Notes to Consolidated Financial Statements (Unaudited)

1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Basis of Presentation - The consolidated financial statements include the accounts of Capitol Federal® Financial, Inc. (the "Company") and its wholly-owned subsidiary, Capitol Federal Savings Bank (the "Bank"). The Bank has a wholly-owned subsidiary, Capitol Funds, Inc. Capitol Funds, Inc. has a wholly-owned subsidiary, Capitol Federal Mortgage Reinsurance Company. All intercompany accounts and transactions have been eliminated in consolidation. The consolidated financial statements have been prepared in accordance with accounting principles generally accepted in the United States of America ("GAAP") for interim financial information and with the instructions to Form 10-Q and Rule 10-01 of Regulation S-X. Accordingly, they do not include all of the information and footnotes required by GAAP for complete financial statements. In the opinion of management, all adjustments (consisting of normal recurring adjustments) considered necessary for a fair presentation have been included. These statements should be read in conjunction with the consolidated financial statements and notes thereto included in the Company's Annual Report on Form 10-K for the fiscal year ended September 30, 2015, filed with the Securities and Exchange Commission ("SEC"). Interim results are not necessarily indicative of results for a full year.

Recent Accounting Pronouncements - In May 2014, the Financial Accounting Standards Board ("FASB") issued Accounting Standards Update ("ASU") 2014-09, Revenue from Contracts with Customers. The ASU, as amended, clarifies principles for recognizing revenue and provides a common revenue standard for GAAP and International Financial Reporting Standards. Additionally, the ASU provides implementation guidance on several topics and requires entities to disclose both quantitative and qualitative information regarding contracts with customers. ASU 2014-09 is effective for fiscal years beginning after December 15, 2017, including interim reporting periods within that reporting period, which is October 1, 2018 for the Company. Early adoption is permitted only as of annual reporting periods beginning after December 15, 2016. The Company has not yet completed its evaluation of ASU 2014-09.

In January 2016, the FASB issued ASU 2016-01, Financial Instruments, Recognition and Measurement of Financial Assets and Liabilities. The ASU supersedes certain accounting guidance related to equity securities with readily determinable fair values and the related impairment assessment. An entity's equity investments that are accounted for under the equity method of accounting or result in consolidation of an investee are not included within the scope of this ASU. The ASU requires public business entities to utilize the exit price notation in determining fair value for financial instruments measured at amortized cost on the balance sheet. The ASU requires additional reporting in other comprehensive income for financial liabilities measured at fair value in accordance with the fair value option. The ASU also requires separate presentation of financial assets and financial liabilities by measurement category and form of financial asset on the balances or in the notes to the financial statements. ASU 2016-01 is effective for fiscal years beginning after December 15, 2017, including interim periods with those fiscal years, which is October 1, 2018 for the Company. Early adoption is not permitted except in certain circumstances. The Company has not yet completed its evaluation of ASU 2016-01.

In February 2016, the FASB issued ASU 2016-02, Leases. The ASU amends lease accounting guidance by requiring that lessees recognize the assets and liabilities arising from leases on the balance sheet. Additionally, the ASU requires entities to disclose both quantitative and qualitative information regarding their leasing activities. ASU 2016-02 is effective for fiscal years beginning after December 15, 2018, including interim periods within those fiscal years, which is October 1, 2019 for the Company. Early adoption is permitted. The Company has not yet completed its evaluation of ASU 2016-02.

In March 2016, the FASB issued ASU 2016-09, Compensation - Stock Compensation: Improvements to Employee Share-Based Payment Accounting. The ASU simplifies several aspects of the accounting for employee share-based payment transactions, including the accounting for income taxes, forfeitures, and statutory tax withholding requirements, along with simplifying the classification in the statement of cash flows. The ASU is effective for annual

reporting periods beginning after December 15, 2016, including interim periods within those annual reporting periods, which is October 1, 2017 for the Company. The Company has not yet completed its evaluation of ASU 2016-09.

In June 2016, the FASB issued ASU 2016-13, Financial Instruments - Credit Losses: Measurement of Credit Losses on Financial Instruments. The ASU replaces the incurred loss impairment methodology in current GAAP, which requires credit losses to be recognized when it is probable that a loss has incurred, with a new impairment methodology. The new impairment methodology requires an entity to measure, at each reporting date, the expected credit losses of financial assets not measured at fair value, such as loans, HTM debt securities, and loan commitments, over their contractual lives. Under the new impairment methodology, expected credit losses will be measured at each reporting date based on historical experience, current conditions, and reasonable and supportable forecasts. Additionally, the ASU amends the current credit loss measurements for AFS debt securities. Credit losses related to AFS debt securities will be recorded through the ACL rather than as a direct write-down as per current GAAP. The ASU also requires enhanced disclosures related to credit quality and significant estimates and judgments used by management when estimating credit losses. The ASU is effective for annual reporting periods beginning after December 15, 2019, including interim periods within those annual reporting periods, which is October 1, 2020 for the Company. Early adoption is permitted for fiscal years beginning after December 15, 2018, including interim periods within those fiscal years. The Company has not yet completed its evaluation of ASU 2016-13.

## 2. EARNINGS PER SHARE

Shares acquired by the ESOP are not considered in the basic average shares outstanding until the shares are committed for allocation or vested to an employee's individual account. Unvested shares awarded pursuant to the Company's restricted stock benefit plans are treated as participating securities in the computation of EPS pursuant to the two-class method as they contain nonforfeitable rights to dividends. The two-class method is an earnings allocation that determines EPS for each class of common stock and participating security.

The unrealized losses at June 30, 2016 and September 30, 2015 were primarily a result of an increase in market yields from the time the securities were purchased. In general, as market yields rise, the fair value of securities will decrease; as market yields fall, the fair value of securities will increase. Management generally views changes in fair value caused by changes in interest rates as temporary; therefore, these securities have not been classified as other-than-temporarily impaired. The impairment is also considered temporary because scheduled coupon payments have been made, it is anticipated that the entire principal balance will be collected as scheduled, and management neither intends to sell the securities, nor is it more likely than not that the Company will be required to sell the securities before the recovery of the remaining amortized cost amount, which could be at maturity. As a result of the analysis, management has concluded that no other-than-temporary impairments existed at June 30, 2016 or September 30, 2015.

The amortized cost and estimated fair value of debt securities as of June 30, 2016, by contractual maturity, are shown below. Actual principal repayments may differ from contractual maturities due to prepayment or early call privileges by the issuer. In the case of MBS, borrowers on the underlying loans generally have the right to prepay their loans without prepayment penalty. For this reason, MBS are not included in the maturity categories.

	\$6,839,123	\$6,625,027

Lending Practices and Underwriting Standards - Originating and purchasing one- to four-family loans is the Bank's primary lending business, resulting in a loan concentration in residential first mortgage loans. The Bank purchases one- to four-family loans, on a loan-by-loan basis, from a select group of correspondent lenders. As a result of our one- to four-family lending activities, the Bank has a concentration of loans secured by real property located in Kansas and Missouri. The Bank also originates consumer loans and commercial real estate loans and participates in commercial real estate loans.

One- to four-family loans - Full documentation to support an applicant's credit and income, and sufficient funds to cover all applicable fees and reserves at closing, are required on all loans. Loans are underwritten according to the "ability to repay" and "qualified mortgage" standards, as issued by the Consumer Financial Protection Bureau ("CFPB"). Properties securing one- to four-family loans are appraised by either staff appraisers or fee appraisers, both of which are independent of the loan origination function and approved by our Board of Directors.

The underwriting standards for loans purchased from correspondent and nationwide lenders are generally similar to the Bank's internal underwriting standards. The underwriting of loans purchased from correspondent lenders on a loan-by-loan basis is performed by the Bank's underwriters. For the tables within this Note, correspondent loans purchased on a loan-by-loan basis are included with originated loans and loans purchased in loan packages ("bulk

loans") are reported as purchased loans.

The Bank also originates construction-to-permanent loans secured by one- to four-family residential real estate. Construction loans are obtained by homeowners who will occupy the property when construction is complete. Construction loans to builders for

14

---

speculative purposes are not permitted. All construction loans are manually underwritten using the Bank's internal underwriting standards. Construction draw requests and the supporting documentation are reviewed and approved by designated personnel. The Bank also performs regular documented inspections of the construction project to ensure the funds are being used for the intended purpose and the project is being completed according to the plans and specifications provided.

Commercial real estate loans - The Bank's commercial real estate loans are originated by the Bank or are in participation with a lead bank. These loans are underwritten based on the income producing potential of the property, the collateral value, and the financial strength of the borrower. Additionally, the Bank generally requires personal guarantees. At the time of origination, loan-to-value ("LTV") ratios on commercial real estate loans generally do not exceed 80% of the appraised value of the property securing the loans and the minimum debt service coverage ratio is generally 1.25. Appraisals on properties securing these loans are performed by independent state certified fee appraisers.

Consumer loans - The Bank offers a variety of secured consumer loans, including home equity loans and lines of credit, home improvement loans, auto loans, and loans secured by savings deposits. The Bank also originates a very limited amount of unsecured loans. The Bank does not originate any consumer loans on an indirect basis, such as contracts purchased from retailers of goods or services which have extended credit to their customers. The majority of the consumer loan portfolio is comprised of home equity lines of credit for which the Bank also has the first mortgage or the home equity line of credit is in the first lien position.

The underwriting standards for consumer loans include a determination of an applicant's payment history on other debts and an assessment of an applicant's ability to meet existing obligations and payments on the proposed loan. Although creditworthiness of an applicant is a primary consideration, the underwriting process also includes a comparison of the value of the security in relation to the proposed loan amount.

Credit Quality Indicators - Based on the Bank's lending emphasis and underwriting standards, management has segmented the loan portfolio into three segments: (1) one- to four-family; (2) consumer; and (3) commercial real estate. The one- to four-family and consumer loan portfolios are further segmented into classes for purposes of providing disaggregated information about the credit quality of the loan portfolio. The classes are: one- to four-family - originated, one- to four-family - purchased, consumer - home equity, and consumer - other.

The Bank's primary credit quality indicators for the one- to four-family and consumer - home equity loan portfolios are delinquency status, asset classifications, LTV ratios, and borrower credit scores. The Bank's primary credit quality indicators for the commercial real estate and consumer - other loan portfolios are delinquency status and asset classifications.

Edgar Filing: Capitol Federal Financial Inc - Form 10-Q

The following tables present the recorded investment, by class, in loans 30 to 89 days delinquent, loans 90 or more days delinquent or in foreclosure, total delinquent loans, current loans, and total recorded investment at the dates presented. The recorded investment in loans is defined as the unpaid principal balance of a loan (net of unadvanced funds related to loans in process), less charge-offs and inclusive of unearned loan fees and deferred costs. At June 30, 2016 and September 30, 2015, all loans 90 or more days delinquent were on nonaccrual status.

	Foreclosure	Foreclosure			

The recorded investment of mortgage loans secured by residential real estate properties for which formal foreclosure proceedings were in process as of June 30, 2016 was \$5.9 million, which is included in loans 90 or more days delinquent or in foreclosure in the table above. The carrying value of residential OREO held as a result of obtaining physical possession upon completion of a foreclosure or through completion of a deed in lieu of foreclosure was \$3.1 million at June 30, 2016.

The following table presents the recorded investment, by class, in loans classified as nonaccrual at the dates presented.

Consumer - other	24	12

\$27,758 \$ 25,935

In accordance with the Bank's asset classification policy, management regularly reviews the problem loans in the Bank's portfolio to determine whether any loans require classification. Loan classifications are defined as follows:

**Special mention** - These loans are performing loans on which known information about the collateral pledged or the possible credit problems of the borrower(s) have caused management to have doubts as to the ability of the borrower(s) to comply with present loan repayment terms and which may result in the future inclusion of such loans in the non-performing loan categories.

**Substandard** - A loan is considered substandard if it is inadequately protected by the current net worth and paying capacity of the obligor or of the collateral pledged, if any. Substandard loans include those characterized by the distinct possibility the Bank will sustain some loss if the deficiencies are not corrected.

**Doubtful** - Loans classified as doubtful have all the weaknesses inherent in those classified as substandard, with the added characteristic that the weaknesses present make collection or liquidation in full on the basis of currently existing facts and conditions and values highly questionable and improbable.

**Loss** - Loans classified as loss are considered uncollectible and of such little value that their continuance as assets on the books is not warranted.

The following table sets forth the recorded investment in loans classified as special mention or substandard, by class, at the dates presented. Special mention and substandard loans are included in the ACL formula analysis model if the loans are not individually evaluated for loss. Loans classified as doubtful or loss are individually evaluated for loss. At the dates presented, there were no loans classified as doubtful, and all loans classified as loss were fully charged-off.

	June 30, 2016		September 30, 2015	
	Special Mention	Substandard	Special Mention	Substandard
	(Dollars in thousands)			
One- to four-family - originated	\$ 11,303	\$ 31,162	\$ 16,149	\$ 29,282

Consumer - other	—	26	—	17
	\$ 12,617	\$ 44,091	\$ 17,676	\$ 43,837

The following table shows the weighted average credit score and weighted average LTV for originated and purchased one- to four-family loans and originated consumer home equity loans at the dates presented. Borrower credit scores are intended to provide an indication as to the likelihood that a borrower will repay their debts. Credit scores are updated at least semiannually, with the last update in March 2016, from a nationally recognized consumer rating agency. The LTV ratios provide an estimate of the extent to which the Bank may incur a loss on any given loan that may go into foreclosure. The consumer - home equity LTV does not take into account the first lien position, if applicable. The LTV ratios were based on the current loan balance and either the lesser of the purchase price or original appraisal, or the most recent Bank appraisal, if available. In most cases, the most recent appraisal was obtained at the time of origination.

	June 30, 2016		September 30, 2015	
	Credit Score	LTV	Credit Score	LTV
One- to four-family - originated	765	65 %	765	65 %

	764	64	764	64

Troubled Debt Restructurings ("TDRs") - The following tables present the recorded investment prior to restructuring and immediately after restructuring in all loans restructured during the periods presented. These tables do not reflect the recorded investment at the end of the periods indicated. Any increase in the recorded investment at the time of the restructuring was generally due to the capitalization of delinquent interest and/or escrow balances.

## 5. LOW INCOME HOUSING PARTNERSHIPS

The Bank's investment in low income housing partnerships, which is included in other assets in the consolidated balance sheets, was \$49.0 million and \$41.8 million at June 30, 2016 and September 30, 2015, respectively. The Bank's obligations related to unfunded commitments, which are included in accounts payable and accrued expenses in the consolidated balance sheets, were \$19.7 million and \$14.6 million at June 30, 2016 and September 30, 2015, respectively. The majority of the commitments are projected to be funded through the end of calendar year 2018.

Expenses associated with the Bank's investment in the low income housing partnerships are included in low income housing partnerships in the consolidated statements of income. The low income housing partnership expenses resulted in other tax benefits of \$286 thousand and \$859 thousand for the three and nine months ended June 30, 2016, respectively, which are a component of income tax expense in the consolidated statements of income. Affordable housing tax credits are recognized as a component of income tax expense in the consolidated statements of income and totaled \$1.2 million and \$3.6 million for the three and nine months ended June 30, 2016, respectively. There were no impairment losses during the three and nine months ended June 30, 2016 resulting from the forfeiture or ineligibility of tax credits or other circumstances.

## 6. REPURCHASE AGREEMENTS

At both June 30, 2016 and September 30, 2015, the Company had repurchase agreements outstanding in the amount of \$200.0 million with a weighted average contractual rate of 2.94%. All of the Company's repurchase agreements at June 30, 2016 and September 30, 2015 were fixed-rate. See Note 3 for information regarding the amount of securities pledged as collateral in conjunction with repurchase agreements. Securities are delivered to the party with whom each transaction is executed and the party agrees to resell the same securities to the Bank at the maturity of the agreement. The Bank retains the right to substitute similar or like securities throughout the terms of the agreements. The repurchase agreements and collateral are subject to valuation at current market levels and the Bank may ask for the return of excess collateral or be required to post additional collateral due to changes in the market values of these items. The Bank may also be required to post additional collateral as a result of principal payments received on the securities pledged.

The following table presents the scheduled maturity of repurchase agreements by fiscal year as of June 30, 2016:

	Amount (Dollars in thousands)
2016	\$ —
2017	—
2018	100,000
2019	—
2020	100,000
Thereafter	—
	\$ 200,000

## 7. FAIR VALUE OF FINANCIAL INSTRUMENTS

Fair Value Measurements - The Company uses fair value measurements to record fair value adjustments to certain assets and to determine fair value disclosures in accordance with Accounting Standards Codification ("ASC") 820 and ASC 825. The Company did not have any liabilities that were measured at fair value at June 30, 2016 or September 30, 2015. The Company's AFS securities are recorded at fair value on a recurring basis. Additionally, from time to time, the Company may be required to record at fair value other assets or liabilities on a non-recurring basis, such as OREO and loans individually evaluated for impairment. These non-recurring fair value adjustments involve the application of lower of cost or fair value accounting or write-downs of individual assets.

The Company groups its assets at fair value in three levels based on the markets in which the assets are traded and the reliability of the assumptions used to determine fair value. These levels are:

Level 1 - Valuation is based upon quoted prices for identical instruments traded in active markets.

Level 2 - Valuation is based upon quoted prices for similar instruments in active markets, quoted prices for identical or similar instruments in markets that are not active, and model-based valuation techniques for which all significant assumptions are observable in the market.

Level 3 - Valuation is generated from model-based techniques that use significant assumptions not observable in the market. These unobservable assumptions reflect the Company's own estimates of assumptions that market participants would use in pricing the asset or liability. Valuation techniques include the use of option pricing models, discounted cash flow models, and similar techniques. The results cannot be determined with precision and may not be realized in an actual sale or immediate settlement of the asset or liability.

The Company bases its fair values on the price that would be received from the sale of an asset in an orderly transaction between market participants at the measurement date. The Company maximizes the use of observable inputs and minimizes the use of unobservable inputs when measuring fair value.

The following is a description of valuation methodologies used for assets measured at fair value on a recurring basis.

AFS Securities - The Company's AFS securities portfolio is carried at estimated fair value, with any unrealized gains and losses, net of taxes, reported as AOCI in stockholders' equity. The majority of the securities within the AFS portfolio were issued by GSEs. The Company primarily uses prices obtained from third party pricing services to determine the fair value of its securities. On a quarterly basis, management corroborates a sample of prices obtained from the third party pricing service for Level 2 securities by comparing them to an independent source. If the price provided by the independent source varies by more than a predetermined percentage from the price received from the third party pricing service, then the variance is researched by management. The Company did not have to adjust prices obtained from the third party pricing service when determining the fair value of its securities during the nine months ended June 30, 2016 or during fiscal year 2015. The Company's major security types, based on the nature and risks of the securities, are:

GSE Debentures - Estimated fair values are based on a discounted cash flow method. Cash flows are determined by taking any embedded options into consideration and are discounted using current market yields for similar securities. (Level 2)

MBS - Estimated fair values are based on a discounted cash flow method. Cash flows are determined based on prepayment projections of the underlying mortgages and are discounted using current market yields for benchmark securities. (Level 2)

Municipal Bonds - Estimated fair values are based on a discounted cash flow method. Cash flows are determined by taking any embedded options into consideration and are discounted using current market yields for securities with similar credit profiles. (Level 2)

Trust Preferred Securities - Estimated fair values are based on a discounted cash flow method. Cash flows are determined by taking prepayment and underlying credit considerations into account. The discount rates are derived

from secondary trades and bid/offer prices. (Level 3)

The following tables provide the level of valuation assumption used to determine the carrying value of the Company's assets measured at fair value on a recurring basis at the dates presented.

June 30, 2016

	Quoted Prices in Active Markets for Carrying Assets Value (Dollars in thousands)	Significant Other Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)
AFS Securities:			
GSE debentures	\$472,713	—	\$ —
MBS	191,706	—	—
Municipal bonds	141	—	—
Trust preferred securities	1,753	—	1,753
	\$666,313	—	\$ 1,753

September 30, 2015

	Quoted Prices in Active Markets for Carrying Assets Value (Dollars in thousands)	Significant Other Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)
AFS Securities:			
GSE debentures	\$526,620	—	\$ —
MBS	229,491	—	—
Municipal bonds	144	—	—
Trust preferred securities	1,916	—	1,916
	\$758,171	—	\$ 1,916

The Company's Level 3 AFS securities had no activity during the three and nine months ended June 30, 2016, except for principal repayments of \$13 thousand and \$44 thousand, respectively, and increases in net unrealized losses included in other comprehensive income of \$19 thousand and \$87 thousand, respectively. The Company's Level 3 AFS securities had no activity during the three months ended June 30, 2015, except for increases in net unrealized losses included in other comprehensive income of \$1 thousand. The Company's Level 3 AFS securities had no activity during the nine months ended June 30, 2015, except for principal repayments of \$193 thousand, and increases in net unrealized losses included in other comprehensive income of \$55 thousand.

The following is a description of valuation methodologies used for significant assets measured at fair value on a non-recurring basis.

Loans Receivable - The balance of loans individually evaluated for impairment at June 30, 2016 and September 30, 2015 was \$23.6 million and \$22.8 million, respectively. Substantially all of these loans were secured by residential real estate and were individually evaluated to determine if the carrying value of the loan was in excess of the fair value

of the collateral, less estimated selling costs of 10%. When no impairment is indicated, the carrying amount is considered to approximate fair value. Fair values were estimated through current appraisals or current Federal Housing Finance Agency ("FHFA") housing price indices, which is a broad based measure of the movement of single-family house prices and is a weighted, repeat-sales index. Management does not adjust or apply a discount to the appraised value or FHFA housing price indices, except for the estimated sales costs noted above. The primary significant unobservable input for impaired loans with fair values estimated using appraisals was the appraisal. Fair values of impaired loans cannot be determined with precision and may not be realized in an actual sale or immediate settlement of the loan and, as such, are classified as Level 3. Based on this evaluation, the Bank charged-off any loss amounts as of June 30, 2016 and September 30, 2015; therefore, there was no ACL related to these loans.

OREO - OREO primarily represents real estate acquired as a result of foreclosure or by deed in lieu of foreclosure and is carried at lower of cost or fair value. Fair value is estimated through current appraisals or listing prices, less estimated selling costs of 10%. Management does not adjust or apply a discount to the appraised value or listing prices, except for the estimated sales costs noted above. The primary significant unobservable input for OREO was the appraisal or listing price. Fair values of foreclosed property

cannot be determined with precision and may not be realized in an actual sale of the property and, as such, are classified as Level 3. The fair value of OREO at June 30, 2016 and September 30, 2015 was \$4.3 million.

The following tables provide the level of valuation assumptions used to determine the carrying value of the Company's assets measured at fair value on a non-recurring basis at the dates presented.

	June 30, 2016			
	Quoted Prices in Active Markets for	Significant Other Observable Inputs	Significant Unobservable Inputs	
	Carrying Value	Identical (Level 1)	(Level 2)	(Level 3)
	(Dollars in thousands)			
Loans individually evaluated for impairment	\$23,610	\$ —	—	—\$ 23,610
OREO	4,332	—	—	4,332
	\$27,942	\$ —	—	—\$ 27,942

	September 30, 2015			
	Quoted Prices in Active Markets for	Significant Other Observable Inputs	Significant Unobservable Inputs	
	Carrying Value	Identical (Level 1)	(Level 2)	(Level 3)
	(Dollars in thousands)			
Loans individually evaluated for impairment	\$22,762	\$ —	—	—\$ 22,762
OREO	4,333	—	—	4,333
	\$27,095	\$ —	—	—\$ 27,095

Fair Value Disclosures - The Company determined estimated fair value amounts using available market information and from a variety of valuation methodologies. However, considerable judgment is required to interpret market data to develop the estimates of fair value. Accordingly, the estimates presented are not necessarily indicative of the amount the Company could realize in a current market exchange. The use of different market assumptions and estimation methodologies may have a material impact on the estimated fair value amounts. The fair value estimates presented herein were based on pertinent information available to management as of the dates presented.

The carrying amounts and estimated fair values of the Company's financial instruments, at the dates presented, were as follows:

	June 30, 2016		September 30, 2015	
	Carrying Amount	Estimated Fair Value	Carrying Amount	Estimated Fair Value
	(Dollars in thousands)			
Assets:				
Cash and cash equivalents	\$152,831	\$152,831	\$772,632	\$772,632
AFS securities	666,313	666,313	758,171	758,171

Edgar Filing: Capitol Federal Financial Inc - Form 10-Q

HTM securities	1,188,913	1,214,498	1,271,122	1,295,274
Loans receivable	6,839,123	7,170,795	6,625,027	6,870,176
FHLB stock	114,425	114,425	150,543	150,543
Liabilities:				
Deposits	5,085,129	5,135,675	4,832,520	4,869,312
FHLB borrowings	2,472,026	2,550,085	3,270,521	3,339,650
Repurchase agreements	200,000	209,278	200,000	209,807

The following methods and assumptions were used to estimate the fair value of the financial instruments:

**Cash and Cash Equivalents** - The carrying amounts of cash and cash equivalents are considered to approximate their fair value due to the nature of the financial assets. (Level 1)

**HTM Securities** - Estimated fair values of securities are based on one of three methods: (1) quoted market prices where available; (2) quoted market prices for similar instruments if quoted market prices are not available; (3) unobservable data that represents the Bank's assumptions about items that market participants would consider in determining fair value where no market data is available. HTM securities are carried at amortized cost. (Level 2)

**Loans Receivable** - The fair value of one- to four-family loans and home equity loans are generally estimated using the present value of expected future cash flows, assuming future prepayments and using discount factors determined by prices obtained from securitization markets, less a discount for the cost of servicing and lack of liquidity. The estimated fair value of the Bank's commercial and consumer loans are based on the expected future cash flows assuming future prepayments and discount factors based on current offering rates. (Level 3)

**FHLB stock** - The carrying value and estimated fair value of FHLB stock equals cost, which is based on redemption at par value. (Level 1)

**Deposits** - The estimated fair value of demand deposits, savings, and money market accounts is the amount payable on demand at the reporting date. The estimated fair value of these deposits at June 30, 2016 and September 30, 2015 was \$2.32 billion and \$2.20 billion, respectively. (Level 1) The fair value of certificates of deposit is estimated by discounting future cash flows using current London Interbank Offered Rates ("LIBOR"). The estimated fair value of certificates of deposit at June 30, 2016 and September 30, 2015 was \$2.82 billion and \$2.67 billion, respectively. (Level 2)

**FHLB borrowings and Repurchase Agreements** - The fair value of fixed-maturity borrowed funds is estimated by discounting estimated future cash flows using current offer rates. (Level 2) The carrying value of FHLB line of credit is considered to approximate its fair value due to the nature of the financial liability. (Level 1)

## Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

The Company and its wholly-owned subsidiary may, from time to time, make written or oral "forward-looking statements," including statements contained in documents filed or furnished by the Company with the SEC. These forward-looking statements may be included in this Quarterly Report on Form 10-Q, in the Company's reports to stockholders, in the Company's press releases, and in other communications by the Company, which are made in good faith by us pursuant to the "safe harbor" provisions of the Private Securities Litigation Reform Act of 1995.

These forward-looking statements include statements about our beliefs, plans, objectives, goals, expectations, anticipations, estimates and intentions, which are subject to significant risks and uncertainties, and are subject to change based on various factors, some of which are beyond our control. The words "may," "could," "should," "would," "believe," "anticipate," "estimate," "expect," "intend," "plan" and other similar expressions are intended to identify forward-looking statements. The following factors, among others, could cause our future results to differ materially from the plans, objectives, goals, expectations, anticipations, estimates and intentions expressed in the forward-looking statements:

- our ability to maintain overhead costs at reasonable levels;
- our ability to originate and purchase a sufficient volume of one- to four-family loans in order to maintain the balance of that portfolio at a level desired by management;
- our ability to invest funds in wholesale or secondary markets at favorable yields compared to the related funding source;
- our ability to access cost-effective funding;
- the future earnings and capital levels of the Bank and the continued non-objection by our primary federal banking regulators, to the extent required, to distribute capital from the Bank to the Company, which could affect the ability of the Company to pay dividends in accordance with its dividend policy;
- fluctuations in deposit flows, loan demand, and/or real estate values, as well as unemployment levels, which may adversely affect our business;
- the credit risks of lending and investing activities, including changes in the level and direction of loan delinquencies and charge-offs, changes in home values, and changes in estimates of the adequacy of the ACL;
- results of examinations of the Bank and the Company by their respective primary federal banking regulators, including the possibility that the regulators may, among other things, require us to increase our ACL;
- changes in accounting principles, policies, or guidelines;
- the strength of the U.S. economy in general and the strength of the local economies in which we conduct operations, including areas where we have purchased large amounts of correspondent loans and loan participations;
- the effects of, and changes in, trade, fiscal policies and laws, and monetary and interest rate policies of the Board of Governors of the Federal Reserve System ("FRB");
- the effects of, and changes in, foreign and military policies of the United States government;
- inflation, interest rate, market, monetary, and currency fluctuations;
- the timely development and acceptance of our new products and services and the perceived overall value of these products and services by users, including the features, pricing, and quality compared to competitors' products and services;
- the willingness of users to substitute competitors' products and services for our products and services;
- our success in gaining regulatory approval of our products and services and branching locations, when required;
- the impact of changes in financial services laws and regulations, including laws concerning taxes, banking, securities, consumer protection and insurance and the impact of other governmental initiatives affecting the financial services industry;
- implementing business initiatives may be more difficult or expensive than anticipated;
- significant litigation;
- technological changes;
- acquisitions and dispositions;
- changes in consumer spending and saving habits; and

our success at managing the risks involved in our business.

This list of important factors is not all inclusive. We do not undertake to update any forward-looking statement, whether written or oral, that may be made from time to time by or on behalf of the Company or the Bank.

As used in this Form 10-Q, unless the context indicates otherwise, "the Company," "we," "us," and "our" refer to Capitol Federal Financial, Inc. a Maryland corporation, and its consolidated subsidiaries. "Capitol Federal Savings," and "the Bank," refer to Capitol Federal Savings Bank, a federal savings bank and the wholly-owned subsidiary of Capitol Federal Financial, Inc.

The following discussion and analysis is intended to assist in understanding the financial condition, results of operations, liquidity, and capital resources of the Company. The Bank comprises almost all of the consolidated assets and liabilities of the Company and the Company is dependent primarily upon the performance of the Bank for the results of its operations. Because of this relationship, references to management actions, strategies and results of actions apply to both the Bank and the Company. This discussion and

analysis should be read in conjunction with Management's Discussion and Analysis included in the Company's Annual Report on Form 10-K for the fiscal year ended September 30, 2015, filed with the SEC.

#### Executive Summary

The following summary should be read in conjunction with the Management's Discussion and Analysis of Financial Condition and Results of Operations section in its entirety.

We have been, and intend to continue to be, a community-oriented financial institution offering a variety of financial services to meet the needs of the communities we serve. We attract retail deposits from the general public and invest those funds primarily in permanent loans secured by first mortgages on owner-occupied, one- to four-family residences. We also originate consumer loans primarily secured by mortgages on one- to four-family residences and originate and participate in commercial real estate loans. We also invest in certain investment securities and MBS using funding from deposits, FHLB borrowings, and repurchase agreements.

The Company's results of operations are primarily dependent on net interest income, which is the difference between the interest earned on loans, MBS, investment securities, and cash, and the interest paid on deposits and borrowings. On a weekly basis, management reviews deposit flows, loan demand, cash levels, and changes in several market rates to assess all pricing strategies. The Bank's pricing strategy for first mortgage loan products includes setting interest rates based on secondary market prices and local competitor pricing for our local lending markets, and secondary market prices and national competitor pricing for our correspondent lending markets. Generally, deposit pricing is based upon a survey of competitors in the Bank's market areas, and the need to attract funding and retain maturing deposits. The majority of our loans are fixed-rate products with maturities up to 30 years, while the majority of our retail deposits have maturity or repricing dates of less than two years.

The Company is significantly affected by prevailing economic conditions, including federal monetary and fiscal policies and federal regulation of financial institutions. Retail deposit balances are influenced by a number of factors, including interest rates paid on competing investment products, the level of personal income, and the personal rate of savings within our market areas. Lending activities are influenced by the demand for housing and other loans, our loan underwriting guidelines compared to those of our competitors, as well as interest rate pricing competition from other lending institutions.

Economic conditions in the Bank's local market areas have a significant impact on the ability of borrowers to repay loans and the value of the collateral securing these loans. The industries in our market areas are diversified, especially in the Kansas City metropolitan statistical area, which comprises the largest segment of our loan portfolio and deposit base. As of June 2016, the unemployment rate was 3.8% for Kansas and 4.5% for Missouri, compared to the national average of 4.9%, based on information from the Bureau of Labor Statistics. The Kansas City market area has an average household income of approximately \$75 thousand per annum, based on 2015 estimates from the American Community Survey, which is a statistical survey by the U.S. Census Bureau. The average household income in our combined market areas is approximately \$70 thousand per annum, with 90% of the population at or above the poverty level, also based on the 2015 estimates from the American Community Survey. The FHFA price index for Kansas and Missouri has not experienced significant fluctuations during the past 10 years, unlike other market areas of the United States, which indicates relative stability in property values in our local market areas.

For the quarter ended June 30, 2016, the Company recognized net income of \$20.6 million, or \$0.15 per share, compared to net income of \$19.6 million, or \$0.14 per share, for the quarter ended June 30, 2015. The \$949 thousand, or 4.8%, increase in net income was due primarily to a \$917 thousand increase in net interest income. Net income attributable to the daily leverage strategy was \$532 thousand during the current quarter, compared to \$699 thousand for the prior year quarter.

The net interest margin increased two basis points, from 1.71% for the prior year quarter to 1.73% for the current year quarter. Excluding the effects of the daily leverage strategy, the net interest margin would have increased four basis points, from 2.05% for the prior year quarter to 2.09% for the current year quarter. The increase in the net interest margin was due mainly to a decrease in interest expense on term borrowings, partially offset by an increase in interest expense on deposits.

For the nine month period ended June 30, 2016, the Company recognized net income of \$62.8 million, or \$0.47 per share, compared to net income of \$59.3 million, or \$0.43 per share, for the nine month period ended June 30, 2015. The \$3.5 million, or 5.9%, increase in net income was due primarily to a \$2.6 million increase in net interest income and a \$1.9 million increase in non-interest income, partially offset by a \$1.2 million increase in non-interest expense. Net income attributable to the daily leverage strategy was \$1.7 million during the current year nine month period, compared to \$2.2 million for the prior year nine month period. The decrease in the net income attributable to the daily leverage strategy was due to an increase in the FHLB line of credit borrowings rate, which was larger than the increase in the yield earned on the cash at the Federal Reserve Bank.

The net interest margin increased three basis points, from 1.72% for the prior year nine month period, to 1.75% for the current year nine month period. Excluding the effects of the daily leverage strategy, the net interest margin would have increased four basis points,

from 2.07% for the prior year nine month period to 2.11% for the current year nine month period. The increase in the net interest margin was due mainly to a decrease in interest expense on term borrowings, partially offset by an increase in interest expense on deposits.

Total assets were \$9.24 billion at June 30, 2016 compared to \$9.84 billion at September 30, 2015. The \$602.4 million decrease was due primarily to decreases in cash and cash equivalents and FHLB stock, both due to the removal of the entire daily leverage strategy at June 30, 2016 compared to \$700.0 million of the daily leverage strategy remaining in place at September 30, 2015.

The loans receivable portfolio, net, increased \$214.1 million, to \$6.84 billion at June 30, 2016, from \$6.63 billion at September 30, 2015. This growth was primarily funded with cash flows from the securities portfolio and growth in the deposit portfolio. During the current year nine month period, the Bank originated and refinanced \$547.8 million of loans with a weighted average rate of 3.63%, purchased \$460.9 million of loans from correspondent lenders with a weighted average rate of 3.50%, and purchased participations of \$146.4 million in commercial real estate loans with a weighted average rate of 3.94%.

As previously indicated in the Company's Annual Report on Form 10-K for the fiscal year ended September 30, 2015, we have continued to expand our commercial real estate portfolio through loan participations with our correspondent lenders and other lead banks. These types of loans tend to be larger than and in different geographic regions from most of our existing loan portfolio and are generally considered to have different and greater risks than one- to four-family residential real estate loans. The net amount of commercial real estates loans as of June 30, 2016 was \$132.1 million and the combined total of undisbursed loan amounts and commitments as of June 30, 2016 was \$217.8 million, resulting in a total commercial real estate loan concentration of \$349.9 million at June 30, 2016. For more information regarding these participations and their potential risks, see "Part I, Item 1. Business - Multi-Family and Commercial Lending" and "Part I, Item 1A - Risk Factors" in the Company's Annual Report on Form 10-K for the fiscal year ended September 30, 2015.

Total liabilities were \$7.86 billion at June 30, 2016 compared to \$8.43 billion at September 30, 2015. The \$567.0 million decrease was due primarily to a \$798.5 million decrease in FHLB borrowings largely as a result of the removal of the entire daily leverage strategy at June 30, 2016, along with a \$100.0 million decrease in FHLB advances, partially offset by a \$252.6 million increase in the deposit portfolio. Management intends to continue to remove the entire daily leverage strategy at each quarter end during fiscal year 2016, and reinstate the strategy at the beginning of the following quarter. The growth in deposits during the current year nine month period was primarily in the retail certificate of deposit, checking, and wholesale certificate of deposit portfolios, which increased \$79.3 million, \$60.3 million, and \$55.9 million, respectively.

Stockholders' equity was \$1.38 billion at June 30, 2016 compared to \$1.42 billion at September 30, 2015. The \$35.4 million decrease between dates was due primarily to the payment of \$100.4 million in cash dividends, partially offset by net income of \$62.8 million.

#### Available Information

Financial and other Company information, including press releases, Annual Reports on Form 10-K, Quarterly Reports on Form 10-Q, Current Reports on Form 8-K, and all amendments to those reports can be obtained free of charge from our investor relations website, <http://ir.capfed.com>. SEC filings are available on our website immediately after they are electronically filed with or furnished to the SEC, and are also available on the SEC's website at [www.sec.gov](http://www.sec.gov).

#### Critical Accounting Policies

Our most critical accounting policies are the methodologies used to determine the ACL and fair value measurements. These policies are important to the presentation of our financial condition and results of operations, involve a high degree of complexity, and require management to make difficult and subjective judgments that may require

assumptions or estimates about highly uncertain matters. The use of different judgments, assumptions, and estimates could cause reported results to differ materially. These critical accounting policies and their application are reviewed at least annually by the audit committee of our Board of Directors. For a full discussion of our critical accounting policies, see Item 7 - "Management's Discussion and Analysis of Financial Condition and Results of Operations - Critical Accounting Policies" in the Company's Annual Report on Form 10-K for the fiscal year ended September 30, 2015.

## Financial Condition

The following table presents selected balance sheet information as of the dates indicated.

	June 30, 2016	March 31, 2016	December 31, 2015	September 30, 2015	June 30, 2015	
	(Dollars in thousands)

Stockholders' equity	1,380,815	1,403,408	1,390,833	1,416,226	1,426,723	
Equity to total assets at end of period	14.9	% 15.1	% 15.2	% 14.4	% 15.6	%

Assets. Total assets were \$9.24 billion at June 30, 2016 compared to \$9.84 billion at September 30, 2015. The \$602.4 million decrease was due primarily to a \$619.8 million decrease in cash and cash equivalents and a \$36.1 million decrease in FHLB stock, both due to the removal of the entire daily leverage strategy at June 30, 2016 compared to \$700.0 million of the daily leverage strategy remaining in place at September 30, 2015. The entire \$2.10 billion daily leverage strategy was reinstated on July 1, 2016. Additionally, loans receivable, net, increased \$214.1 million which was partially offset by a \$174.1 million decrease in the securities portfolio.

Loans Receivable. Loans receivable, net, increased to \$6.84 billion at June 30, 2016 from \$6.63 billion at September 30, 2015. The growth in the loan portfolio during the current year nine month period was primarily in the correspondent one- to four-family purchased loan portfolio and was largely funded with cash flows from the securities portfolio and deposit growth.

The following table presents the balance and weighted average rate of our loan portfolio as of the dates indicated. Within the one- to four-family loan portfolio at June 30, 2016, 61% of the loans had a balance at origination of less than \$417 thousand.

Total loans receivable, net	\$6,839,123		\$6,625,027	

Loan Activity - The following table summarizes activity in the loan portfolio, along with weighted average rates where applicable, for the periods indicated, excluding changes in undisbursed loan funds, ACL, discounts/unearned loan fees, and premiums/deferred costs. Loans that were paid-off as a result of refinances are included in repayments. Loan endorsements are not included in the activity in the following table because a new loan is not generated at the time of the endorsement. The endorsed balance and rate are included in the ending loan portfolio balance and rate. During the three and nine months ended June 30, 2016, the Bank endorsed \$36.4 million and \$80.5 million of one- to four-family loans, respectively, reducing the average rate on those loans by 95 and 89 basis points, respectively.

The following tables present loan origination, refinance, and purchase activity for the periods indicated, excluding endorsement activity, along with associated weighted average rates and percent of total. Loan originations, purchases, and refinances are reported together. The fixed-rate one- to four-family loans less than or equal to 15 years have an original maturity at origination of less than or equal to 15 years, while fixed-rate one- to four-family loans greater than 15 years have an original maturity at origination of greater than 15 years. The adjustable-rate one- to four-family loans less than or equal to 36 months have a term to first reset of less than or equal to 36 months at origination and adjustable-rate one- to four-family loans greater than 36 months have a term to first reset of greater than 36 months at origination.

One- to Four-Family Loans - The following table presents, for our portfolio of one- to four-family loans, the balance, percentage of total, weighted average credit score, weighted average LTV ratio, and the average balance per loan as of the dates presented. Credit scores are updated at least semiannually, with the latest update in March 2016, from a nationally recognized consumer rating agency. The LTV ratios were based on the current loan balance and either the lesser of the purchase price or original appraisal, or the most recent Bank appraisal, if available. In most cases, the most recent appraisal was obtained at the time of origination.

One- to Four-Family Loan Commitments - The following table summarizes our one- to four-family loan origination and refinance commitments and one- to four-family correspondent purchase commitments as of June 30, 2016, along with associated weighted average rates. Commitments generally have fixed expiration dates or other termination clauses and may require the payment of a rate lock fee. A percentage of the commitments are expected to expire unfunded, so the amounts reflected in the table below are not necessarily indicative of future cash requirements.

	Fixed-Rate		Adjustable- Rate	Total Amount	Rate
	15 years or less	More than 15 years

Rate	3.11	% 3.71	% 2.90		%

Commercial Real Estate Loans - Commercial real estate loans are originated or participated in based on the income producing potential of the property, the collateral value, and the financial strength of the borrower. Additionally, the Bank generally requires personal guarantees. The Bank generally requires a minimum debt service coverage ratio of 1.25 and limits LTV ratios to 80% for commercial real estate loans depending on the property type.

During the current quarter, the Bank continued to grow its commercial real estate loan portfolio by purchasing a \$34.5 million participation in a commercial real estate construction loan. At June 30, 2016, the Bank had \$51.6 million of outstanding commercial real estate loan commitments. The Bank intends to continue to grow its commercial real estate loan portfolio through participations with correspondent lenders and other lead banks with which the Bank already has commercial real estate lending relationships.

The following table presents the Bank's commercial real estate loans and commitments by industry classification, as defined by the North American Industry Classification System, as of June 30, 2016. Based on the terms of the construction loans as of June 30, 2016, the undisbursed amounts in the table are projected to be disbursed by March, 2018. It is possible that not all of the funds will be disbursed due to the nature of the funding of construction projects.

	Unpaid Principal	Undisbursed Amount	Gross Loan Amount	Outstanding Commitments	Total	% of Total

\$1 to \$5 million	23	67,869
Less than \$1 million	14	4,617
	49	\$349,918

Asset Quality. The Bank's traditional underwriting guidelines have provided the Bank with generally low delinquencies and low levels of non-performing assets compared to national levels. Of particular importance is the complete and full documentation required for each loan the Bank originates, participates in or purchases. One- to four-family owner occupied loans are underwritten according to the "ability to repay" and "qualified mortgage" standards, as issued by the CFPB, with total debt-to-income ratios not exceeding 43% of the borrower's verified income. This allows the Bank to make an informed credit decision based upon a thorough assessment of the borrower's ability to repay the loan. See additional discussion regarding underwriting standards in "Part I, Item 1. Business - Lending Practices and Underwriting Standards" in the Company's Annual Report on Form 10-K for the fiscal year ended September 30, 2015. In the following asset quality discussion, unless otherwise noted, correspondent purchased loans are included with originated loans and bulk purchased loans are reported as purchased loans.

Delinquent and non-performing loans and OREO - The following table presents the Company's 30 to 89 day delinquent loans at the dates indicated. Of the loans 30 to 89 days delinquent at June 30, 2016, approximately 76% were 59 days or less delinquent.

	Loans Delinquent for 30 to 89 Days at:

The table below presents the Company's non-performing loans and OREO as of the dates indicated. Non-performing loans are loans that are 90 or more days delinquent or in foreclosure and nonaccrual loans less than 90 days delinquent but required to be reported as nonaccrual pursuant to regulatory reporting requirements, even if the loans are current. At all dates presented, there were no loans 90 or more days delinquent that were still accruing interest. Non-performing assets include non-performing loans and OREO. OREO primarily includes assets acquired in settlement of loans. Over the past 12 months, OREO properties were owned by the Bank, on average, for approximately five months before the properties were sold.

Represents loans required to be reported as nonaccrual pursuant to regulatory reporting requirements even if the loans are current. At June 30, 2016, March 31, 2016, December 31, 2015, September 30, 2015, and June 30, 2015, (1) this amount was comprised of \$2.8 million, \$1.8 million, \$2.2 million, \$2.2 million, and \$3.4 million, respectively, of loans that were 30 to 89 days delinquent and are reported as such, and \$7.3 million, \$6.9 million, \$5.8 million, \$7.2 million, and \$7.4 million, respectively, of loans that were current.

Excluding loans required to be reported as nonaccrual pursuant to regulatory reporting requirements even if the loans are current, non-performing loans as a percentage of total loans were 0.26%, 0.25%, 0.27%, 0.25%, and (2) 0.22%, at June 30, 2016, March 31, 2016, December 31, 2015, September 30, 2015, and June 30, 2015, respectively.

(3) Real estate-related consumer loans where we also hold the first mortgage are included in the one- to four-family category as the underlying collateral is one- to four-family property.

(4) Represents a single property the Bank purchased for a potential branch site but now intends to sell.

Once a one- to four-family loan is generally 180 days delinquent, a new collateral value is obtained through an appraisal, less estimated selling costs and anticipated private mortgage insurance ("PMI") receipts. Any loss amounts identified as a result of this review are charged-off. At June 30, 2016, \$11.5 million, or 67%, of the one- to four-family loans 90 or more days delinquent or in foreclosure had been individually evaluated for loss and any related losses have been charged-off.

The following table presents the states where the properties securing one percent or more of the total amount of our one- to four-family loans are located and the corresponding balance of loans 30 to 89 days delinquent, 90 or more days delinquent or in foreclosure, and weighted average LTV ratios for loans 90 or more days delinquent or in foreclosure at June 30, 2016. The LTV ratios were based on the current loan balance and either the lesser of the purchase price or original appraisal, or the most recent Bank appraisal, if available. At June 30, 2016, potential losses, after taking into consideration anticipated PMI proceeds and estimated selling costs, have been charged-off.

TDRs - The following table presents the Company's TDRs, based on accrual status, at the dates indicated. At June 30, 2016, \$24.6 million of TDRs were included in the ACL formula analysis model and \$113 thousand of the ACL was related to these loans. The remaining \$13.6 million of TDRs at June 30, 2016 were individually evaluated for loss and any potential losses have been charged-off.

(1) Nonaccrual TDRs are included in the non-performing loan table above.

Allowance for credit losses and Provision for credit losses - Management maintains an ACL to absorb inherent losses in the loan portfolio based on ongoing quarterly assessments of the loan portfolio. The ACL is maintained through provisions for credit losses which are either charged to or credited to income. Our ACL methodology considers a number of factors including the trend and composition of delinquent loans, results of foreclosed property and short sale transactions, charge-off activity and trends, the current status and trends of local and national economies (particularly levels of unemployment), trends and current conditions in the real estate and housing markets, loan portfolio growth and concentrations, and certain ACL ratios such as ACL to loans receivable, net and annualized historical losses to ACL. We continually monitor the level of risk in our commercial real estate loan portfolio, including concentrations in such factors as geographic locations, property types, tenant brand name, borrowing relationships, and lending relationships in the case of participations loans, among other factors. For additional information on the ACL, see "Part II, Item 7 - Management's Discussion and Analysis of Financial Condition and Results of Operations - Critical Accounting Policies" in the Company's Annual Report on Form 10-K for the fiscal year ended September 30, 2015.

The Bank did not record a provision for credit losses during the current nine month period due to the continued low level of net loan charge-offs and delinquent loan balances. Net loan charge-offs were \$131 thousand for the current year nine month period. The improvement in collateral values has assisted in lowering our net charge-off amounts compared to prior years. At June 30, 2016, loans 30 to 89 days delinquent were 0.30% of total loans and loans 90 or more days delinquent or in foreclosure were 0.26% of total loans.

The distribution of our ACL at the dates indicated is summarized below. The loan amount in the table below represents outstanding loan balances net of undisbursed loan funds. Included in bulk purchased loans are \$248.5 million loans, or 56% of the total bulk purchased loan portfolio, at June 30, 2016, for which the seller of the loans has guaranteed, and has the ability, to repurchase or replace any delinquent loans. The Bank has not experienced any loan losses with this group of loans since the loan package was purchased in fiscal year 2012. For the \$191.4 million of bulk purchased loans at June 30, 2016 that do not have the above noted guarantee, the Bank has continued to experience a reduction in loan losses due to an improvement in collateral values. A large portion of these loans were originally interest-only loans with interest-only terms up to 10 years. All of the interest-only loans are now fully amortizing loans. Our correspondent purchased loans are purchased on a loan-by-loan basis from a select group of correspondent lenders and are underwritten by the Bank's underwriters based on underwriting standards that are generally the same as for our originated loans.

Securities. The following table presents the distribution of our MBS and investment securities portfolios, at amortized cost, at the dates indicated. Overall, fixed-rate securities comprised 77% of these portfolios at June 30, 2016. The weighted average life ("WAL") is the estimated remaining maturity (in years) after three-month historical prepayment speeds and projected call option assumptions have been applied. Weighted average yields on tax-exempt securities are not calculated on a fully taxable equivalent basis.

Mortgage-Backed Securities - The balance of MBS, which primarily consists of securities of U.S. GSEs, decreased \$118.1 million, from \$1.46 billion at September 30, 2015, to \$1.34 billion at June 30, 2016. The following tables summarize the activity in our portfolio of MBS for the periods presented. The weighted average yields and WALs for purchases are presented as recorded at the time of purchase. The weighted average yields for the beginning balances are as of the last day of the period previous to the period presented and the weighted average yield for the ending balances are as of the last day of the period presented and are generally derived from recent prepayment activity on the securities in the portfolio as of the dates presented. The beginning and ending WAL is the estimated remaining principal repayment term (in years) after three-month historical prepayment speeds have been applied.

Liabilities. Total liabilities were \$7.86 billion at June 30, 2016 compared to \$8.43 billion at September 30, 2015. The \$567.0 million decrease was due primarily to a \$798.5 million decrease in FHLB borrowings, largely as a result of the removal of the entire daily leverage strategy at June 30, 2016, along with a \$100.0 million decrease in term FHLB advances, partially offset by a \$252.6 million increase in the deposit portfolio.

Deposits - Deposits were \$5.09 billion at June 30, 2016 compared to \$4.83 billion at September 30, 2015. The \$252.6 million increase was due primarily to a \$79.3 million increase in the retail certificate of deposit portfolio, a \$60.3 million increase in the checking portfolio, and a \$55.9 million increase in the wholesale certificate of deposit portfolio. We continue to be competitive on deposit rates and, in some cases, our offer rates for certificates of deposit have been higher than peers. Increasing rates offered on longer-term certificates of deposit has been an on-going balance sheet strategy by management in anticipation of higher interest rates. If short-term interest rates continue to rise, our customers may move funds from their checking, savings and money market accounts to higher yielding deposit products within the Bank or withdraw their funds from these accounts, including certificates of deposit, to invest in higher yielding investments outside of the Bank.

The following table presents the amount, weighted average rate and percentage of total for the components of our deposit portfolio at the dates presented.

	June 30, 2016			March 31, 2016			September 30, 2015		
	Amount	Rate	% of Total	Amount	Rate	% of Total	Amount	Rate	% of Total

Borrowings - The following tables present term borrowing activity for the periods shown, which includes FHLB advances, at par, and repurchase agreements. Line of credit activity is excluded from the following tables. The weighted average effective rate includes the impact of the amortization of deferred prepayment penalties resulting from FHLB advances previously prepaid. Rates on new borrowings are fixed-rate. The weighted average maturity ("WAM") is the remaining weighted average contractual term in years. The beginning and ending WAMs represent the remaining maturity at each date presented. For new borrowings, the WAMs presented are as of the date of issue.

Stockholders' Equity. Stockholders' equity was \$1.38 billion at June 30, 2016 compared to \$1.42 billion at September 30, 2015. The \$35.4 million decrease between periods was due primarily to the payment of \$100.4 million in cash dividends, partially offset by net income of \$62.8 million. The cash dividends paid during the current year nine month period consisted of a \$0.25 per share cash true-up dividend related to fiscal year 2015 earnings per the Company's dividend policy, a \$0.25 per share True Blue® Capitol dividend, and three regular quarterly cash dividends totaling \$0.255 per share. On July 21, 2016, the Company declared a regular quarterly cash dividend of \$0.085 per share, or approximately \$11.3 million, payable on August 19, 2016 to stockholders of record as of the close of business on August 5, 2016.

In October 2015, the Company announced a stock repurchase plan for up to \$70.0 million of common stock. It is anticipated that shares will be purchased from time to time based upon market conditions and available liquidity. There is no expiration for this repurchase plan. The Company did not repurchase any shares during the nine month period ended June 30, 2016.

At June 30, 2016, Capitol Federal Financial, Inc., at the holding company level, had \$93.6 million on deposit at the Bank. For fiscal year 2016, it is the intent of the Board of Directors and management to continue with the payout of 100% of the Company's earnings to its stockholders, in addition to the True Blue Capitol dividend paid in June 2016 which was funded with a \$36.0 million capital contribution from the Bank. Dividend payments depend upon a number of factors including the Company's financial condition and results of operations, regulatory capital requirements, regulatory limitations on the Bank's ability to make capital distributions to the Company, and the amount of cash at the holding company.

The following table presents regular quarterly dividends and special dividends paid in calendar years 2016, 2015, and 2014. The amounts represent cash dividends paid during each period. For the quarter ending September 30, 2016, the amount presented represents the dividend payable on August 19, 2016 to stockholders of record as of August 5, 2016.

	Calendar Year
