customer. In countries where end customer data is not readily available other data sources, such as wholesale or forecast volumes, are used to estimate vehicle sales. Certain fleet sales that are accounted for as operating leases are included in vehicle sales at the time of delivery to the daily rental car companies. The vehicle sales at our China JVs presented in the following table are included in our retail vehicle sales (vehicles in thousands):

Automotive Financing - GM Financial

GM Financial is a global provider of automobile financing solutions specializing in purchasing retail automobile installment sales contracts originated by GM and non-GM franchised and select independent dealers in connection with the sale of used and new automobiles. GM Financial also offers a lease financing product for new GM vehicles and a commercial lending program for GM-franchised dealerships. GM Financial primarily generates revenue and cash flows through the purchase, retention, securitization and servicing of finance receivables and leased assets. GM Financial completed the acquisitions of Ally Financial's automotive finance and financial services businesses in Europe and Latin America during 2013. GM Financial expects to complete the acquisition of Ally Financial's equity interest in its joint venture in China, which is subject to certain regulatory and other approvals and has become subject to a right of termination by either party in its sole discretion, in late 2014 or as soon as practicable thereafter.

Consolidated Results

n.m. = not meaningful

In the three and six months ended June 30, 2014 Equity income increased due primarily to an increase in earnings of our China JVs.

Income Tax Expense (Benefit)
(Dollars in Millions)

	Three Months Ended		Six Months Ended		Three Months Ended		Six Months Ended	
	June 30, 2014	June 30, 2013	June 30, 2014	June 30, 2013	2014 vs. 2013 Favorable/ (Unfavorable) %		2014 vs. 2013 Favorable/ (Unfavorable) %	
Income tax expense (benefit)	\$(254)	\$742	\$(478)	\$1,151	\$996	n.m.	\$1,629	n.m.

n.m. = not meaningful

In the three months ended June 30, 2014 we had income tax benefit compared to income tax expense in the three months ended June 30, 2013 due primarily to: (1) reduced tax expense attributable to entities in our effective tax rate calculation of \$0.8 billion; and (2) other tax benefit items of \$0.2 billion, none of which are individually significant.

In the six months ended June 30, 2014 we had income tax benefit compared to income tax expense in the six months ended June 30, 2013 due primarily to: (1) reduced tax expense attributable to entities in our effective tax rate calculation of \$1.4 billion; and (2) tax benefits in the first quarter of 2014 related to deductions taken for stock investments in non-U.S. affiliates and tax audit settlements of \$0.2 billion; partially offset by (3) the U.S. research credit legislated of \$0.2 billion recorded in 2013.

Non-GAAP Measures

Management believes earnings before interest and taxes (EBIT)-adjusted provides meaningful supplemental information regarding our automotive segments' operating results because it excludes interest income, interest expense and income taxes as well as certain additional adjustments. Management believes income before income taxes-adjusted provides meaningful supplemental information regarding GM Financial's operating results. GM Financial uses a separate measure from our automotive operations because management believes interest income and interest expense are part of operating results when assessing and measuring the operational and financial performance of the segment. Examples of adjustments to EBIT and GM Financial's income before income taxes include impairment charges related to goodwill, other long-lived assets under certain circumstances and certain investments; certain gains or losses on the settlement/extinguishment of obligations; and gains or losses on the sale of non-core investments.

Management believes free cash flow and adjusted free cash flow provide meaningful supplemental information regarding the liquidity of our automotive operations and our ability to generate sufficient cash flow above those required in our business to sustain our operations. We measure free cash flow as cash flow from operations less capital expenditures. We measure adjusted free cash flow as free cash flow adjusted for management actions, primarily related to strengthening our balance sheet, such as accrued interest on prepayments of debt and voluntary contributions to employee benefit plans.

Management believes these non-GAAP measures allow it to readily view operating trends, perform analytical comparisons and benchmark performance between periods and among geographic regions. We believe these non-GAAP measures are useful in allowing for greater transparency of our core operations and are therefore used by management in its financial and operational decision-making. Management does not consider the excluded items when assessing and measuring the operational and financial performance of the organization, its management teams and when making decisions to allocate resources, such as capital investment, among business units and for internal reporting and as part of its forecasting and budgeting processes.

Table of Contents

GENERAL MOTORS COMPANY AND SUBSIDIARIES

While management believes that these non-GAAP measures provide useful information, they are not operating measures under U.S. GAAP and there are limitations associated with their use. Our calculation of these non-GAAP measures may not be comparable to similarly titled measures of other companies due to potential differences between companies in the method of calculation. As a result the use of these non-GAAP measures has limitations and should not be considered in isolation from, or as a substitute for, other measures such as Net income, Income before income taxes or operating cash flow. Due to these limitations, these non-GAAP measures are used as supplements to U.S. GAAP measures.

Reconciliation of Consolidated, Automotive and GM Financial Segment Results

The following table summarizes the reconciliation of our automotive segments' EBIT-adjusted and GM Financial's income before income taxes-adjusted to Income before income taxes and provides supplemental detail of the adjustments, which are presented net of noncontrolling interests (dollars in millions):

	Three Months Ended			Six Months Ended						
	June 30, 2014		June 30, 2013		June 30, 2014		June 30, 2013			
Automotive EBIT-adjusted

GME	(305)	(27.9)%	(114)	(5.6)%	(589)	(44.0)%	(266)	(7.4)%		
GMIO	315	28.8 %	232	11.5 %	567	42.3 %	704	19.5 %		
GMSA	(81)	(7.4)%	54	2.7 %	(237)	(17.7)%	16	0.4 %		
Corporate	(220)	(20.1)%	(126)	(6.2)%	(343)	(25.6)%	(236)	(6.5)%		
Total automotive EBIT-adjusted	1,094	100.0 %	2,022	100.0 %	1,340	100.0 %	3,608	100.0 %		
Adjustments	(1,286)		104		(1,714)		(66)			
Corporate interest income	52		77		105		156			
Automotive interest expense	(100)		(61)		(203)		(152)			
Loss on extinguishment of debt	—		(240)		—		(240)			
Net income (loss) attributable to noncontrolling interests	9		(26)		76		(16)			
Automotive Financing										
GM Financial income before income taxes-adjusted	258		254		479		434			
Adjustments	7		—		8		—			
Consolidated										
Eliminations	(1)		—		(2)		—			
Income before income taxes	\$33		\$2,130		\$89		\$3,724			

Our automotive operations' interest income and interest expense are recorded centrally in Corporate; therefore, there are no reconciling items for our automotive operating segments between EBIT-adjusted and Income before income taxes.

In the three months ended June 30, 2014 adjustments consisted of a catch-up adjustment related to the change in estimate for recall campaigns of \$874 million in GMNA, a charge related to the ignition switch recall compensation program of \$400 million in Corporate and other of \$5 million.

Edgar Filing: General Motors Co - Form 10-Q

In the six months ended June 30, 2014 adjustments consisted of a catch-up adjustment related to the change in estimate for recall campaigns of \$874 million in GMNA, Venezuela currency devaluation of \$419 million in GMSA, a charge related to the ignition switch recall compensation program of \$400 million in Corporate and other of \$13 million.

In the three months ended June 30, 2013 adjustments consisted of pension settlement credits of \$37 million in GMNA and the acquisition of GM Korea's preferred shares of \$67 million in GMIO.

In the six months ended June 30, 2013 adjustments consisted of the acquisition of GM Korea's preferred shares of \$67 million in GMIO, Venezuela currency devaluation of \$162 million in GMSA and other of \$29 million.

GMNA Total Net Sales and Revenue

In the three months ended June 30, 2014 Total net sales and revenue increased due primarily to: (1) favorable vehicle pricing related to recent vehicle launches including full-size pickups and full-size SUVs; (2) favorable vehicle mix due to recent vehicle launches including full-size pickups and Chevrolet Corvette; and (3) increased wholesale volumes due to recent vehicle launches such as the Chevrolet Silverado and GMC Sierra.

In the six months ended June 30, 2014 Total net sales and revenue increased due primarily to: (1) favorable vehicle pricing related to recent vehicle launches including full-size pickups and full size SUVs; and (2) favorable mix due to recent vehicle launches including full-size pickups, Chevrolet Corvette and Chevrolet Impala.

GMNA EBIT-Adjusted

In the three months ended June 30, 2014 EBIT-adjusted decreased due primarily to: (1) unfavorable Other of \$1.8 billion due primarily to policy and warranty recall campaign actions and recall related charges in 2014 of \$1.0 billion, as subsequently described; and increased material and freight costs, including new launches, of \$0.9 billion; partially offset by (2) favorable vehicle pricing related to recent vehicle launches including full-size pickups and full-size SUVs; (3) favorable mix due to recent vehicle launches including full-size pickups and Chevrolet Corvette; and (4) increased wholesale volumes due to recent vehicle launches such as the Chevrolet Silverado and GMC Sierra.

In the six months ended June 30, 2014 EBIT-adjusted decreased due primarily to: (1) unfavorable Other of \$4.0 billion due primarily to policy and warranty recall campaign actions and recall related charges in 2014 of \$2.3 billion, as subsequently described; and increased material and freight costs, including new launches, of \$1.9 billion; partially offset by (2) favorable vehicle pricing related to recent vehicle launches including full-size pickups and full-size

SUVs; and (3) favorable vehicle mix due to recent vehicle launches including full-size pickups and Chevrolet Corvette.

Recall Campaigns

In the six months ended June 30, 2014 we experienced a significant increase in the number of vehicles subject to recall in North America resulting in incremental charges for the estimated costs of parts and labor to repair these vehicles and courtesy transportation for certain recalls. Currently there are approximately 29 million vehicles subject to recalls announced during this period. This includes approximately 7 million vehicles subject to multiple recalls and reflects the results of our ongoing comprehensive safety review, additional engineering analysis and our overall commitment to customer satisfaction.

Table of Contents

GENERAL MOTORS COMPANY AND SUBSIDIARIES

In the three months ended March 31, 2014 we announced a recall to repair ignition switches in vehicles that we are no longer producing that under certain circumstances could result in a loss of electrical power that may prevent front airbags from deploying in the event of a crash. It was originally estimated that approximately 800,000 vehicles were equipped with ignition switches needing repair. These vehicles include model years 2005–2007 Chevrolet Cobalt, 2007 Pontiac G5 and 2005–2006 Pursuit. In the three months ended December 31, 2013 we recorded approximately \$40 million in Automotive cost of sales to cover the repairs as these costs were considered probable and estimable at that time. In the three months ended March 31, 2014 we expanded this recall by approximately 1.8 million additional vehicles for the same issue. These vehicles, consisting of model years 2008–2010 Chevrolet Cobalt, model years 2006–2011 HHR, model years 2008–2010 Pontiac G5, model years 2006–2010 Solstice, model years 2003–2007 Saturn ION and model years 2007–2010 Sky, were not included in the initial recall. In the three months ended March 31, 2014 we recorded approximately \$90 million in Automotive cost of sales to repair these vehicles and approximately \$270 million in Automotive cost of sales to provide courtesy transportation to owners of affected vehicles. These recalls, relating to ignition switches, are collectively referred to as the “Ignition Switch Recall.” Refer to Note 10 to our condensed consolidated financial statements for litigation associated with the Ignition Switch Recall. A second repair was added to these vehicles as a result of the comprehensive review described below to fix ignition lock cylinders that could allow removal of the ignition key while the engine is running, leading to possible rollaway or crash. In the three months ended March 31, 2014 we recorded approximately \$320 million in Automotive cost of sales to repair ignition lock cylinders.

In response to these developments we conducted an in-depth review of the Ignition Switch Recall and our overall recall processes. We hired a former U.S. Attorney to conduct an internal investigation of the Ignition Switch Recall and to provide recommendations to improve our recall processes. Pursuant to the investigation a report was provided to us in the three months ended June 30, 2014. The investigation report made a series of recommendations in eight major areas. We intend to act on each of the recommendations. After reviewing the investigation report, we made a number of personnel decisions. Fifteen individuals identified in the investigation report are no longer with the Company. Five additional individuals were disciplined. Prior to the receipt of the investigation report we began the process of adding nearly 60 new safety investigators allowing us to bolster capacity and capability in identifying potential emerging issues and conducting product investigations, launched a Speak Up for Safety program encouraging employees to report potential safety issues quickly and restructured the safety decision-making process to raise safety issues to the highest levels of the Company. These measures are in addition to our creation and appointment of a new Global Vice President of Vehicle Safety responsible for the safety development of our vehicle systems, confirmation and validation of safety performance, as well as post-sale safety activities, including recalls and the creation of a new Global Product Integrity organization within Global Product Development with the goal of executing the highest levels of safety performance across all of our vehicles.

We are also actively engaging customers and servicing vehicles affected by the Ignition Switch Recall. We notified affected customers to schedule an appointment with their dealers as replacement parts are available. We began repairing vehicles in early April using parts that have undergone end-of-line quality inspection for performance of six critical operating parameters. Consistent with our recent communication to NHTSA, our plan is to produce enough repair parts by October 2014 to have the ability to repair the majority of vehicles impacted by the ignition switch and ignition cylinder recalls. Through July 23, 2014 we have repaired approximately 22% of the 2.6 million vehicles subject to recall.

As a result of the Ignition Switch Recall senior leadership initiated a comprehensive review and engineering analysis to identify any additional issues which could potentially result in safety or satisfaction concerns for our customers. As part of our normal process and a result of these reviews we announced the following additional recall campaigns in the six months ended June 30, 2014:

In the three months ended March 31, 2014 approximately 1.9 million vehicles were recalled to replace either the power steering motor, the steering column, the power steering motor control unit or a combination of the steering column and the power steering motor control unit as the electric power steering could fail under certain circumstances — model years 2004–2006, 2008–2009 Chevrolet Malibu, model years 2004–2006 Malibu Maxx, model years 2006–2010 HHR, model years 2005–2010 Cobalt, model years 2008–2009 Saturn Aura, model years 2003–2007 ION, model years 2007–2010 Pontiac G5, model years 2005–2006, 2008–2009 G6 and model years 2005–2006 Pursuit and G4. We recorded approximately \$340 million in Automotive cost of sales to repair these vehicles.

In the three months ended March 31, 2014 approximately 1.3 million vehicles were recalled that are prone to non-deployment of the side impact restraints if vehicles are not serviced when the Service Air Bag warning light is illuminated — model years 2008–2013 Buick Enclave and GMC Acadia, model years 2009–2013 Chevrolet Traverse and model years 2008–2010 Saturn Outlook. We recorded approximately \$185 million in Automotive cost of sales to repair these vehicles.

Table of Contents

GENERAL MOTORS COMPANY AND SUBSIDIARIES

In the three months ended June 30, 2014 approximately 2.7 million vehicles were recalled to modify the brake lamp wiring harness that could have corrosion develop due to micro-vibration — model years 2004–2012 Chevrolet Malibu, model years 2004–2007 Malibu Maxx, model years 2005–2010 Pontiac G6 and model years 2007–2010 Saturn Aura. We recorded approximately \$90 million in Automotive cost of sales to repair these vehicles.

In the three months ended June 30, 2014 approximately 1.5 million vehicles were recalled to replace front safety lap belt cables that could fatigue and separate over time — model years 2009–2014 Buick Enclave, Chevrolet Traverse, GMC Acadia and model years 2009–2010 Saturn Outlook. We recorded approximately \$80 million in Automotive cost of sales to repair these vehicles.

In the three months ended June 30, 2014 approximately 1.4 million vehicles were recalled to replace the shift cable that could wear out over time resulting in mismatches of the gear position indicated by the shift lever — model years 2004–2008 Chevrolet Malibu, model years 2004–2007 Malibu Maxx, model years 2007–2008 Saturn Aura, model years 2013–2014 Cadillac ATS, model year 2014 CTS and model years 2005–2008 Pontiac G6. We recorded approximately \$150 million in Automotive cost of sales to repair these vehicles.

In the three months ended June 30, 2014 approximately 12.1 million vehicles were recalled to rework or replace ignition keys because the ignition switch may move out of the “run” position which may impact power steering and power braking. The timing of the key movement relative to the activation of the sensing algorithm of a crash event may result in airbags not deploying — model years 2005–2009 Buick Allure and Lacrosse, model year 2004 Regal LS/GS, model years 2006–2011 Lucerne, model years 1997–2005 Chevrolet Malibu, model years 2000–2007 Monte Carlo, model years 2010–2014 Camaro, model years 2000–2014 Impala, model years 1998–2002 Oldsmobile Intrigue, model years 1999–2004 Alero, model years 1999–2005 Pontiac Grand Am, model years 2004–2008 Grand Prix, model years 2004–2006 Cadillac SRX, model years 2003–2014 CTS, model years 2000–2005 Deville and model years 2006–2011 DTS. We recorded approximately \$325 million in Automotive cost of sales to repair these vehicles.

In the three months ended March 31, 2014 and June 30, 2014 five and 17 recalls were announced covering approximately 1.2 million and 4.0 million vehicles related to safety, customer satisfaction and other matters. We recorded approximately \$70 million and \$450 million in Automotive cost of sales to repair these vehicles in the three months ended March 31, 2014 and June 30, 2014. None of these announced recalls were individually significant.

In total we recorded approximately \$1.3 billion and \$1.1 billion for the above-described actions in the three months ended March 31, 2014 and June 30, 2014. The following table summarizes the activity for customer satisfaction campaigns, safety recalls, non-compliance recalls and special coverage in GMNA, including courtesy transportation (dollars in millions):

	2014	2013
Balance at January 1	\$761	\$851
Additions	1,333	115
Payments	(110)	(115)
Adjustments to prior periods	(19)	11
Balance at March 31	1,965	862
Additions	1,151	128
Payments	(329)	(132)
Adjustments to prior periods	691	(8)
Balance at June 30	\$3,478	\$850

Adjustments to prior periods in the three months ended June 30, 2014 included: (1) a catch-up adjustment associated with a change in estimate for previously sold vehicles of \$874 million; partially offset by (2) adjustments of approximately \$95 million for courtesy transportation as a result of greater part availability and fewer customers utilizing courtesy transportation than originally estimated; and (3) approximately \$80 million for costs originally estimated separately for ignition switches and ignition lock cylinders that are now being shipped and repaired at the same time resulting in reduced costs. Based on the per vehicle part and labor cost, number of vehicles impacted and the expected number of vehicles to be repaired we believe the amounts recorded are adequate to cover the costs of these recall campaigns.

GENERAL MOTORS COMPANY AND SUBSIDIARIES

The Ignition Switch Recall has led to various governmental investigations and inquiries including a subpoena from the U.S. Attorney for the Southern District of New York, and investigations by Congress, the SEC and various States Attorney Generals. In addition, the Ignition Switch Recall and the other recalls described above have resulted in a number of claims and lawsuits. Refer to Item 1. Legal Proceedings for additional information.

GM Europe

During the second half of 2011 and continuing through 2013, the European automotive industry was severely affected by the ongoing sovereign debt crisis, high unemployment and a lack of consumer confidence coupled with overcapacity. European automotive industry sales to retail and fleet customers began to improve in the three months ended December 31, 2013 compared to the corresponding period in 2012. This trend continued with industry sales to retail and fleet customers of 10 million vehicles in the six months ended June 30, 2014 representing a 2.7% increase compared to the corresponding period in 2013.

Outlook

We are continuing to implement various strategic actions to strengthen our operations and increase our competitiveness. The key actions include investments in our product portfolio, a revised brand strategy, significant management changes and reducing material, development and production costs, including restructuring activities. The success of these actions will depend on a combination of our ability to execute and external factors which are outside of our control. Despite recent positive industry trends, we do not expect the European automotive industry to improve significantly in the near term; however, we expect to be profitable in GME by mid-decade.

GME Total Net Sales and Revenue

Edgar Filing: General Motors Co - Form 10-Q

In the three months ended June 30, 2014 Total net sales and revenue increased due primarily to: (1) favorable vehicle mix due to increased sales of higher priced vehicles; and (2) Other of \$0.2 billion due primarily to favorable net foreign currency effect due to the strengthening of the Euro and British Pound against the U.S. Dollar, partially offset by the weakening of the Russian Ruble against the U.S. Dollar.

In the six months ended June 30, 2014 Total net sales and revenue increased due primarily to: (1) increased wholesale volumes associated with generally higher demand across the region partially offset by lower demand in Russia; (2) favorable vehicle mix due to increased sales of higher priced vehicles; and (3) Other of \$0.2 billion due primarily to favorable net foreign currency effect due to the strengthening of the Euro and British Pound against the U.S. Dollar, partially offset by the weakening of the Russian Ruble against the U.S. Dollar; partially offset by (4) unfavorable vehicle pricing primarily resulting from increased incentive support associated with difficult market conditions.

GME EBIT (Loss)-Adjusted

Table of Contents

GENERAL MOTORS COMPANY AND SUBSIDIARIES

In the three months ended June 30, 2014 EBIT (loss)-adjusted increased due primarily to Other of \$0.2 billion due primarily to restructuring related charges.

In the six months ended June 30, 2014 EBIT (loss)-adjusted increased due primarily to: (1) unfavorable price effects; and (2) Other of \$0.3 billion due primarily to restructuring related charges of \$0.4 billion, partially offset by material performance of \$0.1 billion; partially offset by (3) increased wholesale volumes.

GM International Operations

We are addressing many of the challenges in our GMIO operations and have strategically assessed the manner in which we operate in certain countries within GMIO, including our cost structure, the level of local sourcing, the level of investment in the product portfolio, the allocation of production activity to the existing manufacturing base and our brand strategy. These strategic reviews considered the effects that recent and forecasted deterioration in local market conditions would have on our operations. While we are continuing our strategic assessments, we have taken certain actions and incurred impairment and other charges in 2013.

Focus on Chinese Market

We view the Chinese market as important to our global growth strategy and are employing a multi-brand strategy, led by our Buick and Chevrolet brands. In the coming years we plan to increasingly leverage our global architectures to increase the number of nameplates under the Buick, Chevrolet and Cadillac brands in China and continue to grow our business under the Baojun and Wuling brands. We operate in the Chinese market through a number of joint ventures and maintaining good relations with our joint venture partners, which are affiliated with the Chinese government, is an important part of our China growth strategy.

The following tables summarize certain key operational and financial data for the China JVs (dollars in millions, vehicles in thousands):

	Three Months Ended		Six Months Ended			
	June 30, 2014	June 30, 2013	June 30, 2014	June 30, 2013

GMIO Total Net Sales and Revenue

The vehicle sales of our China JVs are not reflected in Total net sales and revenue. The results of our joint ventures are recorded in Equity income. Our share in China JVs earnings is \$1.1 billion in the six months ended June 30, 2014.

In the three months ended June 30, 2014 Total net sales and revenue decreased due primarily to: (1) decreased wholesale volume primarily in Middle East and Chevrolet brand vehicles in Europe; partially offset by (2) favorable mix primarily in Middle East and Australia; and (3) favorable vehicle pricing from sales of new model year vehicles in Middle East.

In the six months ended June 30, 2014 Total net sales and revenue decreased due primarily to: (1) decreased wholesale volume primarily in Middle East and Chevrolet brand vehicles in Europe; and (2) Other of \$0.2 billion due primarily to unfavorable net foreign currency effect driven by the weakening of the Australian Dollar, South Africa Rand and the Thai Baht against the U.S. Dollar; partially offset by (3) favorable mix primarily in Korea, Australia and Middle East; and (4) favorable vehicle pricing from sales of new model year vehicles in Middle East.

GMIO EBIT-Adjusted

In the three months ended June 30, 2014 EBIT-adjusted increased due primarily to: (1) favorable vehicle pricing; and (2) Other of \$0.3 billion due primarily to favorable manufacturing costs and depreciation of \$0.1 billion, favorable advertising expense decrease of \$0.1 billion and favorable equity income from China JVs of \$0.1 billion; partially offset by (3) lower net wholesale volume.

In the six months ended June 30, 2014 EBIT-adjusted decreased due primarily to: (1) lower net wholesale volume; and (2) unfavorable net vehicle mix; partially offset by (3) favorable vehicle pricing; and (4) Other of \$0.5 billion due primarily to favorable manufacturing costs and depreciation of \$0.3 billion, decrease of advertising expense \$0.1 billion, and increase in equity income from China JVs of \$0.1 billion.

GM South America

Venezuelan Operations

Our Venezuelan subsidiaries' functional currency is the U.S. Dollar because of the hyperinflationary status of the Venezuelan economy.

Effective February 13, 2013 the Venezuelan government set the official fixed exchange rate of the BsF at BsF 6.3 to \$1.00 from BsF 4.3 to \$1.00. The devaluation resulted in a charge of \$0.2 billion recorded in Automotive cost of sales in the three months ended March 31, 2013 from the remeasurement of our Venezuelan subsidiaries' non-U.S. Dollar denominated monetary assets and liabilities. The remeasurement charge was treated as an adjustment for EBIT-adjusted reporting purposes.

Effective March 31, 2014 we changed the exchange rate we use for remeasuring our Venezuelan subsidiaries' non-U.S. Dollar denominated monetary assets and liabilities from the Venezuela official exchange rate to the rate determined by an auction process conducted by Venezuela's SICAD I. We changed the exchange rate we use because we believe the SICAD I rate is the most representative rate to be used for remeasurement, as the official rate will increasingly be reserved only for the settlement of U.S. Dollar denominated obligations related to the purchases of "essential goods and services" and future dividends will likely not be paid at the official rate. The non-U.S. Dollar denominated assets and liabilities of our Venezuelan subsidiaries may be impacted by periodic auctions in SICAD I rates which may have a material impact on the results of operations in Venezuela in future quarters. At March 31, 2014 the SICAD I exchange rate was BsF 10.7 to \$1.00. The devaluation resulted in a charge of \$0.4 billion recorded

Table of Contents

GENERAL MOTORS COMPANY AND SUBSIDIARIES

in Automotive cost of sales in the three months ended March 31, 2014. The remeasurement charge in the three months ended March 31, 2014 was treated as an adjustment for EBIT-adjusted reporting purposes. At June 30, 2014 the SICAD I exchange rate was BsF 10.6 to \$1.00 which resulted in an insignificant gain recorded in Automotive costs of sales in the three months ended June 30, 2014.

We believe it is possible that the Venezuelan government may further devalue the official exchange rate of BsF against the U.S. Dollar in the future. If the BsF were further devalued from the SICAD I exchange rate of BsF 10.6 to \$1.00, it would result in a charge to our income statement in the period of devaluation. Based on our June 30, 2014 net monetary assets a charge of less than \$0.1 billion would result for every 10% devaluation of the BsF.

The Venezuelan government has foreign exchange control regulations that make it difficult to convert BsF to U.S. Dollar which affect our Venezuelan subsidiaries' ability to pay non-BsF denominated obligations and to pay dividends. The total amounts pending government approval for settlement in U.S. Dollar at June 30, 2014 and December 31, 2013 were BsF 4.0 billion (equivalent to \$0.6 billion) and BsF 3.7 billion (equivalent to \$0.6 billion). These amounts include dividend requests in the amount of BsF 0.6 billion (equivalent to \$0.1 billion) that have been pending from 2007. Our Venezuelan subsidiaries' net assets were \$0.5 billion at June 30, 2014, including non-U.S. Dollar denominated net monetary assets of \$0.6 billion. At June 30, 2014 other consolidated entities had receivables from our Venezuelan subsidiaries denominated in other currencies of \$0.5 billion.

In January 2014 the Venezuela government enacted a law limiting sale prices and establishing a maximum margin of 30% above a defined cost structure. At this time it is unclear based on the current regulations how this new law may affect our current vehicle and parts and accessories sale pricing structure. These regulations, when considered with foreign exchange process, other governmental policies impacting labor force reductions and other circumstances in Venezuela, may impact our ability to fully benefit from and maintain our controlling financial interest in our Venezuelan subsidiaries. The financial impact on our operations in Venezuela of these events and associated ongoing restrictions are uncertain.

GM Financial Revenue

In the three months ended June 30, 2014 GM Financial revenue increased due primarily to: (1) increased finance charge income of \$0.2 billion due to growth in the portfolio resulting from the acquisition of the Ally Financial international operations; and (2) increased lease vehicle income of \$0.1 billion due to the increased size of the leased asset portfolio.

In the six months ended June 30, 2014 GM Financial revenue increased due primarily to: (1) increased finance charge income of \$0.7 billion due to growth in the portfolio resulting from the acquisition of the Ally Financial international operations; and (2) increased lease vehicle income of \$0.2 billion due to the increased size of the leased asset

portfolio.

GM Financial Income Before Income Taxes-Adjusted

In the three months ended June 30, 2014 Income before income taxes-adjusted remained flat due primarily to: (1) increased revenue of \$0.4 billion; offset by (2) increased interest expense of \$0.2 billion due to higher average debt outstanding and effective rate of interest; (3) increased operating expenses of \$0.1 billion due to the acquisition of the Ally Financial international operations; and (4) increased lease vehicle expenses of \$0.1 billion due to the increased size of the leased asset portfolio.

In the six months ended June 30, 2014 Income before income taxes-adjusted remained flat due primarily to: (1) increased revenue of \$0.9 billion; offset by (2) increased interest expense of \$0.4 billion due to higher average debt outstanding and effective rate of interest; (3) increased operating expenses of \$0.2 billion due to the acquisition of the Ally Financial international operations; and (4) increased lease vehicle expenses of \$0.2 billion due to the increased size of the leased asset portfolio.

In the three and six months ended June 30, 2014 EBIT (loss)-adjusted increased due primarily to legal costs related to the ignition switch recall.

Liquidity and Capital Resources

Liquidity Overview

We believe that our current level of cash and cash equivalents, marketable securities and availability under our secured revolving credit facilities will be sufficient to meet our liquidity needs. We expect to have substantial cash requirements going forward which we plan to fund through total available liquidity and cash flows generated from operations. We also maintain access to the capital markets, which may provide an additional source of liquidity. Our future uses of cash, which may vary from time to time based on market conditions and other factors, are centered around three objectives: (1) reinvest in our business; (2) continue to strengthen our balance sheet; and (3) return cash to shareholders. Our known future material uses of cash include, among other possible demands: (1) capital expenditures as well as payments for engineering and product development activities; (2) payments associated with recently announced vehicle recalls and the establishment of the Program; (3) payments for previously announced restructuring activities; (4) acquiring Ally Financial's equity interests in GMAC-SAIC Automotive Finance Company Limited for approximately \$1.0 billion; (5) payments to service debt and other long-term obligations; (6) payments to purchase the remaining outstanding shares of our Series A Preferred Stock with a liquidation amount of \$3.9 billion once the shares become redeemable on or after December 31, 2014; and (7) dividend payments on our preferred and common stock that are declared by our Board of Directors.

Our liquidity plans are subject to a number of risks and uncertainties, including those described in the "Risk Factors" section of our 2013 Form 10-K as updated in our Form 10-Q for the period ended March 31, 2014, some of which are outside our control. Macroeconomic conditions could limit our ability to successfully execute our business plans and therefore adversely affect our liquidity plans.

We continue to monitor and evaluate opportunities to strengthen our balance sheet and competitive position over the long-term. These actions may include opportunistic payments to reduce our long-term obligations while maintaining minimal financial leverage as well as the possibility of acquisitions, dispositions and strategic alliances that we believe would generate significant advantages and substantially strengthen our business. These actions may include additional loans, investments with our joint venture partners or the acquisitions of certain operations or ownership stakes in outside businesses. These actions may negatively impact our liquidity in the short-term including the payments related to our recent recalls and the related litigation.

Automotive

Available Liquidity

Total available liquidity includes cash, cash equivalents, marketable securities and funds available under credit facilities. At June 30, 2014 our available liquidity was \$38.8 billion, including funds available under credit facilities of

\$10.4 billion. The amount of available liquidity is subject to intra-month and seasonal fluctuations and includes balances held by various business units and subsidiaries worldwide that are needed to fund their operations.

We manage our liquidity primarily at our treasury centers as well as at certain of our significant consolidated overseas subsidiaries. Available liquidity held within North America and at our regional treasury centers represented approximately 88% of our available liquidity at June 30, 2014. A portion of our available liquidity includes amounts deemed indefinitely reinvested in our foreign subsidiaries. We have used and will continue to use other methods including intercompany loans to utilize these funds across our global operations as needed.

Our cash equivalents and marketable securities balances include investments in U.S. government and agency obligations, foreign government securities, time deposits and corporate debt securities, and are primarily denominated in U.S. Dollars. Our investment guidelines, which we may change from time to time, prescribe certain minimum credit worthiness thresholds and limit our exposures

Table of Contents

GENERAL MOTORS COMPANY AND SUBSIDIARIES

to any particular sector, asset class, issuance or security type. Substantially all of our current investments in debt securities are with A/A2 or better rated issuers.

We use credit facilities as a mechanism to provide additional flexibility in managing our global liquidity and to fund working capital needs at certain of our subsidiaries. The total size of our credit facilities was \$11.1 billion and \$11.2 billion at June 30, 2014 and December 31, 2013. Our primary borrowing capacity under credit facilities comes from our secured revolving credit facilities consisting of a three-year \$5.5 billion facility maturing in 2015 and a five-year \$5.5 billion facility maturing in 2017. We have not borrowed against these facilities, but have amounts in use under the letter of credit sub-facility of \$0.6 billion. GM Financial has access to the three-year facility, but has not borrowed against it.

The following table summarizes our automotive liquidity (dollars in billions):

	June 30, 2014	December 31, 2013
Cash and cash equivalents	\$18.5	\$18.9
Marketable securities	9.9	9.0
Available liquidity	28.4	27.9
Available under credit facilities	10.4	10.4
Total available liquidity	\$38.8	\$38.3

The following table summarizes the changes in our automotive available liquidity (dollars in billions):

	Six Months Ended June 30, 2014
Operating cash flow	\$5.6
Capital expenditures	(3.4)
Dividends paid	(1.2)
Effect of foreign currency	(0.4)
Other	(0.1)
Total change in available liquidity	\$0.5

Cash Flow

The following tables summarize automotive cash flows from operating, investing and financing activities (dollars in billions):

	Six Months Ended	
	June 30, 2014	June 30, 2013
Operating Activities		
Net income	\$0.2	\$2.3
Depreciation, amortization and impairments	3.1	2.9
Pension and OPEB activities	(0.4)	(0.4)
Working capital	(0.2)	(0.7)
Other	2.9	0.9
Cash flows from operating activities	\$5.6	\$5.0

Favorable changes in working capital are primarily related to the increases in payables due to timing of payments, slightly offset by increases in inventory. Changes in other are primarily related to provisions for product warranty liabilities, establishment of the ignition switch recall compensation program and daily rental activity; partially offset

by changes in deferred and current tax accounts.

47

Table of Contents

GENERAL MOTORS COMPANY AND SUBSIDIARIES

	Six Months Ended	
	June 30, 2014	June 30, 2013
Investing Activities		
Capital expenditures	\$(3.4) \$(3.8
Acquisitions and liquidations of marketable securities, net	(1.0) 2.5
Other	0.2	—
Cash flows from investing activities	\$(4.2) \$(1.3

Favorable change in capital expenditures was a result of timing of cash payments for capital project additions. Unfavorable change in marketable securities was primarily a result of rebalancing our investment portfolio between marketable securities and cash and cash equivalents as part of liquidity management in the normal course of business.

	Six Months Ended	
	June 30, 2014	June 30, 2013
Financing Activities		
Dividends paid	\$(1.2) \$(0.5
Proceeds and payments of debt, net	0.1	(0.6
Cash flows from financing activities	\$(1.1) \$(1.1

Unfavorable change in dividends paid is due to the initiation of a common stock dividend of \$1.0 billion paid in the six months ended June 30, 2014 that did not occur in the six months ended June 30, 2013. Favorable proceeds and payments of debt, net included a payment of \$0.7 billion to acquire the remaining balance of GM Korea's mandatorily redeemable preferred shares in the six months ended June 30, 2013, that did not occur in the six months ended June 30, 2014.

Free Cash Flow and Adjusted Free Cash Flow

The following table summarizes automotive free cash flow and adjusted free cash flow (dollars in billions):

	Six Months Ended	
	June 30, 2014	June 30, 2013
Operating cash flow	\$5.6	\$5.0
Less: capital expenditures	(3.4) (3.8
Free cash flow	2.2	1.2
Adjustments	—	0.1
Adjusted free cash flow	\$2.2	\$1.3

Adjustments to free cash flow included pension contributions of \$0.1 billion related to the previously announced annuitization of the U.S. salaried pension plan in the six months ended June 30, 2013.

Automotive Financing - GM Financial

Liquidity Overview

GM Financial's primary sources of cash are finance charge income, leasing income, servicing fees, net distributions from secured debt, secured and unsecured borrowings, net proceeds from senior notes transactions and collections and recoveries on finance receivables. GM Financial's primary uses of cash are purchases of consumer finance receivables and leased vehicles, funding of commercial finance receivables, funding credit enhancement requirements for secured debt, repayment of secured and unsecured debt, operating expenses, interest costs, capital expenditures and business acquisitions. GM Financial continues to monitor and evaluate opportunities to optimize its liquidity position and the mix of its debt.

Available Liquidity

The following table summarizes GM Financial's available liquidity (dollars in billions):

48

Table of Contents

GENERAL MOTORS COMPANY AND SUBSIDIARIES

	June 30, 2014	December 31, 2013
Cash and cash equivalents	\$1.4	\$1.1
Borrowing capacity on unpledged eligible assets	1.8	1.6
Borrowing capacity on committed unsecured lines of credit	1.0	0.6
Available liquidity	\$4.2	\$3.3

The increase in available liquidity reflects an increase in cash and cash equivalents resulting from the issuance of Canadian Dollar \$0.4 billion of senior unsecured notes issued in May 2014. In addition, borrowing capacity on committed unsecured lines of credit increased as a result of the addition of new facilities as well as lower utilization as of June 30, 2014.

GM Financial has the ability to borrow up to \$4.0 billion against our three-year \$5.5 billion secured revolving credit facility subject to available capacity and borrowing base restrictions. In the event GM Financial borrows against the facility, it is expected such borrowings would be short-term in nature. The facility is not guaranteed or secured by any GM Financial assets or subsidiaries.

In July 2014 GM Financial issued \$1.5 billion in senior unsecured notes which are due from July 2017 to July 2019. GM Financial intends to use the net proceeds for general corporate purposes.

Cash Flow

The following table summarizes GM Financial cash flows from operating, investing and financing activities (dollars in billions):

	Six Months Ended		Six Months Ended 2014 vs. 2013		
	June 30, 2014	June 30, 2013	Amount	%	
Net cash provided by operating activities	\$0.8	\$0.7	\$0.1	14.0	%
Net cash used in investing activities	\$(4.0)	\$(4.5)	\$0.5	(11.1)	%
Net cash provided by financing activities	\$3.1	\$3.0	\$0.1	3.3	%

Operating Activities

In the six months ended June 30, 2014 net cash provided by operating activities increased due primarily to an increase in taxes payable to us by GM Financial.

Investing Activities

In the six months ended June 30, 2014 net cash used in investing activities decreased due primarily to: (1) cash used for business acquisitions in 2013 of \$2.1 billion, with insignificant related activity in 2014; partially offset by (2) increase in loan purchases and fundings, net of collections, of \$0.9 billion in 2014; and (3) increase in purchases of leased vehicles of \$0.7 billion in 2014.

Financing Activities

In the six months ended June 30, 2014 net cash provided by financing activities increased due primarily to repayment of debt in 2013 to Ally Financial of \$1.4 billion, with no related activity in 2014 partially offset by a net decrease in borrowings of \$1.3 billion in 2014.

Guarantees Provided to Third Parties

We have provided guarantees related to the residual value of operating leases, certain suppliers' commitments, certain product-related claims and third party commercial loans and other obligations. The maximum potential obligation under these commitments was \$4.4 billion and \$16.9 billion at June 30, 2014 and December 31, 2013.

Refer to Note 10 to our condensed consolidated financial statements for additional information on guarantees we have provided.

Critical Accounting Estimates

General

49

Table of Contents

GENERAL MOTORS COMPANY AND SUBSIDIARIES

The condensed consolidated financial statements are prepared in conformity with U.S. GAAP, which requires the use of estimates, judgments and assumptions that affect the reported amounts of assets and liabilities, the disclosure of contingent assets and liabilities at the date of the financial statements, and the reported amounts of revenues and expenses in the periods presented. We believe that the accounting estimates employed are appropriate and resulting balances are reasonable; however, due to inherent uncertainties in making estimates, actual results could differ from the original estimates requiring adjustments to these balances in future periods. The critical accounting estimates that affect the condensed consolidated financial statements and the judgments and assumptions used are consistent with those described in the MD&A section in our 2013 Form 10-K, as supplemented by the subsequent discussion of Policy, Product Warranty and Recall Campaigns.

Policy, Product Warranty and Recall Campaigns

We have historically accrued estimated costs related to recall campaigns in GMNA when they are probable and reasonably estimable, which typically occurs once it is determined a specific recall campaign is needed and announced. During the three months ended June 30, 2014, following the significant increase in the number of vehicles subject to recall in GMNA, the results of our ongoing comprehensive safety review, additional engineering analysis, the creation of a new Global Product Integrity organization, the appointment of a new Global Vice President of Vehicle Safety responsible for the safety development of our vehicle systems and our overall commitment to customer satisfaction, we accumulated sufficient historical data in GMNA to support the use of an actuarial-based estimation technique for recall campaigns. As such, we now accrue at the time of vehicle sale in GMNA the costs for recall campaigns. In the three months ended June 30, 2014 we recorded a catch-up adjustment of \$0.9 billion in Automotive cost of sales to adjust the estimate for recall costs for previously sold vehicles. The change in estimate was treated as an adjustment for EBIT-adjusted reporting purposes. In the other regions, there is not sufficient historical data to support the application of an actuarial-based estimation technique and the estimated costs will continue to be accrued at the time when they are probable and reasonably estimable, which typically occurs once it is determined a specific recall campaign is needed and announced.

The estimates related to policy and product warranties are established using historical information on the nature, frequency and average cost of claims of each vehicle line or each model year of the vehicle line and assumptions about future activity and events. When little or no claims experience exists for a model year or a vehicle line, the estimate is based on comparable models. The estimates related to recall campaigns accrued at the time of vehicle sale are established by applying a frequency times severity approach that considers the number of recall events, the number of vehicles per recall event, the assumed number of vehicles that will be brought in by customers for repair (take rate) and the cost per vehicle for each recall event. Estimates contemplate the nature, frequency and magnitude of historical events with consideration for changes in future expectations. Costs associated with campaigns not accrued at the time of vehicle sale are estimated based on the per unit part and labor cost, number of units impacted and the take rate. Depending on part availability and time to complete repairs we may, from time-to-time, offer courtesy transportation at no cost to our customers. These estimates are re-evaluated on an ongoing basis and based on the best available information, revisions are made when necessary. We consider trends of claims and take action to improve vehicle quality and minimize claims.

In the six months ended June 30, 2014 we recorded charges of \$2.5 billion for recall campaigns and courtesy transportation that have been separately announced and \$0.9 billion related to the catch-up adjustment associated with a change in estimate. The catch-up adjustment and estimated amount accrued at the time of a vehicle sale for recall campaigns is most sensitive to the estimated number of recall events, the number of vehicles per recall event, the take rate, and the cost per vehicle for each recall event. The estimated cost of a recall campaign that is accrued on an

individual basis is most sensitive to our estimated assumed take rate that is primarily developed based on our historical take rate experience. We believe the amounts recorded are adequate to cover the costs of these recall campaigns. A 10% increase in the estimated take rate for specifically announced recall campaigns would increase the estimated cost by approximately \$0.2 billion.

Actual experience could differ from the amounts estimated requiring adjustments to these liabilities in future periods. Due to the uncertainty and potential volatility of the factors contributing to developing estimates, changes in our assumptions could materially affect our results of operations.

Accounting Standards Not Yet Adopted

Accounting standards not yet adopted are discussed in Note 1 to our condensed consolidated financial statements.

Forward-Looking Statements

50

Table of Contents

GENERAL MOTORS COMPANY AND SUBSIDIARIES

In this report and in reports we subsequently file and have previously filed with the SEC on Forms 10-K and 10-Q and file or furnish on Form 8-K, and in related comments by our management, we use words like “anticipate,” “appears,” “approximately,” “believe,” “continue,” “could,” “designed,” “effect,” “estimate,” “evaluate,” “expect,” “forecast,” “goal,” “in,” “may,” “objective,” “outlook,” “plan,” “potential,” “priorities,” “project,” “pursue,” “seek,” “should,” “target,” “when,” “would” of any of those words or similar expressions to identify forward-looking statements that represent our current judgment about possible future events. In making these statements we rely on assumptions and analyses based on our experience and perception of historical trends, current conditions and expected future developments as well as other factors we consider appropriate under the circumstances. We believe these judgments are reasonable, but these statements are not guarantees of any events or financial results, and our actual results may differ materially due to a variety of important factors, both positive and negative. These factors, which may be revised or supplemented in subsequent reports on SEC Forms 10-Q and 8-K, include among others the following:

- Our ability to realize production efficiencies and to achieve reductions in costs as a result of our restructuring initiatives and labor modifications;
- Our ability to maintain quality control over our vehicles and avoid material vehicle recalls and the cost and effect on our reputation and products;
- Our ability to maintain adequate liquidity and financing sources including as required to fund our planned significant investment in new technology;
- Our ability to realize successful vehicle applications of new technology;
- Shortages of and increases or volatility in the price of oil, including as a result of political instability in the Middle East and African nations;
- Our ability to continue to attract customers, particularly for our new products, including cars and crossover vehicles;
- Availability of adequate financing on acceptable terms to our customers, dealers, distributors and suppliers to enable them to continue their business relationships with us;
- The ability of our suppliers to deliver parts, systems and components without disruption and at such times to allow us to meet production schedules;
- Our ability to manage the distribution channels for our products;
- Our ability to successfully restructure our European and consolidated international operations;
- The continued availability of both wholesale and retail financing from Ally Financial and its affiliates and other finance companies in markets in which we operate to support our ability to sell vehicles, which is dependent on those entities' ability to obtain funding and their continued willingness to provide financing;
- Our continued ability to develop captive financing capability, including GM Financial;
- GM Financial's ability to successfully integrate certain Ally Financial international operations;
- Overall strength and stability of the automotive industry, both in the U.S. and in global markets, particularly Europe;
- Changes in economic conditions, commodity prices, housing prices, foreign currency exchange rates or political stability in the markets in which we operate;
- Significant changes in the competitive environment, including the effect of competition and excess manufacturing capacity in our markets, on our pricing policies or use of incentives and the introduction of new and improved vehicle models by our competitors;
- Significant changes in economic, political and market conditions in China, including the effect of competition from new market entrants, on our vehicle sales and market position in China;
- Changes in the existing, or the adoption of new, laws, regulations, policies or other activities of governments, agencies and similar organizations particularly laws, regulations and policies relating to vehicle safety including recalls, and including where such actions may affect the production, licensing, distribution or sale of our products, the cost thereof or applicable tax rates;
- Costs and risks associated with litigation and government investigations including those related to our recent recalls;

Table of Contents

GENERAL MOTORS COMPANY AND SUBSIDIARIES

• Significant increases in our pension expense or projected pension contributions resulting from changes in the value of plan assets, the discount rate applied to value the pension liabilities or other assumption changes; and
• Changes in accounting principles, or their application or interpretation, and our ability to make estimates and the assumptions underlying the estimates, which could have an effect on earnings.

We caution readers not to place undue reliance on forward-looking statements. We undertake no obligation to update publicly or otherwise revise any forward-looking statements, whether as a result of new information, future events or other factors that affect the subject of these statements, except where we are expressly required to do so by law.

* * * * *

Item 3. Quantitative and Qualitative Disclosures About Market Risk

There have been no significant changes in our exposure to market risk since December 31, 2013. Refer to Item 7A of our 2013 Form 10-K.

* * * * *

Item 4. Controls and Procedures

Disclosure Controls and Procedures

We maintain disclosure controls and procedures designed to provide reasonable assurance that information required to be disclosed in reports filed under the Securities Exchange Act of 1934, as amended (Exchange Act), is recorded, processed, summarized and reported within the specified time periods and accumulated and communicated to our management, including our principal executive officer and principal financial officer, as appropriate to allow timely decisions regarding required disclosure.

Our management, with the participation of our CEO and Executive Vice President and CFO, evaluated the effectiveness of our disclosure controls and procedures (as defined in Rules 13a-15(e) or 15d-15(e) promulgated under the Exchange Act) at June 30, 2014. Based on this evaluation required by paragraph (b) of Rules 13a-15 or 15d-15, our CEO and CFO concluded that our disclosure controls and procedures were effective as of June 30, 2014.

Changes in Internal Controls

We have commenced several transformation initiatives to centralize and simplify our business processes and systems. These are long-term initiatives which we believe will enhance our internal controls over financial reporting due to increased automation and further integration of related processes. We will continue to monitor our internal controls over financial reporting throughout the transformation.

There have not been any other changes in internal control over financial reporting during the three months ended June 30, 2014 that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

* * * * *

Table of Contents

GENERAL MOTORS COMPANY AND SUBSIDIARIES

PART II

Item 1. Legal Proceedings

The discussion in the following paragraphs describe material legal proceedings that arose in the three months ended June 30, 2014 or provides an update of developments that have occurred in various material pending legal proceedings to which we are a party, other than ordinary routine litigation incidental to our business. The proceedings that are being updated are fully described in our 2013 Form 10-K as updated in our Form 10-Q for the period ended March 31, 2014.

Proceedings Related to Ignition Switch Recall

In the three months ended March 31, 2014 we announced a recall to repair ignition switches that under certain circumstances could unintentionally move from the “run” position to the “accessory” or “off” position with a corresponding loss of power, which in turn may prevent front airbags from deploying in the event of a crash. The recall includes approximately 2.6 million Chevrolet Cobalt, HHR, Pontiac G5, Pursuit, Solstice, and Saturn ION and Sky vehicles. Refer to the “Recall Campaigns” section of MD&A for additional information.

Through July 23, 2014 we are aware of 95 putative class actions that have been filed against GM in various U.S. District Courts and state courts since the recall announcement alleging that consumers have been economically harmed by the recall and/or the underlying vehicle condition. In the aggregate these cases seek recovery for compensatory damages, including for alleged diminution in value of the vehicles, punitive damages and injunctive and other relief. Most, but not all, of these lawsuits are pending in federal court. Additionally, through July 23, 2014, eight putative class actions have been filed in various Provincial Courts in Canada seeking similar relief. In June 2014 the United States Judicial Panel on Multidistrict Litigation ordered that 15 of the then pending U.S. federal lawsuits involving ignition switches be transferred to and consolidated in a single federal court, the Southern District of New York. To date, more than 100 cases (including personal injury cases) have been transferred and consolidated in that same court, and GM has requested that various other recently filed federal lawsuits also be transferred and consolidated with those same actions. Because the majority of plaintiffs in these actions are suing over vehicles manufactured by pre bankruptcy General Motors Corporation, GM will seek to enforce the terms of the federal Bankruptcy Court’s July 2009 Sale Order and Injunction to preclude liability for any economic loss damages based on vehicles and parts manufactured prior to July 2009. These cases are in their very early stages. No discovery has yet taken place.

Through July 23, 2014 we are aware of two actions that have been filed against GM alleging that GM’s purported concealment of the ignition switch and other defects that have been the subject of recalls in 2014 has diminished the value of other GM vehicles and seeking economic damages under California consumer protection statutes. One of these actions is a putative class action that has been consolidated with the ignition switch putative class actions and transferred to the Southern District of New York. The other action was brought by the Orange County, California district attorney and is pending in California state court. In the aggregate, these actions seek recovery under California consumer protection statutes for economic damages as well as civil penalties, punitive damages, attorneys’ fees and costs.

On March 21, 2014 a putative shareholder class action was filed in the United States District Court for the Eastern District of Michigan against GM and various current and former officers of GM (Pio v. General Motors Company et al.) on behalf of purchasers of GM securities from November 17, 2010 through March 10, 2014. The complaint alleges that defendants made material misstatements and omissions relating to problems with the ignition switch in

SEC filings. The plaintiff seeks unspecified monetary damages, interest and attorneys' fees and costs. Four shareholders have filed motions seeking to be appointed lead plaintiff in this putative class action. After the court rules on those motions and appoints a lead plaintiff, we anticipate the lead plaintiff will file an amended complaint that may include allegations different from those in the current complaint.

On March 28, 2014 a shareholder derivative action was filed in the United States District Court for the Eastern District of Michigan against certain current and former GM directors (Hockstein v. Barra, et al.). The complaint alleges breach of fiduciary duty, waste of corporate assets, and unjust enrichment by GM's directors in connection with monitoring, remediation and disclosure of the issues underlying the ignition switch recall. Between April 9, 2014 and July 22, 2014 seven other similar shareholder derivative actions were filed in the Eastern District of Michigan (Police Retirement System of St. Louis v. Barra, et al.), the Circuit Court for Wayne County, Michigan (Bekkerman v. Barra, et al., Wietschiner, et al. v. Barra, et al.) the Chancery Court for the State of Delaware (Nash v. Barra, et al., DiStefano v. Barra, et al., Newspaper and Magazine Employees Union v. Barra, et al., Boso v. Solso, et al.). All of these actions seek damages allegedly resulting from defendants' failure to timely identify, correct and disclose the ignition switch defect, an order compelling implementation of various corporate governance policies and practices, and other relief purportedly for the benefit of GM.

Table of Contents

GENERAL MOTORS COMPANY AND SUBSIDIARIES

Through July 23, 2014 we are aware of 26 actions pending against GM alleging injury or death as a result of faulty ignition switches and/or the failure of air bags to properly deploy due to faulty ignition switches. Of these actions eight have been transferred to federal court in the Southern District of New York, three are the subject of GM's motion to consolidate and transfer to a single state court in Texas, and 15 are pending in various other federal and state courts throughout the country. These actions generally assert that GM intentionally and fraudulently concealed facts relating to faulty ignition switches and related defects from plaintiffs, the public, and NHTSA over a lengthy period. These complaints assert various causes of action under federal and state law, including strict products liability, negligence, breach of implied warranty, fraud and fraudulent concealment, and Federal and Georgia Racketeer Influenced and Corrupt Organizations Acts and seek compensatory damages, treble damages, punitive damages, and attorneys' fees and costs.

Through July 23, 2014 we are aware of six actions pending against GM alleging injury or death as a result of inadvertent ignition key rotation and/or failure of air bags to properly deploy as a result of inadvertent ignition key rotation. Of these actions two have been transferred to federal court in the Southern District of New York, one is pending in federal court in the Southern District of Texas, two are pending in Texas state court and one is pending in Indiana state court. In the aggregate these actions assert that GM intentionally and fraudulently concealed facts relating to the inadvertent ignition key rotation and related defects from plaintiffs, the public and NHTSA over a lengthy period. These complaints assert various causes of action under federal and state law, including strict products liability, negligence, breach of implied warranties, fraud and fraudulent concealment and seek compensatory damages, punitive damages and attorneys' fees and costs.

GM intends to vigorously defend all of these actions.

We are also the subject of various inquiries, investigations, subpoenas and requests for information from the U.S. Attorney's Office for the Southern District of New York, Congress, the SEC, Transport Canada and 45 state attorney generals in connection with our recent recalls. We are investigating these matters and believe we are cooperating fully with all requests. Such investigations could in the future result in the imposition of material damages, fines or civil and criminal penalties.

GM Korea Wage Litigation

Commencing on or about September 29, 2010 current and former hourly employees of GM Korea filed eight separate group actions in the Incheon District Court in Incheon, Korea. The cases, which in aggregate involve more than 10,000 employees, allege that GM Korea failed to include bonuses and certain allowances in its calculation of Ordinary Wages due under the Presidential Decree of the Korean Labor Standards Act. On November 23, 2012 the Seoul High Court (an intermediate level appellate court) issued a decision affirming a decision of the Incheon District Court in a case involving five GM Korea employees which was contrary to GM Korea's position. GM Korea appealed to the Supreme Court of the Republic of Korea (Supreme Court) and initiated a constitutional challenge to the adverse interpretation of the relevant statute. In December 2013 the Supreme Court rendered a decision in a case involving another company not affiliated with us which addressed many of the issues presented in the cases pending against GM Korea and resolved many of them in a manner which we believe is favorable to GM Korea. In particular, while the Supreme Court held that fixed bonuses should be included in the calculation of Ordinary Wages, it also held that claims for retroactive application of this rule would be barred under certain circumstances. On May 29, 2014 the Supreme Court rendered its decision with respect to the case involving the five GM Korea employees and remanded the case to the Seoul High Court consistent with its December 2013 ruling. Accordingly we have eliminated any accrual associated with these cases prior to March 1, 2014.

GENERAL MOTORS COMPANY AND SUBSIDIARIES

No shares of common stock were purchased for cash in the three months ended June 30, 2014.

Other Purchases of Equity Securities

The following table summarizes our non-cash purchases of common stock in each of the three months ended June 30, 2014:

	Total Number of Shares Purchased	Average Price Paid per Share	Total Number of Shares Purchased Under the Program	Approximate Dollar Value of Shares That May Yet be Purchased Under the Program
April 1, 2014 through April 30, 2014	173,512	\$34.55	N/A	N/A
May 1, 2014 through May 31, 2014	83,787	\$34.42	N/A	N/A
June 1, 2014 through June 30, 2014	103,634	\$35.32	N/A	N/A
Total	360,933	\$34.74		

N/A = not applicable

Shares purchased represents shares of common stock retained by us for the payment of the exercise price upon the exercise of warrants and shares of common stock delivered by employees or directors back to us for the payment of taxes resulting from issuance of common stock upon the vesting of RSUs and Restricted Stock Awards relating to compensation plans. Refer to Notes 21 and 23 to our consolidated financial statements in our 2013 Form 10-K for additional details on warrants issued and employee stock incentive plans. In June 2014 our stockholders approved the 2014 Long-Term Incentive Plan (LTIP) which authorizes awards of stock options, stock appreciation rights, restricted stock, RSUs, performance awards or other stock-based awards to selected employees, consultants, advisors and non-employee directors of the Company. In June 2014 the Board of Directors authorized the Company to repurchase up to 5 million shares of common stock, which is intended to offset dilution from a June 2014 grant under the LTIP.
